

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

## Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + Keep it legal Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

## **About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

## PREFACE

THIS DICTIONARY OF THE BIBLE, as stated in the Preface to Volumes I. and II. already published, is intended as a contribution towards furnishing the Church for the great work of *teaching*. It is a Dictionary of the Old and New Testaments, together with the Old Testament Apocrypha, according to the Authorized and Revised Versions, with constant reference to the original tongues. Every effort has been used to make the information it contains as full, reliable, and accessible as possible.

1. As to fulness. In a Dictionary of the Bible we expect an explanation of all the words occurring in the Bible which do not explain themselves. The present Dictionary meets that expectation more nearly than any work hitherto published. Articles will be found on all the Persons and Places that are mentioned in the Bible, on its Archeology and Antiquities, its Ethnology, Geology, and Natural History, its Theology and Ethics, and on such words occurring in the Authorized or Revised Version as are now unintelligible or liable to misapprehension. Much attention has been given to the language, literature, religion, and customs of the nations around Israel. The Versions have been fully treated. Articles have been contributed on the Apocalyptic and other uncanonical writings of the Jews, as well as on such theological or ethical ideas as are believed to be contained in the Bible, though their modern names are not found there.

2. As to reliability. The writers have been chosen out of respect to their scholarship and nothing else. The articles have all been written immediately and solely for this Dictionary, and, except the shortest, they are all signed. Even the shortest, however, have been contributed by writers of recognized ability and authority. In addition to the work upon it of authors and editors, every sheet has passed through the hands of the three eminent scholars whose names are found on the title-page.

3. As to accessibility. The subjects are arranged in alphabetical order, and under the most familiar titles. All the modern devices of cross-reference and black-lettering have been freely resorted to, so that in the very few instances in which allied subjects have been grouped under one heading (such as MEDICINE in this volume) the particular subject wanted will be found at once. Proper Names are arranged according to the spelling of the Revised Version, but wherever it seemed advisable the spelling of the Authorized Version is also given, with a cross-

vii

reference. The Abbreviations, considering the size and scope of the work, will be seen to be few and easily mastered. A list of them, together with a simple scheme for the uniform transliteration of Hebrew and Arabic words, will be found on the following pages.

It is with devout thankfulness that the Editor sees this third volume of an arduous though congenial work issued within reasonable limits of time. The fourth volume is in progress, and may be looked for next year. He has pleasure in again expressing his thanks to many friends and fellow-workers, including the authors of the various articles. But especially he desires to thank the members of the editorial staff, the publishers, the printers, and (without mentioning others whose names have already appeared in the Preface to Vols. I. and II.) Mr. G. F. HILL of the Department of Coins and Medals in the British Museum for assistance and advice in the preparation of the illustrations to the article on the MONEY of the Bible.

•.• Messrs. Charles Scribner's Sons, New York, have the sole right of publication of this DICTIONARY OF THE BIBLE in the United States and Canada.

- Rev. JOSEPH HENRY THAYER, M.A., D.D., Litt.D., Bussey Professor of New Testament Criticism and Interpretation in the Divinity School of Harvard University.
- CUTHBERT HAMILTON TURNER, M.A., Fellow of Magdalen College, Oxford.
- Major-General Sir CHARLES WARREN, G.C.M.G., K.C.B., F.R.S., Royal Engineers.
- Rev. ADAM C. WELCH, M.A., B.D., Helensburgh.
- The late Rev. HENRY ALCOCK WHITE, M.A., Tutor in the University of Durham, and formerly Fellow of New College, Oxford.
- Rev. NEWPORT J. D. WHITE, M.A., B.D., Librarian of Archbishop Marsh's Library, and Assistant Lecturer in Divinity and Hebrew in the University of Dublin.
- Rev. OWEN C. WHITEHOUSE, M.A., Principal and Professor of Biblical Exegesis and Theology, Cheshunt College, Herts.
- Major-General Sir CHARLES WILLIAM WILSON, R.E., K.C.B., K.C.M.G., D.C.L., LL.D., F.R.S.
- Rev. FRANCIS HENRY WOODS, M.A., B.D., Vicar of Chalfont St. Peter, and late Fellow and Theological Lecturer of St. John's College, Oxford.
- Rev. JOHN WORTABET, M.A., M.D., Beyrout, Syria.

,

## DICTIONARY OF THE BIBLE

KIR (yr).-The name of a country and nation. It occurs in the following passages :--(1) Am 9<sup>7</sup> Kir is the land from which God brought the Aramæans (Syrians), as He led the Israelites from Egypt, etc. It must, after this analogy, be a country remote from the principal seat (*i.e.* Damascus) of the Aramæans in Amos' time. The LXX reads 'depth,' 'pit' ( $\beta \delta \theta \rho os$ , *i.e.* vp). (2) 2 K 16<sup>9</sup> After the capture of Damascus, the Ara-means wave average action to Kirs hu the kinmæans were carried captive to Kir by the king (Tiglath-pileser III.) of Assyria. This would indicate that Kir was under Assyrian dominion, and, again, at a considerable distance from the region of Damascus near the borders of the Assyrian empire. But the name of the country was wanting in the LXX originally (B), and inserted later (A, In the LXA originally (B), and inserted later (A, etc.  $Ku\rho\eta\nu\dot{\eta}\nu\dot{\sigma}\epsilon$ ) from the Hebrew text (after Sym-machus). Therefore this passage is suspicious; see Field, *Hexap*. pp. xxii, 682. (3) Am 1<sup>6</sup> threatens indeed: the people of Aram shall go into captivity unto Kir (LXX 'the one called as ally,  $\dot{\epsilon}\pi(\kappa\lambda\eta\tau\sigmas,$  $\pi\gamma$ ?). But this passage also seems to be inter-polated from Am 9<sup>7</sup>. If Kir was the original home of the Aramæans (Am 9<sup>7</sup>), the Assyrians would never have deported them back to their old country never have deported them back to their old country, where they would have found remainders of the original stock of their nation, and would have, by union with them, become strong again and dangerous to the king of Nineveh. The Assyrians, as well as other nations, deported their captives always to countries where they were strangers, separated by language and race from the inhabitants of the new country, and therefore forced to rely upon the government which had settled them rely upon the government which had settled them there. Consequently, the name Kir in this passage is strange, and to be used only with caution. (4) Is 22° an attack on Jerusalem is described, evi-dently that of the Assyrian army under Senna-cherib (cf. 2 K 18): 'And Elam bare the quiver with chariots of men\* and horsemen, and Kir (LXX suraywyt, cf.  $\neg \neg ?$ ) uncovered  $(\neg \neg ≃)$  the shield' (i.e. prepared it for fighting). Consequently, Kir was among the allies or subjects of the Assyrians, and was a warlike nation. (5) Also Is 22° seems to belong here:  $\neg \neg \neg$ , RV 'a breaking down (others, surrounding) of the walls (sing. !) and a crying to the mountains,' LXX dr∂ μακροῦ ểωr μeyàλωu πλarῶurai éπi rà δρη, Vulg. 'scrutans murum et magnificus super montem.' The passage was rendered by Cheyne (following Delitzsch, Paradies, 236), 'Kir undermineth, and Shoa is at the mount.' Klostermann, Bredenkamp, Cornill, Winckler (Alttest. Untersuch. 177, who conjectures, 'who \* 'Ot men' may be a gloss, see Duhm. \* 'Of men' may be a gloss, see Duhm.

VOL. 111.-1

stirs up Koa' and Shoa' against the mountain') stirs up Koa and Shoa against the mountain ) have, however, given up the paronomasia and corrected Kir to Koa' (rp), a nation mentioned together with Shoa' in Ezk  $23^{-2}$ ; the Kutú or Kú of the Assyrian inscriptions, a warlike nomadic tribe S.E. of Assyria, chiefly on the banks of the modern rivers Dijalå (the Gyndes of the classics) and Adhem adjoining the Sutú, i.e. the biblical Shoa'. This agrees with Is  $22^{\circ}$ , where Kir is a paighbour of Flam I t results that we Kir is a neighbour of Elam. It results that we have to try the same emendation also in this passage (Is 22<sup>s</sup>), and indeed the LXX reads there consonants which come nearer to  $\mu p$  than to  $\nu p$ , likewise in Am 9 (where  $\neg y = \text{original } \mu p$ ). See, further, art. KOA, footnote.

It is very probable, then, that in all passages the same pastoral people Koa' קרע, were originally meant. The corruption of one may have caused meant. The corruption of one may have caused that of the other places. (For the Assyrian and Babylonian texts see Delitzsch, *Paradies*, 233; Schrader,  $KAT^2$  425). The country *Gutium*, *Guti*, which is mentioned as early as B.C. 3000 in in-scriptions, seems to be the same as *Kuti*, *Kutû*, *Kû*, which is only the later spelling.\* The in-babiteries come to have been always Somitz so the habitants seem to have been always Semites, so that their relationship to the Aramæans, who appear in cuneiform inscriptions first in Southern Babylonia, is very plausible. Otherwise, the cuneiform inscrip-tions have been searched in vain for a nation Kir. The ancient versions (Aq., Vulg., partly LXX, Targum) were guessing when they introduced the Libyan Cyrene, which is absurd. † By those to whom the emendation of Kir to Koa' seems too bold, the conjecture may be hazarded that some day the name Kir will be discovered in the same region E. of the Lower and Middle Tigris, where various nomadic tribes roamed with the rapacious Shoa' and Koa'. But the emendation seems more plausible. W. MAX MÜLLER.

KIR (OF MOAB) (קיר מואָב), τό τεῖχος τῆς Mωa $\beta(\epsilon)$ lriδos, murus Moab).—One of the chief towns of the land of Moab, coupled with Ar of Moab, Is 15<sup>1</sup>. Since in the Moabite tongue kir=Heb. '*ir* or '*ār*, it is conceivable that Kir of Moab and Ar of Moab are identical. The almost universally accepted identi-fication of Kir of Moab with the modern Kerak

\* Perhaps occurring also in Egyptian texts as Gut, see W. M. Müller, Asien, p. 281. \* More modern guesses: the Köper or Köpper, river of Armenia, the modern Kur (Michaelis). But this name has k not k, and is too far north. Bochart proposes Kepering (Ptol.) in Eastern Media, but this place is obscure and too far east. Furrer suggests the region near Antioch called Köpper, Keppering, but this name was given only in later times in imitation of a Macedonian city (see Mannert).

**KIRAMA** 

rests upon the Targum on Isaiah, where Kir is rendered by Kerakka (so also apparently Ar of Moab). This may have been a native name which has survived, or it may be a rendering of that name which has supplanted it. The modern name of Kerak can be traced back as belonging to the place in early times. Under the form  $Xa\rho a\kappa \mu \hat{\omega}\beta a$ it appears in the acts of the Council of Jerusalem A.D. 536, and in the geographers Ptolemy and Stephanus of Byzantium. The Crusaders discerned the strategic importance of the place as commandthe strategic importance of the place as command-ing the trade route from Egypt and Arabia into Syria. Under king Fulco of Jerusalem, A.D. 1131, a castle was built there, of which extensive re-mains may yet be seen. Saladin in A.D. 1183 unsuccessfully besieged it; it fell into his hands in A.D. 1188. The contributions which the Chroniclers of the Crusades make to the local-izing of the site are full and interesting; it was then the chief city of Arabia Secunda or Petra. then the chief city of Arabia Secunda, or Petra-censis; it is specified as in the BelkA, and dis-tinguished from Moab or Rabbat, and from Mons Regalis or Montreal. The Crusaders further identified it with Petra, or gave that name to it; an error which the Greek Church has per-petuated, for the Greek bishop of Petra has his seat at Kerak. It is frequently referred to in writers of the Christian period as *Charak-Moba* (also *Mobu-Charax*), corrupted to *Charakoma*, *Charagmucha*, *Karach*, and *Kara*. On the ques-tion of the identity of Kir of Moab with Kir-hareseth or Kir-heres see art. on these names. The Wady el-Kerak runs S.E from the head of the bay of the Dead Sea, which lies east of the then the chief city of Arabia Secunda, or Petra-

the bay of the Dead Sea, which lies east of the peninsula el-Lisân, uniting with the Wady 'Ain Franji about 10 miles up. Kerak is situated on a lofty spur between these two ravines, and is about four thousand feet above the level of the Dead Sea. The sides of the hill descend steeply some thousand feet to the bettern of the valuer. some thousand feet to the bottom of the valleys, but the height on the other side is much greater, so that the town is commanded by hills on every side. (This may explain 2 K 3<sup>25 eud</sup>). Such a Such a side. (This may explain 2 K 3<sup>outa</sup>). Such a position was for ancient warfare almost impreg-nable. The great weakness must have been want of water, and there are remains of enormous rock-hewn cisterns. The city was surrounded by a wall of great thickness, which had but two entrances—one on the N.W., the other on the S., each being approached by a long tunnel cut through the solid rock. There are remains of five through the solid rock. There are remains of five great towers; but further investigation seems needed to decide what is ancient Moabite work, and what is due to mediæval engineers.

A map of the town is given in de Saulcy, La Mer Morte, 8, 20.

KIRAMA (A Kupaµd, B Kupaµa, AV Cirama), 1 Es 5<sup>30</sup>.—The people of Kirama and Gabbe re-turned from Babylon under Zerub., 621 strong. <sup>1</sup>Apá $\mu$ ); cf. Neh 7<sup>20</sup> ('Apa $\mu$ a'). The form in 1 Es is due to the definite article  $\bar{\eta}$  being read as  $\bar{\eta}$ .

KIR-HARESETH (קיריטָרָשָׁה), דסוֹּג אבזיטגטּסוּט שׁבָּפּר שבאבדאסינג, Vulg. murus cocti lateris, Is 167; in 2 K 3<sup>28</sup> pausal form קיריטָרָשָ, AV Kir-haraseth, LXX דסט׳ג אנופטי דסוֹגסט אבטעסיע, Vulg. murus fictilis) or KIR-HERES (קיריעָרָשׁ), אנוער מעֹגעסט, murus fictilis, Jer 48<sup>31. 38</sup>; in Is 16<sup>11</sup>

#### KIRIATH

pausal form קירחר AV Kir-haresh, LXX reîxos évekaluoas, Vulg. ad murum cocti lateris).—These two names are to be taken as slight variants of one and the same proper name denoting a place in the country of Moab, evidently regarded as a place of the first rank, of great strength and importance. The natural conclusion that Kir of Moab is meant is a conjecture, but has received general assent.

The LXX and Vulgate regard these names, The LXX and Vulgate regard these names, however, as phrases, the meaning of which is sought by an attempted Hebrew etymology. That they were so regarded when the vowel points were added to the text need not be assumed, though some traditional etymology may have influenced the pointing. Certainly, the ety-mologies suggested connecting them with kir, 'a wall,' and some Hebrew word denoting 'clay,' or its manufactured products such as 'bricks' or 'pottery,' do not lead to any convincing result. That kir also denoted a 'fortress or walled city' in Hebrew seems assumed to meet the case; in Hebrew seems assumed to meet the case; a 'city of potsherds' or a 'brick fortress,' even with the explanation 'because the chief seat of Moabite pottery,' is too obviously lame. Such a meaning would go against the identification with modern *Kerak*. The top of a steep hill is unlikely to be a 'seat of pottery,' and the accounts of the remains there point to the ancient walls being of stone, not brick.

There does not seem any call to seek a Hebrew etymology. If it was a Moabite name, and the variations in spelling and vocalization suggest its being foreign to the Hebrew scribes,\* then we must turn to the native tongue for an etymology. There we find that kir is the Moabite for 'town,' walled or fortified. The second element of these names is not, however, preserved in the scanty remains of the Moabite tongue (cf., however, the place name MHRT in line 14 of Mesha's Inscription). Palmer (*The Desert of the Exodus*, p. 472 f.) says that *harit* means 'mound' in the language of the modern inhabitants. The obvious difficulty is that an interchange of t and s is unusual; we should expect rather bares than bares as representing modern barit. The modern language of Moab would need detailed examination before a decisive rule could be laid down.† Of a somewhat similar Assyrian word for 'mount' (often a wooded hill),

both forms, hursu and hursu, exist side by side. If the commonly received identification of the place with Kir of Moab and that with modern Kerak be correct, we might regard 'mountain fortress' as a suitable name ; but that does not establish the etymology in the absence of direct evidence from native sources. All that is said of Kir-heres, etc., seems to suit Kerak well enough, and the Targum on Isaiah renders Kir-hareseth by Kerak tokpehon, which perhaps points to a 'cliff' fortress of some kind. See, further, art. KIR OF MOAB. C. H. W. JOHNS.

KIRIATH (קריה).---A town noticed with Gibeah as belonging to Benjamin, Jos 18<sup>25</sup>. Both the text and the site are uncertain, but the latter may possibly be found at *Kuriet el. Enab*, 'town of grapes,' west of Jerusalem, which is often called simply Kurieh by the inhabitants. See SWP vol. iii. sheet xvii. This village, on the road from Jaffa to Jerusalem, is also now called *Abu Ghosh*, from a celebrated chief so named. It is remarkable for its fine Norman church, built in the 12th cent. A.D..

It is held, however, by most OT scholars that in Jos 1828 Kiriath is a mistake for Kiriath-jearim,

\* 'Harosheth of the Gentiles' (Jg 4<sup>2</sup> 13 16) is a similar name, and both it and Hareseth may go back to Canaanite sources. † There is a Kasr haraka still, 35 minutes' walk above Derd'a (ZDPY, 1895, p. 69 fl.).

#### KIRIATHAIM

rup having been dropped through confusion with the following up. Not only does mp bear the ap-pearance of a construct, but the same conclusion is supported by the LXX, B κal πόλεις κal Γαβ-αωθιαρείμ (where Gibeath and Kiriath-jearim are mixed up), A πόλις Ιαρίμ, Luc. πόλις Ιαρείμ (cf. Dillm. ad. loc., and Bennett in SBOT).

C. R. CONDER.

KIRIATHAIM (כקרמים). —1. A town in a 'plain' (קרמים) inhabited by the Emim at the time of Chedorlaomer's campaign (Gn 14<sup>5</sup>), mentioned with Heshbon and Elealeh as built by Reuben (Nu 32"), also mentioned with Kedemoth and Mephaath, farther mentioned with Redemoth and Mephatin, farther south, and with Beth peor, Baal-meon, and Beth-jeshimoth (Jos 13<sup>18,19,20</sup>). It appears as a Moabite town in Jer 48<sup>23</sup>, Ezk 25<sup>9</sup>, and on the stone of Mesha (line 10) is called *Kiryathën*. It may be distinct from Kerioth (which see). Accord-ing to the Onomasticon (s. Kapaðaeiµ, Kapáða), it lay 10 Roman miles west of Medeba. The site is uncertain although many identify Kirja. site is uncertain, although many identify Kiria-thaim with the ruin called Karéyát, lying S.W. of Makaur (Machærus) and S. of Jebel 'Attarús. It is probably to be sought towards the south of the Moab plateau, but may have been near Heshbon. Burckhardt's identification with et. Teim, 11 miles W. of Medeba, is now generally abandoned.

LITERATURE. – Porter, Handbook, 800; Tristram, Land of Moab, 275, 305; G. A. Smith, HGHL 5671.; Buhl, GAP 2761.; Dillmann on Gn 143 and Nu 8237.

2. A city in Naphtali, given to the Gershonite Levites, 1 Ch 6<sup>76</sup> [Heb.<sup>61</sup>]. In the parallel passage, Jos 21<sup>22</sup>, it is called Kartan (which see).

C. R. CONDER.

קריה אַרָבּע in Neh 11<sup>26</sup> קאַרְבָּע (קריה אַרְבָּע, in Neh 11 -A name which occurs repeatedly in the OT, always except in Neh 11<sup>25</sup> with the explanation always except in Neh 11<sup>26</sup> with the explanation that it is another name for Hebron, Gn 23<sup>3</sup> 35<sup>47</sup> (both P), Jos 14<sup>16</sup> 15<sup>18</sup> (both JE) 15<sup>64</sup> 20<sup>7</sup> 21<sup>11</sup> (all P), Jg 1<sup>10</sup>. For the situation and history see art. HEBRON. Kiriuth-arba is probably = Tetrapolis,\* 'four-towns' (cf. 927 384 'seven wells'), the name possibly implying that the city had four quarters occupied by four confederate clans. If the name *Hebron* means 'confederacy,' it may have had a similar origin. In the MT of Jos 15<sup>13</sup> 21<sup>11</sup> 14<sup>16</sup> Kiriath-arba is taken as = 'city of Arba,' the latter supposed founder of it being called 'the father of supposed founder of it being called 'the father of the Anak,' or 'the greatest man among the Ana-kim.' As Moore points out, however, the LXX has preserved the original reading in the first two has preserved the original reading in the first two of these passages,  $\pi \delta \lambda is' \lambda \rho \beta \delta \kappa \mu \eta \tau \rho \delta \pi \delta \lambda is' (i.e. DE not$ 'ze') 'Brda', and in 14<sup>18</sup> ס דָשָׁר ס דָשָׁר is another mis-correction. It may be noted further that theselast two words gave rise to a curious piece ofRabbinical exegesis, 'hā'ādām haggādôl' beingsupposed to imply that Adam was buried atKiriath-arba (Hebron), 'the city of four saints,'namely Abraham Lenge Lengh and Adamnamely, Abraham, Isaac, Jacob, and Adam.

J. A. SELBIE. KIRIATH-ARIM, Ezr 226.-See KIRIATH-JEARIM.

kiriath-BAAL (קרה בעל 'city of Baal').--See KIRIATH-JEARIM.

kiRiATH-HUZOTH (קריה הצוה ' city of streets' (?), LXX  $\pi \delta \lambda \epsilon s \epsilon \pi a \delta \lambda \epsilon \omega r$ , which perhaps implies a read-ing mmxm instead of mxm).—One of the places to which Balak first went with Balaam, Nu 22<sup>30</sup>. It seems to have been near Ir of Moab (v.<sup>30</sup>), and It seems to have been near Ir of Moab (v.<sup>30</sup>), and Tristram may have been a suburb of that city. Tristram (Land of Moab, 305) is inclined to identify it with Kiriathaim, others (e.g. Knobel, Keil) think it is the same as Kerioth. C. R. CONDER.

\* So e.g. Moore and Hommel, the latter of whom identifies Kiriath-arba with the *Rubiti* of the Tel el-Amarna letters (AIIT 234 f.), but see König sart, on the Habiri in *Expos. Times.* March 1900. Sayce and Petrie make Rubiti = Rabbah of Jos 15<sup>50</sup>.

KIRIATH-JEARIM (קרית יארים) 'city of thickets'). One of the chief towns of the Gibeonites, Jos 9<sup>17</sup>, on the border of Judah and Benjamin (assigned to the former tribe in Jos 15<sup>5, 50</sup> 18<sup>14</sup>, Jg 18<sup>13</sup>, to the latter in Jos 18<sup>28</sup> if Kiriath [which see] = Kiriath-jearim). The position is more particularly described in Jg 18<sup>12</sup>, where the *Mahaneh* dan ('camp of Dan'), which was near Zorah and Eshtaol (Jg 13-), is said to have been 'behind' (*i.e.* west of) Kiriath-jearim. Kiriath-jearim appears also to have been near Beth-shemesh  $(1 \text{ S } 6^{21})$ , which was near Zorah. It becausing (1 S  $0^{-3}$ ), which was hear 207ah. It may have been the city beyond the border of Ben-jamin where Saul first met Samuel (1 S  $9^{6}$ , 6, cf. 10<sup>2</sup>). When the ark was sent back by the Philis-tines, it remained at Kiriath-jearim till the time of David (1 S  $7^{12}$ , 2 S  $6^{2}$ , where the city is called **Baale Judah** [but '223 is an error for '223]). In Jos 15<sup>60</sup> it bears the name Kiriath-baal, 'city of Baal,' and it is the same place that is called in Jos Baal, and it is the same place that is called in Jos 15<sup>9</sup>.<sup>10</sup> and 1 Ch 13<sup>9</sup> Baalah. Its inhabitants seem to have been related to the Hebronites, 1 Ch 2<sup>30</sup>. After the Captivity it is mentioned as re-peopled (Neh 7<sup>29</sup>; Ezr 2<sup>35</sup>, where Kiriath-arim [ $0 \neg y, 1 \neg p$ ] is a clerical error for Kiriath-jearim [ $0 \neg y, 1 p$ ]; 1 Es 5<sup>19</sup>, where it appears as Kariathiarius). It is prob-ably Kiriath-jearim that is referred to in Ps 132<sup>5</sup>, where 'the field of the wood' is mentioned as the place where the ark was found. The prophet Uriah ben-Shemaiah, who was put to death by Jehoiakim, was a native of Kiriath-jearim (Jer 26<sup>305</sup>). In the 4th cent. A.D. (*Onomasticon*, s. 'Cariathiarim'), it was shown 9 Roman miles from Jerusalem, on the way to Diospolis (Lydda), but this would not be to have been related to the Hebronites, 1 Ch 250. way to Diospolis (Lydda), but this would not be near Beth-shemesh or Zorah. In the upper part of the valley of Sorek an ancient ruined site called 'Erma exists, on the south side of a very rugged ravinc. It is evidently a town, with a remarkable rock terrace, and wells in the valley to the east. This site (suggested by Henderson) is suitable, being within sight of the mouth of the ravine, beyond which lies Beth-shemesh in the more open part of the valley, east of Zorah and Eshtaol, which appears to answer to the 'camp of Dan' (Mahaneh-dan). The ruin is on the ridge on which Chesalon (which see) stands, and therefore in the required position on the border which appears to have run north from Kiriath-jearim to Chesalon (Jos 15<sup>9, 10</sup>), or to have left Chesalon in Benjamin, north of the border which followed the valley of Sorek. The whole ridge is covered with copse to the present time. Possibly, Kiriath-jearim is noticed in the Tel el-Amarna letters (No. 106 Berlin) as Bîtû Bêlû or Beth Baal, a city revolting against Jerusalem (others suppose Jerus. itself to be so called in this passage); and it is remarkable that it was one of the few cities that submitted, without fighting, to the Hebrews.

Robinson's identification of Kiriath-jearim with Kuriet el. Enab or Abu Ghôsh does not meet the requirements of Jg  $18^{12}$  and  $1 \le 6$ .

requirements of Jg 13" and 150. LITERATURE.—The whole question of the site is fully discussed in SWP vol. iii. sheet xvii. see also Henderson, Palestine (Index); G. A. Smith, HGHL 225 f.; Moore, Judges, 393 f.; Dillmann on Jos 97; Buhl, GAP (Index); Robinson, Bill?<sup>2</sup> ii. 11 f. (Smith, Moore, Dillmann, Buhl, all speak with more or less suspicion of the correctness of Robinson's identification with Kuriet el. Enab, but decline to commit themselves to the 'Erna site, which Buhl pronounces to be still more improb-able, and Smith remarks that it would place Kiristh-jearim very far away from the other members of the Gibeonite league. Neither of these writers, however, gives due weight to the position near Chesalon). C. R. CONDER.

KIRIATH-SANNAH (קרות סוד), πολι; γραμμάτων) occurs once (Jos 15<sup>40</sup> P) as another and presumably an older name for Debir (wh. see). A third name was Kiriath-sepher (which see for site); and this, not Kiriath-sannah, was the reading of the LXX here.

To those who retain the Massor. reading the

**KIRIATH-SEPHER** 

meaning is obscure. Gesenius (Thes.) takes Sannah for a contraction of Sansannah, and translates 'palm-city'; but, besides that the contraction is unlikely, one hardly expects a palm city in 'the hill-country.' Sayce (HCM 54), following a suggestion mentioned by Ewald (*Gesch.* i.. 347 n.), translates 'city of instruction,' and uses the name to support his very precarious theory that Debir was a library and archive town of the Canaanites. He further suggests that the name may be present as Bit 'Sani in a fragmentary letter from Ebed-tob the vassal king of Jerusalem, in the Tel el-Amarna collection. A. C. WELCH.

KIRIATH-SEPHER (קריח ספר), πόλις γραμμάτως; Kαριασσώφαρ π" γ", B in Jg 1<sup>11</sup>) is twice mentioned in the parallel passages (Jos 15<sup>15f.</sup>, Jg 1<sup>11f.</sup>, J) as the older name of a town which the victors called Debir. It is frequently identified with the present of Debirsheet or willow which the present ed. Dhåheriveh, a village which lies '4 or 5 hours S.W. of Hebron,' on a high road down Wady Khulil, and which is on the frontier of the hill-country towards the Negeb (see, however, DEBIR).

Many commentators from the earliest times, accepting the word as Heb., have translated with various shades of sense 'book town' (cf. LXX above, Vulg. civitas litterarum, Targ. ארכי Sayce (HCM 54) has based on this a theory about the condition of literary culture among the early Canaanites. The three town names yield him proof of the presence of an oracle, which gave rise to a library, and so attracted students to a university. It is utterly unwarranted to build so much on the uncertain etymology of a non-Heb. word. Smith (*Hist. Geogr.* 279 n.) suggests that the sense may be 'toll-town,' and he compares for the translation 2 Ch  $2^{17}$ , and for the toll the town's position on a road into Syria. But the sense given to solve the sense given be solved in the sense given to solve the sense given likely that traces of the same foreign root are to be found in Sephar of S. Arabia (Gn 10<sup>30</sup>) and Sepharvaim (2 K 17<sup>34</sup>). See the whole subject very fully and fairly discussed by Moore, Judges, 26 f.

A. C. WELCH.

KISEUS (Keisalos).—The form in Ad. Est 11<sup>2</sup> of Kish (Est 2<sup>6</sup>), the name of the great-grandfather of Mordecai. See KISH, No. 4.

**KISH**  $(\vec{v}, \vec{v})$  —1. The father of Saul the first king of Israel (1 S 9<sup>1</sup> 10<sup>21</sup> 14<sup>51</sup>, Ac 13<sup>21</sup>). He was the son of Abiel of the tribe of Benjamin. In 1 Ch 8<sup>335</sup> 9<sup>350</sup> Ner and not Abiel is said to have been the father of Kish,\* but there seems to have been some confusion in the text, due perhaps to the very elliptical character of the record or to the frequent recurrence of the same family names. The home of Kish and of his family was at Gibeah (rendered the hill of God' and the hill' both in AV and RV of 1 S 10<sup>6</sup> and 10<sup>10</sup>). He does not seem to have been in any way prominent, but to have been living the simple life of a small farmer, when his son was called to be king. 2. The uncle of the foregoing, the son of Jeiel or Jehiel (1 Ch 8<sup>30</sup> 9<sup>36</sup>). 3. The eponym of a family of Merarite Levites (1 Ch 23<sup>21, 22</sup> 24<sup>28t</sup>, 2 Ch 29<sup>12</sup>). 4. A Benjamite ancestor of Mor-decai aneon Kether's control (2000) decai, queen Esther's cousin (Es 2<sup>6</sup>). See ESTHER. W. MUIR.

KISHI ( $\forall \neg p$ ).—A Merarite Levite, ancestor of Ethan, 1 Ch 6<sup>44</sup> [Heb.<sup>29</sup>]. In the parallel passage 1 Ch 15<sup>17</sup> the MT has, with **Kushalah**. In all probability the latter is the correct form of the name. It is supported by Luc. Kowsei in the first of the above passages. Kittel (in SBOT) prefers אישיר, or rather אישיר, pointing out that the LXX (B) in 1 Ch 644 has Keisai= ידיף, and in 15<sup>17</sup> Keisaios J. A. SELBIK. (?) קישיהו = (.).

\* Kittel (in Haupt's SBOT) and Kautzsch read the first clause of these verses, 'And Ner begat Abner.' See ABIRL.

#### **KISHON**

**KISHION** ( $\dot{p}\dot{\tau}\dot{\varphi}\dot{p}$ ).—A town allotted to Issachar (Jos 19<sup>20</sup>), given to the Levites (21<sup>23</sup>, where AV has Kishon). The parallel passage, 1 Ch 6<sup>72</sup> (Heb.<sup>57</sup>], reads **Kedesh**, which is taken (perhaps wrongly) by Dillmann and others to be a textual error for Kishion. The latter name has not been recovered, while there is a large ruined mound called *Tell Kedes* near Taanach in Issachar. See SWP vol ii sheat viii SWP vol. ii. sheet viii. C. R. CONDER.

KISHON (נוסל קישון; В ο χειμάρμους Κεισών, other forms Κισών, Κισσών). — This is the ancient name of the stream which drains almost the whole of the great plain of Esdraelon and the surrounding great plan of Escheron and the surrounding uplands. All the waters from Tabor and the Nazareth hills, which reach the plain eastward of a line drawn from  $I_{ksal}$  to Nain, together with those from the N. slopes of Little Hermon, are carried into Wady esh-Sherrar, and thence to the Jordan. The district between Little Hermon and Gilbac reaching as for work on  $I_{ksal}$  by a Gilboa, reaching as far west as el-Fúlch, also inclines eastward, the waters flowing down Nahr Jalúd past Beisún into the Ghür. The torrents from Little Hermon between Shunem and Nain, and all from the Galilæan hills west of Iksal, make their way through the soft soil of the plain, to join the deep hidden flow of Kishon. The main supplies, however, come from the southern side. The longest branches of the river stretch up the Information of the second state of the second behind the town. It is carried by a conduit to a well-built fountain in the centre of the place, and thence is distributed for irrigation among the gardens and orchards. By these much of the water is absorbed; and in summer the bed of the river a mile away is as dry as the surrounding plain. Copious springs in the neighbourhood of Talanúk and Khan Lejjún, and many smaller sources along the southern border of the plain, send contribu-tions to the volume of Kishon. About 3 miles east of *Haifa* it is joined by the streams from the great fountains of *Sa'adiyeh*, which rise under the northern base of Mount Carmel, on the edge of the plain of Acre.

The Kishon ('crooked or tortuous' [?]) pursues a tortuous course, in a north-westerly direction. keeping well into the centre of the plain. It sweeps round by Tell el-Kassis, breaks through a narrow pass on the north of Carmel into the plain Arab name for this stream. The old name Kiskon seems to have quite disappeared; but of its identity there is no reasonable doubt. If the 'waters of Megiddo' (Jg  $5^{19}$ ), by which clearly the Kishon and its branches in the neighbourhood of that city is meant, became a popular name, the Arabs may have exchanged *Megiddo*, which was Frame may nave exchanged Megiddo, which was meaningless to them, for Mukatta, so closely resembling it in sound, the meaning of which they knew (G. A. Smith,  $HGHL^i$  387), and which, besides, was every way appropriate; for *el-Mukatta* is par excellence 'the watercourse' of the district.<sup>\*</sup> In the yielding soil of the plain it has believed has hollowed out a great trench, often not less than 15 or 20 feet in depth, along the bottom of which the waters may creep almost unseen to the 868

In the higher reaches the waters swiftly dis-appear with the advancing summer. The surface of the plain grows hard in the heat, and cracks in all directions, save only in the vicinity of springs,

\* Moore (Judges, 158 n.) rejects decidedly the attempt to find the name Megiddo in Mukatta'.

#### KISHON

where, owing to the depth of adhesive mud, travelling is always dangerous. After entering the plain of Acre it is seldom dry, and from the fountains of Sadiyeh it flows in a constant sluggish stream, between deep banks, surrounded by thick jungle and marsh-land. This part has been reputed a haunt of crocodiles. In recent years Macgregor stands alone in claiming to have seen one of these reptiles while descending to the shore in his canoe (*Rob Roy on the Jordan*, pp. 398-404). A short distance from the sea the river is spanned by a wooden bridge; but save in times of flood it is easily forded along the sandbank thrown up by the waves at its mouth. From the bank southward, fringing the coast, stands a grove of beautiful date palms.\_\_\_Northward are great tracts of barren date palms. Northward are great tracts of barren sandhills. The main ford is where the road crosses from Haifa to Nazareth. Here a succession of bridges has been built, whose workmanship guaranteed their speedy demolition by winter spates. The means of crossing now are not different from what they were in the days of Sisera. The fords higher up are mostly safe in summer for those who know the locality of springs. In winter they are often quite impassable; to attempt them at that season without a qualified guide is to court disaster. The conditions change with great rapidity, inten-sifying the treacherous character of the river. A few hours of such rain as at times falls on the encircling mountains are sufficient to change the dry bed into the channel of a rushing stream, and If G. A. Smith's translation (*HGHL*<sup>1</sup> 395) of Jg  $5^{21}$ , \* (torrent of spates,' be correct, it is entirely appropriate.

The tides of conflict often rolled along the banks of the Kishon in this great battlefield of the ancient world, but its name is seldom mentioned in history. The first probable reference to it is in Jos 19<sup>11</sup> 'the brook that is before Jokneam' (RV); Jokneam of Carmel being identified with *Tell* Keimún, the allusion seems clear (but see Dillm. ad loc.). Kishon next appears in the account of Israel's victory over Sisera and his hosts (Jg 4<sup>7</sup>, cf. 1's 83°), and is enshrined in the song celebrating that glorious event, as an ally of the triumphant army (Jg 5<sup>19, 21</sup>), where a most realistic picture is given of the enemy's rout. The storm beat hard in the faces of the foe; the moistened soil, firm enough for the passage of footmen, yielded to the tread of cavalry; the terrified plunging of the horses as they sank in the deep mire threw their ranks into confusion, leaving them exposed to the onrush of the eager and agile highlandmen. The pitiless rain sent down swift cataracts from the hills, and soon Kishon in dark and sullen flood rolled onward to the sea. Any ford would then be difficult. The foreign horsemen knew none of them, and in vain efforts to escape they simply plunged into the river to die. The ground in the neighbourhood of Megiddo, where this battle appears to have been fought, is extremely treacherous, as the present writer had occasion to prove, even as late as the month of May (1892).

Kishon again figures in the narrative of Elijah's encounter with the false prophets (1 K 1840). The scene of this famous contest is, with tolerable certainty, located at *el-Mahrakah*, 'the place of burnt sacrifice,' a rocky plateau at the eastern end of the Carmel range. Thence the doomed men were led down for slaughter in the Kishon. A path, steep but practicable, leads to the river just at the base of *Tell el-Kassis*, 'hill of the minister,' or 'presbyter.' The bed of the Kishon after the prolonged drought was, of course, dry; but the

\* On the very obscure expression [] (AV, RV 'that ancient river'; LXX χωμάβρους άρχαιον) set, further, Moore, ad

down-tush from the coming storm would soon efface all evidence of the prophet's ghastly work. Close by this hill the grim tragedy was probably enacted. Kishon is not mentioned again in the sacred records, and the name does not occur in Josephus. Eusebius and Jerome mistakenly describe it as rising on Mount Tabor; Benjamin of Tudela (A.D. 1173) speaks of individual factorial as descending from Mount Carmel. He evidently applies (Jg 5<sup>21</sup>) to the Belus, Nahr Na'aman, near Acre.

(Jg 5<sup>24</sup>) to the beilds, 19 and 19 to and the international states, Litterature - PEF Mem. ii. 36, 90, etc.; Conder, Tent-Work in Palestine, 69, 97; Thomson, Land and Book, ii. 208-218, 230-234, etc.; G. W. EWING,

**KISB** (verb,  $p\vec{v}_{j}$ ,  $\phi i\lambda \delta \omega$  and  $\kappa a \tau a \phi i\lambda \delta \omega$ ; subst.  $\vec{\gamma} p\vec{v}_{j}$ ,  $\phi i\lambda \eta \mu a$ ).—A mark of affection or favour, given upon the lips, cheek, brow, beard, hand, clothing, even the ground trodden upon, etc., according as it bore less or more of the idea of respect or fear. As a common form of salutation, it had a place in the social life of ancient times, and still has in the East, which it no longer possesses in modern European countries, being limited by our latter-day reserve to the more limited by our latter-day reserve to the more tender relationships of life. The OT atfords no phenomena regarding the kiss distinctive from the phenomena regarding the also distinct the beau in usages of ancient peoples other than Hebrew : in MT we find one reculiar form (see below, 5). The NT we find one peculiar form (see below, 5). various circumstances and occasions in which the kiss, in some form or other, finds place may be enumerated as follows :-

1. The kiss as a token of domestic affection. The mother caressing her infant, fondling it with hands or lips, is so natural that probably we need not go further for the origin of kissing: we have, however, no instance of this mentioned in the Bible (but cf. 1 K  $3^{10\pi}$ .). The extension of the kiss to other family relationships (in law and blood alike) is but natural: we may distinguish three cases. (a) Parents kiss their sons and daughters, Gn  $31^{26.55} 48^{10}$  (grandchildren), Ru  $1^9$ . (b) Brothers and sisters kiss each other, Gn  $33^4$ , Ca  $8^1$ ; in Gn 2011 locab kisses Rushel or har such the rush the rush the solution of the solution 29<sup>11</sup> Jacob kisses Rachel as her cousin; the male 29" Jacob kisses ratched as her cousin; the male cousin having the same right as the brother (as among the Bedawin, Wetzstein, ZDMG xxii. 93, 108). (c) Children kiss their parents, Gn 27<sup>26</sup> 50<sup>1</sup> (Joseph kisses his dead father, on which see Schwally, *Leben nach d. Tode*, p. 8, and cf. the solemn kiss at the end of the orthodox rite of burial [Neale, *Holy East. Ch.* ii. 104<sup>b</sup>]), Ru 1<sup>14</sup>. 2. Connected with (a) we have (remembering that the relation of father to child was not without

that the relation of father to child was not without a stern element : in older times he had the power of life and death; see Benzinger, Heb. Archaol. (Absalom kisses the people)  $13^{39}$  (David kisses Barzillai); the king or prince as father of his people.

3. From (b) we may derive the kiss of *friendship*. From among brothers the privilege of kissing is From among brothers the privilege of Kissing is carried into relations outside of the family strictly taken, Gn 29<sup>13</sup> (Laban and Jacob), To 7<sup>5</sup> (Raguel and Tobias—cousins once removed); then among friends as such, I S 20<sup>41</sup> (Jonathan and David). Meetings and partings were naturally the special occasions for the kiss;—a fortiori for the family kiss as under 1—I K 19<sup>29</sup>, To 10<sup>12</sup>, LK 7<sup>45</sup>, Ac 20<sup>37</sup>; e still more fitting consisting whe has recurilizing a still more fitting occasion was the reconciliation of friends, Gn 45<sup>15</sup>, 2 S 14<sup>33</sup>, Lk 15<sup>30</sup>. Here, too, belongs the false kiss, Pr 27<sup>6</sup>, Sir 29<sup>5</sup>, Lk 22<sup>17,48</sup>; also the kiss in a metaphorical sense, Ps 8510, Ezk 313 (AVm).

4. Again, from (c) we have the kiss as a mark of respect growing into reverence,  $1 \le 10^1$ ,  $\Pr 24^{28}$ ,  $Lk 7^{38, 45b}$ ; see also Gn 41<sup>40</sup> (but cf. Dillmann, Genesis, ad loc.); cf. the kissing of the royal hand, or the

pope's sandal; slaves kissing the sleeve or skirt of their master, as still in the East; the conquered kissing the conqueror's feet, or the ground he treads upon ('licking the dust,' Ps 72°, Is 49<sup>23</sup>, Mic 7<sup>17</sup>). Idols were kissed by their worshippers, 1 K 19<sup>18</sup>, Hos 13<sup>3</sup>, to which may be compared the kissing of the Black Stone in the Ka'ba at Mecca; towards the heavenly bodies as deities a kiss was thrown with the hand (Job 3127).\*

5. In NT and the subsequent usage of the Church we find the kiss as a token of *Christian brother*-We find the kiss as a token of Christian orother-hood: a holy kiss  $(\phi i\lambda \eta \mu a \, \tilde{\alpha} \gamma i \sigma r)$ , Ro 16<sup>16</sup>, 1 Co 16<sup>20</sup>, 2 Co 13<sup>12</sup>, 1 Th 5<sup>26</sup>; a kiss of love  $(\phi i\lambda \eta \mu a \, d\gamma d\pi \eta s)$ , 1 P 5<sup>14</sup>. In time this became a regular part of the Church service as the 'kiss of peace'  $(d\sigma \pi a \sigma \mu \delta s \, \epsilon l \rho \eta r \eta s$ , osculum pacis, Const. Apost. ii. 57. 12, viii. 5. 5; Tertull. de Orat. 14). At first it was given promiscuously; later the men kissed the men, the women the women.

6. Finally must be mentioned the kiss as a token of love between the sexes, naturally seldom men-tioned even in OT (Ca  $1^2$ , and in a bad sense Pr 713), and, as might be expected, not at all in NT.

A. GRIEVE. KITE.—There are two passages in AV (Lv 11<sup>14</sup>, Dt 1413) + where 'kite' occurs as the tr. of ayyah. In another passage (Job 28<sup>7</sup>) AV gives 'vulture' for 'ayydh. In all RV gives 'falcon.' In the first two passages RV tr. mg dd'dh and mg daydh, 'kite.' In both AV tr. 'vulture.' In Is 34<sup>15</sup> RV tr. dayydh, 'kites,' AV 'vultures.' Dd'dh, dayydh, and 'ayydh refer to birds of prey of the falcon tribe. In the first It is evident from the passages in Lv and Dt that the words are generic, and it is a waste of time to endeavour to fasten specific meanings on them.

There are three kites in Bible lands: (1) Milvus ictinus, Sav., the Red Kite, which may be the 'ayydh. It is called in Arab. sa f. It is common in winter, and in rainy weather the flocks of red kites sit motionless in rows on rocks and trees. (2) M. migrans, Bodd., the Black Kite, perhaps the  $d\dot{a} \, dh$  or dayydh. It is very common in Egypt, where it perpetually hovers over the towns and feeds upon garbage. It comes to Palestine and Syria in March, and soon spreads over the country. (3) M. Agyptius, Gmel., the Egyptian Kite. It is distinguished from the former by its yellow bill and more deeply forked tail. It is found in Pales-tine chiefly in the Jordan Valley and adjacent ravines. G. E. Post.

KITRON (קקיוֹן).—A Canaanite town in the territory of Zebulun, Jg 1<sup>30</sup>. See КАТТАТН.

KITTIM (גָאָיָס, *i.e.* prop. 'Kitians' [note בָּאָיס) Is 23<sup>12</sup> Kt., Jer 2<sup>10</sup>], people of אס [*CIS* I. i. 11], more usually *Kition* [I. i. 10, 11, 14, 19, 88 etc.];

\* 'Kiss the son' Ps 212 (AV, RV text), is an extremely doubtful passage. The MT געקו בר is prob. corrupt, and nothing is gained by simply substituting Heb. 12 for Aram. 72. Aq., Symm., Jerome (although in his Comm. on Ps he gives adorate filium) take חבין יערפי, 'choice' (cf. RVm), and tr., respec-tively, אמדמקואימיני ואיזיגי, קאראטייניין אנאראי, מער איז איזיגי, אויזיגי, אויזיגי, אויזיגי, מער איזיגי, אויזיגי The LXX לא גער אויזיגי, אויזיגי אויזיגי, אויזיגי, אויזיגי, אויזיגי, אויזיגי, אויזיגי, אויזיגי, אויזיגי, אויזיגי hendite disciplinam, and RVm), 'lay hold of instruction,' nau after the Exile, 1898, p. 112) Cheyne substitutes 1791 ('kiss'= 'do homage') for ';' ('rejoice') in v.11, and drops ', which, he says, is really a fragment of the word rendered 'with trembling' (ברערה): thus-

Serve J" with fear, And do homage with trembling, Lest he be angry, and your course end in ruin.

t The text of Dt 1413 is corrupt. For הָרָאָה read הַרָּאָה, and delete 7, (so Oxf. Heb. Lex., Siegfried-Stade, Dillm., Driver, Steuernagel, following Sam. and LXX).

AV Chittim, so also RV in 1 Mac 1<sup>1</sup> 8<sup>5</sup>). people described in Gn 10<sup>4</sup> as descended from Javan, and therefore belonging to the Greek or Græco-Latin races of the West, occupying terri-tories stretching along the coasts of the Mediter-ranean Sea. Elishah, Tarshish, and Rodanim ('Póðia I. L.Y. better ther Delanim of MT) mared in in LXX, better than Dodanim of MT), named in that passage alongside of Kittim, are now generally identified respectively with Sicily and Southern Italy, Spain, and Rhodes. As these are all islands or coastlands in the West, it is natural to look to the same region for the localizing of the Kittim. That they were islanders is explicitly asserted by the phrase current among the prophets, 'the isles of Kittim' (Jer 2<sup>10</sup>, Ezk 27<sup>6</sup>). But though distinctly Westerns in respect of geographical situation, they are represented as having been from the earliest times intimately associated with the civilized and commercial peoples of the extreme eastern limits of the Mediterranean coast. Thus Ezekiel  $(27^6)$  mentions 'the isles of K.' as supplying Tyre with boxwood, or more probably sherbin wood, a species of cedar, out of which the benches or decks of their costly and luxurious ships were constructed. And further, we find that ships work constructed. And lattice, we had that the prophet in this passage places 'the isles of K.' between Bashan and Elishah, therefore west of the former and east of the latter, *i.e.* between Palestine on the east and Sicily or Italy on the west. In  $T_2$  23.<sup>12</sup> Tarabile or Succin is said to have west. In Is 231. 12 Tarshish or Spain is said to hear from the land of K. of the fall of Tyre, which im-plies that the land of K. lay somewhere between Tyre and Tarshish. The country of the K., therefore, must have been an island situated somewhere in the eastern part of the Mediterranean, to the east at least of Sicily, and not very far removed from the coasts of Tyre, Josephus (Ant, I. vi. 1) points to the name of the city Kition or Citium in Cyprus as a memorial of the residence of the K. in that island. This writer also, most probably drawing his information from tradition current among the Jews of his day, states that the ancient name of Cyprus was Cethima, and that it received its name from Cethimus, the third son of Javan, who had settled there, and whose descendants held possession under the name of Kittim. Epiphanius, bishop of Salamis in Cyprus, whose life covers most of the 4th cent., makes use (Hær. xxx. 25) of the name K., in a wider sense, to include not only the inhabitants of Cyprus, but also those of Rhodes, and even of the coastlands of Macedonia. This, indeed, is quite in keeping with the later Jewish usage of this word. 'The ships of K.' in Dn 11<sup>30</sup> are evidently those of the Romans, and 'the land of K.' in J. Mac. 19 the indext that the the M of K.' in 1 Mac 11 85 is evidently that of the Macedonians. In this late period the name was applied generally to the lands and peoples of the West. The reference to the Romans in Dn 11<sup>30</sup> is quite distinctly to the expedition of Caius Popilius Laenas. This Roman general was sent in A.D. 168 against Antiochus Epiphanes, who had entered Egypt and attacked that country, quickly reduc-ing him to submission and causing him hastily to withdraw to Syria. The story of the campaign is told by Polybius (xxix. 11) in language singularly like that employed in Daniel. See also Livy, *Hist*. xliv. 19, xlv. 11. This wider application of the name K. is quite in accordance with the usage of Lorophysic (4nt L with when we that it is it. Josephus (Ant. I. vi. 1), who says that it is from the possession of the island of Cethima or Cyprus by Cethimus that 'all islands and the greatest part of the seacoasts are named Cethim by the Hebrews.' At the same time, just as here also in At the same time, just as here also in Josephus, it appears to be the unanimous opinion of antiquity that the original location of the K.

was in the island of Cyprus. In very early times the Phœnicians had sailed up and down in the Mediterranean, and, while

trafficking in their wares far and near, they established colonies in several of the islands, and at points along the coast convenient as depoits for their foreign carrying trade. From its natural situation Cyprus must have early attracted their attention, and must soon have become their principal station in the conducting and extending of their trade with the West. Herodotus (*Hist.* vii. 90) distinctly states that most of the Cypriote cities had originally been Phœnician colonies. The Phœnician origin of Kition, a city in the south-east of the island, now Larnaka, is plainly witnessed to by Cicero (*de Finibus*, iv. 20), and naturally enough the Phœnician settlers in other naturally enough the Phoenician settlers in other parts of the island would carry with them the name of their oldest and principal foundation. These Phoenician settlements in Cyprus date from a very early age—it may be even before the days of Moses (Diodor. v. 55. 77; Herodot. i. 105; Pausan. i. 14. 6). After a time it would seem that these Phoenicians in Cyprus were joined by certain Canaanitish refugees, who had been driven out by the Philistines and thet they brought with out by the Philistines, and that they brought with them their moon goddess Atergatis (Derceto), whose temple was built at Old Paphos, while that of the Phœnician Baal was at Kition (see Ash-TORETH). The existence of such Phœnician colonies in Cyprus is witnessed to also by the occasional references in history to the Kittim as subject to, or at least as claimed as subjects of, Tyre. It or at least as claimed as subjects of, lyre. It would seem that even as early as the days of king Solomon the K. were subject to the Tyrians, and compelled by Hiram to pay tribute (Jos. Ant. VIII. v. 3, c. Apion. 1. 18). Josephus also tells how Elulæus, king of Tyre, sailed against the revolted K., and reduced them again to submission (Ant. IX. xiv. 2). In the annals of Sargon the Cypriote kings are referred to as put under tribute in B C kings are referred to as put under tribute in B.C. 709 (Schrader, COT<sup>\*</sup> ii. 96).

It is not, however, to these Phomician colonists that the name is given in Gn 10<sup>4</sup>. The Phomician K. may rather be set alongside of the Caphtorim (Gn 1014), who are represented as Cushites, and of the sons of Ham, and as inhabiting some island or coastland near to Cyprus, in all proba-bility Crete. The Japhethite K., as sons of Javan, belonged to the Greek family of nations— whether to the ancient pre-Hellenic Carian popula-tion of the island, or to some Hellenic tribe which tion of the island, or to some Hellenic tribe which had in early times settled there, can scarcely now he determined. Interesting inscriptions have been discovered near Larnaka, the ancient Kition, which, although figured in Phœnician letters, are which, although ngured in Phoenician letters, are yet composed in a Greek dialect. This seems to indicate that the people from whom these inscrip-tions have come down to us were a Greek people, etlinographically belonging to the family of Javan, retaining their language and modes of thought, but largely influenced by the presence of a Phoenician immigration. That they adopted the Phoenician latters and mode of writing is just the Phœnician letters and mode of writing is just the sort of result we should have expected, seeing that the Phœnician colonists were enterprising merchants, who would naturally lead in matters of commerce and correspondence with those around. The last recorded words of Balaam are a pro-phecy of the destruction of Asshur and Eber by

pnecy of the destruction of Asshur and Eber by some conquering power coming in ships from 'the coast of Kittim' (Nu 24<sup>24</sup>). It is quite evident that here the term that is used, not to describe the island of Cyprus, or any other exactly defined territory, but as indicating quite generally some great Western people which had made themselves a name and heoring a terror among the notice. No doubt Asshur and Ecome a terror among the nations. No doubt Asshur and Eber stand for the great powers of the East collectively, and the prophecy is a foretelling of the utter overthrow of the sovereignty of the Eastern monarchies by the advanc- 1

ing power of the great empires of the West. The beginning of the fulfilment was seen in the cam-paigns of Alexander the Great, but it was much more truly and permanently realized in the de-velopment and growth of the empire of the Romans. The phrase 'coast of Kittim,' therefore, does not mean Macedonia, nor Rome, but simply the Western power which, for the time being, is to the front, or gives promise of prominence and permanence in the immediate future. See CYPRUS.

KNEAD, KNEADING - TROUGH.-See BREAD, vol. i. p. 317<sup>\*</sup>.

**KNEE, KNEEL** ( $\neg \neg \neg$  [Assyr. birku], in Dn 6<sup>10</sup> Aram.  $\neg \neg \neg \rightarrow$ , once Dn 5<sup>6</sup> Aram.  $\neg \neg \neg \neg \neg \neg$ ; 'kneel' is expressed by vb.  $\neg \neg \neg \neg$  in Dn 6<sup>10</sup> and Hiph.  $\neg \neg \neg \neg \neg$  in Dn 6<sup>10</sup> and Hiph.  $\neg \neg \neg \neg \neg$  in Dn 6<sup>10</sup> and Hiph.  $\neg \neg \neg \neg \neg$  in Dn 6<sup>10</sup> and Hiph.  $\neg \neg \neg \neg \neg$ in Gn 24<sup>11</sup> of causing camels to kneel. The LXX and NT terms are  $\gamma \delta \nu \nu$ , 'knee,' and  $\gamma \sigma \nu \nu \tau r c \bar{\nu} \nu$ , 'kneel').—The knees appear repeatedly in Scrip-ture as a seat of strength, and hence as weakened through terror, Job 4<sup>4</sup> ('thou hast confirmed the feeble knees'; cf. Is 35<sup>3</sup>, He 12<sup>12</sup>); Ezk 7<sup>17</sup> ('all knees shall be weak as water'; cf. 21<sup>7</sup> [Heb.<sup>12</sup>]); Dn 5<sup>6</sup> (the appearing of the handwriting upon the wall so terrified Belshazar that 'his knees smote one against another'; cf. Nah 2<sup>10</sup>). A psalmist complains that his knees are weak through fastcomplains that his knees are weak through fast-ing, Ps 109<sup>24</sup>. Amongst the plagues denounced upon disobedience to the Deuteronomic law is this, 'The LORD shall smite thee in the knees... with

a sore boil, etc., where the reference appears to be to some form of elephantiasis (see Driver, *ad loc.*). Kneeling down to drink (from their hands) was

the attitude adopted by a portion of Gideon's warriors on the occasion of the famous test, Jg 75.6 (where see Moore's note). One of the stages In the measurement of the depth of the river which Ezekiel saw issuing from the temple was that 'the waters were to the knees' (Ezk 47'). Delilah made Samson sleep  $\chi = \chi = \chi = \chi = \chi$ son sat upon his mother's knees till he died, 2 K 4<sup>20</sup>; children were dandled upon the knees, Is 66<sup>12</sup>. in the measurement of the depth of the river which

Gn 4812 (E), 'And Joseph brought them out from between his knees' (וינא יוֹסף אחם מעם ברקיו), is not perfectly clear, but the meaning probably is that Joseph took his sons away from Jacob's knees, before himself bowing down to receive the bless-ing (v.<sup>16</sup> connects directly with v.<sup>13</sup> in E's narra-tive, the intervening vv.<sup>13, 14</sup> being from J).

In Gn 30<sup>3</sup> (E) Rachel gives Bilhah to Jacob ' that th Gn 30°(E) Rachel gives Binan to Jacob that she may bear upon my knees ( וחַלָּר עַלֹּבְרָעָ); in 50<sup>22</sup> (also E) the children of Machir the son of Manasseh were born upon Joseph's knees (עַלֹּבְרָעָ: יוֹסָך יַרָרוּ Job (3<sup>12</sup>) asks, 'Why did the knees receive me?' (עַלָּבְרָעָ: In the first two passages at least t there appears to be an allusion to the output of placing menult hom infort on the to the custom of placing newly-born infants on the father's (or grandfather's) lap as a token of his recognition or adoption of them (cf. Hom. Od. xix. 401). Rachel thus undertakes to acknowledge Bilhah's children as her own, and Joseph recog-nizes Machir's children as his descendants (see

\* The other conjugations have the sense of 'bless' (*Piel*), 'bless oneself' (*Niph*, and *Hithp.*), 'be blessed' (*Pual*). The pass, ptcp. Qal arc also occurs 71 times with the meaning of 'blessed'.

<sup>•</sup> Diessed.<sup>•</sup> † In Job 3<sup>12</sup> Dillmann finds nothing more than a placing of the newly-born child on the knee of the midwife or the father, without any symbolical meaning (but see Duhn, ad loc.).

Dillm. on all these three passages; also art. BIRTH in vol. i. p. 300<sup>b</sup>; Ploss, *Das Weib*<sup>3</sup>, ii. 177 ff.; Stade, *ZATW* vi. (1886), 143 ff.). Kneeling as an attitude in worship is repeatedly mentioned in Scripture, 1 K 8<sup>64</sup> = 2 Ch 6<sup>13</sup> (Solomon et dedication of the tample),  $1 \times 10^{16}$  (Solomon

Kneeling as an attitude in worship is repeatedly mentioned in Scripture, 1 K  $8^{44} = 2$  Ch  $6^{13}$  (Solomon at dedication of the temple); 1 K  $19^{16}$  ('the knees which have not bowed to Baal'; cf. Ro  $11^4$ ); Ezr  $9^6$  (Ezra in confessing the iniquity of the foreign marriages); Is  $45^{22}$  ('to me every knee shall bow'; cf. Ro  $14^{11}$ , Ph  $2^{10}$ , on which last see Lightfoot's note); Dn  $6^{10}$  (when Daniel prayed three times a day); Ac  $7^{40}$  (the dying St. Stephen);  $9^{40}$  (St. Peter before the raising of Dorcas);  $20^{30}$  (St. Paul praying with the elders of Ephesus);  $21^5$  (a similar scene at Tyre); Eph  $3^{14}$  (St. Paul's prayer for the 'Ephesians.'). A variation from this attitude is found in 1 K  $18^{42}$ , where Elijah in praying for rain 'put his face between his knees' (1773  $1^3$  119 05%). The same mental feeling underlies the adoption of kneeling in addressing an entreaty to a fellowcreature, or in doing homage to a superior,  $2 \times 1^{13}$ (Ahaziah's officer in entreating Elijah to spare his life); Mt  $17^{14}$  (the father of the epileptic boy came kneeling to Jesus [ $\gamma \rho \sigma u \pi r \hat{\omega} r \hat{\omega} \hat{\sigma}$ ]); Mt  $1^{40}$  (the leper);  $10^{17}$  (the rich young ruler); Mt  $27^{20}$  (the soldiers mocked Jesus by kneeling down before Him [ $\gamma \rho \sigma v \pi e r \hat{\sigma} \rho a \hat{\sigma} \hat{\sigma}$ ]). In Lk  $5^6$  Simon Peter falls down upon his knees ( $\pi \rho \sigma \delta \pi e \sigma r \sigma \hat{\sigma} \hat{\sigma}$  $\gamma' \omega a \omega r)$  as he cries, 'Depart from me : for I am a sinful man, O Lord.'

For the doubtful 'Bow the knee' of Gn 41<sup>45</sup> see ABRECH. J. A. SELBIE.

**KNIFE** (כָשָּקָלָת, דָרָב).--Knives were originally of fint or sharp stone (Ex 4<sup>20</sup> ג'ר, Jos 5<sup>2,3</sup> כי).

Flint knives have been found in a cave at Antelias, near Beirût, amongst bones and charcoal; and also in a calcareous deposit on the old road along the sea-coast near the Nahr el-Kelb. It is said that flint knives are still used by the Bedawin of the Syrian desert. The knives generally used in Syria are sheath knives, and are stuck in the girdle. They are from 8 to 10 in. long, including the handle. They are used for every purpose for which a knife is required, and are formidable weapons. W. CARSLAW.

#### KNOCK.-See HOUSE, vol. ii. p. 435.

**KNOP** (a variant of *knob* and of *knap* [in knapweed], Old English *cnaep*) is used by our translators to render 1. Wey *kaphtör*, the spherical ornament on the stem and arms of the golden lampstand in the tabernacle (Ex  $25^{32-36}$  and parll. pass.  $37^{17-22}$ ). The Greek translators have  $\sigma \phi au \rho or \eta \rho$ , the Vulgate *sphærula*, Luther *Knauf* (a kindred word). The 'knops' are easily recognizable in the familiar representation of the later ' candlestick ' on the arch of Titus. For their relation to the rest of the ornamentation see TABERNACLE (sec. dealing with the **golden candlestick**). A similar knop is seen on the stem of the chalice which appears on the obverse of certain Jewish coins (see MONEY).

The same word,  $kapht\bar{c}r$ , occurs in two other passages of the OT, viz. Am 9<sup>1</sup> (AV 'smite the lintel of the door,' marg. 'chapiter' [so RV] or 'knop'), and Zeph 2<sup>14</sup> (AV 'the upper lintel,' marg. 'knops or chapiters'; the last is the rendering of RV). In the former passage the reference is clearly to the capitals or chapiters of the pillars in the schismatic temple of J" at Bethel, in the latter to those of the columns in the ruined city of Nineveh. The feature common to these capitals and the knops of the lampstand was doubtless the circular or rather spherical form (cf. the spherical capitals of the two pillars Jachin and Boaz, 1 K 7<sup>44</sup>; see art. CHAPITER).

#### KNOWLEDGE

2. In our EV 'knops' is also the translation of an entirely different word vypp,  $pkk\bar{a}'tm$ , of which the precise signification is still uncertain. It is used to describe the ornamentation on the cedar lining of the temple walls: 'And there was cedar in the house within, carved with knops (marg. 'gourds') and open flowers' (1 K 6<sup>10</sup> RV). This must refer to some egg-shaped (cf. Targum, *in loc.*) ornament, carved in low relief, perhaps, as the margin proposes, the fruit of the *citrullus colocynthus*, which appears to bear in Hebrew the cognate name *pakkiah*—the 'wild gourd' of 2 K 4<sup>30</sup>.<sup>6</sup> Two rows of the same ornamentation were introduced 'under the brim' of the great 'molten sea' which stood in the temple court (1 K 7<sup>24</sup>). In this case, however, the knops were not the product of the artist's chisel, but were cast with the sea (*ib.*). See SEA (BRAZEN). A. R. S. KENNEDY.

KNOWLEDGE.-The word 'knowledge' is here considered, not generally, but only in the ethicoreligious sense, or so far as there is an approximation in Scripture to a technical (theological) use of it. At the very beginning of the OT the probation of man is connected with the tree of the knowledge of good and evil (Gn  $2^{17}$ ). The view of 'knowledge' underlying this mythical narrative seems to be that which is become of the Wellkerser's intermediate which is brought out in Wellhausen's interpretation (Prolegomena<sup>2</sup>, p. 316 f.). To know good and evil does not mean in Hebrew to have the moral consciousness developed; it means to be intelligent, 'to know what's what.' The desire to know is the desire to be like God—to possess His secrets, to wield His power, and so to be independent of Him. But the gratification of this desire, so the moral would originally run, always defeats itself. The impulse to know, the impulse which creates science and civilization, is indulged at a great cost. We build Babylon, and become conscious that we have lost Eden. That this appreciation of 'knowledge, which pervades the sceptical passages in Ecclesi-astes, underlies the third chapter of Genesis, is not to be denied; but neither can we deny that the myth is so treated by the writer as to make it yield an explanation of the transition in human history from innocence to guilt. The eating of the forbidden fruit was an act in which man lost the knowledge of God and acquired the knowledge of sin

i. The OT everywhere assumes that there is such a thing as the knowledge of God, but it is never speculative, and it is never achieved by man. God is known because He makes Himself known, and He makes Himself known in His character. Hence the knowledge of God is in the OT = true religion; and as it is of God's grace that He appears from the beginning speaking, com-manding, active, so as to be known for what He is, so the reception of this knowledge of God is ethically conditioned. The secret (vo, lit. *friendly* conversation) of the LORD is with them that fear Him (Ps  $25^{14}$ ); the spirit of knowledge and of the fear of the LORD are one (Is  $11^2$ ). On the other hand, an irreligious man is described as one who does not know God; and that though he is the priest ministering at the altar  $(1 S 2^{12})$ . The priest ministering at the altar (1 S  $2^{12}$ ). The moral corruption of the last days of Israel is described by Hosea when he writes, 'There is no truth, nor loving kindness, nor knowledge of God in the land' (Hos 4<sup>1</sup>). The ethical content and value of this knowledge are seen also in ch.  $6^6$  ' I desire mercy and not sacrifice, and the knowledge of God more than burnt-offerings.' It is in this sense of an experimental acquaintance with God's character, and a life determined by it, that a

\* It has been pointed out (Löw, Aram. Planzennamen, p. 278) that הארקס in the Mishna denotes a ball of yarn (see this word and הקרא in Levy, Neukeb. Wörterb. 2.20.).

KNOWLEDGE

universal knowledge of God is made the chief blessing of the Messianic age. 'The earth shall he full of the knowledge of the LORD' (Is 11<sup>9</sup>); 'They shall all know me, from the least to the greatest' (Jer 31<sup>24</sup>). And this again is not because men have achieved it by speculative efforts of their own: 'All thy children shall be taught of the LORD' (Is 54<sup>13</sup>). Side by side with this practical knowledge of God the OT makes room for any degree of speculative agnosticism. God is great beyond all our thoughts: His ways are unsearchable (Job 5<sup>9</sup>). He is a God who hides Himself (Is 45<sup>15</sup>), and gives no account of His matters. But such agnosticism is not a rival of religion, of the knowledge of God: it is a part of it. The knowledge of God : it is a part of it. The knowledge of God includes a recognition of His immensity, and part of man's worship must always be silence (Ps 65<sup>1</sup>). This is especially brought out in the Book of Job. The conception of true religion as the knowledge of God is probably the true antecedent and parent of some NT expressions for which affinities have been sought in the phenomena of Gnosticism. John (6<sup>46</sup>) quotes Is 54<sup>13</sup> (see above); and the key to the emphasis which he lays on 'knowing' God, or the truth, or Jesus Christ, is more likely to be found in such passages as are referred to above, than in modes of

ii. In the NT it will be convenient to take the different sections apart. (a) In the Gospels Christ appears first in the character of a teacher, moved with comparison for a people left without the knowledge of God, excluded from His kingdom because the key of knowledge—*i.e.* knowledge itself, the key which should open the door of the kingdom—has been taken away by its guardians  $(Lk \ 11^{32})$ . He represents it as the chief privilege of His disciples that to them it is given to know the mysteries of the kingdom of heaven (Mt 1310-17) -mysteries which kings and prophets had longed to see, but could not. He represents it as His own unique distinction that He alone has, and can communicate, the knowledge of God as the Father, in which true religion henceforth consists (Mt  $11^{3-77}$ ). But here, as in the OT, it is no abstract God as Father is in reality to know that we are the children of God, and in knowing it to become His children. The new knowledge has to give a new character to our life, and if there is no trace of such a new character it is vain for us to say that such a new character it is value for an experimental we know the Father: we are in darkness in spite we known. The of all God has done to make Himself known. ethical conditions of this knowledge are plainly stated in Mt 5<sup>9</sup>, Jn 7<sup>17</sup>; and in Jn 17<sup>5</sup> it is identified with eternal life, the perfect blessing that the Son of God has come to impart. The proper relation to God is always conceived by St. John to be involved in the true knowledge of God ; to know Him that is true and to be in Him that is true are all one. It is exactly this sense that the knowledge of God has in Hos 4. 6, or in Jer 31 : there is no schism between the intellectual and the practical for the apostle or the prophet; the two are united in the integrity of the heart, which in Scripture is the organ of knowledge. When we read in Jn  $8^{32}$  'Ye shall know the truth, and the truth shall set you free,' the freedom spoken of is probably not so definite in its application as in many places in St. Paul. The idea rather is that to be right with God puts one right, sets one free, in all other relations.

(b) In St. Paul's writings knowledge appears in many aspects. (a) In contrast with the wisdom of this world the gospel as a whole is conceived as a windom of God, which God has revealed in His Son and interpreted by His Spirit. There is, indeed, or there might have been, a natural knowledge of

KNOWLEDGE

God (Ro 1<sup>197</sup>, Ac 14<sup>17</sup>), but a knowledge of God in any sense bringing salvation is possible only through the reception of God's Spirit (1 Co 2). Such knowledge every Christian possesses; Christ is made to him wisdom (1 Co  $1^{30}$ ), and he is chosen in sanctification of the Spirit and belief of the truth (2 Th 213). But St. Paul speaks of knowledge in another sense. There are degrees of insight into the one great truth of God; there are truths which are not imparted to babes, but only spoken 'among the perfect' (1 Co  $2^6$ ); there is a  $\chi \dot{\alpha} \rho \sigma \mu a$ , a special spiritual gift, called 'the word of know-ledge' (1 Co  $12^6$ ), in which the Corinthians were rich; and though a  $\chi d\rho_{1\sigma\mu\sigma}$  was given to one for rich; and though a  $\chi a \mu a \mu a$  was given to one for the good of all, we see that knowledge might be the possession of a few, or of a circle, not of the whole Church. To judge from 1 Co 2<sup>st</sup> one of the subjects with which this higher knowledge was concerned was eschatology—' all that God has pre-pared for them that love him.' But it had also more directly practical applications. An enlight-ened conscionce in regret to the use of things in ened conscience in regard to the use of things in-different was one mode of it. 'As touching things different was one mode of it. 'As touching things offered to idols, we know that we all have know-ledge' (1 Co 8<sup>1</sup>). Christian intelligence generally was sufficiently developed to know that an idol is nothing in the world. But in some it was not sufficiently developed to know that this mere perception of a principle is no adequate guide to Christian conduct. It is not by principle merely, but by consideration of persons, circumstances, and consequences, that a Christian must act; in other words, not by knowledge but by love. Knowledge in this abstract sense is not without moral peril: in this abstract sense is not without moral peril; it inflates the individual, whereas love builds up the body of Christ. All through the First Ep. to the Corinthians, knowledge as a gift distinguishing one Christian from another is subordinated in this way to love (chs. 8. 12. 13. 14).

( $\beta$ ) When we pass to the Epp. of the Captivity, knowledge has quite another position and emphasis. The gospel is confronted with a  $\phi \lambda \sigma \sigma \phi i a$ , which is at the same time a 'vain deceit,' something determined by human tradition and agreeing with 'the elements of the world,' Jewish or pagan (Col 2<sup>6</sup>); now be called theosophy, the Christian revelation is defined and expanded as the true wisdom of God. As a formal indication of the extent to which the gospel is here put under the point of view of 'knowledge,' Holtzmann (*NT Theologie*, ii. 237) quotes the fol-lowing list of words from the Ep. to the Ephesians : ακούεις Αλήθεια, αληθεύεικ, αποκάλυψις, αποκαλύπτεικ, αποκρύπτεικ, άφρωκ, γικώσκεικ, γινώσις, διδασκαλία, διδάσκεικ, είδέναι, έπιγικώσκεικ, έπίγνωσις, μανθάνεικ, μυστήριον, νοείν, νούς, πλάνη, σκοτίζεσθαι, σκότος, σοφία, σοφ5ς, σύνεσις, συνιέναι, φανερούσθαι, φώς, φωτίζειν. This knowledge centres in Christ. He is the mystery of God, in whom are all the treasures of wisdom and knowledge hidden away (Col 2<sup>2</sup>). All the questions which man has to ask in the sphere of religion—questions as to the origination of the world, its natural unity, the place in it of the human race; questions as to the relation of humanity to God, its sin, reconciliation, and glory -must find their answer in Him. The doctrine of Christ in these Epistles is expanded into a Christian interpretation of the world, and this is the object of Christian knowledge. It is not to be the property of a class. St. Paul warns every man and teaches every man in every wisdom, that he may present every man perfect in Christ (Col 1<sup>23</sup>). As in the earlier Epistles, there is a certain eschatological reference in the knowledge or wisdom which is so emphasized here : Christ is conceived among the Gentiles as *the hope of glory* (Col  $1^{27}$ ), and St. Paul prays that the Ephesians may have the eyes of their hearts enlightened to know what is *the* 

9

10

#### KNOWLEDGE

hope of his calling, and what the riches of the glory of his inheritance in the saints' (Eph 1<sup>18</sup>). Such inward illumination indeed is the aim of the letters; they can be summed up (Weiss, NT Theol. p. 428) in the prayer 'that the God of our Lord Jesus Christ, the Father of glory, may give unto you a spirit of wisdom and revelation in the knowledge of him' (Eph 1<sup>17</sup>). In this last passage knowledge is  $i\pi i\gamma \nu \omega \sigma is$ , a word which as opposed to  $\gamma \nu \omega \sigma is$  denotes full or further knowledge, and which, though frequent in St. Paul, is used besides only in He and 2 P. According to Cremer, it is always used of a knowledge which has the strongest influence on the religious life; it is combined with such expressions as τοῦ θεοῦ, ἀληθείas, τοῦ νίοῦ τοῦ θεοῦ, τοῦ μυστηρίου τοῦ θεοῦ, τοῦ θελήματος τοῦ θεοῦ, τοῦ Κυρ. ἡμῶν Ι. Χ. It does not therefore suggest an abstractly intellectual view of Christianity—a theology, so to speak, as distinct from a religion; just as in the OT and in St. John, knowledge includes the spiritual and moral relation to its object, which answers to the nature of that object. Truth as truth is in Jesus is not only to be believed and known but done by the Christian (1 Jn 16). What St. Paul calls & enlyrwors row deow is not only a deeper comprehension of the Christian revelation in itself, but a deeper insight into its practical significance and obligations.

 $(\gamma)$  In the Pastoral Epistles Christianity is conceived as a teaching or doctrine (διδασκαλία) more definitely than in any other part of the NT. definitely than in any other part of the N1. Christians are those who have repented and come to the knowledge of the truth (1 Ti  $2^4 4^3$ ). To oppose the gospel is to resist the truth (2 Ti  $3^8$ ). But though the truth can be stated by itself, it is always of moral import. It is the truth 'which is according to godliness' (Tit 1<sup>1</sup>), a  $\delta_i\delta\sigma\sigma\kappa\lambda i\alpha \kappa\lambda i\alpha$ and  $i\gamma_i\alpha invora$ . When men abandon it or reject it, it is from some moral uncoundance. it is from some moral unsoundness; they turn from the truth, and with itching ears heap up teachers 'according to their own lusts.' The 'knowledge falsely so called' (1 Ti 6<sup>20</sup>), whether the drridégeus justifies a reference to Marcion or not, is conceived as a morbid phenomenon opposed to the morally wholesome teaching of Christianity, and whoever is misled by it 'errs concerning the faith '-his religious life misses the mark.

(c) In the other books of the NT knowledge is not a characteristic conception. In 2 P it has a certain prominence  $(1^{2t}, 2^{2t}, 3^{18})$ , in a sense more akin to that which it bears in the Pastorals than elsewhere; the  $\epsilon \pi i \gamma \nu \omega \sigma is$  or full knowledge of God, or of Jesus our Lord, is saving knowledge. We grow in it as we grow in the grace of our Lord Jesus In this we grow in the grave of our horse to come Christ; the two processes of growth are one. It is morally efficacions for our deliverance from the pollutions of the world. In the Ep. to the Hebrews  $\gamma \nu \omega \sigma r$  is the 1 T is 04 dy. But the wheele Englement (cf. Tit  $1^1$ , 1 Ti  $2^4 4^4$ ). But the whole Epistle may be regarded as a specimen of a particular kind of Christian  $\gamma \nu \omega \sigma cs$ . It recognizes the distinction between a less and more perfect apprehension of Christianity (5<sup>116</sup>, 6<sup>16</sup>), and the writer exhibits his own 'knowledge' in that interpretation of the OT which makes its institutions and characters typical of Christ. This typological  $\gamma \nu \omega \sigma \sigma$  is quite different from the  $i\pi i \gamma \nu \omega \sigma \sigma$  of the mystery of God, even Christ, which we find in the Pastoral Epistles ; yet as a mode of representing the organic unity of the NT and the OT it may also contribute to a Christian philosophy. And some such thing-not in the sense of a speculation *a priori*, without ethical inspiration, but in the sense of an expres-sion and interpretation of Christian faith, which shall be pervaded throughout by the spiritual virtue of that faith—seems to be set before us by the NT writers as the ideal of 'knowledge.'

J. DENNEY.

#### KOHATH

KOA (gip; 'Txove B, Aoud A, Kove Q; Targ. Wyp; Syr. Valg: Aq. Kopupaior; Vulg. principes). - In Ezk 232 'the children of Babylon and all the Chaldreans, Pekod, and Shoa' (rw), and Koa', all the children of Asshur with them, '-most probably the contracted form of Kutú, Kuti, the name of a people (also called Gutium, Guti), often mentioned in the Assyrian Inscriptions, whose home was to the N. of Babylon, in the mountainous district between the upper Adhem and the Dijâlå (see the map in Del. Paradies;  $KAT^2$  ad loc.).<sup>\*</sup> The following are the grounds for this conclusion. The inscriptions speak often of a country Su-édin, Su-tium, or Suti; and as Ezk names together Pekod (also Jer  $50^{21}$ ) and Shoa', so Sargon (Khors. inscr. l. 19: KIB ii. 55; cf. ll. 82, 123, 135 f.) mentions together among his conquests Pulvidu and Suti : elsewhere, moreover, in the inscriptions, the shorter form Su is found for Su-édin, Su-tium: on these grounds, therefore, it is probable that the Shoa of Ezk are the Suti of the inscriptions (S.E. of Kutu, in the direction of Elam). Further, as Ezk. couples to-gether Shoa' and Koa', so the inscriptions often couple together Su-Edin or Suti with Kutu: + a presumption thus arises that as Shoa' corresponds to Suti Statu Statu to Suti or Sutu, so Koa' corresponds to Kutu, the only link in the complete proof that is missing being the fact that (according to Del.) the shorter form Ku (corresponding to Su) is not known to occur in the inscriptions. Nevertheless, the identification is a very probable one; and if, as Hil-precht's discoveries appear to have shown, the hebar was 'a large navigable canal near Nippur,' Ezekiel would not, speaking comparatively, have been far distant from any of the three peoples named in this verse. Both Sutu and Kutu are, as Winckler (*Alttest. Unterss.* 1892, 178) remarks, the standing foes of Assyria: the words in Ezk. 'all the children of Asshur,' are not, however, necessarily in apposition with these two names.§

Ges. (Thes.) defends the appellative sense principes; but his etymology, though ingenious, must be owned to be far-fetched and improbable. See, further, Schrader, KAT' ad loc.; and especially Delitzsch, Paradies, pp. 234-6; and cf. art. KIR in the present volume. S. R. DRIVER.

KOHATH (קקת) is known to us only from P and the Chronicler. According to these writers, he was the second of the three sons of Levi (Ex  $6^{16}$ , Nu  $3^{17}$ , 1 Ch  $6^{1.16}$   $23^6$ ). He had four sons, Amram, Izhar, Hebron, and Uzziel (Ex  $6^{15}$ , Nu  $3^{19}$ , 1 Ch  $6^{2.18}$   $23^{19}$ ), and lived to the age of 133 years (Ex  $6^{16}$ ). In 1 Ch  $6^{28}$  Amminadab is said to be the son of  $12^{11}$  be the son Kohath, but this is probably a clerical error for Izhar (cf. 6<sup>38</sup>). His sister was Jochebed, the aunt and wife of Amram, and the mother of Moses (Ex  $6^{20}$ , Nu  $26^{20}$ ). For the rebellion of his grandson Korah (Nu 16) see KORAH. Nothing further is related of K. personally, but we have fuller par-ticulars of the fortunes of his descendants. Their history falls into three periods-(1) the wilderness wanderings and the settlement in Canaan, (2) the monarchy, (3) the period after the Exile.

1. At the time of the census taken by Moses in the wilderness of Sinai the Kohathites were

\* Or acc. to Winckler (Unterss. zur altor. Gesch. 131), like the Suti, a nomadic tribe of the Mesopotamian plains. † Cl. KIB i, p. 5, where the 'widespread kitti' and the 'Suti' are named in successive lines among the tribes subjugated by Ranmān-nirāri I. (c. 1325 n.c.). So Sargon, l.c. (KIB ii. 55), mentions Gutium, three lines before Pukudu and Nuti. ; Bab. Exped. of the Unit. of Pennsyle. ix. (1898), p. 28; cf. PEFSt, Jan. 1808, p. 55. § Winckler (with Bredenkamp and Klostermann) would read

י אומנות (with prevention breach and risk(rimann) would read pp for ידי (with prevention and prime) in Is 225. This is favoured also by W. Max Müller (in art. Kir above): but the two names are difficult to harmonize with specific accept by giving this verb arbitrary meanings like 'surround' or 'stir up.'

## KOHELETH

divided into four families, the Amramites, the Izharites, the Hebronites, and the Uzzielites  $(Nu 3^{27})$ . The whole number of males from a month old was 8600 (3<sup>22</sup>), and between 30 and 50 years of age 2750 (4<sup>2, 3, 34-37</sup>). Their position in the camp was on the side of the tabernacle southward (3<sup>20</sup>), and their chief at this time was Elizaphan the son of Uzziel (3<sup>30</sup>). The office assigned to them by P during the wilderness wanderings was the carrying of the sanctuary and its furniture, after it had been prepared for travel by Aaron and his sons  $(3^{31} 4^{4-15} 10^{21})$ . In this respect the Kohathites, the family of Aaron, had a more honourable office than that given to the descendants of Gershon the elder brother, and they consequently precede the Gershonites in Nu 4, Jos 21, 1 Ch 6. 15, 2 Ch 29<sup>19</sup>. In consequence of the greater holiness of their burden they carried it upon their shoulders (Nu 7º), in contrast to the Gershonites and Merarites, to whom waygons and oxen were given  $(7^{7,8})$ . The Kohawaggons and oxen were given (7<sup>7.8</sup>). thites are also mentioned at the time of the census taken by Moses and Eleazar in the plains of Moab by the Jordan, when the whole number of Levites was 23,000 (26<sup>57</sup>).

At the allotnent of Levitical cities by Joshua and Eleazar after the settlement in Pal., thirteen cities out of the territories of Judah, Simeon, and Benjamin were assigned to the Kohathite descendants of Aaron (Jos 21<sup>4</sup>. <sup>13-19</sup> [P]=1 Ch 6<sup>57-60</sup>); and ten others out of the territories of Ephraim, Dan, and Western Manasseh to the rest of the Kohathites (Jos 21<sup>5. 20-25</sup> [P]=1 Ch 6<sup>51. 67-70</sup>).

(JOS 21<sup>17,17,17</sup>) If the reign of David, as narrated by the Chronicler, we have several references to the Kohathites. The Kohathite family of Heman, together with the Gershonite family of Asaph and the Merarite family of Ethan or Jeduthun, were, acc. to this writer, specially set apart to administer the temple music (cf. 1 Ch  $6^{21-47}$  16<sup>41, 42</sup> 25<sup>1-7</sup>, and see HEMAN). In accordance with this, at the bringing up of the ark into Jerus., of the large number of Kohathites who are said to have been present (1 Ch 15<sup>5, 4, 5, 10</sup>), Heman and certain others took part in the music (15<sup>17, 19</sup>). Descendants of the four Kohathite families are mentioned as 'heads of the fathers' houses' when David divided the Levites into courses (1 Ch 23<sup>13-20</sup>), and in 1 Ch 26<sup>1, 27-31</sup> the particular offices held by descendants of the first three families are given in detail. Kohathites are spoken of as taking part in the temple services in the reign of Jeho-haphat (2 Ch 20<sup>13</sup>), and ang the temple under Hezekiah (29<sup>12,14</sup>).

3. In the period after the Exile we find very few traces of the Kohathite family. The Berechiah, son of Asa, son of Elkanah, mentioned in 1 Ch 9<sup>16</sup>, was probably a Kohathite. So also were the 'children of Shallum' who accompanied Zerubbabel (Ezr 2<sup>13</sup>; cf. 1 Ch 9<sup>17, 19</sup>, Neh 12<sup>26</sup>, in last Meshullan).

Mesnuliani). The Kohathites (' $\pi\pi\pi\pi$ , in Nu 10<sup>21</sup>, 1 Ch 20<sup>19</sup>  $5^{77}\pi\pi$ , n are mentioned Nu 3<sup>27, 30</sup> 4<sup>18, 34, 37</sup> 10<sup>21</sup> 26<sup>37</sup>, Jos 21<sup>4, 10</sup>, 1 Ch 6<sup>34, 64</sup> 9<sup>32</sup>, 2 Ch 20<sup>19</sup> 20<sup>12</sup>. #### KOHELETH .-- See ECCLESIASTES.

**KOLAIAH**  $(\pi_{1}^{c})$ . — 1. The father of a false prophet named Ahab, Jer 29<sup>21</sup> [Gr. 36<sup>31</sup>; *vidu* Kowkao only in Q<sup>ma</sup>]. 2. The name of a Benjamite family which settled in Jerusalem after the Captivity, Neh 11<sup>7</sup>; B Koõta, A Kωλειά.

**KONE** (Kurd, Jth 4<sup>4</sup>).—So B calls an unknown town of Palestine. But  $\aleph$  reads Ku $\lambda$ á (as A in

Jth 15<sup>4</sup>, for  $X\omega\lambda d$ ; A has Kuras. Some MSS read  $\kappa\omega\mu as$ , whence AV 'the villages.' F. C. PORTER.

**KOPH** (p).—The nineteenth letter of the Hebrew alphabet, and as such employed in the 119th Psalm to designate the 19th part, each verse of which begins with this letter. It is transliterated in this Dictionary by k.

**KORAH, DATHAN, ABIRAM** ( $\pi\gamma_1$ ,  $\epsilon_1\gamma_2$ ,  $\epsilon_1\gamma_3$ ,  $\epsilon_2\gamma_4$ ).---Most readers of the Eng. Bible are familiar with the story of Korah's rebellion, and of the terrible fate that overtook him and his followers. When we turn, however, to the record of these events (Nu 16), it is by no means easy to reduce it to a consistent or continuous narrative. The thread of the story is strangely broken, and we encounter remarkable repetitions (vv.<sup>5, 5, 16</sup>). Here, as in many other cases, we are helped by the labours of those critics who have analyzed the contents of the Hexateuch.

the flexateuch. There is reason to believe that *three* strata are present in the composition of Nu 16 and 17. This conclusion, which had been previously reached by various critics, was first placed on a thoroughly satisfactory basis by Kuenen (*ThT* (1878), p. 139 ff.), whose analysis has been substantially accepted by critics of such different schools as Baudissin, Cornill, Dillmann, Driver, Robertson Smith, and Wellhausen. Of the three narratives, the first two were originally quite independent of one another, while the third works over the material from the standpoint of a later age than that of the second writer.

I. We have a narrative from the well-known source JE, which has suffered very slight mutilation at the hands of the final redactor. It tells how Dathan and Abiram, descendants of Reuben, the oldest of Jacob's sons, rose argainst *Moscs*, because they were jealous of the authority he claimed, and were disappointed with the results of his leadership. On being informed of their murmurings, Moscs cited them to appear before him; but they refused to obey the summons, and repeated to his messengers their complaints (Nu 16<sup>13+10</sup>). Moscs, in anger(v.<sup>15</sup>), went to their tents in company with the elders of Israel, and solemnly warned the people to withdraw from the neighbourhood of Dathan and Abiram, who, with all their households, were then swallowed up by the earth (vv.<sup>35-30</sup>). 'This is a rebellion of *laynen* against the *civil* authority claimed by Moscs' (Driver).

rebellion of laymen against the civil authority claimed by Moses' (Driver). II. The author of the priestly narrative (P) relates quite a different story. Korah, at the head of 250 princes of the congregation, instigates a rebellion against Moses and Aaron, in the interests of the people at large against the tribe of Leri. 'All the congregation are holy,' says K. (v.<sup>3</sup>) and as much entitled as the Levites to discharge religions functions. Moses invites them to put the matter to the proof by coming on the following day with their censers to offer incense. They accept the challenge (vv.<sup>15, 19</sup>), and, in the act of offering, they are consumed by fire from the Lord (v.<sup>33</sup>). Their fate provokes the people, who murmur that Moses and Aaron had killed the people of the Lord (v.<sup>41</sup>). A plague breaks out in consequence, which is only stayed by the atoming offering of Aaron (v.<sup>45</sup>), The story of the 17 is the sequel, and comes from the same source, P. The phosensing of Aaron's rod is meant to establish, not his rights in opposition to those of other Levites, but to establish the prerogative of the tribe of Leri as represented by Aaron, in opposition to the start tribes as represented by their respective princes. Here, again, we have a rebellion of laymen, but directed this time against the ecclesizatical authority claimed by the tribe of Levi. III Another writer of the priestly school, whom we may

directed this time against the ecclesiastical authority claimed by the tribe of Levi. III. Another writer of the priestly school, whom we may designate, with Cornill, P<sup>3</sup>, worked up the narrative at a later period. In his version of the story, K., at the head of 250 *Levites*, opposes, in the interest of the tribe of Levi, the monopoly of the pricethood claimed by Aaron (vv.<sup>8-11</sup>). The test proposed by Moses is the same as in the second narrative (vv.<sup>16-17</sup>, which are a repetition of vv.<sup>6-7</sup>), and P<sup>3</sup>s account of the fate of the rebels is adopted (v.<sup>35)</sup> without change. From the hand of the latest writer come also vv.<sup>35+0</sup>, which relate how the censers of the 250 were made into a covering for the altar, to be a memorial of the fate of the rebels.

latest writer come also  $vv.^{si+0}$ , which relate how the censers of the 250 were made into a covering for the altar, to be a memorial of the fate of the rebels. It is evident that the two priestly narratives have quite different aims. In P there is no opposition between Levites and priests, but between non-Levites and Levites, whereas in P<sup>x</sup> there is a sharp distinction between the tribe of Levi and the family of Aaron. (Note especially v.<sup>40</sup>, where the moral of P<sup>x</sup>'s marrative is thus given, 'that no stranger which is not of the seed of Aaron come near to burn incense before the Lord, that he quite certain whether, according to the original narrative of P, even K, himself was a Levite, for the words in v.<sup>1</sup> the son of

Digitized by Google

Izhar, the son of Kohath, the son of Levi,' may well come from the hand of the redactor. But in any case it is clear enough that all his 250 followers were not Levites; a conclusion which is confirmed, if confirmation were necessary, by Nu 27<sup>3</sup>, where the daughters of Zelophehad plead that their father had no part in the rebellion of Korah. As Zelophehad belonged to the tribe of Manasseh, this plea need not have been offered if all K.'s followers had been Levites. The differences between JE and P, and the original independ-ence of their narratives, are equally apparent. JE knows only bathan and Abiram. P knows only Korah : and accordingly.

In the universe so tween 32 and 1, and the original independ-once of their narratives, are equally apparent. JE knows only Dathan and Abiram, P knows only Korah; and, accordingly, the author of Dt 116, who is acquainted with the Jahwistic but not with the Priestly document, mentions only Dathan and Abiram.

The analysis of the two chapters may be given as follows (practically after Driver) :--

JE 161b-2a. 12-15. 25-26. 27b-34. P 161a. 2b-7a. 18-24. 27a. 32b. 35. 41-50. ch. 17. Px 167b-11. 16-17. 36-40.

The composite character of the narrative is borne out by the The composite character of the market is borne out by the separation, after 161, of the two parties, Dathan and Abiram on the one hand, Korah and his company on the other. They act separately (cf. vv.<sup>34</sup> with vv.<sup>32</sup>); they are addressed separately (cf. vv.<sup>34</sup> with vv.<sup>32</sup>); they are punished separately and differently (cf. v.<sup>31</sup> with v.<sup>35</sup>).

Traces of the welding process by which the narrative has assumed the comparative smoothness of its present form may be detected in v.70 ('ye sons of Levi'), and in v.32b ('and all the men that appertained unto Korah, and all their goods').

It cannot be over-emphasized that all the indications in the narrative point to the above result, and that literary differences combine with differences of agents and of motives to establish three distinct elements in the composition. 'Of course in itself a difference of motive is no ground for supposing that the narrative in which it appears is of composite authorship; that inference follows solely from the manner in which the difference is introduced... In itself an alliance between an ecclesiastical and a civil party is perfectly intelligible; but the literary analysis shows Nu 16 to be composite; and when the component parts have been separated into two groups, it is found that the actors in one group represent ecclesiastical interests, while they represent civil interests in the other. Such a coincidence cannot be accidental; the differences of person and motive (though they might have been combined in such a manner as to arouse no suspicion whatever that the narrative was composite) so coincide with literary differences as to corroborate the conclusion to which these point' (Driver, LOT<sup>3</sup>, App. 523 f. [cf. <sup>6</sup> p. 65]). We have thus disentangled three distinct narra-

tives, of which the last two are memorials of the struggles that took place, and of the various stages that were passed through before the prerogatives of Levi were admitted by the other trilles, and those of the house of Aaron by the other Levitical families. At whatever date we place these last

## **KUSHAIAH**

results, we may be certain that they were not reached without fierce opposition.

One or two remarks have still to be made on the text of Nu 16. In v.<sup>1</sup> np<sup>1</sup>, for which the LXX offers  $\epsilon\lambda\delta\lambda\eta\sigma\epsilonr$ , and which AV and RV both render took men' (supplying the last word), can scarcely be the correct reading. There is probably a copyist's error also in nation in and on the son of Peleth. There is no mention of **On** in the subsequent narrative, nor does his name occur anywhere else in the OT. For Peleth we should doubtless read, as in Ex 614 etc., Pallu, and perhaps, as Graf suggests, v.16 should run thus : וּדָּמָן בּן־פּלא בּן־אָיאָר בּן פּלא. In vv.<sup>24</sup> and <sup>27</sup> Wellhausen and Driver agree in holding that the original reading was probably 'tabernacle of J''.'

 $\mathbf{L}$ 

L.-1. This symbol was proposed by de Lagarde (Genesis grace, 1868, p. 12) to denote the illumin-ated Purple Manuscript of the Greek Genesis at Vienna, one of the chief specimens of Christian book-illumination. The manuscript is designated VI by Holmes, and the text has been edited by him from a copy of Alter, 1795, in a publication preparatory to the great Oxford Septuagint (title : Honorabili, et admodum reverendo, Shute Bar-rington, LL.D. Episcopo Dunelmensi, Epistola, complexa GENESIN, ex codice purpureo-argenteo Cæsareo - Vindobonensi expressam ; et Testamenti Veteris Græci, versionis septuaginta viralis, cum variis lectionibus denuo edendi, Specimen. Dedit Robertus Holmes, S.T.P. Oxonii, MDCCXCV fol.). It is a parallel to the famous Codex Cottonianus Geneseos in the British Museum, and has not been used by Swete for his edition of the Greek OT (vol. i. 2nd ed. 1895),\* because at that time it was (Vol. 1. 210 ed. 1853), because at that time to was not yet published in full facsimile. This has been done since in the splendid work, Die Wiener Genesis herausgegeben von Wilhelm Ritter von Hartel und Franz Wickhoff. Beilage zum xv. und xvi. Bande des Jahrbuches der Kunsthistorischen Sammlungen des Allerhöchsten Kaiserhauses. Mit 52 Lichtdrucktalfeln, etc. Wien (Prag, Leipzig), F. Tempsky, 1895 fol. (the Greek text in transcription, pp. 102-125). An exhaustive mono-graph on the pictures of the MS has recently been published by a pupil of Prof. V. Schultze of Caniformial Willing Lätter Contention Greifswald, Willy Lüdtke, Untersuchungen zu den Miniaturen der Wiener Genesis (Inaugural Dis-sertation, Greifswald, 1897, 50 pp.). Lüdtke considers the volume as the first known manuscript of the Bible in which pictures are connected with the text, the first illustrated book of Bible story, and is inclined to assign it to the latter half of the 5th cent. E. M. Thompson (Handbook of Greek and Latin Palwography, 1893, p. 154) makes it prob-ably of the latter half of the 6th cent.; Kenyon, of the 5th or 6th cent. The text is sometimes abbreviated, and several passages are very difficult to read ; the MS is therefore less important for the textual criticism of the Greek OT; but it is a monument of the first rank in the history of Christian art. Attached to the codex are two leaves from the purple MS of the New Testament, called N.

2. In the criticism of the NT the symbol L is used to designate the Codex Regius, a manuscript of the Greek Gospels preserved in the National Library of Paris, now numbered 62. It was known already to Stephen, who called it  $\eta$ , as is stated in the volume by a later hand, 'Roberto Stephano  $\eta$ .' Scrivener (Introduction to the NT, 4th ed. (1894) p. 138) overlooked this  $\eta$ , and misunderstood, therefore, this entry when he wrote, 'it was even then in the Royal Library, although "Roberto Stephano" is marked in the volume.' Griesbach rated the MS very high: Tischendorf published it in full in his Monumenta sacra inedita, 1846. It is ascribed to the 8th cent., and was for a long time unique, as giving two alternative endings to the Gospel of Mark, namely—besides and before the received one, which is introduced by the heading form  $\delta k$  al raira  $\phi e \beta \mu era \mu r h \tau \delta' \epsilon \phi \beta \delta \delta \theta ror \gamma d\rho$ , a shorter ending, printed by Westcott-Hort after the one just mentioned. This wretched supplement, as Scrivener styles it, is separated in this MS from the words of the text ( $\epsilon \phi \beta \delta \theta \theta r r \gamma d\rho$ ) by an ornamented line, and introduced by the head-

<sup>•</sup> Its readings will find a place in the Apparatus of the larger edition, which is now being prepared by Brooke and M'Lean.

ing *operal mov kal raîra*. Recently it has been found in several Greek, Latin, Syriac, and Ethiopic documents, the nearest ally to L being a manuscript on Mount Sinai  $(\Delta^{12})$ , ascribed to the 7th cent. The latter has the subscription evarythior sara Mapsov immediately after  $\epsilon \phi o \beta o \partial r \sigma \sigma \phi_{0}$ ; then follows the shorter supplement (whether intro-duced by the same formula as in L is not certain, the MS being defective at that place) with slight variations (om. rai before  $d\chi\rho_i$ , adds  $d\mu\eta\nu$  after  $\sigma\omega\tau\eta\rho ia$ ); after this comes form de raira etc. On the questions connected with the end of St. Mark see the monograph of Dean Burgon (1871); P. Martin, Introduction à la critique textuelle du NT, Partie pratique, tome ii. (1884); Westcott-Hort, NT, App. 28-51, with the additional notes to pp. 38 and 51 on p. 142 of the reprint of 1896 ; J. R. pp. 38 and 31 on p. 142 of the reprint of 1896; J. R. Harris, 'On the alternative ending of St. Mark's Gospel,' Journ. of Biblical Literature (1894), pp. 96– 103; H. B. Swete, The Gospel according to St. Mark (1898), p. xcvi ff.; Th. Zahn, Einleitung in das Neue Testament (1809), ii. pp. 227-235, 237-240. The shorter ending had its origin probably in Egypt; there also L seems to have been written. On the third leaf of the MS is a note by a later hand, which might show where the MS was before it came to Europe, if it could be read and interpreted with certainty (a Georgios  $\tau \circ i$  Adox $b \delta \tau i \delta t \circ r$ left some MSS els  $\tau \circ i$  Indure  $v \circ i$  Midox  $\delta \delta \sigma \pi i \tau i \circ r$ ). Facsimiles are to be found in Tischendorf, plate i. n. 7, plate iii. n. 7; Scrivener, plate ix. n. 21; P. Martin, Description technique des manuscrits grecs relatifs au NT conscrvées dans les bibliothèques de Paris (1884), plate 1. EB. NESTLE.

LAADAH ((الإيرة)). — A Judahite, the 'father' of Mareshah, 1 Ch 4<sup>-1</sup> (B Maðáθ, A Aaðá).

LABAN (j<sup>2</sup>), Λαβάν).—1. Son of Bethuel (Gn 28<sup>5</sup>), graudson of Nahor, Abraham's brother (22<sup>20, 22</sup> 24<sup>24</sup>, -in 29<sup>5</sup> 'son' = grandson), and brother of Rebekah (2429; 2520), uncle of Jacob on his mother's side (27"; 28"), and (after his marriage with Leah) his father-in-law as well. When Abraham and Lot migrated from Haran (on the Belikh, a tributary of the Euphrates, in Mesopotamia) into Canaan (Gn 12<sup>4.6</sup>), Nahor remained behind in Haran; here his family grew up around him  $(22^{20-24}; \text{the names}, except in the cases of Bethuel and Rebekah, are,$ however, those of*tribes*); and Haran (cf. 294),there is the information in part made avarrasely.though the identification is not made expressly, is, there can be no doubt, the 'city of Nahor' (24<sup>10</sup>), to which Abraham's servant took his way, when sent by his master to find a wife for Isaac from the land of his nativity. Laban's home (Gn 24<sup>10</sup>) was in 'Aram (AV Syria) of the two rivers' (the Euphrates, in its upper course, and the Habor); and so, like his father Bethuel  $(25^{20} 28^5)$ , he is called specifically the 'Aramæan' (AV Syrian), 2520 31-0. 24 (cf. of Jacob, Dt 265). It is in connexion with the negotiations for Rebekah's hand that we first read of Laban. He is evidently the moving spirit in his father's house. He comes forward to receive Abraham's servant, listens to what he has to say, and takes the lead in the subsequent negotiations (2429-55. 50.53). It is no doubt true that in the  $(24^{22-83.50.53b.55})$ . It is no doubt true that in the East (cf. Gn  $34^{11.12}$ , Ca  $8^8$ ) a girl's brothers have a prominent voice in the disposal of their sister's hand; but, independently of this, Laban seems clearly to throw his father Bethuel into the background. It has been observed that Laban already displays the grasping disposition which was

LABAN

manifested more fully afterwards in his dealings with Jacob: he is attracted by the ring and bracelets which Abraham's servant had given his sister (24<sup>30</sup>).

What we read about Laban subsequently relates these have been described so fully in the art. JACOB (vol. ii. pp. 528-9, 533) that an outline will be sufficient here. Laban must now be pictured as quite an old man. Jacob, sent by his mother to her brother, arrives at Haran, and quickly finds his uncle's house (29<sup>1-13</sup>). He remains with him a month (2914); at the end of which time Laban, no doubt discovering that his services as a shepherd are likely to prove valuable to him, asks him on what terms he will remain with him. He replies that he will serve him 7 years for his younger daughter Rachel. At the end of the 7 years Laban, by a ruse, passes off upon him his elder daughter Leah; and only permits him to have Rachel as well, on condition that he serves him for 7 years more  $(29^{10-30})$ . At the end of the second 7 years Jacob is anxious to return home; but Laban, reluctant to part with a profitable servant, invites him, with a show of disinterestedness, to name the terms on which he will continue in his service (30<sup>22-26</sup>). Jacob thereupon proposes an arrangement by which, ostensibly, he will gain little or nothing, and with which, therefore, Laban immediately closes, but which, it soon appears, his son-in-law knows how to turn to his own advantage (3029-43). Laban, envious of Jacob's increasing prosperity, now shows ill-will towards him; his sons (mentioned also in 3035) complain that Jacob has taken away all their father's possessions : accordingly Jacob, after confather has shown them no real affection,  $31^{14}$ . 13),\* takes flight, accompanied by his family and their belongings (31<sup>1-21</sup>). His father in-law, considering that he has some kind of claim on the services and belongings of his son-in law, and vexed besides at the loss of the teraphim (which Rachel had stolen), starts in pursuit. On the way, apparently on the night before he came up with Jacob, 'as if an evil conscience preyed secretly upon him' (Ewald, *Hist.* 356, ba is warred in a drawn not the present against Jacob too violently (31<sup>24</sup>). Overtaking the fugitives on the borders of Gilead, Laban remonstrates with Jacob on his ungrateful treatment of him, and especially for having carried away his daughters secretly, which was both an affront to them  $(31^{36b})$ , and an injury to his own feelings  $(31^{26})$ . Jacob, in reply, declares that he was afraid, if he told Laban, that he would retain big daughters by force, and then affred the insident his daughters by force; and then, after the incident with the teraphim (in which Laban is outwitted by his own daughter), he goes on to remind him of the long years which he has spent ungrudgingly in his service, and of the repeated attempts that Laban had made  $(31^{7t})$  to deprive him of his lawful earnings  $(31^{31-42})$ . Laban, conscious of the truth in Jacob's reproaches, makes no attempt to reply : he contents himself with protesting that everything which Jacob has is really his; and then seeks to close the dispute by representing hinself as con-cerned for his daughters' welfare. Accordingly he proposes a covenant, the terms of which are—(1) that Jacob will in no way ill-treat his daughters; (2) that neither he nor Jacob will pass the loundary, marked by a heap of stones then thrown up, with hostile intent towards the other (see, further, on the object of this 'covenant,' above, ii. p. 529). The covenant having been solemnly ratified by both parties, Laban returns home, and is not mentioned again (3143-56).

The character of Laban is not an amiable ope.

• 'And hath also quite devoured our money,' i.e. the price paid for us by our hisband, the gains accruing to Laban from Jacob's 14 years' service, some part of which he would, if generous, have naturally allowed his daughters.

#### LACCUNUS

His sister and daughters all show duplicity and acquisitiveness; and Laban displays an exaggeration of the same qualities. His leading motive is evidently self-interest; and he is not particular in the choice of means for securing his ends. The ruse by which he passes off Leah upon his nephew instead of Rachel, is an unpardonable piece of deceit. In his subsequent dealings with his son-inlaw, he does not treat him equitably. It is admitted by him, expressly in J (30<sup>27</sup>), and by implication in E,—for the statements in  $31^{38-40}$ , cf. vf, pass unchallenged,—that Jacob is a good servant; but Laban seeks to make out of him more than fair profits. In  $30^{29-43}$  he betrays his grasping disposition by closing with an arrangement which, if carried out fairly, could not but have proved an inequitable one for Jacob, and in which, therefore, Laban had no right to be surprised if he found himself circumvented. In the narrative of E ( $31^{1-6}$ ) which (vv.<sup>8-19</sup>) differs from that of J in not representing Jacob as taking any unfair advantage of his father-in-law (cf. ii. p. 533, notc)—Laban is charged with defrauding Jacob, and arbitrarily changing the wages that had been agreed upon, to suit his own ends (vv.<sup>7.41</sup>). And his daughters own ( $31^{14-16}$ ) that he is a hard and unnatural parent.

2. A place mentioned in the obscure verse, Dt l<sup>1</sup> (see Comm.; or above, art. DI-ZAHAB). Nothing can be said about it, except that if the verse describes a locality in the 'steppes of Moab,' Laban will be the name of a place in that neighbourhood, otherwise unknown; while if, as others suppose, the verse, at least in its original context, described places passed by the Israelites in their previous wanderings, it may be identical with the LIBNAH (which see) of Nu  $33^{20}$  (which, to judge from v.<sup>17</sup>, was near a Hazéroth, as was the case also with the Laban mentioned in Dt l<sup>1</sup>). S. R. DRIVER.

#### LABANA ( $\Lambda \alpha \beta \alpha \nu \dot{\alpha}$ ), 1 Es 5<sup>29</sup> = LEBANAH, Ezr 2<sup>45</sup>.

**LABOUR.**—As a subst. 'labour' is now almost contined to what is called the *abstract* use—the act or state of labouring. Formerly it expressed also the fruit of labour, as Ex 23<sup>16</sup> 'when thou hast gathered in thy labours  $(\forall \psi_2 \gamma)$  out of the field'; Hab 3<sup>17</sup> 'The labour  $(\forall \psi_2 \gamma)$  of the olive shall fail' (Davidson, 'the produce of the olive'). Hence the word is frequently in the plural, as Jn 4<sup>50</sup> 'other men laboured, and ye are entered into their labours' (els tor stors atros, RV 'into their labour'). Knox, Hist. 92, has the word in the sense of 'effort,' 'Great labours were made to make them have a good opinion of the Masse.'

The verb is used with a trans. force in 2 Mac  $2^{s_1}$ 'But to use brevity, and avoid much labouring of the work ( $r\delta \,\epsilon \epsilon \rho \gamma a \sigma \tau \kappa \delta r \, r \rho a \gamma \mu a \tau (\epsilon) (as \pi a \rho a t$  $r \epsilon i \sigma \partial a, RV 'to avoid a laboured fulness in the$ treatment'), is to be granted to him that will makean abridgement.' So in beg. of Pref. to AV 1611,'Zeale to promote the common good, whether it beby devising any thing our selves, or revising thatwhich hath bene laboured by others, deservethcertainly much respect and esteeme, but yetfindeth but cold intertainment in the world.' Cf.Hall, Works, ii. 100, 'these are the men whose curewee must labour'; Pref. to Rhem. NT, 1852, 'Theground, sing the hymnes and psalmes either inknowen or unknowen languages, as they heardthem in the holy Church, though they couldneither reade nor know the sense, meaning, andmysteries of the same.' J. HASTINGS.

LACCUNUS (Λακκοῦνος, AV Lacunus), 1 Es 9<sup>31</sup>. —The name in Ezr 10<sup>30</sup> is CHELAL, to which the Vulg. form *Calcus* in 1 Es approaches. H. ST. J. THACKERAY.

LACE.—Lace is from Lat. laqueus, a snare, through the Old French lags, las, and it is used in the sense of snare in Chaucer, Spenser, and others. Thus Chaucer, Legend of Good Women, 600-

<sup>4</sup> But love had broght this man in swiche a rage, And him so narwe bounden in his las, Al for the love of Cleopataras, That al the world he sette at no value.<sup>4</sup>

Then it is used for any cord or band, as Fuller, Holy Warre, 123, 'Pitie it was that Rahabs red lace was not tied at his window.' This is the meaning of the word in AV, where it occurs only as tr. of  $\forall n \neq pathil,*$  Ex 28<sup>26</sup> ('And they shall hind the broacted to be the sine theorem for the shall bind the breastplate by the rings thereof unto the rings of the ephod with a lace of blue') 28<sup>37</sup> 39<sup>21, 21</sup>; and of  $\kappa\lambda\hat{\omega}\sigma\mu a$  in Sir 6<sup>30</sup> ' her bands are purple lace ' ( $\kappa\lambda\omega\mu$  institution, AVm 'a ribband of blue silk'; IV 'a ribband of blue'; Fritzsche, 'purple-blue threads'; Bissell, 'hyacinthine threads'). Cf. Shaks. Winter's Tale, III. ii. 174—

<sup>6</sup>O, cut my lace, lest my heart, cracking it, Break too.<sup>7</sup> J. HASTINGS.

LACEDÆMONIANS. - The word Λακεδαιμόνιοι occurs only once in LXX, and its Eng. equivalent only once in RV, viz. 2 Mac 59. Jason, the head of the Hellenizing party in Jerus., who had bought the high priesthood from his brother Onias III. during the reign of Antiochus Epiphanes, was himself outbidden and expelled from the office by Menelaus his brother (Jos. Ant. XII. v. 1 and Xv. iii. 1), or, according to 2 Mac 4<sup>23</sup>, the brother of Simon, a former governor of the temple. On a false report of the death of Antiochus, Jason made an unsuccessful assault upon Jerus.; but, after causing great loss of life among his fellow-citizens, he was driven an outcast to the land of the Ammonites, from there to the court of Aretas an Arabian prince, then into Egypt, and lastly to the L., in whose country he died a dishonoured exile. The reason of his ultimate recourse to the latter people was the alleged kinship between the Jews and the Greeks, resting on the supposed connexion between Peleg and the Pelasgians, a prehistoric people mentioned as living in different parts of Greece and coasts of the Agean Sea. Peleg, however, or Phaleg, whose name implies 'division' (Jos. Ant. I. vi. 4), the ancestor of Abraham and the son of Heber, the eponymous ancestor of the Hebrew race, was (Jos. ib.) the great-grandson of Noah, and belonged to the Semitic family. The Pelasgians, on the other hand, were part of the Indo-European stock, and afterwards mingled with the Hellenes in Greece, and with the Carians, Lydians, and Phrygians in Asia Minor.

LACHISH ( $\sigma^{+,2}$ ), LXX Aaxels, twice with the art.  $\tau\eta\nu$  Aaxels Jos 10<sup>324</sup>, in Jos 15<sup>30</sup> B Max $\eta$ s, B<sup>ab</sup> Aax $\eta$ s; Vulg. Lachis). — An important fortified town in Judah. Its king, Japhia, formed a league with four other Canaanite kings, viz. those of Jerus, Eglon, Hebron, and Jarmuth, to smite the (ibeonites, as they had made peace with Israel (Jos  $10^{15}$ , JE mainly). Joshua overcame the united forces, and the kings fied to a cave in Makkedah, where they were pursued by the Israelites, who rolled stones against the mouth of the cave. Later, the kings were taken out, humiliated, and hanged on five trees. At sunset, by command of Joshua, their bodies were taken down and placed in the cave, at whose mouth stones were again rolled. The siege of L. by

\*Elsewhere páthil is rendered in AV 'bound' Nu 19<sup>18</sup>; 'ribband' Nu 15<sup>38</sup> (RV 'cord'); 'thread' Jg 16<sup>9</sup> (RV 'string'); 'line' Ezk 40<sup>5</sup>; 'bracelets' Gn 38<sup>18</sup> (RV 'cord') 38<sup>26</sup> (RV 'cords'); 'wires' Ex 89<sup>3</sup>.

Joshua, according to  $D^2$ , occupied parts of two days  $(vv.^{31.32})$ . When it was taken, all the inhabitants were put to the sword.

The place is next mentioned in the list of cities built by Rehoboam for defence, by which it may be understood that he re-fortified the town (2 Ch 11<sup>9</sup>). Amaziah fled to L. from a conspiracy in Jerus, but he was pursued and slain there (2 K 14<sup>10</sup> || 2 Ch 25<sup>27</sup>). The prophet Micah inveights against L. as ' the beginning of sin to the daughter of Zion, for the transgressions of Israel were found in thee' (Mic  $1^{13}$ ), an enigmatical utterance, the conjectures regarding the meaning of which will be found in Nowack's Comm. ad loc. When Sennacherib made his raid on the kingdom of Judah, he took all the fortified cities, including L. (2 K  $18^{13}$ .<sup>14</sup>, Is 36<sup>1</sup>). The scene of the siege is depicted in an Assyr. sculpture, now in the British Museum. To this place Hezekiah sent messengers with immense gifts and promises of submission, to induce the Assyr. king, who was there encamped, to abandon the campaign (2 K  $18^{1+16}$ ). In reply, Sennacherib despatched a great host against Jerus. (2 K  $18^{17}$ Is 36<sup>2</sup>). But his forces were miraculously destroyed, and he returned to Assyria, abandoning his con-quests (2 K 19<sup>35, 36</sup> ] Is  $37^{36, 37}$ , 2 Ch  $32^{21}$ ). The account in 2 Ch  $32^9$  mentions the envoys sent to Hezekiah, but not the expedition against Jerus., as it says of Sennacherib, 'but he (himself laid siege) to L., and all his power with him.' When c. 120 years later, Nebuch, king of Babylon, destroyed the kingdom of Judah and carried the people into captivity, L. was one of the cities taken (Jer 347). On the return of the Jews, L. was one of the places re-occupied, but it is noticeable that while each of the other places is spoken of as being occupied 'with the villages thereof,' 'Lachish and the fields thereof' are referred to as if the occupation was but feeble (Neh 11<sup>30</sup>). It is not mentioned in the NT, nor in the Apocrypha.

Scholars are now generally agreed that L. is to be identified with Tell el-Hesy, a mound in the rolling country between the maritime plain and the Judæan hills, 16 miles E. of Gaza, a little to This identification was first proposed the north. by Conder, who sees in the radicals of the modern name a reminiscence of the ancient, though the change in the second radical from  $\supset$  to  $\pi$  is unusual. The position of Tell el-Hesy corresponds fairly with Jerome's description of L. in the Unonvesticon. He says : 'Lachis in tribu Juda . . . et nunc est villa in septimo miliario ab Eleutheropoli euntibus Daromam.' Eleutheropolis is the modern *Beit Jibrin*, 10 miles from Tell el-Hesy, which nearly coincides. Daroma may be the Shephelah, or low country, in which Tell el Hesy is situated. Another equally important mound, Tell en-Nejileh, is found 31 miles to the south of Tell el-Hesy, about the same distance from Beit Jibrin. Both have springs at their base. These two mounds seem to represent L. and Eglon, which were within easy marching distance, as Joshua took Eglon on the day that he left L. (Jos 1035). As Eglon disappears from history earlier than L., and as the remains on the top of Tell en-Nejileh are earlier than those on the top of Tell el-Hesy, Petrie regards the former as Eglon and the later as Lachish. However, until systematic excavations are conducted at Tell en-Nejileh, the matter should not be held to be finally settled.

The site of Tell el-Hesy is admirably suited for a town, as the original dwellings stood on a bluff facing east, some 60 feet above the Wady el-Hesy, and were further protected by ridges to the west. During the course of centuries the remains accumulated, until the last occupation stood some 120 feet above the stream-bed. In 1890, Petrie, excavating for the Pal. Explor. Fund, studied the tell, during a short season, in cuttings around its sides, arriving

#### LACHISH

at conclusions which the present writer's more extended work, covering four seasons, modified, but did not materially alter. One-third of the mound being chosen, it was cut down, layer by layer, each layer representing a distinct occupation, until the virgin soil was reached. We have thus the plans of eight cities, the second built on the ruins of the first, the third on the ruins of the second, and so on. This series of superimposed constructions is due to the material. Each city was built of mud-brick, which requires nothing but mud-brick for its founda-tion The cities were approximately dated by the objects found in situ. The first three or four towns occupied an area about  $\frac{1}{2}$  mile square, while the later towns confined themselves to a space about later towns connied themselves to a space about 100 yards square, and may thus be regarded as a series of forts, as almost all are flanked by thick walls. The earliest town was distinguished by peculiar styles of pottery, which have been named Amorite. It also contained a group of unique bronze implements. It is fortified by a strong wall and towns and there has a bated at a bate a contained a and tower, and may be dated at about B.C. 1700. City II. is dated by scarabs at about B.C. 1500. City III. was buried under a thick bed of ashes. Outside one of its chambers was discovered a cuneiform tablet, which from its style and contents is shown to belong to the period of the Tel el-Amarna tablets, which were letters sent to Amenhotep III. and IV. of Egypt, about B.C. 1450, by their allies and dependants in Syria, Palestine, and farther east. It mentions the name of Zimridi, who, as we learn in a tablet from Jerus., was governor of L., murdered in that city by servants of the Egyp. king. The hopes suggested by the discovery of this tablet are far-reaching. The date B.C. 1450 for this city is confirmed by scarabs found here. In City IV. (B.C. 1400-1000) Phœn. pottery prevails. Here iron objects first appeared, but these were found in all the superimposed cities. In City V. (about B.C. 1000) and City VI. (about 800) Jewish ware is prevalent. City VI. has a great accumulation, from which we infer a long occupation. The red and black figured Greek pottery is common in Cities VII. and VIII., suggesting B.C. 500-400 as the limits of these occupations. The absence of the limits of these occupations. The absence of coins and of Roman and Seleucidan remains shows that the site was deserted after B.C. 400.

The remains at Tell el-Hesy thus correspond admirably to the history of Lachish. One of the earlier cities undoubtedly fell a prey to Joshua, a later one was fortified by kehoboam, and we may point with considerable confidence to the thick walls of City VI. as the fortifications taken by Sennacherib, whose sculptures commemorating the event bear a striking resemblance to Tell

el-Hesy. We have, however, in considering the identifica-tion, to count with the phrase of Jerome, 'nunc est villa.' While the *tell* shows no late remains, the adjacent fields are strewn with Roman pottery, and 3 miles away is the slight ruin of Umm-Lakis [but see Clermont-Ganneau, Bibl. Res. in Pal. i. (1896) p. 438], containing Roman remains, which was formerly identified with L. and which Petrie translates, ' her [?; see Mound of Many Citics, p. 141] mother was Lachish.' He suggests that soon after In other was laternal. It is suggests that even was the return of the Jews from exile they removed the settlement to Umm-Lakis. The name is pronounced Laggis by the Arabs, who pronounce a p like hard g. A change from  $\neg$  to  $\rho$  is not common. But either in the fields near Tell el Hesy, or at Umm-Lakis, we have late ruins which may easily represent the town still inhabited in the time of Jerome.

LITERATURE. — Tell el·Hesy (Lachish), by W. M. Flinders Petrie; A Mound of Many Cities, or Tell el·Hesy Excavated, by F. J. Bliss; both published for the Committee of the PEF by Alexander P. Watt, London. F. J. BLISS.

#### LADDER

**LACK** is both a subst. (=want) and a verb (= b $\epsilon$ **LACK** is both a subst. (=want) and a verb (=bc deficient in, want). Thus as subst., Ex 16<sup>18</sup> 'hc that gathered little had no lack'; Job 4<sup>11</sup> 'The old lion perisheth for lack of prey'; Ph 2<sup>20</sup> 'to supply your lack of service toward me' ( $\tau \delta i\mu \bar{\omega}\nu$  $i\sigma \tau \delta \rho \eta \mu a$ ; RV 'that which was lacking in your service'); 1 Th 4<sup>13</sup> 'that ye may have lack ( $\chi \rho \epsilon la\nu$ , RV 'need') of nothing.' Cf. Elyot, Governour, ii. 263, 'To the one and the other is required the vertue morall called fortitude, whiche as moche as it is a vertue is a Mediocritie or meane betwene as it is a vertue is a Mediocritie or meane betwene two extremities, the one in surplusage, the other in lacke'; T. Lever, Sermons, p. 83, 'Some doo raveyn and spoyll that which is not their owne, and be ever in lacke and neede.' Lever uses the subst. in the plu. also, *Sermons*, p. 74, 'These be verye small thinges towardes the amendment of so many

lackes, in so great a multitude.' As a verb 'lack' is both trans. and intrans. Thus Ja 1<sup>5</sup> 'If any of you lack wisdom, let him ask of God.' Cf. Ro 2<sup>20</sup> Tind., 'An informer of them which lacke discrecion'; Pr. Bk. 1549 (Communion), 'And if there be any of you, whose conscience is troubled and grieved in any thing, lacking comfort or counsel, let him come to me, or to some other discreet and learned priest, taught in the law of God, and confess and open his sin and grief secretly, that he may receive such ghostly counsel, advice, and comfort, that his conscience may be relieved." The intrans. use, though Abbott (Shaks. Gram. § 293) gives it in his list of 'trans. verbs rarely § 293) gives it in his list of 'trans. verbs rarely used intransitively,' is often found in AV. Thus Ps 34<sup>10</sup> 'The young lions do lack, and suffer hunger'; 1 Co 12<sup>24</sup> 'having given more abundant honour to that part which lacked.' Cf. Pr. Bk. 1552 (Com.), 'there lacketh nothing but the guests to sit down'; and Hall, *Works*, ii. 51, 'Either will or ability lacked in them.'

Earle (Pailler of 1539, p. 267) points out that, in place of 'lack 'of previous versions, AV often has 'want.' He quotes Ps 231 'therefore can I lack nothing' in 1539, 'I shall not want' in 1611; Jg 1810, Lk 1614. And he explains that the word 'lack 'had in the meantime suffered depreciation from the use of it as a common interpellation by stall keepers to passers-by : What d'ye lack, what d'ye lack ? To Earle's examples add Ja 14 Tind. 'lacking nothing,' AV 'wanting nothing'; and for the subst., 'for lacke of knowlage' in the Camb. MS of Ridley's Brefe Declaration, reprinted by Moule (p. 26), changed in the Oxford and 'modernized' MS into 'want. I HASTINGS J. HASTINGS.

LAD.-In OT the only word trd 'lad' is na'ar (33 times), and in NT  $\pi a i d a \mu \sigma$  (once, Jn 6<sup>9</sup>). Like na'ar in Heb., 'lad' has always been used colloquially in Eng. for 'servant.' Once RV changes 'lad' into 'servant,' 2 K 4<sup>19</sup> 'And he said to a lad (yyn, RV 'his servant'), Carry him to his mother.' Tindale uses the word of Joshua, Ex 3311 'And when Moses turned agayne in to the hoste, the ladd Josua his serva inte the sonne of Nun departed not out of the tabernacle' (AV 'his servant [RV 'minister'] Joshua the son of Nun, a young man'). Once the Rhem. version translates  $\pi a \hat{s}$  by 'lad,' Mt 17<sup>18</sup> 'the ladde was cured from that houre' (AV and all previous versions 'child,' RV 'boy'). J. HASTINGS

LADAN (<sup>γψ</sup><sub>2</sub>). — 1. A name occurring in the genealogy of Joshua, 1 Ch 7<sup>36</sup> (Λαδδάν). 2. A Gershonite family name, 1 Ch 23<sup>7.8.9</sup> (B 'Eδάν, A Λεαδάν) 26<sup>31 ter</sup> (B Χαδάν, Λαδάν<sup>bis</sup>, Α Λεδάν<sup>bis</sup>, Λααδάν). In 6<sup>17</sup> it appears as LIBNI (wh. see).

**LADDER**  $(b^{lp}, \kappa \lambda i \mu a \xi)$ .—1. Jacob in his dream at Bethel saw a 'ladder' set up on the earth and reaching to heaven (Gn 28<sup>12</sup>). The Heb. word reaching to neaven (Gn 23<sup>\*\*</sup>). The Heb. word occurs only here, and though LXX renders it by  $\kappa\lambda\mu\alpha\beta$  it has been doubted whether 'ladder' con-veys its exact meaning.\* The heights near Bethel

\* Henderson (*Expos. Times*, Jan. 1893, p. 151 f.) contends that Jacob's 'ladder' was really a temple-tower similar to the Babylonian *E-Sagila*.

# LADDER OF TYRE

are said to present the appearance of steps from certain points of view, and it has been conjectured that in Jacob's dream the piled-up rocks around him were transformed into a vast stairway on which angels went and came (Dillm. and others note that the angels are conceived as wingless. See ANGEL, vol. i. p. 94<sup>a</sup>). The visionary 'ladder' was a symbol to Jacob of the communication with God which was open to him, and Christ alluded to it in claiming that this communication between heaven and earth would be perfected in Himself (Jn 1<sup>51</sup>). See Bush, Notes on Genesis; Dods, Genesis, in loc. 2. In 1 Mac 5<sup>20</sup> ladders are mentioned among the preparations for the siege of Dathema. The use of scaling ladders for attacking fortified walls was general in ancient warfare. Such ladders are represented on Egyptian and Assyrian monuments, as well as on later classical remains. See Wilkinson, Well as on later classical remains. 505 rranser, Ancient Egyptians, i. 243; Erman, Ancient Egypt, 533; Layard, Nineveh, ii. 372; Rüstow u. Köchly, Geschichte des Griechischen Kriegswesens, 205, 320; Rich, Rom. and Gr. Antiquities, s.v. 'Scalee.' JAMES PATRICK.

JAMES PATRICK. LADDER OF TYRE (dxð rīj; ĸλίμακος Τόρου; Vulg. a terminis Tyri; Syr. 'from the borders of Tyre,' 1 Mac 11<sup>40</sup>; Talm. דאר אסיסט; 'κλίματος in Alex. 64, 93 ist vielleicht vorwitzige \* Aende-rung des unverstandenen Ausdrucks,' Grimm, Handbuch zu den Apokryphen, loc. cit.).—This was evidently a prominent landmark ; it is given as the northern limit of the territory to the captaincy of which Antiochus VI. promoted Simon Maccabeus (1 Mac 11<sup>40</sup>; 104, Ant., XIII, V. 4). In describing (1 Mac 1159; Jos. Ant. XIII. v. 4). In describing the situation of Acre, Josephus mentions it again, as a monntain lying about 100 stadia to the north (BJ 11. x. 2). The mountains stand round the plain of Acre almost in the form of a semi-circle, terminating S.W. and N.W. in the bold promontories of Carmel and Rds en-Nakurah, which drop precipitously on the shore. Between the base of Carmel and the beach there is a strip of land, leaving room for a highway, which affords free communication between the plain of Acre and that of Sharon. The cliffs of *Ras en-Nakúrah*, on the contrary, plunge straight into the waves, and the journey northward is made with difficulty over the height. This has led many to identify Ras en-Nakurah with the 'Ladder' to be scaled before the land of the Tyrians could be approached. But when this obstacle is surmounted, a not less formidable barrier is interposed between the traveller and Tyre by Ras el-Abyad, 'the white promon-tory,' Pliny's Promontorium album, at a few miles' distance, on the northern edge of a pleasant vale. The cliffs of this headland 'of white indurated marl interlaced with seams of dark-coloured flint, fall from a great height, sheer into the sea. Along the face of the precipice a pathway has been cut, to be traversed not without danger; the crags rising steeply from the edge on one hand, and on the other a perpendicular descent, the waves booming among the rocks and caves 200 ft. below. The ascent to this path is cut after the manner of a staircase. This perhaps, has led some to identify the Ladder of Tyre with *Ras el-Abyad*. But the same was true of *Ras en-Nakúrah* before certain recent alterations (*PEF Mem.* i. 192). Asher hazards the conjecture that Benjamin of Tadde this beck way way for (iii 775) Tudela intended this place by manner (vol. ii. p. 75).

A study of the locality together with the statement of Josephus (BJ II. x. 2) has convinced the present writer that the name Ladder of Tyre was not applied to either of these promontories alone. Speaking in succession of the mountains of Galilee and Carmel, Josephus says that which the natives call the Ladder of the Tyrians 'is the highest of all.' Ras en-Nafúrah, which is only 223 ft. high,

\* Suggested perhaps by opier which follows. VOL. 111.-2

.

does not answer the description ; neither does Ras el-Abyad, which, in addition, is not visible from Acre. It could apply only to the lofty ridge N. of the plain, measuring some 8 miles across, and rising to a height of over 1000 ft., which, as it sinks seaward, throws off three distinct headlands, terminating abruptly on the shore: Ras el-Mu-sheirifeh, Kas en-Nakurah, and Ras el-Abyad. The two former, being close together, are often spoken of as one under the name of the second. These western spurs, barring the approach to the Phœni-cian plain, doubtless suggested the name, 'Ladder of the Tyrians,' applied to the whole mountain.

LITELTUE. -Robinson, Later Researches, 66, 89; Stanley, Sinai and Pal. 264, 266, 269; Thomson, Land and Book, ii. 240, 268, 265; Neubauer, Géog. du Tains. 39; PEF Mem. i. 143, 192; Maundrell, Early Travels in Palestine (Bohn); Baedeker, Pal. and Syr.<sup>3</sup> 271. W. EWING.

LADE.-The mod. form 'load' occurs in AV LADE.—Ine mod. form 'load' occurs in AV 1611 twice, Is 461 'your carriages were heavie loaden,' and Ps 68<sup>19</sup> 'Blessed be the Lord, who daily loadeth us with benefits.' Elsewhere the form is 'lade,' which is now used only of ships. T. Fuller, *Holy and Profane State*, p. 359, says, 'The ship may have Castor and Pollux for the badge, yet not with standing have S Beau for the lading.' yet notwithstanding have S. Paul for the lading. J. HASTINGS.

LADY .- This word occurs six times in AV, translating three different words. (1)  $r_{3,4}$  gebhereth, which means 'mistress' and is so translated every-where else (viz. Gn 16<sup>4, 6, 9</sup>, 2 K 5<sup>3</sup>, Ps 123<sup>2</sup>, Pr 30<sup>28</sup>, Is 24<sup>3</sup>), is translated 'lady' in Is 47<sup>5, 7</sup>, a tr<sup>n</sup> which has come down from Wyclif. RV retains 'lady<sub>1</sub>'

has come down from Wyclif. RV retains 'lady,' but Amer. RV prefers 'mistress.' (2)  $\pi \psi$  sarah, the name of Abraham's wife, signifies 'princess,' which is its tr. in 1 K 11<sup>2</sup> and La 1<sup>1</sup> in AV and RV. But in Jg 5<sup>20</sup>, Est 1<sup>18</sup> AV gives 'lady,' which RV changes to 'princess' in the second passage; the same change should have been made in the first also. In Is 49<sup>20</sup> both have 'queen,' with AVm 'princess.' (3) In NT supla, which occurs only 2 Jn<sup>1.5</sup>, is translated 'lady,' a tr<sup>a</sup> which again comes from Wyclif. In this case the tr<sup>a</sup> is much disputed, some taking the word as a proper name. See art.

JOHN, EPISTLES OF, vol. ii. p. 740 f.

As in the sense of master 'lord' has nearly passed out of use, except in its application to Christ, so 'lady' in the sense of mistress is rapidly passing away, except in reference to the Virgin Mary." The Dousy version of La 11 was originally 'How doth the citie ful of people sit solitarie: how is the ladie of the Gentils become as a widow?' But the modern editions have 'mistress' for 'hadie.' Cf. Gn 164 Wyc. 'And Agar seigh that ache hadde conseyved, and sche displicide hir ladi'; and Is 477 Cov. 'and thou thoughtest thus, I shalbe lady for ever.'

#### J. HASTINGS.

LAEL (לאל), BA Δαήλ, Luc. Δαουήλ; O.L. [Lyone MS] Dael; - apparently an error extending through all known copies of the LXX, and earlier than the O.L.).—A Gershonite Levite, Nu 3<sup>24</sup>. The name means 'belonging to God,'and is interesting as being almost the only example in OT of such a formation (preposition + divine name). The idea expressed y it 'appears to rest on a reflection which must have been foreign to the highest antiquity' (Nöldeke, WZKM, 1892, p. 314, quoted in Gray, Heb. Proper Names, p. 207; cf. also Wellhausen, Reste<sup>3</sup>, p. 7). The nearest Semitic parallel to it adduced by Nöldeke is the Palmyrene **start**, 'belonging to J. A. SELBIE. the sun."

LAHAD (أربة).---A Judahite family name, 1 Ch 4<sup>2</sup> (Β Λαάθ, Α Λάδ).

#### LAHAI-ROI.—See BEER-LAHAI-ROI.

\* In the 'glosses' as they were called, i.e. marginal notes, to the fragment of NT printed by Tindale in 1525, there occurs at Mt  $1^{33}$  'it followeth not that Joseph knew our lady alterward.' In the notes to the NT of 1538, 'Mary' is substituted for 'our lady.'

#### LAHMAM

LAHMAN (app), perh. textual error for app), which is adopted by RVm Lahmas, following LXX Maxes and Luc. Aaµµds).—A town of Judah, noticed with others near the foot of the hills, Jos 15<sup>40</sup>. There is a ruin called *el-Lahm*, near Beit Jibrin, which is a possible site (cf. Tobler, *Dritte Wanderung*, 129; *SWP* vol. iii. sheet xx.). C. R. CONDER.

LAHMI. — The name given in our copies of Chronicles to a certain Philistine giant. The statement is: 'And smote Elhanan . . . Lahmi the brother of Goliath the Gittite' (1 Ch 20<sup>5</sup>). But the parallel statement is : 'And smote Elhanan But the parallel statement is : 'And smote Elhanan . the Bethlehemite Goliath the Gittite' (2 S  $21^{19}$ ). Any one who will compare these, as written in Hebrew characters, will find reason to think that one is a copy of the other, and that one copyist or the other misread his copy. Probably the reading in Sanuel is correct, and the word Lahmi (25,270) is properly a part of the word Bethlehemite (25,270, 'a), the giant in question being a relative and namesake of the Goliath whom David slew (but see art. DAVID, vol. i. p. 562<sup>b</sup>, and cf. Driver, *Text of Sam.* p. 272). W. J. BEECHER. LAISH (25,270).—4. The original name of the town

LAISH (2<sup>1/2</sup>).—1. The original name of the town of Dan (wh. see), Jg 18<sup>7, 14, 27, 29</sup>. The variation Leshem (wh. see) occurs in Jos 19<sup>47, 54</sup>. 2. The father of Palti or Paltiel, to whom Michal, David's wife, was given by Saul, 1 S 25<sup>44</sup>, 2 S 3<sup>15</sup>.

**LAISHAH**  $(\pi\psi_{1}^{1/2})$ , Is 10<sup>30</sup>.—The name of a place connected with Gallim, and mentioned here along with other localities in Benjamin and Judah. If Gallim be *Beit Jåla* near Bethlehem, Laishah would also be in that neighbourhood.

LAKE .-- The inland waters which may be classed under the term lakes are of two kinds-open and closed. Open lakes, in which the water is fresh, have an outlet in the form of a river or stream by which the unevaporated waters escape; while, in the case of closed lakes having no outlet, the water they receive from streams or springs is evaporated as fast as it enters, and as a general result the water of such lakes is salt or brackish. Of both of these varieties we have examples in the cases of the three principal lakes of Palestine; those of Huleh (Merom), Galilee (Tiberias), and the Dead Sea. In the case of the first two, the waters of the Jordan descending from their sources in the Lebanon, augmented by many other streams flowing in from the east and west, enter from the north and pass out from the south; finally entering at the northern end of the Dead Sea, they pass off into the air by evaporation, there being no outlet from this great reservoir (see MEROM, WATERS OF ; GALILEE, L. OF ; DEAD SEA). These lakes being each described under their own names. only a few points by which they are connected with each other need be noticed here.

(1) The physical origin of the Jordanic lakes.—As the great line of fault and dislocation of the strata known as 'the Jordan-Arabah fault' is now recognized as the primary cause of the valley, or line of depression, of that name, it may be inferred that the existence of the lakes is due to unequal subsidence in the primeval floor of this line of valley; the lake basins representing portions where the depression of the original bed was greater than the intervening portions now occupied by the river Jordan.\* In addition to this cause, which may be called *mechanical*, it is not improbable

\* It should be recollected, however, that these supposed local depressions occurred not from a nearly horizontal floor, but from one inclined from north to south; in other words, from the sources of the Lebanon to the original floor of the Dead Sea —a slope of over 2000 feet in a distance of about 150 miles.

#### LAMB

that volcanic action during the Miocene and Plicence periods may have played an important part in the formation of these great hollows. The evidences of volcanic action all along the eastern side, and, to a limited extent, along the western side, of the Jordan valley are shown in the vast sheets of lava of the Jaulan, Gilead, and Moab; and it seems a fair inference that the withdrawal of such enormous quantities of matter from the underground magma, and its extravavalley similar to those known to exist in other volcanic regions, such as Auvergne in Central France and the countries bordering the Mediterranean.

(2) Relative levels .- The surface of the Lake of Haleh is 7 feet below that of the Mediterranean, and its depth slight; that of the Sea of Galilee 682 feet below the same level; and that of the Dead Sea 1292 feet: thus the fall between the L. of Huleh and that of Galilee is 675 feet in a distance of 10 miles, being about 67 feet per mile, that between the L. of Galilee and the Dead Sea 610 feet in a distance of 65 miles, being at the rate of nearly 94 feet per mile ; the Jordan is therefore, at least in its upper section, a rapid stream. The above distances are measured in a direct line.

Besides these three most important lakes, we may mention

(a) L. Phiala (Birket er-Râm), lying at the southern foot of Hermon, a lake, circular in form and about half a mile in diameter, which occupies the crater of an extinct volcano; one of the great group of Trachonitis.\*

(b) Birket el-Jish.—Another small lake of vol-canic origin, occupying the crater of a truncated cone called Jebel Jish, not far from Safed, on the western side of the Jordan valley.

(c) The Damascus Lakes.—These shallow sheets of water, which in summer are converted into swamps, are fed by the Abana (Nahr Barada) and Pharpar (Nahr Taura) 'rivers of Damascus' (2 K 5<sup>12</sup>). These streams, issuing from the ravines in the Lebrane by where survey they are fed in the Lebanon, by whose springs they are fed, pour their life giving waters over a tract of the Syrian Desert in which the city of Damascus is situated; and, assisted by an ancient system of canals and conduits, spread fertility over an area of several hundred square miles, converting it into a garden remarkable both for the richness and the variety of the vegetation, which has been a theme of admiration for all travellers. The Abana traverses the city itself, and its waters are distributed by seven canals and conduits (see DAMAS-CUS). Looking at the beneficent effects of the waters of these rivers on the soil of Syria, Naaman seems to have been fully justified from his point of view in exclaiming, 'Are not Abana and Pharpar, rivers of Damascus, better than all the waters of Israel?' E. HULL.

LAKKUM (σρ), Β Δωδάμ, Α άκρου, Luc. Λακούμ). -A town of Naphtali, Jos 19<sup>33</sup>. It is mentioned in the Onomasticon as Aarovy, but the site has not been recovered.

#### LAMA.—See Eli, Eli, Lama Sabachthani.

LAMB is used to render various Hebrew terms, of which the most frequent are the following: 1.  $z_z$  kebes, LXX  $d\mu\nu\delta_s$ , with its feminines kibrāk and kabsāh,  $d\mu\nu\delta_s$ , EV 'ewe lamb,' whence by metathesis the less common forms  $z_z$  keseb and אָקָדָ kisbāh. Kebes is said to occur 87 times in

\* Described by S. Merrill (East of the Jordan, 14 (1881)), Tristram (Land of Israel, 589, 2nd ed.).

#### LAMB

Ex, Lv, and Nu (all in passages belonging to P) in connexion with the ritual of the various sacrifices. It most nearly corresponds to our 'lamb,' being very frequently employed with the qualification 'of the first year'  $(\pi, \psi, \gamma)$  lit. 'son of a year'). In a number of passages the Revisers have sought to

bring out more clearly the distinction between the mase. and the fem. forms by rendering kebes more uniformly 'he lamb' (as opp. to kibsāh 'ewe-lamb,' Nu 6<sup>14</sup> etc.), see Nu 7<sup>176.</sup> 28<sup>267.</sup> 29<sup>267.</sup> Lv 1413. 21

2.  $\pi r$  sch, which strictly denotes 'a head of small cattle '( $\eta x$ ), i.e. a sheep or a goat, and therefore lacks the precision of *kebes* (cf. Ex 12<sup>6</sup> ' Your [Passover] lamb (جة) shall be without blemish, a male of the first year, ye shall take it from the sheep  $(n \forall 77)$ or from the goats'). In a few passages our EV have 'sheep' where, as in Ex 12° just quoted, the context points to 'lamb' as the more appropriate rendering, so e.g. Lv 22".

3. cr, perhaps a he-lamb at a stage intermediate between the kebes and the 'ayil ס (אָיָל) or ran:  $K\bar{\sigma}rim$  are mentioned as delicacies Dt 32<sup>14</sup>, Am 6<sup>4</sup>, as covered spoil 1 S 15<sup>9</sup>, and as tribute Is 16<sup>1</sup>, 2 K 3<sup>4</sup> (Mesha's to the king of Israel; cf.

RVm and Comm. in loc.). In three passages of the Greek translation the obscure word my p kieftah is wrongly translated 'lamba' (see art. KESITAH).

'lambs' (see art. KESITAH). We have seen how frequently lambs are men-tioned in connexion with the sacrifices of the Priests' Code. Of these may be singled out the daily morning and evening sacrifice—the  $\tau \Rightarrow t \bar{c}mtd$ of later Judaism; cf. Dn 8<sup>116</sup>. and Mishna passim— at each of which 'a male of the first year, without spot,' was offered (Ex 29<sup>307</sup>, Nu 28<sup>367</sup>); the Sabbath *timid*, when the number of lambs was doubled  $(Nn 929^{21})$ . the sacrifices at the oreat fastivals such (Nn 28<sup>9L</sup>); the sacrifices at the great festivals such (Nu 29<sup>-27</sup>); the sacriness at the great restruits such as Pentecost, when nine lambs in all were offered, and Booths, when the daily number rose to fourteen (Nu 29<sup>127</sup>, but seven only on the eighth day,  $v_{-}^{33}$ ). To a different category belong the mother's effective of a lamb after bildbirth (Ju 19<sup>30</sup>) and the offering of a lamb after childbirth (Lv 12), and the leper's of 'two he-lambs and one ewe-lamb of the first year' (Lv 14<sup>106</sup>.). For the special case of the Passover lamb, see art. PASSOVER.

The flesh of the lamb was naturally esteemed a delicacy among the Hebrews as elsewhere (Dt 32<sup>14</sup>, Am 6<sup>4</sup>; also 2 S 12<sup>9</sup>, Nathan's parable of the ewelamb). It was forbidden, however, to kill a lamb till it was a week old (Ex 22°, Lv 22"), and even then the dam and her offspring must not be killed

on the same day (Lv 22<sup>28</sup>). It was inevitable that so familiar and characteristic a creature as the lamb should supply Hebrew writers with a variety of figures. Thus the gambolling of lambs in the spring-time suggests itself to the author of the Book of Wisdom as a suitable figure for the exuberant and praiseful joy of the Hebrews on the occasion of the exodus from Egypt (Wis 19"; cf. a similar figure in Mal 4" [Heb. 3"]). In Hebrew, as in other literatures, the lamb is the symbol of innocence and gentleness, as opposed to cunning and ferocity. What fellowopposed to cunning and ferocity. 'What fellow-ship,' asks ben-Sira, 'hath the wolf with the lamb?' (Sir 13<sup>17</sup>; cf. Horace, *Epod.* iv. 1): yet one of the most striking features of the Messianic age is the cessation of this hereditary antipathy, when 'the wolf shall dwell with the lamb' (Is 11<sup>6</sup>; cf.  $65^{29}$ ). The lambs are the special object of the Messiah's care (Is  $40^{11}$   $^{\circ}x_{27}^{\circ}$ ) telü'im, doras). In the spirit of this prophecy we find that 'feed my lambs' (ra dovia µou) was part of the Master's threefold charge to Peter (Jn 21<sup>15</sup>).

The lamb as the synonym of guileless innocence and gentleness, further, is appropriated by Jere-miah, who, all unsuspicious of the wiles of his enemies, describes himself as 'a gentle lamb'

(Jer 11<sup>19</sup> RV), a figure repeated in the familiar portrait of the suffering Servant of J", who is also portrayed 'as a lamb that is led to the slaughter' (Is 53' RV).\* The influence of the latter passage in shaping the Messianic Hope of Judaism cannot be over estimated. Thus it is generally admitted that it, above all, was in the Baptist's mind when he pointed to our Lord with the words, 'Behold the Lamb of God + ( $\delta$  durds  $\tau o \hat{v} \theta e o \hat{v}$ ) which taketh away the sin of the world' (Jn 1<sup>20, 26</sup>; cf. Ac 8<sup>32</sup>). It is not impossible, however, that there may also be included a reference to the lamb of the daily sacrifice and even to the lamb of the approaching Passover (see Westcott, *in loc.*), since the writer of the Fourth Gospel beyond a doubt declares the Saviour upon the cross to be the true Paschal Lamb (see esp. Jn 19<sup>26</sup>; cf. for St. Paul 1 Co 5<sup>7</sup>). This expiatory aspect of our Saviour's death is also emphasized by St. Peter in his application to Christ of the technical attributes of the sacrificial victim, 'a lamb without blemish and without spot' (1 P a family without bientish and without epoc
 i<sup>19</sup>; cf. Ritschl, Die christl. Lehre v. d. Rechtfer-tigung<sup>3</sup>, 1882, ii. 176, 177).
 There remains the off-recurring (twenty-seven

times) symbol of the Book of Revelation, in which our Lord is figured as the 'Lamb' (note deriver tact-even though the terms used are not identical -between the Apocalypse and the Fourth Gospel -between the Apocalypse and the Fourth Gospel (see the latest commentary, Bousset, *Die Offen-barung Johannis*, 1896, p. 208), and in so far supports the opinion of those who seek the source of the apocalyptic symbol in the Paschal Lamb rather than in Is 53' (for the whole question see the commentaries and works on NT theology). The lamb in early Christian symbolism is beyond the limits of a Dictionary of the Bible (see art. LAMB in Smith's *Dict. of Christian Antiquities*). A. R. S. KENNEDY. A. R. S. KENNEDY.

#### LAME, LAMENESS .- See MEDICINE.

**LAMECH** ( $\eta \gamma \rangle$ ,  $\Lambda 4\mu \epsilon \chi$ ).; -1. A descendant of Cain, Gn 4<sup>1867</sup>. (J). He is said to have married two wives, Adah and Zillah (v.<sup>19</sup> the first mention of polygamy in the Bible), the former of whom became the mother of Jabal and Jubal, the latter of Tubal-cain (v.<sup>3017</sup>). Legend ascribed to Lamech the following somewhat enigmatical utterance, which has been preserved by J in poetical form :--

'Adah and Zillab, hear my voice; Ye wives of Lamech, hearken unto my speech; For I slay (have slain?) a man for wounding me, And a young man for bruising me. If Cain shall be avenged seventoid, Truly Lamech shall be avenged seventy and sevenfold.'

The above is frequently called 'the sword-lay,' being supposed to be a glorification by Lamech of the weapons forged by his son Tubal-cain, by the aid of which he can defy his enemies and defend himself, instead of having to look, like Cain, to God for protection. This is the generally accepted interpretation of modern scholars (those who are curious to make acquaintance with Jewish and

\* The terms are different, however, in the original : by in Jer 1119, ny in Is 537.

For 12, by in 18 55<sup>2</sup>.
f Of also the pseudepigraphic work, The Testaments of the Twolve Patriarohs: 'Honour Judah and Levi, for from them shall arige for you the lamb of God (δ έμως του θων), saving all nations by grace' (Test. Josephi 19).
j Dillm. and Holsinger agree (against Budde) that the name

; Dillm. and Holsinger agree (against Budde) that the trainer TD' is unintelligible from Hebrew, but that Arabic may give the meaning juvenis robustus. Ball ('Genesis,' in SBOT), following Hommel (*PSBA*, March 1898), considers Lamech 'to be an easy adaptation of Bab. Lamya, "the Servant" (of Merodach), another title of Sin, synonymous with Ubara in the name Ubara-tutu, "vassal of Merodach," the 'Uraipru' (or rather 'Iraipru') of Beroaus, and father of  $\mathbb{E}_{insterio}$ , the hero of the Flood, who corresponds to the Hebrew Noah."

LAMED

patristic fancies may refer to Smith's DB, s. 'Lamech'), and there can be little doubt that it is mainly correct. Wellhausen (Composition d. Hex. 305), it is true, thinks it is precarious to explain the lay from its present context, with which it may have a purely accidental connexion. That is to say, he sees no necessity for connecting Lamech's language with Tubal cain's invention, but would recognize in it only a piece of characteristic Oriental bravado (the calling in of the wives is characteristic too, parallels being found amongst the Arabs) uttered by one clan (or chieftain) against another. Holzinger substantially accepts Wellhausen's explanation.

**2.** A descendant of Seth and father of Noah, Gn  $5^{261.29.30L}$  (P), 1 Ch 1<sup>3</sup>. From the coincidence of the names *Launech* and *Enoch* in the Cainite genealogy of J.(Gn 4) and the Sethite genealogy of P (ch. 5), as well as the very close resemblance between a number of other names in the two lists, it is generally held that we have before us two recensions of one and the same list, the object of the one being to trace the descent of the human race to an ancestor called Cain, the other to one called Seth. Delitzsch, while opposing this, agrees with Wellhausen, that, together with the genealogy  $4^{16-22}$  terminating in Lamech and his three sons, the result of the set of the s there was in the Jahwistic document another genealogy which started from Adam and termin-ated in Noah and his three sons, and that this has been displaced by the genealogy of P (ch. 5). Wellh. finds the conclusion of J's narrative in  $5^{29}$ , its opening perhaps in 425.

J. A. SELBIE.

**LAMED** (5).—The twelfth letter of the Hebrew alphabet, and as such employed in the 119th Psalm to designate the 12th part, each verse of which begins with this letter. In this Dictionary it is transliterated by I.

# LAMENTATION .- See MOURNING.

LAMENTATIONS, BOOK OF-consists of five poems, whose subject is the sufferings of Judah and Jerusalem during the siege and subsequent to the capture of the city by the Chaldmans (B.C. 586). The description of the woes of the people is interspersed with confessions of sin, exhortations to repentance, and supplications for a return of the divine favour.

I. NAME AND PLACE IN THE CANON.—In Hebrew Bibles the title of the book, taken from its opening word, is 'Ekhah (איכה = How !). Another name, which occurs in the Massoretic subscription and in the Talmud and Rabbinical literature, is Kinith (huyp), to which correspond the  $\theta p \hat{p} p \alpha$  of the Sept. and the *Threni*, *Lamentationes*, *Lamenta* of Jerome and the Fathers. In the Heb. Canon (according to German MSS) the book is placed among the Këthúbhím or Hagiographa, and forms one of the five Megillôth or Rolls (Canticles, Ruth, Lamentations, Ecclesiastes, Esther). These were read in the Synagogue service on stated occasions every year, Lamentations on the 9th of Ab, the anniversary of the destruction of the temple. In the Sept. as in the Eng. Bible, Lamentations im-mediately follows Jeremiah. That this was not the position in which the Sept. translators found it, is held by some to be proved by the circumstance, Is lied by some with the proven by the thermomenus, noted by Nöldeke, that the tr<sup>a</sup> of the two books is not from the same hand, Jer being a compara-tively free rendering of the original, while Lamentations is rigorously literal and marked by numerous Hebraisms. When the latter book attained to its

#### LAMENTATIONS

present position in the Alex. Canon, it came to be regarded more and more as an appendage to its predecessor, until Jeremiah-Lamentations could be reckoned a single book like Judges-Ruth. This reckoned a single book like Judges-Ruth. This result was reached all the more readily in some quarters owing to a fancy for reckoning the canonical books of the OT as twenty-two, the number of letters in the Heb. alphabet. (See Ryle, Canon of the OT, 219 f., and Wildeboer, Enstehung des AT Kanons, 76 f.).

II. STRUCTURE OF THE BOOK .- The first four 11. STRUCTURE OF THE BOOK.—Ine next four chapters are acrostic poems, of which the first, the second, and the fourth contain each 22 verses which open with the Heb. letters in succession. Ch. 3 contains 66 verses, and each letter is re-peated thrice, having three successive verses assigned to it. Ch. 5 is not acrostic, but contains 22 verses. In chs. 1 and 2 the verses consist of three members, in 4 of only two, while in 3 each verse has but a single member. It is the division of these members, however, which char-acterizes the four poems we are discussing. The Kinat or elegy is marked by a peculiar rhythm which differentiates it from ordinary Hebrew poetry. De Wette, Keil, Ewald, and others helped to elucidate the nature and laws of the elegiac measure, but to Budde belongs the merit of having thoroughly investigated and explained the sub-ject. His conclusions are set forth mainly in an essay in the ZATW (1882, pp. 1-52); but the Eng. reader will find all that is essential in an interesting article contributed by the same author to the New World (March 1893), under the title 'The Folk-Song of Israel in the mouth of the Prophets.

The characteristic features of the elegiac measure are that each verse-member (there may be one or more members in a verse) is divided by a casura into two unequal parts, of which the second is the shorter (the proportion is generally 3:2), and that this second part, instead of balancing and re-inforcing the first, as is usual in the Heb. poetry, is frequently an imperfect echo of it, or not parallel in thought to it. (See Driver's  $LOT^{4}$ 458). Budde has proved that this was the strain affected by the 'mourning women' in their lamentations for the dead. In Jer 9<sup>17</sup>, where these are summoned to utter a dirge, the 'limp-ing verse,' as Budde calls it, is introduced with great effect (vv.<sup>16, 21, 21</sup>) alternately with the ordi-nary evenly-moving verse. There are numerous into two unequal parts, of which the second is the other instances of its occurrence in the OT, of which we may cite the magnificent passage Is  $14^{46-11}$ (ode on the king of Babylon), Ezk 19, and Am  $5^2$  (cf. Driver's note on this last passage). The prophets seem to have adopted this measure whenever they desired to make an unusually deep impression. It is obvious that all the associations connected with it rendered its employment in Lamentations specially suitable. 'The singer or singers em-ployed this versification because it afforded them ployed this versification because it afforded them the surest way of putting their listeners into a mood corresponding to their melancholy utter-ances. High and low, learned and unlearned, old and young, man and woman, all understood this melody, all felt themselves transported by it to the bier of their relatives or neighbours, and were carried 'away by it to bewail their people, their city, themselves' (Budde). The plaintive melan-choly cadence can be fully appreciated only in the enricing. Hadrow, but its affect can be approxicontry can be rully appreciated only in the original Hebrew, but its effect can be approximately reproduced even in English. Take as an example  $1^{b}$ ---

'Her adversaries are become the head, Her enemies prosper; For the Lord hath afflicted her For the multitude of her transgressions: Her young children are gone into captivity Before the adversary.'

Digitized by Google

. 3434.0 .

(It is greatly to be regretted that this peculiar rhythm is not exhibited in the RV, although in Kautzsch's AT it is reproduced very effectively in German by Baethgen).

The text of Lamentations is in some instances corrupt, and it is not easy to bring every verse under Budde's scheme. Still, not a little success has been achieved by this critic and others in restoring the original text of the *Kinah*. See, further, art. POETRY.

From all this it is evident that in poems such as those that make up Lamentations we have no simple spontaneous outburst of grief, but the result of conscious effort and of not a little technical skill. While ch. 5 is not in the Kinak measure (it is only accidentally that  $vv.^{3.3.11}$ conform to it), something of the same effect is produced by the assonances (u, nu, anu, enu, inu, unu), which recur 44 times (Reuss), and to which there is no parallel in the OT except in Ps 124.

III. ANALYSIS OF THE CONTENTS.—Each of the five poems is complete in itself, and forms a wellrounded whole, independent alike of its pre-decessor and its successor. This was admitted even by Eichhorn, who ascribed all the five to Jeremiah, but held that they were composed by the prophet at different times and when in dif-ferent mode. Attempts here indeed here mode ferent moods. Attempts have indeed been made to trace a progress either in the historical situation (de Wette), or in the thoughts (Ewald), from one chapter to another. The former failed completely to accomplish his self-imposed task, and the scheme of the latter can be carried through only by discovering in the Lamentations features that are absent and ignoring others that are present. Ewald certainly lays himself open to the sarcastic remark of Thenius, that upon such principles a connexion could be established between the most disparate elements in the world. Let any careful student judge whether it is correct to say with Ewald that chs. 1 and 2 contain the bitterest Ewald that this is and 2 contain the brockets and, as yet, hopeless complaints; that in ch. 3, which is the turning-point, the poet reaches comfort at least for himself; that in ch. 4 lamentation indeed recurs, but now the people break in with the language of prayer and hope; while in ch. 5 we have nothing but prayer, offered by the whole community, whose tone is sad indeed, yet com-posed and hopeful. No doubt Ewald exhibits here an attractive model from which the author or authors *might* have worked, but they have not done so. Nay, so far from there being any traceable connexion between the different poems, it is no easy matter sometimes to discover connecting links between the verses of the same poem. The truth is that the nature of the subject did not readily admit of logical development, and it may have been partly for this reason and as a mne-monic device that the acrostic scheme was adopted in the first four chapters (its absence in ch. 5 has never been satisfactorily explained). In chs. 2 and 4 the verses have the firmest, in 1 and 5 the loosest connexion. In the light of the foregoing remarks it will be understood that the following scheme of analysis, which is mainly Löhr's, is largely provisional.

Ch. 1 contains two divisions  $-(a) vv.^{1-11b}$  spoken by the poet (with the exception of <sup>90</sup>); (b) vv.^{1e-22} spoken by the city (with the exception of <sup>17</sup>). The ever-recurring themes are the abandonment of the city by her allies, the distress of her inhabitants, the pride of the enemy. In v.<sup>8</sup> there is already a confession that Jerusalem has been justly punished for her sins, and in <sup>90</sup> already a cry to God, which is repeated in <sup>11e</sup>. In vv.<sup>12-16</sup>, where the city is supposed to speak, we have an appeal to passers-by, to whom under a variety of

figures the misery of Zion is described. In v.<sup>17</sup> the poet suddenly speaks again in his own person, but in vv.<sup>18</sup>.<sup>19</sup> it is once more the city that appeals to all peoples, and in vv.<sup>30-23</sup> addresses a prayer to J'' to execute vergeance on the foes who had gloried in Jerusalen's misfortunes.

In ch. 2 the situation reminds us of Jer 14<sup>18-18</sup>. There are two main divisions—(a) vv.<sup>1-13</sup>. The daughter of Zion has been crushed down by the judgment of J", all her political glory has faded, her temple has been destroyed, the city and its inhabitants have suffered alike. The agonies of the siege, the despair of the citizens, the terrible scenes due to famine, are realistically depicted; (b) vv.<sup>13-23</sup>. The poet turns to the people with mingled warnings and consolation. The sin of Jerusalem, especially of her false prophets, and the scorn that has overtaken the latter, are held up to view; the nation is invited to turn to J" in supplication (vv.<sup>13, 19</sup>), and it responds in the prayer of vv.<sup>20-22</sup>.

Ch. 3 is the most important from a religious point of view, and is also constructed with the most art. It differs from the other chapters in being spoken in the 1st person singular, although we should perhaps understand the 'I' not of an individual, but of the people collectively, after the manner of Pss 31. 34. 35. 51, and many of the later psalms.\* The chapter may be arranged under three divisions. (a) Vv.<sup>1-10</sup> touchingly describe the utter desolation of the people, but at the mention of God in v.<sup>15</sup> a ray of hope darts into the soul of the speaker, who after the parenthetical passage (vv.<sup>16-21</sup>) passes on to fulfil in (b) a difactic function (vv.<sup>22-51</sup>). The inexhaustible compassion of God is insisted upon, the purposes of grace which He may have in His visitation are suggested, all tending to enforce the call to repentance. (c) In vv.<sup>52-54</sup> there is a return to the tone of complaint, which soon passes, however, into joyful confidence (vv.<sup>65-65</sup>) that God will hear and deliver, while vv.<sup>66-66</sup> breathe a prayer for vengeance on the nation's foes. (As to the interpretation of vv.<sup>667</sup> and the question of a *precative* perfect, see Ewald's Heb. Syntax, Kennedy's tr. p. 15; Driver's Heb. Tenses<sup>8</sup>, pp. 14, 25; Davidson's Heb. Syntax, p. 63). Ch. 4 closely resembles in structure ch. 3.

Ch. 4 closely resembles in structure ch. 3. There are two main divisions, the first of which falls into two subdivisions. (a) Vv.<sup>1-11</sup>, of which vv.<sup>1-6</sup> exactly balance vv.<sup>7-11</sup>. The jvy up of the one is parallel to the pvyu of the other; in both sections there is a description of the sufferings occasioned by famine, and a tracing of these to the anger of J" (v.<sup>13</sup>, which breaks the connexion, probably owes its origin simply to the necessities of the acrostic scheme). In (b) there are three subdivisions—(1) vv.<sup>13-16</sup> treat of the sin and the punishment of the priests and the prophets; (2) vv.<sup>17.20</sup> of the sin and the punishment of the king and his courtiers, who looked in vain to Egypt for help; (3) vv.<sup>21.21</sup> address a word of threatening to Edom and of comfort to Israel.

Ch. 5, like Ch. 1, is wanting in consecutive thought. It opens with a prayer that J" would look upon the reproach of His people, which is described from a variety of points of view  $(vv.^{2-10})$ . Zion's desolation suggests, by way of contrast, J"s abiding power, upon the ground of which the poet repeats his appeal for help  $(vv.^{30-20})$ . The last verse being considered one of ill omen, the Jews were accustomed in reading to repeat after it the preceding verse. For a similar reason the same usage was followed in

\* So Calov, Hupfeld, Reuss, Cheyne, Smend (see esp. ZATW, 1882, p. 62 ff.). On the other hand, Buddle (*Klagelieder*, 92 f.) contends for the individual sense of the 1, by which he supposes the author of the poem to have intended an eyewitness (most likely Jeremiah) of the destruction of Jerusalem.

LAMENTATIONS

connexion with the last verse of Isaiah, Malachi, and Ecclesiastes.

IV. AUTHORSHIP.—Both in Jewish and in Christian circles a tradition has long prevailed that the book was written by Jeremiah. We will examine—

(a) The External Evidence. — While the Heb. Bible is silent as to the authorship of Lamentations, it is otherwise with the Sept., where the book opens thus: scal eyéerce pærà rò alxµaλωτισθη̈ναι ròr lσρaħλ κal 'Iερουσaλħµ έρηµωθη̈ναι ἐκάθισεν 'Iερεµίas κλaίων κal ἐθρήνησεν τὸν θρῆνον τοῦrον ἐπὶ 'Ιερουσaλħµ κal εἰπεν ('And it came to pass, after Israel was led into captivity and Jerusalem laid waste, that Jeremiah sat weeping, and lamented with this lamentation over Jerusalem, and said'). It has been urged that these words, which sound like the rendering of a Heb. original, imply a notice to the above effect in the Heb. MS from which the Sept. translator worked. The Vulg. opens with words which reproduce in Lat. the above Gr. sentence, with the additional phrase et amaro animo suspirans et ejulans, and these words in italies imply, acc. to some, the existence of yet another Heb. original. In ch. 5, moreover, Vulg. has the heading Oratio Jeremiz prophetæ. The superscription of the book in Pesh. also supports the same tradition.

There are, however, two circumstances that greatly weaken the force of the above evidence. Firstly, the absence of any allusion to Jeremiah in the MT would be utterly inexplicable if such a notice as occurs in the Sept. had ever stood in the Hebrew. As every student knows, it was far more the tendency of copyists to add than to suppress. Secondly, the place of the book in the Heb. Canon, not attached to Jer, but included among the Këthúbhim, is hard to reconcile with its prophetic authorship. As Driver remarks, at least three centuries separated the Sept. from Jeremiah, and its notice quoted above may be merely an inference founded on the general resemblance of tone which the Lamentations exhibit to such passages as Jer 8<sup>16</sup>–9, 14–15, and on the reference assumed to be contained in 3<sup>14,43–46</sup> to incidents in the prophet's life (Jer 20<sup>7</sup> 38<sup>647</sup>). It was doubtless a similar feeling that gave rise to the extraordinary conflate reading  $\tau \phi \Delta \omega \delta$  Tepe- $\mu tov$ , which is the title in some MSS of Ps 137 (Cheyne). According to Löhr and Gerlach, the sal  $\delta \gamma \epsilon ro$ , etc., of the Sept. was written in order to connect Lamentations with the prophecies of Jeremiah, probably at the time when it was an object to reduce the number of books in the Canon to twenty-two. It need scarcely be added that the statements of the Fathers, the superscription in the Targum, and the citations from the Talmud, have no independent value as evidence in regard to the authorship.

There has been much discussion as to the meaning of 2 Ch  $35^{20}$  'And Jeremiah lamented for Josiah, and all the singing men and singing women spake of Josiah in their lamentations unto this day, and they made them an ordinance in Israel, and behold they are written in the lamentations.' The question is whether the words we have italicized refer to our book of Lamentations. If so, we should have a tradition as early as the days of the Chronicler (c. B.C. 250) in favour of Jeremiah's authorship of at least a portion of its contents. Thenius answers the above question in the negative, holding that the Kinith referred to were a collection of the burial of the kings of Judah. In this collection Jeremiah's lament for Josiah may easily have had a place, but our book never formed part of it. On the other hand, a great many of the leading OT scholars

#### LAMENTATIONS

of the day understand the Chronicler to refer to the canonical book of Lamentations. Löhr offers three reasons for this conclusion: (1) it is hard to believe that there were extant other lamentations by Jeremiah outside the Canon; (2) the Chronicler might readily have referred such passages as La 2<sup>6</sup> and 4<sup>20</sup> to Josiah; (3) an uncritical writer like the Chronicler might easily have committed a blunder into which Jos. (Ant. X. i. 5) probably and Jerome certainly fell. The words of the latter in commenting on Zec 12<sup>11</sup> are, 'super quo (Josia) lamentationes scripsits Jeremias, quæ leguntur in Ecclesia et scripsisse eum Paralipomenon testatur liber.' The same interpretation of the Chronicler's language is supported by Noldeke, Cornill, Wildeboet, W. R. Smith, and Budde.\* If it be correct, it gives us a testimony in favour of Jeremiah's connexion with Lamentations, dating from about the same period, and entitled to much the same consideration as the testimony of the Sept. which we have just examined. As the external evidence is manifestly insufficient to decide the question, we are thrown back upon—

(b) The Internal Evidence.—At the first glance this may seem to be in favour of Jereniah's authorship, which has been strongly maintained by Keil and others. The verdict of modern criticism, however, is given for the most part against the traditional view. The undoubted affinities of all the five chapters with Jer (see a list of similarities in Driver, LOT<sup>5</sup> 462d) are recognized by critics of all schools, but are explained on the ground that this prophet's works were the favourite study of the author or authors of Lamentations, who were in such sympathy with his spirit that the book might be entitled 'Lamentations of the sons of Jeremiah' (Cheyne).

There are several passages which militate against Jer.'s authorship. La 2° ('Her prophets find no vision from the LORD') might almost be pronounced decisive. In this same verse, moreover, put is used in a special sense which meets us for the first time in Ezk 12<sup>27</sup>. A number of other instances are cited by Cornill (*Einleit.*<sup>2</sup> 247) where the language shows such a dependence upon Ezekiel (who did not publish his prophecies before B.C. 570), that Jeremiah's authorship seems out of the question. La 4<sup>17</sup> does not sound like the language of Jeremiah, who never shared the loopes of those who looked for help to Egypt. La 4<sup>.0</sup> could hardly be spoken of Zedekiah by one who judged him as Jeremiah did. Chs. 1 and 5 imply an acquaintance with Deutero-Isaiah, while ch. 3 contains echoes of the later psalms and of Job (which probably dates at the earliest from the Exile). In his Job and Solomon, Cheyne adduces the following parallels with the latter book — La 3<sup>7.9</sup>=Job 19<sup>8</sup>, La 3<sup>8</sup>=Job 30<sup>20</sup>, La 3<sup>10</sup>=Job 10<sup>16</sup>, La 3<sup>12.13</sup>=Job 7<sup>20</sup> 16<sup>12.13</sup>, La 3<sup>14.62</sup>=Job 30<sup>90</sup>. The dependence of the elegies upon Job is more likely than the converse supposition.

A circumstance that may have some bearing on the question of authorship, is that the order of the letters y and p is different in chs. 2-4 from what it is in ch. 1. In the latter the normal order is followed, in the other three chapters p precedes y (a phenomenon which occurs also in the correct text of Ps 34 as well as in Pr 31 [according to the LXX], probably also in Ps 9 f., and, according to Bickell, in Nah 1; cf. Budde, *Klagelieder*, 70 f.). Even if we suppose, with Thenius, Ewald, Nägelsbach, and others, that at one time the order of the Heb. alphabet was not definitely fixed, it is

<sup>a</sup> Budde points out, however, that the Chronicler does not attribute all five poems to Jeremiah, but apparently only one of them, the other four being assigned to the 'singing men and singing women' (*Klagelieder*, p. 73).

#### LAMENTATIONS

hardly likely that one and the same author would have followed different orders in two successive poems. This would indicate, then, that at least ch. 1 is from a different hand from chs. 2-4.

In regard to the linguistic aspect of the question, it may be mentioned that Löhr (ZATW, 1894, Heft I; cf. Driver,  $LOT^{6}$  463) subjects the vocabulary of Jeremiah and of Lamentations to a comparison, the result of which is that while the words common to both are four times as numerous as those found only in Lamentations, yet the latter contains a great many words not found in Jeremiah. These words, moreover, are without exception important, while the common use of words like  $\forall x$  or |3, of course, proves nothing as to community of authorship (e.g.  $\forall$  for  $\forall x$ , which occurs in La  $2^{14.16}$  49 5<sup>15</sup>, is unknown to Jer). Many of the above considerations tell not only against Jeremiah's authorship but against—

Jeremiah's authorship but against— V. THE UNITY OF THE BOOK.—While there is comparative agreement amongst modern critics that Jeremiah is not the author, there has been much diversity of opinion as to the number of authors whose work is to be traced in the book. W. R. Smith argued strongly that the book is a unity (art. 'Lamentations' in *Encycl. Brit.*'), but the prevailing tendency at present is decidedly adverse to this opinion. It is pretty generally agreed that at least ch. 3 is by a different and later hand than the rest of the book. Budde formerly (*ZATW*, 1882) agreed with Stade, who is content to go this length, and who assigns 1. 2. 4. 5 to a single author. Thenius holds 2 and 4 to be Jeremiah's, while 1. 3. 5 are assigned each to a separate author. A considerable number of modern critics divide the book into three groups in the following chronological order (2 and 4) (1 and 5) (3). This, which was the scheme of Nöldeke, has gained the adherence of Löhr, Cornill, Wildeboer, and now (*Klagelieder*, 1898, pp. 74 ff.) substantially of Budde.\* Another arrangement of the book is that of Cheyne (*Jeremiak* in 'Men of the Bible' series), which also recognizes three groups (1. 2. 4) (3) (5). On this question criticism has not yet spoken the last word.

VI. PLACE AND DATE OF COMPOSITION.—Upon these two points there are differences of opinion even amongst those who support Jeremiah's anthorship of the book. The freshness of the pictures has often been adduced as an argument for an early date. It may be said, however, that while there is something that appeals to the imagination in the old picture of the faithful prophet sitting down to lament the fate of the city which had turned a deaf ear to his warnings, it is a psychological improbability that a man of Jeremiah's spirit should have turned out acrostic poems, and especially such a laboured work of art as ch. 3 amidst blackened ruins where the fire had hardly cooled, and in streets where the blood had hardly dried. Hence, even if the poems were his, we should have to think of a relatively late date for their composition, when the bitterness of the moment had given place to calm reflection. (With this tallies 5<sup>30</sup> 'so long time'). Thenius, who regarded 2 and 4 as genuine productions of Jeremiah, dated the one at about a. C. 581 (prior to the third deportation after the murder of Gedaliah), and the other at a later period, during the prophet's sojourn in Egypt. Löhr formerly fixed upon 550 as an approximate date for the completion of the book. This would

• Who assigns chs. 2 and 4 to an eye-witness (not Jeremiah) of the calamities they describe, dates chs. 1 and  $\delta$  (from different hands) about 530 (or later) and 550 respectively, while he fixes the date of ch. 3 much later, in the pre-Maccabean period in the 3rd cent. E.C.

allow sufficient time to account for the references to Ezekiel. In a later work (1893) Löhr is willing to come down as late as 530, but objects to a post-exilic date, because he holds that the Kinah measure, although found in Deutero-Isaiah, cannot be traced in any post-exilic work (not occur-ring in Hag, Zec, Mal, Jl, or Jon). Wildeboer inds nothing in the contents of the book to compel us to fix upon the close of the Exile as the terminus ad quem for the publication of Lamenta-tions. Some of the elegies might well have been composed in Babylon by an exile who did not share the sanguine expectations of Deutero-Isaiah, or even in Judæa by one who had returned with Zerubbabel in 536. Wildeboer thinks, however, that the latest possible date is 516, the year when the rebuilding of the temple was finished. But if the possibility of Lamentations being post-exilic is admitted, some plausibility must be conceded to Cheyne's suggestion (Founders of OT Criticism, 356) that as the church of the second temple soo) that as the church of the second temple composed its own psalms, it is far from impossible that it preferred to indite fresh elegies for use on the old fast-days. There were details enough in the historical books to enable a poet possessed of dramatic imagination to draw the pictures in Lamentations. The tone of the book, however, is inconsistent with the contention of Kring (ZATW inconsistent with the contention of Fries (ZATW 1893), that chs. 4 and 5 belong to so late a period as that of the Maccabees. This is conclusively proved by Löhr (ZATW, 1894), who exhibits the complete contrast between the Maccabean Psalms, where the people protest that they suffer in spite of their innocence, and the Bk. of Lamentations, which confesses throughout that the nation's suffering is due to the nation's sin.

suffering is due to the nation's sin. LITERATURE.—Driver, LOT<sup>6</sup> 456-465; Cornill, Einleit.<sup>2</sup> 244-243; W. R. Smith, OTJC<sup>2</sup> 181, 219, also art. 'Lamentations' in Encyc. Brit.\*, Wildeboer, Lü. d. AT, 298-303; Noldeke, AT Lit. 142ff.; artl. by Budde, Smend, Löhr, Fries in ZATW (1882-1890); Ryle, Canon of OT, 69, 115, 121, 219; Wildeboer, Entsteh. d. AT Kan. 9, 12, 17, 77, 131 ff.; Buhl, Canon and Text of OT, 20, 391. Of modern foreign commentaries may be mentioned those of Thenius, Keil, Ewald, Geriach, Reuss, Nägelsbach, Löhr (1891 and 1893, the latter in Nowack's Handtom. z. AT; both Löhr's works are exceedingly valuable, and there is an important review of the first by A. B. Davidson in Crit. Review, Jan. 1892; Minocoth, Le Lament. di Gerenia, 1897; Budde in Kurzer Hdoomm, 1898. Amonget Eng. commentaries are those of Payne Bmith (in Speaker's Conm.), Plumptre (in Ellicit's Comm. on OT). Cheyne (in Pulpit Comm.), cf. the same author's Jeremiah in 'Men of the Bible' series, and his Founders of OT Criticisn, 356 ff.; Streane (Camb. Bible for School), Adeney (in Expositor's Eible). See also Greenup, Targum on Lam., Comm. of Rabbi Tokia ber Elicser on Lam., Short Comm. on Lam., Tokia and Schen Elicser on Lam., Short Comm. on Lam.

**LAMP** ( $\eta \psi_{1}^{b}$ ,  $\eta$ ,  $\lambda \delta \chi vos$ ,  $\lambda a \mu \pi \delta s$ ).—The first of these words is tr<sup>4</sup> 'torch' in Nah 2<sup>4</sup> and Zec 12<sup>6</sup> (AV and RV); and in Gn 15<sup>17</sup>, Jg 7<sup>16</sup>, Job 41<sup>19</sup>, Ezk 1<sup>13</sup> the same tr<sup>a</sup> is adopted by RV in place of 'lamp' of AV. The other Heb. word, as well as the Gr.  $\lambda a \mu \pi \delta s$ , may mean torch likewise, but is more properly lamp, with oil and wick, as in the description of the golden candlestick (Ex 25<sup>21-57</sup>) of the tabernacle, and those made by Solomon for the temple (2 Ch 4<sup>30.21</sup>), which were kept burning all night (Ex 30<sup>7.8</sup>, Lv 24<sup>2</sup>).

The common lamps of Pal. were of terra-cotta, as we have abundant evidence from the numerous specimens found in all parts. Glass lamps of Egyp. or Phœn. make might have been known, and bronze lamps are not infrequently found. Very little is known of the lamps used in Egypt. Herod. (ii. 62) describes them as flat saucers tilled with a mixture of salt and oil, on the top of which floated the wick. The oldest form of lamp found in Pal. is not unlike that described by Herodotus. It is like a shallow saucer, the rim of which, on one side, is pinched together, forming a narrow channel through which the wick passed (see Fig. 1). This style is \* See under art. LANTER.

 $\mathbf{24}$ 

· LAMP

called Phœn., and is found in the tombs and ruins of the oldest cities in Phœnicia and Palestino (*PEFSt*, 1893, p. 14; and Bliss, *Mound of Many Cities*, p. 87). The more common forms are oblong, but not open like the above. There is a saucerlike depression in the upper surface, at the bottom of which there is an orifice for the admission of the oil into the lamp, and another opening at the

F16. 1.

extremity for the admission of the wick. At the opposite end there is often a small handle (see Figs. 2 and 3: Fig. 3 is bronze). Sometimes the form is circular, an open saucer-shape, with a smaller saucer inverted in the larger (see Fig. 4). This form of lamp, especially No. 2,\* with or without the handle, is called Roman, and was doubtless

F10. 2.

commonly used in the time of Christ, and is most probably the kind referred to in the parable of the Ten Virgins (Mt 25). They hold little oil, and would soon need replenishing. The peasants of Syria and Pal. use these lamps still, although petroleum has in most places taken the place of olive oil for lighting. An open glass or terra-cotta cup with

a piece of rag for a wick is often seen in the poorer peasants' houses, and this they frequently keep

• See an interesting paper by Père Lagrange in *Rev. Biblique* (Oct. 1898) on two Pal. lamps to which his attention was called by Clermont-Ganneau. These are figured in the *Revue*.

# LANDMARK

burning all night. The people of the country do not like to sleep without some light in the house, and a dim one furnished by such a lamp suits their purpose. In illuminations at weddings and on feast-days this open style of lamp is much employed. The wick used is a small one drawn

F10. 4.

through a piece of cork and left to float on the surface of the oil.

Lamps appear to have been kept burning before the *teraphim* (images of ancestors); hence the words 'the lamp of the wicked is put out' (Job 18<sup>6</sup> 21<sup>17</sup>) may have originally meant that the wicked shall have no male descendants to fulfil this duty of placing a lamp before his image (so Schwally, *Leben nach dem Tode*, 40). H. PORTER.

LAMPSACUS(1 Mac 1523 RVm). -See SAMPSAMES.

#### LANCE.—See SPEAR.

**LANCETS** ( $n c^{-1}$  1 K 18<sup>26</sup>). — A mistaken correction in modern edd. of the original reading of the AV of 1611, 'lancers,' *i.e.* 'lances,' properly spears used for hurling. Both forms of the word are old, 'launcetis' being the later Wyclifite form in this passage. AV of 1611 adopted the 'launsers' of the Bishops' Bible (spelling it 'lancers,' however), and the change into 'lancets' was not made before 1762. Cf. Scrivener's *Introduction to the* AV, pp. xlvi, xlvii. See SPEAR. W. E. BARNES.

LAND CROCODILE (Lv 11<sup>30</sup> RV).—See CHAME-LEON.

LAND LAWS.—See LAW (in OT)and SABBATICAL YEAR.

LANDMARK  $(\dot{\gamma}_{2};)$ .—An object, such as a stone, a heap of stones, or a tree with a mark in its bark, intended to fix the limit of a field, a farm, or the property of an individual. In Palestine these landmarks are scrupulously respected; and in passing along a road or pathway one may observe from time to time a stone placed by the edge of the field from which a shallow furrow has been ploughed, marking the limits of cultivation of neighbouring proprietors. In order to perpetuate the observance of the rights indicated by landmarks in the Mosaic ritual,

In order to perpetuate the observance of the rights indicated by landmarks in the Mosaic ritual, a curse is pronounced against the surreptitious removal of a landmark belonging to one's neighbour (Dt 19<sup>14</sup>, for the meaning of which see Driver, *ad loc.*). In Egypt the land had to be re-measured and allotted after each inundation of the Nile, and boundary-stones placed at the junction of two properties. A collection of such objects is to be seen in the Assyrian Room, British Museum.

E. HULL.

LANGUAGE OF THE OLD TESTAMENT.—1. Names.—(a) The greater part of the Old Test. is written in the language called by the Assyrians 'the tongue of the west country' (Winckler, Die K. I. Sargons, p. 72, l. 423, etc.),\* by biblical writers 'the lip of Canaan' (Is 19<sup>10</sup>), or 'Jewish' (2 K 18<sup>26</sup>.<sup>28</sup>; cf. Neh 13<sup>24</sup>), by the Rabbis 'the Sacred Tongue' (Sota, vii. 2, etc.), or 'the Text' as opposed to 'the Targum' (Bab. Megillah, 18a, etc.), or 'the language of the Law' as opposed to 'the language of the doctors' (Weiss, Studien sur Mischnahsprache, p. 9). The Palestinian † Rabbis further apply to it the term 'Hebrew' (Jerus. Megillah, p. 19, etc.), and the absence of this name in the OT can be due only to accident; it is the term regularly employed by Greek-speaking Jews (first occurring, it would seem, in the Pref. to Sir; used also by Josephus, Ant. I. i. 2), and it can only be through ignorance that Philo substitutes 'Chaldee' for it. The name 'Hebrew' was adopted by early Christian writers (e.g. Ac 21<sup>40</sup>), and with the spread of Christianity it migrated into Asiatic, African, and European languages; some of which have also adopted from the Rabbis the name 'Sacred Tongue.' (b) The portions of the OT which are not in Hebrew are in the language called Aramaic in the

(b) The portions of the OT which are not in Hebrew are in the language called Aramaic in the Bible (2 K 18<sup>26</sup> etc.) and Talmud (Bab. Shabbath, 12b, etc.), and not infrequently 'Targum' in the latter (Bab. Megillah, l.c.), 'Syriac' in the LXX and sometimes in the Talmud (Jerus. Sotah, vii. 2). It would seem that the name 'Chaldee' does not belong properly to this language, although the Aramæans and Chaldees are sometimes juxtaposed in old inscriptions (Sennacherib, ed. G. Smith, p. 36). It is probable that the use of the name for 'Aramaic' is due to the comparison of Dn 1<sup>4</sup> with 2<sup>4</sup>; and the identification of the two appears in the notes of Jerome and Ibn Ezra on the latter passage, though the LXX translator of Dn 2<sup>27</sup> appears expressly to avoid it. In Syriac works, probably through similar reasoning, 'Chaldee' is sometimes said to mean 'Old Syriac' (*Thes. Syr. s.v.* 'Kaldaya'); but in very late times the 'Chaldæans' are identified with the 'Nestorians,' probably on the ground of their geographical position (Badger, Nestorians, in 181; cf. Rassam, 'Biblical Lands,' in the *Proceedings of the Victoria Institute*). In Aramaic are written (1) Dn 2<sup>4</sup>-7<sup>36</sup>, (2) certain documents quoted in Ezr 4<sup>7</sup>-6<sup>16</sup> and 7<sup>12-26</sup>, ostensibly in their original language; it is, however, noticeable that the connecting narrative is also in Aramaic; (3) Jer 10<sup>21</sup>, regarded by some as an interpolation, while others endeavour to account for the transition on rhetorical grounds. There are besides several places in the OT where the writers appear to lapse into Aramaic, possibly through the fault of their copyists. In Jos 15<sup>26</sup> the adjective n3<sup>21</sup>, in the name 'New Hazor,' is Aramaic; in 14<sup>8</sup> an Aramaic both in derivation and grammatical form occur in Is 30<sup>46</sup>, Ezk 24<sup>43</sup> 33<sup>50</sup>, Ps 116<sup>16</sup>, possibly Job 37<sup>18</sup>, Dn 11<sup>26</sup>, and elsewhere.

(c) The employment of other languages than these in the OT does not exceed the quotation of isolated words and phrases, or calling attention to varieties of nomenclature. Besides the Aramaic equivalent for Gilead cited in Gn 31<sup>47</sup>, Egyptian is quoted *ib.* 41<sup>45,45</sup> (JE), Moabite Dt 2<sup>11</sup>, Ammonite *ib.* v.  $\approx$ , Sidonian and Amorite *ib.* 3<sup>9</sup>, Tyrian 1 K 9<sup>13</sup>, Persian (!) Est 3<sup>7</sup>, Babylonian (!) Dn 4<sup>8</sup>, per-

 Delivanch (Handsörterbuch, s.v. 'billai)' suggests that Hittite is meant here. It would seem, however, that the words are easily explicable as Canaanitish (cf. Jer 2214), and B. Meisner (Nock simmal das Bit Hilläni, 1893) thinks this does not admit of a doubt.

t In the Babylonian Gemara "JJ at any rate sometimes means a foreign language, e.g. Shabbath, 115a.

haps Philistian Is  $2^6$ . Moreover, it may be observed that, in speaking of dignitaries, biblical writers are ordinarily (not invariably) careful to give them their native titles : see Ex  $15^{15}$ , Jos  $13^{3-21}$ , Ezk  $23^6$ , Hos  $10^5$ , Est  $1^8 4^{12} 8^{10}$ , Dn  $3^2$  etc.

2. Antiquity .- The Hebrew language may be appropriately termed the Israelitish dialect of Canaanitish. Outside the OT the chief pre-Alex-andrian monuments of the Israelitish dialect which we possess appear to be an inscribed weight in the Ashmolean Museum, Oxford, found at Nablûs, and the Siloam inscription (Driver, Notes on Samuel, p. xv), probably of the age of Hezekiah. But of other Canaanitish dialects we possess far earlier monuments. The oldest of these are the called monuments. The oness of mass are one gloases of the Tel el-Amara tablets (see Winckler's edition in the KIB, 1896). The writers of these epistles sometimes accompany their Assyrian with a Canaanitish equivalent, using, of course, the a canaantish equivalent, using, of course, the cuneiform character for both (examples are 181. 5 khalkaat, explained by abada, 'perished'; 189. 16 ana shamë by shamima, 'heavenward'; 191. 24 sise by suusu, 'horse'; 189. 18 kakkadunu by rushunu, 'our head'). It may be noted as a peculiarity of the writers' dialect that the sub-stantize yearb in it would appear to have descent stantive verb in it would appear to have drawn some of its tenses from the stem in use in Phœnician (and Arabic), and others from the stem in use in Hebrew (and Aramaic). 'If you say kuna,' says one writer, 'I will answer yahya' (149. 36). These tablets are assigned to the 15th cent. B.C., but the existence of the Canaanitish language is certified for a yet earlier period by some of the loan-words found in Egyptian monuments, some of which go back to the 16th century or earlier. The bulk, however, of these loan-words occur in papyri of the 14th and 13th cents. B.C. Maspero, who first brought this fascinating subject into prominence (in his *Epistolographic Egyptienne*, 1873), thought that during those centuries the employment of Semitic words was in fashion among the upper classes in Egypt; and if this opinion be correct, it follows that the Canaanitish language must by then have reached a high state of development. This opinion, however, was not shared by J. H. Bondi, who, in his dissertation on these words (Leipzig, 1886), collected as many as sixty-five of them; while a still greater number was collected by W. Max Müller (in his Asien und Europa, 1893), who has since (in the volume dedicated to Ebers, 1897) tracked out a few in the collected Demunic Eber in the celebrated Papyrus Ebers, which deals with medical prescriptions. Whether their introduction into Egyptian was the work of the upper or the lower classes, the variety of the spheres of thought to which they belong is such as to allow of their being compared with the words afterwards borrowed by the Copts from the Greeks. The unsatisfactory nature of the Egyptian transcription renders them somewhat less amenable to grammatical analysis than the Tel el-Amarna glosses. Of the remain-ing monuments of the Canaanitish language, the inscription on a patera dedicated to Baal-Lebanon in Phœnician (CIS i. No. 5) is probably the oldest, while the Mesha stele (of the time of Jehoshaphat of Judah) approaches most nearly to the Israelitish idiom, being in Moabitic; of the other Phœnician inscriptions, that of Byblus (CIS, i. 1) approxi-mates to Hebrew, but the most important is doubtless the Eshmunazar inscription (CIS i. 3), about the time of Alexander the Great. From Palestine the Canaanitish language was carried by Phenician colonists to Africa, the islands and harbours of the Mediterranean, and Spain. Here it was supplanted first by Greek, and then more extensively by Latin; but would seem to have survived as a spoken language down to the 5th cont. B. C. and prehame later. cent. B.C., and perhaps later.

3. Origin.-The Canaanitish language belongs to the Semitic family, and is closely allied to the Arabic, i.e. the language made world famous by the conquests of Mohammed and his successors. These are the only languages of the Semitic family that have, in regular use, (1) a prefixed article, leading to a variety of syntactical rules; (2) an interrogative prefix of a single letter, \* as well as a syllabic prefix of the same import (Dt  $32^{\circ}$ ); (3) a series of passive conjugations, formed by a change of vowel from the active;  $\dagger$  (4) a regular conjugation Niphal; ;—Canaanitish has, moreover, considerable remnants of (5) a case system; (6) an infinitive system ; (7) a mood system identical with those of classical Arabic. The theory represented in the grammar of J. Olshausen (Brunswick, 1861), according to which the relation of Hebrew to Arabic is that of daughter to mother (in the sense in which these metaphors may be used of languages), is that which best suits the facts; § and indeed the proximate ancestors of Hebrew forms can in the great majority of cases be easily found in Arabic. The apparent absurdity of deriving so ancient a language as Canaanitish from one of which the earliest monuments in our possession are so recent, disappears in the face of the overwhelming evidence which comparative grammar can produce. The earliest specimens of classical Arabic that have come down to us are not, indeed, earlier than the 6th cent. A.D.; and though numerous inscriptions in other dialects have been discovered in both S. and N. Arabia, the dialect of the Koran is scarcely represented in any stone of the Koran is scarcely represented in any stone monuments earlier than the composition of that book. There is, however, no doubt that the Mo-hammedans inherited a literary language, which prevailed over the greater part of the Arabian peninsula, with slight differences of dialect. But for the early history of that language we cannot go to Mohammedan writers, but are left to what we can infer.

The line of investigation to be followed is the same as that applied by M. Pictet to the Indo-European languages, and which employs the assumption (called by M. Lenormant 'the true principle') that, where kindred nations which have separated call objects or institutions by the same having been borrowed independently, they must have possessed the names and the objects, etc., before they parted. A comparison therefore of the Hebrew and Arabic names for a variety of things should give us something like a correct idea of the state of Arabian society when the Canaanites first migrated northward. The result would seem to be the following:

The nation from which the Canaanitish colonies emanated must before that event have attained as high a level of development as any Oriental State uninfluenced by Europe has reached. Society was already organized on the basis of the family, for the languages have identical names for 'father-inlaw,' 'mother-in-law,' 'son-in-law,' and 'daughter-in-law,' which necessarily imply it; but the family was polygamic, since the relation of 'fellow wife is indicated by the same name with the proper phonetic changes. The treble system of naming in use in Arabia would seem to have existed also, since the Canaanites retain all three words for \* The Aramaic of Daniel also has this.

The Aramaic of Daniel also has this. The Aramaic of Daniel also has this. The Aramaic as well as that of the papyri shows some traces of these passives. The Hebrew of the OT shows considerable relics of a passive of the first form, which the grammatical tables cannot recognize. The punctuators identi-fied it with  $Pud_i$ , the passive of ii. Ty is 14<sup>3</sup> and Typ Lv 6<sup>21</sup>

are striking cases
This conjugation is given in the Assyrian paradigms.
Vollers, in his review (ZA, 1897) of Nöldeke, Zur Grammatik dea Kl. Arabiachen, thinks that work will tend to modify this view; lut see the author's reply in the same volume.

### LANGUAGE OF THE OLD TEST.

'naming' and 'names,'\* but have apparently ceased to distinguish between them accurately; and the castes of freemen and slaves were already distinct. The life of the people was passed partly in villages, partly in towns, with streets and squares, and defended by walls. The same cereals were cultivated in the fields, many of the same pot-herbs in the gardens, mostly the same fruits in the orchards and plantations, and the same animals domesticated as afterwards in Canaan; and the chief agricultural processes had already been invented and named. Various trades were exercised in the towns: there were smiths and carpenters who understood the use of the saw, the axe, and the adze; there were money-changers with scales, + and there were money-lenders. + The last two trades imply some acquaintance with arithmetic, and the Arabs before the Canaanitish migration possessed special names for 'thousands' and 'myriads.' Money-lending implies the calculation of days, and this is based on astronomical observation, the beginnings of which already existed, for some of the constellations § were already named. Writing already existed, || and, it would seem, an alphabet,  $\P$  and certain styles of elegant composition were already practised.\*\* Religion had already taken shape: men could distinguish be-tween the sacred and the profane, they had a pilgrimage, and learned various ceremonies, including, probably, genutlexions and prostrations. The prophetic profession seems to have existed in a variety of forms. Custom had already to some extent become stereotyped in the form of law. It is probable, therefore, that the Canaanites

issued from a country where a classical language was spoken and written. Some tribes may have carried that language with them into their new home; but, in the case of those whom we know best, it would appear to be a vulgar dialect of Arabic which formed the basis of the language. Many curious parallels can be found between the language of the Bible and the dialects of Arabic spoken in Egypt and Syria in the present day.tt While in general simplifying the structure of the

\* and in Arabic, 'to address by an indirect name,' i.e. to call \* 7DD in Arabic, 'to address by an indirect name, 't.e. to call a man by his son's name, 'father of so-and-so,' instead of by his own. In the Aghāni the narrators often point out how the Caliph kannāni, 'called me Abù so-and-so' to do me honour. In Syriac the word merely means to 'name'; in Hebrew, is 454 'to call by a family name,' Job 3221 'to flatter.' It would seem clear that the Arabic practice (extraordinary as it is) lies behind both the Heb. and Syr. usage. The word (Agab, in Arabic 'title,' serves to give a verb to the Hebrew DF: 125, 178 mogo ' whose names have been mentioned,' Nu 117.

t Diliko is a case of popular etymology. The root it being lost in Hebrew, the word was popularly derived from lik 'an ear.' The Carthaginians have a similar word, Rev. Ass. v. 12.

? The Heb.  $\pi \nu_1$ , of which the construction is peculiar, seems evidently connected with na-i'ah, 'deferred payment.' § See Hommel's article in the ZDMG, 1892.

I The word סְבָר seems to be the Arab. zibr, which occurs in the earliest Arabic known to us. See Ma alla fad of Labid. The Assyr. satar is used in early Arabic also. The meaning to write' is lost in Hebrew, but lies behind the sense of "Di.

Thas the sense of Arab. hajd, 'to articulate,' in several anages : Pr 57, 15 503 13, \*\* It seems difficult to separate the word yayp used with

אשל of a spear to be also independent. the samples are given by W. Wright in his Arabic frammar (2nd ed.) and his Comparative Grammar. The form אשל of the samples are given by W. Wright in his Arabic frammar. The form אשל of the samples are given by W. Wright in his Arabic frammar. The form and his comparative frammar. The form and also independent in the samples of the uses of 12: can be illustrated by those of ya'ni in languages that borrow from Arabic. The use of use a final and explanatory

particle would seem to be a vulgarism. الذي is so used in some Arab. dialects, and likewise in modern Armen. the relative wor has taken the place of yethe 'that.' Perhaps the Heb. Try: 'to do,' is the Arab. ghashiya vulgarly used; cf. Lisān al-arab, xix. 363, 5.

ancient language, they contain many relics of the classical rules. The classical language from which chastical rules. The classical language from which both are derived must therefore have flourished long before the 15th cent. B.C., for which time the existence of the later language is certified. The elaborate syntax and accidence which the early poetry of the Arabs exhibits would seem to have been codified more than two thousand years before that poetry was composed. It is in favour of this result that the Arabs have no accurate notion of the commencement of their literature, or of the time when any of their classical metres was invented. Yet those metres imply the whole of the grammatical system, which can only have been the product of organized study. That all trace of the schools and colleges of early Arabia should have perished is noteworthy, but scarcely extraordinary, if we consider what such isolated monuments as the Mesha stele or the Iguvine tablets imply as to the extent of literatures that have wholly perished.

The evidence for the priority of Arabic grammar to the de-velopment of the Canaanitish language is to be found partly in what may be termed the residues which Canaanitish exhibits. Of these, examples are to be found (1) in the spelling, (2) in the grammatical forms, (3) in the syntax. (1) As examples of orthographic residues, we may notice (a) the computer of the terment the side of the participation.

the employment of N to represent the sign of prolongation of the vowel o in a number of words in which the Arabic has the consonantal N preceded by a short a (e.g. UN), ins, This see Böttcher, Lehrbuch, i. p. 245). In some other words the letter R is still written without affecting the pronuciation. It would seem clear that the tribes who migrated from Arabia to Canaan had already found diffi-culty in pronouncing the consonantal Aleph, which indeed many still regard as the hardest of the Arabic consonants. They pronunced d for a', a pronunciation which indeed the Arabic grammarians tolerate in poetry. But while this d in Arabic was either retained or reduced in the direction of d, the immigrants pronounced it as well as other Arabic a's (with rare exceptions) as o. The writing 183 for zon therefore is a case in which an old spelling is retained after it has become doubly which an on specing is retained after it has become doubly unmultable to represent the correct pronunciation; and in all cases where this letter represents anything but the soft breath-ing, it must be regarded as a remnant from an explicit language, or due to false analogy. The perpetual interchange which we notice in the OT between roots n'' and roots 7'' shows that the consonantal a could no longer be pronounced at the end of a word. But from etymological orthography of this sort we can infer with certainty the existence of a literature in which the orthography agreed not only with etymology, but with the actual pronunciation ; in other words, the existence of written documents in Arabic earlier than the Causanitish migration.

documents in Arabic earlier than the Canaditish migration. (b) Of no less interest as an etymological remnant is the em-ployment of the letter  $\neg$  at the end of words to represent the lengthening of a vowel, a peculiarity which the Phonician dialects apparently do not share with the Hebrew and Moabitic. This mode of writing has two obvious sources. In Arabic the pages form of nouns ending in *atum* is *ah*, and in this form the his more expression (Mah and Share) the source form the sources. A is pronounced as a consonant (Heb. 7), as we learn from its A is pronounced as a consonant (Heb.  $\vec{n}$ ), as we learn from its treatment in verse: thus martahah is made to rhyme with islabah, in which the h is radical (Hariri, ed. 1, p. 64), etc. This pansal form has in Hebrew ousted the other. That it is every-where pronounced  $\vec{a}$  for ah is a phenomenon to be easily illus-trated from Hebrew itself (in which the  $\vec{a}h$  of the feminine suffix has a tendency to sink into  $\vec{a}$ ), and from many other languages. But the Phonicians did not adopt this pausal form, retaining the t in the absolute as well as in the construct state. Hence one of the sources of this employment of the letter A was weaking in their languages. anting in their language. The second source of this phenomenon is to be found in the

The decode source of this phenomenon is to be found in the masculine suffix of the third person. Relies of the Arabic has are not infrequent, but ordinarily (as in modern Arabic locally) that suffix is reduced to  $\delta$ . When modern Arabic is written, the h is retained (see e.g. Kata'if al-lataif, Cairo, 1894, p. 51, etc.) and the same is the case frequently in Hebrew and in Moabitic. In all these cases, however, it is an etymological because remnant.

(c) As a third case of etymological writing, we may note the employment of the sign  $\sigma$  to represent s. This orthography in characteristic of the older forms of Hebrew, Phonician, and Aramaic, failing gradually into disuse in all of them. Now we know that the words which in Hebrew are written with in almost invariably correspond to Arabic words with eh. Since a great number of the words which in Arabic have the sibilant that corresponds with D have that letter in Hebrew also, the desire to avoid confusion may well have perpetuated the old spelling in the cases where a shad come to be pronounced s. We learn, moreover, from the well-known passage in Jg 12<sup>6</sup> that

# in parts of Palestine only one of these sibilants could be pro-

in parts of Palestine only one of these sibilants could be pro-nounced. (2) Of the grammatical residues, which are numerous, we need merely notice the variation in the second and third per-sons plural of the imperfect between the forms  $\bar{u}n$  and  $\bar{u}$ . All distinction in meaning between these forms is clearly lost; at most it can be said that some writers have a predilection for one form rather than the other. Classical Arabic, however, distinguishes them very decidedly : the dropping of the n with its vowel is a sign of the subjunctive or jussive mood, and is not an isolated phenomenon, but belongs to a system. What renders the treatment of these forms by the Hebrews peculiarly interesting is that the vulgar Arabic written by Jews, Chris-tians, and even Mohammedans, exhibits the same phenomenon. Such writers as Jephet Ibn Ali are well acquainted with both forms : only the sense of their proper employment fails them. (3) As a syntactical residue we may instance the treatment of the numerals. Here the Arabic rule is very simple, and its ground can easily be seen. One part of it is that the numbers 11-99 take after them the accusative singular. If the usage of the Hebrew OT be tabulated, the only expression for it seems to be that with words which from their nature are constantly coupled with numerals. the Arabic rule is fairly regularly poserved; with others the plural is more common, but the singular optional. Thus in  $Jg S^{23}$  'The land rested forty year,' but v.<sup>30</sup> (sideon had seventy sons of Jerubbaal,' v.<sup>30</sup> his seventy brothers'. In Jos the rule is sometimes observed with the word 'man,' but other variations occur which stamp the language as patois-like and ungrammatical: the following examples of the syntax of the word 'twelve' taken from Jos the language as pations like and ungrammatical: the following examples of the syntax of the word 'twelve' taken from Jos S and 4 show how unsettled was the usage in even so ordinary a matter. איש גער אישים 42, אני גער איש 12, 44 איש א המעשר 44, אנים גער אישים 42, 44 אישים גער איש איש אין איש גערה אין איי אין איי אין איין אין איש אין אייש אין אייש אין איש גערים ארגע איש איי איש איי אייש איי to be similarly observed when numerals precede the word 1's 'a thousand,' owing to ancient calculations, whereas the old rule about the syntax of words following 7 x seems to be equally often observed and forgotten. From the practically regular observance of the Arabic syntax in the case of the word 'year,' which from its nature must be constantly coupled with numerals, it seems reasonable to infer the antiquity of the Arabic rules. The ordinary style of the OT exhibits therefore in this case, as in the last, a survival from an older language.

At what time the Canaanitish language first began to be written cannot be determined; but it seems certain that there can have been no break of any length between the writing of Arabic and the writing of Canaanitish; the etymological rem-nants would otherwise be inexplicable. Thus the writing of aiment in French for aime must be inherited from a generation who both pronounced and wrote aiment or amant; had French been first written by persons who pronounced the word aime, the nt could never have been intro-duced. We cannot know either whether the Canaanitish orthography was gradually formed or became fixed at a definite epoch. The evolution of Ethiopic from Sabæan, which offers some striking analogies to that of Canaanitish from Arabic, is in favour of the latter supposition. Those who made Ethiopic a written language abandoned some of the Sabæan letters and introduced others. Those who gave Canaanitish a literature omitted some six or seven of the letters of the old Arabic alphabet, but added none. It is prob-able, then, that the double pronunciation of the six letters recrear, with which we are familiar in Hebrew, Phœnician, and Aramaic, was not yet noticeable. The lost letters are to some extent the same as those which are no longer pronounced in many of the countries where Arabic is spoken, albeit they are still written. In Canaanitish th coalesces with  $\vec{v}$ , dh with 1, kha with  $\neg$ ,  $d\bar{a}d$  and  $z\bar{a}$ with x, ghain with y. This rule holds good ordinarily, but human speech is subject to fluctua-Arab. khadhala, speech is subject to indetail Arab. khadhala, sure spondence (as e.g. bra always imply independent roots, where the significations are clearly akin. In the case, moreover, of the other letters the Canaanitish dialect shows considerable deviation from the Arabic, sometimes in a manner that can be paralleled from dialects the peculiarities of which are noted by Arabic grammarians. Thus it would appear that there was a tendency to shift from *media* to *tenues* (e.g. , אין ; דף, Arab. אין ; נחר, Arab. כחר ; סונ, Arab. ססך,

Arab. בור ; שלכ , Arab. אפע ; שלכ , Arab. בור ; שלכ ), which can be paralleled from what has happened in other languages (e.g. modern Armenian as compared with ancient). The Canaanitish language shows further considerable confusion of the gutturals: besides the tendency to pronounce p for j (e.g.,  $\eta_{2}$  for  $\eta_{2}$ ,  $\eta_{2}$ ,  $\eta_{3}$ ,  $\eta_{2}$ ,  $\eta_{3}$ ,  $\eta$ , c for s in כפק, ו for s in זעיר, etc.), and of the liquids (e.g. קון לקב for לקב for כלק (מכמי), וישם for כלה (מכמי); moreover, the letter n is frequently displaced by the emphatic a, e.g. קחל for קחל, etc., and a by c (د. جار and در برام و مراجع المراجع (مراجع المراجع المراجع vulgar dialects are the frequent assimilation of the nasal n before another consonant (cf. Ital. mese for mensem, mod. Armen. gigni for gingni, 'he falls'), and the misplacement of the aspirate. Indeed, in Canaanitish as well as in the older Aramaic and in some of the S. Arabian dialects, an initial breathing seems regularly to be aspirated when it is a grammatical prefix, and some-times when it is radical (so הפך for קפר); but, on the other hand, the Hebrew sometimes substitutes the soft breathing for the aspirate (cf. with Arab. היבה), especially in the middle of a word (so a witness' for אהר 'one who knows'; cf. Jer עני ג'ירע רעז (ידע די איז איז through און איז לער געד ג'ירע געד (ידע ג'ירע ג'יירע ג'ירע ג'יע ג' it often becomes unrecognizable; and the occasional transposition of radicals introduces great difficulty : just as some mod. Armenian dialects have tepur for phethur, so Hebrew has as for as, de for it; cf. uxy for Arab. joy. The chief grammatical differences between Arabic and Hebrew are due (1) to the loss of the final vowels, which in the older language have syntactical value; (2) to the exaggeration of the accent, resulting in the strengthening of some vowels and the loss of others; (3) to the tendency to simplify, which explains the loss of whole series of forms in many of those languages that have grown out of the decay of classical idioms. In the opinion of some, the language has by these changes gained in vigour what it has lost in finesse—a matter which must be left to the individual taste.\*

Of the families of words in use in Canaanitish, it would seem that more than half can be identified with roots known to the lexicographers of classical Arabic; but the waywardness which characterizes human speech has not failed to leave its mark on the treatment of the old words in respect both of their preservation and the evolution of their significations. Thus Canaanitish and classical Arabic have the same word for 'peace,' but different words for 'war'; the same for 'to eat,' but different for 'to drink'; the same for 'near,' but different for 'co drink'; the same for 'near,' but different for 'far'; the same for 'low,' but dif-ferent for 'high'; the same for 'gold,' but dif-ferent for 'silver'; the same for 'to ride,' but different for 'to sit' and 'to stand'; the same for but different for 'horse,' though the same horseman.' In several of these cases, and 'ass,' but differ for 'horseman.' in numerous others, while the same words or

the same families are retained in both lan-• Of many of the elegances of Arabic grammar there are faint traces in the OT. The Arab. rubba 'many a,' appears once, Pr 20<sup>6</sup>. Of the broken plural the only real example in the OT appears to be ICIT plural of in other cases its meaning is lost, even though its form be present, e.g. בלכל meaning is loss, even though its form be present, s.g. 327pNu 215. In Böttcher's Lehrburch the most is made of these relics as well as of supposed remains of the dual of verbs and pronouns. The syntax of the Book of Joshua seems to show that there was a time when the old rules of the article were in danger of being lost (314 7<sup>21</sup> 8<sup>10</sup>.3<sup>3</sup>), but this (like Is 36<sup>3</sup>.16) may be due to corruption of the text. A remarkable relic is in Las 2918 rink way which means the show that there is a model. Jer 2218 mins, in, which resembles the *ah* added in Arabic, wa Zaidāh, 'alas, Zaid !' (Vernier, Gram. Arabe, § 565).

# LANGUAGE OF THE OLD TEST.

guages, the meaning in one or other has been so generalized or specialized as to render the introduction of another necessary in order to represent the original meaning. In some cases it is likely that neither language retains the original sense ; but in most it would seem that, in spite of the late date of our Arabic documents, has been done by those acquainted with both lan-guages since the days of the Talmudists in tracking out the development of these significations.

A few familiar cases are—(1) the Hebrew for 'to say', in Arab. 'to command': that 'to command' is the original sense is shown by occasional relics of that meaning in the OT  $(2 \text{ S } 1^6)$ , and by the derivative proud, ' a sense 18<sup>20</sup> 'the prophet who shall add to speak in my name words which I have not commanded him': the Latin loguetur ultro would exactly illustrate the transference of ideas. (3) The Hebrew 57n'to profane,' and 5nn 'to begin,' seem both trace-able to the Arab. 5n 'to loosen,' whence both ideas flow by a course of reasoning exactly similar to that illustrated in the evolution of the Canaanitish is apparently an expression current in the mouths of the vulgar exalted into a classical phrase: the Hebrew words for 'handinaid and family' would appear to have a very obvious etymology in Arabic (cf Koran, iv. 28; Romance of Saif, i. 28), which, however, would exclude them at the first from the mouths of the well-bred. A certain number of alterations in meaning can be explained by popular misappli-cations, e.g. the Canaanites use for 'blind' the word which in Arab. means 'one-eyed,' for 'deaf' the word which in Arab. means 'dumb.

It is not in our power to gauge the whilom wealth of the Hebrew language,<sup>6</sup> and far more of the copious Arabic vocatulary may have been retained by the Canaanites than is ordinarily supposed. Most of the books of the OT offer examples of hapax legomena that can be satisfactorily explained from the Arabic, whether in the form of antiquated phrases for which the ordinary language employs other synonyms (e.g. Dt 27<sup>9</sup> norm, Arab. uskut, 'be silent,' in every way parallel to the herald's 'O yez'), or of dialectic words (e.g. 2x), Arab. nigab, Jg  $3^{22}$ ), or of words which there is no reason to suppose to have been rare, but which for one reason or another the biblical writers have not elsewhere occasion to employ (e.q. ترجنبة, 'sneezing,' Job 41<sup>18</sup>). Arabisms in this sense can be found not only in

the latest biblical writers, † but even in the frag-

the latest biolical writers, rout even in the trag-\* In the Concordance published at Warsaw, 1883, roots are given in large type, perbs (counting each conjugation sepa-rately) are marked with a circle, and nouns with a star. According to computations made for this article, the numbers are respectively 2068, 2930, 3937. † 80 EC 9<sup>1</sup> mg 'to try,' Arab. berg ; in Listen al.'arab, v. 153, several curious passages of old authors are cited in which this word occurs. The etymology is given by Ges. Thes., but omitted in the Ozf. Heb. Lex. 220 pix; can scarcely have hear theoreth out by the writer from the biblical gam, but been thought out by the writer from the biblical EWI, but must represent an old word (Arab. ya'isa). A few striking Arabisms may be collected here. Gn 2812 D'p 'a staircase, Arab. sullam; 4016 mi 'white bread,' Arab. huwwari; 4227 haggage,' Arab. amti'at, plur. of mata' (it is curious that Mohammed uses this word in Koran, xi. 25, where this verse is represented 'when they opened their baggage mata-'ahum'. The change of y to  $\pi$  is caused by the following n: in Egypt it is now customary to say not for not, ארבחה for ארבחה [Tantavy, Grammaire, p. v.]) ; Ex 54 ארבחה

ments of Ben-Sira, and in the New-Hebrew of the Mishna.\* As borrowing from the Arabe is highly improbable, and in many cases shown by the phonetic changes to be impossible, the whole stock of words common to Canaanitish and Arabic must have constituted the linguistic capital of the former language. The parallelistic style, which is probably earlier than the migration, served to retain in use many synonyms which might otherwise have disappeared ; † but without a far greater mass of literature than has come down to us we could not pronounce without hardihood on the original bulk of the Canaanitish vocabulary, or deny any genuine Arabic root a place in it.;

4. Secondary Sources.—Of the roots and words which the Hebrew vocabulary contains, a great number cannot be identified in the Arabic dictionary. Of these, however, some seem to have been current in Arabia before the migration, for we find them in the Ethiopic language, which we know to have sprung from a S. Arabian dialect.§ A few more are stamped as Arabic by their occurrence in S. Arabian inscriptions. But this still leaves a great number unaccounted for. We have therefore to recognize in Canaanitish a non-Arabic element, and must endeavour to account for its origin.

According to the biblical account, the patriarchs and their families having acquired Hebrew in Canaan, sojourned in Egypt, but retained their own language, which was brought back to Canaan. Although the seclusion of the Israel-ites in Egypt, on which some of the narratives insist, would account for their failing to adopt the language of Egypt, their dependent position there would lead us to expect that their Hebrew would

'ye make idle,' Arab. tu/righūna; 265 אָקָנָילוֹת, Arab. a cover' or 'lid,' Arab. simdd; 258 npp 'a tent,' Arab. woodah ; Dt 67 DRIN ' thou shalt teach them,' Arab. sanna ' to prescribe,' whence 'the sunnah'; 1877 אליה, Arab. sald; Jos 1012 נוזר 'remain,' 'abide,' Arab. לשמי; Is 1013 לאיז, Arab. minshār 'mw'; 3320 jys 'to migrate,' Arab. za'ana; 324 jyr, Arab. 'ilj ' barbarous'; 4128 pray ' truthful,' Arab. siddik ; Jer 12" Fily, Arab. dabu'un ; Esk 16" no; w 'loud-tongued,' Arab. milifat.

The parallel to grap?; 27<sup>2</sup>  $\gamma_2$  parallel with  $\gamma_2$ b. The retention of prove (Phoen.) and Day (Egyp.?) as names for 'gold' is perhaps due to poetical necessity. 3 Some parallels between the expressions of the Arabs and the OT are put together by G. Jacob, Studies in Arabischen Dichters, in: (Halle, 1897), and by E. Nestle, Maryinalies, p. 56 M. A longer list could be got from the commentaries of A. Schultens and F. Hitzig. Some curious cases are: 'when their foot slippeth' (Dt 32<sup>26</sup> etc.), for 'when misfortune betalls them, in Arabic 2*alla 'kadam (Koran*, xvi. 96); commencing letters with 'and now' (2 K 5<sup>6</sup> 10<sup>9</sup>). In Arabic ammed ba'du, i.e. 'after compliments': 'swallowing my spittle' (Job 7<sup>19</sup>) used for 'resting a moment' as in Arabic: 'hou listenest to the theory that the Jinns used to listen there and so learn maysterise (Koras, xvi. 18). The phrase D'19 70.' to curry favour' is perhaps to be explained from the Arab. khaid in Koras, xii. 9, 'the face of your father shall be clear (yakhu) for 'ou.' Much of the 'Ol, s.g. 'ask the village' for 'the people of the village' in Koras, xii. 9, 'the face of your father shall be clear (yakhu) for 'ou.' Much of the 'Ol, s.g. 'ask the village' for 'the people of the village' in Koras, xii. 9, 'the face of your shall be clear (yakhu) for 'b. 's the theory dictionaries, s.v. 12M, WA, 'SZM, MA, 'sZM, 'SZM.'

See the Hebrew dictionaries, s. vv. HE, WH, WICK, MIC, נשר, נשא, ננש ,ננה, למר ,כבר ,ירה ,יצא ,ידה ,חץ ,חמם ,חבר שכב ,שחת ,רשע ,רחק ,ררץ ,קשר ,צמר ,צמד ,פנה ,עוף ,עבה ,סמד, DDF, y77. Specially interesting identifications are those of the Heb. מיחס 'men,' הקאה (2 K 1022), myayo (Ps 687). With the familiar Heb. THI 'he told,' perhaps Eth. aghada should be compared ; with gro 'a paranymph' mar'awi = nuptiator ; with 'TT ' to rebel' ma'let = defectio.

160, e.g., the preposition 7327, and 777 (with the same meaning as in Eshmunazar's epitaph) in the glossary to Mordimann's article in Mütheilungen des K. Museums zu Berlin, 1898.

be affected by their long exile from Canaan, and that their literature would show traces of Egyptian, which other Canaanitish monuments would fail to exhibit. This expectation is not fulfilled. If the hieroglyphic vocabulary \* be collated with the Hebrew, the cases in which they show any correspondence are extremely rare, and these cases seem to belong to a period prior to the separation between the Egyptian and Semitic races: in any case, the fact that they are mostly Semitic and not specifically Hebrew words, shows that they were not learned by the Israelites in Goshen. The Coptic vocabulary is indeed far more illustrative of Hebrew; but this is due mainly to the extensive borrowing of Canaanitish by the Egyptians at a period to which reference has been made; and in many cases the words are Semitic with purely Canaanitish forms, and words which, while isolated in Coptic, belong to extensive families in Semitic. The few words in Hebrew which may be justly regarded as Egyptian are such as may easily have been brought by travellers.<sup>†</sup> It is, however, surprising that the historians of the Egyptian episode in Exodus are acquainted with scarcely any of the Egyptian technicalities which we should have expected them to introduce, e.g. the words for taskinasters, magicans,  $\pm$  pyramids, and that one of the writers excerpted should sup-pose that the Egyptians spoke Hebrew (Ex 2<sup>10</sup>). One of the authors copied in Gn is better in-formed on this point (42<sup>20</sup>), but even his employment of Egyptian words is inconsiderable. Verv different is the amount contributed to Canaanitish by the language of Assyria. We learn from the Tel el-Amarna tablets that in the 15th cent. B.C., while Palestine was under Egyptian suzerainty, the official language of communication was Assyrian, albeit the Canaanites had a language of their own. The employment of Assyrian as an official language points, however, to a yet earlier known as Assyrian supremacy. The language known as Assyrian is indeed Semitic, but greatly mixed with foreign elements, and with the consonantal system seriously deranged : it is therefore probable, where Canaanitish and Assyrian have words in common which are unknown to the other Semitic languages, that the former has borrowed from the latter. These words have been the subject of some classical monographs;§ and they are such as affect the whole character of the syntax, pronouns, conjunctions, prepositions,

• Pierret, Vocabulaire Hieroglyphique, Paris, 1876. † One of the few philological observations of interest in the Haggadah is the suggestion of B. Nehemish (first occurring in *Peeista*, ed. Buber, p. 1090) that "Jig is the Coptic anal: God, Pesikta, ed. Buber, p. 1096) that 'ik is the Coptic anok: God, he thought, addressed the Israelites (Ex 203) in Egyptian because they had forgotten Hebrew. This view appears for the *last* time, perhaps, in Pevron's *Lex. Copt.* Egyptian words occurring as such in the OT were collected in the last century by Jablonski (*Gruscula*, vol. i., republished Levden, 1805); Wiedemann's Sammiung Egyptischer Worter (1883) reduces the list to meagre dimensions. A great collection of kindred Egyptian and Semitic words was made by Schwartse in his *Altes Egypter.*, 1842 (p. 1000 sq.); whereas Unlemann, *de Vet. Egypt. kingua* (1851), endeavoured to collect those which might reasonably be supposed to have been borrowed by the listbrew. If we take no account of (a) proper names, (b) words of pre-Semitic antiquity, (c) words borrowed by the Egyptians, the number left is small; 'ix', Copt. iaro; into (gn 413), Hier.  $d_{24}$ , Copt.  $a_{27}$ ;  $\gamma_{27}$  (a shrine), Hier.  $d_{24}$ , Copt.  $a_{27}$ ;  $\gamma_{27}$  (a shrine), Hier.  $d_{24}$ , Copt. tabir, Abel, Kopt. Untersuchungen, 422; if the theories expounded in that work be correct, it will be difficult to deny  $0^{-1}$  (2 f etc.; cf. Copt. troop and  $\gamma_{29}$  an Egyptian origin; and the last has been regarded as Egyptian by good authorities. of Gn 2612 seems to be rightly compared with Copt. shaar, and 'to 'a species' with Copt. mini (a native Egyptian word according to Abel, *l.e.* 28). De Rouge (*Chreston.* i. 56) sug-gests that 'x 'island' is Egypt.  $a\phi$ , and (*ib.* 40) identifies snelsem with  $C_{2/2}^{-1} \phi$  (*l.v.* 112).

Wiedemann, while offering an Egyptian etymology for n, allows that it is probably Hebrew. § Frd. Delitzsoh, Hebrew and Assyrian and Prolagomona.

numerals, familiar adverbs, as well as political, commercial, legal, and religious terms.<sup>\*</sup> It is not It is not improbable that one of the most characteristic of Assyrian.+ The study of the Assyrian monarcha' annals and letters also reveals phrases which form part of the rhetorical capital of the Hebrew authors,‡ which it is probable were originally imitations of the Assyrian style. The Aramaic language has also inherited some of the Assyrian wit which the Canaanites did not adopt.§

There remain, however, a number of Canaanitish words which cannot be identified from any of the sources that have been enumerated. Several of these were probably tribal words of the com-munities that migrated northwards, and, though ancient and Semitic, never formed part of the old classical language; while others may have belonged to the classical language, though they have become obsolete in all its other descendants. It is likely, moreover, that a considerable number of Canaanitish words were learned from the Canaanitish aborigines. A race that may be named in this connexion, the Hittites, has left monuments the decipherment of which has occupied many scholars without as yet leading to any satisfactory result. An eminent Assyriologist has recently endeavoured to identify the Hittites with the Armenians (Jensen, Hittiter und Armenier, 1898); and since the Hittite race at one time played an important part in Palestine, we should expect, if Jensen's conjecture were correct, to find some considerable illustration of the Canaanitish vocabulary in the Armenian language. The mixed nature of that language (of which the basis is Indo-germanic) renders its employment for the explanation of Hebrew extremely hazardous; and many tempting identifications of words can be shown to be due to pure accident. The local names of Palestine, of which the Bk. of Joshua in particular furnishes a great number, throw less light than might be expected on the character of the aboriginal languages employed there. The greater number seem very certainly Semitic, albeit they not infrequently, both in vocabulary  $\P$  and

<sup>6</sup> In Frd. Delitzsch's Handssörterbuch some 160 words and roots can be illustrated from Hebrew, but not from Arabic. Examples of the words referred to above are she (Heb. z', whence, perhaps, דעוֹאָן, אוֹי (יָדָ), אוֹל (perhaps 'אוֹאָן, אוֹני (חַצָּוֹ, a-a-ka (אַיָרָה), a-ta-s (אַרָאָר, stiti (חַצָּוֹ, ma-a-du (אַרָה), מוֹאַר), אונגע (מַרָה), אונגע אוי is-su-ri (ארך), na-si-ku (נכך). Other examples of common words in which Canaanitish and Assyrian agree against the S. Semitic (kiss); און (fool); און (mourn); און עבור (produce); און (body); יכור (guard); חכך (maintain), יכור (said to be a

(coup); TS (guard); TS (maintain). 52'n is said to be a Sumerian word, borrowed first by the Assyrians, and from them by the Canaanites. it.a the waw concersive. Most of the Assyrian chronicles exhibit only one tense, the Heb. imperfect. It would seem possible that the annalistic employment of this term in Hebrew was at first an imitation of the Assyrian, which then developed idiomatically.

3 bo to open the ear' (K. 95. 15 in S. A. Smith, KT Assurbanipals); ' to break in pieces like a potter's vessel' (Sargon, passim); 3? 310 for ' cheerfulness, "DT T 3" as an epithet of the Deity, etc. Many cases are collected by Karppe in his articles in the Journal Asiatique, ser. 9, vol. x.

f The phrase 'You occurs in the Tel el-Amarna tablets. In Budge's notes to 'Rabban Hormisd' some interesting illus-trations of this are given.

1 13% is Armenian, according to Lagarde (Ges. Abh. p. 8). A word that may possibly be Armenian is pry 'a stele' or 'monu-ment' (2 K 23<sup>17</sup>, Jer 31<sup>21</sup>, Ezk 39<sup>15</sup>), Arm. sius 'a pillar.' This is an old Armenian word = Greek zer with the proper changes. Legarde first thought ") (Hos 105 etc.) 'a priest,' borrowed from the Arm. khurm, but afterwards reversed his judgment. 7 'n 'a mole' is temptingly like Arm. Edowrd 'a mole,' which might seem a derivative of *klam* 'to pluck up,' 'root out'; but from Lagarde's Arm. Stud. it appears to have another derivation.

ק e.g. אל אל Jos 1944, perhaps Arab. illikd 'battle,' Koran, iii. 11, etc. Perhaps the form ובאל has preserved the tanasia.

grammatical form,\* exhibit traces of an older language than that known to us as Canaanitish. A considerable number of these names can be traced to the 15th cent. B.C., and even earlier, in Egyptian and Assyrian records. An un Semitic remnant there is, but its linguistic character is difficult to fix.

5. Progress of the Language. - The Tel el-Amarna tablets represent the country as settled in States, somewhat as we find it described in the Bk. of Joshua. The States in which Canaanitish was spoken must have acquired the language either prior to their separation, or posterior to it if that consisted in the hegemony of the community whose native language it was.

Dialectic differences developed as the Canaanites began to write, each dialect preserving something which the others discarded, † but also evolving peculiarities of its own. It would not, however, appear that the Canaanites down to a late period had any difficulty in understanding each other. Jeremiah (27<sup>3</sup>) expects his message to be understood by Edomites, Moabites, Ammonites, Tyrians, and Sidonians; and the tombstone of Eshmunazar contains phrases which seem to imply some acquaintance on that king's part with the Hebrew Scrip-tures.<sup>‡</sup> When David succeeded in welding together an Israelitish empire, it would seem that he took steps to make the language of Israel § (rather than that of Judah) official; and to the extent of the elements of grammar such as were taught in the schools the Israelitish language was thereafter uniform. These elements would, however, appear to have been exceedingly meagre. The scientific spirit would seem to have failed the ancient Israelites absolutely ; || and it is the same habit of mind which seeks to codify the order of nature and to find regularity in human speech. The Israelites could indeed distinguish and despise a foreign pronunciation, ¶ and set value on correct speech ; but it is improbable that their power of judging this matter went beyond questions of intonation and accent: throughout the OT there is scarcely a grammatical term to be found ; and though several of the writers have a fondness for etymologizing, ++ the cases in which modern scholars regard their efforts as successful are rare. The result of the want of grammatical training is apparent in even the most classical portions of the OT. Where the writers have to do with quite ordinary words and notions, their language is regular; but so soon as this region is left, it becomes tentative, and it is partly due to the variety of these experiments that the Hebrew grammars reach a bulk that is out of all proportion to the literature with which they have to deal. Thus, where the prophets have to address companies of *urmen*, we find no certainty about the grammatical terminations; Isaiah (32<sup>9-12</sup>) tries three different ways of forming the imperative to be employed in such a case; Ezekiel (13<sup>20-22</sup>) tries three ways of forming the pronominal suffix. The attempts made to form the infinitives of the conjugation Niphal, and indeed of all the derived conjugations, are very varied. Other curious Other curious

\* e.q. ראר לבין Jos 1948, דאר 2198

† So in a Citian inscription we find the pluperfect formed by apposition of 12 kdng as in classical Arabic; Heb. has neither the old substantive verb nor the construction.

t Compare especially line 12 with Is אישים ויברי לקפה וברי לקפה וברי קיעלה ; elsewhere the adverb used with שלי is הקת. אאר (ib.) in the sense of 'beauty' occurs Is 58<sup>3</sup>.  $v_1 \psi_1$  numbers is a favourite phrase with Koheleth, who, however, is probably later than the inscription. The commencement bears a curious likeness to Herekiah's hymn, Is 38<sup>16</sup>. § Cf. Winckler's Geachichte Israels. § Perhaps an exception should be made in favour of geography. ¶ Is 32<sup>4</sup> 33<sup>19</sup>. \*\* Heb. 13 "37 Jg 12<sup>6</sup>. †† Enk 20<sup>29</sup> is perhaps the most curious.

specimens of uncertainty as to the right form are to be found in Jos 6<sup>17. 25</sup>, Dt 2<sup>36</sup> 3<sup>7</sup>, Jer 51" etc.

The state in which the text of the OT has come down to us renders it difficult to speak positively on this matter; but perhaps the result of a comparison of the few duplicate texts which we possess is such as to show that philological considerations did not concern the editors and copyists who were also the authors of the historical texts. The alterations introduced merely through the absence of any idea of accuracy and without any religious or political interest, such as are to be observed in the parallel texts of Jos  $15^{15-19}$  and Jg  $1^{11-15}$ , Is  $2^{12}$ and Mic  $4^{1-3}$ , or Is 36-39 and 2 K 18-20, suggest the impossibility of basing a grammatical system on books so preserved; for it is clear that the copyist's licence extends so far as the substitution of only of comparison at least for ordinary idea not only of synonyms, at least for ordinary ideas, but of what to the copyist seemed optional grammatical forms for one another, this latter licence including not only orthography, but what seem to us most serious syntactical variations, resulting in what to the rigid grammarian might seem grave errors, though the general sense is not affected. It is unfortunate that the duplicate texts of Ps 14 and 53, Pa 18 and 2 S 22, and of the oracles common to Nu, Is, and Jer, in which the language is from the nature of the subject choice and obscure, reveal an amount of licence on the copyist's part that is far greater than what appears where the texts are easy. How much, therefore, that is abnormal in our text is due to the original authors and how much to the hands through which it has passed, cannot without fresh discovery of MSS be ascertained; but it seems likely that if there had been Hebrew grammarians as well as writing-masters in any pre-Christian century, the sphere of the optional in Hebrew grammar would have been reduced to narrower limits. There are forms in the existing text of the OT which might suggest vast surmises as to the extent to which a Palestinian could have observed the rules of Arabic grammar without being unintelligible.\*

Owing to the fact that the language was never fixed by organized study, the distinction of dialects and periods is hazardous; and the very different opinions that excellent scholars have held about the time and place to which portions of the OT belong, show that there is little definite to be said about these matters. We learn from Jg 12<sup>6</sup> that an Ephraimite could not pronounce the letter # correctly ; but it by no means follows that his writing would show any signs of this inability. Some scholars have attempted to distinguish two dialects in the OT, others three (North Palestinian, South Palestinian or Simeonic, and Jewish : so Böttcher, Learb. i. 15 ff.), but it may be doubted whether there is a single grammatical form which can with safety be said to belong to one dialect rather than another. If it be the case that revisers have introduced uniformity where there were previously marked differences, we cannot now get behind their work. It is, however, possible to note in several of the OT narratives peculiar words or usages which may have been characteristic of the tribes from which those narratives emanated, though the extent of the literature at our command does not justify us in asserting this positively. Thus  $\pi_1$ to (Jg 13<sup>6</sup>) may be Danite for 'razor' (Arab. mūsā), göt (Jg 11<sup>16</sup>) Gileadite for 'witness' (Eth. samā'i; cf. Pr 21<sup>26</sup>),  $\pi_3$  Manassite for 'to rule' (Jg 9<sup>13</sup>). Several other curious phrases occur in the history of

e.g. η<sup>1/2</sup>ρο Jer 15<sup>10</sup> (=mukallikü-ni, Schultens); ητο Job 4<sup>5</sup> (=minku); 15<sup>2</sup> ημητη. Apparently, the use of in and is to form the plural was optional, see Mic 3<sup>12</sup> quoted in Jer 25<sup>13</sup>. From Jer 25<sup>3</sup> and Ezk 14<sup>3</sup> it might seem that the preformative of the 4th and 7th conjugation might be pronounced #,

Gideon, and several in those of Ehud (Jg 315-29) and Samson (Jg 13-16); perhaps some of those in the last two narratives are not Israelitish at all, but Moabitic and Philistian ; and indeed in Jg 16<sup>26</sup> the form proviseems clearly intended to be Philistian, but is certainly not exclusively so. In the parts of the 2nd Bk. of Kings which treat of the northern kingdom, scholars have tried to detect much local phraseology; and the same has been tried with the prophecies of Hosea, Amos, and others. The general uniformity of the language renders the term 'dialect' inapplicable to these uninute nuances of stable bit is the same has a same has been the sam of style, which for the most part may be char-acteristic of individual writers rather than of

regions. The chief characteristics of the Israelitish dialect were probably fixed by the time of the consolidation of the united kingdom under David; and it is not prohable that from that time to the first captivity it altered very seriously. The comcaptivity it altered very seriously. The com-paratively settled state of the country being favourable to the growth of the arts and the development of professions, a certain number of words continued to accrue from foreign sources, chiefly Assyria \* and Egypt, but to some extent also India + and Greece, while old words were utilized to express new ideas or old roots to form utilized to express new ideas, or old roots to form fresh derivatives. In the case of the sacerdotal profession we can apparently trace the formation of a terminology on somewhat the same lines as that by which the terminology of Mohammedan tradition was afterwards formed. The inability of the language to form compounds somewhat limits the resources of the inventors of words; the same form has to do duty for 'to contaminate' and 'to declare impure,' the same for 'to explate' and 'to offer as an explatory sacrifice.' Lexicography is slightly more represented in the OT than grammar, albeit it is curious that in the one case where a technical term is defined at length (Dt  $15^2$ ) that term ( $\neg \varphi \varphi$ ) does not recur elsewhere. The wealth, however, of the old Arabic language seems to have been so great that the preservation rather than the invention of words was desirable.§

6. Periods.—With regard to the periods of the language of the OT it is generally agreed that the Bks. of Chronicles, Ezra, Nehemiah, Esther, Ecclesiastes, and Daniel display sufficient difference from the style of most of the remaining books to justify the application of some term like New Hebrew to the language in which they are com-posed. All these books have in common the

\* e.g. Ezk 1633 , Bab. nidit (Meissner, Babyl. Privatrecht,

p. 149); DD7, Assyr. isku (ib. 127); DC33 nikāsu, ib. † For India see Comm. on 2 K 1023. Lagarde (Ges. Abk., first Essay) suggests an Indian origin for [DH, CCC] (Ca 416), and ספיר.

t One of the early Babbis suggested that much in Gn 498 we the Greek word  $\mu_{2,ense}$  (R. Eleasar quotied in Levy, NHWB, iii. 116). The identification is tempting, as the word is exceed-ingly obscure; but it is not certainly right. One other pre-exilic word  $\psi_{2,2}^{+}$  is certainly identical with the Greek  $w=\lambda \lambda e_{min}$ (known to Homer); it is un-Semitic in form, and would seem to below to a monogeneous computity. and would seem to belong to a monogamous community; and can be derived without much difficulty from Greek roots. The word 787 (Ex 2018 etc.) seems to be a contraction of the Aram. לְמָצִיך, which in its For an scarcely be a both ratio of the Main  $\pm 2\phi$ , which in the has no Semitic affinities, and means 'a meteoric light,' which is the very sense the word has in old Greek writers (*a.g. Kachylus*, *Choéph. 590*, *haparáðas staðasa*, mentioned among physical terrors). How this word got into Hebrew and Aramaic seems a mystery. TH of 2 K 990 etc. seems to be the Greek  $e^{\pi x x}$ , and is In section is a section of the section of the detection, and a certainly identical with Las. Fucus; but the meaning of the Greek words is easily intelligible, but very few can be detected with certainty.  $\Pi^{+}_{+}$  of 2 Ch 2<sup>10</sup> [Eng.<sup>10</sup>] has a Greek appearance, but cannot be identified ; אפריק of Ca 39 is in the same case. The identification of לְשָׁקָה with גוורא has

found little favour. § See the collection in Freytag's Einleitung ins Studium der Arab. Spracks.

employment of Persian \* or Aramaic + words for ideas which the older Hebrew was quite equal to expressing, as well as for ideas which perhaps were not known to the older Hebrews; and Ecclesiastes in particular is marked by the intro-duction of several particles ; which seem foreign to the older language, and which seem to imply that the writer had been schooled in some very different vehicle of expression. These particles were in-herited by the post-biblical literature, with some otherwise and the schooled in some very different others which are probably as old as Koheleth, though not employed by him. Whether some of his turns of expression were suggested by the necessity of translating from the Greek cannot at present be determined; this ingenious writer has every appearance of being a great innovator in language, and indeed seems to say so  $(12^{\circ})$ . Esther shares with Ecclesiastes some of the new particles, and from the nature of its subject-matter exhibits the Persian element very markedly. The Hebrew of Dn, though marked by conscious imitation of 'the Bible'  $(9^2)$ , which is not always, perhaps, felicitous (10<sup>16</sup> compared with Is 21<sup>3</sup>), lapses occasionally into phrases that are characteristic of the very latest style, § and also has some Syriasms that are peculiar to itself. I The language of the four remaining books is practically the same, although the Persian element is less apparent in Ch, which, on the other hand, exhibit grammatical formations which seem Mishnic ¶ rather than biblical, and Syriac ' rather than Hebrew

Were more of the historical parts of the Apocrypha preserved in their original language, it is probable that it would chiefly differ from this New Hebrew in the introduction of Greek words, such as are found in great numbers in the Mishna, but the occurrence of which in the later Hebrew of the OT as a characteristic of lateness seems doubtful. If the Bk. of Ruth belongs to the early part of this period, its author has kept it free from the most characteristic phrases of the New Hebrew, while employing several expressions which, though isolated, appear to be antique.

It is certain that a considerable portion of the rest of the OT was already known to the writers of these works and constituted their classical literature; and of this collection the largest arount that can be assigned to a single period with certainty consists of the Bks. of Jeremiah, Ezekiel, and Deuteronomy, the genuineness of the greater portion of the first two being ordinarily admitted, while there seem cogent reasons for assigning the fifth book of the Pentateuch to about the same epoch. This may therefore be called the 'classical' period of the language, though the portions of Isaiah which belong to the close of the Exile seem to surpass them in brilliancy. All these books show signs of literary ambition : ' Isaiah' clains, with justice, the possession of a scholar's tongue (50<sup>4</sup>); Jeremiah is conscious of the effects of his oratory (23<sup>26</sup>), and dictates for a reading public (36<sup>-3</sup>); many chapters of Ezk reveal study and preparation; the value which bt claims, for its 'words' could scarcely be more strongly

\* אָאָנָד for דָּקָט for דָּקָט Ear and Est; אָאָנָד אָאָנָד for אָאָנָד קר פֿאָט אָאָנָד (perhaps Assyrian rather than Persian) for סָסָר (2 K 5<sup>3</sup>) Neh, Est, and Ch; אָרָד פָרָשָׁנָן for קרָאָנָד for Ear and Est.

\*\* גירניות 2 Ch 1712 seems to be a Syriac diminutive.

expressed than in  $6^{4-10}$ . These writers inherited some prophetic phraseology from earlier prophets (Jer 23<sup>31</sup>, where a verb 'to në'um' is coined, meaning to use the characteristic phrase of the prophets), and, indeed, some prophetic commonplace (so Jer  $25^{40}$  seems to give the traditional proem to a prophecy, the words recurring from Am 1<sup>\*</sup> and J1 4<sup>10</sup>; but it is probable that in the main their language represents that of the ruling and official class at Jerusalem in its last century of independence. It is not unnatural that there should be a group of words and phrases which are peculiar to Dt and Jer, and another group peculiar to Jer and Ezk.

Jer, and another group peculiar to Jer and Ezk. The greater portion of the OT, however, does not consist of works produced by single individuals, embodying their ideas in their own language, but of the work of schools or societies, who compiled, abridged, and edited. The main streams have perhaps been separated by critics with success; but each of these main streams is made up of a variety of smaller rills, so to speak, which cannot be localized. Owing to the variety of the documents, written and oral, poetical and prose, which are utilized in one place or other of the series which extends from Gn to 2 K, we have a great variety of idioms exemplified, of which only in rare cases we can define either the time or the locality. The only cases which deserve much attention are, of course, those for which the ordinary language has In the Bk. of Leviticus a word (n'og) is synonyms. used eleven times for 'neighbour' which may be said to occur nowhere else; this must clearly be indica-tive of dialect, but it is not known which. In the 'law of the slave' ( $\mathbb{E} \times 21^{1-12}$ ), a phrase ( $\mathbb{E}_{22}$ ) for 'by himself' occurs three times which is not known elsewhere. In the episode of Essu (Gn 27) words occur for such common notions as ' to touch ( $\sigma$  c), 'to plot' ( $\sigma$  c), 'a quiver' ( $\pi$ ), 'a deceiver' ( $\sigma$ ), 'a superior' ( $\tau$ ), 'which occur nowhere else. All of these would seem to be dialectic; and the last, which is the masculine of a word that and the last, which is the masculne of a word that oecurs frequently in the feminine, is certainly so. The story of Joseph (Gn 37-50) has a whole vocabulary of its own; as dialectic there may be characterized the words for 'just' ( $|z\rangle$ ), 'sack' (nonow), 'restore to his place' ( $|z\rangle$ ), 'sack' ( $|z\rangle$ ), 'restore to his place' ( $|z\rangle$ ), 'sack' ( $|z\rangle$ ). The word for 'just,' which occurs five times in this narrative, but for which in the same sense we have to go to Swine authors, must cortainly we have to go to Syriac authors, must certainly have met us elsewhere in the OT, if we possessed other documents of the same place and the same time as those to which the original story of Joseph belonged. Although many of the expressions which the documents employed by the compilers contain must have been as unintelligible to them as they are to us, the cases in which they endeavour to interpret or to emend them are rare. A case of an emendation occurs in Jg  $3^{23}$ . 23, but both alternatives are obscure to us. In 1 S  $9^{10}$  attention is called to the ancient import of a word, and in Gn 14<sup>14</sup> a hard word is glossed, but in neither case is the ancient philology unequivocally confirmed by modern. Where we have parallel narratives (as in Gn 15<sup>2, 3</sup>, Dt 1<sup>41</sup>, and Nu 14<sup>44</sup>) we can sometimes trace the remains of ancient interpretations of The reason that these glosses are so difficulties. few is probably to be found in the fact that with the Hebrews as with the Arabs a book is rather the possession of an individual or a family (Dt 31<sup>25</sup>) than of the public; the skeleton writing almost necessitates an authorized exponent. A second reason is probably to be found in the tendency to abridge, which has reduced the Israelitish literature

to so small a compass. Whether it is possible to obtain any fixed linguistic epochs in the classical and ante-classical literature seems exceedingly doubtful. It is indeed possible to tell Aramaisms by phonetic rules; but

as Aramaisms meet us in very early literature, -e.g. one of the characteristic words in the story of Jephthah is an Aramaism, a word which occurs also in Deborah's song, "-no argument as to date can be drawn from their occurrence, except when they belong to the classes already noticed. From the fact that the Canaanitish and Aramaic peoples have the same modification of the old Arabic alphabet, which they, indeed, subsequently developed somewhat differently, —from the fact that the oldest Aramaic most resembles Canaanitish, and that one of the oldest Canaanitish inscriptions which we possess contains an Aramaic word, † it would seem that the two nations though speaking different languages migrated simultaneously, and, until the final extinction of Canaanitish, did not cease borrowing from each other's vocabulary. We should obtain more fixed points from the internal growth of the language, if the literature were sufficiently large to enable us to name with precision the inventors of words; but this we are not able to do. Most of the passages that might seem of use for the history of particular words, turn out not to be so. In Jer 23<sup>25</sup> the use of the word massā for 'oracle' is emphatically forbidden; but we find it employed nevertheless by authors far later than Jeremiah (Mal 1<sup>1</sup>). The words of Dt 24<sup>8</sup> seem to imply the existence in some form of the technical rules of Lv 13 and 14, but it is impossible to say how many of the terms there employed existed in the time of the Deuteronomist. A very little of the sacerdotal terminology can be traced back to those ancient times before the Canaanites separated into nations, t but for the origin of most of it we have no data. The poetical books have been left out of the

The poetical books have been left out of the above considerations, because choice and archaic language is characteristic of the poetry of all nations, and the widely divergent dates assigned by the best scholars to various psalms show the difficulty that is felt in distinguishing the really archaic from affected archaism. The five poetical books of the OT would seem to have emanated from different schools, and the *Psalms* and *Proverbs* probably also contain materials collected from very different ages. That they emanated from schools is shown by the predominance in each of a peculiar vocabulary, which in the case of the Psalms would seem to have been inherited by the authors of the much later Psalms of Solomon. The obscurity and rarity of the expressions is in other cases no clue to the date of the Psalms, for some of the least intelligible phrases are found in compositions which are agreed to be exceedingly late.§ The Proverbs are remarkable as professing to embody the compositions of non-Israelites, but the chapters in which these are collected may perhaps have been translated, as indeed the text of Pr 25<sup>1</sup> implies that the proverbs of Solomon were. The nature of the collection prevents it from preserving much of the popular language, as the proverbs of most nations do, and as a collection of sayings current among the Israelites, such as those to which the prophets occasionally refer (cf. Jer 23<sup>or</sup> 31<sup>or</sup>, Ex 11<sup>1</sup>), would undoubtedly have done. But these exhibit the re-

• U7. Moore in his valuable commentary says such an Aramaism is impossible in Old Hebrew; but is not this a 'Machtgruch'? Similarly, Dilmann triestoexplainawa; D'77 in Gn 426. J73 of 2 S 1711, 77; of Jer 206, are also Aramaic. If the form *kattal* be everywhere Aramaic, as it seems to be, it would be certainly free from Aramaism (see Hos 86, 1 S 15. 19). Another striking case of a word known only from the Aramaic is '39.785 in Hezekiah's ode (Is 3816).

f ngwn in the paters of Baal Lebanon.

t e.g. כליל, שלה, כליל (at any rate the verb). כליל שלם would seem to have been borrowed by the Egyptians, whence the Copt. chil.

i See e.g. Pas 74. 80. VOL. 111.-3 mains of a somewhat developed philosophical, or perhaps we may say mystic vocabulary, and are marked by the further recurrence of several phrases, which, though not technical, seem to have been employed only in the school of the writers.\* The Book of Job, which is ostensibly non-Israelitish throughout, is probably, from a linguistic point of view, the most remarkable in the OT, though to what extent (if at all) it contains non-Israelitish materials cannot with the present evidence be determined. Choice and obsolete phrases seem to be paraded here, as in the artificial poetry of the Arabs; but the commentary which may originally have accompanied them has not been handed down. Modern criticism is inclined to ascribe this book to a series of writers; but if so, they must have had access to the same sort of literature, for even a portion of such doubtful authenticity as the Elihu speeches differs from the rest, not so much in the quality of the language as in the quantity of obscure and striking expressions, many of which can here be interpreted (like those in the rest of the book) from the Arabic and Aramaic languages. It is probable that the *Canticles* preserve more of the popular style than any other portion of the OT poetry. The matter is such that the employment of a rustic dialect lends it a special charm; but the dialect cannot any more than the others be located. The language of the Lamentations has some peculiarities of its own, but also has much in common with that of the Psalms.+

The separation of the sources and the fixing of the dates of the pieces composing the OT has been attempted with varying success by modern critics. Neither the earliest nor the latest verse in the OT can be named with certainty, but there is probably none either earlier than 1100, or later than 100 B.C. That the earliest fragments were in verse must not be hastily assumed, since the Oriental peoples employ verse not only to commemorate, but also to glorify the past; t and, owing to the considerations that have already been urged, the verses which are occasionally quoted in the older historical books in connexion with particular events must, until further discoveries of literature, be located rather by religious and political than by linguistic data.

by religious and political than by linguistic data. The continuity of the Hebrew language would seem to have been finally snapped with the taking of Jerusalem by the Romans ; circumstances having forced the survivors of that catastrophe to adopt some other idiom for the ordinary needs of life, though it has not ceased to carry on a sort of existence to this day, partly as a learned language, partly as a vehicle of communication for members of the Jewish community throughout the world. The commencement of its decay is no doubt to be dated from the time when acquaintance with another language was necessary for high offices of State; and this would seem to have been the case in Hezekiah's time (Is 36<sup>n</sup>), and was probably the case earlier. During the first exile and after it, acquaintance with some other language was requisite, not only for the official, but for the ordinary householder; and though Nehemiah busied himself with the maintenance of the Jewish language in its purity (13<sup>216</sup>.), his own style gives us no exalted notion of his standard in that matter. The question, however, of the precise epoch at which Hebrew ceased to be a living language is fraught with considerable difficulty, owing to the dearth of materials for settling it. Josephus, who survived the Fall of Jerusalem, says (BJ, Preface,

\* e.g. פרע 'to despise,' פרע for 'a witness' התנלע.

b Diver's Introduction to the Literature of the OT contains important observations on the usage of the different writers. Thus the author of the historical manual Al-Fakhri (circ. 1250) quotes the verses of the poet at Al-Radi (circ. 1000) on Omar II. (cb. 720).

§ 1), that being a Hebrew, he had written a history of the war in his native language; but when he proceeds to state that the whole East, down to the remotest of the Arabs, had access to that work, such a description applies better to Aramaic than to Hebrew. The passages in the writings of the Rabbis which bear on this question are too late to give trustworthy information.\*

7. Biblical Aramaic. - The earliest Aramaic documents which we possess are the inscriptions first published by E. Sachau in the Collections of the Berlin Museum for 1893, which certify the existence of a written Aramaic language for the early part of the 8th cent. B.C., or earlier, just as the inscriptions on weights and indorsements on Assyrian contracts, collected in the second volume of the CIS, certify it for the latter half of the 8th cent. and later. The opinion of M. Maspero, (*l.c.*) that evidence for the existence of the Aramaic language is to be found in far earlier Egyptian documents, is now accepted by Egyptologists. As has already been observed, the oldest Aramaic is without a number of the characteristics that serve to distinguish the later language from Canaanitish; but it seems possible that this phenomenon is in part due to the influence of the Canaanitish orthography, since the Aramaic representation of the letters th and dh does not seem derivable from the Canaanitish and old Aramaic sh and z, whereas it is easily derivable from those letters themselves. In grammar this language shows some striking affinity with the S. Arabian dialect Sabæan; but in vocabulary the earliest Aramaic seems to agree remarkably with Canaanitish, and though several words which are ordinary in Aramaic only figure in poetical language in Heb., this is what is frequently found in the case of kindred nations.

The area within which the Aramaic language was employed seems even in Babylonian times to have been very great; we have Aramaic inscrip-tions and papyri found in Syria, Babylonia, Egypt, and Arabia, which there are good grounds for regarding as earlier than Cyrus. Its employment even in the 8th cent. B.C. as a diplomatic language (Is 3611) implies an Aramaic hegemony either in politics or literature of some previous century; for it seems clear that the only languages ever em-ployed in this way are such as have for one of these reasons become important to members of many nationalities. The Aramaic verse in Jer many nationalities. The Aramaic verse in Jer  $(10^{11})$  is shown by the form of the word 'earth,' and the termination of the word 'shall perish,' to belong to the earliest form of Aramaic of which we have cognizance; but the fact that the ordinary Aramaic for 'earth' occurs in the second half of the verse shows that no confidence can be placed in the tradition, and it is highly probable that the old Aramaic forms should be restored throughout. The influence of Assyrian on the old Aramaic was very considerable in matters affecting vocabularysuch as to leave a permanent mark on the language: but on the grammar and syntax it would seem to have had either less effect or a different effect from that which it exercised on Canaanitish. The accession of the Persians to world-empire seems to have again largely affected the Aramaic vocabulary; and the documents in Ezra which belong to the Persian period bear witness to the influx of Persian words, which, if these documents are genuine, the language must almost at the commencement of that period have undergone. The idiom of these documents agrees remarkably with that of the papyri edited in CIS (ii. Nos. 145 ff.), which some scholars have suspected of Jewish origin. The Aramaic parts of Daniel are char-

<sup>•</sup> Weiss in his Studien zur Mischnahsprache (in Hebrew), collects some passages which, though of interest, lead to no definite conclusion.

# LANGUAGE OF THE OLD TEST.

acterized by a distinctly more modern idiom than that of Ezra; and, indeed, contain such decidedly Hebrew constructions that it is evident that either their author thought in that language, or they represent a translation from it. Of the Aramaic represent a translation from it. Of the Aramate inscriptions which have been discovered, perhaps those of Palmyra approach most closely to the language of Daniel. The language has begun to assimilate Greek words, but there is as yet no regular system of transliteration. The language is rigidly distinguished from the later Christian Aramate by the preservation of the old passive forms by the fact that the emphatic form still has forms, by the fact that the emphatic form still has the force of the definite article, as well as by The later Jewish Aramaic, while in some of these matters it has developed uniformly with the Christian dialect of Edessa, in others has retained the older forms, and in vocabulary differs widely from all Christian dialects, save that known as Palestinian Syriac. Unlike the language of Canaan, Aramaic held its ground during the integrity of the Roman Empire in the East, developing a variety of dialects and of scripts, and, though ousted in the seventh and succeeding centuries by Arabic, it has dill concentration of the dialect of the it has still representatives in the dialect of the Christians of Mesopotamia, which the missionaries Stoddart, and, more recently, Macleane, have endeavoured to provide with grammar and vocabulary, and in some other less known dialects.

aries Stoddart, and, more recently, Macleane, have endeavoured to provide with grammar and vocabulary, and in some other less known dialecus.
 LITERATURE.—The history of the earliest grammatical studies in Hebrew is sketched by W. Bacher, 'die Anfange der Heb. Grammatik, 'in ZDMG xitz. 1-62 and 334-992; for the few notices of grammar to be found in the Talmuda see further A. Berliner, Beiträge zur Heb. Grammatik im Talmud n. Midrasch, Berl. 1879. Bacher's papers carry the history of Hebrew grammar and lexicography down to the end of the 10th cent.; while the invention of the vowel-points is connected with the labours of the Massoretes, the first actual author of a grammatical tratise was the Gaon Saady a (ob. 941), whose work, however, exists only in quotations; to the 10th cent. belong the Kisada of Jehudah Ibn Koraish, ed. Barges and Goldberg, Paris, 1842, the Mahlereth or dictionary of Menahem Ibn Saruk (ed. H. Filpowski, Lond. 1854; see also Siegmund Gross, Menahem B. Labrat (ed. R. Schroter, Breslau, 1867); to the 11th cent. the 'Book of Hebrew Roots' of R. Jonah, called Abu' « Raid Mervan (ed. by A. Neubauer, Oxford, 1875, cf. Neubauer, 'Notice sur la lexicographie Hebralque, in Journ. Asiat. 1881), and his grammar, called Harrimah (ed. Goldberg, Frankf. 1866). See further for this early period Ewald u. Dukes, Beiträge zur Geschichte der ältesten Aualgung u.s.u. des A. Testanentes, Stuttgart, 1844. We are brought nearer to modern times by the works of Abraham Ibn Erza Mora e Takon hakodeah (ed. Heidenheim, Offenbach, 1791), Sefer Sahuth (ed. Lippmann, Fürth, 1837); and Safah Brurah (ed. Lippmann, Furth, 1839); see also Bacher, Abraham Ibn Erza als Grammatiker. Strassburg, 1881. To the same century belongs the lexicon as Jostorn (Jase). Statemon, 1160 (ed. S. G. Stern, Pressburg, 1841; off. M. Weiner, Farchon als Grammatiker. Were also the forther and sectory period. Statemon, 1160 (ed. S. G. Stern, Pressburg, 1841; off. M. Weiner, Farchon als Grammatiker. Mersalu, 1962. State Stat

Syntas (London, 1890); and Wickes' Treatises on Hebrew Accentuation (UXford, 1831-1837), are of great importance. Lexicography is mainly represented by various editions of the dictionaries of Gesenius (Handwörterbuch, Leipzig, 1810, 13th ed. by Buhl, 1899; new edition by Brown, Briggs, and Driver in course of publication; Thesaurus, 1835-1859, finished by R. Rödiger); while these can be supplemented by the Con-cordances, of which that by Mandelkern, Leipzig, 1896, is the newest and fullest. The grammar of the Aramaic parts of the OT has been treated most recently by K. Mart in Fetermann's series, Leipzig, 1896, and H. Strack, Leipzig, 1896. Some of the more important monographs on special questions have been noticed above; but the various journals devoted to the study of the OT, e.g. the American Hebraics and the German ZATW, as well as those devoted to Jewish literature and to Oriental study, contain more articles of importance than can be noticed here-1899. D. S. MARGOLIOUTH.

LANGUAGE OF THE APOCRYPHA.-The Apocrypha may with fair accuracy be described as a collection of works emanating from Jewish communities in the period between the close of the OT Canon and the commencement of that of the NT. Most of these books seem to have been composed in Hebrew, a few in Aramaic, and the rest in Greek; but as they were preserved in the Christian community, the Hebrew and Aramaic originals were at an early time lost or neglected, and their place taken by Greek translations; and in the case of some, which never acquired lasting authority, the Greek translation itself has been lost, and the work preserved, if at all, in secondary versions. This has occurred in the case of the Books of Enoch and of Jubilees, which are known chiefly through Ethiopic versions ; while the Fourth Book of Ezra, the Apocalypse of Baruch, and the Assumption of Moses, are known in secondary translations, — in the first case in a variety of languages, in the second in Syriac, and in the third in Latin. Books 2 and following of Maccabees are known to have been written in the language in which we possess them (Greek); and the same is probably the case with the Epistle of Jeremy; but the remaining books would seem to be all translations, though it is not always easy to distinguish Hellenistic Greek from translated Hebrew. The most ambitious in point of style is the Wisdom of Solomon, which few even now regard as a translation; yet the proof that it is one is difficult translation; yet the proof that it is one is diminit to elude; for  $14^{10}$  for that which is made shall be punished together with him that made it' is clearly a *mistranslation* of a sentence that is quoted in the Midrash on Gn 48 (*Rabba*, § 96) cro shipped,' the translator's mistake being due to his giving the verb 'y its Aramaic sense 'to do or make,' whereas the author used it in its Hebrew make,' whereas the author used it in its Hebrew sense 'to worship.' It may be added that the Greek of this verse ( $\tau \delta \pi \rho \alpha \chi \theta^{2} r \tau \psi$   $\delta \rho \delta \sigma \sigma r \tau c$   $\kappa \delta \lambda \sigma \theta \theta \sigma \sigma r \alpha i)$ , which really means 'that which has been done shall be punished together with him that did it,' shows signs of mistranslation that could have been detected without the aid of the original. It is, however, certain that the translator's object was rather to provide a masterpiece of Greek rhetoric than to reproduce his original faithfully; and in the absence of materials it seems impossible to fix with precision the limits of the work translated, or the character of the original language, which must in any case have shown signs of Greek influence.

That the book called Ecclesiasticus or the Wisdom or the Proverbs of Jesus Ben-Sira was originally written in Hebrew we know from the statement of the Greek translator in his preface; but the date of the disappearance of the original is a natter of obcourity. Jerome professes to have seen it. The writings of the earlier Rabbis contain a certain number of quotations from it, which are collected by Cowley and Neubauer (A portion of the Orig. Hebrew of Ecclus., Oxford, 1896); this collection,

# LANGUAGE OF THE APOCRYPHA 35

however, requires considerable reduction. The reason for its disappearance is doubtless to be found in the passage in the Gemara of B. San-hedrin (f. 100b), in which it is asserted that a Jew would risk his eternal salvation by reading it ; the passages, however, which are cited there both for and against this opinion, seem very inadequate for either purpose. From these quotations we should gather that the author used a language similar to that of the Mishnic authors, i.e. a highly developed New Hebrew; and this there seems no reason to doubt, though it is likely that the quotations are not scrupulously accurate. In an essay by the present writer, published in 1890, reasons were brought forward for thinking that many of the differences between the Greek and the Syriac versions, both of which were made from the original, could be solved by the assumption that the writer used New Hebrew words; and that the writer used a nine-syllable metre, of which the base was a foot called in Greek Bacchic, consisting of a short, a long, and a short: the middle syllable being invariably long, whereas the others were common. Ben Sira, however, professes to be in the main a compiler from the OT (24<sup>20</sup>), which he doubtless imitated constantly; but in this he is doing himself an injustice.

In 1896 a leaf was brought over from Cairo containing a portion of Ecclus. in Hebrew, followed by the discovery of other portions, published in the work mentioned above, while yet other portions, await publication." The present writer has shown grounds (*The Origin of the Orig. Heb. of Ecclus.*, Oxford, 1899) for thinking this Hebrew a retranslation made in the 11th or 12th cent. A.D., partly from the Syriac and partly from a Persian version of the Greek.+

The remaining poetical book in this series, the Psalms of Solomon, would seem to have been ren-dered into Greek by a specially skilful hand : had we the original, it is probable that it would reveal little difference in expression from many Psalms in the Psalter ascribed to David.

Of the post-biblical historical writing of the Jews occasional fragments are to be found in the Talmud, e.g. B. Kiddushin, f. 66a. The old forms are still retained, though the writer introduces without scruple vulgarisms of his own age. It is probable that the historical portions of the Apocrypha were in a style similar to this, but of course we cannot be sure. The Book of Judith is known to have been written in Hebrew from 3, where the word 'saw' evidently is a mistranslation of a Hebrew word saw evidently is a mistransa-tion of a Hebrew word signifying 'plain' (Dword); the statement of Jerome that Chaldee was the original language of the book, must therefore be regarded as inaccurate. Attempts that have been made to find mistranslations from the Hebrew in the other books, e.g. in Tobit by F. Rosenthal (Vier Apocryphische Bücher, 1885), and in 1 Mac by the same scholar (das erste Makkabüerbuch, 1867, p. 6) seem to have produced no convincing result. The title of the latter, which is handed down by Origen, sarbeth sarbane 'historiæ historiolarum' seems certainly Aramaic, and indeed Syriac (*Thes*, Guessi 1992) and indeed strike and indeed strike the sarbane is the sarbane in the sarbane is a strike the sarbane is Syr. col. 4323. 4), and it is unlikely that a Hebrew book would have a title of this sort.

The prophetic and apocalyptic style is repre-sented by works ascribed to Baruch, Ezra, and others. The Book of Baruch consists very largely of phrases taken from the OT, and hence the elaborate reconstruction of the original by Kneucker (Leipzig, 1879) probably gives a correct idea of the author's style. In the Apocalypse of Baruch some

\* See now Wisdom of Ben Sira, by Schechter and Taylor, Camb., 1899; and G. Margoliouth in JQR, Oct. 1899, † See König and Margoliouth in ZQR, Oct. 1899, and foll. months; also Smend in TAL, Sept. 1899; Levi in RBJ, Ap.-June 1899; and Bacher in JQR, Oct. 1899.

relics of the original Hebrew can, it has been thought (R. H. Charles in his edition, pp. xliv-liii) be discerned in errors of the translation; and the same is said to be the case with the Assumption of Moses (R. H. Charles in his edition, pp. xxxixxlv). Too little of the original language can in any case be recovered to enable us to speak with certainty of its character.

#### D. S. MARGOLIOUTH.

LANGUAGE OF THE NEW TESTAMENT .--- The subject of this article is the species of Greek in which our canonical NT Scriptures are written.

A person familiar with Attic Greek, who should take in hand for the first time a Greek NT, could not fail to be struck by its peculiar idiom. Apart from traits which distinguish one portion of the volume from another (see V. p. 41 below), the language in general would seem strange to him—by reason of the admixture of popular, not to say plebeian, terms in its vocabulary; by its occasional outlandish and hardly intelligible phrases and constructions; by the meagre use of the connectives and other particles by which the earlier writers give balance, shading, and point to their periods; by the comparative avoidance or irregular use of the genitive absolute, attraction, and other syntactical devices for securing compactness and gradation in the presentation of thought; and throughout by a style which, though often monotonous, is conspicuous for its directness and simplicity; a style which, while it shows occasionally the digressions and broken or anacoluthic sentences characteristic of colloquial and uneducated utterance, is seldom encumbered with parentheses or protracted and entangled periods; a style obviously the expression of men too simple, self-forgetful, and earnest to pay much heed to literary elegancies or the established rules of the rhetorician.

Before considering in detail the characteristics of this variety of Greek, thus distinctly marked in vocabulary, construction, and style, we must notice

briefly its name, its origin, and its history. (a) Name. — Some of the names proposed for this peculiar idiom are evidently too restricted in their reference, as respects time or place or both (as, 'the ecclesiastical dialect,' 'the Alexandrian dialect,' 'Palestinian Greek'). Others, like 'Jewish Greek,' 'Jewish-Christian Greek,' though intrin-sically appropriate, have failed to gain currency. But the appopriate, have failed to gain currency. But the appellation 'Hellenistic Greek,' first suggested apparently by the younger Scaliger, is now almost universally accepted. Protests on the ground that this name not only fails to indicate in what direction the language deviates from ordinary Greek (and consequently is less descriptive than 'Hebraic' or 'Aramaic Greek' would be), but is also inherently tautological or meaningless, because tantamount to 'Greekish Greek,' are powerless to dislodge it. Its adoption has been favoured, doubtless, by the use of 'EAAmort's in Ac ( $6^{1}$  9<sup>20</sup> 11<sup>20</sup> var. *lec.*) as the designation of grecizing or Greek-speaking Jews. The applica-tion of the term 'dialect' to the Gr. of a particular locality and period is infelicitous, since that term has already been appropriated by the idiom of the several branches of the Greek race.

(b) Origin.—The literary supremacy of Athens (c. B.C. 500-B.C. 300) had caused her dialect, the (c. B.C. 500-B.C. 300) had caused her dialect, the Attic, gradually to supplant the forms of the language used by the other families of the Gr. race; and the diffusion of Greek was much furthered through the conquest and colonization of the East by Alexander the Great and his suc-cessors. In this process of diffusion, however, the Attic dialect itself was modified by the speech and usages of the nations among which it spread, till at length there arose a cosmopolitan type of Greek

### LANGUAGE OF THE NEW TEST.

known as the 'Common Dialect' (ή κοινή, sc. διάλε-KTOS), & prominent abode of which for two centuries or more before the Christian era was the empire of the Ptolemies and their capital Alexandria. Here dwelt myriads of expatriated Jews, to whom in time their native or ancestral tongue became so unfamiliar that a Gr. translation of their sacred books was prepared to meet their needs (approxi-mately between B.C. 285 and B.C. 150; see SKPTUA-GINT). To this version much of the reverence felt for the Heb. originals was soon transferred, and its common use by all Jews resident outside of Pales-tine did much to fix and perpetuate the type of Greek it represents. That Greek, after undergoing the modifications resulting inevitably from the use of separated localities and intervening generations, furnished the vehicle by which the revelation of God through Jesus Christ was given to the world.

Its origin discloses its fitness for its providential office. It embodied the lofty conceptions of the Heb. and Christian faith in a language which brought them home to men's business and bosoms. It was an idiom capable of such use as not to forfeit the respect of the cultivated (see, for example, Ac  $17^{226}$ ,  $26^{345}$ .); yet, in substance, it was the language of everyday life, and hence fitted for the dissemination of the gospel by preaching wherever Greek was spoken. It differs evidently from the language of writers like Philo and Josephus, who, though of Heb. extraction. addressed themselves to the educated classes and aspired after idiomatic elegance of expression. It occupies apparently an intermediate position be-tween the vulgarisms of the populace and the studied style of the litterateurs of the period. It affords a striking illustration of the divine policy in putting honour on what man calls 'common.

(c) History.-The true nature, however, of this noteworthy idiom was for a time in certain quarters unrecognized. This is surprising in view of the deviations from the classic standard which stare one in the face from every page of the NT. Moreover, the educated man among the apostles frankly confesses his lack of the graces of classic diction (1 Co reases in a lack of the graces of classic diction [1 Co  $2^{1.6}$  1<sup>17</sup>, 2 Co 11<sup>6</sup>); and competent judges of Greek among the early Christians, such as Origen (c. Cels. vii. 59 f., Philocaliz, iv., ed. Robinson, p. 41 f.) and Chrysostom (Hom. 3 on 1 Co 1<sup>17</sup>), not only are forward to acknowledge the literary inferiority of the biblical language, but find evidence in that fact both of the divine condescension to the lowly and of the surpassing dignity of the contents of revelation in that, though destitute of the charms of polite literature, it could yet command the alle-giance of the cultivated. Leading scholars of the Reformation period also (Erasmus, Luther, Melan-chthon, Beza) held in the main the same correct opinion. But early in the 17th cent. this opinion encountered emphatic dissent, which led to a dis-cussion (known as the 'Purist Controversy') which was protracted for more than a century, and con-ducted at times with no little heat. The heat was largely due to the circumstance that these who denied the classic purity of NT Greek were thought by their opponents to dishonour the divine author of the book. But if these over-zealous champions of the divine honour had had their way, they would have disproved the claim of the volume to be the production of Greek-speaking Jews of the 1st cent., and have nullified the philological evidence it affords that, at that epoch, there entered a new and transforming energy into the realm of human thought. We see the foolishness of God to be wiser than men. (A full bibliography of this instructive controversy, with a critical estimate of the arguments advanced on both sides, is given in Schmiedel's Winer, § 2). The peculiarities of the NT language will be

most conveniently exhibited in connexion with the several elements entering into its composition, viz.-

I. The later or 'Common' spoken Greek. II. The Hebrew or spoken Aramaic. III. The Latin and other foreign tongues. IV. The religious or distinctively Christian element. To the consideration of these will be subjoined— V. A summary view of the peculiarities of Individual Writers. VI. Some of the linguistic Problems in the NT, with the aids to their solution. VII. A glance at the Bibliography of the subject. The membraiding regularities the first formulation may be

The peculiarities noticed in the first four divisions may be classified as (A) Lexical, and (B) Grammatical :--The former comprising-a. New Words and b. New Meanings; the latter, a. Peculiarities of Form, and b. Peculiarities of Construction or Syntax.

At the outset it should be noted that not a little uncertainty still exists with regard to many points of detail; and the limits of the present exposition will restrict for the most part the examples and specifications given to a few representative particulara.

I. THE 'COMMON' OR SPOKEN GREEK.--(A) In its Lexical relations :- a. New words. A few of the NT words commonly reckoned as belonging to later Greek are the following:-

έβαρής, άγαλλιάομαι, άγνύημα, άδηλότης, έθεσμος, άθετέω, άκαιρέομαι, ακατάλυτος, άκατάπαυστος, άλεκτορο φωνία, άλληγορέω, άμετάθετος, άμετανόητος, άνάδειξις, άναθεωρέω, άναντίρρητος, άναπολόγητος, άνάχυσις, άντι-διατίθημι, άντοφθαλμέω, άνυπότακτος, άπαράβατος, άπελπίζω, άπερισπάστως, άποθησαυρίζω, άποκαραδοκία, άπο-κεφαλίζω, άπρόσιτος, άστοχέω, άτενίζω, βραβεΐον, γογγύζω, γονυπετέω, δεισιδαιμονία, διαγνωρίζω, διαγρηγορέω, διαυγάζω, διαφημίζω, διερμηνεύω, διθάλασσος, διοδεύω, δίψιχος, δουλαγωγέω, δυσερμήνευτος, έγγίζω, έγκακέω, έγχρίω, έθνικός, έκδαπανάω, έκδικέω (etc.), έεθαμβος, έκπλήρωσις, έκτένεια, έξαρτίζω, έξισχύω, έπιθανάτιος, έπισκηνόω, έπιχορηγέω, έτερ5γλωσσος, εὐαρεστέω, εύδοκέω, εύθυδρομέω, εύκαιρέω, εΰκοπος, ήμιώριον, ηρεμος, Απριομαχέω, Οριαμβεύω, Ιματισμός, Ισύτιμος, καθημερινός, καταβαρέω, καταγωνίζομαι, κατάκριμα, κατάλυμα, καταντάω, καταπονέω, κατοπτρίζομαι, κενο δοξία, κερματιστής, κωμίπολις, μεθερμηνεύω, μεταμορφόω, μετρισπαθέω, νεωτερικός, όδηγός, οίκοδομή, όψώνιον, παλινγενεσία, πάντοτε, παραχειμασία, παρείσακτος, παρεισερχομαι, παρεπίδημος, περιλάμπω, περιοχή, πορισμός, προελπίζω, προσεγγίζω, πρύσκαιρος, προσκληρόω, βαδιούργημα, σημειώω, σκωληκώβρωτος, στρατολογέω, στρατοπεδάρχης, συνκατάθεσις, συνβασιλεύω, συνμερίζω, συνοδία, συνπνίγω, συνυποκρίνομαι, τελώνιον, τετράδιον, τετράρχης, τρίστεγος, υίοθεσία, υπερπλεονάζω, υπογραμμότ, υπολιμπάνω, υποτύπωσις, φίλαυτος, φιλήδονος, χειρόγραφον. Several verbs in -όω (e.g. ανακαινώω, ζαμογραφίας δυσαμόω, χαριτόω), -ίζω (e.g. alχμαλωτίζω, άσθεματίζω, άνεμίζω), -εόω (e.g. alχμαλωτίζω, γυ-μοιτεύω, μαθητεύω, μεσιτεύω) are either of later coinage or modifications of earlier endings.

These may serve as specimens of the difference between the vocabulary of the NT and that of the classic writers. But it must be remembered that our imperfect knowledge makes it impossible to say how many such words, apparently late, are merely old words reappearing after a period of disuse a phenomenon. often exemplified in our own vernacular; or how far, again, they may have been long current in colloquial speech, although remaining foreign to the language of literature, as, for example, the swarm of everyday deities catalogued by Augustine in his de Civitate Dei, iv. 8, 11, 21, are alien to the Jupiter, Juno, and the rest that make up the literary 'properties of the poets.

But this list of specimen words brings to view certain general characteristics of the NT vocabul-ary; for example, its employment of terms which in the earlier Greek are distinctly literary and even poetic. To some such already given may be added the following : άγέλη, άδάπανος, άδημονέω, είσθητήριος, άλυσιτελής, άμάω, άμεμπτος, άμερμινος, έναθάλλω, άνακράζω, άνήμερος, άπαλλοτριώ, άπέραντος,

άπόδημος, άποφθέγγομαι, άποτομία (-μως), άποψύχω, άσάλευτος, άσχήμων, άτακτος, άτιμάζω, αὐγάζω, αὐθάδης, αδξω, αύτόχειρ, αύχέω, άφαντος, άφρίζω, βαρέω, βαστάζω, βρέχω, βρώσιμος, γενετή, δέσμιος, διαυγής, διηνεκής, δόλιος, ξκδηλος, έκμάσσω, έκτελέω, έμβατεύω, έμπαίζω, έμφανίζω, ένάλιος, έπαιτέω, έπακροάομαι, έπικέλλω, έπισφαλής, έρειδω, έριθίζω, έσθής, εύδία, εύσχημοσύνη, εύφροσύνη, ήπιος, ήχέω (ήχος), θανάσιμος, θεοστυγής, θύελλα, θυμομαχεω, ἰκμάς, ἰμεἰρομαι (όμ.), κακόω, καὐ-χημα, κενόω, κλαυθμός, κλέος, κλύδων, κολλάω, κραταιός, κυρόω, λάμπω, μαγεύω, μαστίζω, μητρολώας, μόχθος, μυελός, μωμάομαι, νυστάζω, όδύνη, οίκτιρμός, δρασις, ούρανόθεν, πανοικεί, πανπληθεί, παραλογίζομαι (etc.), παροτρύνω, πενιχρός, πιάζω, πολυποίκιλος, προπετής, ριπίζω, ρυπαρός, σαπρός, σκορπίζω, συμπαθής, τηλαυγώς, τρόμος, τρύβλιον, τυρβάζω, ύπερήφανος, φαντάζω, φέγγος, φιμόω, χειμάζομαι, χειραγωγέω, χλιαρός, ώδίνω. Conspicuous in it also is the later Greek fond-

ness (agreeably to the popular striving after strong expressions) for compounded and sesquipedalian words. Of these the following may serve as additional representatives : drekoityyros, drekadantos, άνεξερεύνητος, άνεπαίσχυντος, άνταποκρίνομαι, δυσβάστακτος, έμπεριπατέω, έξαγοράζω, έξακολουθέω, έξανατέλλω, έξομολογέω, έπιγαμβρεύω, ζωογονέω, καταβραβεύω, καταδιναστείω, κατασοφίζομαι, κατισχύω, λιθοβολέω, ματαιολογία, μετοικεσία, οικοδεσποτέω, όλιγ ύψιχος, πατροπαράδοτος, προσαναβαίνω, προσαναπληρύω, προσανατίθημι, προσκαρτερέω, προσπορεύομαι, συναναμίγνυμι, συνευωχέομαι, συνκαταψηφίζω, συναντιλαμβάνομαι, συνυποκρίνομαι, συνυπουργέω.

The biblical writers indulge this partiality still further; as witness such words as the following: άγενεαλόγητος, αίματεκχυσία, άλλοτριοεπίσκοπος, άνεξίκακος, άνθρωπάρεσκος, διενθυμέσμαι, εκζητέω, εκμυκτηρίζω, ἐκπειράζω, έξαστράπτω, ἐπαναπαύω, ἐπιδιατάσσομαι, έπιδιορθύω, έπισκενάζω, έπισυντρέχω, Ιερουργέω, κατακληροδοτέω, κατακληρονομέω, καταλιθάζω, κατεξουσιάζω, κατεφίστημι, κατοικητήριον, μισθαποδοσία, όρθοτομέω, όρκωμοσία, όχλοποιέω, παραπικραίνω, περιαστράπτω, ποταμοφόρητος, προενάρχομαι, συναιχμάλωτος, υπερεκπερισσώs, ύπερεντυγχάνω, χρηστολογία, χρυσοδακτύλιος. Moreover, not a few decomposite words are found in it—as in general in the later Greek—which have been formed by prefixing a preposition (as eni, dia, mapa, mpi, mpis, our. intep) to a word already in use. Conversely, simple verbs are sometimes substituted for their compounds more usual in the classic period; as,  $\epsilon \rho \omega \tau d\omega$  for  $\epsilon \pi e \rho \omega \tau d\omega$  (Mk 8<sup>9</sup>),  $\kappa \rho \dot{\nu} \pi \tau \omega$  for  $d\pi \circ \kappa \rho \dot{\nu} \pi \tau \omega$  (Mt 11<sup>25</sup>),  $d\theta \rho o i \zeta \omega$  for  $\sigma \upsilon r a \theta \rho o i \zeta \omega$ (Lk 24<sup>38</sup>), δειγματίζω for παραδειγματίζω (Mt 1<sup>19</sup>), δχλέω for ένοχλέω (Ac  $5^{16}$ ), τρέφω for άνατρέφω (Lk  $4^{16}$ ).

Another characteristic of NT Greek (as of modern Greek, and indeed of popular speech in general) appears in the disproportionate number of so-called diminutives its vocabulary contains: άρνίον, γυναικάριον, ερίφιον, θυγάτριον, ίχθύδιον, κλινάριον, κλινίδιον, κοράσιον, κυνάριον, δνάριον, όψαριον, (παιδίον) παιδάριον, πινακίδιον, πλοιάριον, ποίμνιον, προβάτιον, σανδάλιον, στρουθίον, σχοινίον, φορτίον, ψιχίον, ψωμίον, ώτάριον, ώτίον are among them ; and even βιβλαρίδιον, a diminutive of a diminutive, occurs. Several of these words have quite lost any diminutive force-if indeed they ever had it (cf. e.g.  $\theta\eta\rho$ ; or,  $\kappa\rho\sigma r(m, etc.)$ ). For  $\omega r d\rho \omega \sigma r$  (Mk 14<sup>47</sup>, Jn 18<sup>10</sup>),  $\omega r i \sigma r$  (Mt 26<sup>31</sup>), I.k (22<sup>30</sup>) substitutes of.

b. But not merely had later Greek, as it dis-closes itself in the NT, enlarged its vocabulary by the introduction of new words (or the revival of those long disused), it had also modified more or less the meaning of many retained from the classic period. This is exemplified by the meanings sub-joined to the following words : dxarasrasia 'politi-Joined to the following words:  $i \kappa a \tau a \sigma \tau a \tau a$  point-cal disorder,'  $dra \kappa \epsilon \mu a \iota$  and  $dra \pi i \pi \tau \omega$  'recline at table,'  $dra \lambda \iota \omega$  'depart (from life),'  $dra \sigma \tau \rho \epsilon \phi o \mu a \iota$ 'conduct one's self,'  $dr \tau i \lambda \eta \mu \psi \iota s$  'help,'  $d\pi \sigma \tau a \sigma \sigma \sigma \mu a$ 'bid farewell,' 'renounce,'  $d\phi a r i \zeta \omega$  'render un-sightly,'  $\gamma \epsilon r \eta \mu a \tau a$  'fruits of the earth,'  $\delta \omega \mu a$  'house-

### 38 LANGUAGE OF THE NEW TEST.

top,'  $\ell r \tau ev \xi is$  'petition,'  $\ell r r \rho \sigma \pi \eta$  'shame,'  $\ell \rho e \epsilon' \gamma \rho \mu a$ 'speak out,'  $\ell \rho \sigma \tau d \omega$  'request,'  $e \delta \sigma \chi \eta \mu \omega r$  'honourable' of rank,  $e \delta \chi a \rho i \sigma \tau e \delta \eta$  'apparel,'  $\xi \delta \lambda \sigma r$  'a tree,' 'quicken,'  $\kappa a \tau a \sigma \tau o \lambda \eta$  'apparel,'  $\xi \delta \lambda \sigma r$  'a tree,' 'a  $\pi e \rho \ell e \rho \gamma a$  'magic,'  $\pi e \rho i \sigma \pi d \rho \mu a$  'be distracted' (with cares, etc.),  $\pi \tau \tilde{\omega} \mu a$  (without adjunct) 'a corpse,'  $\rho \delta \mu \eta$  'a street,'  $\sigma \tau \epsilon \lambda \sigma \rho \mu a$  'withdraw,'  $\sigma \tau \gamma \mu \pi$  'moment,'  $\sigma w \kappa \rho \ell \omega a$  'compare,' 'interpret,'  $\sigma v \ell \sigma \tau \eta \mu$  'establish,' prove,'  $\sigma \chi o \lambda \eta$  's chool,'  $\sigma \delta \mu a \tau a$ (without adjunct) 'slaves,'  $\tau \rho \sigma \gamma a$  'feed' (of persons),  $\delta \sigma d \rho \chi \omega$  nearly i.q.  $e (\mu l, \chi \rho \eta \mu a \tau l \zeta \omega )$  'o to styled' or 'called.' And when the modification is not so marked as in these cases, there is at times a change at least in connotation. This is illustrated in the use of  $\beta \lambda \ell \pi \omega$ ,  $\theta \epsilon \omega \rho \ell \omega$ , and  $\delta \rho \ell \omega \tau \delta$ express seeing; of  $\ell \rho \Delta \lambda \ell \omega$  and  $\lambda \ell \gamma \omega$  in reference to speaking. The caste or social status, so to speak, of words varied in ancient as it does in modern times with age and locality. Many verbs, moreover, which in the earlier lan-

Many verbs, moreover, which in the earlier language were commonly transitive, assumed a reflexive or neuter sense; e.g.  $d\pi\epsilon\chi\omega$  (Lk 15<sup>20</sup>),  $d\pi\circ\rho!\pi\tau\omega$ (Ac 27<sup>43</sup>),  $a\dot{v}\xi\dot{a}\omega$ ,  $a\delta\xi\omega$  (Mt 6<sup>38</sup>, Eph 2<sup>21</sup>),  $\dot{\epsilon}n\sigma\chi\dot{\omega}$  (Ac 9<sup>19</sup>),  $\dot{\epsilon}\pi\iota\beta\dot{a}\lambda\lambda\omega$  (Mk 4<sup>37</sup>),  $\kappa\lambda\iota\nu\omega$  (Lk 9<sup>12</sup>),  $\pi\alpha\rhoa\dot{\delta}\omega\mu\omega$  (perh. Mk 4<sup>20</sup>),  $\sigma\tau\rho\dot{\epsilon}\phi\omega$  (Ac 7<sup>42</sup>) and its compounds. On the other hand, some neuter verbs came to be used transitively or causatively; as,  $\beta\lambda a\sigma\tau\dot{\sigma}\mu\dot{\epsilon}\omega$  (Mt 25<sup>8</sup>),  $\beta\lambda a\sigma\phi\mu\dot{\epsilon}\omega$  (Mt 27<sup>33</sup>),  $\gamma\sigma\nu\pi\epsilon\epsilon\dot{\epsilon}\omega$  (Mt 17<sup>14</sup>),  $\dot{\delta}\iota\dot{\gamma}\omega\omega$  and  $\pi\epsilon\iota\nu\dot{a}\omega$  (Mt 25<sup>8</sup>),  $\dot{\epsilon}\mu\pi\circ\rho\epsilon\dot{\omega}\rho\mu\alpha$  (2 P 2<sup>3</sup>),  $\epsilon\dot{\sigma}\delta\kappa\dot{\epsilon}\omega$  (Mt 12<sup>18</sup>),  $\mu\alpha\theta\eta\tau\epsilon\dot{\omega}\omega$  (Mt 28<sup>19</sup>). An interesting extension of this usage appears in  $\delta$   $\gamma\dot{\alpha}\rho$   $d\pi\dot{\epsilon}\thetaar\dot{\epsilon}\mu$ ...  $\delta$   $\delta\dot{\epsilon}$   $\dot{\gamma}\eta$ (Ro 6<sup>10</sup>).

(B) But this brings to our attention the Grammatical peculiarities which the language of the NT exhibits in common with later Greek. Peculiarities of this class, whether relating to form, or to construction, are much less numerous than those which, agreeably to the general law of growth in language, affect its vocabulary.

a. The peculiarities of form are some of them common to the different dialects of the earlier Common so the unitation of the annexity of the set of  $\mu d \chi a \iota \rho a$ ,  $\pi \rho \hat{\psi} \rho a$ ,  $\pi \lambda \eta \mu \mu v \rho a$ ,  $\sigma \pi \epsilon \hat{\iota} \rho a$ ), the presents  $\gamma i \nu o \mu a \iota$ , μαχαιρα, πρώρα, πλημμυρα, σπείρα), the presents γινομαι, γινώσκω, also εἶτεν (είτα), after the Ionic; ἀφέωνται (for ἀφείνται), ήτω (for ἕστω), ἕρνιξ (ἐρυις), held to be Doric; ἐδυνἀαθην, collat. form of ἡδυνήθην, ἐκάμμυσα (καμμύω), ῥήσσω (ῥάσσω), Epic; ἀποκτέννω (-κτείνω), Æolic. Others may be traced to the popular pre-ference for regularity of inflection: e.g. the change of verbs in  $\mu$  into verbs in  $\omega$ ; the termination - $\sigma a$ in the 2nd pers. sing., as dúrasai, kavxâsai; the inflection olda, -das, -dare, etc.; the sorists towora, έξησα, ήμάρτησα, ήξα from  $d\gamma\omega$ , ήξα (?) from ήκω, and the like. There is also a propensity to omit the augment of the pluperfect, and especially to give the 2nd aor. the endings of the first, as  $\epsilon t \delta a \mu \epsilon \nu$ ,  $\epsilon i \pi a \nu$ ,  $\epsilon \pi \epsilon \sigma a$ ,  $-a \nu$ ,  $\hbar \lambda \theta a \nu$ ,  $\epsilon \lambda \theta a \tau \omega$ , etc.; and in the imperfect of  $\epsilon \chi \omega$  we find  $\epsilon i \chi a \nu$  and είχοσαν (80 εδίδοσαν, εδολιούσαν), due doubtless to the love of assimilation in form. Sundry nouns have varying genders, as  $\delta$  and  $\dot{\eta} \beta \delta \tau \sigma s$ ,  $\lambda \eta \nu s$ ,  $\lambda \iota \mu s$ ; and το έλεος, ζήλος, ήχος (?), θεμέλιος -λιος, πλούτος, σκότος; ή νίκη and το νίκος; and even a twofold declension, as δεσμός plur. -μοί and -μά, έλεος -ου and -ous, oxbros -ou and -ous, also nouns ending in -αρχος, -άρχης (as έκατόνταρχος and έκατοντάρχης); others show a preference at times for the uncontracted forms, as borta, bortew. The same tendency to assimilate explains, probably, the fondness for terminal v:-both in nouns, as apoerar,  $\mu \hat{\eta} rar$ ,  $d\sigma \epsilon \beta \eta r$ , άσφαλή», συγγενήν, χείραν; and in verbs, as 3rd pers. plur. of the perfect, γέγωναν, έγνωκαν, είρηκαν, έώρακαν (έύρακαν), πέπτωκαν (πέπωκαν). Here it was

#### LANGUAGE OF THE NEW TEST.

favoured by the gradual obscuration of the distinction between the perfect and the aorist (see in b below), to which cause also may be due the occasional appearance of the ending -*xes* for -*xas* in the 2nd pers. sing. of the perfect. The dual number has disappeared, and the word  $\delta i o$  itself tends to become indeclinable. Particles of rest ( $\pi o \partial$ ,  $\delta \pi o v$ , etc.); ets has encroached largely upon the province of  $\tau vs$ , and  $\pi \delta \tau e \rho os$  (- $\rho o v$ , except in Jn  $7^{(1)}$ ) has disappeared.

Negligent or variant pronunciation appears in irregularities of spelling; such as the retention of  $\mu$  in sundry forms and derivatives of  $\lambda a \mu \beta d \epsilon \omega$  (as  $\lambda \eta \mu \psi \epsilon \sigma \theta a$ ,  $d \kappa \dot{\alpha} \lambda \eta \mu \psi is$ , etc.); the neglect of assimilation in compounds of  $\dot{\epsilon}$  and  $\sigma \dot{\omega}$ ; the doubling or non-doubling of  $\nu$ ,  $\rho$ , and some other letters, *e.g.*  $\gamma \dot{\epsilon} \nu \eta \mu a$ ; inconsistency respecting  $\nu$  movable, elision, and the final s in  $d \chi \rho s$ ,  $\mu \dot{\chi} \chi \rho s$ ,  $\sigma \sigma \sigma \omega s$ . The interchange of sundry letters, as in  $\mu a \sigma \tau \dot{s}$  and  $\sigma \omega \dot{\sigma} \dot{\epsilon}$ ;  $\dot{\beta} \dot{\epsilon} \nu \nu \mu \mu$  and  $\sigma \beta \dot{\epsilon} \nu \nu \mu$ ,  $\sigma \phi \nu \dot{\rho} s$  and  $\sigma \pi \nu \rho \dot{s}$ ,  $\sigma \dot{\epsilon} \dot{\epsilon} \dot{\epsilon}$ and  $\sigma \dot{\delta} \dot{\epsilon} \dot{s}$ ,  $\pi \sigma \tau a \pi \dot{\sigma} \dot{s}$  and  $\pi \sigma \dot{\sigma} a \pi \dot{\sigma} \dot{s}$ ; and especially in the case of the vowels  $\epsilon_i$ ,  $\epsilon_i$ ,  $\eta_i$ , as well as  $a_i$ ,  $\epsilon_i$  a tendency to that obliteration of distinctions which culminated in itacism and the pronunciation of modern Greek.

Many of these irregularities, and others both of form and pronunciation, have been adopted by the editors of the text of the NT in conformity with the usage of the oldest extant MSS; but how far, in any given case, they are to be set down to the account of the original authors or of later scribes, is a question to be settled only after the other nearly contemporary writings have been edited with equal attention to such details, and in the light of the accumulating testimony of inscriptions, papyri, and other relics.

tions, papyri, and other relics. b. The Syntactical peculiarities which the NT shares in common with later and spoken Greek, though less numerous than the formal, are not less noteworthy. They appear particularly in the constructions of the verb. Besides those alluded to in the opening paragraph of this article, may be mentioned :--the general disuse of the optative in dependent sentences; the weakening of constructions with tra (a particle which had nearly supplanted  $\delta \pi \omega r$ ), which often have the force merely of the classic infinitive; the interchange of in and dv; the use of  $\delta rav$  with the indicative (Rev 8<sup>1</sup>), and in dependent clauses to denote indefinite frequency; an extended use of  $\delta r_i$ , and also of the final infin., the genitival infin., and the infin. with er and eis; the scanty employment of interrogative particles, and the use of el in direct questions (perhaps a Hebraism); the ordinary substitution of the present participle for the future, and in general a fondness for the present tense (especially λέγει, έρχεται, etc.) agreeably to the love of vividness and directness; a lax use of the aorist parti-ciple, in fact a tendency to blur the distinction between the aor. tense and the perfect; the use of  $\ell\phi\epsilon\lambda\sigma$  as a particle of wishing; the prefixing of  $d\phi\epsilon$ s to the hortatory subjunctive, and the pleonastic use of the imperatives of  $\delta\rho\bar{a}\nu$ ,  $\beta\lambda\epsilon\pi\epsilon\bar{\nu}$  (as  $\delta\rho\bar{a}\tau\epsilon$   $\beta\lambda\epsilon\pi\epsilon\tau$  das, etc. Mk 8<sup>15</sup>); the tendency of  $\mu\eta$ to encroach on the province of  $\omega$ , especially with infinitives and participles, and to prevent a hiatus; the use of the compound negative  $\omega \mu \eta$ ; employment of  $\epsilon l \mu l$  with the participle as a periphrasis for the simple verb; and the freq. omission of the copula  $\epsilon(\mu i)$ ; carelessness in placing particles (e.g.  $d\rho a$ Lk 11<sup>20.48</sup>,  $\gamma \epsilon$  Lk 11<sup>8</sup>,  $\tau \alpha i \nu \nu$  He 13<sup>18</sup>,  $\delta \mu \omega s$  Gal 3<sup>15</sup>). The popular striving after emphasis which ap-

The popular striving after emphasis which appears in many of these usages shows itself, further, in the use of the active voice with the reflexive pronoun instead of the middle; of  $t\delta_{00}$  instead of the simple possessive pronoun; of  $\epsilon t$  for the indefinite  $\tau s$ , and, in general, a needless multiplica-

# LANGUAGE OF THE NEW TEST.

tion of pronouns; of devices for strengthening the forms of comparison, e.g.  $\partial \lambda \alpha x i \sigma \tau \delta r \epsilon \rho \sigma \delta$ ,  $\mu eij \sigma \epsilon \rho \sigma \delta$ ,  $\mu eij \sigma \epsilon \rho \sigma \delta$ , and the use of  $\pi a \rho d$  and  $i \pi \epsilon \rho$ with comparatives instead of  $\pi$  (yet  $\pi$  alone is at times used with comparative force, e.g. Mt 18°, Lk 15<sup>7</sup>, 1 Co 14<sup>19</sup>); of prepositions to reinforce the simple cases. The use of the neut. sing. of an adjective with the art. as a substitute for the abstract noun, though not unusual in the classics, is more common in Paul and Hebrews, and in the later Gr. writers became a striking literary mannerism.

II. THE ARAMAIC AND HEBRRW ÉLEMENT.—It is usual to distribute the Hebraisms of the NT into two classes: 'perfect' or pure Hebraisms, which consist of such words, phrases, and constructions as have no precedent or analogue in extant Gr., and hence are held to be directly transferred to the NT from the mother tongue of the Jews; and 'imperfect' Hebraisms, consisting of Hebraistic expressions to be found, indeed, for substance in Gr., but the use of which by the NT writers is most naturally traced to the influence of their native language. The limits of this latter class, however, our scanty knowledge of the history of the later Gr. language makes it difficult to fix; and for our present purpose it will be more convenient to follow the classification adopted by us hitherto. A just impression, moreover, of this element of the NT language requires that our presentation of facts should be liberal and inclusive, rather than rigorously restricted. For example, the word  $\sigma \pi e \mu a$  with the meaning progeny may be traced as far back as Æschylus and Pindar; but the more than thirty instances of its use in this sense in the NT fairly entitle it to be enrolled as a Hebraism.

(A) Lexical Hebraisms:—not all of which, be it remembered, first make their appearance in the NT.

**a.** New words.—Of these, some are (1) Semitic words simply transiterated; as,  $d\beta\beta d$ ,  $a\lambda\lambda houd$ ,  $d\mu\eta\eta$ ,  $\gamma a\beta\beta a\theta d$ ,  $\gamma o\lambda\gamma o\theta d$ ,  $\kappa o\beta\beta d\mu$ ,  $\pi d\alpha\gamma a$ ,  $\beta a\beta\beta e i$  etc., jard,  $\sigma a\beta a d\theta$ ,  $\sigma a \tau d\mu$ ,  $\sigma i \kappa \epsilon p a$ ,  $\tau a \lambda \epsilon i \theta d$ ,  $\chi \epsilon p o i \beta c i$ ; others are (2) Grecized by some slight change, generally of termination; as,  $\beta d\tau os$ ,  $\gamma \epsilon \epsilon r \mu a$ ,  $f_i d \mu u or$ , (and as is commonly thought)  $\kappa d\mu \eta \lambda os$ ,  $\kappa i r \mu d \mu \mu u or$  (to which may prob. be added the names of several other plants and spices, as well as of precious stones; as,  $\kappa i \mu \mu u \sigma s$ ,  $\lambda i \beta a r os$ ,  $\sigma u \alpha d \beta a r or$ . **b.** Far more numerous are the words and phrases,

Not a few are due to national institutions, usages, historic incidents, and the like; as, dκροβυστία, dποδεκατώω, dποσυπάγωγος (dρχισυπάγωγος, etc.), oi dρτοι τῆς προθέσεως, γραμματεύς, διαθήκη, διασπορά, δωδεκάσψιλον, ένκαίνια (-νίζω), έπιγαμβρεύω, εύπουχίζω, θυσιαστήριον, το iλαστήριον, καθαρίζω and κοινώω levitically, κληροπομέω in its technical use,

λατρεία the ritual service, λυτρόω in its theocratic sense, μοσχοποιέω, νομοδιδάσκαλος, όλοκαύτωμα, πατριάρχης, πεντηκοστή, πρεσβυτέριου, προσήλυτος, προφήτης, πρωτοκαθέδρία, πρωτοτόκια, σκηνοπηγία, υίδο τοῦ άνθρώπου (τοῦ θεοῦ), φυλακτήριον. There are indications, however, that some of these terms (e.g. καθαρίζω, πρεσβυτέριου, προφήτης) were known to heathen usage in a religious reference (Deissmann, Neue Bibelstudien, Marburg, 1897).

Others spring from the Oriental love of pictorialness and circumstantiality; as, άπερίτμητος τŷ καρδία, έν καρδία λέγειν, ή καρδία ήμῶν πεπλάτινται, έν γενητοῖς γυναικῶν, έν ήμέραις Ἡρώδου, ἐνωτίζεσθαι, ἕσκαψε και ἐβάθυνε, ζητεῦν τὴν ψυχήν τινος, καρπός τῶν χειλέων, ποτήριον in a fig. application, σὰρζ καὶ αίμα, σπλαγχνίζεσθαι, στηρίζειν τὸ πρόσωπον, στόμα μαχαίρης, υἰός οι τέκνον with the gen. especially of an abstract (e.g. εἰρήτης, βροντῆς, φωτός, ὀργῆς, ὑπακοῆς, etc.), χείλος τῆς θαλάσσης.

But some of these phrases may with equal propriety be ranked with—

(B) Grammatical Hebraisms. - The great dissimilarity in structure between the Heb. and the Gr. operated as a barrier to the free introduction of the characteristic idioms of the former language into the latter. The grammatical influence of their native tongue shows itself in the NT writers rather in their general style of expression; in particular, a marked inaptness in the use of moods (even as compared with contemporary Gr. authors), simplicity of construction, and a co-ordination of clauses which would have seemed monotonous if not illogical to a Greek. Still, usages are not wanting which distinctly recall the Hebrew. Among them are the following :- An extended use of prepositions; for instance, ev (cf. extended use of prepositions; for instance,  $\varepsilon^{\mu}$  (cf. z): not only in construction with verbs, as  $\varepsilon^{\mu}\delta\sigma\kappa\epsilon^{\mu}$ ,  $\delta\mu\nu\dot{\epsilon}\epsilon\nu$ , etc., but particularly with instrumental force, as  $\kappa\rho\dot{a}_{\epsilon\nu}\epsilon\nu$ ,  $\epsilon^{\mu}\phi\omega\nu\dot{z}\mu_{\epsilon}\gamma\lambda\eta$  (Rev 14<sup>15</sup>),  $\pi oic\bar{\epsilon}\nu$   $\kappa\rho\dot{a}\tau os$   $\epsilon^{\mu}\beta\rho\alpha\chi (ovi (Lk 1<sup>51</sup>), <math>\pi o\lambda\epsilon\mu\epsilon\bar{\epsilon}\nu$   $\epsilon^{\mu}\tau\dot{\gamma}\rho\omega\rho\dot{a}_{i}a\tau\sigma\hat{\omega}$   $\sigma\tau\delta\mu\alpha\tau os$  (Rev 2<sup>16</sup>).— $\epsilon is$  (cf.  $\gamma$ ): in such phrases as  $\gamma i\nu\epsilon\sigma\thetaau$  els où $\delta\epsilon\nu$  (Ac 5<sup>36</sup>),  $\lambda\mu\mu\beta\dot{a}\nu\epsilon\nu$  els  $\kappa\lambda\eta\rho\sigma\nu\rho\mu\mu\mu$ (He 11<sup>8</sup>),  $\lambda\sigma\gamma i\xi\epsilon\sigma\thetaau$  els  $\pi\epsilon\rho\tau\sigma\rho\mu\eta\nu$  (Ro 2<sup>36</sup>); and in (remers) its insertion before the second accusative general, its insertion before the second accusative after verbs signifying 'make,' hold,' etc., as, etc  $\pi\rho\phi\eta\tau\eta\nu$  avrov elxov (Mt 21<sup>46</sup>).— $d\pi\delta$  (cf. [7]): as,  $\phi\epsilon\dot{\gamma}\epsilon\nu$   $d\pi\delta$ , etc. (Mt 3<sup>7</sup>, Jn 10<sup>6</sup>).— $\epsilon\pi i$  (cf. 52): as, έλπίζειν έπί, etc.—μετά (cf. Dy): μεγαλύνειν, ποιείν, ελεος μετά, etc. (Lk 1<sup>88.72</sup>).—Periphrastic expansions of prepositions: —by the use of  $\delta\phi\thetaa\lambda\mu\deltas$  (cf.  $\forall\forall p$ ). Mt 21<sup>42</sup>, Lk 19<sup>42</sup>; — $\pi\rho\delta\sigma\omega\pi\sigma\nu$  (cf.  $\forall^{12}$ ) Ac 5<sup>41</sup>, Mk 1<sup>4</sup>, Ac 13<sup>24</sup>; — $\sigma\tau\delta\mu a$  (cf.  $\forall p$ ) Mt 4<sup>4</sup>, Lk 1<sup>70</sup>, ( $\forall p$  22) 2 Co 13<sup>4</sup>, Mt 18<sup>16</sup>; — $\chi\epsilon i\rho$  (cf.  $\forall p$ ) Jn 10<sup>59</sup>, Gal 3<sup>19</sup>, Ac 2<sup>23</sup> 7<sup>33</sup>. —The employment of  $\ell\mu\pi\rho\sigma\sigma\theta\epsilon\nu$  (Mt 11<sup>26</sup> 18<sup>14</sup>),  $i^{25}$ .— The employment of εμπροσσεν (Mt 11<sup>26</sup> 18<sup>-5</sup>), ενώπιον (Ac 6<sup>5</sup>), κατενώπιον (Eph 1<sup>4</sup>), κατέναντι (Ro 4<sup>17</sup>), όπίσω (Lk 14<sup>37</sup>), as prepositions.—The pleonastic use of pronouns (see above, I. B. b, sub fin.), especially airis (e.g. Rev 2<sup>7, 17</sup>), which is even added in a relative sentence (Mt 3<sup>12</sup>, Mk 7<sup>26</sup>, Rev 7<sup>2, 9</sup> etc.).— The use of a limiting genitive to express quality (Lk 18<sup>6</sup>, Ja 2<sup>4</sup> 1<sup>26</sup>).—The use of (a superfluous) sai eyévero (or eyévero de) before a specification of time or occurrence.-An imitation of the Heb. infinite (as  $\epsilon \pi \epsilon \theta \nu \mu l a \epsilon \pi \epsilon \theta \dot{\nu} \mu \eta \sigma a$  Lk 22<sup>13</sup>,  $\chi a \rho \hat{i} \chi a (\tau c \ the verb$  $(as <math>\epsilon \pi \epsilon \theta \nu \mu l a \epsilon \pi \epsilon \theta \dot{\nu} \mu \eta \sigma a$  Lk 22<sup>13</sup>,  $\chi a \rho \hat{i} \chi a (\tau c \ 1 \ 3^{29})$ , or (in quotations) by a pretixed participle (as  $\beta \lambda \epsilon \pi \sigma \sigma \tau c s$  $\beta \lambda \epsilon \psi \epsilon \tau \epsilon$  Mt 13<sup>14</sup>, cf. the pictorial draot or  $\pi \sigma \rho \epsilon \nu \theta \epsilon t s$ before a verb).  $-\epsilon i$  (cf. Heb. on) in sentences with suppressed apodosis as a formula of swearing or to express emphatic negation (He  $4^{3,5}$ , Mk  $8^{12}$ ).—A lax use of dmoxpiroual (cf. עוה when no proper question has preceded. —  $\pi \rho o \sigma \tau (\theta \eta \mu \mu (cf. \eta c;))$  with an infin. to repetition of a numeral to give it distributive force (e.g. δύο δύο Mk 6<sup>7</sup>; cf. συμπίσια συμπόσια, πρασιαί πρασιαί Mk 6391., (and probably) ημέρα και ημέρα 2 Co

4<sup>16</sup>. ...  $\pi$ âs equivalent to oideis. ... Such phrases as  $\tau i$  éµol kal ool (Mk 1<sup>24</sup>, Jn 2<sup>4</sup>),  $\pi$ epi àµaptias, sc.  $\theta$ vola (Ro 8<sup>3</sup>?).

The majority of these Hebraistic forms and conin majory of other in the LXX also, which as a tr. —in parts servile, and made by persons some of whom evidently had but an imperfect acquaintance with the Gr. language-is far more Hebraistic in its cast than the NT. But it would be a mistake to assume that this tr. in its peculiarities repre-sents a type of Gr. established and in actual currency at the time. Such an assumption would reverse the historical process. While its language reproduces fundamentally, no doubt, the popular Gr. of the Ptolemaic period, its distinctive character is due rather to the translators' exaggerated deference to the Heb. sacred text, and their mechanical reproduction of it. Yet beyond all question the idioms of this Gr. reproduction of the earlier Scriptures, made familiar as they were by the religious use of the version for generations among the Jews of the Dispersion, must have had great influence in forming the type of Gr. current among people of Jewish stock. Indeed, owing to the cosmopolitan relations of that race during the time intervening between the origin of the two bodies of literature, it need not surprise us to encounter idioms having a distinctly Hebraistic flavour even in native Gr. circles. Consequently our classifications here, as elsewhere, are more a matter of convenience than of rigorous historical accuracy. We must not forget the uncertainty arising from our present defective knowledge. We must not forget the uncertainty We must not interpret the fact of prior occurrence into clear proof either of primary origin on the one hand, or direct derivation on the other. We must not overlook the truth that coincidences of popular expression are to be found in many widely separated and unrelated tongues. But, notwithstanding all uncertainties and abatements, the general influence of the LXX upon NT Greek was indubitably great. (See Schniedel's Winer, § 4. 1b. A good Lexicon and Grammar of the LXX are pressing needs of the student of Biblical Greek, and are now made possible by Swete's edition of the text, and Hatch and Redpath's Concordance. Help on one minor point may be found in C. W. Votaw's comprehensive lists of The Use of the Infinitive in Biblical Greek, pp. 5, 9. Chicago, 1896. See Viteau as mentioned in the Bibliography, VII. below).

But not all the influence on the language of the NT writers came from Hebrew and Aramaic or from the LXX. Other languages foreign to the Gr. had left their traces on that language by the lst cent. of our era, some of which can with tolerable assurance be pointed out.

Ist cent of our era, some of which can with tolerable assurance be pointed out. III. OTHER FOREIGN ELEMENTS. — (A) The supremacy of Rome, and its multifarious official relations with the populations under its sway, in which relations it naturally employed its vernacular (see LATIN LANGUAGE), would prepare us to expect to find not a few traces of Latin in the popular language of the apostolic period.

**a.** The Lexical Latinisms in NT consist chiefly of judicial and military terms, names of coins, articles of apparel, utensils, etc.; as,  $d\sigma\sigma d\rho_{LOP}$ ,  $\delta\eta \sigma d\rho_{LOP}$ ,  $\xi_{XW}$  cestimo,  $\kappa \epsilon \nu \tau \nu \rho l \omega \nu$ ,  $\kappa \eta \nu \sigma \sigma \sigma$ ,  $\kappa \sigma \delta \rho \delta \tau \tau \eta s$ ,  $\kappa \sigma \lambda \omega \nu t a$ ,  $\kappa \sigma \nu \sigma \tau \omega \delta t a$ ,  $\lambda \epsilon \gamma \epsilon \omega \nu$ ,  $\lambda \epsilon \gamma \epsilon \tau \sigma s$ ,  $\kappa \sigma \delta \rho \delta \tau \tau \eta s$ ,  $\kappa \sigma \lambda \omega \nu t a$ ,  $\kappa \sigma \nu \sigma \tau \omega \delta t a$ ,  $\lambda \epsilon \gamma \epsilon \omega \nu$ ,  $\lambda \epsilon \tau \sigma s$ ,  $\kappa \sigma \delta \rho \delta \tau \tau \eta s$ ,  $\kappa \sigma \lambda \omega \nu t a$ ,  $\kappa \sigma \sigma \tau \omega \delta t a$ ,  $\lambda \epsilon \gamma \epsilon \omega \nu$ ,  $\lambda \epsilon \tau \sigma s$ , (Lat. libra?),  $\mu \Delta \kappa \epsilon \lambda \lambda \sigma \nu$ ,  $\mu \epsilon \mu \beta \rho \Delta \nu a$ ,  $\mu i \lambda \sigma \nu$ ,  $\mu \delta \delta \sigma \sigma s$ ,  $\xi \epsilon \sigma \tau \eta s$ ,  $\pi \rho a i \tau \omega \rho \delta \sigma \sigma$ ,  $\sigma \kappa \sigma \nu \delta \delta \sigma \tau \eta s$ ,  $\sigma \epsilon \lambda \delta \nu \eta s$ ,  $\delta \rho \sigma \nu$ ,  $\sigma \pi \epsilon \kappa \sigma \nu \lambda \Lambda c \omega (-\lambda \delta \omega)$ ,  $\chi \delta \rho \tau \eta s$ ,  $\chi \omega \rho \sigma s$ .

φραγέλλιον (-λύω), χάρτης ?, χώρος. More than two score Lat. names of persons and places occur, as well as the technical terms δ Σεβαστύς (Augustus), and Kaîσap.

Latin phrases reappear in έργασίαν δοῦναι (operam dare), τὸ ikarðr λαμβάνειν (satis accipere), τὸ ikarðr

ποιείν (satis facere), συμβούλιον λαμβάνειν (consilium capere). Notice also σι δψη (Mt 27<sup>4</sup> tu videris), δψεσθε αύτοι (Ac 18<sup>15</sup>).

b. The influence of the Lat. language upon the Grammar of NT Gr. is much more difficult to trace with confidence than in the case of the Heb., owing to the closer structural affinity between the Lat. language and the Greek. Traces of that influence, however, may be detected, it is thought, with more or less distinctness in the following constructions : -The preference for 571 and 1ra over the accusative and infinitive (cf. the growing use of *ut* after impero, rogo, etc., æquum est, mos est, etc.); the encroachment of the subjunctive on the optative after an historic tense; the tendency to obscure the distinction between the perfect and the aorist; the use of and before the genitive after φυλάσσει» and other verbs of fearing (cf. cavere ab); the exclusive use of the infinitive (even of the inf. passive) after  $\kappa\epsilon\lambda\epsilon\dot{\epsilon}\epsilon r$ ; the use of the accusative after προέρχεσθαι (cf. præire aliquem), of the dative after yaµéw (cf. nubere alicui), of ér after rirdw (cf. victoriani ferre ex); the continuative ös equivalent to ral obros (cf. qui = et hic) in a co-ordinate clause ; the anticipatory position of  $d\pi \beta$  and  $\pi \rho \delta$  in specifications of time and place; the general omis-sion of the interjection  $(\omega)$  before the vocative, the use of the preposition  $\sigma i r$  as tantamount to ĸai.

(B) But the current Gr. of our Lord's day had appropriated other foreign elements from the languages spoken in the various provinces of the empire. These, again, were chiefly names of local objects or usages. Among such are reckoned the following:  $-\beta a tor, \beta i \beta \lambda os (\beta i \beta \lambda os), \sigma i ran, \sigma i r \delta dr (yet$  $cf. Irod's, Sind), recognized as Egyptian; <math>s \rho a \beta a rros$ (cf. Lat. grabatus),  $\pi a \rho \mu \beta o \lambda h, \dot{\rho} \mu \eta$ ?, as Macedonian;  $d\gamma a \rho c \omega$  (yet see Æsch. Agam. 282),  $\gamma d i a,$  $\sigma a r \delta d \lambda (or (-\delta a \lambda or)),$  as Persian;  $d \rho p a \beta d r as Cyrenaic and$ Sicilian. Several of these words, however, hadlong before become naturalized in Greek.IV. But the element which most conspicuously

IV. But the element which most conspicuously distinguishes the Gr. of the NT is the RELIGIOUS ELEMENT. Here we come to the very centre and soul of our subject. For the NT language is no mere medley of miscellaneous linguistic survivals, no mechanical mingling of diverse ingredients; its vitality resides in the spirit that quickens it. This discloses itself on every page. It ushers a reader into a new realm of thought, and introduces him to a new type of life. Both had their natural effect on the speech of the first believers. Yet just because the essence of the language consists in its new spirit, it escapes anatomical dissection. It is as pervasive as the atmosphere, but as intangible as a perfume. Hence it is most inadequately exhibited by any catalogue of specifications. The few particulars that can here be set down will serve, at the best, as mere suggestions of its character.

(A) The religious element in its Lexical aspects. Many of the NT words denoting concrete objects or external institutions and relations were inherited from Judaism, and have been illustrated under II. A. a and b above. We will here, therefore, confine ourselves mainly to those of a more internal or spiritual character.

έθελοθμησκία, είδωλολατρία etc., έπιούσιος, έτεροδιδασκαλέω, εύαγγελιστής, εύμετάδοτος, εύπροσωπέω, Θεοδίδακτος, Ισάγγελος, καλοδιδάσκαλος, καρδιογνώστης, καταθεματίζω, κενοφωνία. λογομαχέω (-χία), όλιγ πιστος (-πιστία), δρθοποδίω, δφθαλμοδουλία, πληροφορία, πολύ-(τωντα), φροστουώ, οφυαλαύουνα, πληροφορά, ποιο-σπλαγχνος, προσωπολήμπτης (-λημπτέω, -λημψία), πρωτοκαθεδρία, συνζωσποέω, συνκακοπαθέω, συνκα-κωιχέω, συνσταυρόω, σύνψυχος, φρεναπατάω (-πάτης), φυσιόω (-σίωσις), χρηστεύομαι, ψευδάδελφος, ψευδαπό-στολος (and other compounds of ψευδο-).

Incomparably more noteworthy are-

b. The New Meanings with which the new faith has freighted the old terms.

A few of these meanings are of a technical or A few of these meanings are of a technical or ritual character; as,  $d\delta\epsilon\lambda\phi$ s of fellow-Christians, rð drrirvæv (rúæs), droorohý (- $\lambda$ os, in the official sense), doxal, dčovala, etc. of angels,  $\beta d\piriopa,$  $\gamma\lambda \hat{\omega}\sigma a$  of the 'gift of tongues,'  $\delta d\pi coros, d\kappa \lambda \eta \sigma a$ (cf.  $d\kappa\lambda \pi \sigma a$ ),  $d\pi \sigma a$  for angels,  $\beta d\pi \tau \sigma \mu$ , (cf.  $d\kappa\lambda \pi \sigma a$ ),  $d\pi \sigma a$  for a christian ( $c + \sigma a \sigma a$ ),  $d\pi \sigma a \sigma a$ (cf.  $d\kappa\lambda \pi \sigma a$ ),  $d\pi \sigma a \sigma a$ ,  $d\pi \sigma a \sigma a$ ),  $d\kappa \sigma \sigma a$ ,  $\pi \rho a \sigma a$ ,  $\pi \rho a \sigma a$ ,  $\pi \rho a \sigma a$ ,  $d\kappa \sigma \sigma a$ ,  $\pi \rho a \sigma a$ ,  $\pi \rho a \sigma a$ ,  $d\kappa \sigma \sigma a$ ,  $\pi \rho a \sigma a$ ,  $\pi \sigma a \sigma a$ ,  $d\kappa \sigma \sigma a$ ,  $\pi \sigma a \sigma a$ ,  $d\kappa \sigma \sigma a$ ,  $\pi \sigma a \sigma a$ ,  $d\kappa \sigma \sigma a$ ,  $\pi \sigma a \sigma a$ ,  $d\kappa \sigma$ 

old terms in new relations. It has added lustre to conceptions already radiant. It has made sub-stantial, and clothed with divine majesty, ex-pressions embodying the instinctive judgments and aspirations of men. Its transforming power, being diffused and a matter of degree, cannot (as has been already said) be adequately exhibited in isolated particulars. The attempt, furthermore, to illustrate it would require space not here at command. Only a few terms, therefore, will be set down, the study of which, it is believed, will more than verify the statements just made: such words as άγάπη, εἰρήνη, ζωή, πίστις, συνείδησις, σωτηρία, xdass are monuments of its power to raise language to a new level. Words of secular reference like κόσμος, of national application like of äγια, ό λαός τοῦ θεοῦ (He 4<sup>3</sup>), Ίσραήλ (Ro 9<sup>6</sup>), of everyday life like döćs,  $\pi a \gamma is$ ,  $\pi \rho 5 \sigma \kappa \rho \mu a$ ,  $\phi \rho \tau i \sigma r$ , even the very component parts of man's being --  $\sigma d\rho \xi$ ,  $\psi x \tau h$ ,  $\tau r \epsilon \tilde{\rho} \mu a$ , take on an ethical significance, of which in this last case the later philosophic use furnishes but a foregleam. A servile word like rarecropporury is ennobled; a term like oraupis, suggestive of infamy, is crowned with a halo of glory. The emphasis given to other words has made them the cardinal terms of doctrinal discussion through the Christian centuries : witness disais and its cog-nates, drohorpwors, drwheia, eniorpeperdai, Epya, Odratos, petárola, elc.

(B) Even the Grammatical influence of the new religious thought bears witness to its fertilizing power. Take as an instance πιστεύω with its half a dozen different constructions in the NT (viz. a bool: with the dat.; with  $\epsilon$  and the accus.; with  $\epsilon \pi i$  and the accus. or the dat.; with  $\epsilon \sigma$  and the dat.; with an object accus.). EAT  $\delta \epsilon \sigma$ , our  $\lambda oyeir$ , and other words experienced a similar enlargement of construction under Christian conceptions (see A. Buttmann, Gram. of NT Greek, \$ 133, 4 sq., Eng. tr. p. 173 ff.); and the wealth of suggestion made to reside in such phrases as er Χριστώ, έν κυρίψ, is full of instruction (cf. G. A. Deisemann, Die neutest. Formel 'in Christo Jesu' untersucht, Marburg, 1892).

V. But the circumstance that the NT forms a body of literature having its own distinct linguistic peculiarities, must not make us overlook the fact that it contains within itself considerable diversities of language as well as of style. The uniqueness of the volume, and the practice of using it as the one authoritative source and test of Christian truth, tend to make us isolate it unhistorically

from the literature that immediately preceded and followed it, and, on the other hand, to unify it unwarrantably. It is a library comprising the works of, perhaps, ten or more different authors. The statement that 'they all use the same language ' requires at once the qualification ' but they do not all use it in the same way.' The first three Gospels, for instance, with all their indications of a common basis, exhibit in their present form indubitable marks of the individuality of their several authors. The frequent use of  $\tau \delta \tau e (d\pi \delta \tau \delta \tau r$ -some 90 times), ή βασιλέια των ούρανων (some 33 times), Γνα (δπως) πληρωθ $\hat{g}$  (το βηθέν, etc., some 12 times), δ πατήρ δ έν (τοῖς) οὐρανοῖς οτ δ οὐράνιος (20 times), times),  $\delta \pi a \tau \eta \rho \delta \epsilon^{\mu} (\tau o \hat{s}) o \dot{\rho} a \nu o \hat{s}$  or  $\dot{\rho} o \dot{\rho} d \mu o s (20 \text{ times})$ ,  $\pi \rho o \epsilon^{\rho} \rho \chi c \sigma \theta a (51 \text{ times})$ ,  $\sigma \nu a \chi \omega \rho \epsilon \hat{v}$ (10 times), etc., mark distinctly the personality of Matthew. The use of  $\epsilon \dot{v} \dot{\theta} \dot{v} s$  (some two score times), of the pictorial participle, of diminutives and Latinisms, and, notwithstanding his terseness, a proneness to emphasize by the repetition of equivalent phrases (e.g.  $\delta_{ia} \pi a r \tau \delta_{i} \pi \nu a \tau \delta_{i} \pi a \mu \dot{\epsilon} \rho a s$ ,  $5^{5}$ ;  $\delta \sigma \omega \theta \epsilon r \epsilon \tau \eta s \kappa a \rho \delta i a s$ ,  $7^{41}$ ;  $r \tilde{v} r \epsilon \tau \tilde{\omega} \kappa a i \eta \mu \dot{\epsilon} \rho a s$ ,  $5^{5}$ ;  $\delta \sigma \omega \theta \epsilon r \epsilon \tau \eta s \kappa a \rho \delta i a s$ ,  $7^{41}$ ;  $r \tilde{v} r \epsilon s o n \epsilon$ of the traits that characterize no less distinctly the second Evangelist. A comparison of the secthe second Evangelist. A comparison of the sections common to Luke with the other two shows The identity of topic but throws the difference in language into greater relief. He distinguishes himself from the other Synoptists by his fondness for infinitives (frequencies) to the information of the second for infinitives ( $\epsilon_{F} \tau \hat{\varphi}$  with the inf. 37 times,  $\tau o \hat{v}$  with the inf. 25 times), for sal everero or everero de (43 times), δε καί (29 times), και αυτός (28 times), σύν (25 times), πορεύομαι (50 times), υποστρέφειν (22 times),  $\epsilon \nu \omega \pi \iota \sigma \sigma$  (20 times),  $\epsilon \mu \pi \rho \sigma \sigma \delta \epsilon \sigma$  (10 times). The strikingly Semitic complexion of his first chapter, and the variations between his language in the Gospel and in the Acts, are doubtless attributable in large measure to his sources. The terms λόγος, σκοτία (σκύτος), φως, ζωή (aiώrios), άληθεια, δίξα, κρίσις, κόσμος, μαρτυρέω (-pla), γινώσκω, πιστεύω, the phrases άμην άμην, άμαρτίαν έχειν, γεννηθήναι έκ (roů)  $\theta coû$  (or  $\pi v \epsilon i \mu a \tau ch$ ), elvai éx (roû kôc  $\mu ov$ , etc.),  $\eta \epsilon \sigma \chi \dot{a} \tau \eta \eta \mu \epsilon \rho a$ ,  $\dot{o} v l s$ ,  $\dot{o} \pi a \tau \eta \rho$ , etc., are at once recognized as characteristic of John; and not less so are his short and simple sentences and their asyndetic collocation, his co-ordinateness and parallelism of construction (note drekpley kal eirer), his verbal reiterations, his Hebraisms ( $\chi_{\alpha\rho_i}$   $\chi_{\alpha\rho_i}$ 3<sup>20</sup>, viol  $\phi\omega\tau$ 's 12<sup>20</sup>,  $\delta$  vids tips  $d\pi\omega\lambda\epsilon$ ias 17<sup>13</sup>), his emphatic demonstratives, his combined particles (*rairorye*,  $\delta\mu\omega s$   $\mu\epsilon rr\alpha$ ), his weakened Ira, and especially his recurrent of, which often marks mere transition instead of logical sequence.

The distinctive vocabulary of the creative Paul is too salient and well known to be dwelt upon :his abstracts : άγαθωσύνη, άγιωσύνη, άγνύτης, άπλότης, δικαιοκρισία, δικαίωσις, δοκιμή, ενέργεια, ενύτης, εξανάστασις, έπιπόθησις, εύσχημοσύνη, ίκανότης, ίλαρότης, καινότης, κενοδοξία, μεθοδία, μωρολογία, όφθαλμοδουλία, πεποίθησις, πιθανολογία, πιώτης, προσαγωγή, σκληρώτης, violesia ;- his compounds : drarardhurros, dhahyros, άμεταμέλητος, άμετανύητος, άναπολύγητος, άνεκδιήγητος, άνεξερεύνητος, άνεξιχνίαστος, άνθρωπάρεσκος, άνταναατοξομευήτος, ατεχχρώστος, άποκαραδοκία, άπορφανίζω, άποτολμάω, έθελοθρησκία, έπαναμμυήσκω, έτεροδιδασ-καλέω, έτεροζυγέω, εύπροσωπέω, θηριομαχέω, ϊσύψυχος, όλιγύψυχος, καταβραβεύω, κατοπτρίζομαι, κενοδοξία, κοσμοκράτωρ, μετασχηματίζω, όρθοποδέω, παρεισέρχομαι, προενάρχομαι, προσαναπληρόω, συνυπουργέω, συνυπο κρίνομαι, υπερεντογχάνω;—his particles: άλλά μεν-οῦνγε, άρα οδν, ἐάν τε γάρ, ἐκτόs εἰ μή, οὐ μώνον δὲ ἀλλά καί, τὲ γὰρ... ὑμοίως δὲ καί, ὑπερεκπερισσοῦ, ὡσπερεί. ὡς ὅτι. Not less familiar are the characteristics of his style:—his long and sometimes involved sentences, his participial appendages and amplifi-cations, the irrepressible crowding of his thoughts, his imperial disregard for niceties of construction

# 42 LANGUAGE OF THE NEW TEST.

LANGUAGE OF THE NEW TEST.

in his determination to 'wreak his meaning on expression.' Very different is the studied rhetorical period-

In some respects the Ep. of James shares the characteristics of that to the Hebrews. In style, to be sure, it is very different : terse, abrupt, vivid, incisive, at times picturesque, not to say poetic. But its vocabulary exhibits a similar variety and amplitude; and in the skilful use of the Gr. language its author is inferior to no NT writer. Peculiar to him are the compounds adiakpiros, άκατάστατος, άνέλεος, άπείραστος, άποκυέω, άφυστερέω, δαιμονιώδης, θανατηφόρος, κακοπαθία, κατιόομαι, νομοθέτης, πολύσπλαγχνος, σητόβρωτος, χρυσοδακτύλιος, the bookish terms αποσκίασμα, βρύω, ξμφυτος, ενάλιος, κατήφεια, δψιμος, παραλλαγή, μυπαρία, τροπή, τροχός, και ηφεία, όψιμος, περαλλάτη, μυπαριά, τρόπη, τρόχος, τρυφάω, and the pictorial dreμίζω, αὐχέω, δἰψυχος,εὐπρέπεια, δλολύζω, μπίζω, σήπω, φλογίζω, φρίσσω,χαλιναγωγέω. His Ep. contains some seventy wordsthat are peculiar to him; while the Ep. to theHobHeb., nearly three times as long, exceeds that number by scarcely one hundred; and 1 P, nearly identical in length with James, falls short by some ten in the number of its peculiar terms. Some of James's words, e.g. πολύσπλαγχνος, χρυσοδακτύλιος, are thought to be of his own coinage.

Jude, when its diminutive extent is considered, is quite as characteristic as James in its terminology. Such words and phrases as  $\dot{a}\pi o\delta_{io}\rho l_{io}^{2}$ ,  $a\pi \pi a \sigma \tau os$ ,  $\epsilon \kappa \pi o \rho r \epsilon \omega os$ ,  $\epsilon \pi a \gamma \omega r i \delta \rho a \alpha \sigma \rho i \delta \omega$ ,  $\mu \epsilon \mu \psi l - \mu \omega l \sigma \sigma s$ ,  $\sigma \pi \alpha \delta s$ ,  $\sigma \theta l \nu \sigma \omega \rho l \nu \delta s$ ,  $\pi \rho \delta \sigma \pi a \tau \tau \delta s$  $\tau o \tilde{u} \ a \tilde{\omega} \rho os$ ,  $\theta a \nu \mu d \tilde{l} \rho \sigma \tau \epsilon s$ ,  $\pi \rho \delta \sigma \omega \pi a$ , sufficiently mark its individuality.

The vocabulary of the Petrine Epistles presents the phenomenon that of the one hundred and twenty-one words found in them and nowhere else in the NT, only one  $(d\pi;\partial e\sigma s)$  is common to both Epistles, while each Epistle exhibits about the same number of peculiar terms, —viz. the first some sixtythree, the second fifty-seven, while in length their relation is nearly seven to five.

conventionalities of Gr. grammar, of which  $\delta d\mu \eta\nu$ ,  $d\pi\delta \delta d\nu \kappa al \delta \eta\nu \kappa al \delta \epsilon\rho\chi\delta\mu\epsilon\nuos$ ,  $d\pi\delta els \xi\kappa a \sigma \tau os$ ,  $\delta it$   $\mu\nu\rho\alpha\delta\epsilon s$ ,  $\delta\mu\alpha\sigma\nu$  vide  $d\nu\rho\mu\omega\pi\sigma\nu$ ,  $\phi\omega\nu\eta$   $\lambda\epsilon\gamma\omega\nu$ ,  $\eta$  obai, obai followed by the accusative  $(8^{13}\ 12^{12})$ ,  $\delta\delta\delta\eta$   $\mu\omega$   $\kappa\delta\lambda\alpha\mu\sigmas$ ...  $\lambda\epsilon\gamma\omega\nu$ , etc., are speciments; and to them may be added a propensity to lapse into the use of the nominative, although this case is thus left suspended in mid-air (cf. 1<sup>5</sup>\ 2<sup>18</sup>\ 3<sup>12</sup>\ 7<sup>4</sup>\ 9<sup>14</sup>} 14<sup>12</sup>\ 14^{19^{11}}). Its deviations from the ordinary laws of Greek construction are at times so bold and capricious as to start the query whether the work, in parts at least, is not the mechanical reproduction of an Aramaic original.

The undeniable individuality of the several NT writers may put us on our guard against too confidently over-pressing slight variations in phrase-ology into proof of difference in authorship or of substantial difference of thought. Changes in a writer's vocabulary, even in his style, may be due to the topic treated, or the character and circumstances of the persons addressed; or may be nothing more than those varying mannerisms which temporarily bear sway with all writers except the most practised. For example, it has been noticed (see W. H. Simcox, *The Writers of the New Testament*, p. 37) that Paul to express 'in every thing' means the prior the prior of the set every thing' uses in marri in the Epistles to the Thess. and Cor. (twelve times), but in the Pastoral Epistles  $\epsilon r$   $\pi \hat{a} \sigma_{ir}$  (six [five] times), while in that to the Philippians (4<sup>12</sup>) he unites the two:  $\epsilon r$  $\pi a r r$   $\kappa a l$   $\epsilon r$   $\pi \hat{a} \sigma_{ir}$  (cf. 2 Co 11<sup>6</sup>). On the other hand, the similarities, even coincidences, in language to be noted at times in different NT writings (on comparing, for instance, the Pauline Epistles and 1 P, or 1 P and Ja, or the writings of Luke and the Ep. to the Heb.) present a problem which this is not the place to discuss. Suffice it here to say, that they suggest the early growth of a distinctive religious terminology which largely became the common possession of the brotherhood of believers; and remind us also that not all the reciprocal influence of the Christian leaders upon one another was exerted through their writings. Moreover, as well coincidences as differences in vocabulary may admonish us airesh that NT Greek is not an isolated language, but can be correctly appreciated only by being studied in its relation to the written and spoken Greek of the apostolic period.

VI. PROBLEMS.—It has been intimated more than once already in the course of this article that considerable ignorance still exists respecting sundry details belonging to the NT language. This ignorance should not be exaggerated. It is not such as to throw uncertainty over the general tenor of biblical teaching. Nevertheless, the student and the Christian are alike concerned in its removal. The frank recognition of it is an indispensable preliminary to the patient study and research by which alone it can be diminished. Over and above matters clouded in uncertainty by reason of our scanty historical knowledge—such as 'baptism for the dead' (1 Co 15<sup>20</sup>), 'the gift of tongues' (1 Co 14, etc.), the apostle's 'thorn in the flesh' (2 Co 12'), etc.—there are points both of lexicography and of grammar respecting which unanimity has not yet been reached by leading expositors, and which consequently appeal invitingly to the

Among the former may be enumerated  $\dot{a}\rho\pi a\gamma\mu 5s$ (Ph 2<sup>4</sup>; how far, if at all, is the distinction between verbal nouns in  $-\mu a$ ,  $-\mu os$ , and  $-\sigma ts$  obliterated or obscured in NT Greek?),  $\tau h\nu \, d\rho\chi h\nu \, (Jn 8^{23})$ ,  $\dot{\epsilon}\mu\beta\rho\mu\dot{a}\rho\mu\dot{a}$  (Mk 1<sup>43</sup>. Jn 11<sup>38</sup> etc.),  $\dot{\epsilon}\xi ovoia$  (1 Co 11<sup>10</sup>),  $\dot{\epsilon}\pi\epsilon\rho\dot{\omega}\tau\eta\mu a$  (1 P 3<sup>21</sup>),  $\dot{\epsilon}\pi t\beta a\lambda\dot{\omega}$ (Mk 14<sup>72</sup>),  $\dot{\epsilon}\pi toio\sigma toos$ (Mt 6<sup>11</sup>, Lk 11<sup>3</sup>),  $\epsilon\dot{\sigma}\pi\epsilon\beta a\lambda\dot{\omega}$  (Mk 12<sup>4</sup>),  $\kappa a\tau o\pi \tau\rho i f \rho\mu a$ (2 Co 3<sup>16</sup>),  $\kappa\epsilon\phi at.\dot{\omega}$  (Mk 12<sup>4</sup>),  $\kappa\sigma\rho\mu\kappa\dot{s}s$  (He 9<sup>4</sup>),  $\dot{\sigma}\delta\delta\sigma$  $\pi\alpha\epsilon\hat{\mu}$  (or  $\dot{\delta}\delta\sigma\sigma ot\hat{\epsilon}\mu$ , Mk 2<sup>22</sup>),  $\pi a\rho a\rho\nu\dot{\omega}\mu\epsilon$  (He 2<sup>1</sup>),

**προεχόμεθα (RO 3<sup>9</sup>), στιλάδε**ς (Jude <sup>13</sup>), συναλίζομαι (Ac 1<sup>4</sup> etc.), συνκρίνοντες (1 Co 2<sup>13</sup>), τροπής αποσκίασμα (Ja 1<sup>17</sup>), τροχός γενέσεως (Ja 3<sup>4</sup>). Further, what is the distinction, or how far is it regarded by the NT writers, between  $\delta\lambda\lambda\phi s$  and  $\delta re\rho s$  (e.g. Gal 1<sup>6.</sup>),  $\beta o i \lambda \phi \mu a$  and  $\theta \epsilon \lambda \omega$  (e.g. Mt 1<sup>19</sup>),  $\epsilon l \mu l$  and  $i \pi \epsilon \rho x \phi$  (e.g. Ph 2<sup>6</sup>), etc. ? How far do the uses of  $\epsilon i s$  and  $\epsilon r$  tend to approximate, and the difference in the classics between the several cases after prepositions (e.g.  $\pi \rho s_s$ ) grow indistinct? Does els  $\tau s$  with the infin. always express purpose? What is the difference between efre and elsep? Is  $\delta s \sigma r$  ever equivalent to the simple for ? Is on ever tantamount to the interrogative tohy (Mk 9<sup>11, 28</sup>), or does  $\epsilon i$  introduce a direct question? Does Paul use the 1st pers. plur. of himself alone ? etc. etc.

Turning to points more strictly grammatical, we may mention—the use and force of the article : how far (if at all) does it deviate from the classic standard ?—with  $\pi \hat{a}s$  (e.g. Eph 2<sup>21</sup> 3<sup>8</sup>, Ac 2<sup>36</sup>, 1 Ti <sup>14</sup>); with  $\pi \nu \mu \sigma$ ; with  $\pi \nu \nu \mu \sigma$ ; in such pas-mages as Ro 5<sup>7</sup> 3<sup>30</sup>, 1 Ti 2<sup>15</sup>. Is the classic law requiring an article before an attributive participle which follows a definite antecedent rigorously observed (cf. 1 P  $3^{19}$ .  $3^{19}$ )? Is there any difference in meaning between ο δχλος πολύς and ο πολύς δχλος (cf. Jn 12°. 12 and Mk 12°7)? What is the difference between adros and excises in 2 Ti 238? Are adrou, etc., used reflexively? Is  $\delta\sigma\tau$ ; ever a pron. of simple reference  $(i,q, \delta;, cf. Mt 22^2 18^{23})$ ? What is the force of the genitive in the phrases δικαιοσύτη θεοῦ (cf. Ro 1<sup>17</sup>), τίστις Ἰησοῦ Χριστοῦ (Ro 3<sup>22</sup>)? Does drover  $\phi \omega r \eta$ ; differ in sense from  $\phi \omega r \eta r$  drover (cf. Ac 9<sup>4,7</sup> 22<sup>7,9</sup> 26<sup>14</sup>, and see Buttmann, NT Grammar, §§ 132, 17; 144, 16)?

The matters above specified are called 'problems,' because difference of opinion about them still exists in reputable commentaries; although it may be questioned whether several of them have not been already disposed of in the judgment of scholars. To them may be added the stock exe-getical problems, such as Mt  $6^{13}$ , Lk  $12^{49}$  187, Ac  $26^{391}$ , Ja 4<sup>5</sup>, 2 P  $1^{29}$ ; together with more general questions, such as, What effect, if any, had amanu-enses on the style of the NT writings? What indications, if any, of the locality of their origin do the NT writings disclose? What influence, if any, had the Heb. parallelism in obliterating for the Jewish-Greek mind the delicate shades of difference between Gr. synonyms? What influence, if any, had the use of Jewish manuals in producing agreement in the form or the employ-ment of OT passages? (Note the agreement in combined quotations, deviating in the same par-ticulars from the LXX, which occur in Ro  $9^{32.33}$ and I P  $2^{2-3}$ ; cf. Ro  $12^{19}$  with He  $10^{30}$ ).

The uncertainties still cleaving to the NT language it is by no means over-sanguine to hope may be gradually, and in the end greatly, reduced. Not a little help towards this result is yet to be drawn from the literary relics of the centuries immediately preceding and following the Christian era. The more accurate editing and careful study of these relics, which is already engaging the efforts of scholars, is yielding results which both justify and augment expectation. Particulars, individually slight, amount to a considerable gain in the aggregate. Meantime, noteworthy accessions to our knowledge of the language of the Alexand. and Gr.-Roman period have already come from the inscriptions, and especially the papyri (some of them going back to the days of the Ptolemies), which the last few decades have unearthed, and which it may reasonably be hoped are but the first-fruits of a rich harvest of discovery. Resemblances in phraseology are instructive even where the intellectual and religious quality of the concep-tions covered may be widely different (cf. e.g. vios

 $\theta \epsilon o \hat{v}$ ,  $\kappa \dot{v} \rho \iota o s$ ,  $\sigma \omega \tau \eta \rho$ , as used of the Roman emperors, and in the vocabulary of the Stoics). Moreover, the unalterableness, and in many cases the definite date of many of these sources, lift their testimony above the suspicion of possible clerical modification from which the text of even our best extant NT MSS is not always quite free.

from which the text of even our best extant N1 MSS is not always quite free. VII. The LITERATURE of our subject requires little space here. Suffice it to refer the reader to Schmiedel's 8th ed. of Winer's Grammatik, of which the first part (*Einleit. und Formenlehre*, pp. 194) appeared in 1894, the second in 1897, and where almost no publication of moment is left unmentioned. A careful review of Pt. i. by W. Schmid in the GGA, 1895, No. 1, pp. 26-47, deserves also to be consulted. The comparison of the NT language with the later Gr. has been greatly facilitated by the last named scholar's elaborate work, *Der Atticismus in seinen Haupteertretern von Dionysius von Halikarnass bis auf den ruesien Philostratus* (vol. i. 1887, vol. ii. 1889, vol. iii. 1893, vol. iv. 1896, Index 1897), by the treatise of William Schmidt, de Flavii Josephi elocutione, etc., in Fleckeisen's 'Jahrbücher für classische Philologie,' 20ter Supplementband (1894, pp. 345-550), by the Subsidia ad cognoscendum Gracorum sermonem rudgarem e Pentateuchi versione Alexandrina repetita of H. Anz in 'Dissertationes Philolog. Halenses,' vol. xii. (1894) pp. 261-387, and by G. A. Deismann's Bibelstudier (Marburg, 1895), which contains, pp. 57-168, an instructive study of the Gr. of the LXX in the light of the results furnished by papyri and recently-discovered inscriptions; supplemented in 1397 by *Neus Bibelstudien*; new ed. in Eng. tr. by Grieve, 1900. Other noteworthy recent works dealing directly with the language of the NT are: Joseph Viteau, *Elude sur le Gree du Nourceau Testament: Le Verbe*; Syntax dre Propositions (pp. 240, 8°, Paris, 1893), especially convenient owing to the summary of NT peculiarities given at the close of every chapter; particular attention is paid also to the usage of the LXX, which is made still more prominent in his *Etude*, etc.; Sujet, *Complément et Altribuit* (pp. 248, R-aris, 1890); F. Blass, Grammatik d. Neutest. Griechieck (pp. 329, 8°, Gottingen, 1896; Eng. tr. by Thackersy, 1898), which has the excepti

187, Lond. 1896. The multiplyi

187, Lond. 1890. The multiplying of manuals of a popular character (Combe, Huddilston, Moulton) indicates a growing interest in the language, and emphasizes the demand for a new work by a master hand which shall combine the excellencies of the standard treatises of Winer and Buttmann, utilize the knowledge of the subject which has accumulated during the last thirty years or more, and furnish a student with a compact yet com-plete handbook.—[1897].

LANTERN occurs only in Jn 18<sup>3</sup> 'with lanterns and torches and weapons,' where it is the tr. of paros, a word which occurs only here in biblical Greek, and is not common elsewhere. That 'torch' would be a more accurate rendering than 'lantern' seems clear from Xenophon's  $i\pi\delta$   $\phi$ aroo'  $\pi$ opeieedaa (*Rep. Lac. v. 7*). The word is formed directly from  $\phi$ airw' to give light.' The Eng. tr. is from Wyclif, 'with lanternis and brondis and armys,' who thus translates the Vulg. 'cum laternis to follow the stranslates the Vulg. 'cum laternis et facibus et armis,' and all the versions follow with 'lanterns' (except Cov. who has 'with cres-hettes, with lanternes, and with weapens'). 'Lantern' was formerly used with more freedom than now. Wyc. translates Jn  $5^{35}$  'Sothli he was a lanterne brennynge and schynynge' (Tind. 'He was a burninge and a shyninge light'; Geneva, 'candle'), and Ps 119<sup>105</sup> 'Lanterne to my feet thi woord; and light to myn pathis' (1388 'Thi word is a lanterne'); so Cov. 'Thy worde is a lanterne wate my fets and a light unto my nethes' and unto my fete, and a light unto my pathes,' and this is the form in which the verse is quoted at the time; as, Tind. *Expositions* (Parker Soc.), p. 149; Ridley, *Brefe Declaration*, 96, 'by the lanterne of thy worde'; Knox, *Works*, iii. 301, The bryght lantarne to the fete of these that by nature walke in darkenesse'; and Davenant, ast Sermon (Fuller's Life, p. 276).

Trench in his NT Synonyms, p. 157 ff., endeavours to dis-tinguish the five words  $\phi \tilde{\omega}_i$ ,  $\phi i\gamma\gamma s_i$ ,  $\phi worr i_j$ ,  $\lambda i_{\chi} s_i$ , and  $\lambda a_{\mu} x s_i$ ;

but ne seems to have forgotten easis.  $\Phi\bar{v}$ ; and  $\phi'_{i}\gamma_{j}\sigma_{i}$  incan 'light,' the former chiefly the light of the sun, the latter chiefly that of the moon.  $\Phi_{v}\sigma_{i}\gamma_{j}$  is a luminary.  $A_{i}\gamma_{i}\sigma_{i}$ , the thinks, should always be translated 'lamp,' and  $\lambda_{i}\mu\sigma_{i}$ ' torch.' These distinctions are valid, though it is not possible to ob-serve them invariably. How far the RV has done so may be seen from the following list:--  $\sigma\bar{v}$ ; is cretrywhere 'light' in AV and RV, except Ja 117 AV and RV 'lights' ('the Father of lights,'  $v\bar{v}v \phi irvo, \lambda$  & 1620 RV ('he called for lights,'  $o\bar{v}\sigma_{i}$ ); in BM 14<sup>34</sup> AV renders  $\sigma_{i}\sigma_{i}$   $\sigma\bar{v}$  via the fire,' and in the par. passage Lk 229<sup>d</sup> 'by the fire,' RV both 'in the light of the fire '; in Eph 5<sup>4</sup> edd. prefer is mapser  $v\bar{v}\phi$  over for TR  $v\bar{v}v\mu\sigma\sigma_{i}$ , whence BV 'the fruit of the light' tor AV 'the truit of the Spirit.'  $\phi errisons$  with RVm 'luminaries.'  $\phi_{j}\gamma\sigma v$  occurs only in Mt 24<sup>30</sup>, Mk 13<sup>34</sup>, Lk 11<sup>33</sup>, and both versions have 'light.'  $\lambda_{a}\rho\sigma\sigma_{i}$  is in AV translated 'lamp' in Mt 251.3 4 7.8, and RV retains with marg. 'torch,' also in Rev 4<sup>4</sup>, which RV retains without margin. In Rev 8<sup>10</sup> RV turns AV 'lamp' into 'torch,' but retains AV 'torch' in Jn 18<sup>3</sup> and 'light' in Ac 203.  $\lambda_{i}\gamma\sigma v$  has been translated 'lamp' in Mt 261.3 4 7.8, and RV retains with marg.'t torch,' also in Rev 4<sup>5</sup>, which RV retains 15<sup>6</sup>, Rev 18<sup>23</sup> 22<sup>5</sup>; and 'light' in Mt 6<sup>25</sup>, Lk 11<sup>34</sup> 12<sup>30</sup>, Jn 5<sup>35</sup>, 2 P 1<sup>19</sup>, Rev 21<sup>32</sup>. J. HASTINGS.

LAODICEA (Aaodikia, Tisch. and WH, as appears **Laodicia** (Acookia, fisch, and with, as appears in N everywhere, and in B Col 2', Rev 1<sup>11</sup> 3<sup>14</sup>: Laodicia or Laudicia often in Latin Versions. B has Accoline in Col 4<sup>15, 16, 16</sup>; so TR everywhere. Accoline is certainly the correct Greek form; it is the practically universal form in Greek literature, Strabo, Steph. Byz., Philostratus, etc., also an inscription dated [ $d\pi \partial$  Accoline A.D. 129.\* The good Latin form is Laodicea, not Laodicia. The early Turkish form Laddick tempere Ladik still early Turkish form Ladhik + [compare Ladik, still used of the Pontic and Lycaonian cities] points to Aaodikeea. The forms Aavdikeea and Aadikeea occur later) .- Laodicea, distinguished from other cities of the same name as  $d\pi l$   $\tau \phi \Lambda \delta \kappa \phi$ , or ad Lycum, was founded probably by Antiochus II. Theos, B.C. 261-246, and named after his wife Laodike. It was placed on a spur of the low hills fringing the Lycos valley on the south, about 2 miles south from the river. It is close to the station Gonjelli on the Ottoman Railway, and the branch line to Denizli runs up the valley of the little river Asopos, close to the western gates of the city. It was distant only 6 miles from Hiera-polis, and 11 from Colossæ (Col 4<sup>18, 16</sup>). Behind the hills to the south, only a few miles away from the city, rises the great range of Mount Salbakos (Baba Dagh), and to the south-east Mount Kadmos (Khonas Dagh), both reaching to the height of about 8000 ft. above the sea, while the city is only about 800 or 900 ft. above the sea. Before Laodicea was founded, the chief town or village of this part of the valley was certainly situated at Denizli, 6 miles south, close under Salbakos, where the natural water supply was extraordinarily abundant; and after Laodicea decayed, about the end of the 11th cent., Denizli again took its place as the chief city of the whole valley. ‡ Laodicea was dependent for its water on an aqueduct whose maintenance required more skill and prudence than could be applied in the 12th cent. It has ever since been called Eski-Hissar, 'the Old Fortress,' as distinguished from the modern city Denizli, 'Full of Waters,'

The site of Laodicea is now utterly deserted. The ruins are not conspicuous or imposing; the site has been rifled to build and repair Denizli, and in recent years much injury has thus been done to the old city.

The city Laodicea was founded to be a garrison and centre of Seleucid power in the country, and

<sup>6</sup> See quotations Cities and Bish. of Phr. i. pp. 32, 37, 38, 44, 47, 54. The form Λαοδικίας occurs chiefly in the genitive case, in which the accent of Λαοδικίας falls on the same syllable as

that of Account of Account of the second sec Acedi 1 Op. cit. p. 201.

#### LAODICEA

population was selected and planted there likely to be loyal to the Seleucid kings. Hence there are some traces of a Syrian element in the population. Jews also formed part of the citizens; these may have been brought there by the founder, or been settled there by Antiochus the Great towards B.C. 200, when he sent 2000 Jewish families from Babylonia to the cities of Phrygia and Lydia (Josephus, Ant. XII. iii. 4).† In B.C. 62 Flaccus, the governor of the province Asia, refused to let the money which was regularly sent to Jerusalem. by the Jews go out of the country, because he feared that the loss of specie might be dangerous. At Laodicea, by the governor's orders, 20 pounds weight of gold, which had been collected by the Jews.

Laodicea was a small city until after the Roman period had begun; then it rapidly became great and rich. Destroyed by an earthquake in A.D. 60, it disdained to seek help from the liberality of the Emperors, as many of the greatest cities of Asia had done; propris opibus revaluit (Tacitus, Ann. xiv. 27). Hence its boast, Rev 3<sup>17</sup> 'I am rich, and have gotten riches, and have need of nothing. It was renowned for the beautiful glossy black wool of its sheep, and carried on a great trade in garments manufactured from this wool. Owing to its central position at the point where the great trade-route from the East was joined by several branch-roads, and its importance as chief city of the Cibyratic conventus, to which, at stated intervals, the people of many cities and a large district flocked, it became a centre of banking and financial transactions; and Cicero intended to cash there his bills of exchange (Ep. ad Fam. iii. 5. 4). Hence Rev 318 'I counsel thee (not to take the gold of thy bankers, but) to buy of me gold refined by fire, and (not the glossy black garments made in the city, but) white garments.

city, but) white garments.' Laodicea was not far east of the temple of Men Karou, connected with which was a famous school of medicine in the century immediately before and after Christ. There was an article called 'Phrygian Powder,' used to cure weakness of the eyes; it is very probable that this was made at Laodicea.<sup>‡</sup> Hence 'I counsel thee (not to use thy 'Phrygian Powder,' but) to buy of me eyesalve to anoint thine eyes that thou mayst sco' (Rev <sup>318</sup>) see' (Rev 318).

Very little is known about the history of hristianity in Laodicea. Timothy, Mark, and Christianity in Laodicea. Timothy, Mark, and above all Epaphras (Col 1<sup>7</sup>), are likely to have been The boots and physical in spreading the new violate been in the Lycos valley; after them came Philip the Apostle, and (according to late tradition) John. Archippus, Nymphas (Col  $4^{16}$ ), and Diotrephess (3 Jn<sup>5</sup>), are named by untrustworthy tradition as the first bishops of Laodicea. Sagaris, a bishop of Laodicea, died a martyr about A.D. 166. Sisinnius, a bishop and Artenore a presbuter under Dio a bishop, and Artemon a presbyter, under Dio-cletian, are mentioned in the Acta S. Artemonis (Oct. 8), a late and poor production.§ Few Christian inscriptions are known. Laodices was repre-sented by its bishop Nounechios at the Council of Nicea, A.D. 325; and a council was held in the city about 344-363. It was the leading bishopric

\* Op. cit. p. 33. † On the history of the Phrygian Jews (who seem to have been far more numerous in Apameia and Central Phrygia than in Laodices) see op. cit. pt. ii. ch. xv. ‡ 80 the famous Polemon of Laodices was called 'the Phrygian' by his admirer Herodes Atticus, op. cit. pt. 44, 53. § Other martyrs at Laodices, op. cit. pt. ii. pp. 494, 512. # LAODICEANS

of Phrygia throughout the Christian period. The subscription at the end of 1 Ti,  $\epsilon \gamma \rho d \phi \eta d \pi \delta \Lambda a \sigma \delta \kappa \epsilon i a s,$ has no authority, and is certainly false. The Epistle called  $\eta \epsilon \kappa \Lambda a \sigma \delta \kappa \epsilon i a s$  (Col 4<sup>16</sup>) is perhaps the existing Epistle to the Ephesians (wh. see). The

existing Epistic to the Ephesians (wh. see). The ro-called Epistola ad Laodicenses is a late and worthless forgery. St. Paul himself had never visited the Lycos valley (Col 2<sup>1</sup>). Laodicea is classified by NT writers under the geographical name Asia. Zahn, however, and Blass consider that St. Luke reckoned it, not under Asia, but under Phrygia (see LYDIA, against this view) this view).

LITERATUEL -- Most of what has been learned about Laodicea is collected by Ramsay, *Cities and Bishoprics of Phrygia*, pt. i. pp. 1-83, 3421.; pt. ii. pp. 512 ff., 542 ff., 785 f. Anderson in *Journal of Hellenic Studies* (1897), p. 404 ff., and Weber in *Jektröich. des Arch. Instituts* (1898), pt. i., supplement that work. Among the older travellers Hamilton gives the best account; but Smith, Pococke, Chandler, Arundell, Fellows, Texier, are all worth reading. W. M. RAMSAY.

LAODICEANS (Acoduce's, Latin Laodicenses) is the correct term for the people of Laodicea (Col Aaoderee's is the invariable form on coins. 416). Aaodianyo's is used in the sense of 'made in, or belonging to, Laodicea'; and in Latin Laodicenus also occasionally is used for a man of Laodicea. W. M. RAMSAY. LAPPIDOTH (mys) 'torches,' flames,' cf. Ex

20<sup>18</sup>; B Δαφειδώθ, A Δαφιδώθ).—Husband of Deborah, Jg 4. For the form of the name, with the fem. plur. ending-6th, cf. Naboth, Meremoth, Meraioth, Jeremoth, Mikloth; prob. an intensive plur. (König, Caricar d Heb. Sar & Sel), perhaps with a former. Syntax d. Heb. Spr. § 261), perhaps with a figura-tive meaning (Böttcher, Lehrbuch, § 719a). Jewish commentators, e.g. D. Kimchi, Levi ben-Gershom, prophesying. These explanations are improbable. G. A. COOKE.

LAPWING .- See HOOPOE.

LARGE.-Like Lat. largue, 'large' formerly expressed abundance rather than bulk. Its meanexpressed abundance rather than bulk. Its mean-ings in AV are all practically obsolete, and are apt to be missed. 1. Spacious, of great extent, as Jg 18<sup>19</sup> 'When ye go, ye shall come unto a people secure, and to a large land '(סיד רבה ירים, RV 'and the land is large'; lit. 'spacious on both hands'); Neh 4<sup>19</sup> 'The work is great and large, and we are separated upon the wall, one far from another'; Is 30<sup>26</sup> 'In that day shall thy cattle feed in large pastures'; Jer 22<sup>14</sup> 'I will build me a wide house and large chambers' (or grant another) Avin chouse and large chambers' (אלית קרהים), AVm 'through-nired chambers'; RV 'spacious chambers'); Rev 21<sup>16</sup> 'And the city lieth fourchambers'); Rev 21<sup>16</sup> 'And the city lieth four-square, and the length is as large as the breadth' (RV 'as great as the breadth'). Cf. Howell, *Letters*, L. i. 5, 'I pray God bless us both, and send us, after this large Distance, a joyful meet-ing.' 2. Unconfined, free, as  $2 S 22^{20} \parallel Ps 18^{10}$  'He brought me forth also into a large place' ( $_{2772}$ ,  $tr^4$  'a large place,' also in Ps 118<sup>5</sup>, Hos 4<sup>16</sup>, but in Ps 31<sup>6</sup> 'a large room,' RV 'a large place'; except in Hos (where see Cheyne's note), it is an expres-sion denoting great prosperity. De Witt trans-lates Ps 18<sup>19</sup> 'He brought me forth into room unconfined,' and points out that the opposite is lates Ps 18<sup>25</sup> 'He brought me forth into room unconfined,' and points out that the opposite is the 'calamity,' or 'sore pressure' of the previous verse); 2 Es 1<sup>15</sup> 'I led you through the sea, and in the beginning gave you a large and safe pas-sage' (plateas vobis in invio munitas exhibui, RV 'where there was no path I made for you high-

ways'). Cf. Mt 7<sup>13</sup> Rhem., 'Enter ye by the narrow gate, because brode is the gate, and large is the way that leadeth to perdition.' So Hall, *Works*, ii. 2, 'None but a sonne of Aaron night of the terms of terms of the terms of terms offer incense to God in the temple ; and not every sonne of Aaron, and not any one at all seasons: God is a God of order, and hates confusion no lesse than irreligion : albeit he hath not so straitned himselfe under the Gospell, as to the his service to persons, or places, yet his choice is now no lesse curious because it is more large; he allowes none but the authorised, he authoriseth none but the weather? the worthy.' Cf. also Shaks. As You Like It, 11. vii. 48-

'I must have liberty Withal, as large a charter as the wind, To blow on whom I please';

and Hamlet, IV. iv. 36-

Sure, He, that made us with such large discourse, Looking before and after, gave us not That capability and godlike reason To fust in us unused.

8. Liberal in giving, only Mt  $28^{13}$  'They gave large money unto the soldiers' (Tindale's tr., Gr.  $d\rho\gamma\dot{\rho}\mu a \, kard$ ). This meaning was once very common. Thus Shaks. 2 Henry VI. 1. i. 111-

'the poor King Reignier, whose large style Agrees not with the leanness of his purse';

and Dryden, Brit. Red. i. 86-

'Large of his treasures, of a soul so great As fills and crowds his universal seat.'

As fills and crowds his universal seaf.' In Gal  $(^{11}$  we have the nearest approximation to the modern use, 'Ye see how large a letter 1 have written unto you with mine own hand.' The Gr. is  $\sigma_{Nissest}$   $\gamma_{piquasen}$ , which RV translates 'with how large letters,' introducing the modern meaning of 'large' unmistakably. Field (Otium Nore. iii. 117), who calls the RV the only possible rendering, says, 'St. Paul was a very indifferent pennan, and when he did not employ an ananuensis, was obliged to write in very large and, probably, 'll-shaped characters'. He illustrates from Plutarch's Cato: 'In describing Cato's method of educating his son, the historian tells us that he wrote histories for him with his own hand and in large characters' ( $\partial_{ij} \sum_{up'} \sum_{uj' u \neq i} \sum_{u' \neq u' \neq u' \neq u' \neq u'}$ . The Eng. word recalls Milton's Sonnet 'New Forces of Conscience'— 'New Presenters' in to did Priest writ large '.

'New Presbyter is but old Priest writ large.'

The phrase 'at large' occurs Wis 199 'For they went at large like horses' (ereuhonsar, Vulg. dewhen the large like holes ( $e_{\mu}\mu_{\rho}\mu_{\sigma}\mu_{\sigma}$ , ving. de-paverunt [escam]; RV 'they roamed at large'); Sir 47<sup>13</sup> 'After him [David] rose up a wise son, and for his sake he dwelt at large' ( $\kappa a \tau \epsilon \lambda v \sigma \epsilon \nu$   $\epsilon \nu$  $\pi \lambda a \tau v \sigma \mu \omega$ ; Bissell explains, 'He was no more full of more for this rough that he can up all full of care for this and that; he gave up all to the management of his wise son.' But Ball (QPB), 'Solomon enjoyed ease and freedom for David's sake'); 2 Mac 2<sup>300</sup> 'To stand upon every point, and go over things at large, and to be curious in particulars, belongeth to the first author of the story ' (περι πάντων ποιείσθαι λόγον, RV ' to in-dulge in long discussions,' RVm ' to provide a place for discussions.' Fritzsche prefers the reading of codd. A and V xeptrarov rosciedas Noyw, 'to make the round of matters'). Cf. Rhem. NT, p. 204 (Argument to John's Gospel), 'the intent of this evangelist writing after the other three, was, to omit the Actes of Christ in Galilee, because the other three had written them at large; and to reporte his Actes done in Iurie, which they had omitted.

Largely, in the sense of freely, occurs in 1 Mac 1616 ' when Simon and his sons had drunk largely ( $\epsilon_{\mu\nu}\epsilon_{\delta'\sigma}\epsilon_{\eta}$ , RV 'had drunk freely'; Ball and Bissell, 'were drunk,' which is the only possible meaning). Cf. North's *Plutarch*, 'Alexander,' p. 687, 'Then. did Alexander offer great presents unto the god, and gave money largely to the priests and ministers of the temple.

Largeness occurs only 1 K 4<sup>29</sup> 'And God gave Solomon wisdom and understanding exceeding much, and largeness of heart' (j > j), where the meaning is not, as now understood, a charitable disposition, but breadth of intellectual interest,

Digitized by Google

LASCIVIOUSNESS

the difference being due, however, to the differ-ence between the Heb. and Eng. uses of 'heart.' Thus the marg. of the Geneva Bible (copied into the Bishops' Bible) explains the phrase, 'able to comprehend all things,' where the tr. is 'a large heart.' But it is probable that as first used by Wardlif the Eng. where meant liberality in giving heart.' But it is probable that as first used by Wyclif the Eng. phrase meant liberality in giving, as the marg. note to the 1388 ed. has '*largenesse* of *herte*, to spende in greet worschip.' Cf. Elyot, *Governour*, ii. 104, 'Crœsus, the riche king of Lidia... saide on a tyme to Cyrus, when he behelde his liberalitie, that suche largenesse as he used shulde bringe hym in povertie, where, if he lysted, he mought accumulate up treasure incomparable.' J. HASTINGS.

**LASCIVIOUSNESS** is the tr. in AV and RV of  $d\sigma \epsilon \lambda\gamma \epsilon_{ia}$  in Mk 7<sup>22</sup>, 2 Co 12<sup>21</sup>, Gal 5<sup>19</sup>, Eph 4<sup>19</sup>, 1 P 4<sup>3</sup>, Jude <sup>4</sup>. The Gr. word is found also in Ro 13<sup>13</sup>, where both versions have 'wantonness,' and three times in 2 P, viz. 2<sup>2</sup> TR  $\pi o\lambda \lambda d$   $\epsilon \bar{\epsilon} a x o\lambda out the d d a x b a shall follow their average wave' but add d a share graph of the RV$ airiber rais  $d\pi\omega\lambda\epsilon iaus$ , AV 'many shall follow their pernicious ways,' but edd.  $d\sigma\epsilon\lambda\gamma\epsilon iaus$ , whence RV 'their lascivious doings';  $2^{7} \epsilon^{\mu} d\sigma\epsilon\lambda\gamma\epsilon ia dra\sigma\tau\rhoo\phi\eta$ , AV 'filthy conversation,' RV 'lascivious life'; and  $2^{18} d\sigma\epsilon\lambda\gamma\epsilon iaus$  AV 'through much wantonness,' RV 'by lasciviousness.' In LXX  $d\sigma\epsilon\lambda\gamma\epsilon ia$  occurs only twice, Wis  $14^{26}$  AV 'shameless unclean-ness,' RV 'wantonness'; and 3 Max  $2^{26}$  'acts of impiate ' impiety.'

The etymology of  $d\sigma\epsilon\lambda\gamma\epsilon\mu$  has had a curious history. The derivation from a priv. and  $\Sigma\epsilon\lambda\gamma\eta$ , a Pisidian city, is still mentioned by lexicographers, though it is doubtful if it was for morality or immorality that that city was famous : Thayer-Immorality that that city was famous: Inhyer-Grimm, 'whose citizens excelled in strictness of morals'; Trench, 'whose inhabitants were in-famous for their vices.' The favourite derivation is, however, a and  $\sigma\epsilon\lambda\gamma\omega$ , i.e.  $\theta\epsilon\lambda\gamma\omega$  to charm. But the use of the word in NT alone is sufficient to fix its meaning and to show that 'lasciviousness' is too restricted and definite to cover it all. The meaning is absence of restraint, indecency; and although that is generally regarded as shown in sensuality, there are passages, as Mk  $7^{22}$  and 1 P 4<sup>3</sup>, where sensuality is not yet in sight. In the latter passage, as Salmond points out, the writer begins with a general term ('excesses') sufficient to include unbridled conduct of all kinds, summent to include unbridled conduct of all kinds, and then passes to particulars. Trench thinks 'wantonness' the best rendering, 'standing as it does in a remarkable ethical connexion with  $d\sigma \epsilon \lambda \gamma \epsilon a$ , and having the same duplicity of mean-ing,' *i.e.* indecency in general and sensuality in particular. See Trench, NT Synonyms<sup>8</sup>, p. 54 ff., and Thayer, NT Greek Lex., s.v. The leading idea in the word is probably conduct that is showeless in the word is probably conduct that is shameless. It is thus joined with  $\pi \circ \rho \nu \epsilon ia$  and  $\delta \kappa a \delta a \rho \sigma f a$  in 2 Co 12<sup>21</sup> and Gal 5<sup>19</sup>, where  $\pi \circ \rho \nu \epsilon f a$  is a special form of 12<sup>21</sup> and Gal 5<sup>19</sup>, where  $\pi o \rho \nu \epsilon i a$  special form of impurity;  $a \kappa a \partial a \rho \sigma i a$  uncleanness of any kind that may, however, be unseen;  $a \sigma \epsilon \lambda \gamma \epsilon a$  uncleanness that shocks public decency. See Lightfoot on (Gal 5<sup>19</sup> and 1 Th 2<sup>3</sup> (the latter in Notes on Epp. of St. Paul, p. 21). It is remarkable that in all the places in which 'lasciviousness' is found it has been introduced by the AV translators. The earlier word is nearly always 'wantonness' (except in Wyc. and Rhem. following the Vulg. too closely and giving 'lechery' or 'impurity' mostly). RV has carried the mistake still further by changing 'wantonness' of 2 P 2<sup>18</sup> into 'lasciviousness.' J. HASTINGS.

J. HASTINGS.

LASEA (Adoata) is never mentioned by any ancient author except St. Luke; but in the 'hundred-citied' Crete it is not strange that an unimportant town should be only once mentioned. Jasaia was near Fair Havens (Ac  $27^8$ ); and as St. Paul's ship lay for some considerable time in

#### LASTHENES

the Havens, it would be necessary to purchase stores from the city, on which account it comes to be mentioned by the historian. The ruins of the city were examined in 1856 by the Rev. G. Brown. They are about 5 miles east from the Havens, and 1 mile east from Cape Leonda or Leona; and I mile east from Cape Leonda of Leona, and according to Mr. Brown are still called Advaa by the Cretan peasantry. This may probably be the Lisia mentioned in the Peutinger Tables as 16 miles south from Gortyna. In an air line the distance on the map seems hardly more than 12 miles; but in mountainous Crete the road may be 16 miles. Mr. E. Falkener has published an old Venetian description of the island of Crete, which mentions in this neighbourhood a place Lapsea, with a ruined temple (Mr. Brown mentions two temples).

LITERATURE.—Smith, Voyage and Shiptoreck of St. Paul, Srd ed. p. 2051.; Falkener in Museum of Class. Antig. (1852), p. 287. W. M. RAMSAY.

LASHA (μψ), A Δάσα, E and Luc. Λάσα). — Men-tioned only in Gn 10<sup>19</sup>, as forming the boundary of the Canaanites towards the east. Jerome and Jerus. Targum identify with the famous hot springs of Callirrhoë in the Wâdy Zerka Ma'in to the east of the Dead Sea; but this appears to be too far to the north, and, as Dillmann remarks, we rather expect a situation on the west side of the Dead Sea or of the Ghôr. Wellh. (JBDTh xxi. 403 f.) would change المراجع into المراجع into المراجع i.e. Laish (Dan) on the northern boundary of Canaan ; but the boundary from north to south seems to have been sufficiently given in the words 'from Zidon ... to Gaza,' and we expect a boundary now in a new direction, namely, from west to east. One might think of the promontory *el-Lisán* at the south end of the Dead Sea, but if this were in-tended, the art. would have been found, je<sup>3</sup>7, as in Jos 15<sup>2</sup>. J. A. SELBIE.

**LASSHARON.**—Amongst the kings subdued by Joshua, the MT (followed by AV, RV) includes the king of Lassharon (AVm Sharon). In the *Onomas.* (s. 'Saron') the name *Sharon* is applied to the region between Tabor and the Lake of Tiberias, stated to be 'still called Sarona.' The name Sarina is at the present day applied to a ruin on this plateau, which is a possible site for Lassharon (SWP vol. i. sheet vi.). Sarona is mentioned on the list of Thothmes III. See PALESTINE.

The text of Jos 12<sup>18</sup> appears to be in some dis-order. While MT has רְכָלָה לְכָרוֹן, B of the LXX has βασιλέα 'Οφέκ τῆs' Αρώκ (A simply βασιλέα 'Αφέκ), where 'Αρώκ is doubtless a corruption of Σαρών. The Heb. text before B would thus appear 

**LASTHENES** ( $\Lambda a\sigma \theta \epsilon \nu \eta s$ ), an officer of high rank under Demetrius II. Nikator. He bears the honorary titles of 'kinsman' (συγγενήs 1 Mac 1131) and in the second s young prince (cf. Rawlinson and Zöckler). Himself a Cretan, he raised a body of Cretan mercenaries, and enabled Demetrius to land in Cilicia, and wrest the throne of Syria from Alexander Balas (Jos. Ant. XIII. iv. 3, cf. 1 Mac  $10^{cr}$ ). From the new kin ' Lasthenes seems to have received some official position, possibly that of governor of Cœle-

#### LATCHET

Syria (cf. 1 Mac 10<sup>60</sup>). Hence when Demetrius was endeavouring to make terms with Jonathan the Maccabæan, he wrote to Lasthenes in favour of the Jews, and forwarded a copy of his letter to the Jewish prince (1 Mac 11<sup>29-27</sup>, Jos. Ant. XIII. iv. 9). It is probable that Lasthenes was the powerful tyranny of Demetrius, eventually brought about his overthrow by Tryphon (Diod. xxxiii. 4, and Vales. ad loc.). H. A. WHITE.

**LATCHET** ( $i\gamma\psi$ ,  $i\mu4s$ ).—The word refers to the leather thongs used for tying on sandals. (See DRESS, vol. i. p. 627<sup>a</sup>). In Gn 14<sup>23</sup> Abram tells that no loose girdles or broken latchets would be seen in it. John the Baptist indicates his relationship of inferiority by saying that he is unworthy to loose the latchet of the shoes of Christ (Mk 1<sup>7</sup>, Lk 3<sup>16</sup>, Jn 1<sup>27</sup>). Among Orientals everything con-nected with the feet and shoes is defiled and debasing, and the stooping to unfasten the dusty latchet is the most insignificant item in such service. G. M. MACKIE.

LATIN.-In Jn 1920 (Lk 2326 inferior text) it is stated that the inscription on the tablet placed upon the cross by Pilate 'was written in Hebrew, and in Latin, and in Greek.' There seems to be no clear evidence that the affixing of such a tablet to the cross was a legal requirement, or even the ordinary usage. But a tablet or placard announcing a criminal's offence was often carried before him on his way to execution, or hung about his neck, and sometimes he was preceded by a herald proclaim-ing his crime (cf. Sueton. Calig. 32, Domit. 10; Dion Cass. Octav. 54. 3. 7; Euseb. HE 5. 1. 44; Mishna, Sankedr. 6. 1, 10. 6). Inscriptions and proclamations in two or more languages were not uncommon (see Jos. Ant. XIV. x. 2, 3, xii. 5). The tablets set up in the temple at Jerus. forbidding any foreigner on pain of death to enter the Holy Ray foreigner on pain of death to enter the Holy Place, were some in Latin, some in Greek; Jos. BJ v. v. 2, vI. ii. 4 (one of the latter, unearthed about twenty-five years ago by M. Clermont-Ganneau, is reproduced and described in the *Revue* Archeologique for 1872, p. 214 ff.; cf. *PEF*, Twenty-one Years' Work, p. 167 f.). Although Greek formed a part of the training of every educated Roman, and was the widest medium of communi-cation even in Palestine yet Latin was especially. cation even in Palestine, yet Latin was especially employed as the legal, official, and military language, and Roman pride was disposed to be ten-acious of it in intercourse with provincials (see Val. Max. 2. 2. 2; Dion Cass. 57. 15. 3). The emperor Claudius, for example, who was fond of Greek learning, and an adept in the use of the language (Sueton. *Claud.* 42), deprived a pro-minent Greek of Roman citizenship for ignorance of Latin (ibid. 16). Abundant reff. may be found in Mayor's note on Juvenal, xv. 110.

Respecting the influence of Latin upon the later Greek, see LANGUAGE OF THE NEW TESTAMENT. J. H. Thayer.

#### LATIN YERSIONS, THE OLD.\*-Among those

• Abbreviations used in this article : --

witnesses which are of primary importance for determining the text of N  $\Gamma$ , and, in a modified sense, that of OT also, the early Lat. VSS occupy a foremost place. Hitherto, perhaps, their im-portance has not been sufficiently recognized. But the rapid developments in the science of the criticism which this century has seen are bringing their unique value. This more clearly into view their unique value. This consists mainly in their high antiquity, on the one hand, and their extraordinary faithfulness to the text which they tr., on the other. The last-named characteristic has never been disputed. As to the other, there is, at least, a general agreement that, at the latest, a Lat. tr. of the Bible already existed in the middle of the 3rd cent. A.D. But this means much. The oldest Greek MSS which have, as yet, come down to us, cannot be dated further back than the 4th cent. The great majority of them must be placed at a much later date. The early Lat. VSS, therefore, as extant in MSS or biblical quotations in the Fathers, supply us with evidence prior to any contained in Gr. MSS. But this comparison must be made with caution. Other wise it would only mislead. Our extant Gr. MSS, of course, witness to a text far earlier than the date of their own origin. The evidence of a version is only second-hand. And, besides, it is always more or less local, presenting us with important data for determining one particular type of text, but restricted as to the value of its general bearing. From another point of view, however, this limitation has advantages. The history and character of the version must, of necessity, shed light upon the history of the Church in the definite area over which its influence has spread. And this is pre-eminently true of the Lat. VSS. They are closely bound up with the origin and diffusion of Western Christianity. Through the influence of the Lat. Fathers they have, to a great extent, moulded its theological conceptions and its current theological terms. Finally, to the history of the Lat. language their contributions are invaluable ; for they preserve the late Lat. renderings of an extant Gr. original, using many varieties of synonyms, many abnormal constructions, and many strange formations, all of which reveal the tendencies of the later language, and fix with more or less certainty particular dialectical varietiens. variations.

1. Name.-The name Old Latin is used here to denote the Lat. VS or VSS which existed previous to, or independent of, the great revision made by Jerome at the close of the 4th cent.\* The desig-Jerome at the close of the 4th cent. In e desig-nation is derived from the Lat. Fathers themselves, who speak of 'uetus editio,' 'antiqua interpre-tatio,' 'uetus translatio,' and the like. It seems time now to abandon the misleading term 'Itala,' or even 'uetus Itala,' to denote the pre-Hierony-mian type of text. For, as we shall see later, the name 'Itala' is most ambiguous, and forms the central point of one of the keenest controversies central point of one of the keenest controversies which has ever arisen on this complicated subject. The expression 'Old Latin' makes no assumption, but simply states an admitted fact. Under this heading there might fall 'mixed' Lat. texts, in which OL and Vulg. readings are found side by side. As a rule, however, such texts have a Vulg.

\* Bee Wordsworth, OL Biblical Texts, i. p. xxx: 'Old-Latin texts... mean all early Latin versions of the Bible which are not Hieronymian, of whatever date the MSS may be which contain them, or in whatever country they were current.' It is surely refining too minutely when Sittl (Bursian-Müller's Jahrenbericht, vol. lxviii. p. 249) asserts that the term 'pre-Hieronymian' ought to be applied only to the biblical quotations of the older Fathers.

48 LATIN VERSIONS, THE OLD

base, and it is only when the OL element in them is of marked importance that they will be noticed below (see VULGATE).

2. We have spoken above of the OL 'Version or Versions.' This brings before us a much-debated question. Was there originally only a single tr. of the Scriptures into Lat., or were there several or many distinct versions? Before discussing the No one has ever argued that one *type* of OL text, whether of OT or NT, presents itself in the Lat. MSS or Fathers from the time of Tertullian on-wards. The most casual comparison of our exist-ing authorities dispersed this at each way while ing authorities disproves this at once. For while, as we shall find, both MSS and Fathers may be, with caution, classified by groups, even within those provisionally separate classes, a considerable amount of variation appears. Still greater and more distinct are the differences which seem to justify us in shading off those groups from one another.\* That is to say, even those who main-tain that one original VS lies at the basis of all subsequent OL texts, are quite willing to admit the existence of various recensions of that version, made at different times and in different countries. In addition to this, it would be admitted on all sides that this assumed original tr. was by no means the work of one hand : that separate books were done into Lat. by separate translators, both in OT and in NT, and that some, in all probability, were tr<sup>d</sup> at a later date than others. But those scholars who adhere to the hypothesis of a *single* original version hold that, admitting many minor differences both in readings and renderings, there appears, through the complexity of variations, one funda-mental groundwork. While the various authorities seem to move on different lines through several verses, they return to an agreement sufficiently striking to demand the assumption of a common source.† Equally important names can be adduced in support of the opinion that there were, at least, several distinct OL versions.<sup>±</sup> And certainly, at first sight, there seems much to justify the hypothesis. The same passage often appears in very different forms in the various MSS and Fathers. To gain some impression of these variations, we have only to turn to the formidable array of parallels from MSS and Fathers given in such works as H. Linke's *Studien zur Itala*,§ or Ziegler's Die let Bibliotensternet and the studien of the state o Die lat. Bibelübersetzungen vor Hieronymus. How is the question to be decided? Quite naturally, an appeal has been made to the expressed opinions of the Lat. Fathers themselves, more especially Augustine and Jerome. And some passages in their writings seem to have a real connexion with the problem. Thus Aug. de Doctr. Christ. ii. 11: 'Qui scripturas ex Hebras lingua in Græcam uerterunt numerari possunt, Latini autem inter-pretes nullo modo: ut enim cuique primis fidei temporibus in manus uenit codex Græcus et aliquantulum facultatis sibi utriusque linguæ habere uidebatur, ausus est interpretari.' Two chapters further on, in the same treatise, he says : 'quoniam et quæ sit ipsa sententia quam plures interpretes pro sua quisque facultate atque iudicio conantur eloqui, non apparet, nisi in ea lingua inspiciatur, quam interpretantur.'" He also speaks of an 'in-finita uarietas Latinorum interpretum,' I and uses

• It must be noticed that we are not here separating differ-

It must be noticed that we are not here separating differences of *reading* from differences of *reading* from differences of *reading*.

many other similar expressions." It is quite evident that Aug. believed in a large number of separate OL versions.

In the writings of Jerome the facts are pre-sented somewhat differently. Thus, for example, in his *Prof. in lib. Paralip.*: 'cum pro uarietate regionum diuersa ferantur exemplaria, et germana illa antiquaque translatio corrupta sit, atque uiolata, nostri arbitrii putas aut e pluribus iudicare quid uerum sit aut nonum opus in ueteri opere cudere.' And again, Epist. ad Damasum : 'si enim Latinis exemplaribus fides est adhibenda, respondeant quibus: tot sunt pæne quot codices.<sup>‡</sup> Sin autem ueritas est quærenda de pluribus, cur non ad Græcam originem reuertentes ea quæ uel a uitiosis interpretibus male edita uel a præsumptoribus imperitis emendata peruersius uel a librariis dormitantibus aut addita suit aut mutata cor-rigimus ?' . See also his *Pref. in lib. Job.* It seems as if, in the passages quoted, Jerome is thinking rather of separate and most corrupt recensions or copies (exemplaria) of the tra than of several distinct versions. For in the first he contrasts the 'germana antiquaque translatio' with the 'diuersa exemplaria' of it which have arisen through corruption and local variations. And he could scarcely speak of there being almost as many separate  $tr^{aa}$  as there were MSS. On the other hand, many passages can be quoted from his writings which give colour to the opposite hypothesis. So, e.g., in his *Prof. in Proverb*. he talks of 'im-periti translatores'; in *Epist*. 18. 21 of 'interpre-tum uarietatem.'§ In what way can the apparent confusion of the evidence be harmonized? Perhaps we are not justified in treating these statements of the Fathers as authoritative on the subject. There is much force in the words of Zahn:  $\| \cdot I t$  is a thoroughly short-sighted attempt to seek in the occasional utterances... of a Jerome or an Augustine regarding the Latin Bible an answer to the questions which bear on the date of its origin, the original unity or multiplicity of translators. These men would not have kept back from us a definite tradition regarding the place, the time, the origin-ator of the version or versions, if they had pos-sessed such. . . What they say has neither in form nor meaning the slightest resemblance to an historical tradition or an ancient report. It is rather the scanty result of a more or less intelligent view of the actual facts which they had before their eyes.' We cannot, at least, be blind to the rhetorical exaggeration in the passages quoted. And it seems quite reasonable to suppose that Jerome and Aug. are simply putting forward their own hypotheses to account for the state of things which they find existing. Probably, they could give no more definite answer to the question before us than that which Jerome gave as to the use of Theodotion's tr. of Daniel by the Church in place of the LXX: 'et hoc cur acciderit nescio' (*Prof.* in Dan.). It is along other lines that the problem must be approached.

It has been already observed that a comparison of the extant OL texts, whether in MSS or Fathers, reveals clearly enough a large number of more or less important variations. These are of different kinds. Sometimes the variant consists in the use

<sup>6</sup> See the large collection of quotations bearing on this point, from Aug., in Ziegler, op. cit. pp. 6-10.
<sup>†</sup> Wiseman's attempt (*Resays on Various Subjects*, i. p. 24 fl.)
<sup>†</sup> to show that 'interpretari' and its cognates can be used, and arcused, by Aug., of recentions as well as translations, is now discredited even by detenders of the one-version theory, e.g. Fritzsche, op. cit. p. 435.
<sup>‡</sup> Of no passage is this judgment more true than of this actual sentence itself, which is hardly quoted in the same way in any three MS8' (H. J. White in Scrivener's Introduction, vol. ii. p. 42. See also Wordsworth and White's Vulgate, Fasc. i. p. 2).
<sup>§</sup> Gesch. d. NT Kanons, bd. i. p. 33.

of a synonym: sometimes it presupposes a different underlying Gr. text: sometimes it shows another form of construction : sometimes it lies in an addition or omission, while, at times, it is merely an inversion of the order of words in a sentence, or a difference of spelling. One or two examples will make our meaning clear.

followed is found on almost every page of the OL versions of OT. The same cause would also be at work in NT. Add to this the carelessness of scribes and the independent efforts at translating the original, either deliberately introduced into the text or gradually gliding into the text from the margin, and we have causes which seem, at least,

# MATTHEW 21-4.

# a (Cod. Vercellensis).

k (Cod. Bobiensis). Et cum his natus esset in bethlem iudææin diebus herodis regis ecce magii ab oriente uenerunt hierosolima dicentes ubi est qui natus est rex iudzor uidimus enim stellam . . . Set autem rex herodes turbatus est et tota hierosolima cum eo. Et conuocatis omnibus sacerdotibus et scribit plebis querit ab eis ubi 🛪 nascitur.

Cum ergo natus esset Jesus in bethlem ciuitate iudææ in diebus herodis regis ecce magi ab oriente uenerunt hierosolyma dicentes ubi est qui natus est rex iudæorum uidimus enim stellam eius in orientem et uenimus adorare eum. Audiens autem herodes rex turbatus est et omnis hierosolyma cum ipso. Et [congreg]auit omnes principes sacerdotum et scribas populi et interrogabit ab eis ubi Christus nascitur.

# Exodus 3217-20.

#### Cod. Wirceburgensis.

Et audiuit ihs uocem populi clamantium dixit ad Moysen uox pugnæ in castris auditur. Et dixit Moyses non est uox de principum cum uirtute sed nec uox de principum fugze sed uocem principatus uini ludentium sed uocem principatus ego audio. Cumque uini ego audio. Cumadpropinquasset castra uidet uitulum et choros populi. Et iratus animo Moyses proiecit de manib suis duas tabulas et comminuit eas sub montem. Et sumens uitulum quem fecerant combussit igni et comminuit eum minutatim et seminauit.eum conteruit eum minutatim

Cod. Lugdunensis.

Et cum audisset Iesus clamorem populi clamantium, dixit ad Moysen : non uox pugnæ in castris auditur. Et dixit Moy-ses : non est de principibus cum uirtute, sed nec uox de principium fugæ que adpropinquassent castræ uident uitulum et choros populi: et iratus animo Moyses proiecit de manibus suis duas tabulas et comminuit eas sub montem. Et sumens uitulum quem fecerant, combussit eum igni et in aqua et potauit filios et seminauit eum in istrahel. aqua, et potauit illud filios Istrahel.

The above instances are taken entirely at random to give a general idea of the agreements and differences of the parallel texts. It must be said that in many passages the differences would be found to be far more considerable than in either of those above. Yet, as the total result of numerous comparisons of the various texts with each other, comparisons of the various texts with each other, one is bound to admit, at least, the increasing pro-bability of the conclusion that at the basis of all the types of text there is one original version which has determined, in great measure, the character of all the subsequent revisions.<sup>\*</sup> For surely the differences can be reasonably accounted for. In OT we know that at this time the MSS of the LXX were in a state of hopeless confusion—a confusion which had been intensified by the misuse of Origen's critical signs. A proof of the mixture of Gr. texts

\* There are some books in which two types of text seem far more marked, e.g. the Synoptic Gospels and Apoc.; while in others, such as the Pauline Epp., there is a much closer resemblance between ull types of text. This suggests one of the most important methods to be followed in investigating the O.L Bible—that, namely, of treating each group of books neparately.

VOL. 111.-4

Jesus in bethlehem ciuitatem iudeæ in diebus herodis regis...oriente uenerunt in hierosolyma dicentes ubi est qui natus est rex iudæorum uidimus enim stellam illius in orientem et uenimus adorare eum. Audiens autem rex Herodis turbatus est et omnes hierosolyma cum illo. Et congrega .... sacerdotum et scribas populi et interrogauit ab eis ubi Christus nasceretur.

b (Cod. Veronensis).

Cum ergo natus esset

f (Cod. Brixianus).

Cum ergo natus esset Jesus in bethleem indexe in diebus herodis regis ecce magi ab oriente ue-nerunt hierosolyma dicentes, ubi est qui natus est rex iudæorum uidimus enim stellam eius in orientem et uenimus adorare eum. Audiens autem herodes rex turbatus est et omnis hierosolyma cum illo. Et congregauit omnes principes sacerdotum et scribas populi et requisiuit ab eis ubi Christus nasceretur.

sufficient to explain the numerous variations.\* As an instance of what was possible, the Psalter which Jerome had corrected according to the LXX was so corrupted by scribes in his own life-time that he was compelled to emend it a second time † But after all, as Burkitt puts it : ‡ 'whether there were one or two independent versions is a comparatively minor question in face of the undoubted fact that the independent versions were few in number.

3. The problem which is of paramount importance in this subject is, Can we trace the history of the version (or versions)? For the sake of the subsequent discussion.we will here subjoin a list of the extant authorities for the OL Bible.§

OLD TESTAMENT. —*HEXATBUCH*.—**1.** Cod. Lug-dunensis [6th cent.]. At Lyons (MS 54). ### FATHERS.<sup>±</sup>

Alcimus Avitus.—Archbp. of Vienne, c. 450-Anthrows Articles. Articles of Gallican type of 517 (?). Important witness for Gallican type of text. See Berger, Hist. de la Vuly. p. 2. Ambrose.—Bp. of Milan fr. 374 to 397. See Rönsch. Zeit. f. histor. Theol. 1869, pp. 434–479;

1870, 91-145.

Ambrosiaster.—Name given to author of Comm. on the thirteen epp. of Paul. Written towards end of 4th cent. See Marold, ZwTh. 1883, p. 27 ff.

Arnobius.--African presbyter. Begin. of 4th cent.

But on whole subj. of Gr.-Lat. MSS see Westcott and Hort,

† But on whole subj. of Gr.-Lat. MSS see Westcott and Hort, NT, vol. ii. pp. 82, 83. I This list gives only those of the Lat. Fathers whose works are of special value, as containing important extracts from OL. Version, or shedding some light upon its history. See, on the general value of VSS and Fathers for the NT text, a suggestive essay in Stud. Bibl. ii. p. 195 ff. by L. J. Bebb. References made in this list to literature almost entirely concern the biblical qualations of the writers.

Auctor Exhortationis de panitentia. Erroneously ascribed to Cyprian. See Wunderer, Bruchstucke einer African. Bibelübersetzung, Erlangen, 1889.

Auctor libri 'De aleatoribus.'-Harnack would place this treatise at least as early as Cyp. See T. u. U. v. 1, 1888. Miodonski, Anonymus adversus aleatores, Leipz. 1889, makes the author dependent on Cyp. See also Haussleiter, Th. Lit. Bl. 1889, 5, 6, and 25. Auctor libri 'De Pascha Computus.'-Africa,

A.D. 243.

Autor libri 'De promissionibus.'-Erroneously ascribed to Prosper of Aquitania. Written appar. c. 450, perhaps in Campania. Writer has close connexion with Africa. See Corssen, Der Cyprian-

ische Text der Acta Apost. Berlin, 1892, p. 5. Augustine. Bp. of Hippo, 354–430. See Rönsch, Zeits. f. histor. Theol. 1867, pp. 606–634; CSEL vol. xxviii. sec. iii. pars 3, ed. by Zycha, \* Preface, vol. axvin. sec. in. pars 3, ed. by Zycha," Freiace,
p. v ff.; see also his Bemerkungen zur Italafrage
in Eranos Vindobonensis, 1893, pp. 177-184; Des-jacques in Études Religieussa, 1878, p. 736 ff.;
Weihrich in Serta Harteliana, Vienna, 1896; Pet-schenig, Berl. Phil. Woch. Schr. 1896, 24.
Barnabas.—Lat. version of Epistle. Prob. before
end of cent 5. See Gebhardt. and Harmack Pate.

end of cent. 5. See Gebhardt and Harnack, Patr. Apost. Opp. Fasc. 1, pp. xvi, xxix. Capreolus.--Bp. of Carthage, fl. 431.

See L. Ziegler, Itala-fragmente der paulin. Briefe, pp. 26-28.

Cassian.—Monk at Marseilles, ob. c. 435. See CSEL vol. xvii. ed. by Petschenig, Preface, p. Ixxviii ff.; Vollniöller, Roman. Forschungen, ii. р. 392 ff.

Clement.-Latin version of his First Ep. ad Corinthios. See G. Morin, Anecdota Maredsolana, ii. Maredsous, 1894.

Commodian .- Perhaps middle of 3rd cent. See

Corssen, GGA, 1889, i. pp. 311, 312. Cyprian.—Bp. of Carthage, ob. 258. See Sanday, OL Bibl. Texts, ii. p. xlii ff.; Rönsch, Zeitsch. f. histor. Theol. 1875, p. 85 ff.; Dombart, ZwTh, 1878,

p. 374; Lagarde, Symmicta, i. 74. Didascalia Apostolorum. – OL Version. See Hauler, Sitz.-Berichte of Vienna Academy, Phil.-Hist. Classe, Bd. exxxiv. Abt. xi.

Hist. Classe, Bd. exxiv. Abt. xi. Fulgentius.—Bp. of Ruspe, c. 468-533. See
S. Berger, Le Palimpseste de Fleury, pp. 16-18. Gildas.—Of Britain. Perhaps end of 6th cent.
See Haddan and Stubbs, Councils, etc., Appendix G. Hermæ Pastor.—Lat. version. See Haussleiter, De Versionibus Pastoris H. Latinis, i., Erlangen, 1994 1884.

Hilary. — Bp. of Poitiers, ob. 368. See A. Zingerle, Die latein. Bibelcitate bei S. Hilar. von Poitiers, Innsbrück, 1887.

Jg).

The above lists of MSS are believed to be fairly complete. For further particulars regarding NT MSS, see H. J. White in Scrivener's Introduction<sup>4</sup>, p. 45 ff.; C. R. Gregory, Prolegg. to Tischdf.'s NT<sup>3</sup>, vol. iii. pars ult. p. 953 ff. Numerous details of importance are to be found in S. Berger's Hist. de la Vulg., Paris, 1893. We have attempted to make the OT list as full as possible, since hitherto there have been me convenient survey of the sustained. there has been no convenient survey of the materials in hand.

The earliest attempt to collect the fragments of the OL version was made by Flaminius Nobilius (assisted by others), Vctus Test. sec. LXX latine redditum, Rome, 1588. This consisted of quotations from the Fathers, with the gaps filled up by the editors. It was entirely superseded by the great work of the Benedictine, P. Sabatier, whose Bibliorum sacrorum lating versiones antiqua seu uctus Italica appeared at Reims 1739-1749.† It is made up, partly of extracts from the Fathers, and partly (to a less extent) of fragments of MSS, chiefly at Paris. It is a monument of painstaking, self-denying work. But it requires to be used with caution, as the critical ideal of that time was necessarily somewhat crude.<sup>±</sup>

Strangely enough, it remains the only full col-lection of quotations from and fragments of the OL version of OT and NT, although a rich abundance of material has come to light since Sabatier's day.

A new work, however, on the lines of Sabatier, is being prepared under the auspices of the Munich Academy. It is to deal with OT.§

We must return to the problem already stated. Can we trace the *history* of the Latin Bible? It is needful to deal very cautiously with our small group of data, lest our conclusions should go beyond the facts. Much of the discussion has centred round the origin of the Latin Version. Was the Bible first trd. into Latin at Rome or in Was the bloc high tracing that have been put forward with confidence. Some scholars, such as Kaulen, Reinkens, and Gams, \*\* decide for Rome on the supposition that the lower stratum of members in the Christian Church of the Metropolis

54 LATIN VERSIONS, THE OLD

would, from the earliest times, require a Lat. tr. of the Scriptures. And yet we know that Greek was the language of the Roman Liturgy, even within the 8rd cent.<sup>\*</sup> Since the appearance of Wiseman's Two Letters on some parts of the controversy concerning 1 John v. 7 (reprinted in Essays on Various Subjects, i. pp. 5-70), perhaps the majority of critics have accepted Africa as the birthplace of the Lat. Version. As we shall find, there are several important facts in the history of the OL which give countenance to this hypothesis. The earliest form of the version to which we can cyprian, plainly circulated in Africa. The lan-guage and style of the trn., taken generally, find their closest parallels in African writers. Indeed it is this latter point which has, in the minds of many, led to a definite decision in favour of Africa. But there are certain cautions which deserve attention. To begin with, k, the oldest MS authority for the specially 'African' type of text, is considered by the best palæographers to have been written outside the bounds of Africa,  $\dagger$  and the same is true of h, another leading witness.

But, further, too much stress must not be laid on the 'Africanism' of OL Bible. It must be borne in mind that the Lat. literature of the 2nd and 3rd centuries which we possess is almost exclusively African. And so we are in danger of labelling with that name a type of diction which may well have prevailed throughout the Latinspeaking provinces of the Rom. Empire. A definite foundation is given to this last hypothesis by the fact that there are numerous points of contact between the OL Bible, the Campanian Petronius, the Church Fathers (chiefly African), the Jurists, Papinian, Ulpian, and Paulus, and the Lat. Inscriptions of Africa.<sup>‡</sup> And the dialect of the Spanish and Gallican Lat. writers, so far as we possess it, cannot be separated by any well-marked boundaries from that of Africa.§ In short, the current investigation of Late-Latin is more and more tending to reduce the so-called Africanisms,' and to establish a wider basis for their occurrence.

Perhaps it is possible to obtain some light on the origin of the Lat. Bible from a different direction. What other texts are usually found in its company? The answer is not far to seek. A 'glance at the apparatus criticus of any of the larger edd. of NT shows us an almost constant grouping of the OL MSS with D (Cod. Bezæ), some other Gr.-Lat. MSS, and the Syr. VSS. That is to say, the OL MSS form an important branch of the authorities for the so-called 'Western' text of NT.¶

the so-called 'Western' text of NT.¶ Now Hort, whose anthority is unrivalled on a question of this kind, in speaking of the term 'Western,' says:\*\* 'It has become evident that readings of this class were current in ancient times in the East as well as the West, and probably to a great extent originated there. On the whole, we are disposed to suspect that the "Western" text took its rise in North-Western Syria or Asia

Minor, and that it was soon carried to Rome, and thence spread in different directions to N. Africa and most of the countries of Europe.' Already E. Ranke (Par Palimpsestorum Wirceburgens. p. Already 432), in discussing the origin of the Würzburg Palimpsest of OT, had concluded from the use of the word 'legati' for typepores (Gn 3615 et al.) that its birthplace was to be sought in one of the Imperial provinces which were governed by 'legati.'\* Now Syria is virtually the only one of those which could well satisfy the requirements of the case. But this assumption has some valid reasons in its favour. It is an undoubted fact that here and there throughout OT the OL agrees in a remarkable way with the Luc. recension of the LXX, a recension intimately connected with Antioch in Syria.<sup>+</sup> Of course this recension was much later than the origin of the OL, but one of the marked elements in Lucian's text is also present here and there in the OL. Kaulen<sup>‡</sup> also had pointed out that the trs. of the OL seemed to have an accurate knowledge of Heb. or Aramaic. This would most easily be accounted for by assuming them to be situated either in or near or in intimate connexion with the Rom. province of Syria, which included Palestine. But, further, there is the extraordinary agreement, even in sare and isolated readings, of the early Syr. VSS with the OL.§ Accordingly, but ing those various threads of evidence together, we had been led to the hypothesis that in Syria, and probably at Antioch, a most important re-ligious and theological centre, we must look for the home of the original Lat. Version as well as of the 'Western' text. Since coming to this con-clusion, we find that the same theory is supported by most powerful arguments in a builling review by most powerful arguments in a brilliant review of Rendel Harriss Study of Cod. Beze in the Guardian of May 18 and 25, 1892, by Sanday.<sup> $\|$ </sup> Let us give the briefest summary of his main conclusions.

In order to explain the relations of the OL MSS among themselves and to the Syriac VSS,  $\P$  he believes that the starting-point must have been not a single MS bilingual \*\* or other but a *workshop* of MSS-that at the very threshold of the Lat. VSS there must have been several MSS copied in near proximity to each other, and affected by allied, but yet different, Gr. texts. He then asks in what class the version was likely to arise, and finds the answer in the 'notarii,' public copyists who had not only to do with copying but with translating. 'And where could this class of copyists congregate most thickly but in the suite of the governor of one of the most important pro-

the governor of one of the most important pro-\* This fact is also noted in an article in the Guardian, May 23, 1892, by Prof. Sanday. \* Bee Ceriani, Le reconsioni dei LXX e la versione latina detta Itala (Nota . . . letta al R. Istituto Lombardo . . . 18th Feb. 1886, lesp. pp. 4-5. 1 Gesch. der Vulg. p. 140 ff. \* Burely this cannot be accounted for on the supposition of Zahn (Gesch. der Canons, i. p. 422), that NT was a gift brought by Tatian to his fellow-countrymen from Rome. It is difficult to imagine that the Ohristians of Syria so long the very centre of diffusion for the Faith, had to depend on a chance occurrence for their version of the Scriptures, although, at the same time, the intimate connerst in the same time, at the same time, the intimate connerst in the same time, the intimate concust of the same conclusion regarding the birthplace of the 'Western' text from a totally different point of view, namely, the attempt to prove that behind the 'Western' text there existed certain Gr-Syr. bilingual MSS, in which the Syr, exercised a powerful influence on the Greek. In summing up, he also quotes the review above mentioned in support of his conclusions. See Syriac Element in Cod. Beza, pp. 182-149; Syro-Lat. Tezt of Gospel, pp. 183-142. The arguments he brings forward do not depend on the validity of his general theory. **G** Cuardian May 25, 1802 p. 787 theo

theory. ¶ Guardian, May 25, 1892, p. 787. \*\* This is the theory of Rendel Harris, Cod. Beze, p. 226 sq. Resch believes that the archetype of Cod. Bez., 8yr., and OL was a redaction of the ecclesiastical Gospel-Canon made about A.D. 140. See 'Aussercanonische Parallel-Texte,' T. u. U. x. 1, esp. pp. 35, 47.

vinces?' Valuable evidence is adduced to show that the OL was the work of some one possessing a special acquaintance with the administrative arrangements of Palestine.\* Further, it is pointed out that the author or authors of the 'Western' text had a knowledge of Heb. and Aramaic. And finally, the numerous interpolations which appear in this text, as derived either from oral tradition or from some early fragmentary written source, could have no more probable birthplace than the province of Syria. As to the relations of the Syr. VS, Sanday thinks that it 'took its rise in the very midst of the development of the Lat. Version.' Of course this is only theory; but a theory which seems adequate to account for the phenomens in question is the only basis on which successful investigation

can be reared. We come, however, to actual facts when we make inquiry as to the first certain traces of the OL Version. How far back can it be traced? We can speak with absolute certainty of Cyprian. His works (especially the *Testimonia*) abound in biblical quotations. What is of greater importbiotech quotations: what is of grater impor-ance, Cyp. usually [perhaps always] adheres to one particular type of text. This provides us with a fixed date and a standard. We can affirm that in the year 250 A.D. a Lat. tr<sup>a</sup> of the Bible, whose characteristics we are able to determine, circulated at Carthage. But this is virtually identical with the OL Version of the Gospp. preserved in Cod.  $k_1$ with Cod.  $k_2$  of Acts a taxt wead by Aug in the with Cod. A of Acts, a text used by Aug. in the Acta cum Felice Manichaeo and Contra Epist. Manick., and that of the Comment. on the Apoca-legpse by Primasius.<sup>+</sup> It stands also in a close relation with Cod. e, though a certain distance separates them.<sup>+</sup> It is found in the biblical quotations of Lactantius, Firmicus Maternus, Optatus, Commodian, Auctor libri de Promissioni-bus, and, to a certain extent, Lucifer.§ These facts may quite reasonably suggest that in Cyprian's time there was some official, ecclesiastical recognition of a particular type of text. But is it possible to go behind the days of Cyprian? Certainly, in the earlier Father, Tertullian, whom Cyp. called 'magister,' there are some expressions bearing or this point which have to be realconed with on this point which have to be reckoned with.

on this point which have to be reckoned with. Adv. Marc. v. 4 (Gal 4<sup>34</sup>): How sunt enim duo testamenta, siue, 'due ostensiones,' sicut inuenimus interpretatum. C. Praz. 5: ideoque jam in usu est nostrorum, per simplicitatem fuisse cum magis 'rationem' competat antiquiorem haberi. De Monog. 11: sciamus plane non sic case in Graco authentico, quomodo in usum exiit per duarum syllabarum, aut callidam ant simplicem euersionem: 'si autem dormierit uir ejus' (1 Co 7<sup>30</sup>). Adv. Marc. iv. 1: 'alterus instrumenti ue quod magis usui est dioere testamenti.'

These passages seem to show clearly that some I nese passages seem to show crearly that some definite usage already existed; that there was already some standard of tr<sup>a</sup> to follow. But there is more marked evidence than this. E.g. Gal 3<sup>26</sup> is thus quoted by Tert.<sup>\*\*</sup> (Adv. Marc. v. 3): 'Omnes enim filli estis fidei.' Here, plainly, 'fidei' must be a variant of the Lat. 'dei' and not of Greek  $\theta \epsilon o \lambda$ . Tert. had a Lat. text before him, and evidently he

Tert. had a Lat. text before him, and evidently he "Guardism, May 25, 1892, p. 787. † See Sanday in OL Bibl. Texts, ii. pp. xlii-exxviii; Coresen, Der Cyp. Text der Acta Appedt, Berlin, 1892. It is of interest to note that the text nearest to A of Acts is the margin of the Philox. Syn., which has a most intimate relation with the OL. On the text of the Testimonia, which is a nost important que-tion for the OL Version, see Sanday, op. cit. p. 42ff., and Appendix II. p. 123. Also his essay in Stud. Bibl. iii. 'The Cheltenham List,' etc. Dombart, Evi7a. 1879, p. 379 ff. † Cod. e, which has certainly an 'African' base, has suffered from the intrusion of other elements. See Sanday, loc. cit. ‡ Mr. F. C. Burkitt, however, who has kindly read this article in proof, holds that the biblical quotations in these writers are solely from the Testimonia. ¡ See Auton's remarks on Oyprian's low estimate of the OL Version, to which, nevertheless, he rigidly adhered. This suggrests that the text he used had some official sanction. Stad. Bibl. iv pp. 194-195. ¶ Hieron. de Vir. illustr. 53. \*\* See Zimmer, SK, 1889, ii. p. 359.

had not compared it with the Gr. original. Now Tert.'s quotations from the Bible are numerous. What can be said of their relation to the Bible of Cyp. ? The most rapid survey of Tert.'s quotations puts us on our guard against hasty inferences. Forhis method of quoting is most fickle.\* Often his words are a mere paraphrase; often a more or less distinct parinting of the toyt, while constantly distinct reminiscence of the text : while constantly the same passage is cited in the most varying forms. The general impression which his biblical extracts leave is that of a trn which he uses, but does not regard as in any sense authoritative: which, perhaps, has only been for a short time known in Africa and is only gradually coming into use. This would find an adequate explanation if official sanction only ratified the version either a little before or in the days of Cyp. And yet the existence of such a  $tr^n$  is almost necessary to explain the richness and fulness of Tert.'s theological vocabulary. We have endeavoured to make a somewhat full collation of Tert.'s quotations a somewhat full collation of left.'s quotations with those in the *Testimonia* of Cyp., † using mainly that part of Tert.'s works which has appeared in the *Vienna Corpus* of the Latin Fathers (vol. xx. pars 1), ed. A. Reifferscheid and G. Wissowa, and in addition Rönsch's *Das NT Tertullian's*. The in the Epp. Tert. and Cyp. use the same Lat. text. For the Gospp. the case is different. There is, indeed, a frequent agreement of Tert. with Cyp. indeed, a frequent agreement of left. with Cyp. and k, and, again, a frequent disagreement. In the latter instance, Tert. coincides pretty often with a, b against Cyp., k. In OT Tert. has some important points of contact with Cyp.'s text of Psalms. As regards the Pent. and the Prophetic books, it is not easy to speak definitely. In the former (in which the range of our collection back former (in which the range of our collation has been very narrow), the differences seem mostly to consist in the use of synonyms. In the latter, the quotations come fairly close to each other, except

quotations come fairly close to each other, except in Dn, where Tert. uses the LXX, while Cyp. usually follows Theodotion.§ Even before a thorough investigation of the subject had been made, Hort, with his wonted grasp and insight, had undertaken a classification of the extant NT documents. The earliest group grasp and makin, had undertaken a classification of the extant NT documents. The earliest group he named African, consisting of texts which agreed, on the whole, with the quotations of Tert. and Cyp. To this he assigns k, c, and h of Ac and Apoc. The second class he designates European, to embrace a type of text which may be either a revision of the 'African' or a separate tr<sup>a</sup>, but which circulated at all events in North Italy and the West of Europe generally. Under this heading he would probably place  $a, a_a, b, c, f_a, h,$ i, n, r, and p of Gospels;  $g, g_n$ , and s of Ac; perhaps ff of Ja and g of Apoc. The third family he names 'Italian.' The name is derived from the famous passage of Aug. (de Doct. Christ. ii. 15), in which he recommends a tr<sup>a</sup> (interpretatio), which he calls 'Itala,' and which is presumably the text which he usually follows. Now this is found often  $\parallel$  to be a revision of the 'European' text.

• An excellent example is his citation of 1 Co 15<sup>47</sup>, which appears in three of his separate treatises in three distinct forms. One of these is identical with Cyprian's text. + Vol. iii. of CSEL, ed. Hartel. The Verna Corpus furnishes by far the most trustworthy texts for the Lat. Fathers, and has been used for this article where available. But see on the text of the Testimonia in Hartel's ed. the references under a tin proceeding column.

text of the Testimonia in Hartel's ed. the references under n t in preceding column. ; Perhaps Tert. may have become acquainted with a 'Euro-pean' form of text at Rome. ; For a full discussion of this last point, see F. C. Burkitt, Old Latin and Itala, p. 18 sq. Consen, Zwei neue Fragmente d. Weing. Propheten-MS, Berlin, 1899, pp. 45-47, believes that not only did Tert. use various texts, but texts which already had mixed elements. ] Not always. The Bible of Aug. is a most variable quantity. See Consen, Der Cyp. Test, etc. p. 25; Zycha, CSEL, vol. xxviii. sec. 3, pars 3, pp. v-vii.

### 56 LATIN VERSIONS, THE OLD

To this class he refers f and q of Gospels; q (?), of the texts given in our list, some of which he hesitates to classify, while others, such as the Lat. texts of the bilingual MSS (Cod. Bezz, Claromont. etc. etc.), he does not regard as strict evidence for OL Bible.\* Let us briefly examine this classification in the light of recent investigations. As we tion in the light of recent investigations. As we have already seen, the earliest traces of the OL Bible are found in Africa. Perhaps the tr<sup>n</sup> came there by way of Rome, whose connexion with Africa and Carthage at this time was as intimate as can be conceived.<sup>+</sup> Perhaps it travelled west-ward through Upper Egypt. Indeed, certain phenomena bearing upon the underlying Gr. text might seem to favour this hypothesis notably a might seem to favour this hypothesis, notably a remarkable affinity here and there in OT with the recension of Hesychius, and in both OT and NT with Cod. Alex.: In any case we are quite justified in giving the name 'African' to the group of texts mentioned above in connexion with Cyp., although this makes no assumption as to their origin.§ It is at this point that we enter on more uncertain ground. Are the 'European' texts a separate family from the 'African'? We believe that Sanday's suggestion quoted above, that a 'work-shop' of MSS existed at the origin of the OL, is the most adequate yet put forward to account for the factor. For this work which the impression mode facts. For this is very much the impression made on an unbiassed mind. There are, assuredly, marked differences between the 'African' and and marked dimerences between the 'Arrican' and 'European' texts, but they are not separated by any hard-and-fast lines. There are points at which they shade off into each other. Perhaps it may be allowable to regard  $a\parallel$  (in Matthew, at least) as a connecting link between the 'African' and 'European' families. A credible tradition associates it with Eusebius, Bp. of Vercelli, situated Gr. influence had not, in any powerful degree, extended, and where a Lat. Bible would be early required. Here, in Italy, it would be quite natural that many of the roughnesses of the original tra should be toned down, and that is, indeed, the character of 'European' in so far as it may be distinguished from 'African' Latin. The vividness of the latter gives place to a certain insipidity; there is a less bold use of compound expressions; some words have a large extension given to their meaning; there is a more normal use of the commoner parts of speech, such as prepositions and pronouns. Accordingly, the so-called 'African' elements in a may be merely the more marked traces left of the original trn or of one type of it. From a careful collation of the readings of the Lat. tr<sup>n</sup> of Irenzus<sup>\*\*</sup> with the leading MS authorities,<sup>††</sup> while *Iren. Lat.* stands constantly alone, there seems to be a more than accidental connexion between his text and that of ;

Gospp.

### LATIN VERSIONS, THE OLD

a.\* Perhaps d + (Lat. of Cod. Beza) is not far and it is not improbable that Cod. Beze was written in Lyons where Irenæus was bishop. should also be borne in mind that Irenæus, It 8 native of Asia Minor, was in closest connexion with the East. And, as bearing upon this, the suggestion of Prof. Armitage Robinson must be noted, that already, in A.D. 177, a Lat. VS of the Bible was known to the narrator of the story of the martyrdoms at Vienne and Lyons.<sup>‡</sup> These facts seem to hint at a connexion between the earliest branch of the 'European' family and the South of Faul.§ A remarkable clue to the whole history of the version, as well as this special point, would be furnished if Blass' theory of a double recen-sion of Luke's writings were made good. The rough draft first made by Luke is seen, he holds, in the *Cod. Bezæ* especially and its allied docu-ments. The second and more polished copy is the received text. But Luke has always been closely associated with Antioch. This would therefore be another line of evidence pointing to the birthplace of the version.

The most representative text of the 'European' group is the Verona MS b, which seems to have a close affinity with all the other members of this family. And yet here again we are reminded of the danger of sharry distinguished groups. For in some parts of b there are, possibly, signs of the 'Italian' revision already to be found, \*\* while some markedly 'African' phenomena also reveal them-selves. $\dagger$ t An important subdivision of this group is that embraced by  $r \ddagger and p.$ §§ They seem to contain a specially *Irish* or *British* form of text which appears repeatedly in various Vulg. MSS. British type of text should have intimate relations with the 'European' family, seeing that there was an established line of communication between Ireland especially and monasteries such as Bobbio and St. Gall in the North of Italy and Switzer-land. Perhaps there is a hint to be gained in this direction bearing upon the whole history of the version. It is possible that every region of importance, ecclesiastically, may have had its own recension.\*\*\* There are certainly traces of this in Spain also. And an important contribution to its history is made by the biblical quotations of Priscillian, whose works have been lately discovered by Dr. G. Schepss, and edited by him in

\* There is a distinctly isolated element in Irenzus. Is this specially 'Gallic'?

\* Perhaps there may have been even a 'Gallican' recension of the transmitter of the second statement of the second s

### LATIN VERSIONS, THE OLD

vol. xviii. of CSEL. Those quotations, indeed, bear a great resemblance to the 'Late-African' group, which will be glanced at immediately, but they present special points of affinity with typical Spanish MSS, especially those of Leon. \* Of the other 'European' texts, g and  $g_2$  of Ac agree remarkably with that found in the numerous quotations of Lucifer, Bp. of Cagliari t (in Sardinia). of St. James ; appears also to be of this family, although there is probably an African colouring in its text. It is of importance to notice that 'European' texts were those most commonly used For this the chief witness is Hilary, in Gaul.

Bp. of Poitiers. There is a less marked distinction between the 'European' and 'Italian' groups than between the former and the 'African.' For, admittedly, the 'Italian' is a revision of the 'European.' We have already referred to the derivation of the name from Aug.'s celebrated dictum, de Doct. Chris. ii. 15 : in ipsis autem interpretationibus Itala ceteris præferatur, nam est verborum tenacior cum perspicultate sententize. A keen discussion has centred round the expression 'Itala.' Bentley went the length of proposing to read 'illa . . . que' for 'Itala . . . nam.' This proposal has been revived by Corssen,§ who seeks to show that it fits in with the context. But this is merely to cut the knot. We cannot help believing that the true solution is that suggested by an admirable article in the Theolog. Review for 1874 by Kenrick, who proves beyond doubt that Northern Italy by the end of the 3rd cent. was regularly known under the name 'Italia." But this was the very region in which Aug. had first become acquainted with the Scriptures. And the quotations of Ambrose, his teacher and guide, agree with this 'Italian' type of text. Is it not, at least, probable that this revision was made in N. Italy, and so naturally became known to Augustine?

Burkitt has recently essayed to prove that Aug. here means nothing else than the Vulg. of Jerome.\*\* His main argument is the Gospel quotations in the Dc Consensu Evangelistarum and a passage in the Contra Felicem. It cannot be doubted that the text of the Gospp. in the former stands in closest agreement with the Vulg. ; while the latter also appears to be Jerome's revision, though it stands side by side with an 'African' text of Acts. Yet Yet it must be remembered that, in the Gospels, texts like f and f, are in close agreement with the Vulg., and there would always be the tendency to correct Aug.'s text according to Vulg. readings. This latter hypothesis would quite account for the phenomena in Contra Felicem. But, even supposing Aug. did (as he quite well may have done) use the Vulg. in this treatise, how can this be used to prove that he designates it by the name 'Itala' in the celebrated passage quoted ? Surely the data are insufficient to justify so wide a generalization. ++

This 'Italian' revision has regard both to readings and renderings. It is an attempt to soften the harsher Lat. tr<sup>m</sup>, while, at the same time, the Lat. text is corrected according to a non-Western and late group of Gr. MSS.\*

The leading representative is f. q is also usually assigned to this family; but, as Mr. White  $\dagger$  has shown, 'if it be Italian in its readings, it is European in its renderings.' Indeed q shows a European in its renderings.' Indeed q shows a mixture of various elements,  $\ddagger$  having close relations to k, b, f,  $g_1$ , and a. The other most important representative of this group is to be found in the Freisingen Fragg. of the Epistles.§ These exhibit a remarkable resemblance to the quotations of Aug. and Capreolus, Bp. of Carthage. Perhaps we ought to mention here an interesting type of text found chiefly in the Catholic Epp. It is the Late-African of the epoch of the Vandal supremacy. It is found in  $\lambda$  of Cath. Epp. ; apparently in 1 J T of the Freisingen Fragg., and in Fulgentius, Bp. of Ruspe. It was probably derived from the 'Italian' type, but greatly modified by its transference to Africa. The important text of the 'Speculum' (m)probably belongs to this group,\*\* and, though not Initially of the same type, we may assign to it the fleury Apocalypse (h). Berger would place the text of Priscillian as the transition between the 'Italian' family and this 'Late-African' group.

There still remains a large number of texts which have not been classified. These are the Gr.-Lat. MSS, in which the Gr. text must, of course, have had a powerful influence upon the Latin.<sup>++</sup> There has a powerinum million of the function of th readings appear. l has apparently a Vulg. base with numerous OL readings intermixed. St The Lat. interlinear version of Cod. Sangallensis  $(\delta)$  is shown to contain, at least, a very important OL element, which sometimes goes back to the earlier stages of the 'European' text. III The latest OL text of Acts discovered by Berger in a MS of Perpignan occupies 'a central position in the midst of the various re-censions.' ¶¶ It seems to have a Spanish colouring, but yet to belong to the same general family as the Gigas (g), s (Bobb. Frag.), the Frag. in the Rosas

Bible,\* and Cod. e (Laudianus) of 'Acts,' i.e. to the European' group.

For NT authorities, Hort's learning and judgment have laid a sound basis of classification. the case of OT MSS such a grouping does not yet exist. And any attempt at furnishing principles of genealogical relationship seems beset on every side with no ordinary difficulties. The reasons are plain. Only in rare instances have we a variety of documents covering the same ground. Even when this is the case, their fragmentary nature renders it unsafe or impossible to generalize. In OT the quotations of the Fathers are, as a rule, specially perplexing, because, by this time, the text of the LXX had reached an almost hopeless state of confusion. It is only when a thorough examination of the principal cursives of the LXX has been made that order can be brought into the chaos. We do that order can be brought into the chaos. not propose, therefore, to attempt a classification. All we can do is to give the results of a more or less minute comparison of the leading witnesses for OT. Let us follow the order in the list of MSS above.

Hexateuch.-We have here our best opportunity for comparing various texts, as there are four authorities which cover, to a great extent, the same ground. These are Cod. Lugdunensis, Cod. Wirce-burg., Cod. Monacens., and the Fragg. of Cod. Ottobon. A comparison of the four texts reveals, at first sight, some strange phenomena. In Gn there is a close agreement between Cod. Ottob. and Cod. Lugd. In Ex, Cod. Lugd. and Cod. Wirceb. apparently belong to the same tr., while the Munich MS seems to stand by itself. Cod. Ottob., which appears to have suffered grievously by corruption, has a possible resemblance to the two firstnamed MSS. In Lv there is a good deal of varia-tion between the three chief texts (Ottob. not extant). In Nu and Dt we find that Cod. Lugd. and Cod. Monac. have, without question, the same source, while the relation to them of Cod. Wirceb. is difficult to determine. When we compare patristic quotations with the texts, it is striking to dis-cover that those of Lucifer have a remarkable re-semblance both to Cod. Lugd. and to Cod. Wirceb. What can be said of such complex results? We believe the solution lies in taking into account the underlying Gr. text. Accepting the classifications made by Ceriani + and Lagarde ; in reference to the Lucianic, Hesychian, and Palestinian recensions of the LXX, we find phenomena such as the following. In a section of Gn in which we have compared Cod. Wirceb. with the chief Gr. authorities, the result shows the most extraordinary mixture. On the whole, Cod. Wirceb. comes closest to the 'Cotton' Genesis (D), but the Bodleian E also finds a place. There are distinct traces, in addition, of 'Lucianic' A similar collocation in *Ex* confirms the mingling of elements in the text. Here, Cod. Wirceb. shows an intimate relation with AF and Hesychius, but there is also a Lucianic strain throughout. Following the same method with Cod. Lugd. in Lv, we reach a like result. From the definite facts already stated, and the total impression left by repeated comparison of texts, we are led to believe that in this group of writings the extant documents probably go back to an original tr<sup>n</sup> of which they are recensions. Only, the extraordinary variety of LXX texts prevalent in the age when the MSS were transcribed caused an unusual amount of correction and mixture of readings in the various documents.§

and mixture of readings in the various documents.s

# LATIN VERSIONS, THE OLD

This is quite sufficient to account for the manifold differences. And it is to be observed that some portions suffered from this process far more severely than others. Probably, we might not be wrong in placing the above-mentioned MSS parallel to the later 'European' texts\* of NT, if not to the 'Italian.' They have something in common both with the quotations in Ambrose and those of the 'Speculum' (m). The Fragg. of Gn pub. by Cony-beare come closest to Cod. Lugd. and S. Ambrose.

Historical Books. - According to our list, these consist of Ruth, Fragg. of Samuel and Kings, and Esther. Apparently, the text of Ru, which is 'Spanish,' agrees almost exactly with the quota-tions of Ambrose, and so may be designated 'Italian.' + The Fragg. of Samuel and Kings, while having their origin in different countries, are linked together in various ways. They all seem to have an intimate connexion with the recension of Lucian, t while they have the closest resemblance to the quotations of Lucifer, Ambrose, and Claudius of Turin. Accordingly, they may be classed, perhaps, as early 'Italian.' § In Est much confusion is found among the extant texts, perhaps arising from the fact that only a 'resume,' as Berger calls it, and not a complete version, existed in the OL Bible. We have compared Sabatier's text, which is from a Corbey MS No. 7 (at Paris), with that of the Munich MS pub. by Belsheim, the Vallicellian text (in Sabatier), and the extracts given by Berger from a Lyons MS. Probably, this last is the best. It resembles closely the Vallicellian text and that of Belsh. (which appear to us to be almost identical), while the Corb. text in Sabat., owing to mutilations and corruptions, seems a long way inferior to all the others. Here, again, we may perhaps go the length of saying that one tr<sup>n</sup> seems to lie at the foundation, but it has undergone much revision and corruption from a comparison with Gr. texts which had been subject to an exceptional amount of mixture. From an almost entire lack of quotations in the Fathers it is impossible to attempt to localize the There are frequent traces of the 'Lucianic' text. recension

Poetical Books.—The extant remains of Job are so scanty that it is difficult to come to any conclusion regarding the text. Apparently, the Frag. of Fleury, which is found both in the 'Speculum' and Priscillian, belongs to the earliest form of the Lat. VS, following the same type of Gr. text as Cyp. and Lucif., and therefore, perhaps, being entitled to the designation ' African.

According to Burkit, ¶ a second type of OL is found in the quotations of Ambrose, based on the leading uncials of the LXX and in intimate con-nexion with the Greek. The Fragg. which Berger has pub. from the margin of the Leon Cod. also reveal a close attachment to the Greek (esp. Cod. A), and coincide most frequently with the quotations of Ambr. and Aug. Perhaps the types of text ought to be called 'Italian.' Perhaps the two last

For a genuinely 'African' text of Ps our most trustworthy authority is MS L. of Cyprian's Testi-monis. The Verona and St. Germain Psalters both exhibit a later type of text, although the former has suffered less revision. It would be rash to specify either text definitely as ' European

rash to specify either text definitely as 'European' \* Rendel Harris points out some very curious resemblances in pelling between Cod. d and Cod. Lugd., which go to suggest, he thinks, that both were Rhône-valley MSS (Study of Cod. Baz, pp. 29, 30). \* See Berger, Notics, pp. 12, 13. \* See Berger, O, cit, pp. 14, 15. \* Still more defective appears to be the Cod. Pechianus which Sab. gives for the latter part of the book. OL of Est is to be pub. by Thielmann. \* Old-Latin, etc. pp. 8, 32-34.

or 'Italian.' A noteworthy feature is that the Verona MS shows a striking agreement with Verona MS shows a striking agreement when Aug.'s text of Ps, while decidedly marked is the affinity between the St, Germ. Psalter and the interview of Cassiodorus the Calabrian. The quotations of Cassiodorus the Calabrian. The portions of the OL Psalter found in the Mozarabic Liturgy belong to this latter type of text.\* *Proveros.*—Here we can distinguish two recen-

vigilius of Thapsus, having also a close resem-blance to the 'Speculum.' It may be designated 'African.' The other is seen in the Fragg. of the St. Gall MS, No. 11. These have their chief They therefore belong to the 'Italian' family. The Fragg. of *Ecclesiastes* and *Canticles* named

in our list are of precisely the same character as the second recension in Proverbs. We may here note that for OT it seems even more difficult than in the NT to draw a line between 'European' and 'Italian' texts. Often, indeed, there appears to be none.

Prophetical Books.—In attempting to classify the extant OL texts of the Prophets, we are met, as in the Hexateuch, by the difficulty of conflicting in the riexateuch, by the diministry of conflicting evidence. Fortunately, part of the ground has been cleared by Burkitt in his *Rules of Tyconius*. Much of what follows depends on his important investigations. The extant Fragg. of the Prophets plainly do not belong to the oldest stratum of the OL tr<sup>a</sup>. It is needful, therefore, to begin as usual with Cyprian; as we have seen, Tertullian's quota-tions are of doubtful value. Now, Burkitt has clearly proved t that Tyconius the Donatist (c. A. D. clearly proved that Tyconius the Donatist (c. A.D. 400) used an OL version of the Prophets (in Isaiah at least 1) almost identical with that of Cyp., the only difference being a slight revision of the Latin. How does this writer stand towards our two chief MS authorities, the Weingarten (w) and Würzburg  $(\lambda)$  Fragg.? At many points he is in close agreement with both, but especially, perhaps (e.g. in Ezk), with w. Now, a comparison of w and A shows so many agreements in proportion to differences that we cannot help believing that they are copies of the same tr<sup>n</sup> of the Prophets, whose variation is accounted for by varying elements in the Gr. texts by which they were revised.§ In  $\lambda$ , e.g. in the midst of a great mixture of types, the Luc. strain is considerably more prominent than in to.  $\|$  Accordingly, we may perhaps call h an 'Italian' text;  $\|$  its coincidences with Ambrose, and to a less extent with Augustine, are noteworthy. w is possibly an earlier revision of the same tr<sup>n</sup>.

• There seems to be a close resemblance in Ps between Pris-cillian and the 'Speculum.' The Latin Psalter with Anglo-Saxon paraphr. pub. by Thorpe, Oxf. 1835, is almost identical with the so-called 'Roman' Psalter of Jerome, although occasionally it diverges. The text of Cassiod. has also a most intimate connexion with Roman Psalter.

intimate connection with Roman Fanter. I Rules of Tyconius, pp. Ili-cvii. I It must be noted that there is a considerable difference between Tyconius' text of Is and of Ezk. See important table on p. cvi of op. cit. Burkitt suggests that perhaps there was 'a partial revision of the African Bible anterior to Cyprian, 'the result of which is seen in the text of Eak in Tyc. This point has been already brought forward in connexion with the quotations of Covering

other already orough forward in contents of which are quotients of Cyprian. § See also Cornill, Das Buch d. Proph. Ezech. p. 31 ff. But see Corssen's most important discussion of the two MSS in Zwei newe Fragmente d. Weing. Propheten. MS, Berlin, 1899, in which he shows that the variation is largely due to the insertion of

he shows that the variation is largely due to the insertion of glosses in the texts. 1 May it be that the infusion of this element into OT texts corresponds to the 'Antiochene' revision of NT? Since this was written, we are interested to see that Sanday is inclined to sesign the above-named revision to Lucian (Ozr. Debate, p. 29). TStreane, Double Text of Jeromian, p. 370, shows that for Jer A is non-African and prob. Italian. His searching in-vestigation goes to confirm our hypothesis. \*\* Banke shows that w has points of contact with Arnobius, Lucifer, Ambrose, and Hesychius (a Dalmatian bishop). See Pragmenta . . . Antchieron, fasc. 2, pp. 122, 123. This would suggest a very wide diffusion. An attempt to trace points of

It is interesting to note that Tyc. has a text essentially the same in the Prophets as another Donatist, Habetdeus, whose quotations can be assigned to the year A.D. 411. And to make the coincidence still more important, it is found that the St. Gall Frag. of Jeremiah has remarkable points of connexion with the biblical text used by a Donatist in the pseudo-Augustinian Contra Fulgentium Donatistam. This goes some way to establish a Donatist tradition of the OL version.\* A comparison of Tyc. with the 'Speculum' re-

veals a far greater amount of difference than be-tween the former and Cyprian. But there is so much important resemblance that the variation is probably due to a gradual revision of the language in m. This, as Burkitt points out, greatly enhances the value of the 'Speculum,' though a late text, for

the criticism of the LXX.<sup> $\dagger$ </sup> In some passages the 'Spec.' has a very close connexion with h, while in others it is entirely different. In comparing the quotations of Tertull. and Cyp., with reference to the Gr., for another purpose, the writer was surprised to find that in the Book of *Daniel*, while Cyp. sometimes used Theodotion's version and at others the LXX, Tert. seemed invariably to follow the latter. The whole subject has been thoroughly investigated by Burkitt, t who proves beyond question, that while Theodotion was followed as early as the 3rd cent. by Auctor de Pascha Computus, and thenceforward throughout the Lat. Church (also in h and w of Prophets), Tertull. adhered to the LXX, as also, to some extent, did Cyp., whose text is mixed.§ This shows the varying histories of the several books of Scripture, a fact which has been already noticed in regard to NT.

APOCRYPHA. Fourth [Second] Esdras.—The texts of this book have been accurately studied, texts of this book have been accurately studied, with the result that the leading authorities fall into two groups. Two MSS, Cod. Sangermanensis (pub. by Sab.) at Paris (Bibl. nat. lat. 11504-5) and Cod. Ambianensis (Amiens, Bibl. Communale 10) have a 'French' text; the other two, Cod. Complut. (Madrid Univ. 31) and Cod. Mazarinæus (Paris), present a 'Spanish' type of text. The other extant texts are related to these two families " families.

Third (First) Esdras.—Here, again, we possess two types of text, both of which are represented in Sab., and one of which is the Vulg. Both texts are evidently of great antiquity, presenting many of the most t. pical characteristics of the 'African' group. Probably, Vulg. is an emended form of the other version.

Tobit.—As appears from our list, there are many MSS extant of the OL version of Tobit. So far as we can judge, they all go back to one trn, though considerable differences exist. A rough comparison leads us to 'elieve that the leading texts are re-lated somewhat as follows : Sabatier's text (derived from MSS lat. 93 and 11505 at Paris) seems closest to the quotations of Lucifer. Slightly different from it are Paris MS lat. 11553 and Munich 6239, Cod. Regio-Vat. No. 7 is which agree closely. Cod. Regio-Vat. No. 7 is more independent of the other texts, and may be, perhaps, a separate translation. I it contains only chs. i.-vi. The rest is Vulgate. The quotations in Speculum seem to show a third recension.

are ement and differences between the two texts (w and h) and the Fathers has led, on the whole, only to confusing results. Olearly, we have much yet to learn regarding the OL version (or versions) of the Prophets. \* Of. Rendel Harris on the Montanist character of Cod. Beze (Study of Cod. Bez. p. 148 ff.). † Rules of Tycon. p. lxiv. 2 Old Latin and Itala, pp. 18-31. § This mixed text also found in Lactantius and Firmious Maternus.

- Maternus. | See Fourth Book of Ezra, by Benaly and James, pp. xii-xxii. ¶ See Fritzsche, Hdbuch zu. d. Apokryphen, ii. pp. 5, 11.

Judith.—As in To, the OL of Jth appears in a variety of MSS. While one original lies, apparently, behind all the texts, it appears to us that Mun. MS 6239 has the oldest type of text. A some-what longer and perhaps later form is found in the text of Sabatier (Paris MSS lat. 93, 11505). The Paris MS 11553 seems to have a mixed text, now agreeing with Mun. MS, now with Sabat. MS lat. 11549 (at Paris), while somewhat mixed, agrees perhaps more often with Mun. MS.

Wisdom of Solomon.—As already pointed out, this is proved to be an 'African' text. It seems to be fully as old as Cyp.†

Sirach. - The Vulg. text of this book is also 'African' Latin. Curiously enough, however, chs. Arrican Latin. Curiously enough, nowever, chs. 44-50 are shown by Thielmann  $\ddagger$  to have been tr<sup>4</sup>. later than chs. 1-43, 51, and they belong to the 'European' type of text. The Prologue is also 'European.' The Frag. ed. by Douals is appar-ently a 'Spanish' text, being a revision of the primitive 'African' version.

Baruch.—Two main types of text, so far as we can judge from the published MSS, are extant in this book. The one is the Vulg., which agrees with the quotations of Cyp., Vigilius, and, as a rule, Fulgentius. The other, which is not far removed, is represented by Paris MS 11951, Rheims MS No. 1, and Vallicell. B. 7 (all in Sab.). We cannot say much as to patristic evidence, but at times, at least, it is corroborated by the quotations of Hilary and Augustine.§

Maccabees.—In 1 Mac two forms of text can be traced. The one is the Vulg. The other, which in many passages is identical with the Vulg. and then disagrees to a great extent, is found in Paris MS lat. 11553, pub. by Sabat. It agrees uniformly with the quotations of Lucifer, which are very numerous in this book. Berger points out that this latter rests on the same tradition as that of Cod. Complut., while there are readings in the Leon Palimpsest (Chapter Lib. No. 15) which seem to lie behind the St. Germain text in Sab. A mixed text, according to Berger, is found in the Lyons MS No. 356.

In 2 Mac we find several versions more or less distinct. The Vulg. stands by itself. A mixed text is that of Lyons MS 356.¶ The text of Cod. Complut. is of a different type from the Vulg. We have not been able to see the text from Ambrosian MS E. 26 infer., pub. by A. Peyron.\*\* Berger (*Hist. de la Vulg.* p. 138) says of it : 'The version preserved by our MS is not found elsewhere,

and is of extreme importance.' ++ A few words ought to be said, before we conclude this article, upon the Gr. text which underlies the OL version. For, after all, its primary importance consists in the evidence it furnishes for the original Gr. text of both OT and NT. Obviously, the inquiry is very wide in its range. We can only

Scholz in Comm. uber das Buch Judith (Würzburg, 1896), p. xxiii f., considers that Paris MS 11549 (Cod. Corb. in Sah.) is a private tr<sup>n</sup>, though closely related to the other. He would also assign importance to Cod. Pechianus (in Sah.), which he believes to be directly transl. from a Greek text with the help of the OL. It stands closest to Paris MS 11553 and agrees with the quotations of Lucifer. The quotations of Fulgentius most resemble the text of Sabat, which is a 'Oallic' text. Perhaps the Munich MS may be 'African.' See also Fritzerhe, Hdhuch. ii. p. 119, and Thielmann, Britr. z. Text. Frit. d. Vulgata, Speier, 1883. Thielm. is to pub. OL of Tob, Jud. Sap, and Sir. t See Thielmann, Archie, viii. 2, p. 235 ff.

### LATIN VERSIONS, THE OLD

give the barest outline; and even this, in the present condition of the investigation, is incom-plete and provisional. Two most important and suggestive statements are made by Hort as to the type of Gr. text circulating at the period with which we are here concerned. 'The text of D presents a truer image of the form in which the Gospels and Acts were most widely read in the 3rd and probably a great part of the 2nd cent. than any other extant Gr. MS.' And again : 'A, both in the Gospels and elsewhere, may serve as a fair example of the MSS that, to judge by patristic quotations, were commonest in the 4th cent.' (Introd. pp. 149, 152). These words, in our view, have a very significant bearing on the question before us. For it has become sufficiently clear that the period from the middle of the 2nd cent. to the end of the 4th is the most important for the Keeping them in mind, let us come OL version. to the actual facts, in so far as we are able to present them.

The NT must be our starting-point. What can be said as to the earliest group of texts, presum-ably the 'African' family ? Cod. k, which, as we have seen, agrees with Cyp., is the most important witness. Fortunately, Sanday, in the work so often quoted, has a valuable Appendix on 'the Gr. text implied by k.'\* Elaborate lists showing the relation of k to the leading Gr. authorities plainly declare that the main elements in its text are the Western' (as represented by D) and the 'Neutral' (\* B in particular). The 'Western' strain slightly predominates. As regards the kindred Cod. c, a collation we have attempted of several long sections from the Gospp. reveals a close relation with B and one almost as intimate with D, \*, and A. The one fact which strikes us in comparing the two sets of results is that A has become an important factor in Cod. e. When the 'European' group is investigated, it is interesting to note the changing of places by the MSS. We have taken a and bas typical texts, and the results for both are, on the whole, congruous, except that a seems to have a much more important place in b than in a. In both, B loses the prominent position which it occupied in the 'African' group. D has, of course, a predominating influence, but it is closely folat least, the influence of A were known for the cosp. at least, the influence of A were known the chief forces in differentiating the 'European' from the A fraine ' common A deline and the common the chief 'African' group. And this seems to coincide remarkably with Hort's hypothesis of a Syrian recension, perhaps made at Antioch, about the beginning or a little before the beginning of the 4th cent., whose influence spread in all directions. For, in the Gospp., 'A has a fundamentally Syrian text.' In any case, the great increase in the A element is plainly no accidental cir-cumstance, but, as we shall find in the OT, a fact intimately bound up with a certain stage of the OL version.

We have taken f as representative of the 'Italian' texts. The facts which a minute examination of long sections in Mt, Mk, and Lk brings out are of the kind we might expect. There is, apparently, a great mixture of elements in the underlying Greek. One of the most noteworthy of these is represented by Cod. L, itself a very with 'Alexandrian,' 'Western,' and 'Syrian' elements. Cod. C is also prominent, which again is composed of most various forms of text. As invariably. D is still an important factor, while A also appears to have lost little ground. \* and B have not regained the place they occupied in the 'African' group. In Ac, as we have seen, we can at least distinguish between the 'Airican' and \* OL Bibl. Texts, ii. Append. i. pp. 95-122.

### LATIN VERSIONS, THE OLD

'European' texts, represented most typically by the Fleury Palimpsest (the text of Cyp.) and the (sigas (the text of Lucif.) respectively. From Corssen's investigation<sup>\*</sup> it is plan that the former depends on a 'Western' text even more uniform than D. The latter, so far as a rough survey of its readings can reveal, has a very mixed character. D is a prominent factor in it, perhaps the most pro-minent. Of the other more important uncials, E, and at some distance A and C, seems the best represented. † One has the impression of a text belonging to a time of revision. And the phenomena found here appear to justify Berger's query as to whether, in Ac, there is any distinction between 'European' and 'Italian' readings.; Space for-bids any further examination of the NT books bids apy nurther examination of the N1 dooks except that we may point out that the chief of OL versions of the Epistles§ (except Freis. Fragg.) seem to depend for their text mainly on D and G, whether separate or combined, and often on the group D G K L. The Freis. Fragg. have a far greater mixture of elements, being apparently revised from MSS such as C A \* L (while their basis is D G). In the Apon the text of Primaging scame  $\P$ is DG). In the Apoc. the text of Primasius scems ¶ to approach closest to that of Andreas of Cæsarea, and Cod. P; but there remains an important element peculiar to himself.\*\*

As regards the Gr. text underlying the OL of the OT, our statements must be even more general and provisional. For the leading uncial MSS of the LXX have never been grouped, and we cannot, with any definiteness, state their mutual relations. And the cursives, which in the LXX are of unique importance, have received little investigation. Hence there are few ascertained data on which to base any reasonable hypothesis. Certainly, the classification into families of texts, and the marking off of stages in their history, would be a difficult task. For this tr<sup>a</sup> must have undergone from first to last the most varied treatment. The original Gr. VS, the rival tr<sup>us</sup> of Aquila, Theodo-tion and Symmachus, the attempt of Origen to purify the text, the subsequent recensions of Eusebius, Lucian, and Hesychius, all have conspired to produce a chaos in the MSS of the LXX. This has a bewildering effect on the comparison of the OL with the underlying Gr. No doubt we may say that the earliest Lat. VS of the OT must have been made from the pre-hexaplar Gr. text which was in common use.<sup>++</sup> But we know little of its history. history. It must also have been subjected to various forms of corruption. We cannot identify it with the genuine LXX. We are also unable to state definitely the relation borne to it by the great extant uncials and those groups of cursives which are assumed (with more or less reason) to be

particular recensions. Accordingly, the following notes must be somewhat vague and hypothetical. In the books which apparently preserve a fundamentally 'African' text, such as Sirach, we might expect to find a relatively pure Gr. text at their base. Nor are we, on the whole, disappointed. This OL text shows a close rela-tion to Cod. 248, which is here, perhaps, the best representation of the original Gr. text.<sup>‡‡</sup> But,

• Der Cyp. Text d. Acta Apost., Berlin, 1892. See esp. p. 18 ff. • The Fleury text has a very intimate connexion with it, while it shares many readings also with the text of Aug. and with that of the Vulgate. • Un ancient texte ... des Actes, p. 18. • Codd. and Ampropagater. In this group they are often joined by Jerome in his Com-mentaries. See Consen, *Epist. ad Galatas*, pp. 52, 53. This result is provisional, as our investigation only embraced two or three chs. of Apoc. See Bousset, *Textkritische Studien*,

two of three cus, or aport occ inserve, arministry, arministry, and the pathological states of the pathological states o

in the words of Lagarde,\* 'all the MSS of the Gr. trn of the OT are either directly or indirectly the result of an eclectic procedure.' This is the key to the phenomena of the OL version of the OT.  $\dagger$  When we come to examine the large group of OT texts which we have designated either '*European*' or '*Italian*' (and the boundary be-tween them is, at least, a fluctuating one), the result is most confusing. In the *Hexateuch*, as already observed, there appears an almost indefinite amount of mixture. It is, perhaps, useless to ask to which of the great uncials the leading MSS are most nearly related. For other elements intrude continually. Here and there, indeed, a definite relationship reveals itself, as, c.g., in Exodus where Cod. Wirceb. has a distinct connexion with the group A F. But, as a rule, both in it, in Cod. Lugd., and in Cod. Monac. there are constant traces of Hesychian<sup>‡</sup> and Lucianic readings, as well as relations of an undefinable kind to the leading uncials.

In the Historical books it can, at least, be affirmed that the recension of Lucian is one of the ammed that the recension of Lucian is one of the prominent elements lying at the basis of the text.§ This is specially noticeable in the Vienna Fragg. of Samuel and the Leon Fragg. of Kings. Ceriani had observed the agreement of 'Lucianic' MSS with the text of Ambrose and the 'Speculum.' And thus he is led to believe that the 'Italian' remains of OT (which we have a reduced the 'Italian' revision of OT (which perhaps includes the 'Eurorevision of OI (which perhaps includes the 'Euro-pean') had, partly at least, for its standard, some MSS of the same type as those used by Lucian in his recension. At the same time, A and B cannot be ignored. Indeed, as Lagarde has pointed out, Cod. A has a specially close connexion with the OL text of OT which asserts itself here and there. When the *Prophetic* books are exemined this becomes more evident in are examined, this becomes more evident. In Ezk, e.g., Cornill has shown that the text both of h and w has close relations with A, although these are sometimes obscured by Hexaplaric omissions and insertions, or confused by later cor-rections and corruptions.\*\* The same holds of other books, e.g. the OL of Jub. ++ It is a noteworthy fact, and suggests a real connexion between the OL of OT and NT at a certain stage, as we have already seen the prominent place A occupies in all but the oldest NT texts. Considerations of space prevent us from lingering on this most important but complicated department of our subject. We cannot do better than close with a quotation from Burkitt's summary of conclusions

Subject. We cannot us better than close with a quotation from Burkitt's summary of conclusions \* Annerkungen zur grieck. Uebersetz. der Proverb. p. 8. † Thus, c.g., Vogel's Fragg. of Proverbs, which are plainly 'African,' agree 18 times with A rather than B, 17 times with B rather than A; they have 18 readings only found in cursives, while 110 are peculiar to themselves. 1 Cornill connects Cod. A closely with the Hesychian recen-sion (see Ezechiel, p. 67). Silberstein (ZAW xiv. p. 2.), after an elaborate investigation, comes to the conclusion that the origin of the form of text in A must be referred to the recension of Origen. He agrees, on the whole, with Cornill as to B. § See Vercellone, Varia Lectiones, ii. p. 430. Driver, Notes on Sanneel, pp. lxxvii-lxxxii. Cerlani, Reconsionsi dei LLX, etc., p. 4. It is now generally admitted that MSS 19, 82, 93, and 108 (in Holmes and Parson's ed. of LXX), agreeing, as they do, with the quotations of Theodoret and Chrysostom, represent the recension of Lucian. See also Lagarde, Vet. Test. Gruce, Pars Prior, Gott. 1883, Preface. I Septuaginta-Studien, i. pp. 71, 72. Y A question which still awaits investigation is the relation of A to Lucian. This would shed much light on the OL. It is of interest to find that the prevailing type of text in quotations from the LXX in the Gospels is that of A and Lucian. B is soarcely observable. See Staerk, Zwih. 1898, i, p. 97 ff. \*\* Cornill would connect A with the recension of Hesychius (Ezechiel, pp. 67, 71). Unquestionably, those cursives which contain in all likelihood this latter text are an important dissertation, De Codice Marchalianus (Q), which has copious marginal notes from a Hexaplar copy. See Ceriani's mout important dissertation, De Codice Marchalianus Contain to the OL. He compares the various texts of the LXX from sections of the Prophets, both mutually and in relation to the OL. †f See Berger, Notice, p. 23.

62 LATIN VERSIONS, THE OLD

as to the relation of the OL to the Gr. text in the Prophets.\* For, in all probability, similar processes and results would appear in the other groups of writings. 'The OL brings us the best independent proof we have that the Hexaplar signs introduced by Origen can be relied on for the reconstruction of the LXX.... Together with the Hexaplar text,' it 'often agrees as to omissions with the text of B.... Yet the same authorities convict B here and there of interpolations... When we turn from questions of insertion and omission to questions of rendering of the Heb. and the substitution of one Gr. word for another, we find that the OL in the Prophets sometimes supports "Lucianic " readings.' And finally, 'there are renderings found in the OL representing Gr. readings which have disappeared from every known Greek MS, but which, by comparison with the Hebrew, are shown to preserve the genuine text of the LXX from which the readings of our present Greek MSS are corruptions. In these passages the OL is sometimes, but not always, supported by one or both Egyptian versions.'

One subordinate department of our subject has not been touched, as, to a great extent, lying outside the scope of the present article, and also as requiring far more space than could be afforded. We refer to the *Latinity* of the OL versions. It seems advisable, however, to give references to some of the leading authorities.

A large collection of material is to be found in Itala und Vulgata, by H. Rönsch, ed. 2, Marburg, This work deals with peculiarities of forma-1875. tion, inflexion, grammatical structure, and mean-ing. See a penetrating criticism of it by J. N. Ott (Fleckeisen's Jahrb. f. Philologic, etc. 1874, p. 778 ff., 833 ff.). Rönach also contributed a great number of articles to various journals. See especially his 'Sprachliche Parallelen' and 'Itala-Studien in ZwTh. 1868, 1881-82: 'Zur vulgaren und bibli-schen Latinität,' in Zeitsch. f. die osterreich. Gym-nasien, 1879, No. 11. There are further studies on this subject in his Semasiologische Beiträge, 1887-89, and Collectanea philologa, 1890. Of great import-ance is the unfinished work of G. Koffmane, Geschichte des Kirchenlateins, Breslau, 1879-81 (only 2 parts of vol. i. have appeared). It devotes special attention to the Christianizing of Late-Latin, and the moulding of it to biblical use. H. Schuchardt's elaborate Vokalismus des Vulgär-Lateins, Leipz. 1866-67, contains much that is suggestive for the language of the version. More directly bearing on our subject is K. Sittl's Die lokalen Verschiedenheiten der latein. Sprache, Erlan-gen, 1882. It deals largely with 'African' Latin, with special reference to the Bible. The Handbuch *zur Vulgata*, by F. Kaulen, Mainz, 1870, also pro-vides material for study. Valuable collections of linguistic facts are to be found in some of the edd. of the MSS. See, especially, that of the Lyons Pentateuch, by U. Robert, pp. xli-lxxxy, available third states and the states of the states of the variable states of the exxiii-exxviii, which contain an examination of the grammar and orthography of the text, as well as giving tables of Hellenisms and new words; E. Ranke's Par Palimpsestorum Wirceburgensium, pp. 412–427, with copious grammatical notes; and Sanday's dissertation on Cod. k, OL Bibl. Texts, ii. Sanday's dissertation on Coa. K, OL Biol. Jexis, il. § 14. Perhaps we ought to mention also Rendel Harris's Study of Cod. Beza, ch. iv. v. xii. xxvi., and Burkitt's Rules of Tyconius, pp. lxviii-ev. Sanday has an important appendix in Studia Biblica, ii. p. 309 ff., and in vol. iv. of the same series there is a valuable essay on the Style and Language of S. Cyprian, by E. W. Watson. See also Ehrlich, Beiträge z. Lat. der Itala, 1895. By \* Rules of Tyconius, pp. cxvi, cxvii. See also Streane, Double Text of Jeremiah, 369-572.

# LATTER

far the richest storehouse of matter bearing on the Latinity of the OL is the Archiv für latein. Lexikographie, ed. by Wölfflin (pub. at Leipzig). The following articles are of special importance: 'Die ersten Spuren des African. Lateins,' by Wölfflin (Jahrg. VI. Heft i. p. 1ff.); 'Die Heimath der Appendix Probi,' Sittl (vi. 3, p. 557 ff.); 'Die Sprache Priscillian's,' Schepss (iii. 3, p. 307 ff.); 'Lucifer von Cagliari und sein Latein,' Hartel (iii. 1, p. 1ff.); 'Lexikographisches aus dem Bibellatein,' Thielmann (i. 1, p. 68 ff.); 'Minucius Felix,' Wölfflin (vii. 4, p. 467 ff.); 'Die latein. Sprache auf. african. Inschriften,' Kübler (viii. 2, p. 161 ff.); 'Spuren gallischen Lateins bei Marcellus Empiricus,' Geyer (viii. 4, p. 469); articles on 'Wisdom of Solomon' and 'Sirach,' by Thielmann, already referred to; 'Die europäischen Bestandtheile des latein. Sirach,' Thielmann (ix. 2, p. 247 ff.). See also the 'Jahresbericht über Vulgär-und Spätlatein,' by K. Sittl in Bursian-Iwan Müller's Jahresbericht, latinische Litteratur von 1886-87 bis Ende 1894' in the same series, by C. Weyman, 1896.\* For further references to the language of particular authors see the list of Fathers. We have omitted mention of the numerous works which deal with the Latin language in general.

This article has dealt only with the early history of the Latin translations of the Bible. Their later developments from the time of Jerome onward are treated under VULGATE.

For the general literature of the subject, see the authorities referred to throughout the article, Nestle's art. in *Herzog*<sup>3</sup> (iii. 24 ff.) which appeared while this was in the press, and Corssen's admirable *Bericht über die latein. Bibelübersetzungen* (Bursian's Jahresb. Bd. ei.), published only in time to admit of a few footnotes being added from it during final revision. H. A. A. KENNEDY.

**LATTER.**—The adj. 'late' is now regarded as having two forms for the compar. and superl., later, latest, and latter, last, and a difference in meaning is usually observed. But the distinction is quite recent. In modern editions of AV the only spelling is 'latter,' but the ed. of 1611 had 'later' in four places, Is 477, Jer  $5^{34}$  48% 49%, and there is no difference in meaning. Shakespeare has 'later' twice (acc. to Bartlett's *Concordance*), once in ref. to time, 'And she goes down at twelve —I take't, 'tis later, Sir' (*Macbeth* 11. i. 3), once as equivalent to 'latter' as it was then used, *K. John* 111. I. 288—

'Therefore thy later vows against thy first Is in thyself rebellion to thyself.'

He also uses 'latest' for 'last,' as Love's Labour's Lost, v. ii. 797,—'At the latest minute of the hour.'

In AV as in Shakespeare 'latter' is always (except when distinctly opposed to 'former') equivalent to 'last.' Thus in AV, Job 19<sup>25</sup> 'For I know that my redeemer liveth, and that he shall stand at the latter day upon the earth' (RV 'at the last upon the earth'); 2 P 2<sup>20</sup> 'the latter end is worse with them than the beginning' (RV 'the last state is become worse with them than the first'): and in Shaks. *Henry V.* IV. i. 143, 'All those legs and arms and heads, chopped off in a battle, shall join together at the latter day'; and 1 *Henry VI*. II. v. 38—

### 'And in his bosom spend my latter gasp.'

The expressions 'latter end' and 'last end' are thus equivalent, and both old-fashioned redundancies.

For Latter Rain see RAIN. J. HASTINGS.

\* For later lit. sec 'Jahresb. über Vulgär-und Spätlatein ' by P. Geyer, Bursian's Jahresbericht, xcviii. pp. 33-117.

LATTICE .- See under Window in art. HOUSE, vol. ii. p. 435<sup>ь</sup>.

**LAUD** (taken directly from Lat. *laudare*, to praise) as a synonym for 'praise' seems never to have been very frequently used, either as verb or subst., though the latter was more common than the former. Shaks has each twice. In AV the only once, Ro 15<sup>11</sup> 'Praise the Lord, all ye Gentiles; and land him, all ye people.' The Greek verbs here are different (alvée and éraurée), and no doubt Tindale, from whom the tr. comes, introduced the variation purposely ; but AV seems simply to have accepted it from the immediately preceding versions, accepted it from the immediately preceding versions, for in Ps 117<sup>1</sup> of which this is a quotation, the Heb. verbs are again different, and Coverdale's tr. was again 'praise' and 'laud,' but the Geneva version, followed by the Bishops, changed 'laud' into 'praise,' and AV has 'O praise the Lord, all ye nations: praise him, all ye people.' RV obliter-ates the distinction between the Greek verbs in Ro 15<sup>11</sup> giving 'praise' twice, but restores it in Ps 117<sup>1</sup>; and in Ps 145<sup>4</sup> RV again introduces 'laud' for 'praise' to tr. the same Heb. verb. But in Ps 147<sup>12</sup> RV has taken over the AV tr. 'Praise the Lord, O Jerusalem; praise thy God, But in 18 14/- Ity has taken over the first or. 'Praise the Lord, O Jerusalem; praise thy God, O Zicn,' though the Heb. shows the same dis-tinction in its verba. Driver (*Parallel Psalter*, 

multitude of the disciples began to rejoyce, and to lawde God with a loude voyce'; and the subst. in 1 P 17 'that youre fayth . . . myght be founde unto lawde, glory, and honoure at the appeninge of Jesus Christ, and  $2^{14}$  for the laude of them that do well.'

It is doubtful if even the verb can be used now without affectation ; but if it can, and the Revisers seem to have thought so, it is a pity it was not consistently used for  $i\pi auria (Lk \ 16^{\circ}$ , Ro  $15^{11}$ , 1 Co alrée. to praise. J. HASTINGS.

LAUGHTER.-The laughter mentioned in the Bible is of three kinds, (1) loud laughter as opposed to demonstrative weeping, (2) wondering or incredulous, and (3) derisive.

(1) Koheleth allows that there is a time to largh as well as a time to weep (Ec 3<sup>4</sup>), but he reckons sorrow better than laughter (7<sup>4</sup>), and calls larghter madness (2<sup>2</sup>). Bildad offers Job the pro-spect, if he be really upright, of a time when God will fill his mouth with laughter (Job 8<sup>21</sup>); the returning exiles enjoyed such a time (Ps 126<sup>3</sup> 'Our menth with bud lawstar' De mouth was then filled with loud laughter'-De Witt); and Jesus promises it definitely in the Restitution to those who weep now (Lk  $6^{21}$ ). In every instance it is the Oriental loud laughter, which is rarely heard, and only upon occasion of the utmost glad surprise. Christ's woe is pronounced on those who laugh now when no such surprise is possible (Lk 6<sup>25</sup>).

(2) More frequent is the laughter of wonder or incredulity. So Abraham (Gn  $17^{17}$ ) and Sarah (18<sup>12</sup>) laughed when they heard the promise of a son. And even when the promise could not be doubted longer by themselves, they knew that all that heard would laugh at them (21<sup>6</sup>), they were so old.

EV retains in Gn 21<sup>6</sup> the AV translation 'all that hear will laugh with me.' But '77,713' can mean only 'will laugh at me'; cf. Job 522 397.18 '22, Ps 595'. Still it is not *derivivs* laughter that Sarah fears; she does not *fear* the laughter at all; she only knows that when people hear of it they will laugh, it is so aaton-whing as to be still almost incredible. 'Laugh with me' is the rendering of the ancient versions and of all the English versions

from Wyclif, except Tindale, 'And Sara sayde, God hath made me a laughinge stocke, for all that heare, will laugh at me.' Coverdale has even, 'God hath prepared a joye for me, for who so ever heareth of it, wyll rejoyse with me,' and is followed by the Genera translators and the Bishops. Kalisch defends the AV tr., on the ground that 'no other sense is adapted here but the smile of surprise and admiration.' But Dillmann, Del., Kautzsch (über mich), Segond (de moi), and most modern com-mentators translate' will laugh at me'-meaning, however, to express surprise rather than derision.

(3) But the most frequent occurrence of laughter is in derision. The feeling ranges in expression from the gentle mocking of Daniel (Bel <sup>19</sup>) to the judicial laughter of Him that sitteth in the heavens (Ps 24).

There are three Heb. verbs translated 'laugh,' poy (except Jg 1625 Ezk 2322, confined to Pent.), its later form pny, and J2<sup>7</sup>. All three are occasionally rendered in AV 'laugh to scorn,' but esp. the last, which does not properly mean to laugh but to scoff at or scorn. In 2 Es 2<sup>21</sup> claudum irriders not is trd 'laugh not a lame man to scorn,' and the expression 'laugh to scorn' is found in the Gr. Apocr. as the tr. of zerreylaes, J1th 12<sup>13</sup>, Sir 7<sup>11</sup> 2017 (cf. also I Mac 10<sup>70</sup> 'l am laughed to scorn for thy sake,' iyè ài iyu; (bp. if zerreylizer, 2 Mac 7<sup>24</sup>; cf. also Sir 6<sup>44</sup> 'Shall make him to be laughed to scorn of his enemies,' ier; zeptes iz 9<sup>3</sup> e zuice wire. In NT zerreylizer, 2 Mac 7<sup>24</sup>; cf. also Sir 6<sup>45</sup> 'Shall make him to be laughed to scorn of his enemies,' ier; zeptes iz 9<sup>3</sup> e zuice wire. In NT zerreylizer is so trd where it occurs (Mf 92<sup>44</sup> Mk 5<sup>40</sup>) Lk 6<sup>30</sup> at the raising of Jairus' daughter), so that a distinction is maintained between the simple ydde (only in Lk 6<sup>31</sup>: 2<sup>3</sup>) and its more emphatic com-pound. The phrase is due to Tindale in these places, who thus improved on Wyclif 'thei scorneden hym.' Tind. was followed by all the versiona. Ju?. All three are occasionally rendered in AV 'laugh to scorn,'

The phrases 'laugh on' and 'laugh upon' are now obsolete, though we retain the equivalent 'smile upon.' They occur once each, Job 29<sup>24</sup> 'if I laughed on them, they believed it not' (prpscrybg, RVm 'I smiled on them when they had no confidence'; the AV tr. comes from the Geneva Bible, which explains its meaning by the marg. note, 'That is, thei thoght it not to be a jest, or thei thoght not that I wold condescend unto them'), I Es 4<sup>31</sup> 'if she laughed upon him, he laughed also' (dha means of an or of the set.) laughed also' (εἀν προσγελάση αὐτῷ, γελα). J. HASTINGS.

**LAUNCH** is now transitive only. In AV it occurs intransitively and only so. RV has changed the word into 'set sail' (Ac  $21^{1}$ ), 'put to sea' (Ac  $27^{2.4}$ ), or simply 'put' (Lk 5'), and once has retained it (Lk  $8^{22}$ ). The transitive use must be the older, as the verb is formed from 'lance,' and the older, as the verb is formed from 'lance,' and means primarily to 'hurl a lance,' and then to send (a ship) into the water. Spenser uses it fre-quently in the simple sense of 'to pierce,' almost as we now use 'lance,' as FQ II. iv. 46, 'For since my brest was launcht with lovely dart.' Shake-speare has the word only once, and it is transitive, 'Trail and Crace II ii 90 Troil. and Cress. II. ii. 82-

'Why, she is a pearl, Whose price hath launch'd above a thousand ships.'

**LAYER** ( $\forall \forall y$  or  $\forall y$ ; LXX  $\lambda out \pi h \rho$ ).—This is the name given to the ten brazen basins made by Hiram for Solomon's Temple, 1 K 7<sup>30, 33, 45</sup> (= 2 Ch 4<sup>6, 14</sup>).\* They were raised on high stands, and furnished with wheels. Anything beyond this is difficult to ascertain with certainty. Keil and

\* In 1 K 740 Π'τ': abould be emended to Π'τ'τ (cf. v.45 ] 2 Ch 411. 16 and LXX λίβητα:).

others make out the bases or stands (ctein) to have been square bases with ornamented panels. Nowack (*Heb. Arch.* ii. pp. 44-46), following Stade (*ZATW* iii. 159 ff.), corrects the text, which at present is unintelligible in parts, and, further, utilizes for comparison the vessels now known to have been used in Semitic antiquity from the evidence of the Assyrian monuments. He thus arrives at a more probable reconstruction, thoug. he is perhaps over-bold in venturing on a conjectural sketch of a laver as he understands it. ln the following description of the details Nowack is followed in the main.

The base or stand was made up of a lower and an upper division. The lower division was a square framework, of which the sides were partly open. If they had been massive plates of metal, each  $3 \times 4$  cubits, the whole would have been too heavy to move. Moreover, the Assyrian examples show a much lighter kind of stand than those used in supporting the Greek amphora. The sides were like an unglazed window-frame, with horizontal borders or panels (might graded with the sector horizontal borders or panels <math>(might graded gradedextremities were extended to form *feet*, in which were fixed the axles, on which the wheels turned. The wheels, each  $1\frac{1}{2}$  cubits high, were thus com-pletely under the body of the base. Thus the lower part of the base being itself 3 cubits high, its top edge was  $4\frac{1}{2}$  cubits high. On the top of this lower part was a *pcdestal* (1 K 7<sup>20</sup>) consisting of a *round compass* or ring (v.<sup>30</sup>) something like the *capital* of a column (v.<sup>31</sup>). The outside measure-ment of this ring was  $1\frac{1}{2}$  cubits across, and the inside measurement 1 cubit, while it was raised half a cubit above the base proper (v.<sup>30</sup>). As the half a cubit above the base proper  $(v, \infty)$ . As the diameter of the latter was 4 cubits, the supports (stays or hands) of the ring must have sloped in-wards very considerably. These supports seem to have sprung from a square framework (v, s) resting on the top of the lase. As a dome with a central circular window is often built over four square walls and supported by four ribs from the corners sloping inwards, so this open metal frame had a square base and a round opening or ring, into which the basis or *laver* fitted. The *borders* and *stays* were ornamented with lions, oxen, and cherubim, and with embossed wreaths.

It is remarkable that these ten lavers do not reappear in the sketch of the new temple put forth by Ezekiel, or in the temple of Zerubbabel, nor is anything like them found in P's representation of the tabernacle. The last we hear of them is that Ahaz cut off the borders of the brises and took the laver off them (1 K 16<sup>47</sup>). From this the suggestion has been supported that the connecting parts of the framework were, as in some similar constructions of which Semitic archaeology has evidence, hollow, or that they were wood inside plated over with brass. As for the discarding of the molten sea and ten movable lavers, which seems to indicate some prejudice against them, it has been conbeing projection of the provided associations which had now become distasteful. The great molten sea is connected with the drep ((Aref) and the lavers with the clouds. It is observed that Ezekiel, who describes no wheeled lavers ornamented with lions, oxen, and cherubim, yet has a vision (ch. 1) of living creatures, uniting the charwheels closely associated with them, the whole imagery suggesting the personification of the clouds borne on by the storm blast. The explanation of the Chronicler (2 Ch 46), that the lavers were used for washing the sacrifices, has nothing to support it in Kings, and it is hard to see how such lofty basins could have been put to practical use.

No hint is given in the elaborate description of any means for drawing off water. The symbolical interpretation gives a fine suggestiveness to these vessels. The priest of J" draws near to Him as Lord of the furthest abyss and of the rolling storm clouds.

Although, as we have seen, the molten sea and ten lavers have no parallel in the account of the tabernacle, yet we find there a single laver. It is relation to  $P^{\alpha}$  (Ex 30<sup>17-21</sup> 31<sup>9</sup> 35<sup>16</sup> 38<sup>8</sup> 39<sup>39</sup> 40<sup>11</sup>, Lv 8<sup>11</sup>), and nothing is said as to its size or shape. It consisted of two parts, the basin and its pedestal (12). The word 'base' ( $\varphi c \eta c h$ ) is not used. In Ex 38<sup>s</sup> it seems to be stated that it was made of the mirrors of the serving women. Others, with some violence to the Hebrew, render '(provided) with mirrors for the serving women.' Its purpose was definite viz that the manufacture of the serving women. definite, viz. that the priests might wash their hands and feet there before entering the tabernacle, by the door of which the laver stood on the inner side of the brazen altar. So in He 1023 the imagery is applied to the true worshipper, and in Tit 3° the laver becomes a type of the baptismal font, by which (de lourpour malry everlas) believers have access into the Church of the first born. In Zerubbabel's and Herod's temples there was, in accordance with P's representation, a single laver.

LITERATURE.—Keil, Nowack, and Benzinger on Bibl. Archaeology (only the first translated); Gesenius, *Thea.*; the commentaries on Exodus and 1 Kings. (J. HARFORD-BATTERSBY.

- LAW (IN OLD TESTAMENT).-

- Covenant.
  - B. Deuteronomy-summary of its provisions-changes in the laws repeated from JE-the new provisions introduced.

  - introduced.
     C. The Law of Holiness (H)-summary of its provisions --compared with Book of the Covenant.
     D. The Priests'. Code (P)-summary of its provisions -- P characterized and compared and contrasted with earlier codes and with institutions of other Semitiv peoples-danger of abuse of ceremonial law-pasta- gogic office of the La v. Literature.

The Heb. word for 'law' is torah (arin), from horah (ana), to point out Gn 46<sup>28</sup>, or to direct Jg 13<sup>8</sup>, meaning properly, a pointing out, or direct tion, and being used specially of authoritative direction, given in Jehovah's name--primarily, no doubt, by priests, though it is by no means limited to what is given by them-on points of moral, religious, or ceremonial duty.

Tenglous, or ceremonial duty. The root yārāh signifies properly to throw or cast ; and hence it is possible, as has been conjectured (Wellh. Hist. 394, cf. Skizzen, iii. 167, ed. 2, 143; Nowack, Arch. ii. 97; Benzinger, Arch. 408), that the primitive meaning of hóráh in this con-nexion was to cast the sacred lot—or arrows used as lots—at a sanctuary, for the purpose of ascertaining the will of the deity on behalf of those who came to consult it (the word is used of casting lots Jos 186, and of shooting arrows 18  $20^{36}$  al.) Comp. the use made by the priest of the Ephod and Urim and Thumnim, 18 143.<sup>18</sup> (LXX) <sup>41</sup> (esp. LXX) <sup>42</sup> etc. Torāh, if this view be correct, will have denoted originally the 'direc-tion' obtained by means of the sacred lot: it remained a duty of the 1sr. priest to teach J''s toráh, though this particular method of ascertaining it no doubt fell early into abeyance, and the term acquired a nore general sense. Comp. the pr names 'Terebinth(s) of Moreh, 'or 'the teacher' (Jg 71), most probably the seats of ancient Canaanite oracles. i. The word had a history : and in order to under-

i. The word had a history ; and in order to understand it preperly, the stages of its history must be briefly noted. (1) One of the earliest passages in which it occurs is  $Ex \ 18^{16.20}$  (E), where the

# LAW (IN OLD TESTAMENT)

decisions given by Moses on disputes 'between a man and his neighbour' — evidently on secular matters, are termed the 'statutes' and 'directions' of Gogl. This passage sets before us Heb. law in its beginnings. 'It is to be remembered that in early Semitic life government was largely ad-ministered by means of "Tôrôth," authoritative decisions, delivered by the chief or judge, who gave his verifict upon the basis of custom or pregave his verdict upon the basis of custom or pre-cedent. It was the reign of Themis, or of what we might call Consuetudinary Justice.\* A picture We might call Constitutionary Justice.<sup>2</sup> A picture of such an administration, actually conducted by Moses on such lines, stands before us in the narra-tive of Ex 18<sup>10-21</sup> (Ryle, Canon of the OT, p. 32). Decisions given in this way, especially on difficult questions (cf. Ex 18<sup>20</sup>), would naturally form pre-cedents for future use (cf.  $OTJC^3$  304); and thus an increasing body of civil and criminal law would credually grow up. (2) In the prophets the term an increasing body of civil and criminal law would gradually grow up. (2) In the prophets the term is used of teaching given in Jehovah's name— sometimes by priests, but more frequently by prophets—on questions of religious or moral duty. Hosea (4<sup>4</sup>) attributes the crimes prevalent in Iarael. (v.<sup>1.2</sup>) to the priests' forgetfulness of the *Torāk* of their God (cf. 8<sup>1.12</sup>): this passage is important, as showing that the *priestly* 'torāh' included a moral element (cf. Ex 23<sup>1.9</sup>, Lv 19), and was de-pendent for its effectiveness upon the 'knowledge' of God. The word is used similarly, of moral and spiritual teaching, in Am 2<sup>4</sup>. In Is 1<sup>10</sup> the '*Torāk* of our God' is the exposition which follows (v.<sup>11-17</sup>)of our God' is the exposition which follows (vv.11-17) respecting the true character of religious service; Is 5<sup>24</sup> the *Torāh* which Judah has rejected consists of the precepts of civil righteousness and morality, the disregard of which the prophet has been de-nouncing (vv.<sup>6-22</sup>); Is 8<sup>16.30</sup> it denotes the halfnouncing  $(vv, {}^{o\cdot 20})$ ; is  $3^{(v, \cdot o\cdot 20)}$  it denotes the nair-political half-religious advice just given by the prophet  $(vv, {}^{10-16})$ : it is used similarly in  $30^{19}$  (see  $v, {}^{100}$ ; and cf.  $v, {}^{20}$ , where the prophets are called by the corresponding participle, the 'directors' [teachers] of the people of Jerusalem). In Jer  $6^{19}$  $9^{13}$  16<sup>11</sup> 26<sup>4</sup> 32<sup>23</sup> 44<sup>10</sup>.<sup>20</sup> the reference may be partly (see 26<sup>4</sup>) to the preaching of the prophets, partly (notice the context, and the addition in  $9^{13}$  28<sup>4</sup> 44<sup>10</sup> of 'which I set before you') to the teaching of Denteronomy. Other examples of the same general sense of *direction*, though not specially given by prophets, are Ps 78<sup>1</sup> (of a didactic Psalm), Job 22<sup>22</sup> (' Receive now direction from his [God's] month'); in the mouth of a mother, Pr 1<sup>8</sup> 6<sup>30</sup>; of a teacher of practical wisdom, Pr 3<sup>3</sup> 4<sup>2</sup> 6<sup>30</sup> (cf. RVm) 7<sup>2</sup> 13<sup>14</sup>; of the model woman, 31<sup>36</sup> ('law,' in all these passages, is a misleading rendering). It is also used of the *guidance*, or *direction*, to be It is also used of the yearstrate, of an article, we spectral given by J'', or His representative, in the future ideal age: Is  $2^4$  (= Mic  $4^2$ ), Jer  $31^{23}$ , Is  $42^4$  (of the preaching of J'''s ideal servant), 51<sup>4</sup>. (3) Side by mide with this broader prophetical application of the term, there was, however, a narrower one, in which it was particularly associated with the in which it was particularly associated with the priests, and (like the cognate verb  $h\delta r\bar{a}h$ ) denoted the oral direction given by them in Jehovah's name, especially on matters of ceremonial observ ance, such as the nature of the different kinds of macrifice, the cases in which they were respectively to be offered, the criteria of leprosy, the conditions upon which it depended whether a thing was 'clean' or 'unclean,' etc.; the laity came to the priests for instruction on all such points, and the prises for instruction on all such points, and the answer given to them was  $t\partial r\bar{a}h$ , 'direction.' Hag  $2^{11}$ , though a late passage, shows what 'tôrāh' was very clearly: the prophet is told to inquire of the priests whether in two particular cases an object becomes 'holy,' or 'unclean,' in the words 'Ask now direction of the priests' [not as RV, 'concerning the law': there is no art. in the Heb l the answer to the inquiries being the 'direc-Heb.], the answer to the inquiries being the 'direc-\* Of. Maine's Ancient Law, ch. i.

VOL. 111.-5

tion' or torah (cf. Mal 26 'truthful direction was tion of torak (cf. Mal 2° 'truthill arceiton was in his mouth'; v.<sup>7</sup> 'they seek direction from his mouth'; v.<sup>8</sup> 'ye have caused many to stumble by your [false] direction'; v.<sup>9</sup> 'and have respect of persons in direction' [not 'in the law']). For earlier instances, partly of the subst., partly of the cognate verb, see Dt  $17^{11}$  (of decisions given by the supreme court of pricets and law indexe by the supreme court of priests and lay-judges on cases of civil or criminal law) 'acc. to the direction where which they direct thee, and acc. to the judg-ment which they tell thee, thou shalt do,' 24<sup>8</sup> ment which they tell thee, thou shalt do, take head that thou do according to all that the Levitical priests direct you' (in the case of leprosy),  $33^{10}$  'they teach Jacob thy judgments [Ex 21'], and Israel thy direction,' Mic  $3^{11}$  'her priests direct for hire,' Jer  $2^{6}$  ('the handlers of the torak [הַסְשָׁי הַאּוֹרָה], i.e. the priests, know me not'), 18י8 direction will not perish from his mouth,' i.e. the priest and his functions will never come to an priest and mis functions will never come to an end (said by those who disbelieved Jeremiah's pre-dictions of disaster), Zeph 3<sup>4</sup> ('her priests have profaned what is holy, they have done violence to  $tOrdh,'-\pi\eta a \eta \sigma \eta$ ), Ezk 7<sup>4</sup> ('direction shall perish from the priest, and counsel from the elder': cf. La 2<sup>6</sup> 'without [priestly] direction'), 22<sup>5</sup> ('her priests have done violence to my tordh, they have profaned my holy things, they have made no difference between the holy and the common ),  $44^{25}$  (cf. Lv 14<sup>57</sup>) 'they shall *direct* my people between the holy and the common, and make them to know between the unclean and the clean (notice in these two passages the connexion of  $t\partial r\bar{a}h$  with ceremonial distinctions), Hab 1<sup>4</sup> 'therefore torah is numbed ' (i.e. is paralyzed, ineffec-tual : the violence and disorder,  $vv.^{2,3,4b}$ , incap-acitates even the priests in the discharge of their duties). These pasages show clearly the associa-tion of  $t\delta r ah$  with the priests (cf. also 2 K  $17^{sr. ss}$ ,  $2 \text{ Ch } 15^3$ ); they show not less clearly that, although it denoted a simply *oral* direction, this 'direction' was regulated by certain fundamental principles, which might be neglected or violated by unfaithful priests. (4) In process of time, torah came further to priests. (4) In process of time,  $t\delta r dh$  came further to denote a body of technical direction on a given sub-ject: in this sense it occurs frequently in P, esp. in the expression 'this is the  $t\delta r dh$  ('law') of the burnt-offering, of the cereal offering, of leprosy, of the Nazirite, 'etc., Lv  $6^{9.14} \cdot 3^{-71.11} \cdot 3^{-114} \cdot 11^{-41} \cdot 12^{-71}$ 13<sup>60</sup> 14<sup>2</sup> · 25<sup>42</sup> · 36<sup>46</sup>, Nu 5<sup>59.50</sup> · 6<sup>13</sup> · 21 · 19<sup>2</sup> · 14 · 31<sup>21</sup>. As, however, Wellh. has pointed out (*Hist.* 59, 395; cf. Nowack, ii. 98), the more original sense of  $t\delta r dh$  even here will have been that of direc-tions given to the laity, not (as in Ly 6-7) rules tions given to the laity, not (as in Lv 6-7) rules

regulating the priests' own praxis at the altar. In Dt ( $1^{0}$  4<sup>4</sup> + 17<sup>18</sup>, <sup>19</sup> 27<sup>5</sup>.<sup>8</sup>.<sup>39</sup> 28<sup>4</sup>.<sup>61</sup> 29<sup>1</sup>.<sup>39</sup> 30<sup>10</sup> 31<sup>9</sup>.<sup>11</sup>.<sup>12</sup>.<sup>24</sup>.<sup>26</sup> 32<sup>46</sup>) the term, esp. in the expression 'this law,' is used somewhat ambiguously : sometimes it denotes more particularly the code of laws embodied in Dt; sometimes it is used more generally of the exposition of an Israelite's duty contained in the book, and consisting partly of the actual laws, partly of the hortatory introductions and comments accompanying them, in other words it denotes the Deuteronomic legislation generally; in the last named sense it also occurs repeatedly (often in such phrases as 'the book of the law,' 'the law of Moses,' the law that Moses commanded,' etc.) in the Deuteronomic sections of Jos and Kings (Jos 1<sup>7.8</sup> 8<sup>31. 32. 34</sup> 22<sup>6</sup> 23<sup>6</sup>, 1 K 2<sup>5</sup>, 2 K 10<sup>31</sup> 14<sup>6</sup> 17<sup>13. 34. 37</sup> 21<sup>8</sup> 22<sup>24. 11</sup> 23<sup>34. 39</sup>.

After the time of Ezra, • when P had been combined with JED, and the Pentateuch had assumed (virtually) its present form, the term is used, yet more generally, of the Pent. as a whole, as 1 Ch 16<sup>eo</sup> (with reference to Ex 29<sup>367</sup>. P), 2 Ch 31<sup>g</sup> etc., Ezr 3<sup>g</sup>, Neh 8<sup>167</sup>. In the Psalms it is used often

\* The reference in Malachi (4<sup>2</sup>) is to Deuteronomy: see  $OTJC^2$  p. 425 f.

of the legislative parts of the Pent. in general, as Ps  $1^3$   $19^7$   $37^{31}$   $40^8$  (perhaps here with particular reference to Dt),  $94^{13}$   $119^{1.38}$  etc.

ii. From the preceding survey of passages, it will be apparent that Hebrew torah had a threefold character: it was judicial, ceremonial, and moral. The ceremonial torah is most prominent in the OT; but the judicial and moral torah was not less a reality, esp. in early times. Nor is it doubted by critics that this torah, under all its aspects, originated with Moses. Wellhausen writes (*Hist.* 396, 397 n., 438): 'The priests derived their Torah from Moses: they claimed only to preserve and guard what Moses had left (Dt 33<sup>4-10</sup>).... From the historical tradition [of the Pent.] it is certain that Moses was the founder of the Torah.' \* Moses, however, did not create a finished code : he was the founder of a *principle*, and of a *tradition*; he was 'the first to call into activity the actual sense for law and justice, and to begin (Ex  $15^{26}$  18) the series of oral decisions which were continued after him by the priest.' And Montefiore, after emphasizing the fact that from the beginning J" was a moral God, a God of justice, continues (Hibb. Lect. pp. 45, 64 f.), 'Most original and characteristic was the moral influence of Yahveh in the domain of law. Yahveh, to the Israelite, was emphatically the God of right. . . . From the earliest times onward, Yahveh's sanctuary was the depositary of law, and the priest was his spokesman. The oracle of Yahveh, of which the priests were the interpreters, decided suits and quarrels, and probably gave guidance and advice in questions of social difficulty. The *Torah*—or teaching—of the priests, half-judicial half-pæda-gogic, was a deep moral influence; and there was no element in the religion which was at once more genuinely Hebrew and more closely identified with the national God. There is good reason to believe that this priestly Torah is the one religious institution which can be correctly attributed to Moses. . . . Though Moses was not the author of the written law, he was unquestionably the founder of that oral teaching, or *Torah*, which preceded, and became the basis of, the codes of the Pentateuch.' That the priest, in giving judgment, was J"s spokesman, is evident from the term of Ex 18<sup>151</sup>. (the people come to Moses to 'inquire of God' for the settlement of civil disputes, and his decisions are 'the statutes and toroth of God') 21<sup>6</sup> 22<sup>9</sup>. (comp. 1S 2<sup>25</sup>). Questions of ceremonial also fell naturally within the priests' province; and their answers on this subject were regarded similarly as the judgments of God. It resulted further, from the ethical character of J", that the toroth of Moses and his successors, even on judicial and ceremonial matters, were always permeated by a strong moral element. The decisions framed by Moses and his successors accum-ulated: they were from the first the expression of the same, or similar, principles: the result was thus a *fixed tradition*, having a definitely marked character, which exerted naturally a regulative influence upon the new decisions which, as time went on, were found necessary for the purpose of meeting new needs. iii. 'Torāh' was originally oral,—handed down

orally from one generation of priests to another, and delivered orally by the priest to those who came to seek it of him (cf. Mal 2<sup>6,7</sup>; also Job 22<sup>22</sup>, Pr 31<sup>-6</sup>). The question arises, When was it first committed to writing? An examination of the Pent. shows (1) that the laws contained in it are not homogeneous, but fall into groups, differing from one another in style, in contents, and in scope; and

\* Comp. W. R. Smith, OTJC<sup>2</sup> 303, 339. † Ο. 1. i. 2381., ix. 981. (θίμαστα intrusted to the king by Zeus)

(2) that the different groups cannot be regarded as the product of a single generation, but must spring from different periods of the history. These and other indications make it clear that the process of writing down the oral *Torāh* was a gradual one. First of all, small collections of priestly *Torōth* on particular subjects were written down : then these were enlarged, or supplemented by others : till the final result was the body of *toroth* embedded in our present Pentateuch. These different collections did not often remain in their primitive form : new provisions were introduced into them; they were revised and adjusted to suit the requirements of a later age: in some cases, they were largely expanded by parenetic or other additions. The frequently loose arrangement of subjects in the various groups is a sufficient proof that we no longer possess them in their original form. The process of writing down began, no doubt, at an early date; though we cannot say definitely how early. The Book of the Covenant is an early written collection of such toroth : it is true, the name is not actually given to it; but the analogy of Ex  $18^{16}$  <sup>20</sup> shows that it would correctly describe The ritual section of this collection (23<sup>10-19</sup>) it. appears in a different recension in Ex 34<sup>10-26</sup> Other collections of throth are those forming the original nucleus of the 'Law of Holiness' (see below). The laws forming the basis of the Deut. code were also doubtless, at least in the great majority of cases, taken by the writer from a written source (or sources). The existence of written tôrôth is implied distinctly in Hos  $8^{12}$  RV (where J" says that, however many 'directions' He writes for Ephraim, His people treat them as something with which they have no concern): the con-text, however, and 4<sup>6</sup> (see above) show that the allusion here is not to ritual, but to ethical and religious precepts, especially those relating to civil righteousness.

There is an interesting, but obscure, passage bearing on this subject, in Jer 38 'How say ye, We are wise, and J''s direc-tion is with us? Surely falsely hath it wrought, the false pen of the scribes.' The priests here claim that they possess the legitimate tradition, and principles, of J''s toräh: Jeremiah replies that the scribes—which must denote here those who committed this toräh to writing—had dealt falsely, i.e. (appar-ently) had been untrue to the principles which it was their duty to maintain, had in some way perverted or falsified the toräk of which they were the exponents (cf. 36, though there is not here any reference to writing). We do not know more pre-cisely what Jeremiah alludes to: perhaps to heathen rites, for which, in the syncretistic fashion of the day, the false priests sought thus to gain the sanction of J''s name.

Other priestly laws were written down by Ezekiel, in his draft for the worship of the restored com-munity, esp. in chs. 43-45 (cf. OTJC<sup>4</sup> 374-377; Ryle, Canon, 73); but the great bulk-those, viz., embraced in what is now generally known as the 'Priests' Code'-were not, it seems, codified till somewhat later, when, the temple having been destroyed, and the worship interrupted, the priests, that the traditions of their order might not be forgotten, reduced to writing and systematized what had hitherto been familiar to them from the daily exercise of their profession (cf. Wellh. Hist. 59 f. 404; Ryle, Canon, 71-74; Montehore, Hibb. Lect. 234 f.).

iv. Synonyms of 'Law.'+-1. 2970 mishpät, judgment' (sometimes rendered 'ordinance'). judgment ' properly a decision given in an individual case, and then established as a precedent for other similar cases. Mishpāt occurs in this sense in JE, Ex  $15^{20}$  ('there made he for it (Israel) a statute and ordinance, and there he proved it,'-

# LAW (IN OLD TESTAMENT)

a noticeable passage, witnessing, like Ex  $18^{16.50}$ above, to Moses' work as a framer of laws for his people<sup>\*</sup>),  $21^1$  and  $24^3$  (of the enactments in the 'Book of the Covenant' prescribing penalties for particular of the Covenant' prescribing penalties for particular offences, introduced by if or when, and contained chiefly in  $21^{1}-22^{17}$ ; in H (always combined with mpn 'statutes') Lv  $18^{4.5.21}$   $19^{37}$   $20^{22}$   $25^{18}$   $26^{16.43.46}$ (here  $0.73^{-1}$ ; in Dt, usually with 'statutes' ( $0.78^{-1}$ , not as in H mpn, of the provisions of the Deut. code (chs. 12-26),  $4^{1.5.5.14}$   $46.5^{1.31}$   $6^{1.50}$   $7^{11.12}$   $8^{11}$  $11^{1.22}$   $12^{1}$   $26^{16.17}$   $30^{16}$ ; also in the Blessing of Moses,  $33^{16}$  (as pronounced by the priests: || 'direction'); in P rarely and in the specific sense of Ex  $21^{1}$   $24^{3}$ in P rarely, and in the specific sense of Ex  $21^{1} 24^{3}$ only Nu  $27^{11} 35^{24}$ .<sup>29</sup>, cf. 36<sup>13</sup>, + The primary sense of the word is an enactment of the civil or criminal law; but it is also (as in H) applied to enactments of the moral or ceremonial law, which might be viewed analogously as Divine 'decisions.' (The word occurs also frequently in other books besides the Pent.) ±

In Gn 14<sup>7</sup> Kadeah is called 'En-mishpät,' 'spring of judgment,' —either, it seems, because it was the site of an ancient oracle, at which decisions were given for the settlement of disputes, or (Wellh. *Hist.* 343, 397 n., 430, 439) from its having been the scene of Moses' legislative activity, during what appears to have been Israel's long stay there (Driver, Deut. p. 821.).

Mishpāt also occurs sometimes in the enlarged sense of *right* ('Recht'), as a rule of action in general : it thus becomes virtually equivalent to religion, regarded as a system of practical duties; Jer 5<sup>4</sup> 'they (the poorer classes) know not the way of J", nor the *mishpāt* of their God,' v.<sup>5</sup> 8<sup>7</sup>, Is 42<sup>1</sup>

of J, nor the misspat of their God, V. 8, 18 42'
'he shall bring forth (publish) right (i.e. religion) to the nations,' vv. <sup>3</sup> 4 51' (|| ℓorāh), 58'; cf. 2 K 17<sup>36-7</sup>
(AV and RV, poorly, 'manner').
2. pn, hok, hukkāh, 'statute,' from pan to cut in, inscribe, engrave (Ezk 23<sup>14</sup>, Job 19<sup>25</sup>, Is 10<sup>1</sup>, Pr 8<sup>15</sup> [AV and RV 'decree']), and therefore denoting properly something engraven on stone, or other durable surface, though applied in usage to any kind of fixed ordinance. It was a common practice in antiquity to engrave laws upon slabs of stone or metal (στήλαι), and to set them up in some public metal ( $\sigma\tau_{J}\lambda a_{L}$ ), and to set them up in some public place—and the same custom is presupposed in the use of these two words in Hebrew. Both terms occur frequently in H, Dt, and P. The earliest examples (JE) are Ex 12<sup>24</sup> 13<sup>10</sup> 15<sup>25,26</sup> 18<sup>16,26</sup> (E); examples ( $_{12}$ ) are Ex  $_{12}$ <sup>27</sup>  $_{13}$ <sup>10</sup>  $_{15}$ <sup>25. 28</sup>  $_{18}$ <sup>16. 29</sup> (E); cf. (in a different connexion) Gn 47<sup>26</sup>, also Jos 24<sup>23</sup>, Jg 11<sup>29</sup>, 1 S 30<sup>29</sup>. The combination 'statutes and judgments' is common in H and Dt (see above). For instances in P (often in the ex-pression, 'a statute [RV frequently, 'due'] for ever'), see Ex 27<sup>21</sup> 28<sup>45</sup> 29<sup>49</sup> <sup>29</sup>, Lv 3<sup>17</sup> 6<sup>18</sup> <sup>12</sup> 16<sup>29</sup> <sup>31</sup> <sup>34</sup> etc. §

3. mpc mixwah, 'commandment,' a general term, implying something commanded (viz. by J"). Most frequent in Dt (43 times), as  $4^{2,0}$   $5^{20,01}$ . Rare in the other codes: in JE, Ex 15<sup>36</sup> 16<sup>39</sup> 20<sup>6</sup> (prob. from Dt), 24<sup>12</sup>; in H, Lv 22<sup>21</sup> 26<sup>2</sup> 14. <sup>15</sup>; in P, Lv 4<sup>2</sup>. <sup>15</sup>. <sup>22</sup>. <sup>27</sup> 5<sup>17</sup> 27<sup>34</sup>, Nu 15<sup>22, 31</sup>. <sup>39</sup>. <sup>40</sup> 36<sup>13</sup>.

4. may 'édicôth or 'édöth, 'testimonies': in the Pent. only Dt 446 6<sup>17. 20</sup>; a theological term, denot-ing generally moral and religious ordinances, regarded as an *attestation*, or solemn declaration, of the Divine will. In P the sing. *testimony* is used frequently of the Decalogue, as a statement car'  $i\xi_{0\chi}\eta_{\nu}$  of God's will for man, esp. in the expressions 'Ark, tables, or tabernacle, of the testimony,' Ex 25<sup>16, 21, 22</sup> 27<sup>21</sup> 31<sup>18</sup> 34<sup>29</sup>, Nu 1<sup>50, 53</sup>, and elsewhere.

 g Both these words are also used sometimes of laws of nature :
 as Jer 31<sup>26</sup>, Job 23<sup>28</sup>, Ps 143<sup>26</sup> (ph); Jer 5<sup>24</sup> 31<sup>26</sup> 33<sup>25</sup>, Job 35<sup>25</sup> (121).

viz. of JE, Dt, H, and P, and the characteristics of these must next be examined."

A. In JE we have (1) the DECALOGUE (wh. see), Ex 202-17, a concise but comprehensive summary of The fundamental duties of the Israelite towards God and man. We have (2) the 'Book of the Covenant' (Ex  $20^{20}-23^{23}$ ; in explanation of the name see  $24^7$ ), the laws contained in which comprise two elements (24<sup>3</sup>), the 'words' (or commands) and the 'judgments': the 'judgments,' expressed all hypothetically, and relating to the civil and criminal law, being comprised in 21<sup>1</sup>-22<sup>17</sup>. 2<sup>3-37</sup>, and the 'words,' consisting mostly of positive injunc-tions of the moral or ceremonial law, and introduced by thou shalt or thou shalt not, being comprised in 20<sup>23-25</sup> 22<sup>18-24</sup>. <sup>23-31</sup> 23<sup>1-19</sup>. With the form of the laws, and the parenetic additions which they sometimes exhibit (as 22<sup>23-34</sup>), we are not here concerned : the laws themselves are designed to regulate the life of a community living under simple conditions of society, and chiefly engaged in agriculture. They may be grouped as follows +:-

- Enactments relating to civil and criminal law:
   The rights of Hebrew slaves (male and female), 21<sup>1-11</sup>.
   Law of murder and manslaughter vv.<sup>12-14</sup>, of violence to a parent v.<sup>15</sup>, of man-stealing v.<sup>16</sup>, of cursing a parent v.<sup>17</sup>.
- to a parent v.<sup>15</sup>, of man-stealing v.<sup>16</sup>, of cursing a parent v.<sup>17</sup>.
  8. Bodily injury caused by men vv.<sup>16-27</sup> (bodily injury inflicted in a quarrel v.<sup>16</sup>.; beating a slave to death v.<sup>26</sup>.; injury done in a quarrel to a pregnant woman v.<sup>26</sup>, or other bystander vv.<sup>35-23</sup>; striking out the eye or tooth of a slave v.<sup>26</sup>.)
  4. Bodily injury due to animals, or neglect of reasonable precautions vv.<sup>25-30</sup> (injury done by an ox to a free man or woman vv.<sup>25-30</sup> (injury done by an ox to a free man or woman vv.<sup>25-30</sup> (in jury done by an ox to a free man ox to one belonging to another person v.<sup>26</sup>: in the first and last of these cases, the penalty, where the neglect is culpable, is materially increased).
  5. Theft 22<sup>1-4</sup> (theft of ox or sheep v.<sup>1</sup>; burglary vv.<sup>2-4</sup>).
  6. Compensation for damage v.<sup>51</sup>. (damage done by straying cattle v.<sup>5</sup>; damage done by fire spreading to another man's field v.<sup>6</sup>).
  7. Compensation for loas or injury in various cases of deposit or loan vv.<sup>718</sup> (cases of deposit vv.<sup>79.10-13</sup>; case of injury to a borrowed animal v.<sup>14</sup>.).
  8. Compensation for advance v.<sup>212</sup> (data sto be of earth or of unhewn stone, and not to be approached by steps).
  9. Some and the store induction v.<sup>164</sup>.

  - unhewn stone, and not to be approached by steps).
     Sorcery and bestiality to be punished with death 22<sup>187</sup>.
     Sacrifice to 'other gods' to be punished with the 'ban' and 'ban' and the 'ban' and the 'ban' and 'ban' and the 'ban' and 'ban' and
  - 9990
  - 22290. Humanitarian laws 22<sup>21.27</sup> (the ger, or resident for-eigner, the widow and the orphan, not to be oppressed 22<sup>21.34</sup>; interest not be taken from the poor 22<sup>22</sup>; a garment taken in pledge to be returned before night-fall 2<sup>-236</sup>. O of not to be rewiled not a place unused 22<sup>28</sup>

  - fall 2:287.).
    God not to be reviled, nor a ruler cursed 2228.
    Firstruits and firstborn males to be given to J" 2:2207. (cf. 1312, where it is added that the firstbing of an ass is to be either redeemed with a lamb or killed, and the firstborn of a man is to be redeemed); and flesh torn of beasts not to be eaten 2:231.
    Veracity and impartiality in giving evidence in a court of law 2:31-34.

  - of law 23<sup>1.3</sup>. In this is the preserved from harm 23<sup>47</sup>.
    8. An enemy's beast to be preserved from harm 23<sup>47</sup>.
    9. Justice to be administered impartially 23<sup>3.9</sup> (bribes not to be taken : the poor and the ger not to be oppressed).
    10. The seventh year to be a fallow year, and the seventh day a day of rest 23<sup>10-12</sup> (the motive in each case is a philanthropic one).
    11. God's commands to be honoured, and 'other gods' not to be invoked 23<sup>13</sup>.
    12. The three annual pilgrimages (of Unleavened Cakes, Harvest, and Weeks) to be observed 23<sup>11-17</sup> (all males to appear before J" at each).
    13. Three closing regulations 23<sup>18, 19</sup> (sacrifice not to be offered with leavened bread, nor its fat to remain un-

• The *literary* characteristics of the Codes do not fall within the scope of the present article; but it may be remarked in passing that each possesses distinctive literary features of its own, and that even the form of the laws sometimes differs in the different codes: thus, while in Ex 21-23 a law commonly begins in the form  $\mathbf{U}^{*}$  or  $\mathbf{U}^{$ is frequent (Lv 12 21 42 etc.), and in H the form "WR W'R (Lv 173. 8. 10. 13 etc.).

† Comp. Stade, Gesch. i. 636; Holzinger, Einl. 243. Many of these laws seem to fall into groups of ten, which L. B. Paton has endeavoured recently to restore in their (supposed) original completeness; see JBL, 1893, p. 79 ff. (an abstract in LOT<sup>6</sup> p. 40); and cf. Briggs, *l.c.* p. 211 ff.

burnt until the following morning; firstfruits to be brought to 'the house of J''; a kid not to be boiled in its mother's milk).

The ceremonial provisions contained in 23<sup>10-19</sup> are repeated in 34<sup>10-26</sup>—a section sometimes will a section repeated in  $34^{10-20}$ —a section sometimes called the 'Little Book of the Covenant,' and sometimes also (from  $34^{38}$ ) the 'Words of the Covenant'—with changes of order, and slight verbal variations, and with the addition in  $34^{12-17}$  of more specific injunctions against idolatry.\*

The 'Book of the Covenant' is the oldest Code of Hebrew law with which we are acquainted-older, no doubt, than the narrative (E) in which it was incorporated; it embodies, to use Cornill's expres-sion, the 'consuetudinary law of the early monarchy,' and embraces (in accordance with the sense of *torāh* and *mishpāt*, explained above) the formulated decisions which had accumulated gradually up to that age. That the community for whose use it was designed had made some progress in civilization is evident from the many restrictions imposed on the arbitrary action of the individual; on the other hand, that it was still in a relatively archaic condition appears from such regulations as 21181. and 2123-25 (the lex talionis), or the conception of God as the immediate source of judgment (216 22<sup>8.9</sup>: cf. 1 S 2<sup>25</sup>). The stage of society for which the Code was designed, and the characteristics of the Code itself, are well indicated by W. R. Smith  $(OTJC^2 340 \text{ ff.})$ . 'The society contemplated in it is of very simple structure. The basis of life is agricultural. Cattle and agricultural produce are the main elements of wealth; and the laws of property deal almost exclusively with them. The principles of criminal and civil justice are those still current among the Arabs of the desert, viz. retaliation and pecuniary compensation. Murder is dealt with by the law of blood revenge; but' the distinction—which in Greece was still not recognized in the age of Homer—is drawn between murder and manslaughter, and 'the innocent man slayer may seek asylum at God's altar (21<sup>13</sup>, comp. with v.<sup>14</sup>: cf. 1 K 2<sup>286</sup>.). With murder are ranked man-stealing, offences against parents, and witchcraft. Other injuries are occasions of self-help, or of private suits to be adjusted at the sanctuary (22<sup>9</sup> [cf. 21<sup>6</sup>]). Personal injuries fall under the law of retaliation, just as murder does. Blow for blow is still the law of the Arabs; and in Canaan, no doubt as in the desert, the retaliation was usually sought in the way of self-help. Except in this form, there is no punishment, but only compensation, which in some cases is at the will of the injured party (who has the alternative of direct revenge), but in general is defined by law. De. grading punishments are unknown, and loss of liberty is inflicted only on the thief who cannot pay a fine (223). Definite rights are secured for the He recovers his freedom after 7 years, slave. unless he prefers to remain a bondman, and seals solemnly his determination at the door of the solumnity his determination at the door of the sanctuary. His right of blood revenge against his master is, however, limited  $(21^{20t})$ ; though, instead of the *lex talionis* for minor injuries, he can claim his liberty  $(21^{20t})$ . Women do not enjoy full social equality with men. Women slaves were social equality with men. slaves for life, but were often, it may be inferred, married to members or servants of the family  $(21^{+.7-9})$ . The daughter was her father's property (217), who received a price for surrendering her to a husband; and so a daughter's dishonour is compensated by law as a pecuniary loss to her father (22<sup>161</sup>.).' +

 $\begin{array}{c} (22.25) \\ * 3418 = 2316a; 3419 30a = 1312 13; 3420 h = 2316b; 3421 = 2313; 3422 \\ = 2316; 3423 = 2317; 3426 = 2318; 3422 = 2319 (in most cases, with slight verbal differences). For attempts to recover from these laws a 'Decalogue of J,'see (briefly) LOT 37 (6 39), more fully, Briggs, Lo. p. 189 ff.$ + See, further, art. CRIMES AND PUMBHERETS in vol. 1.

To many of the laws there are interesting parallels in the early codes of other nations (e.g. in Solon's Code at Athens): these are pointed out in the commentary of Dillmann. Some of the pro-visions seem to us harsh (21<sup>21</sup> 22<sup>18</sup>), but account must be taken of the age for which they were prescribed; and a humane regard for the unprotected and the helpless is unquestionably the dominant spirit of the Code.

Turning now to the more distinctively moral and religious aspects of the Code, we observe firstly the regard paid to the claims of humanity and justice. An emphatic voice is raised against those crying vices of Oriental government, the maladministration of justice and the oppression of the poor. The gér, or foreigner living in Israel under the protection of a family or a community, has no legal status, but he is not to be oppressed. The Sabbath is enjoined as a day of rest for men and cattle ; and the produce of every field or vineyard is to be left to the poor one year in seven. Religious institutions are in a simple, undeveloped stage. He who sacrifices to any god but Jehovah falls under the ban. The only ordinance of ceremonial sanctity is to abstain from the flesh of animals torn by wild beasts. Altars are to be of simple, almost rudimentary, The sacred dues are firstlings and structure. firstfruits; and the former must be presented at a sanctuary on the eighth day. This regulation of itself presupposes a plurality of sanctuaries, which also agrees with the terms of 20<sup>24b</sup>. The three pilgrimages, at which every male is to appear before J", mark three periods of the agricultural year—the beginning and the close of harvest, and the end of the vintage. The only points of sacrificial risual insisted on are abstinence from leaven in connexion with the blood of the sacrifice, and the rule that the fat must be burnt the same night. The only sacrifices named are burnt-offerings and B. The next code which has to be considered is

that of Deuteronomy. From a literary point of view, Deuteronomy (disregarding the few short passages belonging to P, and the two poems in chs. 32. 33) consists of a code of laws accompanied by hortatory introductions and comments. Here we are concerned only wi h the laws as such. A comparison of the laws embodied in Dt with those of the 'Book of the Covenant' at once shows that they are designed for a community living under more fully developed social conditions. Dt, speak. ing generally, may be described as a revised and enlarged edition of the Book of the Covenant. the exception of the compensations to be paid for various injuries (Ex  $21^{18}-22^{16}$ ), nearly all the pro-visions of Ex  $20^{22}-23^{23}$  are included in it; and there are in addition many entirely new ones. complete tabular synopsis of the two codes will be found above (vol. i. p. 600 f.); here, therefore, it will be sufficient to give a brief outline of the Deut. Code, and to make some general remarks on the Deuteronomic changes and additions.

Outline of laws in Deuteronomy :-

- Religious Observances:
   Law of single sanctuary 12<sup>1-29</sup> (burnt-offerings, sacrifices [i.e. peace-offerings], tithes, 'heave-offerings' (firstruits, and other offerings from the produce of the soil, vows, freewill offerings, and firstlings, all to be offered at the central sanctuary : blood not to be offered.

  - be caten).
    Laws against the worship of 'other gods' 1229-1318.
    Sanctity of the laity 141-21 (person not to be disfigured in mourning 1416; law of clean and unclean animals 143-29; flesh of animals dying of themselves not to be caten 1421).
    Laws tending to ameliorate the condition of the poor 1422-1518 (disposition of the charitable tithe 1422-330; relief secured to debtors every seventh year 151-11; law of slavery 1512-18).
    Offerings and festivals (firstling males to be offered to

J" 15<sup>19-25</sup>; regulations respecting the observance of the three annual pilgrimages 16<sup>1-17</sup>).
H. The Office-bearers of the Theornay:

Judges, 16<sup>18-26</sup> (to be appointed in all cities; and to be strictly impartial in judgment).
[16<sup>217</sup>. asherahs and 'pillars' prohibited; 17<sup>1</sup> sacrifices to be without blemish; 17<sup>2-7</sup> an Israelite, convicted of idolatry, to be stoned to death].
The supreme central tribunal 17<sup>6-13</sup>.
The king 17<sup>14-30</sup>.
Priests 18<sup>1-3</sup>.

- 5. The Prophet 189-22 (v.107. against different forms of magic and divination). iii. Criminal Law:

iii. Criminal Law!:
iii. Criminal Law!:
1. Manslaughter and murder 191-13 211-9 (cities of refuge 191-13; symbolical rite of explation for an untraced murder 211-4).
2. Law of the landmark 1914.
3. Law of witness 1915-31. [Four laws designed to secure self-control and forbeard the secure self-control and forbeard the secure self-control and forbeard to the secure self-control and provide the secure self-control and forbeard to the secure self-control and forbeard to the secure self-control and provide the secure self-control secure self-cont secure self-control secure secure self-control secure secure self-control secure self-control secure secont secure secure secure secure secure secure secure se

or Dt; see Driver, Deut. p. 299).

. This outline will suffice to give an idea of the reater variety of subjects included in the Code of Dt as compared with that of JE, as also of the The organization of society is more complex; and institutions at once more numerous and more varied are needed to regulate it. The following are the principal *changes* in the laws repeated from JE. In Ex 21<sup>7</sup> a daughter sold by her father into slavery does not go free in the 7th year: in Dt  $15^{12.17}$  she does; since the law of Ex was formulated, society has advanced ; a father's power over his daughter is less absolute than it once was, and it is no longer usual for a Hebrew girl to be bought to be the wife of her master or his son. In Ex 2112 the asylum for manslaughter is J"s altar : in Dt 19 six cities are set apart for the purpose. In Ex 221st seduction is treated among cases of injury to property; in Dt  $(22^{28t})$  it appears among laws of moral purity. In Ex  $22^{30}$  firstlings are to be offered on the 8th day from birth; in Dt  $15^{30}$ they are to be presented annually-a change rendered necessary by the substitution of a single central place of sacrifice for the local altars. In Ex 23<sup>107</sup>, the substitution is essentially one of rest for the soil, in Dt  $15^{1-6}$  the institution is so applied as simply to form a check on the power of the creditor.

In other cases, the principle of the older law is merely extended, or fresh definitions are added. Thus Dt 13 and  $17^{2-7}$  may be regarded as expansions, with reference to particular cases, of the brief law against idolatry contained in Ex  $22^{20}$ ;  $16^{1-17}$ , as compared with Ex  $23^{14-17}$ , adds fresh regulations for the observance of the three annual Pilgrimages ; 18104. (against divination and magic) extends the principle of Ex 2218 (sorceress alone) to other analogous cases ; 19<sup>15-21</sup> (the law of witness) is a development, with special provisions, of the general principle of Ex 23<sup>1</sup>;  $22^{1-3}$  extends the principle of Ex 23<sup>4</sup> to other cases of lost property as  $24^{4\cdot 10-13}$  (pledges) does that of Ex  $22^{24\cdot}$ ;  $22^{22\cdot29}$ (seduction) particularizes with greater precision than Ex 22<sup>16</sup>, the cases which might arise. There are also instances in which the older law is repeated without further modification than that of form, as 16<sup>196</sup>. (Ex 23<sup>8</sup>, 8), 23<sup>196</sup>. (Ex 22<sup>20</sup>), 24<sup>7</sup> (Ex 21<sup>16</sup>).

provisions of Dt, which are without Those Those provisions of Dt, which are without parallel in JE, relate mostly to conditions which, Paton, JBL, 1897, p. 31 fl.; 1898, p. 149 fl.

in the age when the laws of JE were drawn up, were not yet regarded as demanding legislative regulation: the greater variety of subjects in-cluded in the Code is evidence both of the growth of civilization in itself, and also of more systematic and maturer reflection upon its needs. A fundamental principle of the Deut. legislation is opposi-tion to the heathen practices of the Canaanites: this is particularly prominent in the parenetic parts of the book, but it also determines several of the laws. The law of the single sanctuary (ch. 12), it cannot be doubted, is largely prompted by the desire to free the worship of J" from the heathen elements by which it had been contaminated at the local shrines; the essential aim of the law of the king  $(17^{1+30})$  is to guard this most important office against the influence of foreigners or par-ticipation in foreign policy; the laws of  $12^{29}-13^{18}$  $14^{1.3-29}$   $16^{21.22}$   $17^{2-7}$   $18^{10.11}$   $22^5$   $23^{17t}$ , are also, some obviously, others, it is probable, implicitly, directed against heathen observances. Of ritual and ceremonial laws there are but few in Dt, though more than there are in JE. Sacrifices and other dues are to be brought to the central sanctuary (ch. 12), but little  $(v, 2^7)$  or nothing is said of the ritual with which they are to be presented. Only blood is not to be eaten  $(12^{16}, 2^3, 15^{23})$ , in accordance with an old practice in Israel (1 S 14<sup>32, 24</sup>), though no provision on the subject occurs in the legislation of JE. The laws regarding firstlings, and the observance of the three Pilgrimages  $(15^{19-23} \ 16^{1-17})$ , are fuller than the corresponding ones in JE. Regulations of a ceremonial character without parallel in JE are those relations to clean and unclean animals without blemish  $(17^{12})^{-29}$ , the offering of sacrifices without blemish  $(17^{1})$ , the dues of the priests  $(18^{1\cdot8})$ , the brief note on leprosy  $(24^{8t})$ , and the liturgical forms to be used by the Israelite at the control encourage when he presents his first the central sanctuary, when he presents his firstfruits (261-11), and after payment of the triennial tithe (2612-16). It need only be added that it would be a serious mistake to suppose that the laws of Dt were the creation of the age in which the book was composed. This may be the case with one or two: but the majority are beyond question much older, the aim of Dt being merely to present them in a new literary setting, and to inculcate them with fresh motives.

C. We come next to the Law of Holiness (H), Lv 17-26. This consists substantially of an older body of laws, which have been arranged by a later editor in a parenetic setting, the whole thus formed being afterwards incorporated in P, with additions and modifications designed for the purpose of harmonizing it more completely with the system and spirit of P. For details see LEVITICUS, or  $LOT^6$  p. 47 ff.; \* here our attention must be confined as far as possible to the older body of laws thus imbedded in this part of Ly.

Outline of the original nucleus of the Law of Holiness :

**Hollness** :---17<sup>36</sup> 4 (partly). Domestic animals, when slain for food, to be presented at a sanctuary. 17<sup>9</sup> (partly). All sacrifices to be offered to J". 17<sup>10</sup> 136 (partly). Blood, whether of domestic or wild animals, not to be eaten. 18<sup>423</sup>. Laws of chastity (four pentads of laws: v.<sup>610</sup> kinship of the first degree; v.<sup>11-16</sup> kinship of the second degree; vv.<sup>16-10</sup> family, and Molech-worship). 19<sup>34</sup> 49<sup>323</sup>. 26<sup>30</sup>. Religious and moral duties : vv.<sup>34</sup> laws parallel with the first Table of the Decalogue; vv.<sup>11-12</sup> laws parallel with the 8th and 9th Commandments; vv.<sup>13-18</sup> 32-36 laws of conduct towards one's neighbour,-justice in Judgment, freedom from malice, respect of elders, justice in trade, etc.; vv.<sup>32</sup> 31 onthing to be eaten with the blood, divination and other heathen superstitions not to be practised. [Vv.<sup>54</sup> on peace-offerings, v.<sup>19</sup> against dissimilar mixtures, v.<sup>30</sup> a special case of unchastity, are unrelated to their present

70 LAW (IN OLD TESTAMENT)

context, and probably once stood elsewhere in H. V.<sup>97</sup> (glean-ings to be left) is better placed in  $23^{22}$ ; and  $vv.^{23-26}$  (fruit of newly planted trees not to be eaten till the fifth year) is a ceremonial regulation more akin to ch. 23, or  $25^{2.7}$ , than to the main topic of ch. 19].  $20^{2.11}$ . Penalties for Molech-worship, and necromancy (vv. 24. 37), and for different cases of unlawful marriage and unchastity (similar to, and in many cases the same as, those prohibited in (b, 18)

ch. 18)

Chs. 21-22 (with the exception of some redactional additions) ceremonial regulations respecting priests and offerings (restric-tions in domestic life obligatory upon the priests 211-15; physical imperfections disgualifying from the priesthood 2116-34; conditions for partaking in 'holy' food 221-16; animals offered in sacrifice to be free from imperfections 2217-35; three special regulations regarding sacrifices 2224-30. 2310-12 1517. 18-19 (partly) 20 (mostly) 22 30 (middle part), 40.41a-42 (regulations for the observance of the Feasts of Un-leavened Cakes, Weeks, and Booths). The rest of the chapter consists of supplemental regulations relating partly to these Féasts, partly to other sacred seasons, incorporated from the point of view of P. 2410b-16a-17-31 (laws on blasphemy, and certain cases of injury to man and beast). 2520-7a, parts of vv.8-35, Land to lie fallow in the sabhatical 17-32 32-32 36-40a. 43.67.03.55. Land to lie fallow in the sabhatical 17-32 32-32 36-40a. 43.67.03.55. Land to lie fallow in the sabhatical 17-32 32-32 35-36 (usury not to be exacted of him), vv.8-40a. 43, 9216 (cartin fundamental malificing during). 9216 (cartin fundamental malificing during). Chs. 21-22 (with the exception of some redactional additions)

V. 26, V. 35-36 VV. 47. 53. 55

vy, 4: 32.50, 261f. (certain fundamental religious duties). To the original Law of Holiness belong also, in all probability, Lv 1137.9-10.1322.41 (animals permitted, and prohibited, for food); cf. 2025. The nucleus of Ex 3113-14a (on the Sabbath); and of Nu 15<sup>38</sup> (the law of 'tassels')

The original nucleus of H, when compared with the Book of the Covenant, will be seen to deal very much less fully with civil and criminal law, and more fully with the moral and ceremonial law. The only regulations relating to criminal law are those in 24<sup>17-21</sup>: those in ch. 25 might be classed as belonging formally to civil law; but they are re-garded more properly as expressions of religious or humanitarian principle. In chs. 18-20 the funda-mantal north principle. mental moral principles underlying the Decalogue and parts of the Book of the Covenant are applied to a much larger number of individual cases than is the case in the earlier legislation. Ceremonial legislation has evidently advanced : the number of regulations relating to priests and sacrifices is noticeable. The only species of sacrifices mentioned are, however, the same as those mentioned in Dt, viz. the burnt- and the peace-offering. The characteristic feature of this group of laws in its present form, viz. their subordination to the principle of *holiness* — partly ceremonial, partly moral—seems not to attach to the laws in their original form, but to be an addition due to the compiler (Rh).

D. The legislation of the Priests' Code, properly so called (P), is confined almost entirely (see exceptions in Nu  $27^{1-11}$  35. 36) to ceremonial observances, especially those relating to sacrifice and purification. The following is an outline of the subjects treated in it (directions for the construction of the tabernacle and its parts omitted) :-

- Gn 17 Circumcision. Ex 121-13 the Passover; vv,14-20 Feast of Unleavened Cakes; vv,6-26 qualifications for partaking in the Passover. 28 the dress of the pricets.

28 the dress of the priests.
291-37 ritual for the consecration of the priests.
2938-43 the daily burnt-offering.
20238-43 the daily burnt-offering.
20238-43 the daily burnt-offering.
217 (expansion of th), 351-3 the Sabbath to be observed under pain of death.
Lv 1 ritual of the burnt-offering.
2 , , meal- (or cercal-) offering.
3 , , peace- (or thank-) offering.
4-51<sup>3</sup> ritual of the sin-offering, and cases in which it is to be offered

- be offered.
- 514-67 (Heb. 514-98) cases in which a guilt-offering (DUN) is prescribed (the *ritual* of the guilt-offering follows in
- $7^{(-1)}$ . 6-30 (Heb. 61-33) 78-38 regulations, in the main ancillary to those in 1-67 (Heb. 1-5), relating to the sacrifices there
- 68-13 the dress of the priest who offers the burnt-offering; fift to be always burning on the altar of burnt-offering. 614-10 the priests' portion of the meal-offering.

### LAW (IN OLD TESTAMENT)

- Lv 619-33 the high priest's daily meal-offering. 694-30 disposal of the fiesh of the sin-offering. 78-10 the priests' share of the burnt- and meal-offering. 711-33 on the species of pasce-offering, and the conditions under which the fiesh is to be eaten. 723-37 fat and block not to be seten.

  - under which the mean is to be easen. 722 of fat and blood not to be easen. 723 of the and blood not to be easten. 728 with the officiating prime's share of the peace-offering. 10124.144 the prime's share of the meal- and peace-offering (substantially a duplicate of 616 and 7205.). 1014-30 the fields of the people's sin-offering (415-31) to be saten by the primet.

  - 12 purification after child-birth.
- of certain animals.
  12 purification after child-birth.
  13-14 Leprosy (in man, clothing, and houses; diagnosis of symptoms, and ritual of purification.
  15 Furification after certain natural secretions.
  16 Ceremonial of the annual Day of Atonement.
  17-26 Supplementary additions in various parts (as 195...); redactional additions harmonising chs. 21-22 with the principles of P; in ch. 23 the parts not assigned above to H (the Day of Atonement, "S<sup>-2</sup>; and regulations for the observance of the other sacred seasons, fuller than those of H, but not so minute as those of Nu 28-29); 241-4 the lamps in the tabernacle; 245-4 the shewbread; in ch. 25 additions, partly consisting of more detailed regulations, esp. regarding the redemption of land, and partly extending the benefits of the Jubile from lands to persons.
  27 the commutation of vows and tithes.
  Nu 51-4 Lepers, and other persons ceremonially unclean, to be excluded from the camp.
  65-5 a supplement to Lv 514-67 (Heb. 514-25), prescribing the prime the guilt-offering.
  59-10 Dedicated things to belong to the priest receiving them..
  (1) Jubile for a woman supercided by her husband
  - - them. 5<sup>11-31</sup> law of ordeal for a woman suspected by her husband of unfaithfulness. 61.21 the law of the Nazirite. 622.97 the formula of priestly benediction. 81.4 instructions for fixing the lamps upon the golden

    - candlestick.
    - candiestick.
       SP36 the consecration of the Levites, and (v.336.) their period of service.
       99-14 (a law arising out of the incident, 91-3) the supplementary or 'Little' Passover (to be observed by those accidentally debarred from keeping the regular Passover).
    - 15<sup>1-16</sup> the meal- and drink-offering to accompany every burnt- and peace-offering. 15<sup>1/21</sup> a cake of the first dough of each year to be offered

    - of H).  $18^{1.7}$  the duties, and relative position, of the priests and
    - the Levites
    - 18<sup>30-19</sup> the revenues of the priests. 18<sup>20-32</sup> distribution of the tithe between priests and Levites
    - 19 the rite of purification, by means of water mingled with the ashes of a red heifer, after defilement with
    - a corpse. 271-11 the law of the inheritance of daughters, in families

    - 271-11 the law of the inheritance of daughters, in families in which there is no son.
      28-29. A priestly calendar, prescribing the public sacrifices to be offered at each season. Cf. Lv 23.
      30 the law of twos.
      3121-39 the law of the distribution of spoil taken in war (after purification, to be divided equally between the soldiers engaged and the community, the priests, however, to have 15s of the former, and the Levices T of the latter).
      361-3 Forty-eight cities appointed for the residence of the Levices.

    - Levice. 369-34 Law of murder and manslaughter (cities of refuge, with regulations for their use). 36 Heiresses possessing landed property to marry into their own tribe (supplement to 271-11).

The highly systematized character of the legis-lation of P will be apparent from this outline. It centres in the 'tabernacle,' the prototype of the later temple; its aim is to secure the holiness of Israel, to maintain a community worthy, both collectively and individually, of the consecrating presence of God in its midst (cf. Ex 29<sup>44-46</sup>, Nu 5<sup>3</sup> 35<sup>34</sup>). The priests, with the Levites as their ministers, serve the sanctuary : they maintain there, on behalf of the community, the suitable sacrifices

and rites of atonement and purification; they are also at hand to present the sacrifices, and perform the purifications, obligatory from time to time upon individuals. The sacrifices are numerous; and the details are minutely regulated. P exhibits the idea of a holy people dedicated to God, and realizes it on a large scale. The 'congregation'  $(\neg \eta \eta)$  is not a nation, but a *church*. This idea is substantially the same as that which underlies Ezk those of atonement  $(\psi_{\overline{\psi}})$  and purification  $(\psi_{\overline{\psi})$  and purification  $(\psi_{\overline{\psi})$  and p the guilt-offering  $(\pi \forall \forall)$  and, especially, the sin-offering  $(\pi \forall \forall)$ , neither of which is mentioned at all in any of the other codes, though both occur in Ezk<sup>\*</sup> (see further SACRIFICE). The great aim of the Code is in fact by means of theory it. of the Code is, in fact, by means of these rites, to remove the sins and defilements which are inconsistent with the presence of J" in His sanctuary in Israel's midst.

The silence, or the contradiction, of the earlier literature † makes it probable that the Priests' Code, in the form in which we have it, or, in other words, the completed Priests' Code, is the work of the age subsequent to Ezk. When, however, this is said, it must not be understood to be implied that all the institutions of P are the creation of that age. On the contrary, there are allusions in the earlier literature to many of them (though sometimes with evident variations of detail) which show that, at least in a more rudimentary form, they were already in force.

they were already in force. Examples: Gn 8<sup>21</sup> (J) 'savour of contentment' (Lv 19, and often in P); Jg 13<sup>4,7</sup> 'unclean' food; Jg 13<sup>5,7</sup> Am 21<sup>L1</sup> Nazir-ties; 18 2<sup>25</sup> 'free-sacrifices' (Lv 19, and frequently); 3<sup>5</sup> the 'lamp of God' (Ex 27<sup>30</sup>); 6<sup>35</sup>. a guilt-offering (Dỹ 8); 21<sup>6</sup> the shewbread; Am 4<sup>4,5</sup> tithes, thanksgiving offerings, and free-will offerings; 8<sup>5</sup> (so Hos 21<sup>1</sup>, 18 11<sup>3</sup>) observance of the 'new moon' (Nu 28<sup>11,10</sup>); Is 11<sup>3</sup> a 'convocation' (Lv 23<sup>2,3</sup> etc.); 2 K 16<sup>15</sup> (but no eventus burnt-offering, as in P; cf. Ryle, Canon, 9, 84.1. And in Dt, not only the parallels with H; but also tithes (though with regulations very different from those of P), 'heave'-offerings (12<sup>9</sup> etc.), vows, freewill offerings, ceremonial uncleanness in persons (12<sup>15</sup> 22) as well as in things (14<sup>3-20</sup>), and produced by particular causes (21<sup>25</sup> [Nu 35<sup>34</sup>] 23<sup>102</sup> (Lv 15<sup>16</sup>] 24<sup>4</sup> (Nu 51<sup>3</sup> 26<sup>14</sup> (Nu 191<sup>11,14</sup>; cf. Hös 9<sup>4</sup>), the 'azterth, or 'solemn assembly' (16<sup>8</sup>; cf. Am 5<sup>24</sup>; Is 11<sup>3</sup>), a toräh for leprosy (24<sup>5</sup>). Exk also, esp. in chs. 43-45, alludes to a still larger number of usages of the same kind, and, moreover, employs a priestly phraseology which presents many affinities with that of P (cf. LOT<sup>6</sup> 145 ff.). A priesthood in itself implies the avistence of

A priesthood in itself implies the existence of a ceremonial, more or less developed, as the case may be: the oldest traditions of the Hebrews mention repeatedly an 'Ark' and 'Tent of Meeting' as existing in the Mosaic age; and there are early allusions to Aaron, to a hereditary are early allusions to Aaron, to a hereditary priesthood descended from him, and to the duties —consisting partly in giving decisions on points of civil and criminal law, partly in the mainten-ance of ritual observances—discharged by the tribe of Levi (Ex 4<sup>14</sup> 18<sup>13</sup>, Dt 10<sup>65</sup> 33<sup>10</sup>; cf. Jg 17<sup>13</sup>). The simplest and earliest ceremonial regulations are those contained in Ex 20<sup>24-26</sup> 22<sup>29-51</sup> 23<sup>14-19</sup>, and the parallel code of Ex 3417-26: but these are obviously of a rudimentary character; and it is only natural to suppose that, as time went on, fresh definitions and distinctions would be introduced, and more precise rules would be prescribed for the method of sacrifice, the ritual to be observed by the priests, the dues which they were authorized to receive

• Exk 4099 4213 4429 4630: the DRGD, also, 4319.21.22.25 4447 4517.18.22.23.25. Neither, it is to be observed, appears as a new institution in Eak. • See LOT 120-132 (\$136-139). The most noticeable contra-dictions with Dt relate to the position and revenues of the manumission of slaves (ib. 77.4, \$22.1; Driver, Drut. xxxvii... x, 160-172, 185, 187.1 In 2 K 1216 observe that the guilt and sin-offerings consist in money payments (cf. KS 4021., \$423). ; See vol. i. p. 6001.

After from the people, and other similar matters. the priesthood had acquired, through the foundation of Solomon's temple, a permanent centre, it is probable that the process of development and systematization advanced more rapidly than before; the allusions in Dt imply the existence of priestly usages beyond those which fall directly within the scope of the book, and Ezekiel, being a priest himself, refers to such usages more distinctly. Although, therefore, there are reasons for concluding that the legislation of P did not assume finally the shape in which we have it until after the age of Ezk, it rests ultimately upon an ancient traditional basis; it exhibits the final development and systematization of elements and principles, which in themselves are of great antiquity; and many of the institutions prominent in it are recognized, in various stages of their growth, by the earlier pre-exilic literature, by Dt, and by Ezk.

The question is not one of great importance in the present connexion; but it should be added that it is doubtful whether the legislation of P springs throughout from the same age; there are indications that it exhibits sometimes the usage of different periods side by side. Cf. Dillm.  $Ex_Lv$ , 413 (2455: on Lv 4), Nu-Dt-Jos, 84, 181 (on Nu 28-29), 635, 641 f., 643; Kuen. Hex. §§ 6. 13-15; 15. 28-30; Holzinger, Einl. 418-25, 453 f.; also Ryle, Canon, 84-88.

In its general features—i.e. the general principles of sacrifice, tithes, annual festivals, purification, etc.—the ceremonial system of the Hebrews did not differ essentially from the systems prevalent among other Semitic nations, and indeed among ancient peoples generally, as, for instance, the Greeks.<sup>+</sup> It is not improbable that elements in it were borrowed from the Canaanites. Some of the Heb. sacrificial terms (כלל ,שלם , כליל ,שלם ) are found in the Carthaginian inscription, relating to sacrifices, preserved now at Marseilles; ‡ and vows are also frequently mentioned in other Phœn. inscriptions. There are analogies for the Sabbath among the Babylonians; and even CIRCUMCISION (which see) was not a rite peculiar to the Hebrews. The Levitical ritual, though its form is late, is based ultimately 'on very ancient tradition, going back to a time when there was no substantial difference, in point of form, between Heb. sacritices and those of the surrounding nations' (RS 198, <sup>2</sup>215). Of course, among the Hebrews, these common Senitic institutions received, as time went on, many modifications and special adaptations. But the really distinctive character, which they exhibited in Israel, consists in the new spirit with which they are infused, and the higher principles of which they are made the exponent. The aim of the Heb. legislation was 'not so much to create a new system as to give a new significance to that which had already long existed among Semitic races, and to lay the foundation of a higher symbolism leading to a more spiritual worship' (Ryle, Canon, p. 28; cf. Ottley, Bampt. Lect. 229). The most conspicuous feature in the legislation

of P is perhaps the multiplication and specialization of ceremonial observances, which has been already touched upon.

Another characteristic, which Wellh. has empha-

\*W. R. Smith  $(0TJC^3$  3721, 377, 382-4) points also to the evidences of ancient ritual law in the hands of the priests; cf. Stade, Gesch. ii. 66 (who instances in particular Lv 1-7. 11-15, 17-26, Nu 5-6, 9, 15, 19, as being for the most part 'Niederschrift vorexilischen Gebrauchs'); Chevne, Jeurish Kel. Life after the Exile, 81. There are also many examples of archaic ideas and usages embedded in P, not less than in the other codes: see, e.g., Lv 11 ('uncleanness'; cf. KS 428 ff., 447 ff.), 147-85 (ub. 402, 3422), 1624.; 216 al. (the 'bread of God'; ib. 207, 2224), Nu 5115. (ib. 164 f., 2180 f.), 1925. \* W. R. Smith, KS, Lect. vi. (on sacrifice), and elsewhere ; Ryle, Canon, p. 27 f. Cf. the 'Sacrificial Calendar from Cos, 'published by E. L. Hicks in the Journ. of Hellenic Studies, ix. (1888), 9.323 ff. ' (LS 1, i. 165; see the tranal. in Hogarth's Archaeology and Authority (1899), p. 77 f.; and cf. KS 200, 219 n. (2217, 237 n.).

sized, is the statutory character of religion in the Priestly Code, as contrasted with its more spontaneous character in the earlier codes. In the earlier codes religious observances arise largely out of the circumstances and incidents of daily life. Sacrifices are the spontaneous outcome of the religious feeling of the worshipper; the feasts are occasions of religious observance fixed by the annually recurring seasons of harvest and vintage; the Sabbath is an institution designed expressly for humanitarian ends. In P this is all different : the observances are systematized ; their original significance is obliterated; they are to be regarded simply because J" has enjoined them; the Sabbath is made not for man, but for God, and the slightest infringement of its sanctity is to be visited with death (Ex 31<sup>15</sup>, Nu 15<sup>35</sup>). A system of ceremonial observances of this kind manifestly lies in great danger of being abused : except in persons of more than ordinary spiritual vitality, it tends to stifle and sterilize real spiritual life. Among the later Jews (as allusions in the NT and the Mishna show) it led actually to these consequences, and a religion of excessive formalism was the result. The fundamental conception of the priestly legislation, The that of a people ever serving God in holiness and purity, is, in the abstract, a great one; but the means adopted for its realization, viz. a routine of external observances, are not those which, in the long-run, can succeed. The routine degenerates inevitably into externality and formalism. There is also another point to be observed. In the ideas of holiness and purity, ritual and moral distinctions of holiness and purity, ritual and moral distinctions were confused. Exactly the same penalty is im-posed for infringements of ritual (Ex  $30^{32}$ ,  $3^{32}$ , Lv  $17^{4}$ ,  $9.^{14}$   $19^{9}$ ) as for grave moral offences (Lv  $18^{29}$ ). Death is the penalty, alike for murder (Nu  $35^{31}$ ) and for Sabbath-breaking (Ex  $31^{16}$   $35^{2}$ ). Purifica-tion from *sin* is prescribed after purely physical defilement, as through contact with a corpse, and even for a house which has been affected by leprosy even for a house which has been affected by leprosy (Lv 14<sup>49, 52</sup>, Nu 19<sup>12, 13, 19, 20</sup> [the Heb. in these passages for cleanse, purify is properly to 'free from sin']). A sin-offering is also sometimes enjoined for merely ceremonial uncleanness (e.g. Lv  $5^{2,6}$ , Nu  $6^{9\cdot11}$ ). Mr. Montefiore comments on the indifference to bloodshed, combined with zeal for ritual purity, displayed by the singular-and, we may be sure, ideal — narrative of the war with Midian in Nu 31 (vv.<sup>17. 194. 224.</sup>). The principle of ceremonial cleanness and uncleanness, it may be noticed, was the point on which our Lord broke most decisively with the Mosaic law (cf. p. 75<sup>b</sup>).\* The priestly legislation, however, though it bulks largely in the Pentateuch, never, it must be

remembered, formed the *sole* rule of life for the Israelite. The codes of JE and Dt were not abrogated by it; the warm moral and spiritual teaching of Dt possessed exactly the same authority as the ceremonial of P; and the teaching of Dt was supported by the indirect, but by no means indistinct, testimony of the non-legislative parts of the Pentateuch. The prophets, moreover, re-mained the eloquent and moving exponents of printing religion and of the programmer define of spiritual religion, and of the paramount claims of the moral law above all ritual observances. The corrective for the ceremonialism of P was thus close at hand, in writings acknowledged by the Jews themselves as authoritative. The Jews were never *exclusively* under the rule of the ceremonial system of P. On its ceremonial side, the 'law' was undoubtedly liable to be misapplied, and to lead to formalism; but even its ceremonial institu-

• On the sense in which our Lord came to 'fulfil' the law (Mt  $5^{17}$ ), -i.e. in so far as it was imperfect, to complete it, especially by disengaging from its limited and temporary forms, and placing in their just light, the ethical and religious truths of which it was the expression, -see also Kirkpatrick, Divine Library of the OT, 134 ff.

### LAW (IN OLD TESTAMENT)

tions were the expression of profound religious ideas, and furnished an outlet for varied and genuine religious feelings; while, treated as a whole, the 'law,' as the later Psalmists abund-antly attest, provided an atmosphere in which a religious spirit—for something, of course, in such matters, depends upon the temper of the wor-shipper—could breathe freely, and draw in spiritual refreshment. The ceremonial legislation never had a separate existence of its own; and the Jewish 'law,' if it is to be judged properly, must be judged as a whole, and not with exclusive

reference to one of its parts. In the earlier codes the broader duties of humanity, justice, and morality are chiefly and sufficiently insisted on. They were adapted to create a righteous and God-fearing nation. The Israelite who obeyed loyally the precepts of Dt could not deviate widely from the paths of truth and right. As time advanced, a ceremonial system was gradually developed, and this, though the was gradually developed, and this, block of the earlier provisions just referred to were not abro-gated, became ultimately the more formal and distinctive expression of Israel's faith. And this system played an important function in the re-ligious education of mankind. 'It enforced and deepened the sense of sin. It declared the need of restoration and forgiveness. It expressed in the form of institutions the great principles which regulate man's converse with God. It emphasized the significance of sacrifice under its different aspects, as eucharistic, dedicatory, propitiatory.\* It taught more and more distinctly that an atoming rite must precede the acceptance of the worshipper by God. It thus established the principles which in the fulness of time were to receive their supreme and final application in the sacrifice of Christ. In all its stages, the Mosaic law held before the eyes of Israel an ideal of duty to be observed, of laws to be obeyed, of principles to be maintained; it taught them that human nature needed to be restrained; it impressed upon them the necessity of discipline. And in the post-exilic age, when the disintegrating influences of Hellenism might have operated disastrously upon the nation, the insti-tutions of the law bound together the majority of its members in a religious society, strong enough to resist the forces which threatened to dissolve it,' + and able to guard efficiently the spiritual treasures with which it had been intrusted. Through the ordinances of the law, imperfect in themselves though they might be, God thus trained and dis-ciplined His people, till it should be ripe to cast off the yoke of external ordinances, and be ruled by principles operative from within (Jer 31<sup>337</sup>.) rather than by commands imposed from without. this is the sense in which St. Paul speaks of the this is the sense in which St. Paul speaks of the Call 3<sup>24</sup>. The law as a  $\pi a_i \delta a_j \omega_j \delta a_i$  which so that speaks of the rai  $\delta a_j \omega_j \delta s$  was the 'tutor' (RV), or superior slave, intrusted with the moral education of a child; and the law was similarly an agency for discip-line, or moral training, holding the nation in a moral constraint ( $\epsilon\phi\rhoov\rhoo\psi\mu\epsilon\theta a$ , v.<sup>23</sup>) till it was fit for the freedom of mature age, to be secured by Christ. And the means by which the law acted in this capacity was partly by quickening and discip-lining man's moral sense, partly by bringing to light transgression, and so awakening the sense of sin and the need of forgiveness, which in view of

man's moral weakness it could not itself provide. On the view taken of the 'law' in the NT see the following article; and on the law in postbiblical Judaism (the Mishna, etc.), see TORAH.

\* It ought not in this connexion to be forgotten that only unistentional sins were atoned for by the sin-offering, not sins committed 'with a high hand' (Nu 1530f.), i.e. in deliberate defiance of God's will. + Driver, Sermons on the OT, p. 131 f.; of. Sanday, BL

LAW (IN NEW TESTAMENT) .---

- LAW (IN NEW TESTAMENT). —
  Use of term 'Law' in NT.
  Relation of Jesus to the Law.
  (1) His recognition of its divine origin and authority.
  (2) His critical attitude towards the Law.
  II. Attitude of the Early Church to the Law, and especially the practice and teaching of 8t. Paul.
  (a) Practice of the earliest Christian society.
  B. Practice and doctrine of St. Paul.
  (a) His practice during his Second Missionary Journey.
  (b) His practice during his Third Missionary Journey.
  (c) St. Paul's use of the term 'law.'
  (d) His teaching in his Four Great Epistles as regards
  (i) the place of the law in History ; (2) the mode in which it acts in the individual who lives under it; (3) the relation of Law and Gospel, and esp. the relation of Law and to haw. to the LAW; (4) the relation of the Christi to law. (e) St. Paul's action on his last visit to Jerusalem. (/) Teaching of his later Episitles. III. The LAW in the Episitle to the Hebrews. IV. The LAW in the other NT Books.

Literature.

The word law (r5µ07) is used in the NT of 'any law whatsoever' (Grimm, Lex. s.v.), but when the law is spoken of without qualification, it is lwave the law of God which is meant. This always the law of God which is meant. always the law of God which is meant. This is not a classical meaning or use of the word, and explains the fact that in the NT (with the exception of a quotation from the LXX of Jer 31 (38)<sup>25</sup> in He 8<sup>10</sup> 10<sup>10</sup>) it is always found in the singular. 'The law of God,' or 'the law of Moses,' or 'the law' *simpliciter*, is the style of Scripture; a classical writer would say 'the laws' of Athens or of Solon. But 'the law,' and 'law' without the stride are reliving concentions and it is as such or of Solon. But 'the law,' and 'law' without the article, are religious conceptions, and it is as such that they are treated here. The word occurs some 196 times in the NT, but it is not found in Mk, in Th, 2 Co, Col, Tit, 2 Ti, Philem, 1 and 2 P, Jude, the Epp. of John, and Rev. To bring out its significance in the NT it will be convenient to commiss (1) the relation of large to the large examine (1) the relation of Jesus to the law; (2) the attitude of the early Church to the law, and especially the practice and teaching of St. Paul; (3) the peculiar view of the law taken in the Ep. to the Hebrews; and (4) the indications in other NT books of legal or antinomian tendencies in the first century of the Christian era. The necessary preliminary to the understanding of all these points is a knowledge of the contents of the 'law' of the OT, for which reference may be made to the preceding article.

I. THE RELATION OF JESUS TO THE LAW.-To begin with, the relation of Jesus to the law was passive, like that of every Jew. He was born under the law (Gal 4<sup>4</sup>); the requirements of the law in regard to circumcision and purification were complied with in His case as in that of any child of Jewish birth (Lk  $2^{21L}$ ). He was taken up to the temple when He had completed His twelfth year (Lk  $2^{\text{tem}}$ ), and became, like other Jewish youths, جز تعادل عليه من عليه من بن المعالي بن بن youths, بن بين المعالي بن المعالي بن youths, بن بين المعالي بن youths be instructed in it, and its responsibilities would be laid on Him, simply because it was the law of the nation of which He was a member. He

must have accepted it as part of the national inheritance to which He was born. The NT gives inheritance to which He was born. us no means whatever of judging how the passive unconscious relation to the law was changed into the conscious and responsible one which we see when our Lord entered on His public work. No doubt He grew into that power of judgment and liberty of action which characterize His ministry; but we cannot tell what effort and perplexity, or whether any effort or perplexity, accompanied this growth. When we consider the shortness of His ministry, it seems extremely improbable that we should be able to trace within its narrow limits any 'evolution' or progressive change in His attitude to the law. That attitude was really determined by His character, by the spirit of sonship, of free appreciation of God's will, of un-restrained love to man; and His character was complete when He identified Himself with our sinful race in His baptism, and received there the attestation of the heavenly Father as His beloved Son. No doubt, as one thing in His life led on to another, and as opposition defined His attitude, it became more and more clear what His relation to 'the law,' both as a divine institution and as a divine institution administered and corrupted by man, must be; but in principle this was determined from the beginning. Hence it is not necessary, under the idea that clear self-conscious-ness is the last result of action, to attempt to trace in detail the practical impulses under which our Lord's attitude to the law was gradually defined, or to assume that *He* was learning His own mind all the time (so practically Holtzmann, NT Theologie, i. 130-160); we may take the Synoptics as they stand, and aim at a more systematic view.

(1) Speaking positively, Jesus recognized the law as a whole as a divine institution, and therefore s invested with indefeasible divine authority. He expressed His sense of this authority in the strongest possible language; and, with the idea of the law as embodied in writing present to His mind, declared that 'till heaven and earth should pass, one jot or one tittle should in no wise pass from the law till all should be fulfilled' (Mt  $5^{16}$ , cf. Lk  $16^{17}$ ). It has been asserted that Jesus; whose attitude (as we shall see) to certain parts of the law was at least critical, could not have used such language, and that it belongs to the Judaism of the First Gospel. But it is found also in the Third, which is Gentile or Pauline rather than Jewish, and the assertion is pedantic. Jesus certainly believed that the law embodied a revelation of God ; it was, in short, God's law; and without considering in what respects it might be subject to modification or expansion, He could say broadly that just because it was God's law, not the dot of an i or the stroke of a t could be abrogated by any power on earth. And when confronted, as He is on both the occasions when He uses this strong language, with the deformed righteousness of the Pharisees (Mt  $5^{20}$ , Lk  $16^{(4-1)}$ ), by which the law of God was virtually annulled, we can easily believe that He could and did express Himself thus vehemently. This seems truer, psychologically, than to say with Wellhausen (Israelitische u. Jüdische Geschichte<sup>3</sup>, p. 382) that He found room everywhere for His soul, and was not straitened by what was little in the law, so highly did He exalt the worth of that which was great: the latter one should do, the former not leave undone. It is a more placid and controlled statement of Christ's relation to the law in principle which is found in Mt  $5^{17}$ , the text or theme of the Sermon on the Mount: 'Think not that I came to destroy the law or the prophets: I came not to destroy, but to fulfil.' The law and the prophets is a compendious expression for the

ancient religion as embodied in the OT. To no part of this-neither to the statutory elements in it nor to the elements of promise, neither to its morality nor to its hopes—was Jesus in any sense hostile. There must have been something in His conduct or teaching to raise the question, some-thing which created difficulty for men who identified the law with the current interpretation of it in the Rabbinical schools or in the religious practice of the day; but when it was fairly stated, it created no difficulty for Jesus. In His con-science there was no sense of antagonism or antipathy to the old revelation either of God's will or of His purpose. On the contrary, He had come to identify Himself with that revelation, and to consummate it. The  $\pi \lambda \eta \rho \hat{\omega} \sigma a$  in Mt 5<sup>17</sup> applies to the OT in both its parts. It is true that in the rest of Mt 5 it is the law alone which is taken account of, and this has made it possible to doubt whether  $\pi\lambda\eta\rho\omega\sigma\alpha$  means 'to show the full meaning of,' or 'to keep perfectly'; but the very absence of the object in v.<sup>17</sup>, and the disjunctive  $\eta$  (the law or the prophets), show that Jesus was thinking of the OT as containing elements at once of requirement and of promise, and asserting that all it meant in both kinds would be brought to its con-summation in Him. Hence in principle there is no antagonism between Jesus and the law, between the NT and the OT. For the conscience of Jesus they needed no reconciliation. The New Testament was in Him, and He was thoroughly at home in the Old.

It agrees with this that Jesus refers freely to The law as a religious authority, and as the way to life. 'If thou wouldst enter into life, keep the commandments' (Mt 19<sup>17</sup>). 'What shall I do to inherit eternal life? Jesus said to him, What is written in the law?' (Lk 10<sup>25</sup>). 'They have Moses and the prophets; let them hear them' (Lk 16<sup>20</sup>). It agrees further with this, that in the most unsparing denunciation of Pharisaism and hypocrisy, He safeguarded with scrupulous care the sanctity of the law they 'hedged' and abused: 'The scribes and the Pharisees sit in Moses' seat: all scribes and the Pharisees sit in Moses seat: all things therefore that they say to you do and observe' (Mt 23<sup>3</sup>). Like Mt 5<sup>16</sup> this saying has been impugned on the ground that Jesus could not, in consistency with His real opinion, have spoken thus. This is the criticism of persons who have never spoken to a crowd, and who do not how that the large consistency of leaving a sound know that the large consistency of leaving a sound and homogeneous impression on the mind is indifferent to the abstract precisian consistency which dictates such doubts. Why should not Jesus say, 'As interpreters of the law of God, show them all due reverence; as keepers of the law of God, beware of following their example'? They were poor interpreters, no doubt, but the function itself was a legitimate one, and all that they did in the exercise of it was, prima facie, entitled to respect. Even if it were not so without qualification (and in part, of course, it was not, as Jesus immediately goes on to show), the qualification could be left to take care of itself; the main interest of the moment was to expose the Pharisaic practice by which the law was so wickedly annulled. That making void  $(\dot{\alpha}\kappa\nu\rho\sigma\hat{\nu}r)$  the law of God (Mt 15<sup>6</sup> || Mk 7<sup>13</sup>) which Jesus laid to the charge of the Pharisees was exactly the opposite relation to it. With them, in spite of all the hedges which guarded it, it lost its rights; with Him, in spite of all His freedom, it came to its rights.

(2) Besides this positive attitude of Jcsus to the law as a whole, we have to take account in His life of what may be called a more critical attitude. Without any sense of hostility to the law, He was conscious of its imperfection; this is implied even in His having come to fulfil it. Of this there are various indications.

(a) He speaks of the old revelation as a whole, as of a thing which has had its day. 'The law and the prophets were until John: from that time the kingdom of heaven is preached'; it is a new era, in which they have no longer the same significance (Lk 16<sup>16</sup>, Mt 11<sup>127</sup>.). There is a parabolic hint of this also in Mk 2<sup>211</sup> and || Mt 9<sup>17</sup>, Lk 5<sup>37</sup>.

(b) He delights in summaries of the law, in which it is at once comprehended and transcended. 'Whatsoever ye would that men should do to you, do ye even so to them : for this is the law and the prophets' (Mt 7<sup>13</sup>, cf. Mt  $22^{3_1-40}$ ). Such summaries lift the soul above all that is statutory and positive in the law; in other words, they enable it to conceive of religion as the keeping of law, and yet as without any element of legalism.

The hand is the set of the field of the set of the set

(d) Jesus distinguishes within the law between its weightier matters—judgment, mercy, and faith; and its more trivial ones—the tithing of mint, anise, and cummin (Mt 23<sup>24</sup> || Lk 11<sup>42</sup>). This is not exactly the same as to say that He subordinated the ritual to the moral, though no doubt He did. Nothing could put this more forcibly than Mt 5<sup>254</sup>. A man is to leave his gift before the altar, to be reconciled to his brother. There is no law except love; no statute that can be pleaded against it, no rite so solemn but must give way to it. The tendency of legalism is to reduce all commandments to a level; they are all parts of a divine law, and it is not for men to pick and choose between them; and the Jewish conscience, to which the law was one law and God's law, could not find itself at home in the division of it into ritual and moral. For it there was a moral obligation to keep what we call the ritual law. But as this distinction of Jesus mastered the mind, the sense of moral proportion came back, and it was felt, by some at least, that there were elements in the law which were waxing old and ready to vanish away.

(c) Jesus expressly and formally criticised the law as it was interpreted in the conscience and practice of His countrymen. In Mt  $5^{21-49}$  we have a series of illustrations. The sixth commandment  $(v^{2167})$ , the seventh  $(v^{2767})$ , the law of perjury  $(v^{2367})$ , the *lex talionis*  $(v^{2567})$ , the law as to the treatment of neighbours and enemies  $(v^{4367})$ , are discussed in succession. It is not always clear when it is the letter of the OT itself, and when it is only the current legal rendering of it, which is under review; but in either case Jesus adopts a free critical attitude towards it, and exalts it to a new power. On one of the subjects touched in this chapter, in connexion with the seventh commandment, namely, the law of marriage and divorce, Jesus on another occasion tacitly withdrew a permission which He recognized as conceded by the Mosaic law  $(\ell\pi\ell\tau\rho\epsilon\psi\epsilon\nu Mowofis)$ , in the interest of the ideal of marriage. 'Because of your hard-

ness of heart Moses allowed you to put away your wives, but from the beginning it was not so' (Mt 19<sup>s</sup> || Mk). The question was one on which Jewish schools were divided, and Jesus legislates upon it in independence, indeed, of Dt 24<sup>1</sup>, but in harmony with the law embodied in the creation narrative, Gn 224. From the point of view of legalism it is impossible to say why the authority of Dt should be relative and that of Gn absolute; and the positiveness with which Christ pronounces marriage indissoluble, except by the sin which *isso foroutes marriage* annuls it, shows that He has completely tran-scended the legal standpoint. (See, further, art. MARRIAGE). The same holds of His criticism of the Sabbath law, the subject on which He came most frequently into conflict with His country-men: cf. Mt  $12^{1-12}$  (the disciples plucking the ears men: cf. Mi 12<sup>1-12</sup> (the disciples plucking the ears of corn; the healing of the withered hand); Lk 13<sup>16-17</sup> (the woman with a spirit of infirmity), 14<sup>1-6</sup> (the dropsical man); Jn 5<sup>1-17</sup> (the paralytic at Bethesda); Jn 9 (the blind man restored to sight). Cf. Lk 6<sup>5</sup> (D; the incident of the man working on the Sabbath). Here it is impossible to say that Jesus was hostile to the law of God, or to any ideal of the Sabbath having its roots in the OT. But He was Sabbath having its roots in the OT. irreconcilably hostile to the accumulation of traditional human precepts into which the prohibition of labour, in the interest of man and beast, had been expanded by the perverse ingenuity of the scribes (cf. Schürer, GJV<sup>3</sup> ii. 470 ff. [HJP II. ii. 96 ff.]). He was hostile to the method of interpretation which defeated God's purpose in giving the law, and changed a blessing into a burden. He was espe-cially indignant that on a day which was made for man He should be forbidden to do works of humanity, by exercising His power to heal. As Son of Man, the head of the kingdom in which humanity was to come to its rights, He claimed to be Lord of the Sabbath, and to judge all statutes concerning it according to their agreement or disagreement with its humane intention. It is in connexion with conflicts of this kind that we first read of His enemies plotting His death (Mk 3<sup>4</sup>): He wounded their pride in their legal holiness too deeply to be forgiven. It is one of the defects of legalism that the less the grounds of the law can be discerned—in other words, the more positive and arbitrary it is—the greater seems the merit of punctually observing it. Hence the numberless prohibitions into which the fourt i commandment had been developed had a greater importance for the legally-trained conscience than the weightier matters of the law; and the assumption of freedom toward them, as by Jesus, was regarded as the most daring impiety. How far the teaching and practice of Jesus were immediately grasped by His followers we cannot tell; there are indica-tions in the Gospel (Lk 13<sup>17</sup>) that there were many prepared to appreciate them. But if in relation to the Sabbath and to the law of marriage we can ay that Jesus criticised the legalistic practice of His time by reference to the ideal enshrined in the OT itself, we are on different ground when we come to consider-

(f) The attitude of Jesus to what we should call the ritual law—that part of the law and custom of the Jews which was purely positive, and in which there was really no ethical content. As far, indeed, as this was represented by the cultus of the nation, He treated it with at least silent respect. We do not know that He was ever present at a sacrifice, but neither do we hear that He ever denounced sacrifice. He certainly spoke of the temple as His Father's house, and as destined to be a house of prayer for all nations; and in a flame of zeal He drove from it the traders who made it a market-place and a den of robbers (Mt 21<sup>15</sup> 1). He paid the temple tribute, not, indeed,

because He was bound to do so,-on the contrary, He, and His disciples also, as the king's children, were free from such imposts,-but to avoid offence (Mt 17<sup>44-7</sup>). He did not shrink from touching the leper (Mt 8<sup>1-4</sup>), being raised above the thought of ceremonial pollution; but He told him to go and show himself to the priest, and offer the gift which Moses commanded, for a testimony to them. There is a combination here of inward liberty and indifference, with a formal outward respect determined by circumstances, and necessarily ceasing with them. Cf. also Lk  $17^{14}$ . (In this connexion it may be noted that the idea of  $\sigma\kappa dr\delta a \lambda or$  as a thing to be avoided in conduct is part of the new moral ideal of Jesus, dependent on the primacy He gives to love; we are bound to consider others-as He did, for instance, in paying the temple tax—with a consideration which we may not need ourselves; and to deny this conor lead them into sin, is denounced by Him in the most passionate words, Mt 18<sup>st</sup>). But there is one point in which, according to the evangelic tradition, Jesus completely broke not only with the practice of His time, but with the law of Moses itself-the distinction, namely, between clean and unclean foods, and the observance of various ritual purifications by washing,  $Mk 7^{1-29}$ ,  $Mt 15^{1-29}$ . The discussion here starts from the violation by His disciples of 'the tradition of the elders.' To this, disciples of 'the tradition of the elders.' To this, naturally, Jesus could allow no authority; but He went further, and assailed it as a morally malignant thing which practically annulled the law of God. He appealed to Scripture (e.g. to the fifth commandment, Mk  $7^{sc.}$ ) against this tradi-tion—to the law of God against the ordinance of man precisely as the Reference appended to the man-precisely as the Reformers appealed to the Bible against the Church (Holtzmann, NT Theol. i. 141). But in explaining to the people ('Hear me, all of you, and understand') the principle on which He acted, He went further still, and, as the evangelist expressly asserts, 'made all meate clean' ( $\kappa a \theta a \rho i \zeta \omega r \pi \delta r a \tau \delta \beta \rho \omega \mu a \tau a$ , Mk 7<sup>19</sup>). In Lk 11<sup>47</sup> the same subject is treated more from the point of view of indifference; it is only when the dish is filled with the proceeds of rapine that there aish is filled with the proceeds of rapine that there is anything offensive in insisting on its being out-wardly (*i.e.* Levitically) clean; but in Lk  $10^7$  (the mission of the Seventy) there may be a reference to the more thorough view. The missionaries are to eat and drink what they are offered, with no needless scruples. This decisive breach with the law was felt to be what it was both by the opponents of Jesus and by Jesus Himself: 'Then opponents of Jesus and by Jesus Himself: 'Then came the disciples and said unto him, Knowest thou that the Pharisees were offended when they heard this saying?'... 'Let them alone,' He answered; 'they are blind guides; and if the blind guide the blind, both shall fall into a pit' (Mt 15<sup>12π</sup>.).

It is at this point, where this decisive breach with legalism is accomplished, that Jesus is compelled to leave Palestine (Mt  $15^{21} \parallel Mk$ ), to give up the attempt to win the people, and devote Himself to the training of the Twelve. It was only to a select company that His mind could now be unfolded; a great gulf had been fixed between Him and the worshippers of the law, across which no understanding was possible. Nor do the Gospels give us the means of knowing how far He was able to carry the education of the Twelve on this subject. The 'meats and drinks and divers washings' were part of a system; what of the remaining part of it? What of all that element of the law which was identified with the temple and its worship? What of animal sacrifice? What even of the covenant sign, circumcision? As for the temple, He predicted its fall, and with it the collapse of

the ritual worship. But was this element in the law to have fulfilment through Him, or was it only to be destroyed? The one hint we have of an answer to this is the fact that Jesus spoke of His own death as the basis of a (new) covenant between God and man—that covenant which Jeremiah foretold (31<sup>sn.</sup>), which has as its fundamental blessing the forgiveness of sins. To connect the forgiveness of sins with the shedding of blood is in the Bible inevitably to conceive the shedding of blood as sacrificial; only sacrificial blood atones for sin. In the great word spoken at the Supper, therefore, Jesus hints at a fulfilment in His own person of that whole side of the law which has to do with approaching God in worship, Mt 26<sup>ss</sup>. He gives the impulse and the justification to that interpretation of His life and death in relation to the (Levitical) law which we afterwards find in the Ep. to the Hebrews.

On the whole, then, it may be said that the attitude of Jesus to the law was that of entire loyalty to it as the revelation of God's will, entire comprehension of it in its principle and aim, entire subordination of every expression of it to its principle, entire superiority to all human interpretations of it, as designed perhaps for its greater security, but actually making it of no effect; and entire indifference, not indeed to the law as constituting an order for approaching God in worship, but to those elements in the law which, because in themselves without ethical significance, operated to corrupt conscience, and to divide men from one another without moral ground.

II. THE ATTITUDE OF THE EARLY CHURCH TO THE LAW, AND ESPECIALLY THE PRACTICE AND TEACHING OF ST. PAUL. -A. At first the law presented no problem to the Christian society. All the members of that society were Jews, and devont Jews. The Ananias who baptized St. Paul is described as evhables rate tor vouce, and as having Is described as evaluation for the bound of the second se would be a matter of instinct with them-a part of their nationality, the relation of which to their religion never presented itself to their minds. The charges made against them by the priests have never any reference to the law, and the proofs adduced for the Messiahship of Jesus, which seem to have filled a considerable space in apostolic preaching, were related not to the law, but to prophecy. As far as the Bk. of Acts gives us any indication, difficulty first emerged in connexion with the preaching of St. Stephen. He was charged with speaking 'blasphemous words against Moses and against God'; with incessantly 'speak-ing words against this Holy Place and against the law'; with saying that 'Jesus of Nazareth will destroy this place, and change the customs which Moses delivered to us' (Ac 6). From these which Moses delivered to us (AC 6). From these accusations we can only infer that the new wine was beginning to burst the old bottles, and that the enemies of Christianity, with senses sharpened by hatred and fear, saw perhaps sooner than its friends that it was essentially irreconcilable with the established legalism of the Jewish Church. It was divine and horeon Ludein was retired at was divine and human ; Judaism was national and traditional; it could not harmonize finally with the traditional and national framework. But in the Christian society itself, so natural was it for Jews to live as Jews, even after they accepted Jesus as

the Christ, that the difficulty was not felt. This difficulty was first forced on the attention of every one by the circumstances attendant on the reception of Cornelius into the Church. While

St. Peter, divinely led from Joppa to Cæsarea, was yet preaching the gospel in Cornelius' house, the Holy Spirit fell on all those who heard the word (Ac 10<sup>44</sup>). The circumcised believers who were there were amazed, but St. Peter saw the significance of the event, and at once had them received into the Church by baptism, and associated familiarly with them (Ac 11<sup>3</sup>). When his conduct—which really meant that the ceremonial law, as a Jewish national law, separating the Jews as (God's people from all others, had ceased to have religious significance—was called in question at Jerusalem (Ac 11<sup>25</sup>), he defended it apparently with the full consciousness of what it meant. 'If God gave them the same gift as he gave us also when we believed in the Lord Jesus Christ, who was I that I should obstruct God?' (cf. Ac 15<sup>75</sup>). It is implied here that the gift of God—in other words the Holy Ghost—is *the* essential of Christianity, and the only one; where it is found, nothing else counts, and no questions are to be raised; circumcision is nothing and uncircumcision is nothing. But if this is so, then (so far as it is a term of communion and a condition of salvation) does not the law as a whole, to which men være bound by circumcision, cease to have any religious significance? Is it not possible already to define Jew nor Greek?"

This inference, which was involved in St. Peter's conduct, and in his defence of it, was not, however, clearly drawn at once. The exceptional case of Cornelius was regarded as exceptional; one man and his family could not make a Church, and this isolated instance might perplex rather than enlighten the simple-minded. But with the extension of the Church to Antioch, and especially with its extension beyond Antioch through the mission conducted by Paul and Barnabas, the subject was brought up with greater urgency. In the account of the first mission of these apostles, we have a hint of the peculiar Pauline attitude to the law : 'in this man (Jesus) every one who believes is justified from all things from which ye could not be justified by the law of Moses,' Ac 13<sup>30</sup>. It is not in this, however, but in the doctrine of a crucified Messiah, and perhaps in personal jealousy, that an explanation may be found of the opposition offered to the mission *en route*. Not Jewish Christians at all, resisted the preachers.

When Paul and Barnabas returned, they summed up the result of their mission in the words : 'God has opened the door of faith to the Gentiles,' Ac 14<sup>20</sup>. But this 'conversion of the Gentiles,' though the news of it caused great joy in Phonicia and Samaria (Ac 15<sup>3</sup>), awakened very different feelings even in Christian circles at Jerusalem. Emissaries from Jerusalem insisted on teaching (#didaoxov, Ac 15<sup>2</sup>) the brethren at Antioch-men who had believed in Jesus Christ and received the Holy Ghost -that without circumcision they could not be saved. It was a deliberate challenge not only to the work of Paul and Barnabas, but, as they believed, to the work of God; and as it involved the unity of the Church, it was arranged that Paul and Barnabas with some brethren from Antioch should go to settle it with the apostles and elders at Jerusalem. It was not a question on which the apostles to the Gentiles could compromise; and everything depended, not indeed for the future of Christianity, but for the present peace of the Church, on the conciliatory spirit and insight of the leaders of the Church at Jerusalem. Room was given for discussion (Ac 15<sup>7</sup>), but the question was settled by the argument of St. Peter—an argument

\* We have assumed above that the Cornelius episode is historical, and also in its right place.

LAW (IN NEW TESTAMENT) 77

identical in principle with that of ch. 11: 'God who knows the heart bore witness to them (the Gentiles) in that he gave them the Holy Spirit just as he did to us; and he made no distinction between us and them, in that he purified their hearts by faith.' For the Gentiles, at all events, a place in the Church and a part in salvation is in no way dependent on circuncision, or on keeping the law of Moses. This was the principle for which St. Paul contended; and it was in consistency with it that he refused to have Titus circuncised on the occasion of this visit to the Jewish Church (Gal 24), and that he withstood St. Peter to the face when, during a subsequent visit to Antioch, he yielded to Jewish pressure, and withdrew from fellowship with Gentile believers.

The recognition of this principle on both sides does not discredit the decree of Ac  $15^{2aff}$ . The decree is a measure of expediency, necessarily of a temporary character, but one to which (in the interests of peace and of the Church's unity) St. Paul could easily enough agree—once his principle had been recognized. Where Judaism was focused, in Jerusalem for instance, the law would assert itself as inevitably as nationality or patriotism; in purely Gentile Churches no question as to its place in revelation or its religious significance might ever be raised; in places where Jew and Gentile were much in contact there would no doubt be inconsistencies, misunderstandings, and practical compromises and accommodations of various sorts. Of these the decree is a specimen. B. The centre of interest in the NT is now in

the practice and the doctrine of St. Paul.-(a) In the course of his second mission he visited Europe, and in a few verses of the 1st Ep. to the Corinthians, written to a Church founded in the course of this mission, he gives a clear and precise account of the principles on which he acted. 'Being free from principles on which he acted. 'Being free from all, I made myself a slave to all, that I might gain And I became to the Jews as a Jew, the more. that I might gain Jews; to those under law, as under law, not being myself under law, that I night gain those under law; to those without law (i.e. the Gentiles as 'outlaws' from the Jewish point of view), as without law, not being without law to God, but under law to Christ (*Erroµos* because the Christian lives in the law, he is not under it as one to whom it speaks from without where it as one to whom it speaks from whom it may and from above, and whom it oppresses), that I might gain those without law' (on the whole passage 1 Co  $9^{19\cdot23}$  see the masterly note of Edwards, *Comm. ad loc.*). It is in pursuance of this policy that St. Paul at the outset of this journey circumcises Timothy (Ac 16<sup>3</sup>), and delivers to the Churches on his route the decree of the large compatible (Ac 16<sup>3</sup>), it is still in pursuance of Jerus. Council (Ac 16<sup>4</sup>); it is still in pursuance of it that he preaches at Corinth a gospel to which everything is indifferent but Jesus Christ crucified (1 Co 2<sup>16</sup>), and declares that circumcision is nothing and uncircumcision nothing (1 Co 7<sup>187</sup>).

In these verses in 1 Co it may be assumed that St. Paul is interpreting the principle on which he had acted when at Corinth, and on which he acted everywhere. The man who is called (i.e. who becomes a Christian) uncircumcised is not to circumcise himself; the man who is circumcised when the call comes to him is not to undo or disguise the fact: as far as the gospel and membership in the Church are concerned, circumcision and uncircumcision are neither here nor there. It is of this principle and practice that St. Paul says: so I ordain in all the Churches (1 Co 7<sup>17</sup>). The Jewish opposition to St. Paul at Corinth seems also to have fastened on this aspect of his work: it no longer flowed from personal jealousy, as probably in Galatia. The charge laid against him before

Gallio was that he persuaded men to worship God  $\pi ap \lambda \ \tau \delta r \ r \delta \mu \omega r$  (Ac 18<sup>13</sup>), by which is no doubt meant, in violation of the Mosaic law. Judaism was a *religio licita*, and as the teaching of St. Paul was frankly indifferent to the national character in virtue of which the law possessed this public standing, his enemies thought to bring him within the scope of the Roman law as violating it. Yet with all this he was anxious to maintain communion with the mother Church at Jerusalem, and at the close of his journey formally paid his respects to it once more (Ac 18<sup>22</sup>).

(b) To the third mission of St. Paul, which is ordinarily dated as commencing 55 or 56 [Turner, 52] A.D., belong the great controversial Epistles, 1 and 2 Co, Gal, and Ro, in which his doctrine of the law (for he was obliged both by his spiritual experience and by the challenges of his adversaries to have a doctrine) is expounded in all its aspects. Law in a sense is the subject of all, but especially of the two last named. The very frequency with which the word occurs is significant. It is found 32 times in Gal, 76 times in Ro, 8 times in 1 Co; elsewhere in the Epistles ascribed to St. Paul only 6 times. In Gal the reference is mainly to what we should call hav in its *rived* aspect for the claim should call law in its ritual aspect, for the claim made on the Christians of Galatia by the Judaizers was that they should submit to be circumcised; in Ro, on the other hand, it is the moral law which is the subject of discussion. Yet this distinction is the subject of discussion. Yet this distinction is not one which would be present, at least vividly, to St. Paul's mind. He thinks of the law as one, and as the law of God; and his point is that statutory obedience is not the way of salvation. Much of the difficulty which his opponents had in understanding St. Paul must have been due to the apparently (and inevitably) equivocal atti-tude which he assumed to the religion of Israel. On the one hand, the gospel was a specifically new thine. It was independent of the law. It did for thing. It was independent of the law. It did for him what the law could not do (Ro 8<sup>3</sup>). It had to be defined by contrast with the law; sometimes it seemed as if it could be defined only by opposition to the law, as in 2 Co 3 where they are confronted as γράμμα and πνεθμα, as αποκτέννειν and ζωοπαιείν, as κατάκρισι: and δικαιοσύνη, as το καταργούμενον and τό μένον. Even in Ro, which is written in a more conciliatory mood, pains are taken to show that in principle the two religions (the law and faith, works and grace, wages and promise) are mutually exclusive (Ro 4). On the other hand, the connexion of the new religion with the old is as indubitable. The  $\delta_{\kappa a \alpha \sigma \sigma' \nu \nu}$   $\theta c \sigma'$  preached in the gospel may be  $\chi \omega \rho i_s \nu \delta \omega \sigma_s$ , yet it is witnessed to by the law and the prophets (Ro  $3^{2n}$ , cf.  $1^{2, 17}$   $10^{5L}$ ). The last passage referred to is particularly striking, for in it St. Paul applies to the gospel words spoken by Moses about the law, and that for the very purpose of pointing the superiority of the gospel to the law. In other words, he read the OT as a Christian book, and yet proved from it the thesis that the OT religion was not Christianity. But though this inevitable formal difficulty must often have led to misunderstanding in controversy, it is no more than formal, and the apostle's position is intelligible enough. The OT, apostle's position is intelligible enough. The OT, if regarded as a code, is not Christian, is indeed antichristian, as every religion based on statutes and therefore legal in spirit must be; but as a revelation it has the promise of Christianity in it, and bears witness to the gospel. (c) Before examining St. Paul's doctrine, or the

(c) Before examining St. Paul's doctrine, or the various suggestions of his Epistles, on the law, it is necessary to observe more closely his use of the word. (a) He sometimes has it with, sometimes without, the article. The question has been raised whether the meaning is the same in the two cases. If we ask questions which were not present

to the mind of the writers whom we are interpreting, we are apt to get unreal and unreliable answers; and in answering this question there has been little agreement among scholars. No doubt when St. Paul says 'the law,' without any quali-fication, he is thinking of the law of Moses. There was nothing else in the world to describe by that name. The one specimen exhausted the species. Is anything else meant when he speaks of 'law' without so defining it? The answer given by such scholars as Lightfoot and Gifford is that in such cases what St. Paul has in view may indeed be the law of Moses, but it is that law not definitely as Mosaic, not as the historical institute with which the Jews were familiar, but indefinitely, and simply in its character as legal. In spite of the objections of Grafe, this view seems thoroughly sound. Even what is regarded as a decisive case on the opposite side (Ro  $5^{20}$  vbuos de mapeis  $\eta \lambda \theta \epsilon v$ ) is much more effective and relevant to the apostle's argument if we render 'Law came in,' instead of 'The Law.' St. Paul is writing of the great spiritual forces which have dominated the history of humanity, Sin, Law, and Grace, and it is in their character as such, not in their historical definiteness, that he is concerned with them. It is only when this is admitted, that what St. Paul says of law has any interest for others than Jews. It was because he could conceive of the law of Moses not as Mosaic, but simply as legal, that he could find an analogue to it among the Gentiles, and preach to them also a gospel (and the same gospel) which meant emancipation from legalism. The Gentiles, he says, in explaining how it is possible for them to be judged by God, though they have no law (in the sense in which Israel had) yet do by nature the things required by the law, and so display 'the work of the law written in their hearts' (Ro  $2^{144}$ ). They have the idea of a their hearts' (10 2<sup>-m</sup>). They have the mean of a task to be done, just as the Jews have; and there is a 'natural legality,' to use an expression of Chalmers, in men which disposes them to aim at achieving righteousness in this way. The first thought of man, Jew or Gentile, is that he will do the things that are required of him, —in other words, keep the law, —and on the ground of what he thus achieves claim as of right the approbation of God. This is what St. Paul means by attaining righteousness έξ έργων νόμου, by works of law. The Mosaic law is included, but it is included not as Mosaic, but as legal, and it does not exhaust the concept. The law may be the form that haunts the mind of the 'natural legalist' the world over; and to all such alike, Jew or Gentile, St. Paul declares that the way they are treading can never lead to acceptance with God. It does not matter what the special content is which is embodied in the legal form; it may be mainly what we call vitual, as in the Ep. to the Galatians, or mainly what we call ethical, as in the Ep. to the Romans; in no case whatever can statutory obedience constitute a claim on God or command His approba-tion. 'By works of law shall no flesh be justified in his sight' (Ro 3<sup>30</sup>).

( $\beta$ ) There is another point to be cleared up in St. Paul's use of the word. There are passages in which 'the law' is used with a genitive in a way which suggests to a modern, perhaps especially to an English reader, that the word is used with some approach to the sense it now bears in physical science. Thus 'the law of sin which is in my members' is interpreted as the sinful mode in which 'my members' normally or habitually act (Ro 7<sup>23</sup>); similarly also 'the law of the spirit of the life in Christ Jesus' (Ro 8<sup>2</sup>). But the passage most relied on to prove this sense is Ro 7<sup>21</sup> evpiorsw άρα τόν νόμον, τῷ θέλοντι έμοι ποιεῖν τό καλόν, ὅτι έμοι τό kakdr mapakeirai. This is often interpreted to mean,

'I find therefore this regularly recurrent pheno-

<sup>1</sup> Ind therefore this regularly recurrent pheno-menon, —this "law" in the sense of modern science, —that when I would do good, evil is present with me' (so Winer, ed. Moulton, p. 697, who renders  $\tau \partial r \nu \delta \mu o r normam$ ; and cf. Meyer or Sanday and Headlam, ad loc.). But the 'law' of modern science belongs to an intellectual world which was not then in being and there can be little dwitch was not then in being, and there can be little doubt that by evplorw dpa τόν νόμον St. Paul means to say, 'this is what I find as far as the law is concerned,—I mean well, but am perpetually baffled by the presence of evil. (So Vaughan). The words  $\tau \delta r \rho \mu \sigma r$  refer to the law of Moses, under which St. Paul had his experience of legal religion; but it is the experience also of every one who has tried legal religion in any shape, Mosaic or another. So in the other passages referred to above, 'the law' is to be conceived as related to a legislator, and not as in modern physics. 'The law of God' (Ro  $7^{24}$  is the law which God enjoins; the law of the mind'  $(v_{23}^{23})$  is the law which the roos or practical reason of the man prescribes, or the law of God as re-enacted in conscience; the law of sin is the mode of life (not in which sin is normally exhibited, but) which Sin, personified as a rival to God, enjoins upon man and compels him to follow ; the law of the Spirit of the life in Christ Jesus is the mode of life (not in which spirit acts automatically, and on the analogy of a physical force, but) which the Spirit authoritatively prescribes, and, as being in its essence impulse as well as law, enables man freely to realize.

There are, however, cases in which the genitive with vous is of a different kind, and in which vous itself seems to be used in a larger sense, almost = in Ro  $3^{27}$  St. Paul says boasting is summarily excluded, and asks  $\delta id \pi o low \nu \delta \mu o v$ ; through what sort of law? In other words, What sort of character must we suppose Christianity as a divine institution to possess, in order that this result must follow? Is it to be characterized by works, or by faith? The latter, says St. Paul: the geni-tive in the new loss that the characterized tives in the verse being those of the characterizing In  $v^{s1}$  of the same chapter  $v^{\delta\mu\rho\nu}$  is s. It may refer to the OT religion as a quality. ambiguous. It may refer to the OT religion as a whole; and then the answer to the question, Do we annul (the) Law through faith? would be given in ch. 4, where St. Paul shows that the justi-Abraham, —in other words, that the old order is confirmed (iorárouer), not subverted, by the new. But *v5µ0v* may be generic, and the question may mean, Do we then annul Law—all that has ever been known as moral order, all that has ever been supposed to safeguard morality whether of Mosaic or other origin—by our faith, *i.e.* by our new Christian religion? In this case, the proof of the assertion that we do not annul but establish Law by Faith-that the Christian religion is the only effective guarantee of morality-is given, not in ch. 4, but in chs. 6-8, where Christianity is shown to involve the possession of the Holy Spirit.

(d) We may now proceed to notice more particu-larly what St. Paul teaches about Law, bearing in mind that it was through the Mosaic law that he obtained the experience out of which he speaks, but that he speaks for the benefit of men who may have had a similar experience although they had never heard of Moses; in other words, that even where he is formally discussing *the* Law, it is Law itself, in all that is characteristic of it as legal,

which he is really concerned with. (1) As regards its place in history, it is an entirely subordinate thing. The great spiritual powers which have had dominance in the life of man are Sin and Grace; in comparison with them, Law is a minor matter. Sin entered the world  $(ei\sigma\eta\lambda\theta er,$ 

Ro 512), and so did Grace, but Law only παρεισηλθεν= entered as an accessory, or in a subordinate capacity (Ro 5<sup>20</sup>). To a Jew, the most important figure in religion was Moses; St. Paul argues that the importance of Moses in the spiritual history of humanity is an entirely inferior thing when com-pared to that of Adam or of Christ. This is the purport also of the argument in Gal 3<sup>1267</sup>, where he aims at showing that the Promise-i.e. the Christian religion as it was announced to Abraham, and in a sense imparted to him-was not conditioned by the Law, which came 400 years afterwards, and that not by the immediate act of God, bat 'ordained through angels, by the hand of a mediator.' It is not so clear whether St. Paul regarded Law, or the reign of Law, either in its more statutory form as in Israel, or in its vaguer form as present to conscience among the Gentiles, as a positive preparation for the gospel. The figures of the prison-house and the παιδαγωγ's in Gal 3<sup>224</sup>. hardly amount to this. As Lightfoot remarks, 'the tempting explanation of  $\pi a_i \delta a_j \omega_j \delta s_j$ is Xportor, "one to conduct us to the school of Christ," ought probably to be abandoned.' Ets Xportor really means 'until Christ came.' During the pre-Christian stage of our life we were 'shut up and kept in ward under the law' ; it was our prison and our moral guardian, but St. Paul does not regard it as leading us to Christ. The radae  $\gamma \omega \gamma \omega \gamma \omega s$  a slave who had to exercise a certain moral restraint over the boy under his charge ; the law, too, was servile, an inferior type of religion, and all it could do by itself was to attempt a similar restraint.

(2) On the mode in which Law acts in the indi-vidual who lives under it, St. Paul has much to say. (a) It brings the knowledge, especially the full knowledge ( $i\pi i\gamma r\omega\sigma cs$ ) of sin, Ro  $3^{30}$   $4^{15}$ , and esp.  $7^{7n}$ . (I had not known sin, but through the law, 'etc. The description of spiritual experience in Ro  $7^{7-26}$  is not to be mechanically interpreted; it belongs to what may be called 'ideal biography.' Īŧ is neither the experience of the regenerate nor of the unregenerate man, but the experience, if one might say so, of the unregenerate man seen through regenerate eyes, interpreted by a regenerate mind; it is individual experience, but universalized; it is not a deposition for a law court, but some kind of essential eternal truth. It contains much of St. Paul's doctrine of the law-a doctrine resting on experience of his, own. The starting-point is purely ideal. 'I was alive without the law ( $\chi \omega \rho ls$  $r \delta \mu \omega \nu$ ) once.' This is not a date which can be fixed in any one's life. There is not really a golden age, a happy time to which we can look back, when we had no conscience, and therefore no bad conscience. It is, however, the assumed starting-point of the spiritual life for St. Paul. It lasts till its peace is invaded by the Law. When the commandment comes, sin wakes up to life, and the man dies. The prohibition of the Law reveals to man his antagonism to it. The Law comes to him, from without, and it is without : man and the law, the very moment the law appears as such, are discovered to be in some kind of antagonism to each

other ; conscience first exists as a bad conscience. ( $\beta$ ) The law not only brings the full consciousness of sin, it also brings its doom. The law works wrath, Ro 4<sup>15</sup>. There is a 'curse of the law' which comes upon all who violate it. To know that one has broken the law is to know that he is subject to this curse. The doom of death stares him in the face. St. Paul nowhere gives an analysis of descret, or xardsa, or xardsa, ard and it is merely misleading to introduce such distinctions as physical, spiritual, and eternal death to interpret his meaning. That death which is the doom or curse of the law is one awful indivisible thing, which only a despairing conscience can realize, and which is too overwhelming to be the subject of such distinctions. It includes in every case the feeling that God, whose the Law is, is against those who have broken it.

( $\gamma$ ) The Law, according to St. Paul, stimulates sin, and was given for that very purpose. 'The Law came in beside, that the trespass might abound, Ro 5<sup>30</sup>. The Law was added  $\tau \hat{\omega} r$   $\pi a \rho a \beta \dot{a} \sigma \epsilon \omega r \chi \dot{a} \rho r$ , Gal 3<sup>17</sup>: where 'because of transgressions' must be interpreted on the analogy of Ro 5<sup>30</sup> tra  $\pi \lambda \epsilon \sigma \tau \delta \tau \eta$  $\tau \delta \pi a \rho \delta \pi \tau \sigma \mu a$ . Cf. also Ro 7<sup>13</sup> 'that sin through the commandment,' *i.e.* through the law in one of the injunctions or prohibitions composing it, 'might become exceeding sinful.' This is one of the most daring points in St. Paul's doctrine, yet it rests on the familiar psychological fact that prohibition provokes resistance. When the law — any law whatever—says 'Do not,' there is something in man which is inclined to say 'I will.' The peculiarity is that St. Paul represents God as availing Himself of this characteristic of human nature in order (indirectly) to prepare man for salvation. When he says that the purpose for which Law came in was that the trespass might abound, the purpose is conceived as God's. It is as though God saw that the only way to get man to accept *His* righteousness was to make him despair of his own, and the way to make him despair of his own was to subject him to a dis-cipline under which the sin that was in him would reveal its exceeding sinfulness, its irresistible tyrannical strength, and annihilate all his hopes. It is in this connexion of ideas that St. Paul says the law is the strength of sin, 1 Co 15<sup>56</sup>. No doubt it was at this point that his doctrine would seem most impious to a pious Jew. The Law, his adversary would naturally assume, was given to be kept. It was given to guide man in the way of life, to be a light to his feet and a lamp to his path. It was a kind of incentive as it would be the path. It was a kind of insanity—so it would seem to him—to represent it as given to stimulate sin, to counteract its own nature, defeat its own purpose, and lead to its own supersession by a new religion. But, in reality, Law is used in two different senses by the parties to this controversy. The Jewish interlocutor whom we have supposed is thinking of the whole OT revelation, which is not necessarily legal at all; St. Paul is thinking of it specifically as legal, as that system of statutes and traditions to which it had been reduced in the Pharisaic circles in which he had been brought up; and he is interpreting God's purpose in giving the law through his own experience—surely an ex-perience in which the hand and purpose of God could be traced—under those conditions. If experience proved anything, it proved that God could mean nothing by the law (as St. Paul had known it) except to make a full revelation of sin. It was not meant to bring salvation, it was meant to bring despair.

( $\delta$ ) But though the law acts in this paradoxical way, and does so in pursuance of God's purpose, God is not to blame for the sin which is multiplied, nor is the character of the law itself in the least degree compromised. The law is spiritual and holy. Both *wreuparusó* and *dy*os are words which indicate the connexion of the law with God. The commandment, the prohibition or precept in which the law expresses itself, is holy (=divine), just (=answering to the relations which subsist between God and man, or between men themselves), and good (=morally beneficent). The explanation of the disastrous working of the law (disastrous, though God's grace makes it an indirect preparation for the gospel) is to be found in man himself, and especially in his nature as flesh: 'I am

odprives, a creature of flesh, sold under sin,' Ro  $7^{14}$ .

The law, perhaps, ought to be able to do for us something quite different from what it actually does; but it cannot do that other thing; it is weak 'through the flesh,' Ro 8<sup>3</sup>. St. Paul nowhere explains how the flesh has come to have this peculiar, native, invincible antipathy to the law, and this is not the place to inquire; it is enough to notice that it is on his conception (which like all his other conceptions is not an abstract but an experimental one) of what the flesh is, that the most characteristic part of his doctrine of the law depends. It is because the flesh is what it is that the law stimulates sin, plunges man into despair, and so prepares him for the gospel, *i.e.* for a divine righteousness to which ' works of law' contribute nothing, though witness is borne to it ' by the law and the prophets.' The flesh and the law together explain the universal need and the universal craving for redemption.

(3) It is necessary, however, to define the relation of law and gospel more closely. It is true that the law contributes nothing to the gospel: no statutory obedience whatsoever enters into the  $\delta_{iraiosivry}$  $\theta \epsilon o \tilde{v}$  preached by St. Paul to sinners whom the law has brought to despair. But the law is not ignored by the gospel. It is God's law. It is enforced by the most terrible sanctions: its sentence of condemnation, its curse, its doom of death, are awful realities, and cannot simply be passed by. Nor in St. Paul's gospel are they passed by. The very heart of that gospel is Christ's relation to the law-His relation to the law, not merely as a law which issues commandments, but as a law which has pronounced sentence upon man. When Christ is said to be made under law, to redeem them that are under law, it is this which is in view: St. Paul has a gospel to preach to men under the condemnation of the law, because that condemnation has been taken on Himself by Christ. This is the idea which explains all the formulæ the apostle uses in describing the redeeming work of Christ, and which explains above all the fact that the redeeming work of Christ is so constantly identified with His death. Death is the doom of sin, the sanction, the curse, the sentence of the law; and in dying for us Christ recognized without abatement the utmost claims of the law as expressive of the holy will of God. It is in this sense that He is said to have become a curse for us, and to have been made sin for us by God; it is in this sense also that God is said in Him to have condenned sin in the flesh. All these passages (Gal 313 44., 2 Co 521, Ro 83) describe the same thing : the absolute honour paid to the law by Christ in freely submitting to that death in which the law's condemnation of humanity is expressed.

.

We do not discredit this connexion of ideas by saying that death is merely physical, and that the conception of it as the doon of sin is fantastic or mythological. Nothing that happens to man is merely physical. All that happens to a spiritual being has in the last resort a spiritual meaning; and when death is interpreted (not through its physiological antecedents or conditions, but as it must be by the philosopher, the moralist, and the theologian through the conscience, it will be hard to find for it any other significance than that which St. Paul accepts. It is the dreadful experience in which conscience sees not the debt of nature, but the wages of sin; and it is as such that Christ is conceived as submitting to it.

The same holds of the more elaborate passage Ro  $3^{21-26}$ . Christ is there represented as set forth 'as a propitiation, . . in his blood, with a view to demonstrate God's righteouaness, owing to the passing by of foregone sins in the forbearance of

God.' The idea is that God's treatment of sin hitherto-His suspense of judgment-cast a shadow on His righteouaness: it might be questioned whether God was really concerned about the difference between right and wrong. But at the cross His righteousness has been cleared from this shadow. How? Because there the doom of sin has fallen upon His own Son. Nothing could show more conclusively that God was inexorable, irreconcilable to sin—that God's law was an in-violable law. There is nothing in the argument of Weiss (Comm. on Ro 3<sup>28</sup>) that punishment and pro-pitiation are alternatives between which God had to choose, but which had nothing to do with each other. God chose to make propitiation for the sin of the world, and He did it, according to St. Paul, not in this passage only, but in all the others cited above, —in the following way : He sent His Son to take the sin of the world upon Him in all those consequences of it in which His condemnation and the sanctity of His law are expressed, and especi-ally, therefore, in death. Death in Christ's case has propitiatory significance,—in other words, it is the basis of gospel,—because it is the bearing of sin, the full recognition, in their full extent, of the Law's claims upon man. To dissolve the relation between the Death of Christ and the sentence of the Law — to take the curse and condemnation out of the Cross—is to annihilate the gospel as St. Paul understood it. It is essential to a doctrine of atonement that it should in this sense at least establish the law.

(4) But the question remains, What is the relation of the Christian to the Law, or to law in general ? Much of the paradox of St. Paul's teaching gathers round this point. In all religion, of course, from the point of view of ethics, there is something paradoxical. It belongs to religion, as such, to transcend the ethical point of view, yet to con-serve and promote, indeed to be the only effective means of conserving and promoting, ethical in-terests. Hence moralists are the most severe, if at times the most inept, critics of religion, and St. Paul's idealism and his paradoxes together pro-voked and still provoke infinite comment. Yet his position is quite clear. On the one hand, the Christian has nothing more to do with law in any way. 'I through law died to law that I might live to God.' An exhaustive experiment of living under law convinced him that there was neither life nor righteousness to be found that way, and he was done with law for ever. 'I am crucified with Christ; and it is no longer I who live, but Christ who lives in me.' The old end of life is not renounced; his aim is still righteousness; but the old means are renounced. Righteousness is not to be achieved out of his own resources, and brought to God for His approval; it is to be the work of Christ dwelling in him through His Spirit. Law was weak through the flesh, and could not do what was wanted; but the Spirit is stronger than the flesh, and can secure in spite of it what the law failed to secure; In us (Christians), as we walk not after the flesh but after the spirit, 'the just demand ( $\tau \partial \delta u \pi a(\omega \mu a)$  of the law' is fulfilled, Ro 8<sup>4</sup>. Sin has not dominion over us, for we are not under law (the working of which has been explained above under  $2(\gamma)$ ), but under grace ; law only enslaves to sin ; but grace gives the quickening spirit and liberates.

Hence in the Christian religion, as St. Paul understood it, nothing statutory could have any place. To give a legal authority to any formal precept, ethical or ritual, is to shut the door of hope, and open again the door of despair. It is to contemn the Spirit, which is Christ's gift, and the cross, by which He won it, and to renounce the

liberty with which He has made us free. St. Paul was not an antinomian (for the just demand of the law is to be fulfilled in all Christians), but he was certainly an anomian. He recognizes no law in the Church but the law of the spirit of the life in Christ Jesus, and while that is both law and impulse it is essentially personal, and can never be reduced to statutory form. He can speak of Christianity indeed (to which circumcision is nothing and uncircumcision is nothing) as 'the keeping of the commandments of God,' 1 Co 7<sup>19</sup>; but all legalism is eliminated when the law is described as having its fulfilment in love, Ro 13<sup>10</sup>, Gal 5<sup>14</sup>, and 'the law of Christ' is explained as 'bearing each other's burdens,' Gal 6<sup>3</sup>. Legalism, in short, and Christianity (life in the Spirit) are to St. Paul mutually exclusive ideas; and though in a formally constituted society, i.e. in sense a corporation in the eye of the law, a legal creed and a legal organization might become necessary, the idea that the existence of Christianity depended upon them could only have seemed to him a fatal contradiction of all that Christianity meant.

(e) At the close of his third mission, St. Paul came again to Jerusalem. He had with him the collection from the Gentile Churches, and was most eager to maintain brotherly relations between the Gentile and the Jewish sections of Christendom, though he had grave misgivings as to what might happen. Cf. Ac  $21^{172}$ , 2 Co 8 and 9, Ro  $15^{2247}$ . The opposition to his 'lawless' Christianity, which had followed him in all his churches and been combated in his four great Epistles, had been busy in Jeru-salem also. The native Christians there were devoted in their attachment to the law in its They had been sedulously instructed ( $\kappa a \tau \chi \chi \gamma c$ ) sets that St. Paul was teaching the Jews who lived abroad to apostatize from the law, neither circumcising their children nor keeping the traditional customs. This was undoubtedly the logic of St. Paul's gospel, though there is no evidence, apart from this unscrupulous assertion, that St. Paul ever sought to denationalize his countrymen; and it is a fair question whether St. James and his elders did not ask him to do something which would leave an essentially false impression when they asked him to associate himself with certain men in a vow, that all might know that none of the things which they had been drilled to believe about him were true, and that he himself also in his conduct was an observer of the law  $(v.^{2a})$ . Probably, in yielding to this request, St. Paul was carrying to an extreme the conciliatory principles of 1 Co 9<sup>302</sup>; but the tumult which ended in his imprisonment and transference to Rome prevented any further development of the controversy about law between the apostle and the Jewish Christian party. (f) The later Epistles hardly enable us to add

(f) The later Epistles hardly enable us to add anything of importance. In Eph the law as a national institute—the law of commandments contained in ordinances, cf. Col 2<sup>14</sup>—is regarded as a dividing wall between Jew and Gentile; it has been broken down and annulled by the death of Christ, and with it the enmity which severed the two great branches of the human family; they are now one new man. In Col what St. Paul has to deal with is a movement which in its requirements resembles the ritualistic legalism with which he had been confronted in Galatia; the difference is that in Galatia the legalism attached itself directly to the law of Moses, in Colossæ it seemed to be connected with some philosophical or theosophical system, possibly of Essene affinities, and therefore more exacting in its demands than the letter of Moses' law. Cf. Col 2<sup>1667</sup>. St. Paul was equally irreconcilable to it in both cases, and for vot. 111.—6 LAW (IN NEW TESTAMENT) 81

the same reason. As dead with Christ, the Christian was dead to that whole mode of being, that whole conception of life, which allowed order to be prewhen the multiplied prohibitions, 'Touch not, taste not, handle not,' had no divine sanction (as the Mosaic law had) or even the pretence of it, but were merely a tradition of men. The conscience which has received the Spirit of Christ is shirking down the law for it. To be perfectly free, and to take the whole responsibility of freedom, is the only way to wholesome morality and to Christian sanctification. 'Therefore let no one judge you in eating or drinking, or in respect of a festival or new moon or Sabbath.' All laws and customs as such tend to extinguish the feeling of personal responsibility, to blunt the keenness of individual conscience : hence to bind them on the conscience, in their character as legal and customary, is anti-christian. In Ph 3<sup>1-11</sup> there is a sudden fierce flash, provoked we cannot tell how, of the ideas and temper that belong to the great controversial Epistles. In the Pastoral Epp., which represent a considerably later date, we can see that questions connected with law still engaged attention, though there is nothing indicative either of the passion or the interest in principle which characterize the earlier years of the apostle. Titus (3°) is warned to decline  $\mu d\chi ar$ rounds, as though the whole subject were prac-tically settled; and we catch the same half-con-temptuous tone in 1 Ti 1<sup>7</sup>, where persons are referred to, Judaizing no doubt, who wish to be rousδιδάσκαλοι though they have no idea of the functions It may be questioned whether the two of law. verses following come up to the insight of Ro 7, but they have their own truth, and probably served the writer's purpose. When the battle was prac-tically over, and the victory won, even St. Paul may have expressed himself in this almost indifferent commonplace; perhaps he despaired of gaining access to the general mind for any profounder statement of the truth. The legalism of the persons who forbade to marry and commanded to abstain from meats (1 Ti 4<sup>3</sup>) cannot have been Mosaic, but must have been of some philosophical type, akin to that found in Colosse.

III. THE LAW IN THE EPISTLE TO THE HEBREWS. The Pauline affinities of the Ep. to the Hebrews cannot be denied, but the conception of law in it is very different. Law here is sometimes expressly the law of Moses ( $7^{26}$  9<sup>19</sup> 10<sup>26</sup>), but it is regarded not so much as a set of statutes to be punctually obeyed, as a religious constitution under which the nation had to worship. Cf. the use of the verb rouo- $\theta$ ereir in 7<sup>11</sup> 8<sup>6</sup>. The fundamental idea of the book is that there is one people of God through all ages, though it has stood at different times in different relations to Him. Its relation to God, its nearness or distance, depends on the kind of priesthood it has; and when the priesthood is changed there is necessarily also a change of law: that is, the re-ligious constitution is altered, 7<sup>13</sup>. The old law the religious constitution under which the people of God lived when mediation was that of the Levitical priesthood—'made nothing perfect'  $(7^{19})$ ; there was no absolute or final religion then, no purgation of conscience, no sure immediate joyful access to God. Christianity, on the other handthe religious constitution under which the people of God live now, when mediation is that of the Melchizedek priest, the Son of God—is the  $\tau\epsilon\lambda\epsilon t$ work of what was promised of old. The new covenant is legally constituted on the basis of better promises (8<sup>8</sup>). It has, with the definite outline of reality, the good things of which the law had only a shadow (10<sup>1</sup>).

There is nothing in St. Paul which exactly

Digitized by Google

1.---0

corresponds to this: not even in Col 217, still less in what he says of the promise in Gal 3 or of the promises in 2 Co 1<sup>20</sup>. In fact, we do not find in St. Paul any conception of Leviticalism as possessing a religious significance, as dealing even in a pathetically disappointing way with spiritual necessities in man, which would find their adequate satisfaction only in Christ. In the Ep. to the Hebrews Christ is still regarded as making pro-pitiation for sins ( $2^{17}$ ), but His death is not put, so prominently as in St. Paul, in relation to the Law. Yet in 10<sup>667</sup>, where such emphasis is laid on Christ's obdimention of the such emphasis is laid on Christ's obedience, it is to be noted (see v.<sup>10</sup>) that the obedience required of Christ is specifically that of Bedence required of Christ is specifically that of a Redeemer: *i.e. ex hypothesi*, the obedience of One who becomes one with the sinful not only in nature but in experience and in lot (one of the leading thoughts of the Epistle, cf. 2<sup>10-18</sup>), taking on Himself their flesh and blood, their temptations and discipline, the whole burden, curse, and doom of their sins, and so setting them free. Yet the difference between the conception of Law here and in St. Paul is seen in this, that while St. Paul expresses the result of this redemptive death by suracour, in Hebrews it is expressed by ayajer. In other words, the result to St. Paul is that there is no condemnation, the claim of the Law against the individual is annulled; to the writer to the Hebrews the result is that worship is made possible ; the soul is able now, as it was not before, to draw near to God; true religion is put within its reach. This distinction justifies us, after all, in saying that the distinction between moral and ritual law belongs to the NT. St. Paul does mainly think of law as moral-God's demand for righteousness ; Hebrews thinks of it as ritual-the medium through which or the constitution under which we worship. But in both cases the law comes to an end with the gospel. Christ finishes it as a way of attaining righteousness, Ro 10<sup>4</sup>. Hebrews finishes it also as a mode of worshipping God, 13<sup>10π</sup>. IV. THE LAW IN THE OTHER NT BOOKS.

Among the remaining books of the NT, those which exhibit most indications of the controversy which had raged between Jewish and Gentile Christians are the Apocalypse and the Ep. of James. In the former  $(2^{23})$  the Church in Thyatira is threatened because it tolerates 'the woman Jezebel who . . . teaches and seduces my servants to commit fornication, and to eat things offered to idols,' i.e. to violate the compact of Ac 15<sup>20f.</sup>, cf. Rev 2<sup>24</sup>. There may have been a spurious, antinomian influence at work here, which appealed to St. Paul's name, but it is absurd (with Renan, Saint Paul, pp. 303, 367, L'Antechrist, p. 363 ff.) to regard this as a denunciation of St. Paul's doctrine. Although, too, the Apocalypse lays great stress on works, it never regards them as having the character of statutory acts of obedience : in other words, they are not legal. They are the works of Jesus (226), and are co-ordinated in 219 with love, faith, ministry, and patience (Holtzmann, NT Theol. i. 485). A favourite expression for the Christian life (the keeping of the commandments of God, 1217 1412, cf. ( $22^{13}$ ) is probably borrowed, like other things in the Apoc., from St. Paul (1 Co 7<sup>19</sup>). The conception of a reward ( $22^{13}$  11<sup>18</sup>) no more proves legalism in the author of this book than in Jesus Himself (Mt 5<sup>11</sup>). If there is a future which is determined according to man's works, and this is the teaching not of Apoc. only but of the whole NT, it is neither legal nor servile, but only sane to let it tell on the present life. In the Gospel of St. John the numerous references to the law, with the exception of 1<sup>17</sup>, have no religious interest; and there it is contrasted with the gospel as a less perfect revelation, grace and truth (הָקָר וְאָרָה) being the essential attributes of God.

The Ep. of James is more difficult. It has often been treated as a document of legal Christianity, the aim of which is to refute the Pauline doctrine of justification by faith apart from works of law. But it is remarkable that the critical passage  $(2^{14-36})$ , in which faith and works are discussed in their relation to each other, never once uses the Pauline expression  $\epsilon_{\rho\gamma\alpha}$  volue. If the writer is controverting St. Paul, it must be admitted that he has not grasped the Pauline point of view, and that Luther's verdict on his work was justified. His conception of faith is not the same as St. Paul's, and that is why he has to supplement it by works; and the works by which it is supplemented, and in which indeed it is exhibited, are not what St. Paul meant by works of law. They are not acts of obedience to any statutory embodiment of divine will. As illustrated in v.<sup>166</sup> they are rather what St. Paul would have called fruits of the Spirit. They are, if we choose to say so, the fulfilment of a law, but the writer takes care that we do not conceive the law legally. It is a law which must to be actually obeyed, no doubt, but it is also the law of liberty (1<sup>20</sup> 2<sup>13</sup>), which Christians freely and spontaneously fulfil; it is condensed, as in the teaching of Jesus, Mt 22<sup>20</sup>, into the 'royal law,' Thou shalt love thy neighbour as thyself; and it The law, in short, is the same as the is perfect. word of God, and to St. James this is not external and preceptive. There is a native affinity be-tween man and the word; when he receives it, it becomes an implanted word, a thing that strikes root in his nature and has power to save his soul  $(1^{21})$ . With this word God has begotten him; it is in his heart, as Jesus promises, spirit and life  $(Jn 6^{63})$ ; the law, that is, is impulse as well as law to the Christian, and the keeping of it is perfect freedom. Formally a contradiction of Paulinism, it is at bottom the same kind of ex-perience which is here described. To St. Paul Christianity is a new religious relation to God, which he defines by contrast to learning to St. which he defines by contrast to legalism; to St. James it is rather a new ethical life, which he describes in terms of law, but of law from which legalism has been eliminated. See, further, JAMES (EPISTLE OF).

The conception of St. James is that from which the phenomena of nascent Catholicism can best be understood, and this is a strong argument for putting the book late. In the other Catholic Epistles Law is not mentioned, but it is clear from Jude, 2 P and 1 Jn, that there were tendencies to antinomianism at work in many places. Such tendencies seem inseparable from every revival of religion, religion, as already remarked, transcending even while it guarantees morality. To counteract even while it guarantees morality. To counteract them without reintroducing legalism and lapsing from a Christian to a pre-Christian type of religion, was not easy; and the use of  $\nu \delta \mu \sigma \sigma$  by St. James, the habit of conceiving the OT as a revelation of God's will for the ordering of life, and of regarding Jesus as the Legislator by whom the revelation was made perfect, led inevitably and not slowly to the conception of Christianity itself as a new law. This conception is common to Christian writers from Barnabas onward. The new law might have been, and at first was, akin to 'the law of liberty' in St. James, 'the law of faith,' the law of Christ,' 'the law of the spirit of the life in Christ Jesus' in St. Paul; but as the Church became a State, and orthodoxy took the place of inspiration, the new law was correspondingly degraded, and in the early and the mediaval Catholic Church the very idea of spiritual liberty was lost. The religious idealism of St. Paul was far above out of its sight, and it was not till the Church was born again in the 16th cent. that the gospel, which brings a righteousness of God to which

82

works of law contribute nothing, fairly found access into the human mind.

access into the human mind. LITERATURE.—The NT Theologies of Baur, Weiss, Beyschlag, Holtzmann; Ewald, HI, vols. vi. vii. viii. of the Eng. tr.; Schurer, GJV3 ii. 464 ff. **LAWGIVER** occurs six times in AV of OT (Gn 49<sup>10</sup>, Nu 21<sup>18</sup>, Dt 33<sup>21</sup>, Ps 60<sup>7</sup> (Heb. 9) = 108<sup>6</sup> (Heb. 9), Is 33<sup>22</sup>) and once in NT (Ja 4<sup>12</sup>). In the OT it is the tr<sup>a</sup> of ppro, in NT of *rouodérys*. The root ppn means 'to cut in,' 'inscribe,' 'engrave,' and hence, from the practice of inscribing a decree (pn, npn) upon tablets [see LAW (IN OT) above, p. 67<sup>-</sup>], 'to enact or command.' Thus we find in Jg 5<sup>5</sup> yry: 'ppn = 'the commanders of Israel.' The *Poid* ptep. ppro appears to have two distinct senses: (a) that of 'leader,' 'commander' ('lawgiver' is too narrow a term, especially as in the mind of the English reader it is associated so closely with the *Mosaic* law). This is the meaning of the word in Dt 33<sup>21</sup> ('a commander's portion was reserved'), where it is used of the leader of the warlike tribe of Gad; in Jg 5<sup>14</sup> ('out of Machir came forth leaders' [orppn] of v.<sup>9</sup>]); and in Is 33<sup>22</sup>, where uppro 'our lawgiver' (LXX  $dp\chi \omega_P$ ) is used in parallelism with uppe' our judge' and uppo 'our king.' (b) The other meaning which it appears to be necessary to postulate is that of 'ruler's or commander's staff,' which it would bear in Gn 49<sup>10</sup> (where ppin j sparallel with  $2p\dot{v}$ ), 'The [royal ! sceptre shall not depart from Judah nor the ruler's staff from between his feet'; in Nu 21<sup>12</sup> ([1 np $z\dot{z}\phi$  'staff'), where RV 'with the sceptre ' is plainly more appropriate as a rendering of pprop than AV and RVm 'by direction or order of the lawgiver' (LXX ér  $\tau \hat{y} \beta a \sigma \lambda cia a \dot{u} \sigma \omega^{*}$ , Vulg. in datore leavis); and in Ps 60<sup>7</sup> = 108<sup>6</sup> 'Judah is my sceptre,' although LXX has  $\beta a \sigma \lambda cis'$  'king' (similarly Pesh. and Vulgate).

notes, further, that similar insignia of authority are still carried by the Bedawin sheikhs and headmen of villages, and considers that the idea of a sitting figure, with the staff held between the feet, as seen in some ancient sculptures, does not harmonize so well with the context which suggests movement. In any case the meaning of the couplet, 'The sceptre shall not depart from Judah nor the ruler's staff from before him,' appears to be that Judah is to retain the hegemony among the tribes of Israel (or probably the royalty [note  $p_{2^{ij}}$  absolutely]),  $\pi c' c' cx w' c'$ , above all, Driver in Camb. Journ. of Philology, xiv. (1885), and in Expositor, July 1885, p. 10ff. See also Dillm. and Spurrell, ad loc. The only NT occurrence of 'lawgiver' is, as we have said, in Ja 4<sup>10</sup>, where  $roguo\theta errs$  is coupled with cartier they term being used of God as at

The only NT occurrence of 'lawgiver' is, as we have said, in Ja 4<sup>12</sup>, where  $vo\mu o\theta \epsilon rrrs$  is coupled with  $\kappa \rho \iota \tau r s$ , the two terms being used of God as at once the Supreme Lawgiver and Judge. This is the only instance in which  $vo\mu o\theta \epsilon r t$  is used in the NT, although the verb  $vo\mu o\theta \epsilon r t$  occurs in He 7<sup>11</sup> 8<sup>6</sup> and the noun  $vo\mu o\theta \epsilon r t$  occurs in He 7<sup>11</sup> 8<sup>6</sup> and the noun  $vo\mu o\theta \epsilon r t$  or 0<sup>4</sup>, in all these three passages the reference being directly or implicitly to the giving of the law to Israel.

On the work of Moses as the lawgiver of Israel see LAW (IN OT), above, p. 66, and MOSES.

J. A. SELBIE. LAWYER (rounds). - In the NT the name usually given to the scribes is  $\gamma \rho a \mu \mu a \tau \epsilon \dot{v} s$  (man of letters); but  $v \rho \mu \kappa \dot{v} s$  ('lawyer') and  $v \rho \mu o \delta \dot{v} \delta d \sigma \kappa a \lambda o s$  ('doctor of the law') are also occasionally used. Of the two latter terms, the second is found only in Lk 5<sup>17</sup>, Ac 5<sup>34</sup>, and 1 Ti 1<sup>7</sup> (where it is used of would be teachers of the law in the Christian Church); while the first occurs most frequently in Lk ( $7^{20}$  10<sup>20</sup> 11<sup>45, 45, 52</sup> 14<sup>3</sup>), once in Mt (22<sup>36</sup>), and nowhere else in the NT except in Tit 3<sup>13</sup>. A com-parison of Lk 5<sup>17</sup> with v.<sup>21</sup> and Mk 2<sup>6</sup> Mt 9<sup>3</sup> shows that the three terms were used synonymously, and did not denote three distinct classes. The scribes were originally simply men of letters, students of Scripture, and the name at first given to them contains in itself no reference to the law; in course of time, however, they devoted themselves mainly, though by no means exclusively, to the study of the law; they became jurists rather than theologians, and received names which of themselves called attention to that fact. Some would doubtless devote themselves more to one branch of activity than to another; but a 'lawyer' might also be a 'doctor'; and the case of Gamaliel shows that a 'doctor' might also be a member of the Sanhedrin (Ac 5<sup>34</sup>).

Long before the time of our Saviour, the law, written and oral, had become the absolute norm of Jewish life. Every detail of life, civil as well as religious, was regulated in the minutest manner by the law. It was impossible for the ordinary Jew to be fully acquainted with the innumerable statutes referring, e.g., to Levitical purity or the keeping of the Sabbath, and to apply them to the fresh cases that emerged daily; and yet his standing before God depended upon his scrupulous observance of these statutes. It was absolutely necessary, therefore, that a special class of men should devote themselves expressly to the study of the law. These were the 'scribes,' 'lawyers,' or 'doctors of the law.'

(a) Their first and main function was to study and expound the law, including the innumerable 'traditions of the fathers'; they had so to explain it as to show its application to the circumstances of the present time; for every new case that occurred they had to find out some pertinent statute or precedent; and, in the absence of such a statute or precedent, they had to deduce some rule from their knowledge of what was legal.

83

84

They were thus men whose special calling it was to know what was legal.

(b) Their special knowledge of the law naturally qualified them for holding the office of judge; and in all probability the members of the various Sanhedrins throughout the country were chosen, From such passages as Mt  $16^{21} \ 20^{18} \ 21^{15} \ 27^{41}$ , Mk  $8^{31} \ 11^{27} \ 14^{43.45} \ 15^{1}$ , Lk  $9^{22} \ 20^{1} \ 22^{66}$ , Ac  $4^{5}$ , in which they are named among the supreme Jewish authorities, it is evident that some of them were members of the Sanhedrin in Jerusalem. Though they had no official standing in the synagogues, their knowledge of the Scriptures generally and of the law in particular would lead to their being the principal speakers in religious assemblies (Mk  $1^{22}$ ). (c) The teaching of the law was also one of their

essential functions. In the time of our Saviour there were special academies (beth hammidrash) in various parts of the Jewish world; in Jerusalem certain halls and rooms of the outer court of the temple were set apart for this purpose (cf. Lk 246). The pupils sat in a semicircle round their teacher, who also sat on a slightly raised bench. The teaching was mostly oral and catechetical; it consisted mainly of a constant repetition of the various 'traditions of the fathers' dealing with all manner of real and imaginary cases; the pupils were encouraged to put questions to their teachers; they also attended the discussions that leading Rabbis held among themselves, and were probably also allowed to be present at meetings of the Sanhedrin.

For their judicial and teaching activity the 'lawyers' or 'doctors' were understood to receive no payment. Some of them would therefore maintain themselves by following a trade (cf. Ac  $18^3$ ), and doubtless many men of means would doubt the effect of the second seco adopt a profession which was almost universally held in the very highest esteem. They were not, however, always so unselfish as Jewish sources represent them (cf. Mk 12<sup>40</sup> = Lk 20<sup>47</sup>). They were also exceedingly ambitious of honour (Mt 23<sup>5-11</sup>, Mk 12<sup>38, 39</sup>, Lk 11<sup>45, 45</sup> 20<sup>46</sup>). More especially they demanded, and received, such honour from their variation of the more than the more than the second secon pupils. According to the Talmud, one's teacher is to be more reverenced and honoured than one's father, if the latter is not also a man of learning; for his father has only brought him into this world, while his teacher, who teaches him wisdom, brings him to life in the future world' (quoted in Schürer, *HJP* II. i. 317). See, further, art. SCRIBES.

D. EATON.

**LAY.**—An abrupt use of the simple verb to lay is found in Mt 8<sup>14</sup> 'He saw his wife's mother laid, and sick of a fever.' It is a literal tr. of the Gr.  $\beta\epsilon\beta\lambda\eta\mu\epsilon\eta\nu\kappa$  al  $\pi\nu\rho\epsilon\sigma\sigma\sigma\sigma\sigma\mu$ ; RV gives 'lying sick,' ignoring the  $\kappaai$ . The full form occurs in Mk 7<sup>30</sup> 'She found the devil gone out, and her daughter laid upon the bed' (βεβλημένην έπι της κλίνης (edd. το παιδίου βεβλημένου έπι την κλίνην)). Cf. Ac 13<sup>36</sup> Latti upon vie bet (pepaquery ent 19 kalvys (edd.  $\tau \delta$  maidior  $\beta \epsilon \beta \lambda \eta \mu \epsilon \nu or \epsilon \pi i$   $\tau \eta \nu \kappa \lambda (\nu \eta \nu)$ ). Cf. Ac 13<sup>36</sup> 'David . . . fell on sleep, and was laid unto his fathers' ( $\pi \rho o \sigma \epsilon \tau \epsilon \theta \eta$   $\pi \rho \delta s$   $\tau o \delta s$   $\pi a \tau \epsilon \rho a s$   $a \delta \tau \sigma \delta$ ). Hall, Works, ii. 52, says, 'His servant is sick ; he doth not drive him out of doores, but layes him at home.'

The simple verb to lay is used in Jon 3<sup>6</sup> in the sense of 'lay aside,' 'He arose from his throne and he laid his robe from him.' The expression is irregular, and due to the word 'from' following.

To lay means to 'impute' in Job 2413 'God layeth not folly to them' (or , , , RV 'impute it not for folly'; cf. 1 S 22<sup>16</sup> 'Let not the king impute anything unto his servant,' Heb. OF , ) So Jonson, Sejanus, ii. 1-

'So prepare the poison As you may lay the subtle operation Upon some natural disease of his.'

Some phrases demand attention : 1. Lay along, see ALONG. 2. Lay apart, Ja 1<sup>21</sup> 'Wherefore lay apart all filthiness'  $(4\pi o\theta \ell \mu eros, RV$  'putting away,' a metaphor from the putting off of clothes – Mayor). 3. Lay at, meaning 'strike at,' Job 41<sup>38</sup> 'The sword of him that layeth at him cannot hold.' Cf. Holland, Suetonius' Caligula, c. 25, 'With her perilous fingers shee would not sticke to lay at the face and aves of other small Children to lay at the face and eyes of other small Children playing together with her.' **4.** Lay away, i.e. lay aside, Ezk 28<sup>16</sup> 'Then all the princes of the sea shall come down from their thrones, and lay away their robes'; Ad. Est 14<sup>2</sup> 'Esther . . . laid away her glorious apparel.' Cf. Spenser, FQ I. viii. 49-

'Such the sight Of fowle Ducasa, when her borrowed light Is laid away, and counterfessance knowne.

5. Lay down, meaning to stake or deposit, Job 17<sup>4</sup> 'Lay down now ( $\kappa$ )  $\pi_{2}$ 'c, RV 'Give now a pledge'), put me in a surety with thee.' Cf. Is 14<sup>15</sup>, Cov. 'Yet darre I laye, that thou shalt be brought downe to the depe of hell.' 6. Lay hands on. The verb  $\kappa_{\rho ar \ell \omega}$  'to gain power over,' 'seize,' is so tr<sup>4</sup> in Mt 18<sup>30</sup>. 21<sup>40</sup>, and  $\pi_{id} \ell \omega$  'to seize,' 'capture,' in Jn 8<sup>30</sup>. For  $\kappa_{\rho ar \ell \omega}$  RV prefers the more modern 'lay hold of,' and for  $\pi_{id} \ell \omega$  'take.' 7. Lay open, Pr 13<sup>16</sup> 'A fool layeth open his folly' (RV 'spreadeth out,' as AVm). Cf. Fuller, Holy Warre, v. 2 (p. 231), 'I will lay open my cause, and justice shall be done without any by -respect.' 8. Lay out, 5. Lay down, meaning to stake or deposit, Job 17<sup>2</sup> be done without any by respect.' 8. Lay out, 2 K 12<sup>11</sup> 'And they gave the money, being told, into the hands of them that did the work ... into the hands of them that did the work . . . and they laid it out to the carpenters and builders,' a compromise between the Gen. version ' payed it out' and the literal tra ' brought it forth,' RV ' paid it out.' 9. Lay wait occurs often. The more modern form 'lie in wait' is also found, as well as 'laying await' and 'laying of wait.' See WAIT. J. HASTINGS.

LAYING ON OF HANDS (*tribeous xeipar*, Vulg. impositio manus or manuum), Ac 8<sup>15</sup>, 1 Ti 4<sup>14</sup>, 2 Ti 1<sup>6</sup>, He 6<sup>2</sup>.—The ceremony thus described is men-tioned frequently both in OT and NT, where it appears in connexion with religious acts of widely different character.

i. OLD TESTAMENT.—(a) It occurs as a symbol of benediction in Gn  $48^{14ff.}$  'Israel stretched out or benediction in Gn  $43^{\text{var.}}$  "Israel stretched out his right hand and laid it  $(n\psi_1, \epsilon\pi\epsilon\beta\lambda\epsilon\nu^*)$  upon Ephraim's head... and Joseph said... Put  $(\alpha\psi_1, \epsilon\pi\iota\theta\epsilon_2)$  thy right hand upon his (Manasseh's) head.' In giving the high priestly blessing to the con-gregation 'Aaron lifted up his hands toward the people' (Lv  $9^{22} \kappa\psi_1, \epsilon\xi\delta\rho\alpha_2$ ); but the action, though ritually distingt to score head in this case. ritually distinct, seems to have had in this case the same significance as the imposition of hands upon an individual (cf. Nu  $6^{cr}$  erchrower rdupon an individual (cf. Nu  $6^{27}$  erithrows:  $r \rightarrow \delta^{570\mu\dot{a}} \mu_{00} e^{i\eta} robs viols' lopath, kal eyà Kópios evloythrows$ avrois). (b) The laying on of hands occupies an important place in the sacrificial system of**P**(Ex 29<sup>10, 15, 19</sup>, Lv 1<sup>4, 11</sup> (LXX) 3<sup>2, 8, 13</sup> 4<sup>4, 24, 25</sup>, 28 git-is16<sup>21</sup>; cf. 2 Ch 29<sup>22</sup>). It is prescribed in the case of(1) the bullock and the rams offered at the conse-cration of Asraw and his case of 0 raise to findcration of Aaron and his sons; (2) private offerings of quadrupeds on all occasions; ‡ (3) sin offerings

iniBalur the gupes usually-in the NT always-implica hostile action. † Cf. Dict Chr. Ant. i. p. 757 f. ‡ See Dillmann on Ly 1<sup>4</sup> 73.

made on behalf of the whole congregation, in the event of a common  $a\gamma \nu \delta \eta \mu a$ ; (4) the goat 'let go for Azazel.' (c) Witnesses laid their hands on the for Azazzet. (c) witnesses and their hands on the head of a person charged with a capital offence (Lv 24<sup>14</sup>, Sus<sup>34</sup>). (d) The tribe of Levi at their dedication received imposition of hands from repre-sentative members of the other tribes (Nu 8<sup>10</sup>). (c) Moses appointed Joshua to be his successor in the same manner (Nu 27<sup>18, 33</sup>, Dt 34<sup>9</sup>). In all these cases except (a), 700, LXX étriribérai, is used. It is not easy to graan the common idea which

It is not easy to grasp the common idea which underlies the various OT uses of this primitive ceremony. In (a) and (e) the laying on of hands seems to denote the imparting of a personal gift or function; see Dt, *l.c.* 'Joshua. . . . was full of the spirit of wisdom, for Moses had laid his hands upon him.'\* But in (b), (c), (d) the prominent thought is that of the devotion to God of the object on which hands are laid, to which must perhaps be dded in the sec of metric of frames the ide of a added in the case of certain offerings the idea of a transfer of responsibility or guilt to the victim (Lv 16<sup>21</sup>: cf., however, Schultz, OT Theology, Eng. tr. i. p. 391 ff., and W. R. Smith, RS<sup>2</sup> p. 422 f.). On the whole, it would appear that the fundamental meaning of the symbol was identification by con-tact, with the subsidiary idea of transference, whether from man to man, or from man to God. By laying his hands on a child or disciple, the patriarch or prophet signified that he desired to impart to the younger life powers or gifts which had been committed to himself; by laying his hand on an offering, the offerer solennly identified himself with the victim which he dedicated to the service of God; by laying their hands on the head of a criminal, the witnesses of the crime delivered him over to judgment.

ii. NEW TESTAMENT. - (a) This symbol was once employed by our Lord in an act of benedic-tion (Mt  $19^{13}$ .<sup>15</sup>=Mk  $10^{13}$ .<sup>16</sup>=Lk  $18^{15}$ ): 'then were there brought unto him little children that he should lay his hands on them and pray . . . and he laid his hands on them.' As the desire originated with the friends of the children, it must have had its origin in the custom of the time (cf. Buxtorf, de Synag. p. 138). The blessing of the ascending Lord was given to the Eleven in the manner pre-scribed to Aaron (Lk  $24^{00} \notin \pi d_{pas}$  rds  $\chi e_i \rho as a \dot{\sigma} ro \ddot{v}$  $e\dot{v} \lambda \sigma \gamma \sigma c e^{i\lambda} \sigma \gamma \sigma c s$ , (b) Our Lord habitually laid His hands on the sick as a sign of healing (Mt  $9^{18}$ = Mk  $5^{22}$ , Mk  $6^{2}$   $7^{23}$   $8^{26}$ . 25, Lk  $4^{40}$   $(3^{13})$ ; we may probably add the passages where  $\delta \pi \tau \epsilon \sigma \theta a_i$  is used in similar contexts with or without  $\epsilon \kappa \tau \epsilon t r a_i \tau \tau \chi \epsilon \tilde{\rho} a_i$ (Mt 8<sup>3</sup> = Mk 1<sup>41</sup>, Lk 5<sup>13</sup>, Mt 8<sup>15</sup> 9<sup>29</sup> 20<sup>34</sup>, Mk 7<sup>35</sup>, Lk 22<sup>54</sup>).<sup>4</sup> This practice was continued by the apostles and their followers ('Mk' 16<sup>18</sup>, Ac 9<sup>12, 17</sup>; cf. Iren-æras, ap. Eus. HE v. 7, robs  $\kappa \delta \mu \omega \sigma r a_i$   $\delta t r \tilde{\sigma} r \tilde{\sigma} \nu$  $\chi \epsilon \mu \delta \sigma \epsilon \sigma s t \delta \sigma r a_i$ ). (c) The Apostles used the laying on of hands with prayer in the act of im-parting the Holy Spirit to the baptized (Ac 8<sup>17, 19</sup> 19<sup>9</sup>). The Lord had breathed upon them when He communicated the Spirit (Jn 20<sup>29</sup>), and this  $\delta u d \delta \sigma \sigma \sigma s$ . ably add the passages where  $d\pi\tau\epsilon\sigma\theta a\iota$  is used in in communication on the spin of the spin was incommunicable, no attempt was made to repeat it; when the Apostles passed on to other believers the gifts which they had received, they were guided to the ordinary symbol of benediction. It is to this use of the imposition of hands that reference appears to be made in He 6<sup>2</sup> βαπτισμῶν διδαχήν ἐπιθέσεώς τε χειρῶν (cf. v.  $^4$  φωτισθέντας γευσα-

<sup>•</sup>A somewhat different account appears in Nu 27<sup>18</sup>, 'take thee Joshua... a man in whom is the spirit [lik. 'there is spirit,' i.e. the necessary endowment for the office in view], and by thine hand upon him.'  $\dagger$  In several of these instances hands were laid upon the part affected and not upon the head. The communication of bealing power by contact (Mk 5<sup>100</sup>.) is probably the thing signified.

μένους τε τῆς δωρεῶς, κ.τ.λ.). (d) The imposition of hands was also used by the Apostolic Church on certain occasions when members of the Church were set apart to a particular office or work (Ac  $6^6$  13<sup>3</sup>, 1 Ti  $4^{14}$ , 2 Ti  $1^6$ ). The occasions specified are those of the appointment of the Seven, the sending forth of Barnabas and Saul, and the subsequent sending forth of Timothy to accompany St. Paul (Hort, Ecclesia, p. 215 f.). Of the use of the rite in the ordination of presbyters and deacons there is no direct evidence, if we except 1 Ti  $5^{22}$  (on which see below); for in Ac  $14^{23}$   $\chi \epsilon_{i}\rho\sigma\sigma\sigma\epsilon\hat{\nu}$  doubtless refers to the election of presbyters in the various churches, and not to the ceremony of their admission to office. Nevertheless, as Dr. Hort points out, 'Jewish usage in the case of Rabbis and their disciples \* renders it highly probable that (as a matter of fact) laying on of hands was largely practised in the Eoclesize of the apostolic age as a rite introductory to ecclesiastical office.' In the rite introductory to ecclesiastical office.' post-apostolic Church the rite was practically universal; the exceptions which have been observed admit of an intelligible explanation.+ (e) The context of 1 Ti 522 (xeipas raxews underl entriber, unde convert of 1 1  $b^{-1}$  (genus rates) has led some eminent expositors (Hammond, Ellicott, Hort) to see in that verse a reference to the use of the imposition of hands in the reconciliation of penitents. The custom was undoubtedly early, if not primitive; cf. Eus. HE vii. 2; Const. Ap. ii. 41; Cypr. de laps. 16, ep. 15. On the other hand, the main current of patristic interpretation is against this explanation of St. Paul's words, and it is not impossible to explain them in reference to ordina-tion without doing violence to the context; see, e.g. Theod. Mops. ad loc. : 'non facile ad ordinationem quemquam producas sine plurima probatione . . . si (inquit) te ut convenit probante ille deliquerit, non est tuum crimen.

For the post-apostolic history of the ceremony see Morinus, de Ant. Eccl. Rit. (passim); Suicer, Thes. s.vv. xeipororéw, xeipobesta; Dict. Chr. Ant. art. 'Imposition of Hands'; Mason, Relation of Confirmation to Baptism. H. B. SWETE.

LAZARUS OF BETHANY.—The name Lazarus is an abbreviation of the Heb. Eleazar='God hath helped.' In the LXX we find both 'Eλεαζάρ and 'Exedjapos; in Josephus commonly 'Exedjapos. But Adjapos occurs BJ v. xiii. 7 All that we know of L. is told us in the Fourth

Gospel. He was the brother of Martha and Mary, who are mentioned by both St. John and St. Luke. In Jn 11<sup>6</sup> the names are probably given in order of age, 'Martha, her sister, and Lazarus.' In both Gospels Martha seems to be the eldest, and the does not mention L. points to his being younger. and perhaps much younger, than his sisters. All three were specially beloved by Christ (Jn 11<sup>5</sup>). We know that He visited them more than once (Lk 10<sup>38-42</sup>, Jn 11<sup>1-53</sup>), and it is probable that He often did so when He was at or near Jerusalem. They were probably well-off. The number of condoling friends from the city, and the costly ointment used by Mary, point to this. That they had a funeral vault of their own may be true, but is not stated. Luke does not give the name of the village in which they lived, probably because it was not stated in the source which he used; but John tells us that it was Bethany, which is barely two miles from Jerusalem. He calls L. 'a certain

\* See Buxtorf, Lez. Chald. et Talm. s.v. הקיסָרָ; Hamburger, Real-Encyclopädie, s.v. 'Ordinirung': a Rabbi could make his scholar a Rabbi by the use of a formula which was ordinarily accompanied by imposition of hands. † On the occasional omission of the ceremony in the ancient Church (Hatch, Organization, p. 1381, See T. A. Lacey, L'impo-sition des mains dans la consécration des évégues, Paris, 1896.

85

86 LAZARUS OF BETHANY

man, Lazarus of Bethany, the village of Mary and her sister Martha' (11<sup>1</sup>). There has never been any doubt about its site, and the modern name is derived from Lazarus — *El-Azerijek*, or *Lazariek.*<sup>\*</sup> Here Christ raised Lazarus from the dead. Here Mary anointed His feet. Here He began His triumphal entry into Jerusalem. Here He rested during several of the days before His Passion. And from some spot near to Bethany He ascended into heaven. L. was sitting at meat with Him when Mary anointed His feet, and his presence attracted many of 'the common people of the Jews' to the village, that they might see, not only Jesus, but the man whom He had raised from the dead : and the hierarchy in their plots against Christ 'took counsel that they might put L. also to death, because that by reason of him many of the Jesus called L. out of the tomb were enthusiastic in bearing witness during the triumphal procession, and attracted others from the city to meet Him (Jn 12<sup>17.16</sup>).

Here all that we know about L. ends. The chief interest in the brief account of him lies in the miracle of which he was the subject. The raising of L. is commonly regarded as the climax of Christ's miraculous activity; and perhaps no portion even of the Fourth Gospel has been more vigorously assailed by hostile critics. Not only the miracle as a whole, but a large number of the details, have been made the objects of rigorous and minute criticism. It would be hardly too much to say that every objection, reasonable or unreasonable, that ingenuity could devise has been urged. And the reason for this is intelligible. The consequences of the truth of the narrative are so considerable. Spinoza is said to have declared that, if he could be convinced of the truth of the raising of L., he would break up his system and become a Christian (Bayle, *Dict. s.v.*). That is not a logical statement, for the Christian faith depends, not upon the raising of L., but upon the resurrection of Jesus Christ. Yet such a declaration shows that, as at the time when it was wrought, a miracle of this character is capable of exercising a mighty influence upon the intellects and hearts of men. It cannot fail to raise the question, 'What manner of man is this, that even death and the grave obey Him ?'

The two most reasonable objections to the narrative as a whole are (1) the silence of the Synoptists, and (2) the amazing character of the miracle. It will be best to take them in this order; for injustice may be done by taking the second to augment the weight of the first. It may be doubted whether any one evangelist was ever induced to record any particular miracle by the thought that it was of a specially surprising character. They give us samples of *all* Christ's mighty works, especially those which had a marked effect upon His disciples and other hearers.

(1) The difficulty respecting the silence of the Synoptic Gospels as to the raising of L. has been seriously exaggerated even by apologists. Thus Trench says, 'It must always remain a mystery why this miracle, transcending as it does all other miracles which the Lord wrought, so memorable in itself, drawing after it the consequences which it did (Jn 11<sup>13</sup>), should have been passed over by the three earlier evangelists' (Miracles<sup>8</sup>, p. 394). The Synoptic Gospels have been more minutely studied since these words were written (1846), and the fact that in the main they give us

\* Schwarz seems to be alone in disputing the site; but many modern travellers are incredulous about the vault at the bottom of 26 steps, in the middle of the village, which is shown as the tomb of Lazarus.

# LAZARUS OF BETHANY

one and the same tradition, and that a very frag-It has been seen that this common fragmentary record has preserved hardly any particulars about the interval between the close of the ministry in Galilee (which is its chief theme) and the last Passover. St. Luke alone has done anything considerable to fill this blank, and the silence of the Synoptists should rather be called 'the silence of St. Luke.' And here again a similar explanation is applicable. 'The great intercalation' in the third Gospel  $(9^{61}-18^{14})$  is itself very fragmentary, and seems to come from more than one source; and there is nothing very astonishing in the fact that St. Luke had no source which mentioned the raising of Lazarus. Indeed there is nothing unreasonable in the conjecture that, if he had used a source which mentioned it, he would still have omitted it; for he had already recorded two instances of Christ performing this miracle. And we misunderstand Jn 11<sup>33</sup> if we suppose that it was the raising of L. which determined the hierarchy to put Jesus to death. Some time before this His enemies decided to kill Him, and tried to do it, as St. John himself tells us  $(7^{1.29}, 35.44)$ 8<sup>59</sup> 10<sup>51</sup>, and even in this very narrative 11<sup>5. 16</sup>). The raising of L. was the cause, neither of the enthusiasm of the people at the triumphal entry, nor of the deadly hostility of the priests. It merely augmented the one and quickened the activity of the other. Both would have existed and have been efficacious, even if L. had not been raised. None of the evangelists need the story of L. to make the narrative intelligible. John, knowing that the others had omitted it, tells us what he himself had heard and seen. It was of special interest to him, because of its effect in converting some of 'the Jews'; and he had recorded no other instance of Christ's raising the dead.

(2) Is it correct to say that the raising of I. 'transcends all other miracles which the Lord wrought'? It would be safer to affirm that it seems to us to transcend them. But is this view correct? In the main it is a modern view. To us raising the dead seems to be a miracle swi generis; and raising a man who has been dead four days seems to be a stupendous instance of a stupendous kind of miracle. But to the philosophic believer in miracles all genuine miracles are alike. When natural causes are inadequate and a supernatural cause is admitted, all degrees of dificulty are excluded. One who has Omnipotence to aid him cleanses lepers and raises the dead as easily as he heals ordinary diseases. If any miracle is credible, raising a man who has been dead four days is credible. It is illogical to say that the evidence would warrant us in believing a miraculous cure, but does not warrant us in believing in the raising of a dead man.

The objection, that Jn 11<sup>47-59</sup> is inconsistent with the fact that in accusing Jesus before the Sanhedrin and Pilate no mention is made of the miracle, is not reasonable. It would have paralyzed the Sanhedrin to admit that Jesus had worked such a sign. The dismay of the priests at the miracles, and their silence about it at the trial, are entirely consistent.

Some of the criticisms of the details require notice. Very different views are taken about the 'four days' (see Andrews, *Life of our Lord*, p. 405). Probably L. died the day that Jesus heard of his illness, and was buried almost immediately (2 K  $9^{24}$ , Ac  $5^{6-10}$ ). This would be all the more necessary if he died of some infectious disease. Then, after two days (11<sup>6</sup>), Jesus set out for Bethany, and was part of two days on the road. But this is unimportant. It is urged that His wais-

# LAZARUS OF BETHANY

ing two days and allowing L. to die, in order to prove the sisters and reveal His own glory more signally, was heartless. So far as we know, He did not act thus. Had He started at once, He would probably have arrived too late to see L. alive. 'But he could have healed him from a distance.' No doubt He could, if it had been (od's will. But He ever worked in accordance with the divine plan; and in this plan the raising of L. was to do three things: (a) strengthen the disciples' faith; (b) convert many of the Jews; (c) cause the priests to hasten their movements, so as to be ready when 'his hour had come' (11<sup>13. 43. 43</sup>). Healing L. from a distance would have been less efficacious for the first of these, and would have done little towards the other two.

The indignation and sorrow attributed to Him  $(11^{32.35})$  are said to be unworthy of the incarnate Logos. Evidently St. John, the exponent of the Logos doctrine, did not think so. To those who believe in the reality of Christ's humanity there is nothing strange in His being angered by the hypocritical wailings of His enemies, and shedding tears of sympathy with the sisters  $(11^{39})$ .

We are told that  $\vartheta \delta \eta$  sites (11<sup>20</sup>). We are told that  $\vartheta \delta \eta \delta \delta \eta$  (11<sup>20</sup>) expresses, not merely Martha's expectation, but a fact. And are we prepared to maintain that Christ restored a putrid corpse to life? The reply to which is, that we have no right to dogmatize, but that we have full right to believe that God, who had determined that L. should be raised, had preserved his body from corruption.

When the stone was raised, Jesus lifted up His eyes to heaven and said, 'Father. I thank thee that thou didst hear me' (11<sup>41</sup>). It is maintained that such words on the lips of the God-Man are unreal. Only those who think that the incarnation involves the extinction of the human nature by the divine can so think. Christ here intimates whom they have to thank for the immense mercy that is before them. The Son can do nothing of Himself; His power is from the Father  $(5^{10-26})$ . The words are parallel to 'declare how great things God hath done for thee' (Lk  $8^{26}$ ).

Our intellectual difficulties would not be at an end if we were to admit that no such miracle ever took place. The hypothesis that the story is a fiction is quite incredible. The narrative holds together with the closest consistency  $(11^{1-16}$  and  $1^{n-36}$  with <sup>30-41</sup>); and the story as a whole not only harmonizes with what follows, but explains it section by section  $(11^{45-45} \cdot 4^{-17} \cdot 12^{1-5} \cdot 9^{-11} \cdot 12^{-19})$ . The people who take part in it are intensely real, and quite beyond the evangelist's powers of invention. In particular, the characters of the two sisters are not only very true to life, but receive remarkable confirmation from the entirely independent sketch of them by St. Luke  $(10^{36-43})$ . There, in utterly different circumstances, the practical Martha and contemplative Mary are as real as in St. John's narrative. The only reasonable explanation of the harmony between the two pictures is that both are taken from life (Lightfoot, *Biblical Essays*, p. 38; Fairbairn, *Expositor*, Ist series, ix. p. 189). The narrative with its evidence of the miracle

The narrative with its evidence of the miracle is there, and must be explained. How did the report of such an event arise? We have our choice of various suggestions. (1) The old Rationalism offers us a remarkable coincidence. L. was in a trance, from which he was recovering just as Jesus reached the tomb. When the stone was removed, Jesus perceived that he was not dead, and cried, 'Lazarus, come forth.' (2) Renan sees clearly that something really did take place at Bethany which was looked upon as a resurrection; but he rejects the idea of mere coincidence. The family of devoted disciples arranged that L. should pretend to be dead, in order that Jesus might 87

overwhelm His foes by seeming to restore him to life: and Jesus allowed Himself to take part in this imposture. (3) Keim regards the whole as undoubtedly a fiction, made up largely of Synoptic materials, and composed partly as a great final picture of Christ's powers, partly as an exposition of His saying that Jews who did not listen to Moses and the prophets would not be persuaded though L. rose from the dead (Lk  $16^{31}$ ). It is a parable translated into fact. (4) Others take a similar view, but differ as to the central germ. These make the whole story an allegorical illus-tration of Christ's declaration, 'I am the Resur-rection and the Life,'etc. (Jn 11<sup>28</sup>), which is the one rection and the Life, etc.  $(Jn \Pi^{-2})$ , which is the one substantial factor in the composition. (5) Strauss falls back on his usual expedient of treating the narrative as a myth. There are many variations in explaining details, but these five are typical of the expedients employed by those who regard a miracle as wholly incredible. Each person must judge for himself whether any of these explana-tions is more astisfactory them a helief in the tions is more satisfactory than a belief in the reality of the miracle. The first two are revolting even to those who hold that Jesus was only the best man who ever lived, and they entirely fail to explain either  $11^{1-16}$  or  $1^{7-36}$ . The others ascribe to the evangelist a creative power which would be a miracle in the literature of that age. For, even if he got some ideas from the other Gospels or from popular imagination, the form of the narrative, with its impressive reality and vividness, its internal consistency and its harmony with the rest of the Gospel and with St. Luke, is his own. The Apocr. Gospels show us what kind of stories early Christians could invent, when they tried to add to what was known about Christ. 'No narrative of NT bears so completely the stamp of being the very opposite of a later invention' (Meyer, *ad loc.*). 'The Johannine narrative is both unexplained and inexplicable, unless its historical character be accepted' (B. Weiss, *Leben Jesu*, bk. vi. § 6). In particular, the silence of the narrative is as impressive as its contents, and is in marked con-trast to fiction. Nothing is told us of the emotions trast to fiction. Nothing is told us of the emotions or experiences of Lazarus. No word of his is recorded. Not even his amazement, or joy, or trouble at being restored to life is described; and he makes no revelations about the other world. Would a writer of romance have denied himself this attractive theme? Would he have been thus careful to avoid gratifying unhealthy curiosity? See art. JESUS CHRIST, vol. ii. p. 625.

curiosity? See art. JESUS CHRIST, vol. ii. p. 625. Various untenable identifications have been made in connexion with the story of Lazarus. Mary has been identified either with Mary Magdalene, or with both. Almost certainly they were three different persons. Simon the Pharisee has been identified with Simon the leper, in whose house was the meal at which Martha served, Mary anointed the Lord's feet, while L was one of those who reclined with Him at table. This also is highly improbable. All these identifications, however, have been suggested by some patriatic writers as well as by some moderns. It was reserved for the imagination of a modern scholar to identify L himself not only with the young ruler who had great possessions (Mt 10<sup>16</sup>, Mt 10<sup>17</sup>, Lt 18<sup>10</sup>), but with the young man with a linen cloth about him, who was near being arrested with Christ (Mk 14<sup>21</sup>). We do not know that L was young; it is most improbable that he was a *ruler*; and although the family seems to have been well-to-do, there is no evidence that L had great possessions. And were there so tew young men in Palestine that wherever we find one mentioned we must assume that he is the same as some other one? To identify the rule of Lt 18<sup>18</sup> with the young mon of Mt 14<sup>14</sup>, and both of these with L, is against all probability. The interesting article on Lazarus in Smith's *DB* is an excellent example of spinning ropes of sand. In various forms of early Christian art the resur-

In various forms of early Christian art the resurrection of Lazarus was a favourite subject. It is found, from the 3rd cent. onwards, very often in paintings and sculptures, and sometimes in mosaics. And there is evidence that it was also woven or embroidered on clothing. In 'early exLAZARUS AND DIVES

amples Christ is a large figure and Lazarus a very small one, and the latter is wrapped tightly in grave cloths. Small images of Lazarus were somequoted in Trench, Miracles, § 29 sub fin.; Smith's Dict. of Chr. Ant. ii. p. 949; Kraus, ii. p. 286.

Legends about Lazerus are less common than one might expect. The Jews are said to have sent him and his sisters with other disciples to sea in a leaky boat, which took them safely to Marseilles, where he became a bishop. Writers of medizeval romances sometimes made him their nouthpiece in publishing their ideas about the unseen world (T. Wright, St. Patrick's Purgatory, p. 167 ff., London, 1844). No trust can be placed in the tradition preserved by Epiphanius that Lazarus was thirty when he was raised, and lived thirty years afterwards (Hær. ii. 2. 652). In short, nothing historical can be added to the brief narrative of St. John, which has never ceased to impress the mind of Christendom.

In conclusion, it is worth noting that this narrative contains important evidence respecting Christ's human consciousness. Supernatural knowledge was within His reach (Jn 114 <sup>11, 14</sup>); but when He human consciousness. could acquire the necessary information in the usual way He did not make use of supernatural means (11<sup>17, 24</sup>). A. PLUMMER. A. PLUMMER.

LAZARUS AND DIVES.—In this parable alone is a name given to any of the persons introduced. The name Lazarus may be a later addition, to connect the parable with L. of Bethany, who *did* 'go to them from the dead,' and still they did go to them from the dead, and such they due not repeat. More probably, the name suggests the *helplessness* of the man, so far as his follow-men were concerned. Tertullian argues that the name proves that the story is historical, and that the scene in Hades confirms his view that the soul is corporeal (*de Animá*, vii.). In this parable also popular usage has given the other chief character a name. In the West 'Dives' has become almost a proper name; and this in spite of the fact that tradition had given the name of Nine us to the rich man (Euthym. Zig. on Lk 16<sup>20</sup>).

This parable is the counterpart of the parable of the Unjust Steward. That teaches what good results may be won by a wise use of present advantages. This teaches how calamitous are the results of failing to make a wise use of them. It The states of the index of the states also the preceding saying, that what is exalted among men may be an abomination in the sight of God (Lk  $16^{19}$ ). It is not 'Ebionitic.' It neither states nor implies that it is wicked to be rich. Dives is condemned, not for having been wealthy, but for having found in wealth his highest good, and for not having used it to win something better. Out of this mammon he might have made L. and others his 'friends,' and through them have secured 'eternal tabernacles.' Both halves of the parable are original, and each is needed to explain the other. It is a grave error to suppose that the is significant, or that its purpose is to teach us the nature of the unseen world. The one thing that it teaches is that our condition there depends upon our conduct here, and that this may produce a complete reversal of human judgments. The details of the picture represent Jewish ideas about Sheel, but they in no way confirm those ideas. In order to enable us to realize the picture, dis-embodied spirits are described as if they were bodies. The finger, the tongue, the flame, etc., are figurative, for the actual finger and tongue were in the grave.

In both halves of the parable L. (like his namesake in all the scenes at Bethany) is silent; and his silence is instructive. It indicates that, just

# LEAH

as Dives is not punished for his wealth, so L. is as Dives is not punished for his wealth, so L. is not rewarded for his poverty. He is rewarded for his patient sabmission. In life he does not mur-mur at God's unequal distribution of goods, nor rail at Dives for his neglect of him. In Sheol he does not triumph over Dives, nor protest against the idea of his being at his beck and call. He leaves Abraham (a righteous rich man) to decide everything; and Abraham points out that as the one had had uninterrupted luxury, and the other uninterrupted misery, in life, so there can be no interruption in the reversed conditions of either in Sheol. in Sheol.

In Sheol. The hypothesis that Dives and his five brethren represent six of the Herods (father, sons, and grandsons being called brethren for simplification) is incredible. Those who hold it consistently maintain that the parable is wrongly attributed to Christ, and is a later composition. Christ cer-tainly would not have made a personal attack of this kind on any one, although He did not hesitate to censure Antipas publicly (Lk 13<sup>32</sup>).

The belief that Lawrus was a leper has produced such words as lazaro for leper and lazzaretto or lazar-house for leper-hospital. During the Orusades an order of knights of St. Lawrus was founded (1119, 1256), with the special duty of protecting and tending lepers. It lasted till modern times, but is distinct from the much more modern order of Lazarista or Lazarians. A. PLUMMER.

LEAD (nypix 'ophereth) is often named among the LEAD (1794 opacreta) is often named among the spoils from Syria under Tahutmes III.; and it was common enough by B.C. 1200 to be used in Egypt for the sinkers of fishing-nets. This use was familiar to Israelites, as the Song of Moees has 'sank like lead in the mighty waters' (Ex 15<sup>10</sup>). Lead in the literal sense is mentioned in Nu 31<sup>20</sup> (P) along with barge inc and tin and along with (P) along with brass, iron, and tin, and along with the same metals is used figuratively of Israel in Ezk  $22^{16}$  (cf. v.<sup>20</sup>); and it appears in Ezk  $27^{19}$  along with silver, iron, and tin as an article of commerce brought from Tarshish to Tyre. In Job 19<sup>24</sup> the sufferer exclaims, 'O that with an iron pen and lead [my words] were graven in the rock for ever ! There may be a twofold reference here: (a) to the use of a leaden tablet to be written on with an iron pen, (b) to the cutting-out of an inscription on a rock, but more probably there is but one figure before the mind's eye of the speaker,—that of pouring molten lead into the letter-forms sunk in the store (See Devider and Diller and Sec. the stone. (See Davidson and Dillmann, ad loc.). See, further, under MINES, MINING. W. M. FLINDERS PETRIE

LEAH (جرجة, Aela). - The elder daughter of Laban, and one of Jacob's wives. The ruse by which she was palmed off by her father upon Jacob, who imagined that he was marrying Rachel, is described in Gn 29<sup>215</sup>. As to her personal appearance, we are told that her eyes were nor, which the LXX render by  $d\sigma\theta ere$ , and EV by 'tender,' i.e. weak or dull. The context and the etymology of the word both favour this meaning rather than that of 'beautiful,' which is attributed to the word by Onk. and Sa'adya, who imagine that the sense intended is, that though Leah had ine eyes she was otherwise not so handsome as Rachel. . By her marriage with Jacob, Leah became the mother her marriage with Jacob, Lean became the mother of six sons, Reuben, Simeon, Levi, Judah, Issachar, Zebulun, and a daughter, Dinah, Gn  $29^{21-35} 30^{15.-35} 31^{10.-35}$ . See JACOB, vol. ii. p. 528. Along with her sister she expressed sympathy with Jacob on account of his treatment by Laban, and agreed to accompany her husband in his flight from her father,  $31^{4.-14-35}$ . When the meeting between Jacob and Esau was about to take place, Leah and her children were placed in an intermediate position between the placed in an intermediate position between the handmaids with their children in the front and Rachel with her children in the rear,  $33^{1.2.7}$ . Leah is mentioned in  $49^{31}$  as having been buried in the

Digitized by Google

cave of Machpelah, having evidently died prior to Jacob's going down to Egypt. In Ru 4<sup>11</sup> the women who invoke a blessing on the union of Boaz and Ruth, make honourable mention of Leah and Rachel as having 'built' the house of Israel. It is clear that the most ancient division of Israel distinguished Leah tribes and Rachel tribes. Wellhausen (Proleg. 150; cf. W. R. Smith, Kinship, 195, 257; Stade, ZATW i. 112 ff.) regards Levi as a patronymic derived from Leah. See LEVI. The meaning of the name Leah is somewhat un-certain. Gray (Heb. Prop. Names, 96) accepts the meaning 'wild cow' (so W. R. Smith, Kinship, p. 119['bovine antelope']; Frd. Delitzsch, Proleg. 80, and [doubtully] Noideke, ZDMG, 1886, p. 167). Others, as Haupt (GGN, 1883, p. 100), compare the Assyrian li'at in the sense of 'mistress.' Upon the ground that the narrative in Gn 29<sup>17</sup> describes the ground that the narrative in Gn 2917 describes the one sister as ugly and the other as beautiful, Ball (in SBOT, ad loc.) suggests a connexion between

to be ugly,' II. 'to look ugly or malignantly.' See Lane, p. 2677. J. A. SELBIE.

LEANNOTH, Ps 88 (title).-See Mahalath under art. PSALMS.

**LEASING** is the Angle-Saxon *leasing*, 'a lie,' and comes from *leas*, 'false,' which Skeat believes to be the same word as *leas*, loose, so that 'leasing' is literally '*looseness* of statement.' In the Acts of James I. of Scotland, 1424, 'It is ordanyt-that all lesingis makaris and tellaris of thaim, the an technigis makaris and tenans of tham, the quhilk may ingener discorde betnix the king and his pepill,—salbe challangit be thaim that power has, and tyne lyff and gudis to the king '—Jamie-son's Scottish Dictionary, s.v. 'Lesing-makare.' And still older, in the Preface to king Alfred's Laws, the 44th article is, Onscûna thû â leásunga = 'Shun thou ever leasings.' Wyclif uses the word often. Thus, Jn 8<sup>44</sup> 'Whanne he [the deuel] often. spekith a lesinge, he spekith of his owner thing is; for he is a lyiere, and fadir of it.' He also has the forms 'leasing-maker,' Pr 21<sup>6</sup>, and 'leasing-monger,' as Sir 20<sup>37</sup> 'Betere is a theef than the customablenesse of a man, a leesyngmongere' (1382, 'than the besynesse of a man liere'). With 'than the besynesse of a man liere'). With Wyclif's translation of Jn 8<sup>44</sup> cf. Knox, *Historie*, Wychi's translation of Jn 8<sup>w</sup> cf. Knox, *Historic*, p. 288, 'But who can correct the leasings of such as in all things show them the sons of the Father of all lies'; Elyot, *The Governour*, ii. 217, 'And the devill is called a lyer, and the father of leasinges. Wherfore all thinge, which in visage or apparaunce pretendeth to be any other than verily it is, may be named a leasinge; the execution where is formed which is in afficient but untrouthe whereof is fraude, which is in effecte but untrouthe, enemie to trouthe, and consequently enemye to god'; and Twysden, *Decem Script*. col. 2650, 'For before that the fende fader of lesynges was lowside, was never this gabbyng contryvede.

The word occurs three times in AV, Ps 4<sup>2</sup> 'how (Heb. 13 wp2s, Wyc. 'sechen lesing,' Cov. 'seke after lyce,'Gen. 'seking lycs,' Douay 'seeke lying,' Bish. 'seeke after leasing,' RV 'seek after false-hood'. [so also Driver, Parall. Psalter, with note **Probably** vain plans (2<sup>1</sup>) for the ruin of the **Psalmist**, and false charges or calumnies against him,' to which he adds on p. 487, under *Corrigenda*, 'Or better, perhaps, false and baseless imputations' by impatient and distrustful companions, 'reflect-

destroy them that speake leasing,' RV 'Thou shalt destroy them that speak lies'); 2 Es 14<sup>18</sup> 'For the truth is fied far away, and leasing is hard at hand' (*appropinguabii mendacium*, RV 'For the truth shall withdraw itself further off, and leasing be hard at hand'; the AV is again the tr<sup>a</sup> of the Bishops). says, 'Amongst the many simoniacal Prelates that swarmed in the land, Herbert, Bishop of Thetford, must not be forgotten; nicknamed (or fitnamed shall I say?) Losing, that is, the Flatterer; our old English word leasing for lying retains some affinity thereunto, and at this day we call an insinuating fellow a Glozing Companion.' J. HASTINGS.

LEATHER, LEATHERN (<sup>th</sup>y <sup>t</sup>ór, δέρμα, δερμάτικοs). —Elijah and John the Baptist wore a girdle of leather (2 K 1<sup>8</sup> <sup>th</sup>y <sup>th</sup>w, Mt 3<sup>4</sup>, Mk 1<sup>6</sup> *fism δερματίκη*. In the last passage AV needlessly introduces the variety, 'girdle of *skin*'). Although mentioned in EV only in connexion with girdles, leather must have been used for many purposes. The Heb. and have been used for many purposes. The Heb. and Gr. words properly mean *skin*; and in such passages as Ex 25<sup>6</sup> ('rame' skins dyed red, and badgers' skins') they clearly refer to tanned skins, and perhaps in Nu 31<sup>10</sup> ('all that is made of skins') they do the same. Leather was used for thongs, latchets of sandals, reaction water-bottles and wine-bottles were often made of leather, as at the present day in Syria and Palestine. The Egyptians used it for many purposes besides those mentioned, such as coverings for shields, seats of chairs, etc. (Wilkinson, Anc. Egyp. ii. 185–189); also for writing (*ib.* 183), rolls being made of it like papyrus. See, further, SKIN, TANNER. H. PORTER.

LEAVE.—The verb to leave is often used in AV in the sense of 'desist,' 'leave off,' as Gn 18<sup>39</sup> 'And the LORD went his way, as soon as he had left communing with Abraham'; Ru 1<sup>18</sup> 'When she saw that she was stedfastly minded to go with her, then she left speaking unto her'; Ac  $21^{32}$ 'when they saw the chief captain and the soldiers, they left beating of Paul.' Cf. Tind. *Expos.* p. 106, 'He that buildeth a costly house even to the tilling will not here there and here are most the tiling, will not leave there, and lose so great cost for so small a trifle more.' So Latimer, Serm. of the Plough, 'If I might see any such inclination in you, that you would leave to be merciless, and begin to be charitable, I would then hope well of you'; and Shaks. I Henry IV. v. v. 44-

#### ' Let us not leave till all our own be won.'

'Leave off' is also found in AV, as Sir 2317 'All bread is sweet to a whoremonger, he will not leave off till he die';  $47^{22}$  'But the Lord will never le've off his mercy.' And it is used both with the <sup>16</sup> ve on nis mercy.' And it is used both with the pucp. in -ing, and with to and the infin., as Gn  $17^{22}$ 'And he left off talking with him'; 1 K  $15^{21}$  'he left off building of Ramah'; Gn  $11^8$  'they left off to take heed to the LORD.' In Gn  $17^{22}$  'Indale's *Pent.* of 1530 has 'left of talking,' but the ed. of 1534 'left talking.' In Ac  $18^{10}$  and  $2^{10}$  Co  $9^{12}$  descent of the talking.'

1534 'left taiking. In Ac 18<sup>18</sup> and 2 Co 2<sup>13</sup> dwordsorousa is tr<sup>4</sup> 'take leave of.' RV retains this tr. and introduces it in Mk 6<sup>46</sup> for AV 'send away'; but in Lk 9<sup>61</sup> RV retains 'bid farewell' of AV, and in 14<sup>53</sup> (the only by impatient and distrustful companions, 'renect-ing discredit upon the Psalmist']);  $5^6$  'Thou shalt destroy them that speak leasing'  $(1)^7$ , Wyc, 'Thou schalt leese alle that speken leesyng,' Cov. 'Thou destroyest the lyers,' Gen. 'Thou shalt destroy them that speake lyes,' Dou. 'Thou wilt destroy al that speake lie,' Bish. 'Thou shalt ' when RV prefers 'bid farewell.' 'Thou schalt leese alle that speken leesyng,' Cov. 'Thou destroyest the lyers,' Gen. 'Thou shalt ' when RV prefers 'bid farewell.'

With the expression in Ac  $21^3$  'Now when we had discovered Cyprus, we left it on the left hand': cf. Ac  $20^{16}$  Rhe:n. 'Paul had purposed to saile leaving Ephesus'; Nu  $34^{12}$  Tind. 'And then goo downe at the Iordayne, and leve at the salte sea'; and especially Guylforde, *Pylgrymage*, p. 14, 'whiche yle we lefte on our lefte hande towardes Grece.' J. HASTINGS.

**LEAVEN** ( $\forall k p$ ,  $\forall \mu \eta$ , fermentum).—The Hebrew word set or ( $\forall k p$ , which probably expresses the idea of fermentation, is found only five times in the OT (Ex 12<sup>15, 19</sup> 13<sup>7</sup>, Lv 2<sup>11</sup>, Dt 16<sup>4</sup>); more commonly we find a word from another root, denoting to be sour, and hence to be leavened ( $\gamma z p$ ,  $\hbar a m e z$ ). Bread, kneaded in a baking trough ( $\pi \gamma k \gamma z$  Ex 8<sup>3</sup> 12<sup>24</sup>), and leavened, probably by means of a lump of fermented dough, must have been a common article of food among the Israelites; but as time was required to allow the leaven to work (Hos 7<sup>4</sup>), bread of another kind was used when food was required at short notice. This took the form of unleavened cakes (Gn 19<sup>3</sup>, Jg 6<sup>19</sup>, 1 S 28<sup>24</sup>), called mazzôth ( $\pi x z$ ), either as being sweet, unsoured ( $\gamma x \gamma = 'to$  suck,' so Ges.), or on account of their dry, insipid character (Felsicher in Levy, NHWB iii. 215; Nowack, Heb. Arch. ii. 145). It was, according to Ex 12<sup>24-39</sup> (JE), unleavened cakes of this kind that the Israelites baked for themselves on their hurried departure from Egypt, since they had not time to leaven their dough.

In early times leavened bread, as a common article of food, probably formed a part of a sacri-ficial meal, and of the gifts offered to the Deity by the worshipper (cf. 1 S 10<sup>3</sup>). In the Northern kingdom leaven was an accompaniment of the thank-offering, though Amos seems to refer to the custom in terms of disapproval (Am 4<sup>5</sup>). Traces of satisfies a similar usage are to be found even in P; for the shewbread (Lv  $24^{5-9}$  [P]) was probably leavened, while leavened cakes, as bread of the first-fruits, formed part of the sacred gifts presented at the Feast of Weeks (Lv 23<sup>17</sup>, cf. <sup>20</sup> [H]), and also accompanied the peace-offering, when offered as a thanksgiving (Lv  $7^{16}$  [P]). In none of these cases, however, was the leavened bread actually placed upon the altar. On the other hand, to eat anything leavened, or even to keep it in the house, was strictly forbidden during the seven days of mazzôth (Ex 13<sup>3-7</sup> 23<sup>15</sup> 34<sup>15</sup> [JE], Dt 16<sup>3.4.5</sup>, Ex 12<sup>14-30</sup>, Lv 23<sup>6-8</sup>, Nu 28<sup>17</sup> [P]), a festival which was originally distinct from the Passover, though Dt shows a tendency to combine the two (Dt 16<sup>3</sup>, and cf. Driver, *ad loc.*). A historical explanation of the prohibition is given in JE, where, as we saw, the prohibition is given in JE, where, as we saw, the use of unleavened cakes is connected with the events of the exodus (Ex 12<sup>94-30</sup>), and a connexion between the exodus and mazzôth is suggested else-where (Ex 13<sup>36</sup> 23<sup>13</sup> 34<sup>16</sup>). Similarly, in Dt 16<sup>3</sup> the unleavened cakes of this season are termed 'the bread of affliction,' from their association with the Egyptian bondage of the Israelites, and their hurried departure. Probably, however, the feast of mazzôth was originally the opening festival of the harvest season (cf Dt 16<sup>9</sup> Ly 23<sup>95</sup>) in this of the harvest season (cf. Dt 169, Lv 2390.); in this case the use of leavened cakes may be explained from the use of new corn, hastily prepared for food in the busy time at the beginning of harvest, and from the desire not to mix the first fruits with the last year's dough (see Wellhausen, Proleg., Eng. tr. pp. 85-87; Nowack, Heb. Arch. ii. 145 f.). The more general prohibition of leaven in sacri-fices was doubtless due to the association of the was regarded as a source of corruption; and ac-cordingly P excludes it from any meal-offering  $(Lv 2^{11} 6^{17}, and cf. Dillm. ad loc.), and lays down$ the principle that nothing leavened, nor even

honey, which might produce fermentation (cf. Pliny, 11, 15), was to be burnt as an offering to J". The laws in JE (Ex  $23^{18} 34^{33}$ ) also forbid the use of leaven in a sacrifice, but in both passages a special reference is made to the Passover, and it is possible that the prohibition was originally confined to this feast (cf. RS p. 203 f.).

The association of leaven and corruption is not confined to the OT. Plutarch explains on this ground why the Flamen Dialis was not permitted to eat bread prepared with leaven (Ques. Rom. 109); and fermentum is used in Persius for 'corruption' (Set. i. 24). In the NT there is, indeed, the parable of the leaven, where its unseen influence and penetrating power is taken as a symbol of the growth of the kingdom of heaven (Mt 13<sup>33</sup>, Lk 13<sup>301</sup>.); but elsewhere our Lord warns His disciples against the 'leaven' of the Pharisees and of Herod (Mt 16<sup>6-13</sup>, Mk 8<sup>165</sup>, Lk 12<sup>1</sup>); and St. Paul, emphasizing its secret and expansive working, quotes the proverb, 'A little leaven leavens the whole lump' (Gal 5<sup>6</sup>, 1 Co 5<sup>6</sup>), to warn his converts against the contagious example of evildoers, and exhorts them to purge out the old leaven of malice and wickedness (I Co 5<sup>5</sup>). Similarly, in Rabbinical writers leaven is used as a symbol of evil : thus R. Alexander prays against 'the leaven in the dough, '*i.e.* the evil inclination in the heart, which prevents man from doing the will of God (Talm. Berachoth, 17a; and cf. Lightfoot, Hor. Heb. on Mt 16<sup>6</sup>).

LEBANA ( $\langle \xi ; \xi \rangle$ ), Neh 7<sup>46</sup>, or LEBANAH ( $\langle \xi ; \xi ; \eta \rangle$ ), Ezr 2<sup>46</sup>.—The head of a family of returning exiles, called in 1 Es 5<sup>29</sup> Labana.

LEBANON (in prose with art. <sup>1</sup>/<sub>1</sub>, except 2 Ch 2<sup>sb</sup> [Heb.<sup>7b</sup>]; in poetry 18 times with art., 20 times without. LXX Λίβανος, generally with art.; Vulg. Libranus).\*—Derived from root [[2]] 'to be white,' either from the snow which covers the summits seven months in the year, or from the light colour of the limestone in its upper ranges. Lebanon is mentioned in the OT over 60 times,

Lebanon is mentioned in the OT over 60 times, but almost two-thirds of the references occur in poetical passages. It is not mentioned in the NT. While included in the land assigned to the Israelites, Jos 13<sup>6</sup> (D<sup>2</sup>), these mountains were never conquered by them (Jg 3)<sup>-3</sup>), the actual limit of conquest being 'Baal-gad in the valley of Lebanon, under Mount Hermon' (Jos 11<sup>7</sup>). This valley of Lebanon was known to the Greeks as Cœle-Syria, and is the modern Buka'. Anti-Libanus proper is mentioned but once in the OT as 'Lebanon towards the sunrising' (Jos 13<sup>8</sup>). The Hivites are said to be inhabitants of the Lebanon (Jg 3<sup>3</sup>), and the Giblites dwelt at Gebal (the modern Jebai/, Greek Byblos, at the base of the mountains) (Jos 13<sup>6</sup>·6). During the reign of Solomon, the Lebanon appears to have been subject to Hiram king of Tyre, who contracted to bring codar trees, firs, and almug (algum) trees by sea to Joppa for the temple (1 K 5<sup>6</sup>, 2 Ch 2<sup>6</sup>). On the other hand, Solomon appears to have erected buildings in the Lebanon (1 K 9<sup>19</sup>, 2 Ch 8<sup>6</sup>). At the rebuilding of the temple, after the restoration, cedar trees were again brought from the Lebanon (Ezr 3<sup>7</sup>). See, further, art. CEDAR.

further, art. CEDAR. Mt. Lebanon runs N.N.E.-S.S.W. for 95 miles from Nahr Kasmiyeh, lat. 33° 20' (known as the Litany, the classic Leontes, along its upper course), to Nahr el-Kebir, the ancient Eleutherus. The plain of the Buka separates it from the Anti-Libanus, which, starting from the Barada, runs for 65 miles roughly parallel to the Lebanon.

<sup>•</sup> The name appears in Assyr. as Labndnu, etc. (see Schrader, CO7<sup>\*</sup> on 1 K 5<sup>13</sup>), and in Egyp. perhaps as Ramannu (see W. Max Müller, As. u. Europ. 1981., 204).

90

# LEBANON

Strabo (xvi.) represents the two ranges as parallel, but is in error in stating their direction : Lebanon, according to him, beginning at Tripolis, and Anti-Libanus at Sidon, both running towards Damascus. The foot-hills of Lebanon—the western range rise abruptly from the seashore, except for the narrow strip of plain at Sidon, and for the tri-angular projections of the promontories of Bey-rout and Tripoli. At its southern end the main ride is divided into the promontories of the propulse and the proridge is divided into two ranges, roughly parallel, by the brook Zahardni, which, after flowing south-wards, turns abruptly west and enters the sea south of Sidon. The eastern ridge is known as Jebel Rihdn, and the western as Jebel Taura (alt. 4500 ft.). Both are more or less wooded. Near the plateau on which stands Kefr Houni, these two ridges merge into one, which is separ-ated from the twin peaks Taumat Niha (alt. 5625 ft. and 5550 ft.) by a notch 600 ft. deep. The ridge now becomes higher and more pronounced, rising to an altitude varying from 5500 to 7000 ft. Its various parts are locally named from the larger villages, as Jebel Niha, and Jebel Barák. North of the latter the ridge falls to an altitude of 4700 ridge is divided into two ranges, roughly parallel, of the latter the ridge falls to an altitude of 4700 ft., and is crossed by a transverse ridge, Jebel Kuncisch (alt. 6960 ft.). A narrow watershed con-nects this with Jebel Sannin, a triangular-shaped mountain—one face being parallel to the sea, one in the line of the main ridge, and the third or northern one running roughly east and west. Its highest point is on the eastern face. From a distance the top appears to be level, but it is exceedingly rough owing to numerous conical depressions, in which snow may be found late into the summer. For some distance beyond Sannin the top of the main ridge is really a broad, rolling plateau, called *Jebel Muneitri*, varying in altitude from 5800 to 6000 ft. North of the village '*Aktarak* the altitude increases rapidly, and the western part of this broad mass is broken up by a series of intricate ridges, suddenly breaking down into the great amphitheatre of the Nahr Kadisha. This is bounded on the east by the narrowed main ridge, joining on to the huge mass which forms ridge, joining on to the huge mass which forms the northern side of the amphitheatre. This is named as a whole *Dahr el-Kadib*, and is sur-mounted by two series of peaks, roughly parallel, varying in height from 9800 to 10,225 ft. The highest peak is called *Jebel Mukhmal* by Burton, but no local trace of the name appears to have been recovered by later travellers. The western face of this northern mass is a series of sheer cliffs. To the north another great amphitheatre opens out, in which are found the head waters of the northern branch of the *Nahr el-Bárid*. Be-yond this rises the *Jebel el-Abiadh* (alt. 7380 ft.), after which the mountain breaks down to the after which the mountain breaks down to the valley of the Nahr el-Kebir, and the low, rolling hills joining the Lebanon to the mountains of the

Nussifych. With very few exceptions all the Lebanon streams rise on the western face. South of Beyrout the main rivers have their sources in high valleys between ridges approximately parallel to the main ridge. Their course is thus first southerly, then westerly, to the sea. They are the Zaharáni, the Awwali (Bostrenus); and the Damúr (the Tamuras of Strabo, and the Danuars of Polybius). North of Beyrout the head waters of the rivers are in wide amphitheatres, separated from each other by narrow watersheds, in places 5000 to 6000 ft. high; and in their course to the sea they break through the spurs of the great hill in narrow gorges. The western face of the Lebanon is thus extremely rugged and varied in contour. The main streams are—Nahr Beyrout (the Magoras), with its two branches, rising on the face of Kuneisch, and between Kuneisch and Sannfn

respectively, Nahr el-Kelb (Lycus flumen) draining Sannin; Nahr Ibrahim (the Adonis) with its main sources at Afka and 'Akûrah; Nahr ej-Jawz; Nahr Kadisha, draining the 'Cedar amphitheatre, and entering the sea at Tripoli; Nahr el-Bárid; and, finally, the boundary river, Nahr el-Bárid; sources around the northern end of the mountain. The eastern face of Lebanon presents a very different aspect from the western, as it slopes directly down to the plain of the Buka', sometimes with no foot-hills, and unbroken by any important valleys, except at the south end of Kuneiseh and at Zahleh, where the Nahr Berdaûni comes out of a wild gorge. There are several large fountains at the base of the main ridge, and the Lake Yamnûneh, with its intermittent fountains, lies in a depression between the main ridge and the partly wooded foot-hills, north-west of Baalbek.

A few words as to geology. The Lebanon is com-posed of three conformable series of strata, all of which are sometimes exposed on the sides of the deepest valleys. The lowest is regarded by some authorities as lower cretaceous, by others as upper suthorities as lower cretaceous, by others as upper jurassic. It consists of several thousand feet of hard, thick-layered limestone, containing few fossils, among which are sponges, corals, brachio-pods, and, most characteristic, *Cidaris glandaria*, from which the formation has been named the Glandaria limestone. While forming the bottom of the deepest valleys, by foldings it is in places elevated to the height of from 4000 to 5000 ft. It weathers into grand castellated rocks, whose bluish-grey sides are beautifully fluted by the frosts and rains. The second series of strata has been named from a characteristic of strata has been named from a characteristic fossil, Trigonia syrinca, the Trigonia zone. It consists of sandstone, soft limestone, and clay, consists or sandstone, soft limestone, and clay, with here and there small quantities of poor bituminous coal and bituminous limestone, with pyrites and efflorescent salts. The sandstone is from fifty to several hundred feet thick, and by its red colour serves readily to distinguish the other series of rocks. Most of the Lebanon pines grow on this sandstone. The limestone and clays of the Trigonia zone may attain a thickness of from 500 Trigonia zone may attain a thickness of from 500 to 1000 ft., and are very rich in fossils. The third series has been named the Hippurite linestone, as some of its strata are almost entirely composed of fragments of hippurites, which in places are found well preserved. There are also many nerineas. The hippurite limestone occurs on the sides of Lebanon, where, with the other formations, it is extensively faulted and folded, and it forms the summits of all the highest mounand it forms the summits of all the highest moun-tains, where it is in most cases nearly level. Its greatest thickness must be nearly 5000 ft. At low levels near the sea are found chalks, with and without flint, which are the uppermost of the cretaceous rocks, and which appear to have been deposited after the mass of the mountains was well above the sea, since they are in no case found in the centre of the range. In several localities the chalk has yielded numerous finely preserved fishes. Upon the chalk is found soft miocene limestone, and a porous sandstone of a quarternary date which is largely calcareous. From the above description it will be seen that

From the above description it will be seen that the Lebanon presents some magnificent scenery. It is no wonder that the salient features of this border-land to their country seized upon the imagination of the Hebrew poets. The deep and sudden gorges, the sweeping amphitheatres, the variety of colouring in the soil, the towering snow-covered peaks, the gushing fountains,—all unite in producing pictures of almost bewildering variety. Villages are scattered everywhere; some nestle at the mountain base, others cling to the steep sides, while still others are perched on ridges

91

LEBANON

over 4000 ft. above the sea. Many of the bald promontories of rock are crowned by belfried monasteries. The extent of cultivation is extra-ordinary, and the system of terracing is carried to a height of almost 6000 ft. Wheat, the vine, the olive, the mulberry, and the walnut all abound. The water from the various fountains is carefully stored up and led off in irrigation. A consider-able quantity of silk is manufactured. The Lebanon was once well wooded, but the charcoal berners and the browsing goat are now powerful destructive agents. The valley of the Nahr Ibra-him, however, is still thickly wooded with oak and pine, while the stream is shaded with plane trees. Besides the historic grove of the cedars above Besherreh, there are still small groves on the ridge south of Kuneiseh, and a more extensive forest at el-Hadeth, south of the Nahr Kadîsha. Jackals abound, but hyænas, wolves, and panthers are fast disappearing.

Of ancient buildings there are very few traces, of ancient outlaings there are very few traces, the principal ones being the ruin at *Deir el-Kula'a*, above the Beyrout river; *Kula'at el-Fukra*, near Sannin; and the temple of Venus at Afka, the source of the Adonis. This was destroyed by Constantine owing to the licentious rites practised there. The site is striking: behind the temple there rises, for 1200 ft., an almost perpendicular cliff, richly coloured, at the base of which is a large cave, from which in the spring-time a volume of water gushes forth, immediately joining the perennial stream, which plunges down in a series of three cascades. The water is said to be at times impregnated with mineral salts, giving a red colour, typifying to the ancients the blood of Adonis. At the mouth of Nahr el-Kelb are in-scriptions in Assyrian, Egyptian, and Greek. At the bottom of the wild Kadisha gorge there are many early anchorite caves; in front of some of them convents have been greated at the block them convents have been erected-notably Kannubin, the traditional seat of the Maronite patriarch.

The feudal system lasted in the Lebanon far into the present century. In consequence of the massacres of 1860 the government of the mountains was reorganized, with a Christian governor under the general protection of the Powers. The popula-tion is about half a million, and includes the following sects, which are given as nearly as pos-sible in the order of their numbers, the most numerous being first :---

> Maronites. Greek Orthodox. Druzes. Papal Greeks. Mutawileh. Mohammedans. Protestants. Syriac and Armenian.

In general the Druzes are to be found south of the Beyrout river, while the stronghold of the Maronites is to the north. (For details as to the Maronites, see *PEFSt*, 1892, Bliss). Owing to recent efforts of missionaries, both Protestant and Roman Catholic, the number of schools is very large. The natural abilities of the Lebanese peasantry in Syria and Palestine. The Buka. — The Lebanon is divided from the

Anti-Libanus by a broad valley known in its southern part as the Buka' el-'Aziz, and in its northern part as Sahl-Ba'albek. It is drained by two rivers, the Litany (Leontes), which rises in the neighbourhood of Baalbek and flows south, and by the 'Asi (Orontes), which rises a short distance for ther porth and flows northward. The distance farther north, and flows northward. The watershed is almost imperceptible. The Buka' proper is very fertile, and supports a large popula-

tion in the villages scattered over it, and especially in the valleys along its sides. The northern end is much less fertile. (For the splendid ruins of *Ba'dibek* see reff. at end of this article). At its southern end the plain suddenly contracts into a narrow gorge, through which the Litany flows. Both the plain and Anti-Libanus are subject to the Governor of Damascus.

Anti-Libanus, Jth 1' only ('Αντιλίβανος. In Dt 1' 3<sup>25</sup> 11<sup>24</sup> and Jos 1' 9' the Heb. 127' is rendered by 'Αντιλίβανος).—The southern limit of Anti-Libanus may be conveniently placed at the Barada river and Damascus, leaving the mountains to the south to be considered as part of the system of Mount Hermon. It runs roughly parallel to the Lebanon for 65 miles, terminating rather abruptly at the plain of Hums. The main ridge is separated from the plain of Ceele-Syria by a small plain and ridge the plain of Cœle-Syria by a small plain and ridge at the north end; by a rough mass of low ridges, called *Jebel Kusha*'a, in the central part; and by the plain of Zebedåni with ridge in the southern part. At the north the main ridge is narrow, but broken by a series of prominent peaks; the central mass is broader, higher, and rougher; while the southern part is diversified by long wadis leading off to the east, with a single wady (Harfri) leading to the south. To the east of the main ridge there is a descending series of plateaux, gradually

on to ono other, To the east of the main ridge there is a descending series of plateaux, gradually dropping to the level of the plain of Damascus, and separated by five ridges which spread out somewhat like a fan, and which, if produced, would meet in the main mass of Hermon. The highest plateau (alt. 5255 ft.), which is called 'Asal el-Ward, drains northward, past the towns Yabrûd and Nebk, and is watered by a num-ber of fine fountains. The principal peaks of the Anti-Libanus are : Halimat Kabu (8250), Halimat Kârah (8150), and Halimat Kuurais (8150) at the northern end; Tâla at Mûsa (8755) in the central mass; Abu el-Hin (8135) and the Blúdán ridge (8090) farther south. The only considerable streams of Anti-Libanus are the Yahfufah, empty-ing into the Litâny; Helbûn, flowing eastward to ing into the Litany; Helbún, flowing eastward to the Damascus plain; and the Barada (Abana of Scripture). This important river has its main upper source in the south end of the plain of Zebedåni, in a beautiful pool fed by many springs, but drains the whole of that plain; the volume of water is much more than doubled by the fountain of 'Ain Fijch, which joins it less than half-way to Damascus.

DAMASCUS. LITERATURE.—The geographical and geological descriptions are condensed from unpublished notes made by Professor West and Professor Day respectively, both of the Byrian Protestant College, Beyrout. The table of population is taken from the Book of Statistics of the Lebanon, published in Arabic, 1898. The reader may refer further to such works as Robinson, *BRP*<sup>9</sup> ii. 435 ff., 498; G. A. Smith, *HGHL* 45 ff.; Buhl, *GAP* 110; Burton and Drake, *Unexplored Syria*; de Baulcy, *Journey vound the Dead Sea*, etc., il. 558 ff. (especially on the ruins of Baalbek). F. J. BLISS,

**LEBAOTH** ( $m_{12}^{2}$ ) perhaps 'lionesses').—A city in S. Judah, Jos 15<sup>22</sup>. Site unknown. It is called in Jos 19<sup>6</sup> Beth-lebaoth, and in 1 Ch 4<sup>31</sup> (perhaps by Jos 19<sup>5</sup> Beth-10000511, and textual error) Beth-biri (wh. see). C. R. CONDER.

**LEBBAEUS** ( $\Lambda\epsilon\beta\betaa\hat{los}$ ) is the name given to one of the Twelve in AV of Mt 10°, but rejected by RV as without sufficient authority. The reading and the meaning of the name will be fully discussed in art. THADDÆUS. See also WH<sup>2</sup>, Notes, pp. 11, 24, 144, and Dalman, Worte Jesu, p. 40. The greatest obscurity prevails regarding him but the view which obscurity prevails regarding him, but the view which identifies him with the Thaddæus of Mk 3<sup>18</sup> and Mt 10<sup>8</sup> (RV), the Judas of James of Lk 6<sup>16</sup> and Ac 1<sup>13</sup>, and the Judas, not Iscariot, of Jn 14<sup>29</sup>, may be accepted without serious hesitation. There are no references to him in NT except those in the lists of the Twelve and the question recorded by St. John, who

# LEBONAH

carefully distinguishes him from the traitor, and nothing whatever is known of his ultimate career. See, further, art. THADDÆUS. W. MUIR.

**LEBONAH**  $(\eta \eta \gamma')$ ,  $\Lambda \epsilon \beta \omega r \epsilon$ ).—A place near Shiloh on the way to Shechem, Jg 21<sup>10</sup>. It is the ruin called *Khan el-Lubban*, about 3 miles W.N.W. of *Seilán* (Shiloh). See *SWP* vol. ii. sheet xi.; Robinson, *BRP*<sup>2</sup> 271 f.; Guérin, *Samarie*, ii. 164 f.; Baedeker-Socin, *Pal.*<sup>3</sup>, 217. C. R. CONDER.

**LECAH** ( $2^{2}$ ).—A name occurring in the genealogy of Judah (1 Ch 4<sup>21</sup>) as the 'son' of Er. Most probably it is the name of a place, although it is impossible to identify it. See GENEALOGY, IV. 2

LEECH .--- See HORSELEECH.

LEEKS. — The word vy, hāştr is usually tr. 'grass' (see GRASS) or 'hay' (see HAY), but in one passage (Nu 115) it is tr. 'leeks.' Its occurrence in this passage with the other two alliaceous plants onions and garlic, and the authority of the LXX nodes, Vulg. porri, ancient Syriac and Arab., have caused most interpreters to accept the AV and RV 'leeks,' The plant is Allium Porrum, L. It is extensively cultivated in the East. It has an ill defined bulb, leaves about an inch broad, and a stem about 2 ft. in height. The young stem, enveloped in its leaves, is banked up, as in the case for celery, and plucked up while tender, before the flowering head is developed. It is eaten raw, or made into a salad, or used as a flavouring for cooked dishes. It has a more delicate flavour than onions or garlic. It is known in Arab. by the name kurrath. G. E. POST.

**LEES.**—This is the tr<sup>a</sup> in AV and RV of Heb.  $\forall \varphi \neq in$  Is  $25^{6}b^{ij}$ , Jer 48<sup>11</sup>, Zeph 1<sup>12</sup>; in its only remaining occurrence, Ps 75<sup>9</sup> [Eng.<sup>6</sup>] it is rendered 'dregs.' The word 'lees' is a plur., formed from Fr. *lie* (the sing. seems never to have been used in Eng.), which is defined in Cotgrave's *Fr. Dict.* as 'the lees dreage grounds, thick subtrance that 'the lees, dregs, grounds, thick substance that settles in the bottome of liquor.' The further derivation from Low Lat. *lia*, accepted by Skeat, is rejected by Brachet. In Is 25<sup>6 bis</sup> the word is used rejected by Brachet. In 18 25<sup>50</sup> the word is used in an apparently good sense, 'a feast of wines on the lees, of fat things full of marrow, of wines on the lees well refined'; and that passage, being most frequently quoted, has given 'lees' a some-what less offensive meaning in mod. Eng. than 'drega.' But there is no difference between the words, as may be seen from Shaks. Troil. and Cress. IV. i. 62-

' Drink up The lees and dregs of a flat tamed piece.'

Macbeth, 11. iii. 100-

'The wine of life is drawn, and the mere lees Is left this vault to brag of.'

And in Is the sense of shëmarim is the same as elsewhere, the faces or dregs of wine. But wine that, after fermentation, is allowed to stand long on its dregs, gathers strength or body, and when filtered before drinking is superior to recently fermented wine. The figure in Jer and Zeph is of

breadth, and not miss.' The adj. we is in New Heb. 'lame,' and the AV translation is no doubt right. It comes from the margin of the Geneva Bible at 3<sup>16</sup>, the text being 'lame of his right hand,' and from the text of the same at 20<sup>16</sup>. The hand,' and from the text of the same at  $20^{16}$ . The LXX gives  $d\mu\phi\sigma\epsilon\rho\sigma\delta\xi\epsilon\sigma$ , 'double handed,' and the Vulg. 'qui utraque manu pro dextera utebatur' (in  $20^{16}$  'ita sinistra ut dextra preliantes'), whence Wyc. 'the which either hoond uside for the right' (in  $20^{16}$  'so with the lift as with the right fightynge'). Cov. has 'a man that mighte do nothinge with his righte hande.' The Douay follows the Vulg., 'who used both handes for the right.' J. HASTINGS. right.

LEG.--1. [rp New Heb. from root 'bow' or 'bend'] The sing. is not found in OT, but the dual fem. Eyrs occurs repeatedly in the ritual of P, Ex 12<sup>9</sup> 29<sup>17</sup>, Lv 1<sup>9, 13</sup> 4<sup>11</sup> 8<sup>21</sup> 9<sup>14</sup> (chiefly in the collocation 'the inwards and the legs'); in Lv 11<sup>21</sup> of the long bending hinder legs of the saltatorial Orthoptera (see Oxf. Heb. Lex. s.v., and the illus-tration on p. 84 of Driver's Joel and Amos). The only other occurrence of the word is Am 312 (of the shepherd rescuing two legs of a lamb out of

the mouth of a lion). 2. דָרָל, lit. 'foot.' 1 S 17<sup>6</sup> Goliath had greaves of brass 'upon his legs' (געדן געג פֿדמשי דŵי σκελών αύτοῦ).

8. pw, denoting the upper part of the leg, in-**3.** prove denoting the upper part of the leg, in-cluding, or sometimes synonymous with, the thigh (T<sub>2</sub>). (a) Of animals. This word is wrongly translated 'shoulder' by AV (cf. LXX  $\tau \partial \nu$   $\beta \rho \alpha$ - $\chi(\sigma \alpha)$  in Ex 29<sup>23. T1</sup>, Lv 7<sup>32. 33. 34</sup> 8<sup>32. 35</sup> 9<sup>31</sup> 10<sup>14. 15</sup>, Nu 6<sup>30</sup> 18<sup>16</sup>, 1 S 9<sup>24</sup>, in all of which RV correctly renders 'thigh.' The put was a choice piece, and as such is mentioned in 1 S 9<sup>24</sup> as having been reserved by Samuel for Saul. One of the chief points of difference in the metter of the prisetly points of difference, in the matter of the priestly revenues, between the Deuteronomic and the Priestly Code, is that in the latter the priest's share of a sacrifice is the breast and right thigh (Lv  $7^{22-24}$ ), whereas in the format and right thigh (Lv  $7^{22-24}$ ), whereas in the former it is the head, maw, and shoulder ( $r^{\gamma_1}$ , lit. 'arm,' Dt 18<sup>3</sup>). See W. R. Smith,  $OTJC^3$  383 note 3, and Driver, Deut. 215. (b) Of men. In Dt 23<sup>25</sup> one of the curses threatened on disobedient Israelites is that they will be smitten 'upon the knees and upon the legs with an evil boil,' where the reference is probably (see Driver, *ad loc.*) to a species of elephantiasis.—In Ca  $5^{15}$  the Shulammite compares elephantiasis.—In Ca 5<sup>16</sup> the Shulammite compares the legs of her beloved to pillars of marble.— Nebuchadnezzar's image had his legs (Aram. '\p\vec{y}') of iron, Dn 2<sup>30</sup>.—In Pr 26' the pointing of the text is somewhat doubtful. The MT has (\vec{y}) c cvet n'? (AV 'the legs of the lame are not equal' [AVm 'are lifted up'], RV 'the legs of the lame hang loose'). If we adopt RV tr<sup>a</sup>, probably we ought to point n'? (so Ewald, Siegfried-Stade, and [doubt-fully] Oxf. Heb. Lex.). Delitzsch (Comm.), followed by Kamphausen (in Kautzsch's AT) and Wildeboer (Comm.), points 'n'n, which he takes to be a noun (Comm.), points vi, which he takes to be a noun = 'a hanging down.' The tr<sup>a</sup> of the verse would then be, 'as the hanging down of the legs of the lame,'etc. In any case the general sense of the passage is clear, namely that a 'parable' is as on its dregs, gathers strength or body, and when filtered before drinking is superior to recently fermented wine. The figure in Jer and Zeph is of one who has had little trial in life, has been too long at ease, and grown indolent and indifferent. See WINE. J. HASTINGS. LEFTHANDED (in 1611 two words) is the tr<sup>a</sup> in Jg 3<sup>15</sup> 20<sup>16</sup> of 10,<sup>--</sup>,<sup>--</sup>,<sup>-</sup> w, which is literally 'shut up (or bound) as to the right hand,' as in AVm. The Heb. phrase, which occurs nowhere else, is used first of Ehud and then of '700 chosen men' of Benjamin, who 'could sling stones at an hair

her garments that she may wade through the rivers.

5. In NT  $\sigma\kappa\epsilon\lambda\sigma_{s-}$  only of the breaking of the legs to hasten death, which was practised on the two crucified robbers but not upon Jesus, Jn 19<sup>315</sup>. This practice, known as oredorowia (cf. the hap. leg. σκελοκοπείν in Ev. Petr. 4) or crurifragium, is referred to in Aur. Vict. Cas. 41 ; Plaut. Asin. II. iv. 68 ; Cic. Rosc. Am. 20; Seneca, Ir. iii. 22, etc. (see full list in Keim, Jesus of Nazara, Eng. tr. vi. 253 note 3). J. A. SELBIE.

LEGION.—This word, familiar as it is to us, was not a familiar word to the inhabitants of Palestine in NT times, for the legions were stationed in the frontier provinces, and nothing happened to bring them into Judæa until the outbreak of the Jewish war in A.D. 66 (see Augustus' BAND). Acyuću (so spelt in  $\aleph^*$  B\* D;  $\lambda e_{\gamma} \omega' \mu$  (so spelt in  $\aleph^*$  B\* D;  $\lambda e_{\gamma} \omega' \mu$  usually in AC) occurs in NT only in Mt 26<sup>33</sup>, Mk 5<sup>9</sup>.<sup>15</sup>, Lk 8<sup>30</sup>—and even so never in its proper sense of 'a legion of Roman soldiers'; it never occurs in LXX (so Hatch-Redpath); and it is rare (if it occurs at all) in Josephus that it is have (it it occurs at all) in Josephus  $(\tau d\gamma \mu a \ stands \ for \ legion' in BJ ii. 544, iii. 8, 97, ed. Niese,$ *et passim*).\* Nor, again, is there much evidence that the word in its Semitic form (widence that the word in its Semitic form (widence that the bar or gives or received bar or bar of the charter of the charter of the semitimed bar of the charter of the chwell known in Palestine early in the Christian era. It is found (S. A. Cook, Glossary of Aram. Inscr.) in the Palmyrene Inscriptions (1st-3rd cents. of the Christian era), and at least once in the OT Peshitta, Nu  $24^{24}$  (Legions shall go forth from the land of the Kittim' (similarly Targ. Jer. *ib.*). On the other hand, the word is fairly common in Talmudic and Midrashic literature (from 3rd cent. of the Christian era onwards), and some instances may be quoted in illustration of *leyiur* in NT.

(1) It connotes a great number. 'It is easier to feed one legion in Galilce than one sucking child in the land of Israel' (*Genesis Rab.* xx. 6 fin., ed. Wilna, 1878).

(2) Connoting special and severe punishment. The waters of the Flood are compared to a 'cruel legion' (Gen. Rab. iv. 6; cf. also v. 6).

(3) Connoting (under certain circumstances) uncleanness. A legion on the march is unclean because skulls to be used as charms are always carried with it (Talm. Bab., Hull. 123a).

(4) Connoting attendance on a king. God speaks of Israel at the passage of the Red Sea as 'My legions' (*Exod. Rab.* xxiii. 7). The tribe of Levi is the legion which stands in God the King's presence (Num. Rab. i. 12). God when He goes forth 'for peace' is attended by multitudes אובלוסין) and legions (Num. Rab. xi. p. 89, col. a, ed. Wilna).

These references illustrate both Mt 2653 ('Twelve legions of angels'); cf. (1) (4); and Mk 59 ('legion; for we are many'); cf. (1) (2). The idea of uncleanness is not prominent in the word.

A Roman legion in our Lord's time was an army complete in itself, consisting of both infantry and cavalry, and amounting to upwards of 5000 men; cf. Marquardt, Röm. Staatsverwaltung, ii. p. 430 ff. See also Schürer, H.JP I. ii. 49-51; Swete, St. Mark 5<sup>o</sup> note; Plunmer, St. Luke 8<sup>oo</sup> note; J. Levy, NHWB, s.v. pp. W. EMERY BARNES. LEHABIN (CR 1013 I CR 1015 A CR 1005 A CR 1005 A CR 1005 A CR 1

LEHABIM (Gn 10<sup>13</sup>, 1 Ch 1<sup>10</sup> בילי, Aaßteiu, Aaßtiv, Vulg. Laabim) occurs as the name of a nation descending from Mizraim, i.e. nearly related to the Egyptians. Scholars always have noticed the great similarity of the name to that of the Lubim,

\* Asyráv ( $\lambda$ ,yráv) does not appear in the Iwlex Voc. Græc. in Havercamp's ed. of 1720, nor is Josephus cited s. r. in Liddell and Scott (ed. viii.), or in Stephanus (ed. Hase-Dindorf), or in Sophocles, Lexicon (ed. 1870).

LENDING

Libyans. Some suppose Lehabim to be merely a writing of this name, which they suppose to be hidden in the true Ludim connected with it; others suppose Lehabim and Ludim (Lubim?) to have been different tribes of the same nation, therefore, with similar names. Certainly, the graphic similarity between h and u is small, only might form a transition. An insertion of לאבים h for phonetic reasons is anything but probable; the insertions of h in other cases are not sufficiently analogous. Therefore, the origin of the present form remains obscure. On the other hand, it can hardly be doubted that the Libyans are meant (see LUBIM). Strange etymologies such as from  $\mathcal{L}_{\mathcal{I}_{\mathcal{I}}}$  'flame,' i.e. those living in a flaming hot country (!), or wild guesses such as the translation of Walton's Arabic version, 'the inhabitants of Behnesa' (Middle Egypt, near Oxythynchus of the Greek time), deserve no consideration.

W. MAX MÜLLER. W. MAX MÜLLER. LEHI (17) 'jawbone,' 'cheek'; LXX  $\Lambda \epsilon \iota(\epsilon) i$ ,  $\Lambda \epsilon \chi i$ ,  $\Sigma i a \gamma \omega r$ ; Luc.  $\Lambda \epsilon \chi \epsilon i$ ; ' $\Lambda \Sigma . \Theta$ , Jos. Ant. V. viii. 8, 9  $\Sigma i a \gamma \omega r$ ).—A place in Judah, the scene of Samson's slaughter of the Philistines, Jg 15<sup>-19</sup>. In 9.5 2021 arts' it Labi' (IVX) but see Smith, HGHL 222 n., and Moore, Judges 348, where other identifications are quoted. The name 'jawbone' nust have been suggested by the forma-tion of a prominent rock; cf. Unou  $\gamma \nu \delta \theta os$ , the name of a peninsula on the W. of Cape Malea, the S.E. Casaub.). Perhaps Beer-lahai-roi (Gn 16<sup>14</sup>) is to be explained in the same way, איז 'the jawbone of the antelope,' Arab. 'urwiye 'mountain goat' (Wellh. Proleg.<sup>3</sup> 339 and n.; Ball, 'Genesis,' in SBOT 66); cf. also the place-name in Arab., lahy gamul 'camel's jawbone.'

The Philistine marauders made Lehi their headquarters for attacks upon the Hebrews of the district ; the name of the place was suggestive ; and tradition attached to it the story of Samson's exploit with the 'fresh jawhone'  $(i\partial hi)$  of an ass. Popular etymology explained Ramath-lehi, Jg 15<sup>17</sup>, the height (from run) of Lehi, as the place where Samson threw away ( $r\bar{c}m\bar{a}h$ ) the jawbone; a hollow basin in the hill-side, shaped like a 'mortar' (maktesh v.<sup>19</sup>, cf. Zeph 1<sup>11</sup>, Pr 27<sup>22</sup>), which held the water of the 'Partridge Spring' ('én hakkûre', cf. 1 S 26<sup>20</sup>, Jer 17<sup>11</sup>), became the spring (in  $m\lambda \omega c$ , cr. granted when Samson called ( $k\bar{a}r\bar{a}$ ) for help in his exhaustion (see EN-HAKKORE). Thus the his exhauston (see EX-HARKORE). Thus the legend was founded upon the popular explana-tion of these names; indeed the word  $v_z^{16}$ might mean either 'in Lehi' or 'with a jaw-bone' (Moore, Judges 347). It is noteworthy that the exploit of Shammah, one of David's mighty men, also took place at Lehi, 2 S 23<sup>11</sup> (see above), and bears considerable resemblance to the story of Samson. Cf. also the story of Shamgar, Jg 3<sup>31</sup>. G. A. COOKE.

LEMUEL (למואל or למואל).-The name of a king **DEMODE** (2005) of 2002). — The name of a king otherwise unknown, to whom his mother addressed the words recorded in Pr 31<sup>2-9</sup>. Most moderns understand Pr 30<sup>1</sup> (see RVm) to imply that Lemuel was 'king of Massa' in Arabia; where lived the descendants of Massa, the son of Ishmael men-tioned in Gn 25<sup>14</sup>, 1 Ch 1<sup>30</sup>. See AGUR. The name Lemuel may be compared with Jemuel in Can 66<sup>10</sup> or Normal 1 (b 45<sup>11</sup>, end in manning Gn 46<sup>10</sup>, or Nemuel 1 Ch 4<sup>24</sup>; and in meaning with Lael, a man consecrated 'to God,' in Nu 3<sup>24</sup> (see Gray, Heb. Prop. Names, 207) W. T. DAVISON.

## LENTILS

LENTILS (Dryg 'ddashim, parss, lens). - The authority of the LXX and Vulg., and the identity of the Arab. 'adas, make it certain that the grain (Gn 25<sup>34</sup>, 2 S 17<sup>28</sup> 23<sup>11</sup>, Ezk 4<sup>9</sup>) is the *lentil*, Ervum Lens, L. It is an annual, of the order Leguminosa, with pinnate, tendril-bearing leaves, of 5-6 pairs of oblong-linear leaflets, 1-4-flowered peduncles, white corolla, and ovate-rhombic, 1-2-seeded pods half an inch long. The seeds are lenticular, with a reddish outer coat. They are cultivated everywhere in the East. They are usually stewed with onions, rice, and oil, or small bits of meat and fat, and seasoned to the taste. This dish, which is known as mujedderah, is universal among the poor. It is by no means unpalatable, and is common enough on the tables of the rich also. The colour of it is a darkish-brown. It would seem that it was red in Essu's day (Gn 25<sup>30</sup>). The term red, however, is a somewhat indefinite one in the East, and applies to a number of shades of red and brown. It was 'pottage' of lentils, similar to if not identical with mujedderah, for which Esau sold his birthright (v.34). Lentil flour is still made into bread in Egypt by the very poor, as in ancient times (Ezk 49)

#### G. E. POST.

**LEOPARD** ( $\neg \gamma$ ) nămêr,  $\pi \dot{a}\rho \dot{a} \lambda s$ , pardus). — A well-known animal, *Felis pardus*, L., still called nimr in Arab., a name which, however, it shares with the tiger. It is a fierce carnivorous creature, often attaining a length of 4 ft. from the tip of the nose to the insertion of the tail. It is a type of ferocity (Is 11<sup>9</sup>). It is exceedingly agile, and swift in its attacks (Hab 1<sup>8</sup>). A four-winged leopard is used as a type of the Macedonian, or, according to another interpretation, of the Persian Empire (Dn 7<sup>6</sup>). It is specially noted for the patience with which it waits, extended on the branch of a tree, or a rock near a extended on the branch of a tree, or a rock near a watering-place, expecting its prey, on which it springs with a deadly precision. Hence 'a leopard shall watch over their cities' (Jer 5<sup>9</sup>), and 'as a leopard by the way will I observe them '(Hos 13<sup>7</sup>). The black spots on the yellow ground of its fur (Jer 13<sup>2</sup>) make it one of the most beautiful of animals. The skins sometimes sell in Syria and Deterting for as much as £10. They are used as animals. The skins sometimes set in Syria and Palestine for as much as £10. They are used as rugs and saddle covers. Some dervishes wear a leopard's skin over their back. Leopards are still found in Lebanon (cf. Ca  $4^8$ ), though rare. One was shot near Kefr Matta, within 15 miles of Beirût, in the winter of 1866-7, after it had killed 60 goats. A young one was taken at Bano, about 15 miles north of Tripoli, the same winter. One was seen at Jisr el-Kådi, about 10 miles from Beirût, a year or two before. They are not rare along the Litâny (Leontes), and in the Antilebanon, and the marines which even into the Lordan Valley and the ravines which open into the Jordan Valley. Another species of leopard, Felis jubata, Schreb., the chetah, or hunting leopard, the fehd of the Arabs, is found in Galilee and Gilead. It is occasionally domesticated, and used by the Arabs for hunting. Both Nimr and Fehd are names commonly given to boys, as emblems or presages of strength and valour.

strength and valour. The word  $ndm\acute{e}r$ , in its feminine form nimrah, and its plural form nimrim, is several times used in the names of places, as 'Nimrah' and 'Beth-nimrah (Nu 32<sup>8, 36</sup>), now Nahr Nimrin, and the 'waters of Nimrim' (Is 15<sup>6</sup>, Jer 48<sup>34</sup>), and 'the mountains of the leopards' (nimrim, Ca 4<sup>6</sup>). The leopard is also alluded to in Sir 28<sup>38</sup> and Rev 13<sup>3</sup>. C 'E Posr

G. E. Post.

LEPROSY (אָרָעָה זי גרעה) גערעה גרעה גרעה גרעה גערעה) גערארא גערעה גערעה גערעה גערעה גערעה גערעה גערעה גערעה גע I.XX and NT  $\lambda \epsilon \pi \rho a$ ).—A genus of diseases with which, in a special degree, the element of uncleanness was associated. The removal of other maladies is spoken of in NT as *healing*, but the removal of leprosy is called *cleansing* (Mt 8<sup>3</sup> 10<sup>8</sup> 11<sup>6</sup>, Mk 1<sup>42</sup>,

Lk 427 722 1717). The only case in which the verb  $la\sigma\theta a is$  used in this connexion is in Lk 17<sup>18</sup> in the case of the Samaritan, whose relation to the cere-monial law would perhaps not be recognized by a Jew: in all other passages it is  $\alpha a \theta a \beta (fer.$  Leprosy also involved exclusion from the community as did no other disease; and the leper was looked upon, not only as defiled himself, but as a source of defilement to his neighbours.

There is an initial difficulty in the identification of these diseases, as the Greek word  $\lambda \epsilon \pi \rho a$  is used by the early physicians as the name of a skin disease, now called *psoriasis*, characterized by an eruption of rough, scaly patches. Hippocrates, Polybius, and Paulus Ægineta treat it in general as a curable disease of not very serious import. This skin disease is neither contagious nor dangerous to life, nor, in most cases, productive of much incon-venience or suffering to the individual; and, ex-cept for the sense of disgust engendered by the disfigurement which it causes in the rare case of its affecting the face, it is not injurious to the community. And yet the LXX translators and St. Luke must have known of this use of the word which they employ as the equivalent of zara'ath. On the other hand, the disease now called leprosy must have been known in Bible times, and could scarcely escape notice. Besides, other diseases of the skin did not produce ceremonial uncleanness, and this group of scaly eruptions which the Greeks called *lepra* was not necessarily associated with dirt or vice, and could scarcely be singled out from allied diseases as divine visitations; also the scaliness which, from the first, is distinctive of

these, is not mentioned as a specific character. The true leprosy has been known in India since the days of Atreya, about B.C. 1400; and it is said to be referred to in Japanese records about 500 years later. In the Egyptian papyrus Ebers, written in the reign of Amen-hotep I., about B.C. 1550, there are over a score of prescriptions for an apparently intractable disease called ukhedu, which attacked the head, the limbs, the face, and the body generally; which was attended with the development of bean-like nodules (hunhun), open sores, or skin spots, which were liable to ulcerate, and had to be covered with plasters. The singular form of this word was probably *khed*, and in C-ptic the derivative *chot* is used for a swelling, and, with the status constructus of the verb er prelixed (erchot), it is used for a sore or an ulcer. There is little doubt that this disease was leprosy. In the Coptic version of Leviticus another cognate

word is used, *ceht*, to denote leprosy. The first classical reference to the disease is in the Prorrhetica of Hippocrates (ii.), where, after referring to lepra, he mentions the Phenician disease as a far more serious malady. There is also a reference to leprosy, although not by name, in a fragment of Hesiod quoted by Eustathius in his Comment. in Odyss. v. p. 1746. Galen men-tions it under the name elephantiasis, and says that it is common in Alexandria, on account of the coarse food of the people. To this also Lucretius (vi. 1114) refers-

# 'Est elephas morbus qui propter flumina Nili Gignitur Ægypto in media neque præterea usquam.'

more probably the scalp psoriasis, as is the same word in *Eumenides*, 754. Themison is said by Cælius Aurelianus, iv. 1, to have described it about B.C. 100, but his description is lost. The scantiness of the references in classical literature before the beginning of the Christian era support the statement of Pliny (xxvi.), that it was brought into Europe from Syria by the army of Pompey (B.C. 61). Others of the Greek and Latin physicians

#### LEPROSY

of later date describe it under the name *elephanti*asis (Celsus iii. 25, and Soranus, according to Marcellus, xix.). Paulus Acgineta compares it to cancer of the whole body. Aretæus also gives a graphic description of its loathsome later stages. For an account of the characteristics of the advanced stages see Thomson, Land and Book, ii. 530.

The first biblical reference is in the account of the signs given by God to Moses whereby he was to prove to Pharaoh his divine commission  $(Ex 4^6 J)$ ; but in  $Ex 7^{10-13}(P)$ , where his interview with Pharaoh is reported, there is no mention of this sign being shown. The reason of this omission is not difficult to understand. This incident may be the foundation of Manetho's story quoted by Josephus (c. Ap. i. 31), that Moses was a leper, and was expelled from Heliopolis on this account. Manetho also said that the Jews were driven out of Egypt because they were afflicted with this disease (*ib.* i. 20).

The second historical mention of it is very significant. In Nu  $12^{10}$  the smiting of Miriam with leprosy is recorded. Here we have a graphic reference to the effects of the disease in Aaron's prayer for his sister, when he says, 'Let her not, I pray thee, be as one dead, of whom the flesh is half consumed (eaten away) when he cometh out of his mother's womb' (v.<sup>12</sup>).

In Lv 13 there are minute instructions given for the recognition of these diseases in their early stages. Here the name is used with nega' prestages. Here the name is used with nega pre-fixed to indicate that it is regarded as a 'stroke from God' (cf. Vulgate rendering of 'smitten' by leprosum in Is 53'). There are here apparently seven varieties of the disease to be distinguished. (1) new se'eth, LXX own, a rising of the skin or subcutaneous nodule. (2) new sappahath, LXX onmaria, a scab or cuticular crust. (3) new bahereth, LXX  $\tau\eta\lambda a (\gamma\eta\mu a, a bright or shining spot. These$ are the earliest appearances and even at this stageare the earliest appearances, and even at this stage the disease is said to exhibit the two distinctive features of being really subcuticular, and of turn-ing the hairs white. If these diagnostic marks are present when the suspect is brought before the priest, he is to be pronounced unclean at once; but if not, he is to be shut up for seven days, and then again inspected. Should the disease have undergone no change during this period, he is again to be isolated for another week, and again examined. (4) Another form, or perhaps a later examined. (1) Another form, of pennals a later stage of the disease, is that in which 'quick raw flesh,' that is, red granulation tissue, appears in the tunid spot  $(v.^{10})$ ; this was to be recognized as a sure sign, and the person declared unclean. (5) One of the most singular provisions of the law is that in v.13, referring to the cases in which the white efflorescence becomes universal from head to foot; when this occurs, the person is pronounced clean. It is probable that in this case the priest was to consider it as a form of psoriasis, and not as a genuine leprosy, which is rarely universal until a late stage, and then is not white. If, however, any sign of the coexistence of leprous ulceration with the whiteness should appear, he is to be declared unclean (v.14.). To provide for the case in which this redness or sore is only a temporary pustule, such as often occurs in almost any skin disease, the patient is to come again to the priest as soon as the sore is healed, when he is In all these cases the diagnosis in the early

In all these cases the diagnosis in the early stages is between leprosy in which the infiltration is dermal and the hairs lose their colour, and eczema or psoriasis in which the swelling is chiefly epidermal and the hairs do not change. If, during the periods of quarantine, the spot appears to be fading (sp; kāhāh, RV 'dim,'AV 'somewhat dark,'

### LEPROSY

following LXX *dµavpd*), and not spreading, he is to be pronounced clean, and the disease is said to be only ngapo mispahath, a scab, *i.e. psoriasis*, unless on further inspection it appeared to be spreading.

on further inspection it appeared to be spreading. (6) Another variety, described in v.<sup>16</sup>, is that which attacks the cicatrix of an ulcer or a boil, *ind shifts*, in which there is a white rising, *st ith ith that*, that is, a smooth shining spot, red in patches; the description seems to indicate some one of an obscure group of diseases of the skin, called by various names, *cicatricial keloid*, *scleriasis*, etc. Between all these diseases and leprosy there are many points of resemblance, but there is no evidence that they are contagious. In doubtful cases the priest is to require a week's quarantine in order to decide whether it is true leprosy or only *sarebeth hashshin* (RV 'the scar of the boil,' AV 'a burning boil'), a temporary swelling from the irritation of the scar, or else only the cicatrix itself (v.<sup>29</sup>). A similar form of the disease may attack the scar of a burn (v.<sup>24</sup>), and is to be treated in the same way.

(7) The form of disease affecting the hairy scalp (v.<sup>30</sup>) is called pn nethel (LXX  $\theta pa \delta \sigma \mu a$ , AV 'a dry scall'), and is to be diagnosed by the presence of thin yellow hairs. Every suspicious case is to be inspected, and if there be no black hair in the spot whereby its nature may be tested, the person is to be subjected to a week's quarantine, after which, if the disease is not spreading, all the hair is to be shaven except that on the scall. If, after another week's seclusion, the scall still appears to be spreading, he is to be pronounced unclean, whether there be yellow hair or not. In the Tract Negaim, x. 5, it is directed that two hairs should be left in shaving the part, outside the margin of the scall, so as to test its spreading. Yellow thin hair and yellow crusts are characteristic of favus or crusted ringworm, which is a very contagious disease, due to the presence of a fungus, Achorion Schanleinii. The presence of black hair in any diseased patch is usually sufficient evidence that no parasitic fungus is present.

In any diseased patch is usually sumcent evidence that no parasitic fungus is present. In v.<sup>362</sup>, rules are given for the diagnosis of *bchârôth lébhânôth*, white shining spots on the skin, —whether another variety of disease or not it is difficult to say. If these are dim or dull in colour, they are only 'freekled spots' (AV, 'tetters' RV). This eruption, which is called pro *bôhak* (*auhar* in Jerus. Targ., LXX *divés*), is probably the *letya* of the older Greek physicians, the *vitiligo* of Celsus, and does not render the sufferer unclean. A common eczematous skin disease is called in some places in Arabia by this name still; see Forskál's note to Niebuhr's *Arabia*, 1774, 119. According to Minch, a form of *vitiligo* is prevalent among the Sarts of Turkestan and is called by them *pycz*. Those afflicted with it are segregated from the community along with the lepers, as it is regarded as contagious. Baldness and forehead baldness are distinguished from leprosy in vv.<sup>40-41</sup>, unless they are complicated by the other signs of leprosy, in which case the man is to be pronounced utterly unclean, as the plague is in the head.

The Rabbinic comments on these regulations in Negaim, Siphra, and Mcchilta are very prolix, and add nothing to our real knowledge of the disease. R. Chanina recognizes 16 kinds; R. Dosa, 32; and Akiba, 72. In Jalkut on Job 28<sup>35</sup> man is said to be made up half of water and half of blood; if he sin, this balance is disturbed,—either the water becomes excessive and he is dropsical, or the blood increases and he becomes leprous. Many of the later commentators, medical and otherwise, are not much better. See Mason Good, Study of Medicine, iv.

For those pronounced unclean there was no

# LEPROSY

further seclusion; but they are to be excluded from the community, to live outside the towns, with rent clothes (in the case of men; women were not to rend their garments, Sota ii. 8), and the hair of their head going loose. They are directed to cover their upper lip, and to cry 'unclean.' This exclusion is represented as put in practice when the tabernacle was constructed (Nu 5<sup>5</sup>, P), and Miriam was one of those temporarily shut out in the early days of the law (Nu 12<sup>14</sup>, JE). The Deuteronomic code refers to these laws (Dt 24<sup>6</sup>). The four lepers of 2 K 7<sup>5</sup> were thus outside Samaria even during the siege. According to Negaim xii. 11, if lepers entered into a house, they rendered it unclean (see also Kelim i. 4); or, if under a tree, they defiled any one passing beneath its shade. As they could not enter a walled town, they were excluded from synagogue services there; but in unwalled towns there was often a place set apart for them in the synagogue, into which they could enter before the rest of the congregation; but they could not leave until every one else had departed. Any transgression of these rules was punished by 40 stripes (see Otho, Lex. Rabbin. 324). The Jews regarded leprosy as a contagions

The Jews regarded leprosy as a contagious disease, and recent investigations have confirmed this opinion, although it is not communicated very easily, and seems to have a long incubation period. It is produced by a specific schizomycetous fungus, *Bacillus lepra*, discovered by Hansen in 1871, which is of very minute size. These organisms retain their vitality for a long time. Köbner found them living in a piece of leprous tissue that had lain forgotten, wrapped in a piece of paper, for ten years. It is a peculiarly human parasite, the result of many experiments showing that it is not communicable to animals by inoculation. The bacillus has been found, though sparingly, in the arth of a pathway frequented by lepers at the Almora Asylum. Cases like that of Damien show that it is communicable to healthy persons. For other instances see Abraham in Allbutt's System of Medicins, ii 41. It is interesting to note that calmet long ago supposed leprosy to be due to organisms, which he describes as animalculæ that eat the skin from within (Comm. on Levit.).

It was probably a fairly common disease among the Jews (Lk  $4^{27}$ ), although not many cases are mentioned; but there are more references to it than to any other ailment. It has been supposed, though without any reason, that the kiln-work in Egypt fostered it in the days before the Exodus. Buttorf, however, says it is not as common among the Jews as among other peoples, and ascribes this to their separateness, and to their abstinence especially from swine's flesh (see Tacitus, *Hist.* v. 4). In the NT there are records of only twelve cases: the ten lepers in Lk 17<sup>13</sup>, the leper in Mt 8<sup>2</sup> whom our Lord touched (cf. Mk 1<sup>40</sup>); but these are only specially selected cases, for He commanded His disciples to cleanse the lepers (Mt 10<sup>6</sup>; see also Mt 11<sup>6</sup> and Lk 7<sup>29</sup>).

The course of the disease is slow, especially in the early stages; there are cases on record of persons who lived as lepers for 40 years. Observations in Trinidad gave an average of nearly 9 years as the duration of the disease (Beavan Rake). According to Danielssen, in Norway, and Carter, in Bombay, the average duration of life in the nodular form is about 9 years, and in the form which affects the nerves and causes anesthesia (the commonest form in the East) it is 184 years. Cures are rare; the official report for Norway gives 38 cures during the period 1881-85 (the total number of lepers there in 1892 was 500), Simon the leper may have been one of those cured by Christ (for traditions see Ambrose, Comm. on Lk 6;

VOL. 111.--7

Theophylact in Mt 26; Nicephorus, HE i. 27). In the early stages there are often few symptoms and little discomfort, and sometimes 'the eruption may vanish altogether, giving rise to illusory hopes of cure' (Abraham). It is therefore easy to understand how a great general like Naaman might retain his office although a leper ( $2 K \delta^{1}$ ). (See in this connexion Jos. Ant. III. xi. 4). King Robert the Bruce, who according to Ker (ii. 357) died of this disease, was apparently suffering from it when he held the Parliament at Cambuskenneth, and organized his last invasion of England. According to a doubtful tradition the emperor Constantine was a leper; see Zonaras, Annales, xiii. c. 3. The sudden infliction of leproxy as a divine

The sudden infliction of leproxy as a divine judgment is recorded not only in the case of Miriam, but also in that of Gehazi ( $2 K 5^{27}$ ), which could not be due to infection, although it is called the leproxy of Naaman, as in all known instances the incubation period is much longer. There is also the example of Uzziah ( $2 K 15^5$ ,  $2 Ch 26^{29}$ ). Of him it is said that he lived in a nytop n's beth hahophshith, LXX olice  $4\pi\phi ousd\theta$  (or  $4\phi\phi ousd\theta$ , or  $4\phi\phi ousd\theta$ ), 'a several house' or (RVm) 'a lazar house.' According to Jos. Ant. IX. x. 4, this judgment was accompanied by an earthquake (see Zec  $14^{4-5}$ ). This author also states that, being a leper, Uzziah was buried in his own garden; but another account is given in Ch. Herodotus says that the Persians believed that a man was afflicted with leprosy for having committed some offence against the sun; that every stranger who had the disease was driven out of the country; and that they even destroyed white pigeons, thinking them to be leprous (i. 138). For other references to leprosy as a judgment see Erachin 16; Baba Bathra 10. 4; Midrask Rabba on Lv 14, etc. Chrysostom says, however, that in his day lepers were not excluded from the cities (Vidi Dominum, etc. iv.).

The heredity of leprosy was generally believed in by the Jews; it is referred to in the curse on Joab (2 S  $3^{20}$ ), and in the punishment of Gehazi (2 K  $5^{27}$ ). The Leprosy Commission in India could discover a history of heredity only in 5 per cent.; and of the 108 cases in the Tarn Tar.n Asylum only 16 had a leprous parent or grandparent. No treatment is referred to in the Bible; the washing of Naaman was a trial of faith, not a remedy (in connexion with his speech about Abana and Pharpar see Strabo, viii. 3. § 19, concerning the river Alpheus). Jehoram, from his ejaculation in 2 K 5<sup>7</sup>, evidently thought leprosy beyond human skill to cure.

The date of the spread of the malady to Western Europe is unknown, but it was in Britain before the first Crusade, as the leper house at Canterbury was founded in 1096, the year of the starting of the Crusade. Between that date and the building of the last in 1472, one hundred and twelve such asylums were set apart for lepers in England. In early Christian times there were special rules for lepers. The Council of Ancyra (314) excluded them from the churches, and ordered them to remain outside with demoniacs and those guilty of unnatural crimes, all of whom were called *hiemanics* (xeuajóµeroi) on this account (Martene, Coll. Ampliss. vii. p. 1365). It is supposed that the small skew window often seen in old churches, and commanding a view of the altar, was for the purpose of allowing the *hiemanics* to see the mass, hence these squints are often called *leper windows* or *hogioscopes*. The Third Council of Orleans forbade lepers to wander from one diocese to another; and Gregory IL, in his letter to Boniface in A.D. 715, directed the administration of the Eucharist to them by themselves. The bishops were also ordered to supply them with food and raiment out of the Church funds.

There is no reference in the Bible to leprosy as a type of sin; the nearest approach to this is in Ps 51<sup>7</sup>, where the reference is to the ceremonial cleansing of the leper. Among the Fathers, also, there are few who take note of a similitude so familiar in modern homiletics. Origen (Hom. vii. in Nu) speaks of heretics outside the Church as having leprosy of mind; and Chrysostom (Hom. iv. in Ti 2) is one of the earliest writers who directly compares the defilement of sin to leprosy. The one part, indeed, of the Levitical law which is most often noticed, is the cleanness of the man who is all leprous, and this is used to illustrate the most diverse lessons by Tertullian (de Pudicitia, xx.), Theodoret (Quastiones in Lv 13), and Origen (in Levit. viii. 231). In one of the epistles doubt-fully attributed to Jerome, he treats of the various kinds of leprosy (Ep. xxxiv.). Leprosy was most commonly regarded as a type of heresy rather than of other sin (Rupertus Tuitiensis, p. 271; Bede, in loco, 'Lepra doctrina falsa est'; see also Rabanus Maurus, Allegoria, s.c. 'Lepra').

did not resume his place in the community until he had been ceremonially cleansed. The priest he had been ceremonially cleansed. The priest went outside the city to look on hin, and if he saw that he was healed (1) he commanded that two living clean birds be brought, with a rod of cedar wood (probably juniper, the wood of Juniperus oxycedrus supposed to be incapable of decaying) a cubit long (Neg. 14. 6), scarlet (wool), and hyssop ('the humblest plant for a disease gener-ated by pride,' Midrash Rabba, Kokeleth 10. 4). One bird was to be killed, in an earthen vessel, over running water—that is, water from a runover running water-that is, water from a running stream is to be put into the earthen vessel to ning stream is to be put into the earthen vessel to keep the blood liquid, and as a type of purifica-tion. The living bird and the cedar, to which the hyssop was to be tied with the scarlet woollen band, are to be dipped in the blood, and the leper is to be sprinkled therewith seven times. Some have supposed that, as 'the blood is the life,' this signifies the imparting of a new life to one who has, ceremonially, been dead. He is then declared clean and therefore mermitted to come into the clean, and therefore permitted to come into the city; and the living bird is set free in the open country—a symbol of the carrying away of the evil (see Frazer, Golden Bough, ii. 151). (2) The leper is then to wash his clothes, shave off all his hair, and bathe; but must stay outside his house for 7 days; he then repeats the ablutions and shaving, and (3) on the 8th day makes his final offering at the temple. This consists (a) of a guilt-offering at of a he-lamb, which with a log (about 3 gills) of olive oil was to be waved before the Lord, and the lamb was to be killed. The priest was then to take some of its blood, and to touch with it the right ear, the right thumb, and the right great toe the consecrated oil into the priest was then to pour the consecrated oil into the palm of his left hand, and, dipping his right forefinger in it, he was to sprinkle some of it seven times before the Lord, and then to touch with it the places upon which the blood of the guilt-offering had been put, and the rest of the oil was to be poured on the leper's head. This offering was a reparation to God for the loss of service during the time of his seclusion—the blood and oil typifying atonement and reconsecra-tion. (b) A second he-lamb was to be offered as a sin-offering, as an atonement for sin on his re-admission into the congregation, and afterwards (c) a ewe-lamb was to be offered as a burnt-offering, and  $\frac{1}{4}$  the sof an ephah (about  $7\frac{1}{2}$  quarts) of flour as a meal-offering. During these ceremonies the man stood in the Nicanor gate between the Court of the women and the Court of Israel, into which he was not free to enter until the purifica-tion was accomplished. A peor man was allowed

#### LEPROSY

to substitute two doves for the second pair of lambs, one for the sin-offering and one for the burnt-offering, and needed only to bring  $\frac{1}{10}$  th of an ephah of flour for the meal-offering (Lv 14<sup>1-32</sup>).

In mediæval times a man who was a leper was formally excluded from the Church by a funeral mass, in which earth was thrown on his feet as a sign of symbolic burial, the priest saying 'sis mortuus mundo, vivens iterum Deo.' The leper then laid aside his garments in the church and put on a black habit. An acrount of the rituals observed in connexion with lepers is given by Martene (de Rit. Antiq. iii. 10). The ceremonies for the readmission of those healed were similar to the penitential and reconciliation ceremonies for the other hiemantes.

Opinions are divided as to the nature of Job's disease. The Talmudists called it *hakok* or scratching leprosy (*Baba Kamma* 80b). From the description of the symptoms  $(2^{7L})$  and of his isolation  $(19^{14-11})$ , it has been supposed to be some form of leprosy <sup>a</sup> (see MEDICINE). For older opinions on the subject see Wedel, *de Morbo Hiobi*, Jena, 1687. Leprosy in Garments.—In Lv 13<sup>cra</sup> is a description of the supervise of

Leprosy in Garments.—In Lv  $13^{add}$  is a description of certain reddish or greenish discolorations in garments, woollen, linen, or leathern, which are called zara ath mamiereth (v.<sup>41</sup>), a fretting leprosy, eating a hole in a garment. It is probably the effect of a fungus or mildew, said, but with slight evidence, to be from the use of the wool of dead or diseased sheep (Michaelis, Com. on Laws of Moses, iii. 290), or from the skin of a diseased animal; but this would not account for its attacking linen. Whether it is due to a specific parasite (as Formstecher supposed, *Isr. des neunzehnten Jahrhunderts*, 1847, No. 32) or not is uncertain, but this is improbable. If after a week's seclusion the stain spreads, the garment is pronounced unclean, and is to be burnt. If it have not spread, the fabric is to be washed and shut up for seven days more, when, if it remain unchanged, it is to be burnt; but if it fade after washing, the spot is to be torn out and burnt, and the rest of the garment is to be washed and pronounced clean. Where garments are wern for a long time, as they often are in the East, fungus growths are not unlikely to occur. It has been supposed that the 'garment spotted by the flesh' of Jude<sup>25</sup> refers to this; perhaps also there is a reference in Job 13<sup>26</sup> and 30<sup>16</sup>.

Leprosy in the House. — Certain discoloured patches on the inner walls of a house are said to be leprous (Lv 14<sup>446</sup>). These are described as hollow strakes, sh k k a ' dr o' h, that is, depressed spots, coloured greenish or reddish. When discovered, the occupant is to empty the house, lest, if pronounced unclean, all in the house be defiled. The priest is then called to inspect, and he shuts up the house for a week. If it spread in this time, the stones are to be taken out and cast into an unclean place; the plaster is to be scraped off the walls, and the house is clean; but if it recur, the whole house is to be destroyed. Before the cleansed house is inhabited, a cleansing ceremony similar to the first part of the cleansing ceremony of the leper is to be performed. It is probable that this disease is the formation of a flocculent mass of calcium nitrate, such as often takes place when the gases set free from decaying animal matter act on the lime of plaster, and is sometimes called mural salt. This, with an accompaniment of mould or other hyphomycetous fungus, produces an appearance like that discribed (see Blechrodt, *Theoret. Pract. Abhandl. über die Ursachen der Feuchtigkeit in Gebäuden*, Weinnar, 1839, 45). Jerome spiritualizes this plague, 'Arbitror cum in

\* So Davidson, Dillmann, and most modern commentators; cf. Dt 23<sup>27</sup>.

#### LESHEM

parietibus domus lepra esse referatur, hæreticam perfidiam notari' (Ep. xxxiv.).

juerfidiam notari' (Ep. xxxiv.). LITERATURE — The bibliography of leprosy is immense, but most of the older treatises are of little value. The best are Bartholinus, de Morbis Biblicie, Hanis, 1671; also the treatises of Dorndorf (Zurich, 1729), Withof (Duisburg, 1759), Eschenbach (Bostock, 1774), Chamseru (Men. de la societá d'émulation, Paris, 1810, ill. 335), Jahn (Biblische Archdologie, Wien, 1818) ill 355), Zensler (Geschichte des abendländischen Aussatzes). For the modern literature the most useful works are Abraham, in Allbutt's System of Medicine, ii. 41; Report of the Leprosy Commission to India, London, 1993; also Report of the Com-mission to India, London, 1993; also Report of the Com-mission to India, London, 1993; also Report of the Com-mission to India, London, 1993; also Report of the Com-mission to India, London, 1993; also Report of the Com-mission to India, London, 1993; also Report of the Com-mission to India, London, 1993; also Report of the Com-mission to India, London, 1993; also Report of the Com-mission to India, London, 1993; also Report of the Com-mission to India, London, 1993; also Report of the Com-mission to India, London, 1994-96; Hillis, Leprosy in Britiak Guiana, 1881; Carter, Leprosy and Elephantiasis, Junch, Probaza na Tupe Roseris, Kiov, 1889; Fox and Far-guhar, Endemic Skin Diseases of India, London, 1876; Wolters in Centralblatt für Bakteriologie, xill, 1993; Simpson, Edin-burgh Medical Journal, 1841-42, vola, 1vi, 1vi, 1; Thin, Leprosy, London, 1893; J. R. Bennett, Diseases of the Bible, 1887. For an account of the Knights of St. Lazarus, who had always a leper for their Grand Master, see Hélyot, Ordres Monast. 1721; Mochmen, de med, equil. dignsil. ornal, p. 65. On the Levitical prescriptions regarding leprosy, see, above all, Dillmann-Ryssel, Ez-Le, p. 565 ff., where further refer-ences to the literature of the subject will be found. A. MACALISTER. LESHEM ( $ort^2$ ).—A form, occurring only in Jos

**LESHEM**  $(a_{7}^{\downarrow})$ .—A form, occurring only in Jos  $a_{7}^{\mu}$ , of the name **Laish** (which see). Wellh. (de 19<sup>47</sup>  $c^{4}$ , of the name **Laish** (which see). Wellh. (*de Gentibus*, etc. 47) emends  $c^{4}$ , which is admitted by Dillm. to have been 'perhaps' the original pronunciation.

LESSAU (A Acoraoú, Vrid Accoraoú).- A villago  $(\kappa \omega \mu \eta)$  where an encounter took place between the Jews and Nicanor, 2 Mac 14<sup>16</sup>. The site is unknown, and the text is uncertain. *Dessau* of AV may be due to the frequent interchange of  $\Lambda$  and  $\Delta$  in uncial Greek, or (as Ewald conjectured) it may be another form of Adasa (cf. 1 Mac 740).

LET .-- There are two Anglo-Saxon verbs somewhat alike in spelling but directly opposite in meaning, *latan* to permit, and *lettan* to hinder. In middle English *latan* became *leten*, and *lettan* became letten, and they were still distinguishable. The double t was kept by careful writers in the verb meaning 'to hinder,' or the subst. meaning 'hindrance,' as by Milton in *Arcopagitica* (Hales ed. p. 57, l. 1), 'evill hath abounded in the Church by this lett of licencing.' But when it was dropped there was no way, except by the general sense of the passage, of distinguishing two words whose meanings were an different that a unitate was meanings were so different that a mistake was equivalent to the insertion or omission of a not. In AV the verb occurs six times with the sense of 'hinder,' and is always spelt in the ed. of 1611 with one t, Ex 5' 'Wherefore do ye, Moses and Aaron, let the people from their works?' (1977, RV 'loose'); Nu 2216 mars. 'Be not thou ( $\psi$   $\gamma$   $\alpha$ , RV 'loose'); Nu 22<sup>16</sup> marr. 'Be not thou letted from coming unto me'(text, 'Let nothing hinder thee'); Is 43<sup>13</sup> 'I will work, and who shail let it?'( $\gamma$   $\gamma$   $\gamma$   $\gamma$ , AVm 'shall turn it back,' RVm 'reverse it'); Wis 7<sup>22</sup> 'an understanding spirit . . . which cannot be letted'( $d\kappa\omega\lambda vror$ , RV 'unhindered'); Ro 1<sup>13</sup> 'oftentimes I purposed to come unto you, (but was let hitherto)'( $d\kappa\omega\lambda \ell \theta\eta \eta$ , RV 'was hindered'); 2 Th 2' 'only he who now letteth will let, until he be taken out of the way' ( $\delta \kappa ar \epsilon \chi \omega \eta$ , RV 'one that restraineth'). The verb occurs also in Pr. Bk., Collect for 4th Sun. in occurs also in Pr. Bk., Collect for 4th Sun. in Advent, 'we are sore let and hindered in running Advent, 'we are sore let and hindered in running the race that is set before us.' In the Pr. Bk. of 1552, 1559, and 1604 (Communion), we read, 'It is an easy matter for a man to say, I will not com-municate, because I am otherwise letted with worldly business'; but in 1662 'letted' was changed into 'hindered.' Examples from the earlier versions which have been changed in AV holde saye: who shal let us, to have oure bely ful of his flesh ?' 1 P 3' Tind. 'that youre prayers be LEVI

not let.' Cranmer is fond of the word, frequently using it along with one or more synonyms, as Works, i. 82, 'she wrote letters to the Pope, calling upon him in God's behalf to stop and let the said marriage '; p. 85, 'do not interrupt, let, or hinder the said David.'

As a subst. 'let' is found in AV only in the heading to Dt 15, 'It must be no let of lending or giving.' It occurs occasionally in Pr. Bk. In the Preface to the Scotch Liturgy of 1637 we read, 'After many lets and hindrances, the same cometh now to be published, to the good, we trust, of all God's people, and the increase of true piety, and sincere devotion amongst them.' 'In all our pro-mises,' says Tindale (Expos. p. 57), 'it is to be added, If God will, and If there be no lawful let.

J. HASTINGS.

**LETHECH** occurs in AVm and RVm of Hos 3<sup>3</sup> instead of 'an half homer' which is read in the text of both AV and RV. Both the original reading of the passage and the capacity of the measure (?), called *lethech*, are uncertain. For the MT (2), called *lethech*, are uncertain. For the MT (2), is a skin of wine, which may or may not imply that a different Heb. text from the present lay before the Greek translator (see Nowack, *ad loc.*). According to Junit the different when the state of the different is the different between the dif Jewish tradition, the lethech  $= \frac{1}{2}$  homer = 4 bushels. See art. WEIGHTS AND MEASURES. It has been computed that the whole amount of grain here mentioned would have been equal in value to 15 shekels of silver, so that the price paid by Hosea in money and kind together would be 30 shekels. He thus re-acquired his wife for the cost of a slave (cf. Ex 2132). J. A. SELBIE.

#### LETTER.--See EPISTLE.

**LETUSHIM** (DETER, Aaroustein) and **LEUMMIM** (CTUP),  $Aow\mu(\iota)e(\mu)$ .—Sons of Dedan, Gn 25<sup>3</sup>. The MT gives the names of Dedan's sons as Ashurim, Letushini, and Leummim; but the LXX prefixes to this list Raguel ('Payout) and Nabdeel (Na $\beta\delta\epsilon_{\eta\lambda}$ ). The three given by the MT are pointed as plurals, and hence were regarded by some ancient inter-preters as descriptive epithets (so Targ. Onk.); and the third of the names, Leummin ('nations' in Heb.), lends itself well to that explanation; some races which the ethnologist chose to classify among Dedanites may have been known as 'nations' or 'hordes,' just as the Berbers are called by the Arabs Kabā'il or 'tribes,' and their language Kabīlī. For Letushim the Rabbis Rashi, ad loc.) suggest an etymology from the Hebrew verb te; meaning 'scattered'; they can indeed point with justice to the interchange of ' and a at the beginning of words, but this explanation does not seem satisfactory. The apparent con-nexion of this word with the verb #27 'to sharpen' is rather in favour of the view (taken by Steiner in Schenkel's *Bibel-Lexicon*) that the words repre-sent names of *trades*; and such a classification would bear a curious likeness to that of the S. Arabian Parias, some of whom are called *Hä'ik*, 'weavers,' etc. (Maltzan, *Reisen in Arabian*, i. 190, 191). The greater number of authorities, however, regard these words as proper names, and *Letushim* has been compared with word of some Nabatean inscriptions (Ley, *ZDMG* xiv. 403, 404), while a name resembling *Leummim* has been found is rather in favour of the view (taken by Steiner while a name resembling Leummin has been found in a Sabsean inscription (Oxf. Heb. Lex.). If they are personal names, the final  $\Box$  could be more easily explained from Sabsean than from Nabatsean. Glaser (Skizze, ii. 461) thinks the home of the tribes thus designated is to be sought in the Sinaitic peninsula, but he throws no new light D. S. MARGOLIOUTH. on the name.

LEVI (לָר, LXX Aev(e)((v)).-Son of Jacob and

Leah. The meaning and derivation of the name are uncertain. (1) In Gn 29<sup>34</sup> (J) Levi is interpreted as joined, i.e. husband to wife ; the root lavah is used with this meaning in the reflexive conjugation (Niphal), Is  $56^{3.6}$ , Ps  $83^{8}$ : in Arab. it = 'turn, bend.' In Nu  $18^{3.4}$  (P) there is a word-play; the tribe of Levi is joined to, attendant on, Aaron. After the establishment of the Levites as subordinate temple ministers, this meaning was read into their name; ministers, this meaning was read into their hands; it does not, of course, represent an etymology in the strict sense. (2) Lagarde, Orientalia ii. 20, Mitheilungen i. 54 ff., explains Levites as those who attached themselves to, accompanied, the Israel-ites at the Exodus from Egypt; like Moses, they were Egyptians. The name might also mean those who were attached to the ark. Thus Levi is not a pame like the paper of the other patri is not a name like the names of the other patri-archs, but an adjective; and it need not have borne the same meaning in the time of Ezra as in the time of Solomon or Moses. (3) Bandissin, Gesch. AT Priesterthums 72 n.<sup>1</sup>, finds in the name an original abstract meaning,  $l\bar{ev} =$  following, escort, from which the adj. levi was formed, in the sense of one who escorted the ark. The name was thus of one who excerted the ark. The name was thus first given to the tribe of priestly servants, and from them to the ancestor of the tribe. Against these views see Kautzsch, SK, 1890, 771 f., who points out that the manner in which Levi is conpolitical relationship, such as exists in the case of the other sons of Jacob, makes it impossible to views presuppose. The name of the tribe was not derived from the name of any official function; the escort of the ark was not the prerogative of the Levites only, for in the older narratives it is the priests who have this charge. Similarly, Stade, ZAIW i. 1881, 112-116, insists, with reason, that no different origin can be allowed to Levi than is given to the other patriarchs. Against deriving *levi* from *lavah*, he urges the form of the noun with  $\tilde{e}$ , and the fact that in early times Levi was a purely secular tribe, Gn 49<sup>6-7</sup>. (4) Hommel, Aufsatze u. Abhandlungen 30 f., Sud-Arab. Chrestom. 127, AHT 278 f., connects levi with lavi'u (fem. laviat)=priest, on the Minæan inscriptions from el-Ola, N. of Medina; and Mordtmann, Beiträge el-Ola, N. of Medina; and Mordtmann, Beitrage z. minäischen Epigraphik, 1897, 43, and Sayce, Early Hist. of the Hebs. 1897, 80, agree with him. The usage of the word in these inscriptions ('a priest of Wadd,' 'his priestess') is, however, very different from the usage of Levi in the OT. Such an ex-pression as 'a Levite of J"' is never found; and the primary meaning of Levite is not 'priest,' but 'a member of the tribe of Levi.' (5) Wellhausen, Prolecomeng 3 146, propage an etymology which <sup>1</sup>a member of the tribe of LeVI.<sup>2</sup> (5) Weilhausen, *Prolegomena*<sup>3</sup> 146, proposes an etymology which has been widely accepted, and may be considered the most plausible yet put forward : Levi is simply a gentilic form of his mother's name, Leah = ' wild cow' (Arab. la'ay, la'at). So Stade, ZATW i. 112-116, GVI i. 146, 152 f.; Gray, Hebr. Pr. Names 6 etc. Nöldelic on the whole scients their the use 96, etc. Nöldeke on the whole accepts this, though not without hesitation, ZDMG xl. 1886, 167. Robertson Smith, who maintains that 'the most ancient division of the Israelites is between Rachel and Leah, both animal names, detects in this family history the presence of the matriarchal system of reckoning descent, and the custom of calling tribes after the names of animals (totemism); Kinship and Marriage 30, 195, 219 f., 257. (6) Two other etymologies may be mentioned. Wellhausen, Skizzen u. Vorarbeiten iii. 114 n. [the note is omitted in the second edition (1897), p. 119], alludes to the ancient Arabic custom of consuming the flesh

<sup>4</sup> Of the sons, grandsons, and great-grandsons of Levi, almost half have names with this gentilic ending, e.g. Merari, Mahli, Mushi (from Mosheh, Moses), Libni, Shimei, Bukki, Uzzi, Kishi, etc. (Nu 31741 2089, I Oh 61-49). of a sacrifice at a family meal. A portion of the flesh was set aside for a guest whom it was desired to treat with special honour (cf. 189<sup>33</sup>), and called the *lavijja* (Agh. vii. 76. 6). The *lavijja* would be the priests' portion; hence possibly the origin of the name Levi. In this connexion we can hardly fail to remember the Minsean *lavi'u* = 'priest.' G. H. Skipwith, in the JQR xi. 1899, 264, ingeniously connects *levi* with *leviathan*, the root *lavah* describing the coils of the serpent. This suggests that Levi derived his name from a serpent-god, and may explain why the Levite Moses selected the brazen serpent, Nehushtan, as an emblem of the God of Israel!

Early Aistory of Levi.—An incident in the early history of Levi is preserved in Gn 34. The young Canaanite chief, Shechem, had conceived a passion for Dinah, the sister of Simeon and Levi, and had 'humbled' her, to the indignation of the sons of Jacob (vv.<sup>30, 31, 5, 7</sup>). The two brothers undertook to avenge the outrage themselves; they assassinated Shechem, and carried off Dinah out of his house (vv.<sup>20, 30, 5, 7</sup>). That the action of Simeon and Levi was treacherous and savage is implied in J, the earlier of the two documents which are combined in Gn 34. Shechem had accepted the terms imposed upon him by the father and brethren of the damsel (vv.<sup>11, 12, 19</sup>). What the terms were is not stated; possibly the circumcision of the bridegroom before marriage (Wellhausen, *Prolog.*<sup>3</sup> 355 n., *Composition* 319: cf. Ex 4<sup>34-35</sup>, and Robertson Smith, RS 310), or the grant of a piece of territory to Jacob near Shechem (Cornill, ZATW, 1891, 12, cf. Gn 31<sup>325.</sup>). Whatever the agreement was, Simeon and Levi violated it, and acted independently of their brethren, who took no part in the deed of violence, and of their father, who bitterly resented it. We may notice that Jacob's reproof is prompted by instincts of self-preservation, and not by moral displeasure. The two brothers, however, take up a moral ground in their retort, evidently with the sympathy of the narrator (34<sup>30, 31</sup>.).

not by moral displeasine. The two hothers, how ever, take up a moral ground in their refort, evidently with the sympathy of the narrator  $(34^{30, 31})$ . The story may be understood to describe an episode in the early struggles of Israel in Canaan after the Exodus. The attachment of Shechem, son of Hannor, to Dinah, daughter of Jacob, will then represent an alliance between a branch of the Israelite family and the city of Shechem ; and the action of Simeon and Levi may be interpreted either as an attempt to seize by force this important city for themselves, or as a blow struck to free the Israelite element in the city from the danger of being swallowed up by the Canaanite majority. Whatever the motive may have been, the tradition is clear that there was treachery and violence on the Israelite side, and that in consequence Simeon and Levi received a repulse from which they never recovered. Simeon became merged in Judah, with undefined possessions on the S. frontier (cf. Jos 19<sup>1-9</sup> with 15<sup>4-32.44</sup>), though the tribe does not seem to have been so completely shattered as Levi (Jg 1<sup>2.17</sup>): while Levi also found shelter in Judah, but for the most part became a homeless wanderer in the territory of the other tribes.

This is the state of things implied in Gn 49-7 I will divide them in Jacob, and scatter them in

<sup>4</sup> I will divide them in Jacob, and scatter them in <sup>a</sup> The above follows the earlier narrative, J. In the other socount, by some assigned to E (Wellh.; Cornill, Holzinger, by others to P (Dilmann, Driver P possibly based on K, Ball P2), Hamor, on behalf of his son, negotiates a 'general marriage alliance, vr.8.9; the circumcision of all males is stipulated and accepted as the condition, vv.1417. 30.34, and all the sons of Jacob wreak their vengesnee with wholesale slaughter vv. Sac. 77-39 (cf. the later narratives of the conquest of Cansan). Perhaps the vengeance was ascribed to all Israel because of the later feeling about mixed marriages, cf. Nu 256-817-11 (P, Exr 91<sup>3</sup> 10. If this narrative belongs to E, an editor of the school of P (vv.<sup>105</sup>.250.34) has worked over the whole after the combination of J and E. See especially on this ch. Kuenen, TAT xiv. 257=Gesammette Abhandungen vi.; Wellhausen, Composition 312-319; Cornill, ZATW, 1891, 1-15.

Israel.' The verses express, in the language of vigorous denunciation, the popular verdict upon the offending tribes. It must have taken shape the offending tribes. It must have taken shape not long after the deed was done; and as the incident of Gn 34 belongs most probably to the early days of the conquest of Canaan, this will agree very well with the date generally accepted for the Blessing of Jacob, the period of the Judges, Samuel, and David. Neither Simeon nor Levi is mentioned in the Song of Deborah, Jg 5. Levi and the Priesthood. — The next important

evidence for the early history of Levi is furnished by Jg 17 and 18, a most ancient document. for the first time, the Levite is a priest. The following facts are to be gleaned from these chapters. (1) The Levite comes from Judah, the headquarters of the tribe, Jg 177-9. Both in these chs. and in 19<sup>1.18</sup> the Levites are connected with Judah; two of them come from Bethlehem 17<sup>7.8,\*</sup> We can detect traces of this connexion in the names of some Lovitical families, such as Libni, Hebroni, Korhi.†

(2) But if the Levites had found a home in Judah, their dispersion had already begun; the pressure of circumstances was driving them to seek a maintenance where they could find one, Jg 178.9.

(3) At this period any one might become a priest. Micah could consecrate one of his sons to the priesthood, 17<sup>5</sup>. But if a Levite could be found, he was, much preferred, as being specially qualified for the office, Jg 17<sup>10.13</sup> 18<sup>10</sup>. The Levite ministered in any private or local sanctuary where his services were paid for, Jg 17<sup>4.10.12</sup> 18<sup>4.30</sup>. His special skill lay in consulting and interpreting the sacred oracle (18<sup>84.</sup>), and in conducting the ritual of the ephod, teraphim, and graven or molten image  $(17^5 18^{18} \cdot$ 30.50

(4) Two points about the family of the Levite (or Levices) in this story call for special notice. In 17<sup>7</sup> it is said that 'the young man' was 'of the family of Judah'; in 18<sup>30</sup> that the Levice Jonathan was a grandson of Moses. The former of these statements raises a difficulty : how could a Levite be described as belonging to the family of Judah? It has been suggested (Wellhausen, Moore) that 'Levite' here denotes the office, not the race; the point of importance in early times being not the pedigree but the art of the priest. If this could be established, the difficulty is disposed of. But it is hard to believe that at this early period, which cannot be far removed from the date to which Gn 34 and  $49^{6-7}$  belong, the Levites as a tribe had disappeared, and that their name had been given to a priestly caste which was open to the member of any tribe who might care to enter it are Wellbausen Peroleg 3 146. Hommel AHT 268see Wellhausen, Proleg.<sup>3</sup> 146; Hommel, AHT 268). No satisfactory explanation has been given of the words 'of the family of Judah' as they stand. They seem to be omitted by LXX B, and are treated by Kuenen and Kautzsch (*Heil. Schr.*) as a gloss; about a scribe would hardly invent such a statement about a Levite. Budde, *Richter* 116, suggests (after Studer) that the words have been altered out of respect for Moses, ‡ and that the original reading was 'of the family of Levi,' or 'of the family of Moses.' For want of any better explanation, this correction may be provisionally accepted. At the close of the story (1830) it is stated that

\* Two narratives are interwoven in ch. 17. According to one there is a young Levite (הְנָעֵר) residing in Micah's neighbourhood, whom Micah treats as a son, consecrates and makes his priest (TV. 7. 118. 12) The other narrative tells how a Levite (האיש)

(rv.<sup>7,116,126</sup>). The other narrative tells how a Levite (0<sup>\*</sup>,<sup>8</sup>,<sup>10</sup>) from Bethlehem comes, in the course of his wanderings, to Micab's house, and is hired by him as his priort (vv.<sup>8,106,125,10</sup>). † Wellhausen, *Isr. u. Jüd. Geschichte*<sup>2</sup> 191 n. Korah (Korah) seems to have been originally a clan of Judah, 1 Ch 2<sup>43</sup>. The same motive, to avoid connecting the priest of Dan with Moses, intigated the Uewish correction of Moses into Manaseh in 18<sup>30</sup>. Perhaps this is the reason why LXX B omits the words here.

Micah's Levite, who had been kidnapped by the Danites, became the founder of a line of priests who ministered at the chief sanctuary of Dan until the exile of the ten tribes in 722, or of the N. tribes in 734 (2 K 15<sup>29</sup>). Jonathan's priesthood was therefore hereditary,\* and, what is more, his descent is traced back through Gershom to Moses. It is probable that we have here a clue to the obscure problem, How did the Levi of Gn 34 and 49 become the Levi of the sanctuary? Most likely the answer is, Through the influence and position Moses was the founder of Israel's of Moses. religion, the chief minister of the sanctuary; and Moses was a Levite. His own clan supported and followed him (Ex  $32^{24-29}$  E). The sacred lore of the priesthood, the traditions of public worship, the usages of the oracle, were preserved in his family and handed down to his descendants. Thus we find the Mosaic families of Gershom and of the Mushites (probably from Mosheh, Moses) mentioned in the genealogies of P, Nu 3<sup>177, 21, 33</sup> 26<sup>377.</sup>, 1 Ch 6<sup>1, 17, 19</sup>. The priesthood, however, was not confined to the family or tribe of Moses; but the prestige of his name, the importance of his position in the history of the national religion, induced those priests, who did not necessarily belong to his race, to call themselves Levites, and to justify the title by some kind of genealogical fiction, or by the common Senific practice of regarding membership of a guild or order as equivalent to sonship.† In this way there grew up a priestly tribe of Levi which looked upon Moses as the founder of their order and the ancestor of their race.<sup>‡</sup> The formation of such a tribe was rendered all the easier because there had existed an ancient tribe of Levi, which, although it was broken up in the early days of the occupation of Canaan, nevertheless produced one famous son who became the ancestor of a new Levi with a changed character. When the change began it is impossible to say; it must have come about by degrees. Those who maintain that the Levite of the cantup partial of the Ludger (1217) the early period of the Judges (Jg 17. 18) could belong to 'the family of Judah' and at the same time claim to be a grandson of Moses (18<sup>30</sup>), do not appear to allow sufficient time for the official sense of Levite and the artificial connexion with Moses to have established themselves.

A different account of what may be called the conversion of Levi from the barbarous tribe to the priestly caste is given by van Hoonacker in his work, La Sacerdoce Lévitique, 1899, 304-311. His view may be mentioned as representative of those which differ from the account given above. He takes Gn 34 as referring to an incident of the first immigration of the Hebrew clans into Canaan. Gn 49 is also assigned to a pre-Mosaic date, chiefly on the ground that it is unlikely that the tribe to which Moses belonged would be spoken of in the terms of vv.<sup>5-7</sup> so soon after his death, if the Blessing of Jacob be assigned to the period of the Judges. In the early days of the settlement in Canaan after the Exodus, the tribe of Levi possessed not only the prestige of its connexion with Moses, but the prerogatives of the priesthood which it owed to him. Not much later, in the period of the Judges, we find Levites popularly regarded as priests: the interval is not long enough for the change in the character of the

\* Similar establishments of hereditary priests are mentioned at Shiloh (Eli) and at Nob (Ahimelech), 1 S 1<sup>347</sup>. 21. The priest-hood of Shiloh was traced back to the family of Moses (1 S 2<sup>37</sup>, though this is a post-Dt. passage) through Phinehas, son of Eleazar, son of Aaron (Nu  $25^{13}$  P, 1 S 2<sup>30</sup>, Jos 243 E). Well-hausen regards Eleazar as = Eliezer, son of Moses (Ex 184), and so makes the priesthood of Shiloh directly Mosaic, *Proleg.*<sup>3</sup> 144. † In the oldest documents the descent is traced back to Moses rather than to Aaron. Moses, not Aaron, is the chief minister of the sanctuary in Ex 33<sup>7-11</sup> E. The designation of Levites as 'sons of Aaron' belongs to P. ; Bee Benzinger, Heb. Archäol. 416 ff.

LEVIATHAN

Accordingly, van onversion of Levi tribe to have taken place. According Hoonacker believes that the 'conversion' occurred during the sojourn of Israel in Egypt, and supposes that Levi developed not only a capacity for assimilating the culture and civiliza-tion of Egypt,\* but a special zeal for the national religion. In this way the Levites naturally rallied round Moses in his great religious enterprise, and because of their superior culture became recognized as the spiritual organ of the community. Against the view of van Hoonacker it may be said that the evidence is no more in favour of the conversion of Levi having taken place in Egypt than in the period which followed the struggle for Canaan; while the historical and geographical conditions implied in the Blessing of Jacob are not those of the pre-Mosaic but the post-Mosaic age.

It does not fall within the scope of this article to deal with the later developments and organization of the priestly tribe of Levi, which will be fully treated of in art. PRIESTS AND LEVITES. Besides Jg 17 and 18, 19 and 20, the only other places in pre-exilic historical books where Levites are mentioned are 1 S 6<sup>13</sup>, 2 S 15<sup>24</sup>, 1 K 8<sup>4</sup> 12<sup>31</sup>, and all of these appear to be secondary or Deuteronomic. + One other important passage, however, requires mention, to complete the early account of Levi, Dt 33<sup>8-11</sup>. The Blessing of Moses 'breathes the bright and happy spirit of the earlier narratives of the Kings,' and may be dated shortly after the separation under Jeroboam I. By this time, then, we find that Levi has become thoroughly established as the priestly tribe, enjoying the priestly rights of administering the divine oracle and instruction (torah), and offering incense and sacrifice; though it appears that the exclusive priesthood of the Levites was not without its opponents even at this period (Dt  $33^{11}$ ). The Blessing describes the character of the ideal Levite by an allusion to past history when the fidelity and disinterestedness of the tribe were conspicuously proved. Though Levi is not mentioned in connexion with the events of Massah and Meribah (Ex17<sup>1-7</sup>, Nu 20<sup>10-13</sup>), yet it is possible that another version of these incidents was current in which the tribe was in some way tested by Jehovah.<sup>‡</sup> The other past event alluded to is that in Ex  $32^{27-29}$ , when the Levites distinguished themselves by remarkable disinterestedness. The reference to this occasion is, however, disputed; for the verbs in Dt 33% he may be translated as presents and not as pasts, and the statement may be merely a general one. Nevertheless, the allusion to Ex 32 may be implied at the same time.

The principal authorities have been cited above. Besides these may be mentioned Graf, Geschichte des Stammes Levi in Merx, Archiv. 1867, i. 68-106, 208-236; Edu. Meyer, Geschichte des Alter-thums, 1884, i. 377 ff.; Fr. v. Hummelauer, S.J., Das vormosaische Priesterthum in Israel, 1899.

LEVIATHAN (10) liwyāthān).-The description of leviathan (Jo) (the galicar). In the description of leviathan (Jo) (learly points to the crocodile (LXX  $\delta\rho\delta\kappa\omega\nu$ ). Again, the mention of leviathan (LXX  $\delta\rho\delta\kappa\omega\nu$ ). Again, the mention of leviathan (LXX  $\delta\rho\delta\kappa\omega\nu$ ). Again, the mitacles connected with the Exodus of the Israelites. Leviathan here is to be understood as the crocodile, the emblem of 'Pharaoh, the king of Egypt, the great dragon (*danini*) that lieth in the midst of his rivers' (Ezk 29<sup>3</sup>). 'The people inhabiting the wilderness' (Ps, *l.c.*) are the wild beasts of the desert, to which Pharaoh's host

\* Van Hoonacker notices the Egyptian proper names among Levitical families, Phinehas, Putiel (Ex (32), Moses; and the unique expression about the ancestors of Ell's family, 18 23' when they were in Egypt, servants (LIX) to the house of Pharaoh.

† Nowack, Heb. Archäol. ii. 91 n. ‡ Driver, Deuteronomy 400.

# LEVITICUS

became a prey (comp. 'people,' 'folk,' Pr 30<sup>95, 20</sup>). On the other hand, leviathan of the sea (Ps 104<sup>26</sup>, LXX  $\delta \rho d\kappa \omega_P$ ) cannot be the crocodile. It is probably the whale. Whales are not rare in the Mediter-ranean, which is doubtless the 'sea great and wide' (v.<sup>30</sup>). Parts of skeletons of two rorquals are preserved in the Museum of the Syrian Protestant College at Beirût. One was thrown on shore near 'Tyre, and the other at Beirût itself. In Job 3<sup>9</sup> 'leviathan' of RV and AVm (AV 'their mourning') is taken by most modern commentators to refer to the dragon, which in popular mythology was believed to darken or eclipse the sun and moon by 'throwing its folds round them or swallowing them up. Enchanters were supposed to have power to set this dragon in motion' (Davidson, Job, p. 20). The same mythological allusion underlies Job 26<sup>10</sup> (see Dillmann's note) and Is 27<sup>1</sup> (see Cheyne, ad loc.). G. E. Post.

#### LEVIRATE LAW .- See MARRIAGE.

**LEVIS** (A Acols, B -ets), 1 Es  $9^{14}$ . — Wrongly taken as a proper name in this book ; in Ezr 10<sup>15</sup> 'Shabbethai the Levite' stands in place of 'Levis and Sabbateus.'

# LEVITES.-See LEVI and PRIESTS AND LEVITES.

LEVITICUS (called by the Jews, from its open-ing word,  $w_{2,2}$ ; other names found in the Mishna are  $w_{2,2}$ ; other names found in the Mishna are  $w_{2,2}$ ; other names found in the Mishna are  $w_{2,2}$ ; other names found in the Mishna are  $w_{2,2}$ ; other are  $v_{2,2}$ ; book of Priests'),  $w_{2,2}$ ;  $w_{2,2}$ ;  $w_{2,2}$ ;  $w_{2,2}$ ;  $w_{2,2}$ ;  $w_{2,2}$ ; *Menach.* iii. 4; *Megilla*, iii. 6; *Siphra*, etc.; LXX *Aeu(c):rusice* (cf. Philo, *Aeuruch β(βλor*); Vulg. *Leviti-cus*).—Leviticus is the third part of the sixfold work now generally known as the Hexateuch. It belongs in its entirety to the Priestly school of writers (P). For the explanation and proof of of writers (P). For the explanation and proof of this statement see art. HEXATEUCH.

As the whole book can be ascribed to a single 'document,' it might seem that the literary probaccument, it might seem that the interary prob-lem was a simpler one than in the case of Genesis and Exodus. In fact, however, the questions that demand solution are, though in large measure different from, yet no less complex than, those of the earlier books. The geologist who has settled to what 'formation' the rocks of a district belong, has yet to investigate the composition and relative order of the perhaps dislocated and contorted strata which are comprised under the same general title. In the art. on EXODUS (§ IV.) we have already seen how documents after being separated from others may be again resolved into distinct com-ponents. The extent to which this process is carried out below may seem unwarranted, for, though many of the points are fully treated in well known works like Kuenen's *Hex.* and Driver's LOT, it has not been usual to press the analysis so far. It is, however, believed that the main lines are firmly laid on grounds that have proved generally convincing, even though details may be regarded as unsettled.

LITERARY STRUCTURE.-The 27 chapters fall readily apart into four divisions which are successively discussed, *i.e.* (1) the Law of Sacrifice, 1-7; (2) the Consecration of the Priesthood, 8-10; (3) the Law of Clean and Unclean, with appendix on the Day of Atonement, 11-16; (4) the Law of Holmess, with appendix, 17-27. (*N.B.*—For explanation of abbreviations and signs see ExoDUS).

#### § 1. 1-7: The Law of Sacrifice.

A. Analytical Summary.

P<sup>4</sup> denotes material consisting of priestly teaching or toral, codified before P5, and subsequently incorporated. P<sup>4</sup> marks sections written after P5.

+ in any column shows supplements of the same school and period. 3 Many similar titles or introductory clauses, added by the compiler, are left to the student to notice.

#### B. Critical Notes.

With regard to this division there are two questions to answer. (1) Does it form part of the great Priestly writing ( $P^{u}$ ) which contains Ex 25-29? (2) If not, what is its relation to it? Is it, like Ex 35-40, later, or is it in the main earlier? Let the facts decide. The process of exhibiting them will bring out other points requiring special attention in these chapters.

a. The directions in Ex 29 for Aaron's consecration ordered burnt-, sin-, and peace-offerings. Now the ritual there prescribed precisely accords with the requirements of Lv 1-7, which are therefore already assumed in a passage which precedes.

b. After Ex 35-40 (or the shorter account of the erection of the Tabernacle which it has replaced) we expect to hear of the fulfilment of the other command, in Ex 29, to conserve Aaron. But Lv 1-7 comes in before Lv 8, the account of the consecration. It appears, that is, as an interruption.

c. At the same time, Lv 1-7 is linked with P<sup>s</sup> by a practical identity of sacrificial terminology. d. Certain elements, however, which are often mentioned and constantly presupposed in P<sup>z</sup> and P<sup>z</sup>, are either alment from these chapters, or appear in clauses which can be readily removed as intermolations, or find place in passages otherwise marked as exceptional. Such are the presuppositions that the people are living in a camp, that their sanctuary is the Tent of Meeting, and that the only priests are Aaron and his sons.

For instance, the Tent of Meeting is unmentioned from  $1^{10}$  to  $2^{16}$ ; in  $1^3$  its occurrence is plainly an interpolation, for it interrupts the connexion (for the acceptance of the victim

depends, according to  $22^{19\cdot25}$ , on the absence of blemish). Again, in 1-3 the priest occurs 11 times, and Aaron's sons the priests (or an equivalent phrase) 11 times. The facts, that each paragraph reverts to the singular, that sing, verbs follow plural subjects 16<sup>6</sup>. 11<sup>6</sup>. etc., that LXX twice, and Sam. once, correct to pl., all go to prove that the priest was the original term, and that the peculiar phrase Aaron's sons the priests, 1<sup>8</sup>. S<sup>11</sup>. 2<sup>9</sup>. S<sup>2</sup>, is an adaptation of the simple term the priest by prefixing Aaron's sons and altering sing, to pl. Contrast the uniform formula of Ps Aaron and his sons.

e. Moreover, the conspectus A, given above, on the face of it suggests that 1-7 is not itself homogeneous. It falls apart into two codes, each of which treats the whole round of offerings, but without reference to the other, and with a different without reference to the other, and with a dimerent aim and plan. Again, the two codes  $1-6^7$  and  $6^8-7^{28}$  have been themselves subject to revision and enlargement. The nucleus of  $1-6^7$  is 1-3, a little code which perhaps never dealt with sin- and guilt-offerings. In any case  $5-6^7$  are distinct in form, and much more so 4 (P<sup>a</sup>).

form, and much more so 4 (P<sup>a</sup>). A few instances of the clues which have been followed may be given as illustrations of method.  $2^{k+16}$  is marked as sup-plementary, for (1) it repeate 1-3, and (2) it uses thou and ye instead of he as in the rest of 1-3.—4 distinguishes the altar of sweet incense from the altar of burnt-offering (see art. Exocus, IV.), and elaborates ceremonial; it is therefore given to P<sup>4</sup> (perhaps better to P<sup>4</sup>). In Ex 29 Ps and Lv 8 P<sup>4</sup> even at the consecration of Aaron the blood of the sin-offering was not as here (4<sup>67</sup>, cf. <sup>17</sup>.) brought into the holy place.—51-6 is older than 4, because of the variety of cases in view, and the absence of ritual direction. It has features that connect it with Ph.—51-40 and 61-7 are not by author of 51-4, for the guilt-offering, which in 6 is confused with the sin-offering, is here clearly assigned to cases of damage done to the interests of Jahweh or a neighbour.—517-19 interrupts the connexion, and completes 1-4, not 14-16. In 1-4 atonement is provided for unconscious offences after discovery; but what if calamity vaguely convicts of unknown guilt? Here is the remedy. The remaining section  $6^{8}$ -7 has a lao been edited

The remaining section 6<sup>8</sup>-7 has also been edited afresh with several additions. The original work is easily separated by following the clues given by the introductory formula This is the law of . . . and by the list of subjects given in the colophon  $7^{37}$ , which concludes this little ' Priests' Manual.'

Both the order of subjects (see A above), and the framework in which they are set, support the view that this section is not based on 1-67, nor by the same author as 1-3.

f. Except in 4, where the indications point to a later date than  $P^{\alpha}$ , there are no clear signs that any of the sections in 1-7, THE LAW OF SACRI-FICE, formed part of P<sup>s</sup> or were subsequent in date. On the contrary, when a few isolated phrases have been removed, there is an unbroken appearance of independence and priority. (In the Oxf. Analyt. ed. of the Hex. the text is printed so as to bring this out clearly). And, as this conclusion agrees with the preceding indications, it is regarded as established that these chapters belong to an earlier series of priestly teachings (toroth), and may be designated P<sup>4</sup>.

# § 2. 8-10: The Consecration of the Priesthood.

A. Analytical Summary.

Pt	Ps	P	Pal	
1010f. 12-157	91-24 101-5	8 in the main	8106- 11. 30 1067.	Consecration of Aaron and his sons. } Aaron's sons, etc., anointed. The octave of the consecration. Death of Nadab and Abihu. Prohibition of mourning to Aaron and surviving sons. Priests on duty not to drink wine. Priestly duty as to clean and unclean Priest' dues. Blame for not eating sin-offering.

#### B. Critical Notes.

As Ex 35-40 is generally supposed to have taken the place of an earlier and briefer account of the

104

fulfilment of Ex 25-28, so Lv 8 is held to be an expansion of an original short narrative of the consecration of the priesthood as ordered in Ex 29. In view of its laborious reproduction of Ex 29, and a few modifications introduced, it would be rash to assign it to the original draft of P<sup>\*</sup>.

The anointing of the tent 106, the altar, etc. 11, and Aaron's sous with his and their garments, 30, is irreconcilable with the absence of such injunction in Ex 297.9, and marks these verses as glosses, like Ex 2844 and part of 2921 (and of the anointing oil). LXX puts LV 8105 after 11.

In  $9^1$  the main thread of the Priestly Law and History Book P<sup>z</sup> is resumed from Ex 29, the original brief account of the making and erection original orier account of the making and erection of the sanctuary and consecration of the priesthood having probably been displaced by fuller narratives in Ex 35-40 and Lv 8, as suggested above. Note that only one altar is mentioned, and that the blood of the sin-offering is not brought into the Holy Place. That 9 is earlier than 4 is seen from <sup>3</sup>, and than 8 from <sup>13</sup>.

108. is late Pa, for in 7 anointing is extended to Aaron's sons (see above).  $-10^{86}$ . is itself a fragment, and to it  $10^{6}$  is loosely attached. The latter betrays affinity with Pa, cf.  $20^{245-28}$ . Cf. also Dt 113<sup>20</sup> 248 3310.  $-10^{12-10}$  Except the introductory clause, this par. recalls Pt. In particular, notice the peculiar expression a holy place 13 ( $\parallel a$  clean place 14), which occurs also in 616-28. Cf. It is defined in 2 as beside the altar; whereas the clause in the court of the tent of meeting is probably a gloss in 616-28(in  $10^{17}$  it is altered into the place of the sanctuary).  $-\ln 10^{16-20}$ , a late supplement, fault is found for contravention of  $6^{26}$  (see further Kuen. Hex. § 6 n. 21).

# § 3. 11-16: The Law of Clean and Unclean. With Appendix on the Day of Atonement.

1 <del>6</del> 34ь		16 <sup>346</sup>	Annual day of atonement. Statement as to accomplishment by Aaron.

#### B. Critical Notes.

Like 1-3. 5-67 68-7, the chapters 11-15 betray that they are substantially earlier than P<sup>s</sup>, though subsequently united in their present form with the main Priestly code. In the case of 11 on food and contact, and 13 f. on leprosy, it is possible to dis-cover several layers of legal material.

11: On eating and touching animals. - The reasons 11: On eating and couching animals.—Ine reasons for the analysis given above lie mainly on the sur-face. A section  $3^{-6}$  on land animals which are clean or unclean is followed by  $^{+23}$  which are in subject a sequel, dealing with water animals, birds, and winged creeping things, but which no longer discriminate animals as unclean (cf. Dt  $14^{5-30}$ ), but as an abomination ( $\gamma_{27}$ , not  $\gamma_{27}$ , as Dt  $14^{5}$ . These verses, again, are continued in  $41^{\circ}$ , on creeping things upon the earth which are an on creeping things upon the earth which are an abomination; while 43-446, which uses the same word as a verb, forms the obvious conclusion of the series. Into this series <sup>24-40</sup> has been thrust, dealing with the different subject of uncleanness through contact. It is doubtful whether this last passage is included in the colophon 46.

through contact. It is doubting whether this last passage is included in the colophon <sup>46.</sup> Dt 14<sup>2,20</sup> compared with 11. Though interpreters differ, the facts, when taken all together, favour the priority of Dt over Lv. (1) The clean animals' names, given Dt 14<sup>47</sup>, are omitted in Lv as covered by general law in 6<sup>4</sup>; while names of birds, etc., are retained of necessity. (2) The cases of camel, hare, and coney are expanded in Lv 114<sup>46</sup>. (3) V119-19 is an expansion of Dt 14<sup>49</sup>. (4) The new term abomination is used in Lv. (6) In its present form at least Lv 11 in <sup>34-00</sup> covers the question of contact, which Dt would hardly have omitted had it been con-tained in the ordinance quoted. (8) Dt onlits mention of creep-ing things upon the earth, Lv 114<sup>47</sup>. (7) The exceptions in 11<sup>32</sup>t are wanting in Dt. (8) The prohibition which is absolute in Dt 14<sup>34</sup> is relaxed in Lv 11<sup>35</sup>; cf. 17<sup>15</sup>. It is hard to say why the abomination series of verses should begin where it does, seeing that the terminology in Dt is uniform over the whole range of cases. Perhapt the compiler had before him two variants of the ordinance quoted in Dt, and found one signs of reduplication in <sup>513</sup> confirm this conjecture, by re-vealing the presence of a 'join' of the two legal threads. 11<sup>24-80</sup>. This section is distinct from <sup>1-26</sup>, for (1) it deals mainly with touching (eating <sup>400</sup> only, while <sup>1-23</sup> deals mainly with esting (touching <sup>8</sup> and perhaps 11); (2) it enumer-ates only the unclean, and mentions only two classes in-sted of five; (3) it prescribes means of cleansing; (4) it is doubtful if it is included in the colophon. But <sup>340</sup> originally be be reckoned homogeneous. <sup>2324</sup> is probably secondary on its own account, for the transition is very abrupt from cases of animals that make persons unclean to cases of things that any of those animals may make unclean. But if <sup>340</sup> originally belonged to <sup>340</sup>, perhaps misplaced by intrusion of the abomination pasages. <sup>243</sup>, on the other hand, at no point presupposes <sup>24</sup>, but is com

12: On purification after childbirth.—This short chapter, whose chief interest lies in the fulfilment of its. conditions at the presentation of Christ in the temple, seems in <sup>2b</sup> to refer to and depend upon 15, and presents the same features.

The only trace of the *camp* form of legislation characteristic of PK is found in 6b. V.<sup>8</sup> is marked as a supplement; for (1) it comes after the colophon 7b, and (2) elsewhere (57 1421, cf. 114) the provision for cases of poverty is seen to be a later addition.

13 f.: On leprosy.—The laws in this section pre-sent a very complex problem to the student. Dt Dt 248 gives no details such as are found about clean 24° gives no details such as are found about clean and unclean in 14<sup>3-30</sup>, but refers for the procedure in a case of leprosy to the torah of the priests, presumably oral. The extreme elaboration of treatment detailed in 13 f. may perhaps indicate that the usage was not committed to writing till a late period; but, apart from introductory phrases and an organizational gloss there are no signs of all and an occasional gloss, there are no signs of the

influence of P<sup>s</sup> in the sections assigned to P<sup>t</sup>. But these relatively older portions are not homogeneous. For while 13 is entirely occupied with the detection and discrimination of leprosy and the regulation of the leper's life, and 14 provides for the cleansing of the recovered leper, each is independent of and distinct from the other. Each, too, contains earlier and later elements, which may be readily separated as in the analysis above.

and later elements, which may be readily separated as in the analysis above. The colophon 14<sup>24-57</sup> will turnish a good starting-point in indicating the nature of the argument. Originally, it probably consisted only of <sup>57</sup>: this is the law of leprosy, in accord-ance with the usage elsewhere (filteen times this is the law of ... in P), and came after 13<sup>36</sup>, for even in its expanded form there is no reference to cleansing, and 13<sup>37-39</sup> has its own colophon. Then the reference was made more explicit: this is the law for (unique phrase) all manner of ploque of leprosy, and for a scall <sup>34</sup> (referring to 13<sup>328</sup> and 2<sup>341</sup>, to teach when it is unclean and when it is clean <sup>57</sup>a. The addition of 13<sup>67-39</sup>, though it has its own colophon, produced the clause and for the leprosy of a sparment <sup>36</sup>a, and similarly there followed (for the Heb. con-struction is different) and for an house <sup>340</sup>, to refer to 14<sup>35-89</sup>, which was kindred to 13<sup>47-80</sup>, while <sup>56</sup>, which clearly was a gloss to make pointed allusion to 13<sup>32-39</sup>, providing for a rising and for a scab and for a bright spot, has been inserted wrongly, instead of before and for a scall. In 13<sup>5</sup> etc. the priest, after examining a man with a favourable result, shall pronouse him clean ... and he shall wash his clothes and be clean. But in 11, if the plague be healed, many ceremonies must be performed before the priest shall pronous him clean 7, and then he has not only to wash his clothes, but to shase of all his hair, and bathe himself before the shall bor stane of all his hair, and bathe himself before the shall proclaim of this ceremonial, or did he think it superstitious of product torm of cleansing after the pattern of the latter mate his this passage is comparatively early. Was the author of 13 ignorant of this ceremonial, or did he think it superstitious of becans <sup>44</sup>. Yet both the archaic colouring and the alternate that the passage is comparatively early. Was the author of 13 ignorant of this ceremonial, or did he think it superstitious of becans it

15: On secretions.-This chapter by its tedious repetitions suggests a later date than most of P But only twice does a clause recall P<sup>g</sup>, i.c. in <sup>14</sup> and <sup>29</sup> unto the door of the tent of meeting, and this is a frequent gloss. The sacrificial ritual enjoined does not go beyond the prescriptions of 5, and is omitted in the case of normal secretions. The case of 12 is similar.

In 15<sup>31a</sup> we catch an echo of P<sup>b</sup>; and <sup>31b</sup> (RVm: *when they defile my dwelling that is in the midst of them*), which most naturally refers to the gracious inhabitation of the land by its Divine Lord, recalls a time when the visible structure had not been elevated to the place it occupies in Ps, monopolizing the term dwelling

16 (Appendix): On the Day of Atonement.-This is not the place to discuss the historical origins of the great Jewish fast. See art. ATONEMENT (DAY OF). It must suffice to support briefly the analysis given above, which takes a middle course between the conservative view that 16 is an early homo-geneous whole, and the radical view that no part geneous whole, and the radical view that no part of it is even as early as  $P^{\pi}$ . (1) It is possible to disentangle a main thread of ordinance providing for the cleansing of the holy place, and the tent of meeting, and the altar, and for a solemn atone-ment for the sins of the people. This bears the marks of  $P^{\pi}$ . (2) From this there falls apart a varies of varsas (see above) providing for a solemn atonement for Aaron and his sons, which is con-nected in <sup>1</sup> with the death of Nadab and Abihu, but which does not fit in with the context. (3)  $2^{27}$  orders the ceremonial to be repeated by each subsequent high priest. (4)  $2^{2-31}$  and  $2^{46}$  make it an annual fast day.

(1) The main thread is given to P5, because it contains nothing inconsistent with the ritual in Ex 29 or Lv 0, and because *the altar* 12 18 20.25 is used as if only one were known, while the use of a censer in 127, seems to exclude the presence

# LEVITICUS

of an altar of incense. (2) The atonement for Aaron, being omitted in the summaries in <sup>14</sup> and <sup>20</sup>, can hardly be original, and the awkwardness of <sup>3</sup> and <sup>6</sup> justifies their excision as supple-ments. The sevenoid sprinkling and the heightening of the high priest's dignity are both peculiar to P<sup>3</sup>. (3) The absence of any *Aaron* phrases, the substitution of holy sanctuary <sup>23</sup> for *holy glace* 362. <sup>20</sup>, and of the priest's <sup>23</sup> for *himself and his house* <sup>11. 176</sup>, and the generality of the terms, confirm the view that <sup>237</sup>. <sup>135</sup> is a later addition. (4) Again, <sup>17</sup> <sup>231. 346</sup> were original, mention would not be unade only of one element, the *atonement for the children of Israel*, while the cleansing of the holy place, the tent of meeting, and the altar, is passed over. <sup>346</sup> would fit better before <sup>31</sup>.

#### § 4. 17-27: The Law of Holiness.

#### B. Critical Notes.

For a general account of the Law of Holiness, and of the criteria which distinguish it from the rest of P, see art. HEXATEUCH. Careful lists of peculiar words and phrases are given in Driver, LOT; Holzinger, *Einl. in d. Hex.*; and Oxf. Anal. *Hcx.* Here we have to do only with the actual use of the criteria in the analysis, and with the internal structure of P<sup>b</sup> itself. Any general remarks under the latter head will be found under § 5. It will be enough to point out in advance that traces of more than one series of parallel laws will be found in the present code.  $17^{1-7r}$ : The place of sacrifice.—As it stands, this

 $17^{1-r_r}$ : The place of sacrifice.—As it stands, this passage requires that no animal shall be slaughtered except as a sacrifice, and at the door of the tent of meeting. In any case this conflicts with Dt 12, which allows slaughtering at home. But the clauses referring to the camp and the (door of the) tent of meeting can be excised without loss, as in many other cases where they ill suit the context. When they are removed, the injunction remains that all slaughtering is to take place at the altar of J", which is only reasonable, on the one hand, if many altars are allowable, as is recognized in E's Covenant Book, Gn 20<sup>24</sup>, and in the pre-Deuteronomic narratives; or, on the other hand, if a small company of exiles are gathered round the restored temple in Jerusalem after the Exile. The latter alternative is upheld by Baentsch, Addis, etc. The former is maintained by Kittel, Baudissin, W. R. Smith, and Driver.—17<sup>84</sup> is to the same effect, only including strangers.—In 17<sup>10-16</sup> the work of the later editor may be suspected, but cannot be pointed out with precision.

11 the work of the later error may be also pected, but cannot be pointed out with precision.  $18^{6-19}$ : On scx relations.—This section has a close parallel in  $20^{10-21}$ , but it is not agreed how the two are connected. The latter passage is composed of various elements, not all on the same subject. Its ordinances are in the form of Cases, or Judgments, the man that . . . , or if a man . . . , whereas in 18 we have the older type of Words, Thou shalt not. . . Only in 20 are penalties stated. Probably we have in 18, nearly intact, the series which, in an altered form, with Judgments instead of Words, and with penalties attached, underlies  $20^{10-21}$ , where it is combined with other quoted laws.

19: Miscellancous.—The contents of this chapter are clearly selected from various sources, many of them early, as is shown by the numerous parallels with the most ancient codes (for refs. see O.cf.Anal. Hex.). They illustrate both the diversity of form in which ordinances were cast, and the fondness of Hebrew jurists for sets of 5 or 10. An outline of the 14 sections will show this.

<sup>21-4</sup> has 5 commandments of the type, ye shall (not).... <sup>5-8</sup> is a cultus-section like 21-22 below.—<sup>91</sup> has 5 words about gleaning.—<sup>115</sup> has 4 commandments and 1 word, 5 in all, about honesty and reverence.—<sup>136</sup> has 5 words, not quite uniform, on kindness.—<sup>151</sup> has 5 words, preceded by a com-

# LEVITICUS

mandment, on justice.  $-17^{6}$ . has 5 words on kindness, clinched by the grand positive word, Thou shall love thy neighbour as thyself. -19 has a general commandment, and 3 words on mixtures, the last altered. -20 is a Judgment on seduction, with a supplement by  $P^{-211}$ .  $-2^{-25}$  is an ordinance on young fruit trees, like the law on the Sabbath year in  $25^{26.7}$  esc.  $-28^{-31}$ has 10 commandments against superstition and irreverence, the last 2 in <sup>31</sup> being altered, and with supplements using 2nd person sing. in 375 20. -33 has 3 words on reverence. -351contains laws of 3 types on strangers.  $-35^{-37}$  contains 2 commandments on weights and measures, and a general conclusion.

The next chapter, 20, is remarkable for the fact that 4 of its 5 sections have a parallel in P<sup>h</sup> elsewhere. Thus  $^{1-8} \parallel 18^{21}$ ,  $^{10-24n} \parallel 18^{6-20}$ ,  $^{23-20}$ ,  $^{34,\dots,6} \parallel 11^{36-77}$ ,  $^{37} \parallel 19^{31}$ . For  $^{10-24n}$  see on  $18^{6-19}$ .

21-22: On the priceshood and sarrifices.—These chapters, while presenting many of the features of P<sup>b</sup>, have undergone more revision, it would appear, than 18-20, perhaps because their subject was one which occupied more of the attention of later legislators. Differences of form, changes from 3rd to 2nd pers., and the introduction of fresh superscriptions  $11^{1.16}$   $22^{1.17.36}$ , all point to diversity of source.

218, with its thou shall, referring to Israel, may be a fragment from an earlier source.  $-22^{17\cdot23}$  appears to be made up of two ordinances,  $1^{26\cdot29}$  and  $2^{1.26}$ , with many parallels in detail. Both this section and  $22^{224}$ . have been ascribed to P<sup>4</sup>, not P<sup>4</sup>, but without sufficient reason. The marks of P<sup>h</sup> are not absent, and there is enough difference in the ordinances from those on the same subjects elsewhere  $(7^{11\cdot18})$  to suggest that an earlier stage is reflected here.

23: A sacred calendar.—In this chapter there is prescribed a series of 'holy convocations,' in language largely made up of phrases characteristic of P<sup>s</sup> and P<sup>s</sup>, with exact dates by numbered days and months. This is ascribed to P<sup>s</sup>. But with it is combined another series of holy days, which does not mention 'holy convocations' or use the peculiar phrases of P<sup>s</sup> and P<sup>s</sup> (except in isolated sentences distinguishable as interpolated), but bears indications of P<sup>h</sup> and is marked by a picturesque style. Each of these series has been interpolated or revised.

protected by the original for 4 is clearly interpolated or revised. 23<sup>2b-3</sup> on the Sabbath can hardly be original, for 4 is clearly the commencement, and 4 also hardly includes the Sabbath under its terms, -9<sup>14</sup> has been expanded. The original elements from P<sup>h</sup> are clearly seen in <sup>106-11.148</sup>. Here a feast of firstfruits is described which is not referred to elsewhere. The morrow after the Sabbath, <sup>11.166</sup>, requires explanation by some context now missing. But probably it is rightly connected with Unlearened Bread. -<sup>115,21</sup> relates to Pentecost, or Feast of Weeks. <sup>21</sup> only is preserved from N2 32<sup>7,29</sup>. Ph had ye shall present with the bread two he-lambs of the first year for a sacrifice of peace-oferings. -22 is repeated from 19<sup>96</sup>. -24:22 institutes the Feast of New Year's Day, with trumpet blasts. -<sup>2652</sup> is marked P<sup>s</sup>, because on 16 we found that the Day of Atonement as a yearly fast was not original in Ft. <sup>35</sup> is a briefer title than 17.23<sup>5,30</sup> contains P<sup>s</sup>s ordinance as to the Feast of Booths complete, and <sup>377</sup> 4<sup>4</sup> his conclusion of the stress in this is on the mode of keeping the feast, as above in <sup>9-20</sup>, and the date is left indefinite, when ye have gatherned in <sup>9-20</sup>, and the date is left indefinite, when ye have gatherned in <sup>9-20</sup>, and the date is left indefinite, when ye have gatherned in a coordance with later practice. Similarly <sup>30</sup>, which uses the phraseology of P<sup>s</sup>, and mentions an 8th day, is foreign to the context, which like Dt 10<sup>13-15</sup> only knows 7 days for the feast.

24: On oil for the lamps <sup>1-4</sup>, shewbread <sup>5-9</sup>, and blasphemy <sup>10-25</sup>. <sup>1-4</sup> is parallel with Ex 27<sup>204</sup>. and Nu 8<sup>1-4</sup>, and it is not easy to determine the order of priority. On the whole, the present passage seems most original. Both it and <sup>5-9</sup> are regarded as fragments of P<sup>6</sup>, put here possibly to replace similar ordinances of P<sup>b</sup>, even as in 23 a like process has gone on. In each case the phraseology is purely that of P<sup>8</sup>.—<sup>10-23</sup> is a curious paragraph, in which a central core <sup>13b-22</sup>, containing various ordinances on blasphemy <sup>184</sup>, nurder <sup>17, 21b</sup>, assault <sup>194</sup>, killing a beast <sup>18, 21a</sup>, is found surrounded by **a** narrative envelope, which resembles others found in P<sup>a</sup>, while the phraseology supports this ascription. The laws are given to P<sup>b</sup>, as they contain

several words and phrases characteristic of that code, and follow the same models. Contrast also <sup>11a</sup> and <sup>16ab</sup>.

25: On the Sabbatical and Jubile years.—<sup>2b-7</sup> with <sup>19-21</sup> institutes the Sabbatical year as a general fallow-year for the whole land. The particulars harmonize with the feast regulations of P<sup>h</sup>, and the phraseology is also that of P<sup>h</sup>. Its ascription to that code is therefore generally allowed. But it is different with regard to the rest of the chapter, where undoubted marks of P<sup>a</sup> or P<sup>a</sup> are found side by side with words and phrases (Baentsch notes 14 such) characteristic of P<sup>b</sup>. These phenomena point to the intermixture of elements, but how to effect a separation is matter of conjecture. The Analysis above adopts the view that the term jubile and the clauses or passages in which it occurs are P<sup>a</sup>. This is thought probable, because—(1) Lv 26, which lays stress on the Sabbath years, does not allude to the jubile; (2) most of these clauses and verses bear other marks of late origin; and (3) general considerations (see art. SABBATICAL AND JUBILE YEARS) support the same conclusion. The linguistic evidence, however, leads to the inference that the main ideas of the institution of the 50th year as a year of release were expressed in legal form by the school of P<sup>h</sup> and have survived in a modified shape in this chapter.

nonlified shape in this chapter. <sup>8-15</sup> is full of redundancies, and when the clauses given to P<sup>a</sup> are removed, the remainder is almost complete as an intelligible whole. <sup>9</sup> mentioning the day of atomenet as an annual fast must be late, and it is conjectured from Ezk 40<sup>1</sup> that the 10th the original source the incongruity of the trumpet blasts on the solemn fast day is not found, but has been inserted as an interpretation of <sup>8</sup>. <sup>14</sup> shows in Heb a confusion of sing, and plur, persons, and its last clause seems to be altered to lead up to <sup>15</sup>, itself modified by P<sup>4</sup>, while something which introduced <sup>14</sup> is now missing. That <sup>818</sup> breaks the connexion between <sup>1</sup> and <sup>19</sup> is another proof that it has been the subject of editorial from analogy with <sup>4</sup>, a jubile piece. It contains, moreover, the final stage of principle, explicitly stated instead of merely implied. <sup>-34</sup> states the rule of which <sup>35</sup> is a particular case. Like <sup>32</sup>, however, it may be P<sup>4</sup>, as the plural is less common in P<sup>8</sup>.—In <sup>25-31</sup> the jubile references are so embedded in the material that no analysis is feasible, though an earlier basis is possible. Contrast and if a mat <sup>25</sup> and <sup>35</sup> is 2<sup>34</sup> providing for city property has the air of later legal refinement. <sup>3234</sup> is the lates the ditt of all with its provision for Levites who have not yet been mentioned themselves, much less their cities; cf. Nu 35<sup>1-3</sup>.—For further particulars about this difficult chapter, see the art. referred to above.

26: Concluding exhortation.—<sup>1-3</sup> contains brief laws forbidding false worship and commanding the true.—In <sup>3-45</sup> is found a long discourse, similar to those found at the end of other codes, Ex  $23^{207}$ . E, and Dt 24 D. Already hortatory fragments have appeared in  $18^{3-5.24-30}$   $10^{201.25}$   $22^{31-33}$ . In all a common phraseology is used, identical expressions frequently occur, the same stress is laid upon the supreme deity of J", the need for holiness, and the danger of contamination by the Canaanites. There can be no doubt that the last and longest marks the completion of the code known as the Law of Holiness. (See, further, below under § 5).

below under § 5). 27: On vores and tithes.—<sup>1-26</sup> deals with the subject of vows, and employs the fully developed terminology of P<sup>\*</sup> and P<sup>\*</sup>. It is assigned above to the latter, because in <sup>17-24</sup> the year of jubile is so prominent an element.—<sup>36-29</sup> contains certain supplemental provisions.—<sup>36-35</sup> is an appendix on tithes which must be pronounced of very late composition. Even in Nu 18<sup>21-32</sup> tithes seem to be, in accordance with the prescriptions of D, restricted to vegetable produce. § 5. AUTHORSHIP AND DATE.—As we have seen.

§ 5. AUTHORSHIP AND DATE.—As we have seen, the Book of Leviticus turns out to be made up of many p.eccs, so distinct from one another in style and contents and tone that they can only be assigned with probability to many writers, none

of whom can be identified with Moses. Though, however, we cannot arrive at names of authors, we may approximately reckon up the number of distinct writers whose hands betray themselves in the striking example of well designed literary product, which we call the Book of Leviticus.

• We begin with that portion of the book which all will admit is the oldest, *i.e.* the Law of Holiness in 17-26.

(1) The structure of this section is analogous to that of two other important Hebrew codes, viz. E's combined Words of the Covenant and Judgments in Ex 20<sup>32</sup>-23, and the Deuteronomic Code in Dt 12-28. In all three cases we have a collection of somewhat miscellaneous enactments, introduced by a law as to sacrifice and the place of worship, and closed by a prophetic discourse. In Lv 26<sup>36</sup> there is in addition a colophon explicitly marking the termination of a body of Sinaitic legislation.

(2) The style and language prevailing in these chapters distinguish them from the rest of P. The peculiarities are best seen in 18-20 and in 26. But, after gaining an impression of them there, it is impossible to examine closely 17 or 21-22 or 23-25 without recognizing the presence of the same characteristics. It is true that passages are encountered without these signs, and others in which the phenomena are mixed. But these are sufficiently explained by supposing that the compiler who incorporated P<sup>h</sup> in P revised and supplemented his original, as was universally the custom with ancient editors. It agrees with this that the portions which have thus received alteration are those which deal with ritual and the priesthood. Considering the shortness of the whole, it is wonderful how many words and phrases are peculiar to it among the Pentateuchal documents. (See the lists already referred to, p. 106<sup>a</sup>, § 4 B line 3). In the legislation the style is far more concise and direct, and far less technical, than in the rest of P, while the rhetorical mould in which the discourse in 26 is cast has left its impress upon a number of shorter hortatory passages upon marked effect of style is produced by the reiteration of phrases expressing the leading ideas of the collection.

(3) These *leading ideas* are few but great, and they dominate every chapter. i. There is a unique sense of the majesty and presence of God, expressed by the constant recurrence of the 'Divine I' in the phrases I am J'', etc. If the more diffusely rhetorical style of Dt is like the varied harmonies of organ music, in the Law of Holiness we rather hear the solemn strokes of a great church bell, proclaiming the dwelling of the Most High God anongst men, and calling them to worship and obey. ii. This effect is enhanced by the isolation of one attribute, the *holiness* of God, which carries with it as a corollary the holiness of His people. iii. The negative to these positives is supplied by the awful peril of profanation from the peoples of the land, with their heathen orgies and abominable customs. — No other section of the same elements. (4) The nature of the contents makes for the

(4) The nature of the contents makes for the same conclusion. The entire legislative material of the Pent. may be grouped under the following heads:--1. The Family, 2. Persons and Animals, 3. Property, 4. Judgment and Rule, 5. Idolatry and Superstition, 6. Clean and Unclean, 7. Sacrifice, 8-11. Sacred Dues, Seasons, Places, and Persons. The last six classes thus relate to ceremonial and ritual, the first five to religion and morals generally in social life. Now, while E and D are rela-

tively most copious on these five heads, Ph is which deals with these matters at all, except the law of jubile (certain temporary regulations in Nu are not reckoned). 60 per cent. of the ordinances of  $P^{h}$  belong to these five classes and have no parallel in the rest of P, but, with one doubtful exception, may all be matched from E or D. Only 40 per cent. come under heads where parallels with the rest of P are numerous.

(5) The resemblances with *Ezckiel* have long attracted attention. They are indeed so striking as to have led many critics to argue that the prophet was the author of the code. The similar relation between Dt and Jeremiah was indeed often interpreted in the same way. But if in each case it has been found impossible to sustain the hypothesis of identity of authorship, in each case also it has been demonstrated that a close connexion subsisted between the two. And if it cannot be a mere coincidence that Jeremiah is the first writer to betray indebtedness to Dt, so it is natural to conclude that, if P<sup>h</sup> had been long in existence as a literary whole, it would not have been left to Ezekiel to show traces of its peculiar phrases and ideas. Some of the most striking of these parallels may now be enumerated for the examination of the student.

#### Parallels between Lv 17-26 and Ezekiel.\*

1.	The Laws.	2. The Horte	story Passages.
1. : Lv 173. 8. 10 1713 1715 17	Ezk 144 7 145 247 1410 4410. 12 2210. 11 187. 12. 16 188 3315 3325 4510 227 4431 4430 4432 4431 2235 cf. 3435. 33 3336. 11. 14 396. 35	2. (6) From the above (taken in connexion with the previous critical notes) certain inferences may be drawn: i. There is a substantial unity in Lv 17-28, but it is the unity of a school and not of an individual. ii. It is difficult to say whether the compiler of the code and author of the closing discourse was before or after Ezk, but on the discourse was before or after Ezk, but on the whole it is more probable that he was later, to-wards the end of the Exile. iii. But no part of the legislation (occasional glosses excepted) need be later than Ezk. iv. The prophet appeals to and rests upon the collections of laws which under-lie the present text. v. In their form (cf. their frequent grouping in 10's and 5's) and in their substance (cf. the Anglo - Saxon *Penitentials*, framed also for a rude acc) these laws may well framed also for a rude age) these laws may well be very ancient. Their antiquity is indeed better established than any theory of their origin. An attractive and plausible conjecture, however, is that they represent J's missing legislation. The sympathy of J with the priesthood is repeatedly shown.

b. Enough has been said above under § 1 B and § 3 B to justify the inference that there was a second

\* These instances are all taken from the forthcoming Oxf. Anal. Hex., where they will be printed in full in the introduc-tion, which deals fully with the whole question.

# LEVITICUS

school of priestly canonists (Pt), who set them-selves to reduce to writing the current religious praxis of the Jerusalem Temple, all of which was apparently accepted as Mosaic. It may be considered doubtful whether their work had been carried very far, even if it was begun, before the destruction of the Temple rendered it necessary, if the whole tradition was not to be lost. 1-3and  $6^8-7$  probably represent two collectors, and 11-15 one or more.

c. It may very well have been one of this school who developed its presuppositions yet further, and carried them out more vigorously, embodying them in the great book of History and Law called P<sup>\*</sup>, of which but little is included in Lv. In it all takes place in and for the camp, and centres round the Tabernacle and its single altar, Aaron the one anointed priest forming with his sons the exclu-sive priesthood, and the sons of Levi the minister-ing tribe. The most natural date is after the Restoration, as no trace of this system is found till the arrival of Ezra.

d. Last came a long line of scribes (P<sup>a</sup>), combining, revising, expanding, and supplementing, until the Pentateuch reached its present form.

§ 6. HISTORICAL SIGNIFICANCE OF LEVITICUS.

a. As thus resolved into its component parts arranged in chronological order, though not all a great witness to the Christian doctrine of evolution. As, under the inspiration and prompting of the Spirit of God, the laws for conduct and worship were shaped and modified, their form largely dependent on historical circumstances, so we who have had committed to us the revelation of absolute truth in Christ may expect to have amongst us a presence of the Spirit adequate to enable us to

presence of the Spirit adequate to enable us to apply that truth for each age till the end comes. b. Lv is the literary monument of the Hebrew priesthood. Overshadowed in the earlier history by kings and prophets, represented in the pages of written prophecy by the degenerate members of the order, it is in Lv and Ezk that we see how the priests trained Israel to associate a high standard of morality with a stately form of worship, which, though freely using material means, was, in its essence, and still more as com-pared with contemporary forms of religion, severely spiritual and rich in symbolical significance. spiritual and rich in symbolical significance.

c. The earlier collections in the one case (P<sup>h</sup>) carry us back to the earlier years of the monarchy, and in the other  $(P^t)$  preserve probably with accu-racy the procedure at the Temple during the period after Josiah's reformation, and no doubt partially reflect the praxis of previous centuries, for the continuity of custom and persistency of ritual where no historical revolution has taken place must be remembered.

d. As a whole, Lv is the mirror of the Second Temple and its system. Whenever it or its several parts were written, it is on all hands admitted that its provisions were never fully executed till the time of Ezra.

§ 7. RELIGIOUS VALUE OF LEVITICUS. **a.** We still need, side by side with the prophetic. the priestly view of religion. (See § 6 b). For all J" was Israel's God, but for the one His Righteousness, and for the other His Holiness was the dominant attribute. (The earlier prophetic term 'Holy One of Israel' hardly belongs to the same circle of ideas as Lv.)

b. Amid the labyrinth of connected but frequently conflicting ordinances the watchwords of the *Law of Holiness* enable us to thread the maze securely. There are differences in the way by which it is sought to realize the ideal: the ideal is but one, the Holy God amid a Holy People in a Holy Land.

# LEWD, LEWDNESS

c. The Law of Sacrifice reminds us of our human need for something visible and outward in our worship, while its particulars happily illustrate, even if they do not teach, the various parts of Christian devotion. Sacrifices are elements in the visible fabric of religion by which the spiritual service of the Holy God was given a protective shell for its growth: eternal moments in the life energy of the worshipping spirit, visualized in temporary form: signposts pointing to the Perfect Sacrifice : earnests of that Sacrament which replaces sacrifice proper by commemoration and communion.

d. The Law of the Consecration of the Priesthood, with the multitude of ordinances on the duties and holiness of the priests, must ever remain solemn reading for all those who believe themselves to have been made priests unto their God, and especially for them on whom the great High Priest has laid the awful burden of ministering as His commissioned representatives.

e. Lastly, the Law of Clean and Unclean enforces one great lesson alike of the Incarnation itself and of the life of the Incarnate, that the body matters intensely. Health helps not happiness only, but holiness. Cleanliness and godliness have their real and close relations. The study of hygiene, the pronotion of public health by helping to make or enforce good sanitary laws and bye-laws, the provision of baths and wash-houses or of a water supply, simple living, good housewifery, the stamping out of infectious diseases, the treatment of the poor and sick,—if Lv only furnished texts for the commendation of these things, could we say that its religious value was insignificant?

LITERATURE.—(See art. HEXATEUCH). Kallsch's Comm. is the best in Eng.; cf. also Driver and White in Polychrome Bible (brief comments); Kellogg in Expos. Bible (for application); Hezzpla in Lertifcum, 1631 (older views fully given); see also arta. PRIESTS AND LEVITES, SACRIFICE, TYPE, UNCLEANNESS.

G. HARFORD-BATTERSBY.

**LEWD, LEWDNESS.**—The Anglo-Saxon latived (or geltwed) was the past ptcp. of lativan, to enfeeble; in middle Eng. it appeared as lewed, which was afterwards contracted to levod. Thus the earliest meaning is 'enfeebled,' 'useless,' as in *Piers Plowman*, ii. 186—

'Chastite with-oute charite worth cheynid in helle ; Hit is as lewede as a lampe that no lyght ys ynne.'

Next we find the meaning of 'ignorant.' which was the usual sense of the word down to Shakespeare. Thus Chaucer, (?) Romaunt, Frag. C. 1. 6217—

'Lered or lewd, lord or lady';

Spenser, Shephcards Calendar, ii. 10-

Lewdly complainest thou, lassie ladde, Of winters wracke for making thee sadde';

and Ascham, Scholemaster, p. 45: 'This lewde and learned, by common experience, know to be most trewe.' From this arose a special use of the word to designate the *laity*, who are the lewd inasmuch as they are the unlearned, and so are distinguished from the 'clergy' or 'clerks,' the learned.\* Wyclif (1382) translates 1 S 21' 'And answerynge the preset to David seith to hym, I haue not leeuyd loouys at hoond (1388, 'Y haue not lewid, *that is comyn*, looues at hoond'), but oonli hooli breed.' Again, in the Wycliftite tr. of 1388, Ac 4<sup>13</sup> is rendered, 'And thei siyen the stidfastnesse of Petre and of Joon, for it was foundun that thei weren men unlettrid, and lewid men, and thei yhesu'; which in 1380 had been 'founden that thei weren men with oute lettris, and idiotis' (Gr.

\* Trench and Skeat hold that the sense of 'lay' came first, and that 'ignorant' developed out of it, the laity being seen to be 'the ignorant party.' But the other order seems proved by the examples we have gathered.

 $l\delta_{i}\hat{\omega}rai = private persons, 'laymen'; Vulg. idiote; Tind. 'laye people'; Cran. 'laye men'; Rhem. 'of the vulgar sort'). The two meanings of 'ignorant' and 'lay' are closely combined in Ascham, Works, (ed. 1815), p. 206, 'Hereby is plainly seen, how learning is robbed of the best wits; first, by the great beating, and after, the ill choosing of scholars to go to the universities: whereof cometh partly that lewd and spiteful proverb, sounding to the just hurt of learning, and shame of learned men, that the greatest clerks be not the wisset men'; and in Sir John Davies,$ *The Soul*, st. 13—

'Thus these great clerks their little wisedome shew, While with their doctrines they at hazard play; Tossing their light opinions to and fro. To mocke the lewde, as learnd in this as they.'

From this developed next the sense of 'wicked' by an easily understood transition. Sir John Davies, *Discoverie of the State of Ireland* (ed. 1613), p. 181, says the followers of the Irish chieftains 'were borne out and countenanced in all their lewde and wicked actions'; North (*Plutarch*, 'Cicero,' p. 862) has 'This Verres had been Praetor of Cicilia, and had committed many lewd parts there'; and this is the meaning in Milton, *PL* iv. 193-

'So clomb this first grand thief into God's fold : So since into his Church lewd hirelings climb.'

And then, finally, came the meaning of 'lustful,' the special wickedness to which the ignorant were prone, and the only meaning that has remained to the word. This is as old as Chaucer; cf. also Spenser, FQ II. i. 10—

'O would it so had chaunst, That you, most noble Sir, had present beene When that lewd ribauld, with vile lust advaunst, Laid first his filthy hands on virgin cleene';

Milton, PL i. 490—

'Belial came last, than whom a Spirit more lewd Fell not from Heaven, or more gross to love Vice for itself';

and Comus, 465-

'But, when lust, By unchaste looks, loose gestures, and foul talk, But most by levd and lavish act of sin, Lets in definement to the inward parts, The soul grows clotted by contagion.'

In AV lewd, lewdly, and lewdness are found in both the meanings last noted, and there is no sharp distinction between them. The special sense of 'lustful,' while usual in OT, does not occur in Apocr. or NT.

The Heb. words are (1)  $\pi p_1 zimmah$ , which is tr<sup>4</sup> 'lewdness' in Jg 20<sup>6</sup> (Moore, 'abomination,' which is the Geneva word), Jer 13<sup>77</sup>, Hos 6<sup>9</sup> (Cheyne, 'outrages'), and often in Ezk (16<sup>43, 58</sup> 22<sup>9</sup> 23<sup>21, 37, 39, 35, <sup>46</sup> bit. <sup>40</sup> 24<sup>13</sup>: see Davidson on 16<sup>43</sup>). This word has a range of meaning from the colourless 'plan' or 'purpose' (only Job 17<sup>11</sup>) to the special sin of unchastity. Besides the above, it is rendered in AV 'purpose' (Job 17<sup>11</sup>), 'thought' (Pr 24<sup>9</sup>, so RV, but *UHL* 'evil device'), 'wicked device' (Is 32<sup>7</sup>), 'wickedness' (Lv 18<sup>17</sup> 19<sup>39</sup> 20<sup>14</sup>bit, RVm 'enormity'), 'mischief' (Ps 26<sup>10</sup> 119<sup>169</sup>, Pr 10<sup>35</sup>, RV in last two 'wickedness'), 'heinous crime' (Job 31<sup>11</sup>); in Ezk 16<sup>27</sup> the Heb. 'way of lewdness' is tr<sup>4</sup> 'lewd way,' so 'women of lewdness' is 'with a wicked mind,' RVm 'to atone for wickedness'; and in Ezk 22<sup>11</sup> it is 'lewdly.' (2) The derivative  $\pi p_1 p_1$  is once (Jer 11<sup>16</sup>) rendered 'lewdness'; and (3)  $m^5 p_1 mabh$ linth, in its only occurrence (Hos 2<sup>10</sup>) is so translated,AVm 'folly or villany,' RVm 'shame.'In Apocr. the adj. occurs in Ad. Est 16<sup>4</sup> 'lifted up</sup>

In Apper. the adj. occurs in Ad. Est 16<sup>4</sup> 'lifted up with the glorious words of lewd persons that were never good '( $rois \tau \delta \nu \, d\pi \epsilon i \rho a \gamma a \theta \delta \nu \pi \epsilon i \rho a \gamma a \theta \delta \nu \pi \epsilon s,$ RV 'lifted up with the boastful words of them that were never good'); 16<sup>6</sup> 'lewd disposition'

# LIBANUS

(κακοπιστία); Sir 30<sup>13</sup> 'lewd behaviour'. ( $d\sigma\chi\eta\mu\sigma$ σύνη, RV 'shameless behaviour'); and Sir 16<sup>heading</sup> 'It is better to have none, than many lewd children'; the adv. in Wis 15<sup>8</sup> 'employing his labours lewdly' (κακόμοχθος, RV 'labouring to an evil end'); and the subst. in To 4<sup>13</sup> 'in lewdness is decay and great want' (έν τη άχρειότητι, RV 'in naughtiness'). In NT the adj. occurs but once, Ac 17<sup>5</sup> 'certain lewd fellows of the baser sort' (τών άγοραίων τινάς άνδρας ποτηρούς, RV 'certain vile fellows of the rabble'); and the subst. once, Ac 18<sup>14</sup> 'If it were a matter of wrong or wicked lewdness' (βαδιούργημα πονηρόν, RV 'wicked villany').

LIBERTINES. — In Ac 6<sup>9</sup> we read that 'there arose certain of them that were of the synagogue called (the synagogue) of the Libertines, and of the Cyrenians, and of the Alexandrians, and of them of Cilicia and Asia, disputing with Stephen.' In close relation to the question who the Libertines were, stands the question as to the number of synagogues here indicated. It has been held that only one synagogue is implied (Calvin, Wieseler; cf. Hort, Judaistic Christianity, 50); that there were two synagogues—the one consisting of Libertines and Cyrenians and Alexandrians, the other of Cilicians and Asiatics (Winer, Holtzmann, Wendt); that each of the five parties had a separate synagogue (Schürer, Hausrath). The last view is supported by the fact that in Jerus, the synagogues —though they did not number 480, as affirmed in rabbinical traditions—were very numerous, and by the consideration that even if the inhabitants of all the places mentioned could have been accommodated in one synagogue—a supposition which the largeness of the Jewish population in Cyrene and Alexandria renders very improbable—there was no common bond to bring together men from towns or districts so widely separated.

If this view be sound, it helps to determine the question whether by the L. we are to understand the inhabitants of some town or the designation of a class. The association of the Libertines with the Cyrenians, etc., would naturally suggest the inhabitants of some town in Proconsular Africa, and conjectural emendations of the text (Aisvorirur (Wetstein, Blass) or Aibiw Tŵr Katà Kuphrny) based on this assumption have been made (see Blass, Philology of Gospels, 69f.). It is argued by Gerdes ('de synagoga Libertinorum,' Exercit. Acad. 1738, who at the same time furnishes a complete statement and discussion of other views) that if Luke had meant Libertini in the Roman sense, he would have used a Gr., not a Lat. word; that Suidas men-tions a town named *Libertum*; and that among those present at the Council of Carthage in 411 was Victor Episcopus Ecclesiæ Catholicæ Libertinensis, between whom and the rival Donatist bishop a Subscription took place (Mansi, iv. 91, 92). But the statement of Suidas is probably derived from the passage in Ac; and, moreover, it is altogether improbable that the Jewish contingent from a town so obscure could have maintained a separate synagogue at Jerusalem. Moreover, the addition by Luke of  $\tau \hat{\eta} s$   $\lambda e \gamma o \mu t e \eta s$ intended to guard against the possibility of our misconceiving that the Libertines, like the others mentioned, were inhabitants of a place.

Setting aside the fantastic conjectures that the Libertines were a philosophical sect, or the adherents of the school of one Libertus, and the suggestion of Lightfoot (*Hor. Heb. et Talm.*) that they were Pal. Jews who had been enslaved and subsequently set free, we conclude that the Libertines

# LIBERTY

were freedmen in the Roman sense of the term. They were mainly descendants of those Jews who had been taken as prisoners to Rome by Pompey in B.C. 63, and there sold as slaves. We learn from Philo (*Leg. ad Gaium*, c. 23, ii. 568 (Mang.)) that the majority of the Roman Jews belonged to the class of freedmen (cf. Tacitus, Ann. ii. 85; Suet. Tib. c. 36). Their enslaved condition lasted but a short time, and they soon became an important factor in the community. Whether they were manumitted by their masters because their value as slaves was greatly lessened by their tenacious adherence to their national customs (Hausrath), or because their fidelity as slaves suggested to their masters that as freemen they would be of still greater service (Berliner), or whether they were ransomed by their own countrymen (Grätz), we do not know; but the language of Philo seems to indicate that the first-mentioned cause was the most influential. The fear of the Jews expressed by Cicero (*pro Flacco*, c. 28) is no doubt rhetorical; but rhetorically it would have been pointless if the Jews charge is defined been found to be found to be found to be a factor of the second to be a facto Jews had been a feeble folk (cf. Hor. Sat. i. 4. 143). By such of them as returned to settle in Jerus. or were temporarily resident there, a synagogue was built. According to Hausrath the building of a separate synagogue was a necessity, as from a theocratic point of view they were subject to certain disabilities. Among the inscriptions quoted by Schürer (Die Gemeindeverfassung der Juden in Rom, p. 15) is one referring to a synagogue  $\tau \mathcal{L} \mathbf{r}$ A*iyyotyolur*; and if, as is probable, this refers to freedmen or slaves in the house of Augustus, it seems to show that at Rome was reproduced the type of distinctions that existed in Jerusalem. Like the other Hel. Jews, the Libertines were keenly opposed to the new faith, and the very inferiority of their social and theocratic standing may have caused them to emphasize the distinctiveness of their religious position (cf. Gerdes, op. cit.; Schürer, op. cit.; HJP II. ii. 56 f., 276; Hausrath in Schenkel, *Bibel-Lexicon*; Meyer on Ac 6<sup>9</sup>; *Ex*positor, July, 1895, p. 35). JOHN PATRICK.

**LIBERTY.**—The only passage in which this word needs verbal attention is 1 Mac  $10^{43}$  'And whosoever they be that flee unto the temple at Jerusalem, or be within the liberties thereof, being indebted unto the king, or for any other matter, let them be at liberty, and all that they have in my realm.' The 'liberties' of the temple are its precincts, the parts within which its innutes have liberty of action. The Gr. is  $\delta \mu a$ , borders, bounds. Scrivener gives this as one of the colloquialisms peculiar to the Apocr., which the AV translators accepted with slovenliness from the Bishops' Bible. It is also the tr. of Coverdale and the Geneva Bible. Wyclif's word is 'coasts' = boundaries, and so Douay, after Vulg. *fines.* J. HASTINGS.

LIBERTY.—This idea forms one of the characteristic differences between OT and NT conceptions of religion. In OT the idea is almost entirely absent. 'The fear of the Lord' is the distinctive name for religion (Ps 34<sup>11</sup> etc.), 'servant' is the distinctive title of the good (Ps 19<sup>11</sup>, He 3° etc.). God is thought of chieffy as the supreme, universal sovereign and ruler, Is 33<sup>22</sup>. Obedience is the central virtue of religious character, to which all blessings are promised, 1 S 15<sup>22</sup>. To illustrate this position fully, it would be necessary to quote a large part of the OT. We do not mean that there are no indications of more intimate relations between God and man. The freer, gentler side of religion is undoubtedly known. The law of love for God and man is promulgated. Many of the psalmists and prophets rise to lofty heights of divine joy and fellowship. But the

## LIBERTY

ground-tone of OT piety is reverential fear. This order of development in revelation was fitting and indeed inevitable. The OT age was the age of childhood in revealed religion, and children are trained for independence by a course of obedience and subjection to authority (Gal 4<sup>14</sup>.). 'The law hath been our tutor to bring us unto Christ' (Gal 3<sup>24</sup>). The patriarchal age certainly seems to breathe a freer spirit than the age of the law proper. Still, even then religious thought and feeling can only have been elementary; and this is the impression made by the negretive (If leter is the impression made by the narrative. Of later days St. Paul uses strong, even harsh, language, 'weak and beggarly rudiments' (Gal 4<sup>9</sup>). The prevailing spirit was a 'spirit of bondage to fear' (Ro 815). At the same time the emphasis laid on (100°). At one can the time time the time take on the constraint of the God's work of redemption must have given rise to thoughts of spiritual freedom (Ex 13<sup>14</sup>, Dt 7<sup>8</sup>, 1 Ch 17<sup>21</sup> etc.), and in Is 61<sup>1</sup> this truth finds glorious expression. It is perhaps worth while to notice that, while in the political system of Israel there is no trace of the idea of liberty in the modern sense, that system is distinguished from the despotisms of the day by many humane regulations unknown elsewhere, such as those with regard to slavery (Ex  $21^2$ ) and land (Lv  $25^{10.23}$ ).

Christianity brought, first of all, freedom from the ceremonial restrictions and conditions of OT religion. The Mosaic law is described as 'a yoke which neither we nor our fathers were able to bear' (Ac 15<sup>.0</sup>). To all attempts to continue or reimpose the yoke on Christian believers, St. Paul offered unflinching and successful resistance (Gal  $3^{24} 5^{16}$ ), and so won the victory of Christian free-dom for all time. The teaching of the Epistle to the Hebrews throughout supports St. Paul (923 101). The NT condemns beforehand all attempts to reduce Christianity to a mere system of ritual. The Lord Jesus, St. Paul, and St. John are at one in their insistence on spiritual religion. But the chief NT doctrine on this subject is that of inward freedom as the privilege of all believers. Sin brings into bondage (Jn 8<sup>34</sup>, Ro

believers. Sin brings into bondage (Jn  $8^{34}$ , Ro  $6^{164}$ ); but from this bondage believers are saved both negatively and positively. This is the pro-found meaning of redemption in the NT sense— deliverance from that sense of guilt and fear and condemnation which oppresses and fetters the soul (Ro 8<sup>3</sup>, Tit 2<sup>14</sup> etc.). 'Ye were servants of sin, ye became servants of righteousness' (Ro 6<sup>17t</sup>.). Knowledge of the truth is the means (Jn 8<sup>33</sup>), Christ Himself the source (Jn 8<sup>36</sup>, 2Co 3<sup>17</sup>), of this highest freedom. The 'spirit of bondage' gives place to the 'spirit of adoption' (Ro 8<sup>16</sup>, Gal 4<sup>6</sup>). Sin, death, the world, are conquered enemies (1 Co

15<sup>5567.</sup>, Ro 8<sup>37-39</sup>, 1 Jn 5<sup>4</sup>). The exultant sense of power, of present and future triumph, enjoyed by the believer, is vividly expressed in passages like Ro 5<sup>2-10</sup> 6<sup>12-32</sup> 8<sup>38</sup>. Spiritual freedom cultain-ates in the relation of children in which believers stand to God. In our Lord's teaching, in St. stand to God. In our Lord's teaching, in St. Paul's and St. John's, this is always represented as the distinctive privilege of the saved, so pro-found and far-reaching is the NT revelation of the divine Fatherhood in the fullest sense: 'your Father in heaven' (Mt 5<sup>49</sup> 7<sup>11</sup>, Jn 1<sup>12, 13</sup>, Ro 8<sup>16</sup>, 1 Jn 3<sup>14</sup>.). St. Paul expressly contrasts the state of the servant and the son: 'Thou art no more a servant, but a son' (Gal 4<sup>7</sup>). God is thought of as Father, no longer as Ruler merely. The most simpl exercise of the liberty of children of of as Father, no longer as Ruler merely. The most signal exercise of the liberty of children of God is the boldness with which believers draw near to God (He 4<sup>16</sup> 10<sup>19</sup>). Christians are invested with the full privileges of the priesthood (1 P 2<sup>9</sup>). Liberty is not to pass into licence (Gal 5<sup>13</sup>, 1 P 2<sup>16</sup>). St. James speaks of a 'law of liberty' (1<sup>22</sup> 2<sup>12</sup>).

On the thorny questions which have arisen in connexion with liberty and necessity, Scripture says nothing, but implies much. By always ap-pealing to man as responsible, by calling upon him to repent and believe, by holding him ac-countable on the result of his ration? countable for the results of his action, it assumes that he is free, and in the most definite way refutes the doctrine of moral fatalism. Man may become the doctrine of moral fatalism. Man may become the slave of sin, sinking into spiritual paralysis; but it is his own act, and recovery is always pos-sible in this life. Only so far as his action is voluntary, and his slavery self-induced, is he guilty. Pharaoh who hardened his heart repeat-edly, Ahab who 'did evil above all that were before him,' Jeroboam 'who made Israel to sin,' are terrible examples of the hardening effects of sin . but their ruin was their own work . they are terrible examples of the hardening effects or sin; but their ruin was their own work; they 'sold themselves to work evil' (1 K  $21^{30}$ ). Other-wise, they could not have been punished by God as they were. Whatever speculative difficulties may be raised on the ground of the divine omni-science, or the law of heredity, or the principle of cause and effect, they vanish before man's in-vincible consciousness of moral responsibility and the Sorinture declarations of God's rightrousness the Scripture declarations of God's righteousness and man's freedom (Gn 18<sup>25</sup>, Ezk 33<sup>114</sup>, Jn 3<sup>19</sup> 5<sup>40</sup>). J. S. BANKS.

LIBNAH (לְבָה).-1. The third of the 12 stations following Hazeroth, mentioned only in Nu 3320. 21 (see EXODUS, IV.), unless it is the same place that is called in Dt 1<sup>1</sup> Laban. Its position is not known. 2. A city taken by Joshua (Jos 10<sup>29, 30</sup>), and, from the context, situate between Makkedah and Lachish. The name occurs in the list of con-

quered kings (1215) between Arad and Adullam, in a group of 9 cities of the Shephelah ( $15^{44}$ ) and in the lists of priestly cities ( $21^{10}$ , 1 Ch  $6^{42}$  [v.<sup>67</sup> LXX and Eng.]). The MT in Ch describes it as a city and Eng.]). Joram [Jehoran] (2 K 8<sup>23</sup>, 2 Ch 21<sup>10</sup>). It appears to have been a stronghold, for the king of Assyria attacked it in the time of Hezekiah (2 K 19<sup>8</sup>, Is 37<sup>8</sup>). In the last days of the kingdom of Judah it was inhabited by Jewish families, for Josiah took to wife a daughter of Jeremiah of Libnah (2 K  $23^{31}$  $24^{18}$ ). This is the last biblical notice of the place, and no reference to it occurs in later times. It was probably in the neighbourhood of Beit Jibrin, and a site 4 miles to N.W. has been proposed, and (*PEFSt*, Jan. 1897) another, 10 miles S.E. of Tell el-Hesy. The LXX renderings are very varied,  $\Lambda\epsilon\beta\nu a$  or  $\Lambda\delta\beta\nu a$  occurring most frequently; for  $\beta$  is substi-tuted  $\mu$  in some places and  $\lambda\epsilon\beta\mu a$ 

tuted  $\mu$  in some places, and  $\lambda \epsilon \beta \mu r \delta$  occurs in A. The first vowel is often varied, but generally no vowel is found between  $\beta$  and r, and in this respect the renderings are distinguished from those of the renderings are distinguished from those of Libnah (1), which introduce  $\omega$  between  $\beta$  and r;  $A\epsilon\beta\omega rd$ , with  $\mu$  for  $\beta$  in B. The first syllable of the rendering Zervd in 2 K 8<sup>22</sup> may be a duplication of the last syllable of the preceding word. On the previous page is a list of the LXX variations. A. T. CHAPMAN, INPUT (upb Action (2010) The aldert are a formula

LIBNI (לְבְנִי), Λοβεν(ε)l). - The eldest son of Gershon, that is to say, the eponym of a principal family of Gershonite Levites, Ex  $6^{17}$ , Nu  $3^{18}$ , 1 Ch  $6^{17}$ . So [Heb. <sup>2</sup> <sup>5</sup>]. In 1 Ch  $6^{29}$  [Heb. <sup>14</sup>], perhaps owing to some dislocation of the text, the name appears as that of the eponym of a family of Merarites. The The patronymic Libnites (777) occurs in Nu 321 2658.

**LICE** (DD, DDD kinnim, DD kinnām,  $\sigma \kappa r l \phi c_{5}$ ,  $\kappa r l \pi c_{5}$ , sciniphes, cinifes).—The usual meaning of  $\sigma \kappa r l \psi = \kappa r l \psi$  is plant-louse. It is also used for various species of gnats. Some have supposed it to designate a species of worm. Whether it can be understood of the louse also is not clear. The tr. in the text of EV (Ex 8<sup>16</sup> RVm 'sandflies' or 'fleas,' <sup>17.18</sup>, Ps 105<sup>31</sup>) 'lice' is based upon the authority of the Talmud; on the fact that the insects all uded to surgard from the dust not the insects alluded to sprang from the dust, not from the water; that the lice were in, not on men from the water; that one not not not any many and beasts, i.e. in their hair; that the Targum, Syriac, and Arabic VSS tr. the word by one which the many lice rather than grats. Scholars are still divided on the subject (see MEDICINE, p. 330), but the weight of evidence seems to be in favour of *lice* as the third of the plagues of Egypt. Lice swarm on the persons of uncleanly people in the East. The better classes of the ancient Egyptians, however, were scrupulously clean; and Herodotus says that the priests shaved all the hair from their heads and bodies every third day, lest they should harbour any of these unclean insects, and so defile the temples. Such a pest, therefore, would be peculiarly abhorrent to them. See, on the whole subject, Dillm. on Ex  $8^{13}$ .

G. E. POST.

G. E. POST. LICENCE is simply 'permission' in all its occur-rences in AV, where its spelling is indifferently 'licence' (1 Mac 1<sup>13</sup>, 2 Mac 4<sup>9</sup>, Ac 21<sup>40</sup> 25<sup>16</sup>), or 'license' (Jth 11<sup>14</sup>, Sir 15<sup>20</sup>), and the verb does not occur. RV retains 'licence' (spelling so always), except in 2 Mac 4<sup>9</sup>, AV 'if he might have licence to set him up a place for exercise' ( $da\nu \sigma v \gamma \chi a \rho \eta \theta \hat{\eta}$   $\delta id \tau \hat{\eta}s$  *étouolas abroû*, RV 'if it might be allowed

# LIE, LYING

and 20<sup>5</sup> AV have had opportunity to make his defence'). AV had already changed 'licence' of earlier versions into 'leave,' as Jn 19<sup>38</sup> Tind. 'And Pylate gave him licence.' The verb was once common in the same sense, as Ac 22 banding Rhem. common in the same sense, as AC 22 means Rhem. 'Being licensed by the Tribune to speake to the people'; Elyot, *Governour*, ii. 294, 'he licenced Plato to departe without damage.' Milton uses both subst. and vb. in their modern meaning in *Areopagitica* (Clar. Press ed. p. 6), 'But lest I should be condemn'd of introducing licence, while I oppose Licencing.' J. HASTINGS.

LIDEBIR (לְרָבָר).-Proposed in RVm of Jos 13\* as alternative rendering to of Debir (text). See DEBIR No. 2 and LODEBAR.

LIE, LYING, and the many other words of the group, describe various forms of the sin against truth, and serve to illustrate an important element of the biblical morality.

The principal Heb. and Greek terms are the following:— 1.  $\nabla p_i^{-1}$  iie' (Qai and Pi).  $\nabla p_i^{-1}$  'falsehood' (Jer 1014), 'a lie' (Ps 11969), frequently preceded by  $\nabla r_i$ , also used adverbially = 'falsely' (2 S 18<sup>13</sup>).

2. croot meaning quite uncertain) 'to speak falsely,' esp. in Pi, (with γ or 3 pointing to the person addressed); Niph. 'to be found or show oneself a liar' (Pr 305), Hiph. 'make or make out a liar' (Job 2455). 313 'a lie'; 'J z''\*, 'a liar' (Pr 1929); cf.  $\exists_1 \neq j$  Jer 15<sup>18</sup> (of failing, deceptive brook, cf. vb. in Is 57<sup>11</sup>), Mic 1<sup>14</sup>.

3. Unp 'to be lean,' 'become emaciated' (Ps 10924); Pi. with 7 or 3 'to lie to one' (1 K 1318, Jer 512); Niph. 'to feign obedience' (Dt 33<sup>39</sup>). (التلقية) 'leanness' (Job 163), usually 'a lie, 'a calumny' (Hos 10<sup>13</sup>). (deceitful' (Is 30<sup>9</sup>). The root meaning is uncertain, possibly that of *faiving*.

caumny (100 10-3).  $\sigma(3)^{-1}$  decentrul (18 309). The root meaning is uncertain, possibly that of fai/ing. 4. 72, only in plur. D<sup>-3</sup>3 (root 772, i.e. N72 'to invent') 'empty or boastful talk' (Job 113), thence applied to utterers of such, as liars, diviners (is 445, Jer 5090). 5. Mig' 'emptinoss,' 'vanity' (Ps 6011), thence applied to things of no substance or injurious, as the falsehood, the idol, the wicked or criminal act (Pr 306, Ps 244 264, Job 1111); cf. Mig' 72 'a hollow, insincere witness' (Dt 520) with  $\gamma_{27}^{-1}$  'a false witness' (Ex 2016). 6. In NT the subject is handled by the use of the group of words connected with  $4\mu\lambda_{8}$ , here used only in the middle voice.  $4\nu\lambda\sigma disc (Ja 314)$ . The list includes  $4\mu\sigma m^{-1}$  (Col 39); mark rist  $4\lambda\sigma disc (Ja 314)$ . The list includes  $4\mu\sigma m^{-1}$  (alse, 'wicked' (Ac 613, Rev 215);  $4\nu\lambda\delta m^{-1}$  (Jin 284);  $4\mu\lambda\delta m^{-1}$  false, 'wicked' (Ac 613, Rev 215);  $4\nu\lambda\delta m^{-1}$  (subject) of false of Od 'that cannot lie '(Tit 12);  $4\nu\lambda\delta m^{-1}$  (subject) (1 16 24); and various compounds descriptive of enemies of the faith, as  $4\nu\lambda\delta m^{-1}$  (Gal 22),  $4\nu\lambda\delta m^{-1}$  (2 Co 1113,  $4\nu\lambda\delta m^{-1}$ (Mt 715 etc.),  $4\nu\lambda\delta m^{-1}$  (St 22),  $4\nu\lambda\delta m^{-1}$ 1. The biblical writers describe various tures of

1. The biblical writers describe various types of lying. In its most general aspect—the saying what we know to be false with intent to deceive -it is clear that it was reprobated by the common conscience of Israel (cf. Pr 19<sup>22</sup> 30<sup>6</sup>), and it is expressly condemned in the ancient Law of Holiness pressly condemned in the ancient Law OI HOIINESS (Lv 19<sup>11, 12</sup>). Usually, however, in the legislation, including the Decalogue, special cognizance is taken of lying of the criminal kind—consisting either in the perjured testimony which procures an unjust sentence (Dt 19<sup>15-21</sup>, cf. Ex 20<sup>16</sup>), or in the false statement which is the instrument of fraudulent dealing (Lv 6<sup>14°</sup>). In the prophetical writings lying is conceived, not merely as a prinwritings lying is conceived, not merely as a prin-cipal kind, but almost as the soul, of wickedness, and so sometimes appears as the symbol of all moral evil (Hos  $12^1$ , cf. Is  $6^5$ ). At a later period 'lie' is a favourite description of the message of the false prophets (Jer 27<sup>10</sup>), and of the utterances of soothsayers (Is 4425), and the same idea is often expressed in the designation of idols and idolatry.

# LIE, LYING

In NT, in which the duty of truthfulness is strongly insisted on in contrast to Oriental deceitfulness, it is suggested that there are three lies par excellence—heathen religion (Ro 1<sup>20</sup>), the claim of the false apostle (Rev 2<sup>2</sup>), and the denial 'that Jesus is the Christ' (1 Jn  $2^{22}$ ).

2. The beinousness of lying appears in various particulars—that it is utterly inconsistent with the holiness which is of the essence of the divine nature, and gives a law to the people ( $Lv 19^{11}$ ), and more particularly with the commandments of a (Jod who Himself is absolutely true (Ps 89<sup>36</sup>); and also thet it has anti-senil effort of a runnous and also that it has anti-social effects of a ruinous and far-reaching kind (Prophets, passim; cf. Pr 2628). In NT its sinfulness is further emphasized by (Jn 8<sup>44</sup>, Ac 5<sup>3</sup>), or to the old man which is put off in conversion (Col 3<sup>9</sup>).
 3. The penalties of lying are set forth in an ascending scale. Various saws in Pr point to the baritage of computer which is the point of the

heritage of contempt which is the portion of the habitual liar. The judicial punishment of the false witness is the recoil upon himself of the evil 'he had thought to do unto his brother' (Dt 1919). In the history of Gehazi (2 K 5), and of Ananias and Sapphira (Ac 5), the aggravated lie is punished by a special judgment of appalling severity. In Ps 24<sup>4</sup> lying is numbered with the sins which disqualify from the worship of, and so exclude from communion with, God. And as a consistent de-velopment of this stern judgment we find it in the NT as specified to be the stern by which the the NT as one of the list of sins by which the essence of character is tested, and which, become habitual, entail the forfeiture of eternal salvation (Rev 21<sup>27</sup> 22<sup>16</sup>).

Two problems arising out of the subject may be briefly referred to. The first is connected with the passages which seem to represent God as using deceitful means—esp. 1 K  $22^{28}$ , where He is said to have lured Ahab to destruction by 'putting a lying spirit in the mouth of the prophets,' and in a lesser degree 1 S 16<sup>2</sup>, where He instructs Samuel to conceal his real purpose from Saul by offering a macrifice. As regards the first of these cases it may, however, be fairly held, as is indeed required by the general tenor of OT religion, that the sense is satisfied by regarding God, not as the author of sin, but as overruling wickedness to the working out of His righteous purposes. 'All that is meant is that, in carrying out God's decree of condemna-Is that, in carrying out God s decree of condemna-tion, he (the lying spirit) becomes a means of leading the king on to his doom through the fawn-ing guile of these false prophets' (W. P. Bruce, *Ethics of OT*, p. 269). It should be added that the difficulty of this class of passages is less keenly felt when the mechanical theory of inspiration is abandance abandoned.

second problem concerns the attitude of the Bible in its moral teaching towards the casuistical controversy over the lie of exigency. In other words: when we have said of a statement that it is wittingly false, or intended to deceive, is it thereby condemned as having the character of guilt? or does it lose this character if it can be shown that the false statement was required in self-defence, or by the law of love? Of such lies we have examples in the lives of Abraham (Gn 20<sup>3</sup>) and of David (1 S 21<sup>13</sup>), although obviously it does not follow, any more than in the case of the graver failings of OT saints, that they are recorded for example and guidance. On the whole, the rigorous doctrine must

<sup>•</sup> Under the same category reference may be made to the passage (Jn 7<sup>3</sup>. 10. 14) where our Lord said, <sup>•</sup>I go not up to this feast <sup>•</sup>; then <sup>•</sup> want he also up, not openly.<sup>•</sup> But, with the reading of BL (win . . . . . . . . . even without it, if the sentence is continued (*i last maple over static formal*), the difficulty almost disappears. What is quite certain is that the author of the Fourth Gospel cannot have thought that any unverscity was implied. See Meyer, in loc. VOL. 111.—8

be judged more in harmony with the spirit of the biblical morality, the common scriptural ground being that it is ours to obey the commands of the moral law, and that God may be trusted for the consequences. For a full discussion of the lie of exigency in the light of Christian principles, see Martensen's Christian Ethics (Eng. tr. 4), vol. ii. p. 216 ff., also Newman Smyth's Christian Ethics, p. 392 ff. W. P. PATERSON.

LIE.—The verb to lie was formerly used in the sense of pass the night, lodge, sleep. We find an example of this in 1s 14<sup>16</sup> All the kings of the example of this in 18 14. All the kings of the nations, even all of them, lie in glory, every one in his own house' (137#; RV 'sleep,' as Gen. Bible): cf. Jos 2<sup>1</sup> AVm 'and lay there,' for text 'and lodged there' (137#; RV 'sleep,' as Gen. 'Demetrius,' p. 895, 'For they ordained that the place behind the Temple of Minerva called Par-thenon (as who would say the temple of the thenon (as who would say, the temple of the Virgin) should be prepared for his house to lye in'; and Bunyan, PP (Clar. Press ed. p. 240), 'Then they called for the Master of the House, and he cane to them. So they asked if they might lie there that night?' On which Venables remarks, 'To *lie* continued in familiar use till the end of the last century for to *stop the night* at a place. This is the hinge of Walton's witty translation of Sir Henry Wotton's definition of an ambassador—"an honest man sent to lie abroad for the good of his country."

The following phrases should be noticed: 1. Lie ong. See ALONG. 2. Lie on or Lie upon. This along. along. See ALONG. 2. Lie on or Lie upon. A use phrase occurs in the figurative sense of 'oppress,' 'annoy,' as Dt 29<sup>20</sup> 'all the curses that are written in this book shall lie upon him' ( $\tau_{77}$ ; Driver remarks that  $\tau_{77}$  is 'to lie down as an animal' [Gn 49<sup>20</sup>], and thinks the metaphor forced, preferring the Sent collassionary (shall cleave to him'): remarks that  $\gamma_2$  is 'to' he down as an animal [Gn 49<sup>9</sup>], and thinks the metaphor forced, preferring the Sept.  $\kappa o\lambda \lambda \eta \partial \eta \sigma \sigma r a a$ , 'shall cleave to him'); .Jg 14<sup>17</sup> 'and it came to pass on the seventh day that he told her, because she lay sore upon him' ( $\pi \eta \gamma \gamma \eta$ , RV 'she pressed him sore,' Moore 'she besieged him'; the same verb is tr<sup>4</sup> in 16<sup>16</sup> 'she pressed him,' AV and RV); Ps 88<sup>7</sup> 'Thy wrath lieth hard upon me' ( $\eta \gamma \gamma \eta$ , '27, Driver 'presseth upon me'); Sir 6<sup>21</sup> 'She will lie upon him as a mighty stone of trial' ( $d \gamma \chi \rho \partial s \ f \sigma r a i \ \sigma' a \ \sigma' \gamma \eta$ , RV 'shall she rest upon him'); Ac 27<sup>30</sup> 'no small tempest lay on us' ( $\chi \epsilon \mu \omega \sigma \sigma \ldots \epsilon \pi u \kappa \epsilon \mu \kappa \epsilon \eta \sigma \eta \gamma \eta$ , swell as in 1 Co 9<sup>16</sup> 'lie upon' for the same verb, but elsewhere  $\epsilon \pi (\kappa \epsilon \iota \mu a \ is tr<sup>4</sup> \ press upon' (Lk 5<sup>1</sup>),$ 'be instant' (23<sup>23</sup>), 'impose on' (He 9<sup>10</sup>); but wherethe meaning is literal, 'lie upon') or 'lie on' (21<sup>9</sup>)is of course used. Tindale (*Expos.*p. 100) says,'Covetousness made the Pharisees to lie on Christ,to prescute Him, and falsely to accuse Him'; andto persecute Him, and falsely to accuse Him'; and again (p. 119), 'Thou wouldest not that men should again (p. 119), 'I nou wouldest not that men should no thee wrong and oppress thee; thou wouldest not that men should do thee shame and rebuke, lie on thee, kill thee,' where the editor of the Parker Soc. ed. explains 'on is used for of or against,' apparently taking 'lie' to mean 'tell lies.' In Jg 19<sup>30</sup> the phrase has a somewhat milder but very similar meaning, 'let all thy wants lie upon me' (the Heb. is simply 'be all thy wants upon me'). In Nu 21<sup>15</sup> the meaning is 'touch.' 'And at the stream of the brooks that goeth down to the dwelling of Ar, and lieth upon the border of Moab' ( $\mu\nu\eta$ ), RV as AVm 'leaneth upon'). **3.** Lie out = project, Neh 3<sup>25, 25, 27</sup> of the tower which projected from the king's palace (RV 'standeth out'). The phrase appears not to be English, but a literal rendering by Coverdale (who In v.<sup>27</sup> has 'lieth outwarde') of the Heb.  $\kappa srn, LXX$ o  $\xi \xi \chi \omega s$ , Vulg. que prominebat. The old past ptcp. *lien* occurs in Gn 26<sup>10</sup>, Ps 68<sup>13</sup>,

LIEUTENANT

Jer 3<sup>2</sup>, and RV retains (except in Ps 68<sup>13</sup>, where a different tr. dispenses with it), but Amer. RV changes to 'lain.' Cf. Job 3<sup>33</sup> Cov. 'Then shulde I now have lyen still, I shulde have slepte, and bene at rest'; Fuller, *Holy Warre*, p. 137, 'And it was good plowing up of that ground which had loog lion follow: long lien fallow." J. HASTINGS.

LIEUTENANT, RV SATRAP, Ezr 8<sup>36</sup>, Est 3<sup>12</sup> 8<sup>9</sup> 9<sup>3</sup>; also Dn 3<sup>2,3,27</sup> 6<sup>12</sup>, where AV 'Prince.'-The Heb. organizers ('dhashdarpenim) represents the Pers. khshatraphvan (=protectors of the realm), a title found on Persian inscriptions, e.g. that of Behistun (cf. Lagarde, Ges. Abb. 68, 14: Spiegel, Altpers. Keilinsch. 215). In Gr. the word became  $\epsilon_{farpharys}$ or  $\sigma arpharys$ ; in the LXX we find a considerable variety of rendering, διακηταί Εχτ, οικονόμοι 1 Ε88", στρατηγοί, άρχοντες τών σατραπών Est, σατράπαι Dn. (παστοι Dn (Theod.); in Vulg. satrapes, principes. The satrap was the governor of a whole province (cf. Dn 6<sup>1</sup> [but see Bevan, *ad loc.*], Herod. iii. 89), and he held the position of a vassal king. His power, however, was checked by the presence of a royal scribe, whose duty it was to report to the 'great king on the administration of the province. Also, the troops were for the most part under the command of an independent general. Under the satraps were the 'pehahs,' or governors of smaller districts. In Ezr 8<sup>36</sup> the term *satrap* seems to be used somewhat loosely, or the historian has unduly extended the scope of Ezra's commission; the only satrap the scope of L21a s commission, the only concern was the ruler of the district west of the Euphrates, 'the governor beyond the river' ( $\text{Ezr } 5^3$ ). H. A. WHITE.

# LIFE AND DEATH .---

- The Terms.
   The Terms.
   Examination of the Biblical Teaching.
   A. Old Test. teaching: (1) the early narratives of Gn;
   (2) the Pentateuch; (3) the Prophets; (4) the Poetical books; (5) the Wisdom literature.
   B. Apocryphal and Apocalyptic teaching.
   C. New Test. teaching: (1) the Synoptics; (2) the Johannine writings, (a) the Gospel, (b) the First Evistle, (c) the Apocalypes; (3) the Pauline Epistles;
   (4) the rest of the New Testament.
   Conclusions to be drawn from the Scriptural use of the terms.

terms. (a) Doctrinal. (b) Ethical.

i. THE TERMS.-(1) In the OT the regular word for 'to live' is an from the older root and (so Phœn.; Aram. wn) with the same signification, and similar forms occur in Arab., Syr., and allied tongues. It occurs in the sense of 'having life.' e.g. Ex 33<sup>30</sup> 'man shall not see me and *live*'; Gn 5<sup>3</sup> etc. 'Adam lived an hundred and thirty years'; of 'continuing in life' when death threatens, c.g. Gn 207 'he shall pray for thee, and thou shall *live*'; or specially of the soul as source of life, as in Gn 12<sup>13</sup> 'that my soul may *live* because of thee.' It is also used with preps. = 'to live upon or by,' as Gn 27<sup>40</sup> 'ly thy sword shalt thou live,' Dt 8<sup>3</sup> 'man doth not live by bread only, but by everything that proceedeth out of the mouth of the Lord doth man live.' So the life of man is spoken of as consisting in obedience to the divine statutes (as in Ezk 20<sup>11</sup> etc. 'if a man do, he shall live in (by) them'). To live is used absolutely in the sense of 'to prosper,' as in 1S 10<sup>24</sup> 'Let the king live' (RVm). 'to prosper,' as in 1 S 10<sup>24</sup>' Let the king live' (RVm). It also has the signification of returning to life from sickness, weariness, or death, as 2 K 8<sup>3</sup> 'shall I recover of this sickness?' Jg 15<sup>19</sup> 'his spirit came again, and he revived'; Is 26<sup>19</sup> 'Thy dead shall *live*.' In its causative forms it signifies 'to give life,' to preserve alive,' 'to quicken,' to restore,' as Job 33<sup>4</sup> 'the breath of the Almighty giveth me life'; Ezk 13<sup>16</sup> 'will ye save souls alive?' Is 38<sup>16</sup> 'make me to live'; 2 K 8<sup>1</sup> etc. 'whose son he had restored to life.' restored to life.

The adjective 'o 'living' is used of God as the source of all life, as Jos  $3^{10}$  'the living God is anong you'; and most commonly in the formula of the oath 'as the Lord liveth,' e.g. Ru  $3^{13}$ . It is the ordinary word for 'living' of men or animals. The word for 'life' most generally is a plural emphatic form ( $2^{m}$ ) from the same root. This is used to denote not only physical life, but also welfare or happiness, as Pr 16<sup>16</sup> ' in the light of the king's countenance is life'; Dt  $30^{20}$  ' to love the Lord thy God . . for he is thy life and the length of thy days'; Ps  $30^{5}$  ' in his favour is life.' Once (in late Hebrew) it is used of *eternal life*, viz. Dn  $12^{9}$  'many shall awake, some to everlasting life' ( $2^{5}$ y' ''). It bears also the signification of means of life, sustenance, as in Pr  $27^{27}$  'maintenmeans of life, sustenance, as in Pr 2727 ' maintenmeans of the, sustenance, as in  $Fr 2/3^{-1}$  mainten-ance for thy maidens,' though the general word in this latter sense is  $n_1 n_2$ . There is also the form  $n_2 n$ , which denotes 'a living being,' 'an animal,' and more particularly 'wild animals,' but it is used occasionally in later poetical writings in the sense of 'life,' as Ps 1433 'he hath smitten my life down to the ground'; Job 3318 'he keepeth back his life

from perishing.' It is noteworthy that the Hebrew name for 'Eve' (757) is traced in Gn 3<sup>20</sup> to this root, though it has been otherwise interpreted (see EvE). A very important word is #71, *lit.* 'breath,' sig-

nifying the soul as the principle of life. We find it in its literal sense in such passages as Job 41<sup>13</sup> [Eng.<sup>21</sup>] 'his breath kindleth coals,' and Is 3<sup>20</sup>. As life, its seat was supposed to be in the blood, cf. Lv 17<sup>11</sup> 'For the *life* of the flesh is in the blood.' It is a general term for life in many senses, as 1 K 2<sup>23</sup> 'at the peril of his life'; Pr 10<sup>3</sup> one's life 'hungers.' A special combination is אָשָׁ 'living creatures,' as in Gn l<sup>34</sup> etc.; so it is used by synec-doche for a 'man,' as Lv 5<sup>1</sup> etc. 'if any man sin'; Gn 46<sup>18</sup> 'even sixteen souls, *i.e.* persons' (cf. corresponding Eng. usage), and even for the emphatic sponding Eng. usage), and even for the emphatic personal pronoun, as Is  $46^2$  'themselves are gone into captivity'; Ps  $11^1$  'why say ye to me?' Curiously it is sometimes = 'a dead body,' cf. Nu 5<sup>2</sup>.  $57^2$  'the heart' is orcasionally used as =  $57^2$ , see Ps  $102^4$ , Jer 4<sup>18</sup>. See, further, art. SOUL.

1024, Jer 4<sup>18</sup>. See, further, art. SOUL. In the LXX the usual equivalent of  $\Box = \eta$  is  $j \omega \eta$ , though once (Pr 311<sup>12</sup>)  $\beta los$  is used, and the latter frequently has the signification of the period or course of life in the NT, e.g. Lk 8<sup>14</sup> 'pleasures of this life'; as also of resources, as Mk 12<sup>14</sup> 'even all her living.' The special NT ideas covered by  $j \omega \eta$ are discussed below. For i j j and also 2j,  $\psi v \chi \eta$  is the equivalent; and this word also plays an important part in the language of the NT, as also does its derived adi,  $\psi v v k \delta t$ . derived adj. ψυχικόs.

(2) The most ordinary Hebrew verb signifying 'to die' is no, and this is used in the most general sense of man, beast, and even of trees and land. Cf. Job 14<sup>8</sup> 'the stock thereof die in the ground,' and Gn 4719 ' wherefore should we die, both we and our land?' From this is derived the word mo 'death,' sometimes personified, as in Ps 4914' Death shall be their shepherd'; cf. Is 38<sup>18</sup>. It is used as = the *abode of the dead*, as in Ps 9<sup>13</sup> 'the gates of death,' and Pr 7<sup>21</sup> 'the chambers of death' (though these might be understood in the former sense as a person). There is the derived form man, only found in the phrase "ary, as Ps 7911 'the sons of death '= 'those that are appointed to death ' (EV). (For Sheol and Abaddon, see arts. on these words, and also ESCHATOLOGY OF THE OT in vol. i. p. 740). For death in the special aspect of a destructive plague on men, as  $Ex 5^3$  (lest he fall upon us with pestilence,' or on cattle Ex 9<sup>3</sup>, there is the word רָבָר (LXX θάνατοs).

The most general word in the LXX as equivalent to the Hebrew terms above noted is  $\theta dratos$ . the NT it is used in the same signification, and is

also found personified, as in 1 Co 15<sup>55</sup> 'O death, where is thy victory ?' Kev 1<sup>15</sup> 'I have the keys of death and of Hades.' It is frequently used of spiritual death, either during earthly life, as in Ko 7<sup>15</sup> 'Did then that which is good become death unto me?' 1 Jn 3<sup>14</sup> 'He that loveth not abideth in death,' or in the world to come, as specially 'the second death' ( $\delta \delta \epsilon \circ repos \ \delta d var os$ ), as Kev 2<sup>11</sup> 'he shall not be hurt of the second death.'

For #575 see art. HADES, sub voc., and also ESCHATOLOGY OF THE NT in vol. i. p. 752. ii. EXAMINATION OF THE BIBLICAL TEACHING ON

ii. EXAMINATION OF THE BIBLICAL TEACHING ON THESE IDEAS.—A. OLD TESTAMENT TEACHING.— (1) In the Early Narratives of Genesis.—At the very opening of Scripture, in both accounts of the Creation, we find definite teaching on life and death. God created every living creature. Gn 1.º 'And God said, Let the waters bring forth abundantly the moving creature that hath life.' Again we read in Gn 1<sup>20</sup> of 'every beast of the earth, and every fowl of the air, and everything that creepeth upon the earth, wherein there is life.' The second account is more definite in its teaching as to the creation of man; thus Gn 2' describes how 'the LORD God formed man of the dust of the ground, and breathed into his nostrils the breath of life; and man became a living soul.' Next we read of the 'tree of life,' which is common to the traditions of other Semitic peoples, and of the punishment attached to the eating of the 'tree of the knowledge of good and evil'; Gn 2<sup>17</sup> 'in the day that thou eatest thereof, thou shalt surely die.' The literal and metaphorical senses of the word 'die' constitute the force and subtlety of the serpent's temptation in Gn 3' 'Ye shall not surely die.' The prevent man gaining the gift of immortality he is driven out of the garden, and the tree of life yuarded, Gn 3<sup>20-24</sup>.

(2) In the Pentateuch.—The ordinary word for 'life' is  $\forall z;$  (LXX  $\psi v \chi \eta$ ), as in Gn 9<sup>4</sup> 'but flesh with the life ( $\forall z \eta$ ) thereof, which is the blood thereof, shall ye not eat.' This recurs repeatedly throughout the whole of the legal writings, and the narrative that is coloured by the priestly tradition (see, *e.g.*, Lv 17<sup>11</sup> 24<sup>18</sup>, Dt 12<sup>29</sup>). Life is used in the familiar absolute sense in Dt 30<sup>184</sup>. 'See, I have set before you this day life and good, and death affd evil' (cf. Sir 15<sup>17</sup>).

(3) In the Prophets.—The main prophetic teaching on this subject is found in Isaiah and Ezekiel. In a poetical (probably late) passage of the former, we read, Is  $25^{\circ}$  'He hath swallowed up death for ever' (cf. 2 Ti 1<sup>10</sup>), and in Is  $26^{10}$  'Thy dead shall live, thy dead bodies shall arise . . . and the earth shall cast forth the dead (lit. the Rephaim, i.e. shades).' In another poetic passage, the psalm of Hezekiah, recorded in Is  $38^{10-20}$ , there is much important material, but it is probably late, and should be classed with the teaching of the poetic books (see below). The passage speaks of 'the gates of Sheol' (v.<sup>10</sup>). Death is presented as the end of all communion with God and men, 'I shall not see the Lord, even the Lord, in the land of the living: I shall behold man no more with the inhabitants of the world' (v.<sup>11</sup>). But God speaks to him, and he cries, 'O Lord, by these things men live, and wholly therein is the life of my spirit.' And again, 'Sheol cannot praise thee, death cannot celebrate thee: they that go down into the pit cannot hope for thy truth. The living, the living he shall praise thee as I do this day' (vv.<sup>18. 19</sup>). In the teaching of Ezekiel there is frequent

In the teaching of Ezekiel there is frequent reference to life in the pregnant sense of enjoying God's favour, and the accompanying earthly prosperity that is its sign. Thus Ezk  $33^{10-27}$ , the teaching of which is summarized in vv.<sup>18</sup>.<sup>19</sup> as follows: 'When the righteous turneth from his righteousness, and committeth iniquity, he shall

even die therein. But if the wicked turn from his wickedness and do that which is lawful and right, he shall live thereby' (cf.  $3^{15-20} 18^{24-27} 20^{11}$ ). In the prophetic portion of the Bk. of Daniel there is one reference, though probably of very late date, to 'eternal life' in  $12^4$  'many of them that sleep in the dust of the earth shall awake, some to everlasting life.'

(4) In the Poetical Books.—References are much more numerous in the Psalms and in Job. Thus in various passages of the Bk. of Job we have presented the popular conception of the existence of the dead, e.g.  $3^{1_2-19}$ , where the 'wicked cease from troubling, and the weary be at rest,' where 'the prisoners are at ease together, and the servant is free from his master'; or  $10^{20-21}$ , where that world is described as being 'of the shadow of death, without any order, and where the light is as darkness'; yet the writer rises to the vision of something much higher and brighter, as in  $14^{19-19}$ , where he asks, 'If a man die, shall he live again ? All the days of my appointed time would I wait till my release should come.' Cf.  $33^{36}$  'He hath redeemed my soul from going into the pit, and my life shall behold the light.' His 'blood' is used for his wrongful death (see legal idea of identity of the blood and the life, below) in  $16^{16}$  O earth, cover not thou my blood, and let my cry have no restingplace' (cf. Gn  $4^{10}$ , Ezk  $24^{7\cdot8}$ , Is  $26^{21}$ ). As to the great passage  $19^{25\cdot27}$ , and in what sense it denotes personal immortality, see A. B. Davidson's commentary on Job, in loce, and Appendix. In the Psalms we read of 'the path of life' in an

In the Psalms we read of 'the path of life' in an ethical and spiritual sense as the way of obedience to God (cf. Ps  $16^{11}$ ); of God as the 'fountain of life,' Ps  $36^9$  (cf. Jer  $2^{13}$ ); Ps  $30^5$  'in his favour'; Ps  $21^4$  'he asked life of thee, and thou gavest it him'; Ps  $27^3$  'the Lord is the strength of my life'; Ps  $34^{12}$  'What man is he that desireth life, and loveth many days, that he may see good?'  $42^6$  'the God of my life';  $66^9$  'God . . . which holdeth our soul in life,'

Death has all the gloom and disappointment it had in Job, e.g. Ps 6<sup>5</sup> 'In death there is no remembrance of thee: in Sheol who shall give thee thanks?' In 49<sup>14</sup> death is personified. (5) In the Wisdom 'Literature.—(a) In the Bk.

(5) In the Wisdom 'Literature.—(a) In the Bk. of Proverbs the same poetic figures of life frequently occur, e.g. 'the paths of life,'  $2^{19} 5^6$ ; 'tree of life,'  $3^{16} 11^{30} 13^{12}$ ; 'well or fountain of life,'  $10^{11}$  $13^{14} 14^{37}$ . In the absolute sense the word occurs, e.g.  $3^{32}$  'so shall they be life unto thy soul';  $8^{36}$ 'whoso findeth me findeth life.' Contrast the use of 'death' in  $8^{36}$  'all they that hate me love death.'

By a figure 'light and darkness' are used for 'life and death' in Ec  $11^{7.8}$ .

B. TEACHING OF THE APOCRYPHA AND THE APOCALYPTIC LITBRATURE.—These words occur most frequently and with most special significance in the two books of the Wisdom Literature in the Apocrypha, viz. those of Wisdom and Sirack. In the former  $j\omega \eta$  occurs in several interesting connexions, cf. Wis 1<sup>13</sup> 'Court not death in the error of your life' (cf. Pr 8<sup>36</sup> and 21<sup>6</sup>); 13<sup>16</sup> 'for life he beseechet that which is dead,' where reference is made to idolatry; cf. also 14<sup>12</sup> 'the invention of them (i.e. idols) was the corruption of life'; 16<sup>13</sup> 'for thou hast authority over life and death, and thou leadest down to the gates of Hades, and leadest up again.'

In the Book of Sirach  $f\omega \eta$  occasionally means sustenance, e.g. 4<sup>1</sup> 'My son, deprive not the poor of his living, '34<sup>21</sup> 'The bread of the needy is the life of the poor.' The general use is that of the figurative and absolute sense we have found in Pr and elsewhere, e.g. 4<sup>13</sup> 'He that loveth her (*i.e.* Wisdom) loveth life, 'cf. Pr 3<sup>18</sup>: 6<sup>16</sup> 'a faithful friend

115

is a medicine of life,'  $15^{17}$  'before men is life and death' (cf. Dt  $30^{19}$ ). For the special phrase  $\pi\eta\gamma\eta$  $\zeta\omega\eta$ s, see  $21^{13}$  'The knowledge of a wise man shall be made to abound as a flood, and his counsel as a fountain of life' (cf. Pr  $13^{14}$  and  $14^{27}$ ). An instructive contrast is found in  $40^{29}$  'A man that looketh unto the table of another, his life is not to be counted for a life.'  $\psi\chi\chi\eta$  has also one or two usages that may be noted here. It is, of course, ordinarily translated soul in the general sense of that word, as in Wis  $3^{14}$  the souls of the righteous are in the hand of God,' but frequently comes near to its NT significance, e.g. Wis  $91^{16}$  'a corruptible body weigheth down the soul' (cf.  $2 \text{ Co } 5^{1-4}$ ), cf.  $15^{5}$ 'when he is required to render back the soul (life) which was lent him.' Two verses bring the several ignorant of him that inspired into him an active soul ( $\psi\chi\chi\eta$ ), and breathed into him a vital spirit ( $\pi\pi\epsilon\tilde{\nu}\mu\alpha$   $\zeta\omega\eta\kappa\delta\rho$ ). But he accounted our very life ( $\zeta\omega\eta$ ) to be a plaything, and our lifetime ( $\beta\delta\sigma$ ) a gainful fair'; cf. also  $16^{14}$ .

In Sirach we may note two passages :  $10^{20}$  'Who will justify him that sinneth against his own soul  $(\psi_{0\chi}\eta)$ ? and who will glorify him that dishonoureth his own life  $(\zeta_{0\pi}\eta)$ ?' and  $16^{20}$  'the soul of every living thing'  $(\psi_{0\chi}\eta_{P} \pi_{arros} ; \zeta_{0\phi}\sigma)$ . In 2 Esdras, ch. 7, there is a very important

In 2 Esdras, ch. 7, there is a very important passage, mainly contained in the portion recovered by Bensly, a translation of which is to be found in the RV. It is a vision of the last judgment, which is to be preceded by seven days of such silence as was before the Creation; then follows the general resurrection, and the seating of the Most High in majesty as judge. The seer understands how few can stand in the judgment, and exclaims, 'An evil heart hath grown up in us, which hath led us astray from these statutes, and hath brought us into corruption and into the ways of death, hath showed us the paths of perdition, and removed us far from life; and that not a few only, but well-nigh all that have been created' (7<sup>145</sup>). Thereafter follows a vision of the various stages through which the wicked and the righteous pass after death. The day of judgment is declared to be 'the end of this time and the beginning of immortality' (though *et initium* is omitted in the Lat. MS) (7<sup>49</sup> <sup>(113)</sup>). Again, in the 8th chapter the Most High declares to the seer, 'Unto you is paradise opened, the tree of life is planted, the time to come is prepared ... weakness is done away for you, and [death] is hidden; hell and corruption are fled into forgetfulness ... and in the end is showed the treasure of immortality' (8<sup>26, 23</sup>).

In the Psalms of Solomon a few passages deal with the resurrection, e.g. 3<sup>16</sup> 'They that fear the Lord shall rise again to life everlasting. And their life shall be in the light of the Lord, and shall fail no nore'; 13<sup>10</sup> 'The life of the righteous is for ever, but sinners shall be taken away for destruction'; 14<sup>2.6</sup> 'The holy of the Lord shall live in him for ever; the paradise of the Lord, the trees of life, are his holy ones. The holy of the Lord shall inherit life in gladness.' For sinners the lot is also appointed in accordance with their deeds; thus 3<sup>13</sup> 'He fell, because evil was his fall, and he shall, not rise again ; the destruction of the sinner is for everlasting'; and 15<sup>13-16</sup> 'Sinners shall perish in the day of the Lord's judgment for ever, when God shall visit the earth in His judgment, to repay sinners for everlasting.' In the Book of Enoch (chs. 38-44) occurs a pas-

In the Book of Enoch (chs. 38-44) occurs a passage resembling the one quoted above from 2*Esdras*, in which are seen in vision the celestial abodes prepared for the righteous, where they bless and magnify the Lord for ever and ever. Similar passages on the judgment are found in chs. 51. 61. 92. 103. and 108, from which we learn that the resurrection of the body pertains only to the righteous.

In the Apocalypse of Baruch we have the universal resurrection foretold, and the punishment of the wicked, as, e.g., in ch. 30 'And the secret places shall be opened wherein have been kept the souls of the rightcous, and they shall come forth . . . but the souls of sinners shall languish the more, for they know that their punishment has come.'

C. NT TEACHING.—(1) The Synoptics.—In the first three Gospels these words are used with considerable fulness and variety of meaning. We have 'life'( $\langle \omega \eta \rangle$ ) used absolutely as an equivalent for salvation in its fullest sense, as in Mt 7<sup>14</sup> 'For narrow is the gate and straitened the way that leadeth unto life, and few be they that find it'; and in the repeated phrase 'to enter into life,' Mt 18<sup>8</sup> etc., Mk 9<sup>es</sup> etc.; once (Lk 16<sup>20</sup>) the word is used of 'lifetime on earth.' 'Eternal life' ( $\langle \omega \eta \rangle$  $a(\omega \nu \sigma)$  occurs a few times, cf. Mt 19<sup>16. 39</sup>, Mk 10<sup>30</sup>,  $a(\omega \nu \sigma)$  occurs a few times, cf. Mt 19<sup>16. 39</sup>, Mk 10<sup>30</sup>  $a(\omega \nu \sigma)$  occurs a few times, cf. Mt 19<sup>16. 39</sup>, Mk 10<sup>30</sup>  $a(\omega \nu \sigma)$  occurs a few times, cf. Mt 19<sup>16. 39</sup>, Mk 10<sup>30</sup>  $a(\omega \nu \sigma)$  occurs a few times, for your life.' Yet these are separable, and are commonly spoken of as 'body' and 'soul.' Thus Mt 10<sup>20</sup> 'Be not afraid of them which kill the body, but are not able to kill the soul; but rather fear him which is able to destroy both soul and body in Gehenna.' This double sense of the word, as denoting the higher and lower life,—that inherent in the earthly body, and that which remains when the union is broken, —lends itself to what may be almost called a play upon the word, as in the recurring thought, e.g. Mt 10<sup>30</sup> 'He'that findeth his life shall lose it; and he that loseth his life for my sake shall find it,' cf. Mt 16<sup>30</sup> and the parallels. In the same sense is life used in such passages as 'rest unto your lives' (EV 'souls'), Mt 11<sup>30</sup>; 'In your patience ye shall gain possession of your lives' (EV 'souls ), Lk 21<sup>30</sup>. In one case  $\langle \omega \eta$  is used with a similar meaning, viz. Lk 12<sup>10</sup> 'a man's life consisteth not in the abundance of the things which he possesseth.'  $\psi \nu \chi \eta$  is also used of our Lord's offering of Himself, as in Mk 10<sup>40</sup> 'to give his life a ransoun for many.'

ranson for many.'  $\beta$  for is used of 'living' in the sense of maintenance, and only occurs once outside of Luke, and that in a parallel passage quoting our Lord's own words, viz. 'all her living,' Mk 12<sup>44</sup>, cf. Lk 21<sup>4</sup>. See also Lk 15<sup>12, 20</sup> and 8<sup>43</sup>. In one case it denotes the earthly existence, viz. Lk 8<sup>14</sup> 'cares and riches and pleasures of this life.'  $\theta$  are or in the Synoptics denotes death as the termination of this earthly life, as Mt 16<sup>20</sup> 'shall not taste of death,' Mk 10<sup>20</sup> 'condemn him to death,' Lk 22<sup>20</sup> 'I am ready to go to death,' etc.

(2) The Johrnnine Writings.—(a) The Gospel.— The idea of life  $(\zeta \omega \eta)$  is a favourite one with the writer of the Fourth Gospel, and has a special significance. 'Life' in the absolute sense (with or without the epithet 'eternal') in which he uses it is the special possession of God, of which He makes men sharers when they believe in Him through His Son. Thus Jn 14 'In him was life, and the life was the light of. men'; 3<sup>16</sup> 'that whosoever believeth may in him have eternal life'; 3<sup>36</sup> 'he that believeth not the Son shall not see life'; 5<sup>36</sup> 'as the Father hath life in himself, even so gave he to the Son also to have life in himself'; 17<sup>3</sup> 'This is life eternal, that they should know thee the only true God, and him whom thou didst send, even Jesus Christ'; 10<sup>10</sup> 'I came that they may have life, 'etc. Specially noteworthy are the phrases Christ uses to describe Himself and His mission. 'The bread of life,' 6<sup>36</sup>; 'the words that I have spoken unto you are spirit and are life,' 6<sup>66</sup>; 'he

Digitized by Google

 $\psi_{027}$  is used in similar senses as above noted, but of special value is the form of our Lord's word in 12<sup>26</sup> 'He that loveth his life loseth it; and he that hateth his life in this world shall keep it unto life eternal.'

Outage of the second s

(b) The First Epistle.—The special signification of  $\beta \omega \eta$  and  $\theta d \sigma a \tau os$  that we have noted in the Gospel recurs in the first Epistle, and receives new applications. Thus 1 Jn 1<sup>1,2</sup> 'That which was from the beginning, that which we have heard . . . concerning the Word of life (and the life was manifested . . . and we declare unto you the life, the eternal life, which was with the Father)'; 'we know that we have passed out of death into life,' 3<sup>14</sup>; 'God gave unto us eternal life, and this life is in his Son,' 5<sup>11</sup>. Special note must be taken of the verses (5<sup>16, 17</sup>) that deal with 'sin unto death' (duapria mpos desarow), probably 'tending towards' death (see Westcott's Commentary, *in loco*, and Add. Note, p. 209). (c) The Apocalypse.—This mystical book has

(c) The Apocalypse.—This mystical book has many references to life, particularly in figurative phrases, such as 'the tree of life,' 2' 22' (in which return is made to the imagery of the early traditions of Genesis, cf. Ezk 47<sup>13</sup>); 'the crown of life,' 2<sup>10</sup>; 'the book of life,' 3<sup>5</sup> 13<sup>6</sup>; 'waters of life,' 7<sup>17</sup> 21<sup>6</sup> 22<sup>17</sup>.  $\psi_{02'7}$  is used of the life separated from the body, hence rendered 'souls' in our version in 6<sup>7</sup> and 20<sup>4</sup>. Very Hebraic are its uses in 8<sup>9</sup> and 16<sup>3</sup>, being an obvious imitation of the language of Gn 1 (ng 22). A striking use is that in 18<sup>13</sup>, where  $\psi_{02'}$  is dropowrow are reckoned among the merchandize of the traders, probably meaning slaves (cf. Ezk 27<sup>13</sup>; also Nu 31<sup>26, 40, 46</sup> [Heb]). (3) The Epistles of St. Paul.—In addition to uses

(3) The Epistles of St. Paul. —In addition to uses of  $\psi v \chi \dot{\eta}$  similar to those already given, the following are noteworthy: 'doing the will of God  $\epsilon \kappa$  $\psi v \chi \eta s$  ('from the heart,' EV),' Eph 6<sup>6</sup>; obviously it means 'putting all the power of one's life into it'; cf. Col 3<sup>28</sup>. The threefold partition of human nature is given in 1 Th 5<sup>28</sup> 'may your spirit and soul and body be preserved entire.'

St. Paul's use of  $j\omega\eta$  in the absolute sense is very much akin to St. John's. The phrase 'eternal life' is common, cf. Ro 27 5<sup>21</sup> 6<sup>23</sup>, Gal 6<sup>3</sup>, 1 Ti 1<sup>16</sup> etc. Illustrations of the use of  $j\omega\eta$  as fully expressing the highest possible life are found in Ro 5<sup>17</sup> (they ... reign in life through the one, even Jesus Christ'; Ro 6<sup>4</sup> 'we also might walk in newness of life'; Ro 7<sup>16</sup> (the commandment which was unto life'; Ro 7<sup>16</sup> (the Spirit is life because of righteousness'; 2 Co 2<sup>16</sup> 'a savour from life unto life'; 2 Co 4<sup>16</sup> (that the life also of Jesus may be manifested in our body'; 2 Co 5<sup>6</sup> 'swallowed up of life.' In the same way he frequently uses the verb  $j\eta$ , e.g. 2 Co 6<sup>9</sup> 'as dying, and, behold, we live'; Ph 1<sup>21</sup> 'to me to live is Christ'; 1 Th 3<sup>8</sup> 'for now we live if ye stand fast in the Lord.' The Heb. form 75 be, in its LXX equivalent,  $\thetac\delta$  $j\omega$ , is frequent, not only in direct quotations, but in St. Paul's own writing, e.g. Ro 9<sup>26</sup> (from LXX), 2 Co 3<sup>2</sup> 6<sup>16</sup>, 1 Th 1<sup>9</sup>, 1 Ti 3<sup>15</sup> 4<sup>19</sup>.

In the case of the word  $\theta d_{Parros}$ , while frequently used in its common signification, as, e.g., Ro 8<sup>38</sup>, 1 Co 15<sup>21</sup>, Ph 2<sup>43</sup> etc., it bears in the Pauline writings very deep and wide-reaching meanings. Sometimes it is personified (as in the OT), e.g. Ro 5<sup>14</sup> 'Death reigned from Adam until Morese'; 1 Co 15<sup>25</sup> 'the last enemy that shall be abolished is death.' It is frequently used in a figurative sense to

describe the putting away of sin, as in Ro 6<sup>4-9</sup>, where we read of being 'baptized into Christ's death,' of 'him that hath died' being 'justified from sin,' and so on; or, on the contrary, Ro 7<sup>10</sup> speaks of the commandment being 'found unto death,' for 'sin, finding occasion through it, slew' Paul. The sinful flesh is called 'this body of death' (Ro 7<sup>30</sup>). 'The mind of the flesh is death; but the mind of the Spirit is life' (Ro 8<sup>6</sup>). 'Death' in its figurative sense is further illustrated in 2 Co 1<sup>9. 10</sup> 'we ourselves have had the answer of death within ourselves... God who delivered us out of so great a death.' The messengers of the Cross are 'in them that are perishing a savour from death unto death' (2<sup>124</sup>). The law is 'the ministration of death' (2 Co 3<sup>7</sup>, cf. 7<sup>10</sup>). Death as a dissolution is spoken of as a present power in 2 Co 4<sup>11.13</sup> 'we which live are alway delivered unto death for Jesus' sake... so then death worketh in us, but life in you.'

life in you.' In 2 Ti 1<sup>10</sup> we read of Christ 'who abolished death, and brought life and incorruption to light through the gospel.'

(4) The Rest of the NT. - In He 7<sup>16</sup> we read of 'the power of an endless life ( $\zeta \omega \hat{\eta}$ :  $d\kappa a\tau a\lambda (\tau rov =$ indissoluble).' In Ja 1<sup>13</sup> we have the figure of the 'crown of life.' In 1 P 3' we read of 'the grace of life,' and in 2 P 1<sup>3</sup> of 'all things that pertain unto life,' obviously in the absolute sense. In Jude<sup>21</sup> there is the striking phrase 'looking unto the mercy of our Lord Jesus Christ unto eternal life.' In 1 P  $\psi v \eta$  is of frequent occurrence in Hebraic senses, and might sometimes be rendered 'life,' as in 4<sup>19</sup> 'commit their souls in welldoing unto a faithful Creator'; cf. He 10<sup>20</sup> 12<sup>2</sup> 13<sup>17</sup>.

The most important passages on 'death' are in He 20.14.19, which tells of 'Jesus, because of the suffering of death, crowned with glory and honour; that by the grace of God he should taste death for every man . . . that through death he might bring to nought him that had the power of death, and might deliver all them who through fear of death were all their lifetime subject to bondage'; and He 9<sup>15.16</sup>. See also Ja 1<sup>15</sup> 'Sin, when it is fullgrown, bringeth forth death'; and 1 P 3<sup>18</sup> of Christ 'being put to death in the flesh, but quickened in the Spirit.'

being put to deach in the biodity of quinchest in the Spirit.' iii. CONCLUSIONS TO BE DRAWN FROM SCRIP-TURAL USE OF THESE WORDS.—(a) Doctrial.— God is in Himself the source of all life, physical, moral, and spiritual. He has not only called it into being, but sustains it. Life is God's gift, and can have no other origin. It is therefore a direct offence against God to destroy even physical life. This sentient life is, in the OT, represented as inhering in, and inseparable from, the blood of the animal. Hence blood becomes sacred. It is a symbol of the mystery of life with which it is identified. Blood thus becomes the most sacred and solemn sacrificial offering.

Sin is rebellion against God, and so involves separation from Him, which culminates in death. Thus death is the final punishment of sin. By death, then, can it alone be destroyed. Therefore sacrifice was necessary; and in the sacrifice the victim and offerer become identified, so that the latter's sin is cleansed through the acceptance of the offered life of the victim. Not only so, but this sacrifice must be continual, in order to maintain the fellowship that is being daily broken. Life is possible only through sacrifice. Yet 'death is common to the race.' What then ! Death in the OT means a land of gloom and shadow, where intercourse with God is impossible. The inhabitants of that realm can neither pray nor praise. Their life is joyless and colourless. That this could not be the end for all gradually became clear, so there arose a ductrine of a double meaning both in 'life' and

'death.' True life meant conscious and purposed fellowship with God; true death was not the dissolution of lody and soul, but the separation of sin persisted in. Thus we find Job and the Psalmists rising to the conception of escape from Hades, and to the assurance of an endless life in God's presence. The way to ensure this is to walk in God's statutes, and love and honour Him with all one's heart. He will vindicate His chosen against all enemies.

Thus, through the more definite teaching on immortality of later Judaism, was paved the way for the doctrine of the New Testament. Our Lord did not have to explain the meaning of 'eternal life' and its opposite, but to show how they were respectively to be avoided and won. Fellowship is once more the prominent and central idea. All words point to it. To 'know,' to 'love,' to 'eat,' to 'drink,' to 'keep words and commandments,' to 'have'—these constitute the language of the eternal life. The intimacy of union with God through Christ becomes its one essential condition; and, on the contrary, the lack of that union entails eternal death.

In the teaching of St. Paul we find that the lower life is purified and transformed into the higher. All that is sonsual, sinful, earthly, dies, and only the spiritual elements remain. But life is one and undivided, so that even the body has its spiritual protoplasm (so to say), like the germ within the seed, which develops into the spiritual body, and so gives reality to the resurrection. It is the resurrection that crowns the work of faith, 'if in this life only we have hoped in Christ, we are of all men most pitiable.' It is no unreal, shadowy, or partial life that lies beyond the grave, but life in all its fulness and perfection—' the life that is life indeed.'

The NT is consistent in presenting Christ as the sole mediator of life. His life inheres in God, and the life He is enabled to communicate to men inheres in Him. Even the life of the physical universe is possible only in Him—'all things have been created through him and unto him '(Col 1<sup>15-18</sup>, 1 Co 8<sup>6</sup>). In St. Paul and in St. John we find the fullest presentation of these teachings, but all agree in the primary conceptions. St. John's teaching on the eternal life is very full and varied, and is thus admirably summed up by Dr. Westcott: 'It is a life which, with all its fulness and all its potencies, is now: a life which extends beyond the limits of the individual, and preserves, completes, crowns individuality by placing the part in connexion with the whole: a life which satisfies while it quickens aspiration . . . a life which gives unity to the constituent parts and to the complex whole, which brings together heaven and earth, which offers the sum of existence in one thought (Comm. on Epp. of John, pp. 217, 218). (b) Ethical.—Because life is God's unique gift,

(b) Ethical.—Because life is God's unique gift, it is held to be sacred. Hence all crimes against life, that lessen its value by maining the body's physical powers or purity, by rendering life burdensome through oppression, or still more by destroying it altogether in the act of murder, are reckoned as amongst the most heinous. The sacredness of life in all these forms is safeguarded in the commandments of the Decalogue, and in the various elaborate provisions of the Jewish legislation. The ethical value of life is distinctly felt by all the prophets, so that their most severe denunciations are levelled against those who oppress or debauch the poor, and by acts of injustice render life hard and bitter.<sup>4</sup> In this same thought the OT finds its strongest be destroyed, therefore God will either save His servants from Sheol altogether, or will rescue them eventually from its thraldom. God is interested that men shall live and not die ;—this makes the

great basis of Ezekiel's appeal. One of the greatest lessons of the Book of Jonah is to enforce the value of life in the eyes of God. He had pity on the great city of Nineveh because it had within it 'sixscore thousand persons . . . and also much cattle.' Life, even that of animals, is precious in His eyes, and all that is possible must be done to save it.

Life must be guided by moral precepts, and these are clearly set forth as the condition of a long and honoured career, e.g. Ps 15, which states the characteristics of the man 'that shall never be moved '; Ps 16, which contains the assurance of fellowship with God, continued after Sheol has been passed through ; Ps 91<sup>14-16</sup> 119, Pr passim, but specially 82\*-38 1016-22 198.16.30\*-32.

When we turn to the NT we find these ideas much more clearly emphasized and enforced by additional considerations. Jesus in His teaching re-sets the moral law, and renders it more stringent by His interpretation. Murder is no longer confined to an outward act, but is an attitude of the soul ; lust is in thought as well as in deed. And these standards are to be the guide of the new life He bestows. A man can live only by obeying these statutes in their spirit. To be an inheritor of the kingdom of God one need only keep the first and second commandments,-love God and love one's neighbour; but their interpretation and outreach is very wide; they are not to be understood in the letter but in the spirit. If His conditions are in the letter but in the spirit. If the common inter-understood, then His command gives the promise, 'This do, and thou shalt live' (Lk 10<sup>28</sup>). 'Eternal life' is not only the gift of God, but the condition of maintaining it is to be in constant communion with God. 'He that eateth me, he also shall live because of me,' are Christ's mystical words in Jn 6<sup>37</sup>. And again, in Jn 10<sup>10</sup> we read, 'I came that they may have life, and may have it abundantly (*sai*  $\pi e \mu \sigma \sigma \sigma \nu \ \epsilon \chi \omega \sigma \nu$ ).' This links our Lord's teaching closely with that of St. Paul, who is very clear on the ethical side of the doctrine of the divine life. Thus in Ro  $5^{10}$  he argues that 'if we were reconciled to God through the death of his son, much chied to God through the death of his son, much more, being reconciled, shall we be saved by his life.' From this thought springs the whole con-ception of the new life in Christ, with its powers, privileges, and responsibilities. It is not the man hinself who lives, but Christ who lives in him. The controlling force is Christ. 'To me to live is Christ' court the apartie. A new code of othing! Christ,' says the apostle. A new code of ethical conduct therefore emerges, 'We are debtors, not to the flesh, to live after the flesh; for if ye live after the flesh, we must die; but if by the spirit ye mortify the deeds of the body, ye shall live' (Ro  $8^{12,13}$ ). Hence there is a mortal conflict in the man who is 'alive unto God' between the fleshly law and the spiritual. The tragedy of Calvary is re-enacted in each individual soul, which has both to be crucified with Christ and to rise with Him. The evidence of this new life is in the production of the 'fruits of the Spirit,' of which we have a list, as contrasted with the 'works of the flesh' in Gal 5<sup>19-34</sup>. Thus the great doctrine of the resurrection becomes the central power in daily Christian living, and affords not only the assurance of a life beyond the grave, but renders possible the advance 'holiness,' without which no man can see the in Lord.

#### G. C. MARTIN.

**LIGHT** (Heb. wir, wir, the latter of the sun and moon as the abode of light, Gn 1<sup>14-16</sup>, Gr.  $\phi \hat{\omega} s$ ).\*i. With the Jews, as among other Oriental peoples, there was a feeling of sanctity connected with the idea of light. It was, according to Gn 1<sup>3</sup>, the first thing shaped by God out of chaos, and afterwards located in the sun and moon. In Job 38<sup>19</sup> the original source of light is a mystery known only to God.

only to God. ii. By very natural processes of thought many secondary ideas became attached to the word. (1) In Job 3<sup>30</sup> it is a synonym of life, contrasted in 3<sup>16</sup> with the darkness of the womb, and in 10<sup>23</sup> with the shadow of death. (2) It is associated very frequently with joy and prosperity, as in Est 8<sup>16</sup>, Job 18<sup>4</sup>. <sup>6</sup>, where the light of the wicked is to be put out, whereas in Job 22<sup>26</sup> the light shines on the ways of the righteous. In Is 9<sup>2</sup> the joy of Israel under the government of the 'Prince of Peace' is to be like the shining of a great light in contrast to the preceding misery (cf. 2 S 23<sup>4</sup>). (3) It is used as a symbol of moral excellence, as in Pr 4<sup>16</sup>, where progress in goodness is compared with the dawning 'that shineth more and more unto the perfect day.' This use is very frequent in NT, as in Mt 6<sup>24.22</sup> (Lk 11<sup>34-33</sup>), often with the collateral thought of the influence which the light has upon others, as in Mt 5<sup>14-16</sup> (Lk 8<sup>16</sup> 11<sup>25</sup>); so of Christianity in contrast with the darknese of heathendom, as in Eph 5<sup>4</sup> J, Col 1<sup>12.13</sup>. I P 2<sup>9</sup>. In Ro 13<sup>11.14</sup>, I Th 5<sup>4-3</sup>, in connexion with this thought there is a contrast between the active duty of a soldier's life by day and the debauchery of night. (4) The term is also applied to spiritual knowledge. Thus in Lk 10<sup>8</sup> the 'sons of light' are contrasted with the 'sons of this world 'in point of wisdom. In 2 Co 4<sup>4-4</sup> the glory of Christ's revelation illumining the hearts of Christians is beautifully compared with the light on Mosce' face in Ex 34<sup>29-50</sup>. See also iii. (3) (*a*) below. (5) In a more intellectual sense the word is used of the 'sone of the sone of the sage in Dn 2<sup>22</sup> 5<sup>11.14</sup>.

iii. By far the most important uses of the word are those connected more definitely with theology. That the Hebrews, like other Sen. peoples, originally worshipped the sun and moon may perhaps be considered probable, but cannot be proved from OT. In the earliest historical records they appear, on the contrary, as believing in an intensely personal God, as in Gn 36 8<sup>a</sup>, Ex 4<sup>24</sup>. At the same time the idea of God was frequently associated with light. How far such conceptions of the Deity were the expression of definite theological belief, how far they were merely the language of poetic metaphor, cannot always be determined with anything like certainty. In all probability the one passed into the other by imperceptible gradations, the thought of an earlier becoming gradually the poetry of a later age. (1) In Ex 24<sup>10</sup> the place under God's feet was like 'a paved work of sapphire stone, and as it were the very heaven for clearness.' In Ezk 1<sup>13</sup> the heavenly beings who bear the throne of J" are 'like burning coals of fire,' and in 1<sup>26</sup> 'the appearance of the likeness of the glory of J"' is like 'the bow that is in the cloud in the day of rain.' In Ps 104<sup>s</sup> He is described as at the Creation covering Himself 'with light as with a garment,' and in 1 Ti 6<sup>16</sup> as dwelling 'in light unapproachable.' In Is 60<sup>1-5</sup> the presence of J" when He comes to visit His people is described as a glorious sunrise in contrast to the darkness which covered the earth

as a whole; and in  $60^{19,29}$  His perpetual presence is as a sun which never sets, so that His people have no need of the sun and moon, cf. Rev  $21^{29}$   $22^{9}$ . (2) In other passages God is described as Himself Light. In Is 10<sup>17</sup> He is called the 'light of Israel,' the main thought of the passage being that He who is properly the glory of Israel becomes a consuming fire burning up the ungodly, cf. Hos 6<sup>3</sup> (RVm). In Is 51<sup>4</sup>, on the contrary, God's judgment of Israel, in the sense of His merciful acts of justice, is a beacon light to the Gentiles, cf. 60<sup>s</sup>. In the words 'God is light, and in him is no darkness at all' (1 Jn 1<sup>5</sup>), the intention is to express the 'awful purity' of God, which makes it impossible to have fellowship with God and walk in darkness. (3) In NT the word 'light' is frequently applied to Christ, a usage suggested by such passages as Is  $9^{1.9}$ , as in Lk 2<sup>20</sup>, Jn 1<sup>4, 5, 9</sup> 3<sup>10</sup> 9<sup>5</sup> 12<sup>46</sup>, especially (a) with the idea of imparting light, in the sense of spiritual and moral knowledge, to others, as in Jn 1<sup>9</sup> 3<sup>19-31</sup>. (b) As a source of safety to Himself (Jn 11<sup>9, 10</sup>) and others (8<sup>13</sup> 12<sup>35, 38</sup>), the light making it possible to walk in what would be otherwise darkness, and therefore dangerous. (c) On the analogy of ii. (1) it is associated with spiritual life, as in Jn 1<sup>4</sup> 8<sup>12</sup>; cf. Eph  $5^{14}$  'Awake . . . and Christ shall give thee light.' (d) Although St. John speaks both of the Father (1 Jn 1<sup>9</sup>) and of the Son as Light, there is nothing to show that he himself conceived of Light on the contrary, Jn 1<sup>1, 16</sup> would seen to imply a leaning towards a more anthropomorphic conception of the Divine Persons. But a step in the direction of the Nicene conception of 'Light out of Light' had already been made by the writer of the Wisdom of Solomon, who speaks of wisdom as an  $d\pi a i \gamma a \sigma \mu a$   $\phi \omega \tau \delta s$   $di\delta (\omega)$ ,  $\kappa a i$  elevation  $\tau \sigma \rho \sigma$   $d\kappa \eta \lambda i \delta \omega \tau \omega \tau \tau \hat{\tau}$ ;  $\tau$ .  $\theta c \hat{\omega}$   $e r e \rho \tau c i a s$ , 'An effulgence of everlasting Light, and an unspotted mirror of the energy of God' (Wis 7<sup>20</sup>). The writer of the Ep. to the Heb. boldly applies this thought to Christ, whom he calls the drawyapha  $\tau \eta s$   $\delta \xi \eta s$  rai gaparth  $r \eta s$  inortaces abroû ( $\theta e o \hat{v}$ ), 'the effulgence of (God's) glory, and the impress of his substance' (He 1<sup>3</sup>), and thus introduces the familiar thought of Catholic theology, made all the more natural and easy by the language of St. John. (4) The word was applied also in a less degree to others: as John the Baptist, who lighted up the way to Christ (Jn 17.5  $3^{30}$ ), and St. Paul, who carried out Christ's work among the Gentiles (cf. Lk  $2^{33}$  with Ac  $13^{47}$ ). It is needless, perhaps, to add that the ideas of light derived from the Bible have in all ages been

It is needless, perhaps, to add that the ideas of light derived from the Bible have in all ages been reflected in the prayers and hymns, as well as in the creeds, of Christendom. We have familiar illustrations of them in the collect 'Lighten our darkness,' and the hymn 'Lead, kindly light.'

# F. H. Woods.

LIGHT, LIGHTNESS. — The adj. 'light,' the opposite of 'heavy,' was formerly used as we now use easy. Thus in Lord Berner's Froissart, xxiii., 'who gave light credence to them'; Hall's Works, ii. 94, 'the God of mercy is light of hearing, yet He loves a loud and vehement solicitation, not to make Himselfe inclinable to graunt, but to make us capable to receive blessings.' This passed into the meaning of careless, which we find, for example, in Tindale's Pent. 'Prologe,' p. 12, 'Then marke the grevous fall of Adam and of us all in him, thorow the lightregardinge of the commaundement of god.' From which the step to worthless was short. This is the meaning of the word in AV: Nu 21<sup>6</sup> 'our soul loatheth this light bread' ('bright chip's and up's, LXX  $h \delta i \psi vx h$ 'µŵr προσώχθωσεν έν τψ dorŵ τῷ διακένψ [τούτψ], 'Vulg. 'anima nostra jam nauseat super cibo isto levissimo,' Wyc. 'oure soule now wlatith upon this moost light meet,' Tind. 'oure soules

'that is so litle worth,' RVm 'this vile bread'); Jg 94 'Abimelech hired vain and light persons, which followed him' (crims cryperry; LXX &  $\delta r \delta \rho as$   $\kappa e roots$  $\kappa al \delta \epsilon i \lambda \delta is [A \ \theta a \mu \beta o \mu \mu \ell \sigma o r r ]; Vulg. 'viros in opes et$ vagos,' Wyc. 'nedi men and vagaunt'; Cov. 'menthat were vagabundes and of light condicions';Gen. 'vaine and light fellowes,' so RV); Zeph 3<sup>4</sup>'Her prophets are light and treacherous persons'mind? forsake her not: but give not thyself over to a light woman,' i.e. 'wanton': the Gr. is μσου-μέry, AVm and RV 'hateful,' RVm 'hated': 'light' here is peculiar to AV, earlier VSS having 'hateful,' and is rather a paraphrase than a translation. For its meaning cf. Shaks. Meas. v. i. 280, 'Women are light at midnight.' Shaks. often uses the word in a double sense, as Merch. of Ven. II. vi. 42, 'A light wife doth make a heavy husband.' Lightminded occurs in Sir 19<sup>4</sup> 'He that is hasty to give ard it is light minded' (refere readies. Vulg

to give credit is lightminded ' ( $\kappa o i \phi o r \kappa a \rho \delta i a$ ; Vulg. 'levis corde est,' whence Erasmus, Of the Commune Crede, fol. 32, 'And a certayne wise man of the Hebrues doth name those persones leves corde, lyghte mynded whiche doo easilye and soon geve credence').

The adv. lightly is used in AV with the various meanings of the adj. (1) Quickly or easily: Gn 26<sup>10</sup> 'one of the people might lightly have lien with thy wife' (ego, LXX  $\mu\mu\rho\rho\sigma$ , Gen. 'had almost lien'); Is 9<sup>1</sup> 'at the first he lightly afflicted the land . . . and afterward did more grievously afflict her' ('pa, RV 'he bronght into contempt'); Jer 4<sup>24</sup> 'I beheld the mountains, and, lo, they trembled, and all the hills moved lightly '('pa', 2pa, RV 'moved to and fro,' RVm as AV); MK 9<sup>20</sup> 'for there is no man which shall do a miracle in my name, that can lightly speak evil of me' (raxú, Vulg. 'cito,' Wyc. 'soone,' Tind. 'lightlyge,' RV 'quickly'). Cf. Tind. Expos. p. 61, 'there is none so great an enemy to thee in this world, but thou shalt lightly love him, if thou look well on the love that God The adv. lightly is used in AV with the various love him, if thou look well on the love that God showed thee in Christ'; Rhem. NT on Jn 4<sup>20</sup> 'Afterward the said Schismatikes (which is lightly the end of al Schismes) revolted quite from the Jewes religion, and dedicated their temple in Garizim to lupiter Olympius, as Calvin's supper and his bread and wine is like at length to come to the sacrifice of Ceres and Bacchus'; and Malory, Morte d'Arthur, iii. 336, 'But now goe againe lightly, for thy long tarying putteth me in jeopardie of my life.' (2) Poorly, worthlessly, always with 'esteem,' Dt 32<sup>15</sup>, 1 S 2<sup>50</sup> 18<sup>23</sup>.

Lightness is frivolity, passing into wantonness. er 3º 'And it came to pass, through the lightness Jer 3º of her whoredom, that the land was polluted' of her whoredom, that the iand was polluted ;  $23^{32}$  'that... cause my people to err by their lies, and by their lightness' (RV 'vain boasting'); 2 Co 1<sup>17</sup> 'did I use lightness ? ( $\epsilon \lambda \alpha \phi \rho la$ , RV 'fickle-ness'), cf. Jer 2<sup>6</sup> Cov. 'What unfaithfulnesse founde youre fathers in me, that they wente so farre awaye fro me, fallinge to lightnesse, and being so yawa ?' being so vayne?

The verb to lighten means either (1) to make The verb to lighten means either (1) to make light, unburden, 1 S 6<sup>5</sup> 'peradventure he will lighten his hand from off you'; Jon 1<sup>8</sup>, Ac 27<sup>18.38</sup> spoken of ships; or (2) to give light, enlighten, as Exr 9<sup>8</sup> 'that our God may lighten our eyes'; Ps 13<sup>8</sup> 'lighten mine eyes, lest I sleep the sleep of death,' Bar 1<sup>12</sup> 'And the Lord will give us strength, and lighten our eyes' ( $\phi arise_1$ ). Cf. Is 35<sup>5</sup> Cov. 'Then shal the eyes of the blinde be lightned'; Bunyan, Holy Warre, p. 116, 'Emmanuel also ex-pounded unto them some of those Riddles himself. pounded unto them some of those Riddles himself; but, oh ! how they were lightened !'

# LIGHTNING

The phrase to light on or upon means always to come down upon, to hit upon : Gn 28<sup>11</sup>, Dt 19<sup>5</sup>, Ru 2<sup>5</sup>, 2 S 17<sup>12</sup>, 2 K 10<sup>15</sup>, Mt 3<sup>16</sup>, Rev 7<sup>16</sup> 'neither shall the sun light on them, nor any heat' (reor er arrow, RV 'strike upon them'). Cf. Mt 10<sup>29</sup> Tind. 'Are not two sparrowes solde for a farthinge'? And none of them dothe lyght on the grounde with out youre father.' J. HASTINGS. with out youre father.'

LIGHTNING is a well-known phenomenon accompanying thunderstorms. It consists of brief, vivid flashes, which are caused by electric discharges passing from one cloud to another, or from a cloud to the earth. In the latter case great damage is usually produced at the point where the discharge strikes the earth. Trees and houses are often shattered, holes made in the ground, and life in

the vicinity destroyed. In EV of OT 'lightning' is usually the rendering of pi; but as this word sometimes refers to the physical phenomenon and sometimes to other appearances resembling it, it is not always literally

the physical phenomenon and sometimes to other appearances resembling it, it is not always literally translated. LXX usually renders it by  $d\sigma\tau\rho a\pi \delta$ , but in Nah 3<sup>3</sup>  $d\epsilon a\sigma\tau\rho d\pi\tau ev$  is used, in Ezk 21<sup>10.18</sup>  $\sigma\tau i\lambda\beta\omega\sigma is$ , in Ezk 21<sup>20</sup>  $\sigma\tau i\lambda\betaev$ , in Job 20<sup>20</sup>  $d\sigma\tau\rho\sigma \sigma$  (a doubtful reading— $d\sigma\tau\rho a$ , A  $d\sigma\delta\rho a$ ), and in Job 38<sup>20</sup>  $\kappa\epsilon\rho avr\delta s$ . In AV  $p\gamma\gamma$  is rendered 'glitter' or 'glittering' Dt 32<sup>24</sup>, Job 20<sup>25</sup>, Ezk 21<sup>10.18</sup> Nah 3<sup>3</sup>, Hab 3<sup>11</sup>, and 'bright' Ezk 21<sup>15</sup>. The only places in RV where  $p\gamma\gamma$  is not translated 'lightning' are Dt 32<sup>24</sup> ('glittering' sword), Job 20<sup>26</sup> ('glittering' point), Nah 3<sup>3</sup>, Hab 3<sup>11</sup> ('glittering' spear). The verb  $p\gamma\gamma$  occurs once with the cognate noun Ps 144<sup>6</sup>. 'Lightning' in EV stands once (Job 37<sup>3</sup>) for '\*\* ('light,' LXX  $\phi\delta\sigma$ ), and once (Ex 20<sup>16</sup>) for  $\tau\gamma\gamma$ ('torch,' LXX  $\lambda a\mu\pi ds$ ). In Ezk 1<sup>14</sup> the Heb is  $p\gamma\gamma$ , which is possibly a corruption of  $p\gamma\gamma$  (Cornill, Smend). Here LXX (A) has  $\beta\epsilon_1\epsilon_s$ , and so Theod.; Symn. has  $d\kappa\tau ls d\sigma\tau pa\pi\gamma$ , and Aq.  $d\pi\delta\delta\beta$  as q $d\sigma\tau par f$ . In two passages (Job 28<sup>26</sup> s, also RV Zec 10<sup>1</sup>) 'lightning' is the equivalent of  $\tau m$ , a word the meaning of which is uncertain, though it is undoubtedly connected with a 'hunderstorm. Gesenius-Buhl renders it by *Gewitterwolke*. LXX by  $\tau i a \gamma \mu a$  in Job 28<sup>26</sup>,  $\kappa o \delta a \mu s^2$ , and  $\phi a \tau a \sigma t a m Zec 10<sup>1</sup>$ , where AV has 'bright clouds.'  $\ell \epsilon a \sigma \tau \rho d \pi \tau e v$  corrs in LXX as a rendering of other Heb. words, Ezk 14<sup>4</sup>, Dn 10<sup>6</sup>. In Apoer. and NT 'lightning' always stands for  $d\sigma \tau pa \pi \tau or d \sigma \tau p d \pi \tau e v corrs in Sing ('AV)$  or 'flash-wis 11<sup>18</sup>  $d\sigma \tau p d \pi \tau e v corrs is shooting' ('AV) or 'flash-$ 

are not translated quite uniformly. Thus in Wis 11<sup>28</sup> dστράπτοντες is 'shooting' (AV) or 'flash-ing' (RV) sparkles, in Lk 24<sup>4</sup> dστράπτουσα is 'shining' (AV) or 'dazzling' (RV), and in Lk 11<sup>26</sup> dστραπή is 'bright shining.'

Lightning is mentioned in connexion with thunderstorms, mostly in poetic descriptions, 2 S  $22^{15}$ , Ps 18<sup>14</sup> 97<sup>4</sup> 135<sup>7</sup>, Jer 10<sup>13</sup> 51<sup>16</sup>. Its association with thunder is the basis of a comparison in Sir  $32^{10}$ . The Epistle of Jer (v.<sup>61</sup>) refers to its beauty, and in the LXX Add. to Dn (3<sup>79</sup>, Song of Three<sup>51</sup>) it is summoned along with the rest of nature to praise God. God is generally represented as sending it, and the lack of the power to do so is one proof of the weakness of man (Job 38<sup>35</sup>). Lightning is associated with theophanies as at Sinai (Ex 19<sup>16</sup> 20<sup>18</sup>), in Ezekiel's vision (Ezk 1<sup>12, 14</sup>), and in various stages of the Apocalypse (Rev 4<sup>6</sup> 6<sup>6</sup> judgment in Ps 144<sup>6</sup>, Sir 43<sup>13</sup>. In Zec 9<sup>14</sup> God's 'arrows' of destruction are compared to lightning, which example. Lightning is mentioned in connexion with judgment in P's 144°, Sir 43'<sup>3</sup>. In Zec 9<sup>14</sup> God's 'arrows' of destruction are compared to lightning, which seems also to be spoken of as His 'sword' in Dt  $32^{21}$ , and as His 'spear' in Hab  $3^{11}$ . The glitter of weapons is frequently described as 'lightning' in Job 20<sup>25</sup>, Ezk 21<sup>10, 15, 26</sup>, Nah 3<sup>3</sup>. Either the speed or the flashing of chariots is compared to lightning in Nah 2<sup>4</sup>. Lightning is a figure for

brightness of countenance Dn 10<sup>6</sup>, Mt 28<sup>3</sup>, and of

brightness of countenance Dn 10<sup>6</sup>, Mt 28<sup>3</sup>, and of raiment Lk 24<sup>4</sup>, for the suddenness of the Second Advent Mt 24<sup>27</sup>, Lk 17<sup>34</sup>, and for the swift com-pleteness of Satan's overthrow Lk 10<sup>16</sup>. In some passages 'fire' evidently refers to lightning, as when 'fire and hail' are mentioned together (Ex 9<sup>25</sup>, Ps 105<sup>22</sup> 148<sup>6</sup>), and when 'fire from heaven' is spoken of either as an agency of destruction (2 K 1<sup>10, 12, 14</sup>, Job 1<sup>16</sup>) or as a token of (God's acceptance of a sacrifice (1 K 18<sup>26</sup>, 1 Ch 21<sup>26</sup>). See FIRE, THUNDER. JAMES PATRICK.

#### LIGN-ALOES. -See ALOES.

LIGURE (ap) leshem;  $\lambda_{17} \phi_{\mu o \sigma}$ ; ligurius, ligyrius). —In Ex 28<sup>19</sup> 39<sup>13</sup>, the only places where leshem occurs, AV accepts the transliteration of the Vulg. occurs, AV accepts the transliteration of the Vulg. ligurius, first introduced by Wyclif (1380 'ligyre,' 1388 'ligurie'). It is one of the stones in the third row of the high priest's breastplate (see BREAST-PLATE OF THE HIGH PRIEST, vol. i. p. 319). The Gen. Bible gives 'turkeis'; RV 'jacinth.' See JACINTH and STONES (PRECIOUS).

LIKE, LIKING.—The adj. 'like' is used in AV for modern 'likely,' in Jer 389' he is like to die for hunger in the place where he is,' and Jon 14 'the ship was like to be broken.' Cf. Bacon, *Essays*, p. 48, 'A Christian boy in Constantinople had like to have been stoned, for gagging, in a waggishnesse, a long Billed Fowle'; and Ruther-ford, *Letters*, No. xxi. 'It is like the bridegroom will be taken from us, and then we shall moure' will be taken from us, and then we shall mourn.' The obsol. expression 'like as 'is common. Thus Jer 23<sup>29</sup> 'Is not my word like as a fire?' Wis 18<sup>11</sup> 'Like as the king, so suffered the common person.' So are the expressions 'like to' or 'like unto,' as  $2 \times 17^{14}$  'They . . . hardened their necks, like to the neck of their fathers'; Ex 15<sup>11</sup> 'who is like unto thee, O LORD, among the gods? who is like thee, glorious in holiness, fearful in praises, doing wonders?' Cf. Udall, *Eramus' Paraphrase*, vol. ii. fol. 278, 'He once purged us frely from al synne, to make us by high to make us lyke manered unto himselfe, whiche neyther any law nor any mortal man could be hable to do.' 'Like' is often found with the meanhable to do. 'Like is often found with the mean-ing of equivalent; modern usage would be content with the less expressive 'same,' as Ex 30<sup>34</sup> 'of each shall there be a like weight' (Tind. 'of etch like moch'); Wis 7<sup>6</sup> 'all men have one entrance into life, and the like going out'; Ac 14<sup>16</sup> 'men of like passions with you'; 19<sup>30</sup> 'the workmen of like occupation'; 1 P 3<sup>21</sup> 'The like figure whereunto even baptism doth also now save us.' Cf. Preface to AV, 'If we will descend to latter times, we shall finde many the like examples of such kind, or rather unkind acceptance.

ance. As a subst. 'like' is now only provincial; in AV it occurs a few times: (1) the like, 1 K  $10^{30} \parallel$ 2 Ch  $9^{19}$  'There was not the like made in any kingdom' (12, LXX obrws); 2 Ch  $1^{12}$  'neither shall here entry then have the like' (12): Ezk 5<sup>9</sup> there any after thee have the like' (12); Ezk 5<sup>9</sup> 'I will not do any more the like' (12); Ezk 5<sup>9</sup> 'I will not do any more the like' (12); LXX  $\delta\mu\alpha\alpha\alpha$ ; 18<sup>W</sup> 'If he beget a son that is a robber, a  saying, That we never saw the like'; Shaks. Jul. Cces. 1. ii. 315-"Tis meet

#### That noble minds keep ever with their likes."

The verb 'to like' is both trans. and intrans. The verb 'to like' is both trans. and intrans. The trans. verb means either to 'be agreeable to,' 'please'; so Sir 15<sup>17</sup> 'Before man is life and death; and whether him liketh shall be given him' ( $\delta \epsilon \Delta r \epsilon \delta \delta \alpha \kappa \eta \sigma \gamma$ ; RV 'whichsoever he liketh'); cf. Erasmus, Commune Crede, fol. 4, 'For so it hath pleased god and hath lyked him to geve his herafites and griftes to one man by another mer'. benefites and gyftes to one man, by another man'; fol. 38 'The lorde hethe made all thynges, what so ever it hath liked hym, in heven and in earthe'; *Pr. Bk.* 'Of Ceremonies,' 'Some be so new-fangled, that they would innovate all things, and so despise that they would innovate all things, and so despise the old, that nothing can like them, but that is new': or else it means to 'be pleased with,' 'approve of,'so 1 Ch 23' 'among the sons of my father he liked me to make me king over all Israel' ( $\pi_{7}, \pi_{7}, RV$  'he took pleasure in me'). Usually this trans. verb is used impersonally, Dt 23<sup>16</sup> 'where it liketh him best' ( $\pi_{7}, \pi_{7}, LXX$  of An dorar dial' that the table to the too'. Dt 23<sup>16</sup> 'where it liketh him best' (17234, LXX of  $d\Delta r \, d\rho d\sigma \gamma \, d\sigma \dot{\omega}$ ; Est 8<sup>8</sup> 'as it liketh you' ( $172727 \, 3135$ ); Am 4<sup>8</sup> 'for this liketh you, O ye children of Israel' ( $107707 \, 2737$ , LXX br. rabra  $3\gamma d\pi \eta \sigma ar ol ol (10 \rho a \eta h)$ ; Sir 33<sup>15</sup> 'As the clay is in the potter's hand, to fashion it at his pleasure; so man is in the hand of him that made him, to render to them as liketh him best.' Cf. Gn 16<sup>6</sup> Wyc. (1388) 'Lo ! thi ser-vauntesse is in thin hond; use thou hir as it likith'; Hall, Works, ii. 45, 'It likes thee well, that the Kinordom of heaven should suffer violence.' that the Kingdom of heaven should suffer violence.

The intrans. verb occurs twice, Dt  $25^7$  'And if the man like not to take his brother's wife' ( $\dot{r}$   $\pi$ ,  $\dot{r}$ ); and Ro 1<sup>28</sup> 'And even as they did not

( $p_{3,T} \times h$ ); and Ro 1<sup>38</sup> 'And even as they did not like to retain God in their knowledge' (our éðoxl-µaoaa, RV 'they refused'). In 1 Es 4<sup>39</sup> is found the obsolete form 'like of,' 'all men do well like of her works' (rdæres eðôoxoðou rois épyous avrijs), which is retained in RV. So in Preface to AV, 'Solomon was greater than David. . . But was that his magnificence liked of by all? We doubt of it'; Melvill's Diary, p. 362, 'The King had determined to bring ham the Papist Lords again, and lyked of nan that wald nocht wag as the bus waggit'; Defoe, Crusoe, p. 274, 'Upon the Captain's coming to me, I told him my Project for seizing the Ship, which he lik'd of wonderfully well.' The verb to liken is of frequent occurrence, and

The verb to liken is of frequent occurrence, and means to compare, as Is 40<sup>18</sup> 'To whom then will ye liken God?' Cf. 'Findale, *Works*, i. 107, 'On this wise Paul also (Ro 5) likeneth Adam and Christ together, saying that Adam was a figure of Chaint's Christ.

# For likeness see IMAGE.

Likewise is sometimes a mere conj., also, as Dt 12<sup>20</sup> 'even so will I do likewise' ( $\Box_1$ , LXX παιήσω κάγώ), especially in NT as tr. of καί. But more be 12 of all of the sequence of the sequence

your faces worse liking (rept) than the children which are of your sort?' Wyclif (1388) uses the subst. in Gn 2<sup>10</sup> in the sense of delight, 'And a ryver yede out fro the place of likyng to moyste paradis' (1380, 'the place of delice'). For the adj. cf. Ps 92<sup>13</sup> Pr. Bk. 'They also shall bring forth more fruit in their age, and shall be fat and well-liking' (in 1539, 'well lykenge').\*.

J. HASTINGS.

LIKHI (יְלְמָד), B Λακεείμ, A Λακειά).—The eponym of a Manassite family, 1 Ch 7<sup>19</sup>. See GENEALOGY, VII.<sup>•</sup> 5.

LILITH  $(n^{1}y^{1})$ ; LXX *broxtraupol*; Symm. *láµa* [?*laµla*]; Vulg. *lamia*).—Is 34<sup>14</sup> RVm (only); AV 'screech owl'; AVm and RV 'night monster'; Cheyne 'night fairy' (in *PB* 'Lilith').' The Heb. wordoccurs in a description of the scene of desolation among Edom's ruined fortresses, where 'the wild beasts of the desert ( $\Box^{n}y$ ) meet with the wolves ( $\Box^{n}y$ ), and the satyr ( $\neg^{n}y$ ) cries to his fellow, and *Lilith* takes up her abode.' The reference is not to an animal, but to a female demon of popular superstition, analogous to the '*alúkah* or vampire of Pr 30<sup>16</sup>. The Jewish belief in Lilith probably grew up during the Exile; the name was unquestionably borrowed from Babylonia (cf. the Assyr. *lil* and *lilit*). Lilith was a demon ( $\neg y$ ) regarded by the Jews as specially hostile to children, although grown-up persons were also in danger from her (cf. the "*Eµπovaa* of the Greeks, the *Striz* and *Lamia* of the Romans, and the *ghúls* of the Arabs).

The name Lilith is generally derived from the root meaning 'night' (Bab.-Semitic lilâtu, Eth. lélit, Heb. 5';), night being the special season of this demon's power and activity. Baudissin, however (op. cit. below), doubts whether this derivation be correct, although it may have been assumed as the basis of some later Jewish conceptions. He quotes Jensen to the effect that the Sumerian lilât (=Assyr. lilû) means 'wind' (cf. Del. Assyr. HWB, s.v. 'lilû'), and that 'the handmaid of Lilâ' is brought into relation to 'the house of the wind.' Baudissin suggests that even in Zec 5<sup>6</sup> there may be a thought of Lilih in the prophet's mind, when he describes the two women with stork-like wings in which was the wind ((m)).

The belief in Lilith existed among the Jews of Mesopotamia, where a species of Lilith-worship prevailed as late as the 7th cent. A.D. In the Rabbinical literature Lilith figures largely (see Buxtorf, Lex. Talm. s.v.). She was said to have been the first wife of Adam, and to have flown away from him and become a demon. The Targ. on Job 1<sup>15</sup> apparently identifies the queen of Sheba with Lilith (see Grätz's Monatschrift, 1870, pp. 187 ff., cited by Cheyne in commenting on Is 34<sup>14</sup>). See, fürther, arts. DEMON in vol. i. p. 590 f., and NIGHT MONSTER.

LITERATURE.—The commentaries of Cheyne, Delitzsch, and Dillmann, on Isaiah, ad loc.; Whitehouse, COT ii. 311; Levy in ZDMG, ix. 470, 4841.; Schrader, JPTh i. 128; Lenormant, Chaldzam Magie (Eng. tr.), p. 38; Eisenmenger, Entdecktes Judenthum, ii. 413 ff.; W. R. Smith, RS 113; Wellhausen, Reate2, 145 ff.; Baudissin, art. 'Feldreister, Feldteufel' in Herzog's RE<sup>3</sup> vi. 51.; Weber, Jüd. Theologie, 255 ff.; Sayce, Hibbert Lectures, 1887, pp. 145 ff.; Hommel, Vorsemit. Kult. So7. J. A. SELBIE.

\* In a note on this passage in his edition of the Psalter of 1559 (p. 321), Earle says, "The old verb lician was first impersonal, and in that condition it produced this adjective, and the substantive liking as in the sense of looking well and in good condition, as in Shaks. I Henry IV. 11. iii. 6—"I'II repent ... while I am in some liking." When it became personal and transitive, it produced liking approval, as in The Epistle Dedicatorie (1611), "who runne their owne wayes, and give liking unto nothing but what is framed by themselves, and hammered on their Anville." From the last came the modern meaning, of which there is an example in AV, Wis 1621 'to every man's liking '(new is rec idicity').

**LILY.**—There are three questions to be settled in reference to the lily: (1) What was meant by  $|\psi| = sh \hat{u} sh \hat{u$ 

(1) The word shúshan or shóshan is still pre-served in súsan or súsan, a word of Persian origin, but adopted in this form into the Arabic. It is possible that it entered the Heb. from the same source. The capital of Persia was called in Heb. Shushan (Neh 1<sup>1</sup>, Est  $2^6$  etc., Dn  $8^2$ ). Atheno-dorus (xii. 513) says that this name was derived from the abundance of the lilies (*shushanim*) in its neighbourhood. *Susan* in Arab. is a general term for lily-like flowers, as the lily, iris, pancratium, gladiolus, etc., but more particularly the iris. It is as general as the English term lily, which is applied to flowers of the genera Lilium, Gladiolus, Convallaria, Hemerocallis, of the botanical order Liliacea, and to Nymphesa, Nuphar, Funkia, etc., not of that order. The Heb. shushan must be taken in the same general sense. This makes it easy to explain all the references to the flower in the OT. Some of the lilies grow in 'the valleys' (Ca 2', not our 'lily of the valley,' Con-uelloyie, which does not grow in the Fact condvallaria, which does not grow in the East), such as several species of Iris; others 'among thorns' (Ca 2ª), as other species of Iris; others in pastures, as still other species of Iris and Gladiolus (21 45 63). Its flowers were typical of luxuriance (Hos 145), as are those of all the Irises, Gladioli, and Pancratia. The comparison of lips to lilies (Ca  $5^{13}$ ) may refer to fragrance, not to colour. The allusion to lilies as features of architectural ornament doubtless refers to the recurved leaves of various flowers of the lily type, imitations of which were wrought in stone for capitals of columns (1 K  $7^{19}$ ), and bronze for the lip of the molten laver (2 Ch 4<sup>5</sup>), as they have been in similar works of art in other lands, from ancient times to our day. The meaning of the term shoshannim in the title of Pss 45. 69 (cf. Shúshan'idúth. Ps 60, and Shûshannim'edúth, 80) is obscure. See PSALMS.

Is obscure. See FALMS. (2) Is shishan the same as  $\kappa \rho i ror$  (Mt 6<sup>22, 29</sup>)? The Chaldee Targum and most of the Rabbis render it by 'rose.' Kimchi and ben - Melech render it in one place (1 K 7<sup>19</sup>) 'violet.' The LXX, however, tr. it always by  $\kappa \rho i ror$ . This is probably correct for several reasons. (a) Wherever there are not urgent reasons to the contrary, a LXX tr. has the preferance. (b)  $K \rho i ror$  has in Greek the same general application to lily-like plants as shishan in Hebrew and *lily* in English. (c) There is no reason for translating shishan differently in different places, as in the above mentioned authorities and in the Judæo-Spanish VS, which tr. shishan in Ca by 'rose,' and in Hos by 'lirio' = Lilium candidum. Admitting, then, the correctness of the LXX tr.  $\kappa \rho i ror$ , we may assume that Mt used this Greek word to express the Aramaic word used by our Saviour, which was doubtless a modification of shishan.

(3) What is meant by 'lilies of the field'? It is plain that our Saviour spoke in a way that His hearers would understand. Therefore (a) there could not have been included in His allusion any plant unknown to His audience. This would exclude *Lilium Chalcedonicum*, L., and *Lilium Martagon*, L., which have been assumed by some as the species intended, on account of their beauty, but neither of which is found in Palestine. *Lilium candidum*, L., is also not a plant of Palestine, and being white would not suit the comparison with Solomon's royal garments. Furthermore, if this species had been intended,  $\lambda f_{\mu o \nu} = white lily$ , would probably have been used, instead of  $\kappa \rho i \nu \sigma$ , which is general. (b) None of the water lilies could have

been intended, as the lilies were 'of the field.' (c) It is not likely that they were anemones or (c) It is not likely that they were anemones or poppies or artichokes. All these flowers had their own names, and would not have been suggested to the popular mind by the term lily. (d) It must therefore have been some plant of the modern order *Liliaceæ*, *Iridaceæ*, or *Amaryllidaceæ*. Any of these would have been called *spiso*, and most would now be called popularly *lilies* in Eng-lish. (c) It was not only a lily-like plant of the hish, (c) it was not only a my-file plant of the field, but had a stem, which, when dried, would be useful as fuel (Mt 6<sup>20</sup>). This would exclude the crocuses and colchicums, Anemone Coronaria, L. (which, however, has the support of Tristram), and other storm large plants (C) to use a form and other stemless plants. (f) It was a flower of rich colours. The plants which realize all these conditions are the various species of Gladiolus, which are indigenous in Palestine, G. Illyricus, Koch, G. segetum, Gawl, G. atroviolaceus, Boiss., and Ixiolirion montanum, Lab. All these grow among the grain, often overtopping it, and illuminating the broad fields with their various shades of pinkish purple to deep violet-purple and blue, truly royal colours. Any one who has stood among the wheat fields of Galilee, and seen the beautiful racemes of these flowers, peering up in beautiful racemes of these flowers, peering up in every direction above the standing corn, will see at once the appropriateness of our Saviour's allu-sion. They all have a reedy stem, which, when dry, would make such fuel as is used in the ovens (Arab. tannúr). These stems are constantly plucked up with the other wild plants from among the wheat, to feed cattle or to hurn. The beautiful Irises, I. Sari, Schott, I. Palestina, Baker, I. Lorteti, Barb., and I. Helenæ, Barb., have gorgeous flowers, and would suit our Saviour's comparison even better than the above. But they comparison even better than the above. But they are plants of pasture grounds and swamps, seldom found in grain fields. If, however, we understand by 'lilies of the field' simply wild lilies, these would also be included in the expression. Our Saviour's comparison would then be like a 'composite photograph,' a reference to all the splendid colours and beautiful shapes of the numerous wild plants comprehended under the name lily. This seems to us the most simple and natural interpretation, and meets every requirement of the passage. G. E. Post.

LIME (rty, *koria*) is the commonest of the socalled 'alkaline earths,' its basis being the metal calcium. The various forms of limestone, some of which are very abundant in Palestine, are composed of carbonate of lime. When this is strongly heated, it is converted into oxide of lime or 'quicklime,' and becomes soft and crumbling. Quicklime combines readily and even violently with water to form 'slaked lime,' which is one of the chief ingredients of mortar (wh. see). As the mortar 'sets,' the slaked lime absorbs carbonic acid gas from the air, and is reconverted slowly into carbonate of lime.

Lime is mentioned only twice in EV. In Is  $33^{12}$ it is predicted that the Assyrian oppressor shall be 'as the burnings of lime' ( $17\pi$  MPJ73)—a figure for destruction. (Similarly in Is 27° the stones of idolatrous altars are to be 'as chalkstones [1773, k, LXX row(a  $\lambda e \pi \tau \eta$ ] that are beaten in sunder,' probably after being 'burnt.' See CHALK-STONES). In Am 2' the Moabites are denounced because they 'burned the bones of the king of Edom into lime' (see Driver's note). Phosphate of lime is the chief mineral constituent of bones, and is unchanged by burning. Both in their appearance and in their composition, therefore, bone ashes have something in common with calcined limestone, and are naturally described by the same term. Besides these two passages,  $17\pi$  occurs in Dt 27° 4 both as noun and as verb, and is translated 'plaister' (wh. see).

In Mt  $23^{27}$  our Lord, in denouncing the scribes and Pharisees for their hypocrisy, compares them to radio recoration. It was the custom of the Jews to whiten the outside of their tombs with lime every year on the 15th of Adar, the object being to make the tombs conspicuous, that passersby might avoid defilement (see Meyer, Holtzmann, *in loc.*). In our Lord's saying, the whiteness is viewed chiefly as a deceptive outward embellishment, contrasting with the corruption within. Similarly in Ac 23<sup>3</sup> St. Paul calls Ananias the high priest roixor recorations.

JAMES PATRICK. LIMIT. — The subst. occurs only in Ezk  $43^{12}$ 'Upon the top of the mountain the whole limit thereof shall be most holy,' where it means a region or space within certain limits or bounds (Heb. >===, LXX rà  $\delta \rho a$ : the Heb. word is common in this sense, but it is usually rendered by 'border' or 'coast': Wyc. [1388] has 'coostes' here, [1382] 'eendis'; Cov. 'corners'; Geneva gives 'limits'). For the Eng. word cf. Shaks. I Henry IV. III. i. 73—

#### ' The archdeacon hath divided it Into three limits very equally.'

The verb occurs twice: In Ps 78<sup>41</sup> it means to set limits to, restrict, 'they turned back and tempted God, and limited the Holy One of Israel' (10.77, LXX  $\pi a \rho \omega \xi v \nu a r$ , RV 'provoked,' RVm 'limited').

KVm 'limited'). The tr. 'limited' comes from the Gen. Bible, which explains its meaning in the marg. 'As thei all do that measure the power of God by their capacitie.' But it is usually taken in another sense: thus in JQlt iv. 441, Dr. Friedländer says, 'My conception of God is based on the teaching of the Beriptures, God is the Creator and the Ruler of the Universe, and by His decree phenomena appear and events occur which are contrary to human expectation, i.e. miracles are wrought by Him. According to the idea of Mr. Monteflore, the Divine Being is bound to act according to certain laws established by human reason. This is by no means a new theory. Asaph in Ps 784, speaking of the Israelites in the wilderness, saya, Yea, they turned back and tempted God, and limited the Holy One of Israel.' The translation is due to the fact that the same Heb. form occurs in Exk 94 along with the word *tur* (which is the name of the last letter of the Heb. alphabet, and was originally in the shape of a cross), where it is trd'set a mark.' But most follow the LXX

rapáčivar, Syr. 702, Vulg. exacerbarerunt, and Jerome concitarerunt, and translate 'grieved,' or as RV 'provoked,' Kautzsch kränkten.\*

The Amer. RV introduces 'limit' in this sense into Job 15<sup>6</sup>. Cf. Adams, Works, i. 26, 'being an infinite and illimited God.'

The other occurrence of the verb is He 4' 'Again, he limiteth a certain day,' where the meaning is 'fix as a limit'  $(\delta\rho_l)_{ee}$ , RV 'defineth'). So Berners' Froissart, xxiv. 'It was not long after but that the king came to his palace of Westminster and all his council was commanded to be there at a certain day limited'; Bradford, Plym. Plant. p. 82, 'Their time limited them being expired, they returned to the ship.'

#### J. HASTINGS.

**LINE.**—1. The word most freq. translated 'line' in AV is  $v_k k \bar{u} w$  or  $v_k k a w$ . The kaw is a marking off or measuring line, as it is fully defined in Jer 31<sup>30</sup>, but is usually called simply the 'line.' It is especially the builder's measuring line, as Zec 1<sup>16</sup> 'I am returned to Jerusalem with mercies: my house shall be built in it, saith the Lord of hosts, and a line shall be stretched forth upon Jerusalem'; and so it comes to be used of the line that marks off the part that is to be *taken down* and destroyed, as 2 K 21<sup>13</sup> 'And I will stretch over Jerusalem the line of Samaria, and the plummet of the house of Ahab,'

\* Burgess (Notes on Heb. Pas) adopts the tr. 'set a mark,' and has the interesting sugrestion that the Israelites proposed to put God to the test : if He provides flesh in the wilderness, then we shall ucknowledge Him; somewhat after the manner of Caliban-'That's a brave god, and bears celestial liquor; I will kneel to him.'

LINE

i.e. the line that marked them off for their destruction; Is 23<sup>17</sup> 'Judgment also will I lay to the line, and righteousness to the plummet' (RV 'And I will make judgement the line'); Is 34<sup>11</sup> 'the line of confusion.' Then the word comes into use metaphorically for whatever goes by line or measure-ment, a rule of life: thus in Is 28<sup>10</sup> the drunkards of Ephraim mock Isaiah's teaching as 'precept upon precept, precept upon precept, line upon line, line upon line, here a little, and there a little,' showing by their use of a series of monosyllables (zaw la zaw, zaw la zaw, kaw la kaw, kaw la kaw, ze'er sham, ze'er sham) both their drunkenness and their disgust. For the Eng. word here cf. Archbp. Hamilton's *Catechism* (Mitchell's ed. fol. v), 'For as ane biggare [= builder] can nocht make ane evin up wal without direction of his lyne, a mason can nocht heu ane evin aislair staine without directioun of his rewill, ane skyppar can nocht gyde his schip to gud hevin without direction of his compas, sa a man or a woman can nocht ordour or gyd his lyif evin and strecht to the plesour of GOD with-out direction of his commandis.'

The only passage of difficulty is Ps 194 'Their line is gone out through all the earth, and their words to the end of the world.' AVm suggests as alternative translations 'their rule' or 'direction'; RV accepts the tr. of AV (which comes from the Gen.) without margin. The same verb is found with the measuring line in Esk 473, and perhaps the majority of mod. expositors accept this tr., the meaning then being that the heavens send out their line to mark off and take passesion of the whole earth, an idea suggested by the line of the horizon running round the earth. So Del., Per., De Witt, Kirkp., Kautzsch. But the oldest translators thought of the line as perhaps a bowstring that gives forth a sound. So LXX deirprof, Dou. 'sound,' Segond retentissement, King 'strain.' Prac-tically the same meaning is got by Cheyne and Wellh. in another way. They read D'p for D.D. and trans. 'their voice.' another way. They read Dip for D.D. and trans. ' their voice.' They are not influenced, as some of the older expositors perhaps were, by Ro  $10^{18}$ , where St. Paul quotes the LXX and applies the words to the world-wide proclamation of the gaspel.

The only places in AV where kaw is not tr<sup>4</sup> 'line' are Is 44<sup>13</sup> '[carpenter's] rule,' where, however, RV gives 'line'; and 18<sup>2,7</sup>, where the Heb. 170' is translated in AV 'a nation meted out' (lit. as AVm 'a nation of line line'); the context demands rather the active meaning 'that meteth out,' as RV (which, however, retains AV in marg.). Cheyne (*Expos.* 3rd ser. vi. 455) criticizes AV as impossible and RV as barely possible. His own rendering is 'the strong strong nation' (in SBOT' a nation of sinewy, strong the is give by charging the MT into upp, a subst formed after Arab. known, 'strength'; and with that Skinner agrees. Ges. (Thes. s.v.) had suggested a distinct subst. y, and Arab.; Buhl in the latest ed. (1899) of the Handworterbuch adopts any schnige Kraft with some hesitation.

2. For אָבָל, see CORD. In Ps 166 'The lines are fallen unto me in pleasant places,' the reference is to the portion marked off by the line or measuring cord. In Jos 17<sup>5</sup> the word is tr. 'portions,' And there fell ten portions to Manasseh' (RV 'parts,' RVm 'lines'), 3. En is tr. 'line' only in 1 K 7<sup>15</sup>, 'a line of twelve cubits did compass either of them [the pillars] about.' See BAND. 4. For yas (only Ezk 40<sup>3</sup>) see LACE. 5. maps Jos 2<sup>18, 21</sup> the *line* of scarlet thread which Rahab bound in the window. scarlet thread which Rahab bound in the window. It is Coverdale's word here, who has 'excepte thou knyttest in the wyndowe the lyne of this rose-coloured rope'... 'And she knyt the rose coloured lyne in the wyndowe.' 6. The interval sered, is in AV mistranslated 'line,' RV gives 'pencil,' RVm 'red ochre.' See PENCIL. In NT we have only 2 Co 10<sup>44</sup> 'not to boast in another man's line of things made ready to our hand' (ir  $d\lambda \partial c \rho i \varphi$  raster, AVm 'rule,' RV 'in another's province,' RVm 'Or timit, Gr. measuring

rod'). The AV tr. is from the Gen. Bible, which explains it by saying, 'God gave the whole worlde to the Apostles to preache in, so that Paul here meaneth by the line his porcion of the countre is J. HASTINGS. where he preached.'

LINBAGE.-Lk 24 only, 'he was of the house and lineage of David' (*it otrou rat marpuls*, RV 'of the house and family'). Spenser uses the word in the same sense, FQ I. i. 5-

' So pure and innocent, as that same lambe, She was in life and every vertuous lore, And by descent from royall lynage came.'

Cf. also Nut Brown Maid (in Skeat's Specimens, p. 107)-

Ye shal not nede further to drede, I wyl not disparage You, god defende, sith ye descende of so grete a lynage.

Wyclif uses the word in the wider sense of kin-dred or tribe, as Ps  $72^{17}$  'And all the lynagis of earthe schulen be blessid in hym';  $78^{57.66}$  'he chees not the lynage of Effraym. But he chees the lynage of Juda'; Rev 5<sup>5</sup> 'a lioun of the lynage of Juda. J. HASTINGS.

LINEN.—The manufacture of linen is an ex-tremely ancient art. The Egyptians attained proficiency in it at a very early time. To them Pliny ascribes the invention of weaving (vii. 56), and the honour is given by Athenæus to Pathymias the Egyptian (*lib.* ii.). Linen-weaving became a and the honour is given by Athenaeus to Fathymias the Egyptian (*lib.* ii.). Linen-weaving became a profitable calling, providing occupation for large numbers. Strabo (xvii. 41, p. 813) says that Panopolis, or Chemmis, was inhabited by linen-weavers. Judging by the representations that have been preserved, the implements used must have been comparatively rude; but cloth of very fine quality was produced with them. So delicate indeed were certain fabrics that they were described as 'woven air.' Specimens of Egyptian work in the form of corselets are mentioned by Herodotus (ii. 182, iii. 47), one dedicated by Amasis to Minerva in Lindus, the other sent by him to the Lacedæmonians, 'made of linen, with many figures of animals inwrought and adorned with gold and cotton wool'; and he notes that 'each thread, though very fine, contained 360 threads all dis-tinct.' Egyptian fine linen, yarn, and embroidered work were widely prized, and reckoned superior to those of any other country. Four qualities of Egyptian linen are specified by Pliny (xix. c. l), viz. Tanitic, Pelusiac, Butine, and Tentyritic. A large export trade was carried on to Arabia and India.

The Egyptian priests wore linen clothes, and according to Herodotus (ii. 37) were not allowed to wear anything else. But Pliny (xix. 8) says that although they used linen they preferred cotton robes; and the Rosetta Stone mentions 'cotton garments' provided for the use of the temples. It is most probable that the undergarments were always of linen, while robes of cotton worn over them would have to be left outside the temples. Linen was regarded as fresh and cool in a hot climate, with a tendency to keep the body clean. This, with the religious prejudice requiring linen only to be worn in the temples, may account for the belief that the priests were prohibited from ever wearing anything else. When the worship of Isis was introduced into Greece and Rome (Plut. de Is. v. 3) the same customs as to priestly dress were adopted (Wilk. Anc. Egyp. iii. 117). Great quantities of linen were employed in wrapping the mummies of the dead (Herod. ii. 86).

The bandages used for this purpose were invariably of linen. This has been demonstrated by a series of careful microscopic examinations well described by Wilkinson (Anc. Egyp. iii. 115, 116). Wool

Digitized by Google

was never used in this way, because of a belief that it tended to breed worms which would destroy the body. The poor might wear cotton garments in life, provided their munumies were wrapped in linen after death. Linen was used for both men and animals, and sometimes the bandages were as much as 1000 yards in length (Wilk. *ib. iii.* 484).

The influence of Egypt on Israel is seen perhaps in the prominence given to linen in the furniture of the tabernacle and in the dress of the priests. The trade with Egypt was maintained (Pr  $7^{16}$ ), and the material was highly prized by the neighbouring Tyrians (Ezk  $27^7$ ). Flax was early cultivated in Palestine (Jos  $2^6$ ), but the native industry in linen, as in other woven stuffs, was chiefly confined to the women of the household. The finer kinds were broucht from abroad.

The terms used for 'linen' in Scripture are-

1.2.  $\forall \vec{v}_1$ ,  $\forall z_2$ . As a mark of distinction Pharaoh clothed Joseph in linen garments ( $\forall \vec{v}_1$ ), from which we may infer that linen formed part of the ordinary diress of royal, or at least eminent persons (Gn 41<sup>ex</sup>). Shish corresponds in form with the Arab shish, a fine muslin, made of cotton, and much used to guard against mosquitoes and sand-flies. Linen is, however, here intended. Shish is sometimes used as the equivalent of bad ( $\forall z_1$ ), about which there is no doubt (cf. Ex 28<sup>5, ex</sup> 39<sup>ex</sup>, Lv 16<sup>4</sup>). Shish appears to be the more general term. It is used for the offerings brought by the people (Ex 25<sup>4</sup>); the materials used in the hangings of the tabernacle (Ex 26<sup>1 etc.</sup> 27<sup>9 etc.</sup> 35. 36. 38); the finery of women (Pr 31<sup>ex</sup>, AV 'silk,' Ezk 16<sup>10, 13</sup>) and the cloth of sails (Ezk 27<sup>7</sup>), as well as for the various garments of the priests (Ex 28<sup>5 etc.</sup> 39<sup>2 setc.</sup>). In Ezk 16<sup>13</sup> we have the peculiar form  $\forall \vec{v}$ ; this is probably due to proximity to the similarly sounding  $\forall \overline{\gamma}$ .

 $7_3$  is used exclusively of articles of dress, and principally of the holy garments of the priests (Ex 28<sup>42</sup> 39<sup>25</sup>, Lv 6<sup>10</sup> 16<sup>4</sup> etc.). In 1 S 22<sup>18</sup> the priests are designated as persons that wear a linen (*bad*) ephod. Samuel, as a child, engaged in religious service, was girded with a linen ephod (1 S 2<sup>18</sup>). David in his dance before the Lord was similarly girded (2 S 6<sup>14</sup>, 1 Ch 15<sup>27</sup>). The man wearing linen garments is chosen for special work (Ezk 9<sup>2, 3, 11</sup> 10<sup>2, 6, 7</sup>); and the great figure in the vision by the river Hiddekel wears similar attire (Dn 10<sup>6</sup> 12<sup>6, 7</sup>). It appears therefore that *bad* is restricted to uses that are of a religious character.

The distinction between shēsh and bad cannot be indicated with certainty. In the phrase 'bad of fine twined shēsh' (Ex 39<sup>20</sup>), the latter term evidently means the thread of which the cloth is woven. This suggests that while bad is used only for the cloth, shēsh is applied indifferently, now to the thread and now to the woven stuff. Abarbanel (on Ex 25) says that bad was a single thread, and shēsh (Heb. = 6) was formed by twisting together six single threads. But this seems in contradiction to the above.

**3.** ra, LXX Bisoson, is from the root ra, to be white, still heard in the Arab bis used for native linen. Of Aramæan origin, it was used specially for the Syrian byssus (Gesenius). In Ezk 27<sup>16</sup> it is distinguished from Egyptian shāsh (cf. v.<sup>7</sup>), but elsewhere the distinction is ignored (cf. 2 Ch 3<sup>14</sup>, Ex 26<sup>21</sup>). Targum Onkelos gives biz as the equivalent of shāsh. Búz is the name given to linen, in which the house of Ashbea attained eminence as workers (1 Ch 4<sup>21</sup>, cf. 2 Ch 2<sup>14</sup>), of which David's robe was made (1 Ch 15<sup>17</sup>), of which the veil of the temple was woven (2 Ch 3<sup>14</sup>), and with which the Levite singers in the temple were clothed (2 Ch 5<sup>12</sup>). Of this were also the cords which fastened the hangings in the king's gardens at Shushan the palace (Est 1<sup>6</sup>). Mordecai's dress when he went

out from the king was of fine linen (bdz) and purple (Est 8<sup>15</sup>, cf. Lk 16<sup>19</sup>). The Syrian trade with Tyre included 'purple and embroidered work and bdz' (Ezk 27<sup>16</sup>). Josephus takes byssus as the equivalent of both sheah and bad, describing the offerings of the Israelites in the wilderness for the tabernacle as byssus of flax (Ant. vi. 1), the hangings for the tabernacle as sindon of byssus (ib. 2), and the priests' drawers and vestments as byssus. The vestment, he says, was called *chethone* (nkp), which denotes linen (ib. VII. i. 2). This corresponds closely with the Arab kittân, the common name for linen stuffs. The presumption of the mystic Babylon is shown by her arraying herself in fine linen (byssus), the fitting dress of the Lamb's wife, since it symbolizes 'the righteousness of the saints' (Rev 18<sup>16</sup> 19<sup>6</sup>). Such raiment also is congruous with the character of those who follow him who is called the Faithful and True (ib. 19<sup>14</sup>).

**4.**  $785^{\frac{1}{2}}$  (or  $75^{\frac{1}{2}}$ ) is a general term ; applied to the plant (Jos 2<sup>6</sup>), to the raw material (Jg 15<sup>14</sup>, Pr 31<sup>13</sup>), to heckled flax (Is 19<sup>9</sup>), to threads in a mixed web (Dt 22<sup>11</sup>), to cloth (Lv 13<sup>47 stc.</sup>), to the prophet's girdle (Jer 13<sup>1</sup>), to a measuring-line (Ezk 40<sup>3</sup>), and to the sacred garments of the priests (Ezk 44<sup>17, 18</sup>). See FLAX.

5. γτο, an article of fine stuff, of domestic manufacture (Pr 31<sup>24</sup>), and highly esteemed as a luxury (Is 3<sup>25</sup>). The στα of Samson's challenge to the Philistines (Jg 14<sup>12,13</sup>) were wrappers 'worn as an outer garment,' or 'as a night wrapper on the naked body.' They were sometimes used as curtains (Mishna, Joma iii. 4), and also as shrouds (Talm. Jerus., Kilaim ix. fol. 32<sup>6</sup>). For these purposes sheets of considerable size would be necessary (Moore, Judges, in loc.). With this the Greek συνδων corresponds. It is the linen cloth or dress in which the young man wrapped himself (Mk 14<sup>41</sup>), and again it is a winding-aheet (Mt 27<sup>20</sup>, Mk 15<sup>46</sup>, Lk 23<sup>85</sup>).
6. γυν (AV 'fine linen,' RV 'yarn,' Pr 7<sup>16</sup>), by

6. ppy (AV 'fine linen,' RV 'yarn,' Pr 7<sup>16</sup>), by a Syriacism for ppy from an unused root 75% 'to bind together' (Gesenius). With this may be compared the Arab 'usun, 'tent ropes.' The fine thread or yarn of Egypt was most probably linen. That the ornamentation of coverings or tapestry for which it was used is here intended, is supported by the renderings of LXX and the Vulgate, which are dup/raroi and pictae tapetes respectively.

are  $d\mu\phi lramon$  and pictor tapetes respectively. 7.  $\delta\theta\delta\sigma\eta$  (Ac 10<sup>11</sup> 11<sup>6</sup>) is the sheet let down from heaven in St. Peter's vision; while  $\delta\theta\delta\sigma\mu a$  (Jn 19<sup>49</sup> 20<sup>6</sup>. 6.<sup>7</sup>) are the strips of cloth with which the body was bound, after being wrapped in the  $\sigma\mu\delta\omega\mu$ .

8. A coarse cloth made of unbleached flax,  $\omega\mu\delta\lambda\nu\sigma\sigma$ , was worn by the poorer classes (Sir 40<sup>4</sup>). A combination of animal and vegetable products

A combination of animal and vegetable products in dress was prohibited to the Israelites. A kind of cloth was sometimes made of which the woof was cotton and the warp linen (Julius Pollux, Onom. vii. 17. Quoted by Wilk. Anc. Egyp. iii. 118). Such may have been  $1957^{\circ}$  (LXX  $\kappa(\beta\delta\eta\lambda\circ\nu)$ , a word of obscure origin, but denoting a mixed stuff of wool and linen (Ly 19<sup>19</sup>, cf. Dt 22<sup>11</sup>).

wood on obscure origin, but denoting a mixed stuff of wool and linen (Lv 19<sup>19</sup>, cf. Dt 22<sup>11</sup>). Linen Yarn.—mpp, mpp (1 K 10<sup>28</sup>, 2 Ch 1<sup>16</sup>). For mikweh Buxtorf gives netum filatim quod in Ægypto magni usus et pretii. He notes, however, that on 1 K 10<sup>28</sup> R. Sal. ibi accipit mpp pro mpon, collectione, congregatione vertigalis. RV renders in each case 'drove.' Perhaps the text is corrupt. LXX B has for mpp éx Gexcove, 'from Tekoa,' Luc. éx Kod, Vulg. de Coa. Winckler (Alttest. Untersuch. 168 ff., cf. Altorient. Forsch. i. 28), followed by Hommel and others, finds here a reference to Kuë (i.e. Cilicia).

126

**LINUS** ( $\Lambda$ /ros). — One of the Christians who joined with Eubulus, Pudens, and Claudia in a salutation at the end of 2 Ti. This Epistle was written from Rome, and it is generally allowed that this Linus is identical with one of the first bishops of Rome. The identification goes back to Irenæus (c. Hær. III. iii. 3). It is considered that he was, if we omit St. Peter's name, the first bishop of Rome, though Tertullian (*de Prascr.* 32) implies that Clement was the first. Nothing is really known of his life and episcopate, which Eus. (*HE* iii. 13) says lasted twelve years. Many questions have been raised about him: for instance, as to whether he was bishop before St. Peter's death or not, and whether he may not have been con-temporary with Clement, and have exercised his office as bishop of the Gentile Christians only, whilst perhaps Clement was bishop of the Jewish Christians. The date of his episcopate has been variously given, the extreme limits being A.D. 56-67 and A.D. 68-80. Harnack, in his latest work, dates the episcopate of Linus A.D. 64-76. It is asserted in the Greek Menæa that he was one of the Various works are ascribed to him, but Seventy. without foundation: (1) the acts of St. Peter and St. Paul; (2) an account of St. Peter's controversy with Simon Magus; and (3) certain decrees in which he ordered women to appear in church with covered heads. He is commemorated in the Roman Service books on Sept. 23, where the following account is given of him :-

following account is given of him :--'The pontiff Linus, who was born at Volterra, in Etruria, was the first ruler of the Church after Peter. His faith and holiness were so great that he not only cast out devils, but also restored the dead to life. He wrote the history of St. Peter, and in particular of his opposition to Simon Magus. He ordered that no women should appear in church unveiled. He was beheaded, because of his adherence to the Christian faith, by the order of Saturninus, whose daughter he had set free from demoniacal possession. He was buried in the Vatican, near the Prince of the Apostles, on Sept. 23. He was bishop for eleven years, two months, and twenty three days, during which he consecrated or ordained (on two occasions in December) fitteen bishops and eighteen priests (Brev. Rom.).

And eighteen priests (DEC. LEARNY) LITERATURE. – Pearson, De serie et successione primorum Romæ Episcoporum (1688); Lightfoot, St. Clement of Rome (1890); Harnack, Die Chronologie der Altchristlichen Litteratur (1897); Duchesne, Liber Pontificulis, i. (1884-86). H. A. REDPATH.

H. A. REDPATH. LION.—1. The generic name for lion is "H dri or πy draych, pl. current drayim and ning draych. This word is used literally (Jg 14<sup>6, 8</sup> etc.), of figures (1 K 7<sup>29</sup> etc.), in comparison (Gn 49<sup>9</sup>, Nu 23<sup>24</sup> etc.), metaphorically (Gn 49<sup>9</sup>, Nah 2<sup>12</sup> etc.). 2, rup képhir, is the young lion (Jg 14<sup>6</sup> etc.). 3, rup gúr, signifies whelp or cub in general. It is applied to the young of rup tannin (La 4<sup>3</sup>, AV 'sea monsters,' RV 'jackals'; preferably, in our opinion, wolves. See DRAGON, 4). It is usually applied to lions' cubs (Gn 49<sup>9</sup>, Ezk 19<sup>2,3</sup> etc. In the latter passage the distinction between gír the latter passage the distinction between gur and kephir is clearly brought out). It is used and *kepair* is clearly brought out). It is used metaphorically, for the Babylonians (Jer 51<sup>38</sup>) and the Assyrians (Nah 2<sup>11, 12</sup>), for Judah (Gn 49<sup>9</sup>), for Dan (Dt 33<sup>22</sup>), and for the Israelites (Ezk 19<sup>2</sup> etc.). **4.** w $\gamma$  *lābi* and w $\gamma$  *libiyyāh*, cognate with the Arab. *labwah*, *labuah*, *lubiah*, or *labaah*. They are poetic forms in Heb. (Gn 49<sup>9</sup> etc.). The masculing and ing is presulted (In 49<sup>9</sup> etc.). The They are poetic forms in Heb. (Gn 49° etc.). The masculine ending is paralleled by ' $\bar{a}th\delta n = shc \cdot ass$ ,  $r\bar{a}h\bar{c}^2 = euc$ , and ' $\bar{c}z = shc \cdot goat$ . There are numer-ous parallels in the Arab. **5.**  $c^{-1}$  layish, is a poetical word for the lion, possibly derived from the idea of his courage and strength (Is 30° etc.). Its Arab. equivalent is laith, evidently the same as the Aram,  $m^2$  and the (truck) is (then H vi as the Aram. n? and the Greek As (Hom. 11. xi. 239, xv. 275). 6. rv shahal, is another poetical 4<sup>10</sup> etc.). 7. γrψ<sup>-1</sup> z<sup>b</sup> čné-shahaz, is tr. 'lion's whelps' (Job 28<sup>8</sup>, RV 'proud beasts,' m. 'sons
 \* W. R. Smith (Prophets<sup>1</sup>, 129, 243) reckons sha'ag the roar at the moment of the spring, naham the growl with which the lion devours his prey.

of pride'). The same word is tr<sup>4</sup> (RV Job 41<sup>34</sup>) 'sons [AV 'children'] of pride.' Undoubtedly this is the correct tr., being figurative for the more noble beasts of prey. In the first passage, after the general expression 'sons of pride,' comes the specification of the lion as one of the noble beasts. There are about four hundred words in Arab. for the lion. Most of them are attributives. It is very common to give the name  $Asad = {lion' to$ boys, as a prophecy of their provess. This nameand that of other strong animals, as the*leopard* and the wolf, are given to some boys, born after the death of an older brother, in the hope that the strength of the animal will inhere in him, and so his life may be preserved. As there is abundant evidence that lions were common in Greece as late as the times of Xerxes, so we learn from the OT that they were numerous in Palestine in ancient times. They made their dens in the thickets (Jer 4<sup>7</sup> etc.), forests (Jer 5<sup>6</sup> etc.), mountains (Ca 4<sup>6</sup>, Ezk 19<sup>6</sup>). The 'swelling of the Jordan,' *i.e.* the fringe of thickets between its upper and lower banks, was among the favourite haunts of the lion (Jer 4919 South Certification (Pal. i. 274) says that they were found here as late as the end of the 12th cent. They are met with even now in Mesopotamia. The lion of Palestine was probably the one described by Pliny (viii. 18); 'the body is shorter and more compact, and the mane more crisp and curly.' This sort is the same as that found in Persia and Mesopotamia, and figured on the Assyrian monu-ments. Layard, however, says that he has seen lions in Mesopotamia with long black manes (*Nin. and* Bab. 487). It would seem that the lions of Palestine were less formidable beasts than those of the were less formitable beasts than those of Africa, as shepherds sometimes attacked them single-handed (1 S 17<sup>34-36</sup>). Samson rent one in twain (Jg 14<sup>6</sup>). Amos says, 'as the shepherd taketh out of the mouth of the lion two legs or a piece of an ear' (3<sup>12</sup>). Lions were sometimes sent as a scourge to the people (2 K 17<sup>-5</sup> etc.). They often attacked and devoured men (1 K 13<sup>24</sup> atc. cf. Ps 29<sup>17</sup> (2) where Aquila is now known to etc.; cf. Ps 22<sup>17</sup> (?), where Aquila is now known to have read קאר. They were hunted by driving them have read (1957). They were numbed by driving them with loud shouts into pits or nets (Is 314, Ezk 194.8). The passage telling of the exploit of Benaiah (2 S 23<sup>20</sup>) reads רקני איזע כואר Start tr. 'slew two lionlike men (m. 'lions of God,' RV [supplying 12, after LXX] 'the *two sons* of Ariel') of Moab.' We read also that 'he slew a lion in the midst of a pit in time of snow.' Oriental monarchs had nit of lions (Dp 60) the animals being used as had pits of lions (Dn 6<sup>7</sup>), the animals being used as executioners, but not for combats with other

executioners, but not for combats with other animals or with gladiators, as among the Romans. The qualities of the lion alluded to in Scripture are (1) his royal power and strength (Gn 49°, Pr 30<sup>30</sup>). In this respect he was the type of Christ, 'the Lion of the Tribe of Judah' (Rev 5<sup>5</sup>). Lions were sculptured on the temple and king's house (1 K 7<sup>29-36</sup> 10<sup>19, 20</sup>). The castle of 'Irakel-Amfr in Cilcad has liong conved on the factor (2) Hig Collead has lions carved on its face. (2) His courage (Pr 28<sup>1</sup> etc.). (3) His cruelty (Ps 22<sup>13</sup> etc.), compared with the malignity of Satan (1 P 5<sup>6</sup>).

Four words express the voice of the lion. 1. 1 shā'ag (Jg 14<sup>9</sup> etc.), the true roar of the roaming lion seeking its prev (1 P 5<sup>8</sup>). This is also used of the thunder (Job 37<sup>4</sup>). **2.**  $pai n\bar{n}ham$ , the savage yell with which he lays hold of his victim (Is 5<sup>27</sup>). •  $\chi_{i} = \frac{1}{2} \frac{1$ express the braying of asses and the gurgling of camels.

There are six words employed to denote the

attitudes and novements of the lion. 1.  $r_2 r_a baz$ = Arab. rabad, signifies to crouch (Ezk 19<sup>2</sup>), awaiting his victim. So sin is represented as lying ( $r_2$ ) at the door, *i.e. crouching* (as in RV) as a wild beast, ready to spring (Gn 4<sup>7</sup>). 2.3.4. In Job 38<sup>40</sup> it is said sing for for  $r_2$ ,  $r_2$ ,  $r_3$ ,  $r_4$ The three roots  $r_2 r_3 shabab, and <math>r_2$ ,  $r_3$ ,  $r_4$ and  $r_2$  is a single the second the splush 'arab, may all indicate the same act, the ambush of a beast of prey. But as *wathab*, which is the Arab. cognate of *yäshab*, means to *spring*, as well as to *crouch* or *sit*, perhaps the passage may refer to a habit of the lion, which is to *crouch*, then to spring, and, if he fails to reach his prey by one or two bounds, to crouch again. Yashohd would express the lying in covert, yeshebu the spring, and 'areb the disappointed crouch, awaiting another which a vector of supported crotter, awating above victim. **6.**  $b_{77}$  ramas expresses the proving (lit. *crceping* : see CREEPING THINGS) of wild beasts in search of their prey (Ps 104<sup>20</sup>). **6.** pn zinnēk expresses the fatal leap by which the lion bears down his victim (Dt 33<sup>22</sup> only). G. E. POST.

LIP (1997, xeilos). — In addition to its literal sense, the word new means 'language' (Gn 11<sup>1</sup>, Ps 81<sup>5</sup>), 'bank,' 'shore,' 'edge,' 'side,' etc. (Gn 41<sup>3</sup>, Ex 2<sup>3</sup> 14<sup>30</sup> etc.). In the Bible, the 'opening of the line,' is constantly need on the set the lips' is so constantly used as the equivalent of speech that the lips come to be regarded as an or speech that the lips come to be regarded as an originating independent centre of life and conduct. Thus we have the 'lip of truth' Pr 12<sup>19</sup>, 'lying lips' Ps 31<sup>18</sup>, 'burning lips' Pr 26<sup>33</sup>; and this figurative use of 'lips' is associated with other tigures belonging to ceremonial and sacrifices, such as 'uncircuncised lips' Ex 6<sup>12, 20</sup>, 'unclean lips' Is 6<sup>5</sup>, 'calves of the lips' Hos 14<sup>2</sup>. For 'fruit of the lips' are FRUIT the lips' see FRUIT.

Orientalisms. - In the intolerable and incurable worrow referred to in Ezk  $24^{17}$ . 22, the lips are not to be covered as in the time of ordinary bereave-ment. The word  $tr^4$  (jps' here means the mous-tache and beard, that is, the lower part of the face. It is still the Oriental custom in the house of mourning for the bereaved father or husband to put the hand or part of the head-dress or cloak over the mouth, to indicate that he is stricken of (iod, and has not a word to say.\* Also after telling about some hard experience of sickness and privation in the family, often brought on by dirt and indolence, it is customary to lay the hand

on the mouth and look up, as much as to say, 'God's will be done' (cf. Ps 397, Is 47<sup>3</sup>, Mic 3<sup>7</sup>). 'Grace is poured *into thy lips*' (Ps 45<sup>3</sup>). This is illustrated by the Oriental way of drinking water from the mouth or short spout of the handjar without touching it with the lips. The head is thrown back, and the jar held from 6 in. to a foot above the face, while the water is poured gently into the open mouth and swallowed in a continuous stream.

'This people with their lips do honour me' (Is 29<sup>13</sup>, Mt 15<sup>5</sup>). In addition to the ordinary meaning of empty words, there may be a reference to the Jewish custom of putting the tassel of the the law is accepted, not merely as a duty of obedience, but as an enthusiastic preference of the heart. Putting the hand to the lips was also an act in astral worship  $(Job 31^{27})$ , and is seen in the ordinary form of Oriental salutations.

G. M. MACKIE. LIST.—To 'list' (from Anglo-Sax. *lust* = pleasure) as Piers Plowman, 165—'With posternes in prystie to passen when hem liste'; so Mt 20<sup>16</sup> Tind, 'Ys it not lawfull for me to do as me listeth with myne

\* Schwally (Leben nach dem Tods, p. 16) thinks that the covering of the beard in mourning was originally a milder substitute for cutting it off.

awne?' and Tind. Works, i. 106, ' For where riches are, there goeth it after the common proverb, He that hath money hath what him listeth.' The word is used once in AV as tr. of  $\beta_{0i}\lambda_{0j}a_{ij}$  (Ja 3<sup>4</sup>), and thrice of  $\theta \ell \lambda \omega$  (Mt 17<sup>13</sup>, Mk 9<sup>13</sup>, Jn 3<sup>8</sup>), always personally. Cf. Fuller, *Holy State*, 'The Good Wife,' 'Her children, though many in number, are where, here the structure is the structure in the structure is the she listeth'; and Knox, *Hist.* 374, 'You forget your selfe (said one) you are not in the Pulpit. I am in the place (said the other) where I am commanded in my conscience to speake the truth : and therefore the truth I speak, impugne it who so lists.' The subst. was also in common use till later than 1611. North, *Plutarch*, p. 876 ('Cicero'), has 'He would ever be fleering and gibing at those that tooke Pompeys part, though he had no list himselfe to be merrie'; and often in Bunyan, as HW, p. 154, 'for your Cordial I have no list thereto.' The word still survives in listless. J. HASTINGS.

LITTER (גע Nu 73, pl. געיס Is 6620 [all]).\*-This was probably a wooden construction resem-bling a small ambulance waggon, having, instead of wheels, two shafts projecting at each end, be-tween which a mule was yoked before and behind. The frame was furnished with a mattress and pillows, and four posts at the corners supported an awning with a movable screen around the sides, for protection against the sun and dust. Solomon's chariot (RV 'palanquin'), Ca  $3^{u}$  (*ppiryön*, perhaps the Gr.  $\phi opciov$ ; see Driver,  $LOT^{u}$  449), would be of the same form, but with silver pillars supporting the awning of silk or fine linen. The Arabs use a word of Persian origin, takht-rawan, meaning a movable bed or couch for the journey. See HORSE-LITTER.

G. M. MACKIE. G. M. MACKIE. LIVELY.—1. The mod. meaning full of life, brisk, is found in Ex 1<sup>19</sup>, Ps 38<sup>19</sup>, Wis 7<sup>24</sup>. Cf. Adams on 2 P 1<sup>4</sup> 'Paul calls it [sin] an old man —Put off the old man, Eph 4<sup>22</sup>—above 5000 years old, and yet it is not only alive, but lively and lusty to this day'; and Ikhem. NT, p. 215, 'Ter-tullian also reporteth, that at Rome being cast into a barrel of hote boiling oile he came forth more pure and fresher on livelier, then he went more pure and fresher or livelier, then he went in.' 2. But 'lively' once was a synonym for 'liv-ing.' In 1 P 24 Christ is described as 'a living stone,' and in the next verse the translators of AV speak of Christians as 'lively stones,' the Gr. being the same, carrying out their rule to introduce being the same, carrying out their rule to introduce variety into the language. The occurrences of 'lively' = living in AV arc Ac 7<sup>36</sup> 'the lively oracles,' 1 P 1<sup>3</sup> 'a lively hope,' 2<sup>5</sup> 'lively stones.' The Greek is always the pres. ptcp. of  $fd\omega$  to live, and RV gives always 'living.' Cf. Ja 1<sup>26</sup> Gen. (1557), 'he is like unto a man, that beholdeth his lyvely face in a glasse' (changed in 15.0 to 'his natural face'); He 4<sup>12</sup> Rhem. 'The word of God is lively and forc ible, and more persing than any two-edged sword'; XXXIX Articles, 1571, Art. xii. 'Albeit that good workes, which are the fruites of fayth, and folowe after justification, can not put away our sinnes, and endure the severitie of God's judgement : yet are they pleasing and acceptable to God in Christe, and do spring out necessarily of a true and lively fayth, in so muche that by them, a lively fayth may be as evidently knowen, as a tree discerned by the fruit.' So Knox speaks of Christ as 'the

• The etymology of the word 23, which is found also in the \* The etymology of the word 2%, which is found also in the Targ., is uncertain. Six 2% m<sup>3</sup>/<sub>2</sub> (EV 'covered waggons') formed part of the offering of the 'princes' (Nu 17). 2% are named as one of the means of conveyance by which the dispersed Israelites are to be brought back (18 6620). In the first passage LXX has due for hear number, Vulg. in lecticis. In the second, LXX is has due for hear of the critics. Kautzsch translates in Nu by überdeckte Wagen (Siegtfried-Stade, Kutsch wagen), and in Is by Sünfte (so also Siegtfried-Stade). LIVER

lively bread' (Works, iii. 73, 266), and as 'the fountain of lively water' (iii. 441). Still more clearly, Judgement of Synode at Dort, p. 38, 'as for the will, hee infuseth new qualities into it, and maketh it of a dead heart lively, and of an evill good, of a nilling willing, of a stubborne buxome.' Fuller has a surprising example in Holy Warre, iii. 19—' About the year 1160, Peter Waldo, a merchant of Lyons, rich in substance and learning (for a lay man), was walking and talking with his friends, when one of them suddenly fell down dead, which lively spectacle of man's mortality so impressed the soul of this Waldo, that instantly he resolved on a strict reformation of his life.'

J. HASTINGS.

LIVER (723 kābēd, prob. 'the heavy organ of the body par excellence,' see Gesenius, Thes. s.v.; LXX  $\bar{\eta}\pi ap).-1$ . In the case of every animal offered in sacrifice a special sacredness attached to certain fatty parts of the viscera, among which we find, in eleven passages of the Priests' Code, 'the yothereth ( $\eta\gamma\eta\eta$ ', EV 'caul') of ( $\gamma\gamma$ ) the liver' or 'which is upon (by) the liver' (Ex 29<sup>13.23</sup>, LV 3<sup>4.10</sup>.13 4<sup>9</sup> etc.). The evident sense of the words prevents us from following the LXX and Josephus (Ant. III. ix. 2 [ed. Niese, 228],  $\sigma \partial \nu \tau \hat{\varphi} \lambda \alpha \beta \hat{\varphi} \tau \sigma \hat{\eta} \pi a \tau \sigma \hat{\eta}$  in regarding the yothereth as one of the lobes of the liver itself. Etymologically the word denotes 'that which remains over,' 'excess,' hence excrescence or appendage (cf. Kautzsch-Socin's rendering Anhangset). It most probably, therefore, is the technical name for 'the fatty mass at the opening of the liver, which reaches to the kidneys and becomes visible upon the removal of the 'ilesser omentum" or membrane extending from the fissures of the liver to the curve of the stomach' (Driver and White's Leviticus, p. 65, in Haupt's 'Polychrome Bible'; see also illustr. facing p. 4, and cf. the visceral fat is to be explained by the fact that the liver and kidneys, with the fat surrounding them, were regarded by the Semitic races as being, with the blood, the seat of life (for fuller exposition and reff. see art. KIDNEYS, and W. R. Smith, RS' 379 f.). Hence to have an arrow pierce the liver (Pr 7<sup>29</sup>) or the reins (Job 16<sup>13</sup>)</sup>, is to receive one's death-wound.

2. Like the kidneys, the liver was also regarded as an important seat of emotion (cf. Assyr. *kabitu*, 'liver,' disposition,' 'feeling.' Muss-Arnolt, Assyr. Dict.). Hence a Hebrew poet could thus express the bitterness of his sorrow: 'Mine eyes do fail with tears, my bowels are troubled, my liver ('קבר'') is poured upon the earth ; for the destruction of the daughter of my people' (La  $2^{11}$ ).

3. The prophet Ezekiel represents Nebuchadnezzar as standing 'at the parting of the ways' that led to Jerusalem and to 'Rabbah of the children of Ammon,' and having recourse to three forms of divination : 'He shook the arrows to and fro (so RV improving on AV), he consulted the teraphim, he looked in the liver' (Ezk  $21^{21}$  (Heb. 20), + The last-named, the inspection of the liver of the sacrificial victims, was a mode of divination much affected by the Chaldæan seers—by whom a com-

\* But the Gr. and Syr. Versions read לבר' 'my glory'='my sonl' (cf. Ps 169 etc.). Conversely the LXX read אין די איש קנךי for יו קבר' in Gn 40<sup>6</sup>. They also make David's wife put a goat's liver (reading אין די סן קנך MT) in his bed in the incident recorded in 18 19<sup>13</sup>.

incident recorded in 1 S 1913a.! † On this passage see, further, Wellhausen, Reste Arab. *Heidentuma*, 133 f., and W. R. Smith, Journ. of Philol. xiii. 978. Wellh. maintains that there are not three forms of divination referred to, the meaning of the passage being simply that the king casts lots before the image of a god and couples with this an act of sacrifice. But why the special allusion to the *liver*? Cf. Bertholet and Davidson, ad loc.

#### LIVING CREATURE

plete set of rules of interpretation was drawn up (see Lenormant, La Divination, etc., chez les Chaldéens)—as also by the Greeks of the post-Homeric age (Gardner and Jevons, Manual of Greek Antiqs. p. 259) and the Etrurians, from whom the practice passed to the Romans (cf. art. DIVINATION in this Dictionary, vol. i. p. 621<sup>b</sup>). Another magical use of the liver (in this case that of a fish) is found in the well-known incident in the story of Tobit (6<sup>45</sup>. 8<sup>2</sup>).

A. R. S. KENNEDY. LIVING.—In NT  $\beta$  for means either \* (1) this present existence, when AV and RV translate by 'life,' or else (2) the means by which this present existence is sustained, when, with one exception, AV and RV translate by 'living.' Thue (1) Lk 81<sup>4</sup> 'pleasures of this life'; 1 Ti 2<sup>2</sup> 'that we may lead a quiet and peaceable life '(RV 'a tranquil and quiet life'); 2 Ti 2<sup>4</sup> 'the affairs of this life'; and 1 Jn 2<sup>16</sup> 'the pride of life' (RV 'a tranquil and quiet life'). (2) Mk 12<sup>24</sup> (11 Lk 21<sup>4</sup>) 'she of her want did cast in all that she had, even all her living'; Lk 8<sup>46</sup> 'which had spent all her living upon physicians'; 15<sup>19</sup> 'he divided unto them his living'; 15<sup>50</sup> 'which hath devoured thy living with harlots.' The exception is 1 Jn 3<sup>17</sup> 'whoso hath this world's good' (*rob βlor roî κόσμου*, RV ' the world's goods'): see GOOD, vol. ii. p. 229<sup>6</sup>. Once the subst. 'living' occurs in the Apocr., when it is the tr. of *jun*, Sir 4<sup>1</sup> 'Defraud not the poor of his living' (*rhv fabr roî πσχοῦ μh ἀπωτερήσγ*).

living' ( $\tau\mu$  ( $\omega\eta$ ,  $\sin 4^{\circ}$  Defraud hot the poor of his living' ( $\tau\mu$  ( $\omega\eta$ ,  $\tau\omega\chi\sigma0^{\circ}\mu\eta$  arostophys). For 'living' in the sense of 'livelihood' cf. Pr. Bk. Catechism, 'My duty toward my neighbour is . . . to learn and labour truly to get mine own living'; and Shaks. As You Like It, 11. iii. 33—

'What! wouldst thou have me go and beg my food, Or with a base and boisterous sword enforce A thievish living on the common road ?'

J. HASTINGS.

LIVING CREATURE.—The translation (AV and RV) of  $\eta_{ij}$  hayyah, in Ezk  $\dagger$  (chs. 1. 3. 10) and of  $f_{ij}$  or (the LXX equivalent in Ezk) in Rev (chs. 4. 5. 6. 7. 14. 15. 19) according to RV (AV 'beast'). Hayyah is in LXX most commonly rendered by  $\theta\eta\rho i\sigma$ , with emphasis on the wild or the bestial ; when it is rendered by  $f_{ij}\phi\sigma$  (never in LXX used of man) the emphasis is on life, but not reasoning life, see  $d\lambda \sigma \gamma a$ , Wis 11<sup>16</sup> : it is thus, like animal, contrasted with man. In NT the same distinctions obtain : Rev 6<sup>8</sup> 'to kill ... by means of the beasts' ( $\theta\eta\rho i\sigma r$ ); 13<sup>1</sup> 'the beast' ( $\theta\eta\rho i\sigma r$ ); He 13<sup>11</sup> the sacrificial  $f_{ij}a$ , and 2 P 2<sup>12</sup> (Jude <sup>10</sup>)  $\tau^{d} d\lambda \sigma \gamma a f_{ij}a$ , the unreasoning living creatures.

The hayyah of Ezk and the two of Rev are of that composite creature form known as cherubic (Ezk 10<sup>-9</sup>), partly human, partly animal, and always with wings. (See the representations of cherubic forms in Riehm's Handwörterbuch, i. 267, including a hypothetical construction of the Ezekiel cherub-chariot; see also the figures given at the end of the article 'Cherubim' in Kitto's Biblical Cyclopædia). Such forms were 'deeply rooted in ancient religious symbolism,' and belong to the 'common cycle of Oriental tradition.' They were conceived as symbols of the divine attributes rather than as representations of actual beings. The idea seems to have been a combination of the intellect of man with the physical force and alertness of the animal for the purpose of bearing up or attending upon deity or guarding what was sacred. (See CHERUBIM). The winged humanheaded bulls of the Assyrian monuments may be regarded as the staple of these composite formations; but, whether or not the 'apparent correspondences in non-Semitic mythologies are perhaps

\* Omitting with edd. 1 P 43.

f On 'living creature' as the trn of nin will etc., see as a. CREATURE, ad init.

# LIVING CREATURE

deceptive' (Cheyne), it is difficult to class in an entirely different category the sphinxes of Egypt and of Greece and the gryphons of Teutonic fable.

While the representations of the nature and functions of the 'living creatures' in Ezk and Rev are closely allied, there are marked differ-ences. In Ezk the four creatures have each four heads, looking four different ways, the face of a man being in front, and the faces of animals on the three remaining sides: in Rev three creatures out of the four are like animals, and only one has the face of a man (47). In both (whether  $\mu 5\sigma\chi\sigma\sigma$ must be a calf or may be an ox) the animals are the same, and in both therefore we have the intelligence of the man, the sovereignty of the lion, the strength of the ox, and the swiftness of the eagle. (Cf. Schultz, OT Theology, ii. 236). In Ezk each has four wings, in Rev six wings. In Ezk 1 the wheel accompanying each creature and containing its spirit has its felloes full of eyes (1<sup>18</sup>): in Rev the creatures themselves are full of eyes (as apparently in Ezk 1012, where the wheels and the bodies are confused). In Ezk their function is that of unitedly bearing in one direction or another the firmament and, above that, the throne, with the manifestation of Jebovah upon it: in Rev the throne is im-movable, and the function of the four living creatures is that of choregi leading and concluding the various portions of the unceasing hymn of adoration  $(4^{0} 5^{y} \cdot 1^{4})$ ; their position being somewhat eniguation ( $4^{-5}$ ); then position being somewhat eniguatically described as  $\epsilon r \mu \epsilon \sigma \varphi \tau \sigma \vartheta$   $\theta \rho b \sigma \sigma \kappa a$  $s \psi \kappa \lambda \varphi \tau \sigma \vartheta \rho \rho \sigma \sigma \upsilon (<math>4^{-6}$ ), 'in the midst of the throne and around the throne,' the first part of which may possibly mean that they supported the throne on each of its sides, or may be some original confusion or early corruption due to the retention or insertion of the simple ral  $\epsilon_{\mathbf{r}} \tau \hat{\varphi} \ \mu \epsilon \sigma \varphi$  of Ezk 1<sup>5</sup>.

The symbolic, imaginary, and variable (cf. Ezk 41<sup>10</sup> troo faces) figures of Ezk became, by easy transference, before the date of the Book of Enoch, simply an order of angels, as did the wheels likewise. In that book we read (61<sup>10</sup>) of the 'host of God, the Cherubim, Seraphim (perhaps=princes), and Ophanim (wheels), and all the angels of power,' etc. At ch. 40 we are introduced to 'four presences' (*i.e.* four angels of the Presence), different from (*i.e.* higher than) those that sleep not (*i.e.* those that unceasingly bless the Lord of spirits: He filleth the earth with spirits') and these four presences, 'angels of the Lord of spirits,' are Michael, the merciful; Raphael, the healer; Gabriel, the mighty; and Phanuel, the spirit of repentance and hope : these 'gave glory before the Lord of glory.' The function of the seraphs, each with six wings, in Is 6<sup>3</sup>, is similar: 'One cried to another, Holy, Holy, Holy is the Lord of Hosts: the whole earth is full of his glory.'

We can now see the syncretic character of the nature and functions of the 'living creatures' in Rev. We can see how the composite, symbolic creature-forms of the throne-bearers in Ezk—of which storm and lightning clouds had probably been the prototype—had been assimilated in nature and in function to the scraphs of Isaiah, and to the four angelic 'presences' and 'voices' of Enoch, and had thus finally taken up their position as the highest angels, standing immediately before the throne, and leading the heavenly choir. And so we can understand how, in the later Psalms, He who is said to be 'enthroned upon the cherubim' (Ps 80<sup>1</sup> 99<sup>1</sup>) can also be spoken of (22<sup>3</sup>) as 'enthroned upon the praises of Israel.' If we take note of the diversifications in the symbol as displayed in the history of its use (even by one and the same writer), we shall not be hasty to define rigidly the ideas its several attributes

voi.. 111.-9

LO-AMMI

embody. The notion that the living creatures in Rev  $4^{\rm eff}$  represent 'the quintessence of creation' will scarcely be maintained in face of the fact that in  $5^{13}$  creation is viewed as something quite distinct from them. But if we regard them as standing for the noblest of God's creatures, the most honoured and efficient of His servants, the most devoit and constant of His worshippers, then the numerical symbol of all pervasiveness, the human and animal symbols of intelligence, of sovereignty, of strength, and of swiftness, the eyes-symbol of ubiquitous watchfulness and penetration, and the sanctus-symbol of unceasing praise and adoration, will all readily and easily fall into their proper place. For early Christian interpretations see Zahn, *Forsch.* ii. 257 ff.; Swete, *St. Mark*, xxxi ff. J. MASSIE.

LIZARD (τους) *lötü'āh*, καλαβώτης, stellio). — The word *lizard* occurs but once in AV (Lv 11<sup>30</sup>). It is one of the following six names of unclean animals (Lv 11<sup>20, 30</sup>), which we give with their Heb. originals and AV and RV equivalents :—

גב 1.	zab	AV tortoise	RV great lizard.	See	CHANELEON.
2. 70.8	'ăná <b>káh</b>	ferret	gecko.	,,	GRCKO.
8. FD	kōảh	chameleon	land crocodile.	,,	CHAMBLEON.
לְמָאָה .4	láta'āh	lizard	lizard.		
חרכם .5	<u>h</u> õmet	snail	sand lizard.	**	SNAIL.
ק שרת 6	tinshemeth	mole	chameleon.	.,	CHAMBLEON.

It will be seen from this list that the RV regards all these creatures as lizards. In our opinion, 1, 3, 4 are pretty certainly *lizards*, 2 probably so, 5 dubious, and 6 perhaps the *mole-rat*, but possibly the *chameleon*. RVm says of 2, 3, 4, 5, 'words of uncertain meaning, but probably denoting four kinds of lizards.' What species of lizard is intended by *létá'āh* we have no means of determining. The commonest species are *Lacerta wiridis*, L., the green lizard; *Lacerta agilis*, L., the sand lizard (RV equivalent of AV snail, Heb. homet); Zootica muralis, Laur.; Ophiops elegans, Menetr.; Gongylus ocellatus, Forsk.

becutatus, rorsk. In Pr 30<sup>29</sup>, where AV has 'the spider taketh hold with her hands,' RV gives 'the lizard taketh,' etc., RVm 'the lizard thou canst seize with thy hands.' The Heb. word is roppy. The trach 'is supported by the LXX  $\kappa a\lambda \beta \delta \sigma \tau \eta s$ , Vulg. stellio, and is adopted by Reuss, Kamphausen, etc., although Delitzsch and some others still defend 'spider.' See further, Bochart, *Hieroz.* ii. 1084. G. E. POST.

LOAF.-See BREAD, vol. i. p. 318<sup>a</sup>.

LO-AMMI ( $\forall_{2}TW^{3}$  'not my people,' LXX of  $\lambda abs$   $\mu ov$ ).—The second son and third child of Gomer, the wife of the prophet Hosea. Whether or not we infer from Hos 1<sup>24</sup> that Lo-ammi was the offspring of an unlawful union, he was recognized by Hosea as his child, and from him received his name. He was born three or four years after his sister Lo-ruhamah, as we may infer from the reference to the weaning of the latter (Hos 1<sup>8</sup>), and the fact that weaning took place at two or three years from birth (2 Mac 7<sup>27</sup>, cf. Gn 21<sup>8</sup>, 18 1<sup>29</sup>). 'The detail is of importance against the purely allegorical interpretation of the chapter, since it is to the point only in a narrative of fact. The *name* is symbolical, embodying Hosea's conviction that Israel had forfeited its claim to J"s protection: 'call his name Lo-ammi; for ye (the Israelites) are lo-ammi' (i.e. 'not my people,' cf. Hos 1<sup>11</sup> RV), Hos 1<sup>9</sup>. For symbolical names given to other actual children, cf. MAHER-SHALAL-HASH-BAZ, SHEAE-JASHUB. Nothing further is known of the person Lo-ammi. The name occurs again in Hos 2<sup>29</sup> [Heb.<sup>29</sup>] RVm, and also in the Hebrew in LOAN

2<sup>1</sup> [Eng. 1<sup>10</sup>]; but in both these cases the name or phrase refers to the people of Israel. Thus 2<sup>1</sup> [Eng. 1<sup>10</sup>] may be translated, 'And instead of that which was said to them, Ye are Lo-ammi (i.e. 'not my people'), it shall be said unto them (ye are) sons of the living God'; and similarly  $2^{25}$  [Eng.  $2^{23}$ ] 'And I will say unto Lo-ammi, Thou art Ammi (*i.e.* 'my people').' Both these passages in which the name of Hosea's son is actually applied to the people of Israel have been regarded by certain writers as later additions to the Bk. of Hosea; on  $1^{10}-2^1$  [Heb.  $2^{1-3}$ ] cf. Wellh., Nowack, *ad loc.*, and Cheyne in W. R. Smith's *Prophets*<sup>2</sup>, p. xviii; and on  $2^{10-23}$  [Heb.  $2^{20-23}$ ] Nowack, *ad loc.* Zec 13<sup>9</sup> is an interesting and suggestive parallel passage.

G. B. GRAY. LOAN.-See DEBT, vol. i. p. 579.

LOCK .- See KEY, vol. ii. p. 836.

LOCUST. — The following words in the Heb. refer to various species of the Orthoptera, viz.:--1. ארקד, arbch. This is usually the generic name

1. אַרְבָּה arbeh. This is usually the generic name for locusts, and the one most frequently used in the OT (Ex  $10^{+15}$  etc.). It is probably derived from 777 rabah, signifying to multiply, and is highly descriptive of the fecundity of these insects. It is limited by the description (Lv  $11^{21}$ ), which makes it one of the 'flying creeping things that go upon all four, which have legs above their feet, to leap withal upon the earth.' It shares these characteristics with the  $c_2\gamma_0$  sol'am, bald locust,  $\gamma_{2\gamma_0}$  hargol, AV beetle (impossible, as the beetle does not leap; it may be, as in RV, 'cricket'), and  $c_{2\gamma_0}$  hagdab, grasshopper. In four places only AV tr. it 'grasshopper' (Jg 6<sup>5</sup> 7<sup>12</sup>, Job 39<sup>30</sup>, Jer 46<sup>33</sup>). In all these RV has 'locust.' Wherever 'arbeh is used, reference is made either to its numbers or its destructiveness. It is evident that the word refers to the migratory species, which are such a terrible plague in the East. The two which do the greatest damage are *(Edipoda migratoria and Acridium pergrinum. These species are endemic in the deserts south-east and south of Palestine, and at irregular intervals spread northward and eastward.* 

2. ος'g sol'am, άττάκηs, attacus (Lv 1122). This is one of the edible leapers defined in the previous verse. The obsolete root signifies to svallow or devour. The Talmud, which is the authority for the EV bald locust, says that it has a smooth head. Tristram suggests the species of *Truxalis*, which are common in Palestine.

**8.** סדול hargôl, perhaps 'galloper,' δφιομάχη, ophio-machus (Lv 11<sup>22</sup>), tr. AV 'beetle' [quite inedible], RV 'cricket,' is another of the edible species, distinguishable from the others in the list. But, as

tinguishable from the others in the list. But, as there is no hint of the qualities of this kind, we must be content to confess our ignorance. The LXX guess of a serpent killer has no foundation. **4.**  $_{2y}hdgdb$ , perh. 'concealer (sc. of the sun),' dxpls, locusta. It is evidently one of the devouring species, and is tr. in one place AV and RV 'locust' (2 Ch 7<sup>13</sup>), while in the others (Lv 11<sup>22</sup>, Nu 13<sup>23</sup>, Ec 12<sup>5</sup>. Is 40<sup>22</sup>) it is translated 'grasshopper.' What  $12^5$ , Is  $40^{22}$ ) it is translated 'grasshopper.' What species it is we have no means of knowing. Its occurrence in the list with arbeh, sol am, and hargûl makes it sure that it was known to the Israelites, and distinguishable from the other edible insects mentioned.

**5.**  $s_{7}$  (pausal form)  $z^{2}ldzal$  (Dt 28<sup>42</sup>), is tr. by the LXX  $\epsilon\rho\nu\sigma i\beta\eta$ , and Vulg. rubigo = blight or nuldew. But it is much more probable that this is a word referring to the whizzing, whirring, or rushing of the wings of the locusts (cf. Is 18<sup>1</sup>), or

the stridulation (of legs against sheath of wing). **6.** [22] gêb, only in pl. [23] (Is 334); gôbai (Am 7<sup>1</sup>, AV 'grasshoppers,' m. 'green worms,' RV

# LOCUST

'locusts'); *gób, sig góbai* (Nah 3<sup>17</sup>), AV 'great grasshoppers,' RV 'swarms of grasshoppers.' The LXX tr. all these drot. Some have supposed (see LXX tr. all these  $d\kappa\rho ts$ . Some have supposed (see Driver on Am  $7^1$ ) this word to refer to the larval state

Driver on Am 7<sup>1</sup>) this word to refer to the larval state of the locust, but there is no certain proof of it. 7. By  $q\bar{a}z\bar{a}m$ , 'lopper' or 'shearer.' The two lists of four devourers (JI 1<sup>4</sup> 2<sup>36</sup>) have perplexed commentators. 'Arbek, which is second in the first list and first in the second, is, as seen above, the most generic name for locust. In the first list it is said that that which the  $g\bar{a}z\bar{a}m$ , 'palmerworm,' hath left hath the 'arbek, 'locust,' eaten; that which the arbek hath left hath the which construction of the which the which the yelek, 'cankerworm,' eaten : and that which the yelek hath left hath the  $h\bar{d}sil$ , 'caterpillar,' eaten. In the second list it is said, 'I will restore to you the years which the 'arbeh hath eaten, the yelek, and the hāşil, and the gāzām.' This dis-crepancy in the order in lists found in successive passages of the same author, creates an insuperable difficulty in determining with certainty the destroyers intended. The attempt to identify them as successive steps in the development of the

them as successive steps in the development of the locust is defeated by the want of accord between the two passages. (See PALMERWORM). **8.**  $p_{2}^{b_{2}}$  yelek, prob. 'lopper,' dxpis,  $\beta po\hat{x} cos$ , bruchus, cankerworm, caterpillar. The expression (Nali 3<sup>15.16</sup>), 'the sword shall devour thee like the yelek'; make thyself many as the yelek'; make thyself many as the 'arbeh . . . the yelek' spoileth (m. spreadeth himself) and flieth away,' has been supposed to imply that the yelek is the larval stage of the locust up to the time of the evolution of its supposed to imply that the yelek is the larval stage of the locust up to the time of the evolution of its wings. But as it is said that the yelek flies away, the passage is not decisive. The yelek flies away, the passage is not decisive. The yelek is spoken of as coming after the 'arbeh (Ps 105<sup>24</sup>), before and after (J1 1<sup>4</sup> 2<sup>3</sup>). In the passage in Ps, AV has 'caterpillar,' RV 'cankerworm.' In Joel both VSS have 'cankerworm.' In Jer 51<sup>14, 37</sup> AV has 'caterpillars,' RV 'cankerworm.' In the latter verse the creature is said to be 'rough.'

9. For  $h\bar{a}_{sil}$ , 'finisher,' dxpis,  $\beta_{po}\hat{v}_{Xos}$ ,  $\epsilon_{posl}\beta_{\eta}$ , rubigo, ærugo, caterpillar. This discrepancy of tr. in the VSS makes the meaning of this word uncertain. It occurs after 'arbeh (1 K 8<sup>37</sup>, 2 Ch 6<sup>28</sup>), before it (Ps 78<sup>46</sup>, Is 33<sup>4</sup>), after yelek (Jl 1<sup>4</sup> 2<sup>20</sup>). In all the passages the context seems to point to the destroying locust in some of its forms.

The destructiveness of locusts is often referred to army (J12<sup>2-9</sup>). They are perhaps the most terrible of all the scourges of Bible lands. Their swarms fill the air, darkening the sky, and the noise of their wings resembles the pattering of a heavy rain. They fly with great rapidity, and towards nightfall they light wherever they may happen to be; and such are their numbers that they often break the branches of the trees to which they cling. The flying locust eats comparatively little, but will not disdain any green thing that may be in his way. But as the swarm invariably resumes its flight as soon as the sun has warmed it a little (Nah 317), and does not return, it has not time to destroy all the vegetation. Often a swarm comes and goes away without having done much harm. But such of the females as are ready to lay their eggs begin as soon as they alight to moisten the spot of earth with a secretion from their tails, and excavate in the softened soil holes in which they deposit the ovisac, which often contains as many as a hundred The next morning the swarm flies away, eggs. eggs. The next morning the swarm mes away, and at night other females deposit their eggs at their new resting-places. It is the larve of these eggs which work the devastation which makes the locust so great a scourge. When a swarm of locusts appears, the first care of the owners of lands and gardens is to prevent them from alight-ing on their grounds. For this purpose they beat

# LOD, LYDDA

pans, and shout, and fire guns, and make all manner of noise. The locusts, which are easily manner of noise. The locusts, which are easily frightened, may thus be compelled to seek another resting-place. But finally the vast swarm alights. The people then pour out into the fields and gardens, and catch as many as possible, and place them in sacks, in which they are either pounded to death or drowned. The same hunt is repeated the next morning, before the sum is up, while the locusts, chilled by the night air, and weighted with the dew, are still unable to fly (Nah 3<sup>17</sup>). As soon as they are gone the search for their eggs begins. The government either enforces a per capita contribution of these eggs, or offers a price for them by weight. With all the exertions of many hundreds of persons, however, vast numbers of the eggs escape their search, and in about fifteen to twenty days hatch out. The black larve now spread like a pall over the land, eating every green thing, even stripping the bark off the trees. As they cannot fly, they convert the district around which they were hatched into a desert, until, after a month to forty days, their wings are grown, and they fly away to begin in other places their round of devastation. The Arab. name for them is jerad, from a root signifying to strip. The march of these destroyers is arrested in various ways. The people dig trenches in their pathway, and, when these are full of the creatures, turn back the earth and bury them, or turn water into the trenches and drown them. They often kindle fires in their pathway, and drive them into the flames. Besides the damage done by locusts in their various stages of development in devouring vegetation, they choke the wells and streams, which are often filled by their innumerable carcases, and so defiled that their waters are no longer drinkable. When driven by strong winds into the sea or rivers, their bodies are piled in prodigious heaps along the shore or bank, and breed pestilence by their intolerable effluvia.

Locusts are unable to fly against the wind. Their wings become entangled, and they are 'tossed up and down' (Ps  $109^{23}$ ), and fall to the ground. They are certainly used as food, and were doubt-less part of the diet of John the Baptist (Mt 3<sup>4</sup>). The writer has seen them toasted and enten. The Arabs stew them with clarified butter, after tearing off the head, legs, and wings. They are said to be dried and ground to meal in some places.

Locusts are mentioned once in the NT (Rev 93-11) as monsters, in the likeness of war horses, with hair like women, teeth like lions, breastplates like iron, tails with stings like scorpions, their king

being A baddon or A pollyon, the angel of the abyss. See on the whole subject of this article the elaborate 'Excursus on Locusts' in Driver's Joel and Amos, 82 ff., and the literature there cited.

G. E. Post.

**LOD, LYDDA** ( $\frac{1}{7}$ ; LXX  $\Lambda\delta\delta$  in 1 Ch  $8^{12}$  [A; B om.], Ezr  $2^{25}$ , Neh  $7^{37}$ ;  $\Lambda\delta\delta\deltaa$  in Neh  $11^{35}$  [ABR\* om.], 1 Mac 11<sup>24</sup>; NT  $\Lambda\delta\delta\deltaa$ ) is identified as the Arabic *Ludd*, a village in the plain of Sharon about 10 miles S.E. of Joppa on the way to Jerusalem. From a distance its appearance is pleasant and picturesque, occupying a fertile hollow in the great undulating plain, surrounded by gardens of olive and various fruit trees, and situated near a valley that leads into the river 'Aujeh. The village itself is very dilapidated, a haunt of dirt diseases, the effect of modern squalor being inten-sified by the presence of noble ruins testifying to former prosperity. 1. Bible references.—Lod is alluded to in 1 Ch 8<sup>12</sup>

as having been built along with One by Shemed of the tribe of Benjamin. The inhabitants of these villages shared in the tribulations of the Babylonian captivity, and a considerable number

of them returned under Zerubbabel, Ezra, and Nehemiah (Ezr 2<sup>33</sup>, Neh 7<sup>37</sup> 11<sup>35</sup>). The most interesting allusion to Lydda is in the NT, where it is recorded that St. Poter visited the saints there, and healed Æneas, and when there recoived the uncert recover to Lydda. there received the urgent request to go to Joppa on behalf of Dorcas (Ac  $9^{32-38}$ ).

2. General history.-Besides being close to the road from Joppa leading eastward to Jerusalem, Lydda was also on the great caravan route be-tween Babylon and Egypt. Camels laden with rich merchandise from Baghdad, Aleppo, Damascus, and the region beyond Galilee, and protected by armed attendants, were constantly defiling through Shechem, resting at Lydda and Ono, and defiling passing on through Gaza to Egypt. Joseph would be taken by the Ishnaelites along this route. The manufacture and repair of such requisites for the journey as sacks, saddles, and strappings, would create the skilled labour in cloth, leather, wood, and metal that made the neighbouring Ono 'the valley of craftsmen' (Neh 11<sup>30</sup>). During the Jawish wars of independence, the frequent sieges, change of ownership, and general lawlessness of Jaffa would encourage the transit of goods by land until, under more settled government, commerce naturally chose the cheaper mode of conveyance by sea. In this way, by a peaceful necessity of trade, apart from the devastations of war, Lydda, like Aleppo and other towns of the caravan route, fell into insignificance and silent decay.

3. Non-biblical references.—Lydda is mentioned by Josephus as one of the eleven toparchies or chief sections of the kingdom of Judæa over which Jerusalem presided (BJ III. iii. 5). Along with Aphærems and Ramathaim it was taken from Apherema and ramathaim it was taken from Samaria and restored to Jerusalem by Demetrius Nikator, B.C. 152 (1 Mac  $10^{30} 11^{34}$ ; Jos. Ant. XIII. iv. 9). Its inhabitants were wantonly sold into slavery by Cassius, and restored to freedom by Antony (Jos. Ant. XIV. xi. 2, xii. 2-5). Cestius Gallus, who inflicted such loss upon Joppa, also burnt Lydda and killed about fifty of its inhabit-anta the mainity heing abcent attending the ants, the majority being absent attending the Feast of Tabernacles at Jerusalem (Jos. BJ II. xix. 1). Soon afterwards it was rebuilt, and was a town of considerable wealth and importance when it surrendered to Vespasian on his way to the siege of Jerusalem (Jos. *BJ* IV. viii. 1). About this period Lydda was famous as a seat of Rab-binical learning. In the early Christian centuries it was of sufficient importance to be made the seat of a bishop. Its bishop took part in the Council of Niczea, and, later on, Pelagius appeared before an ecclesiastical assembly there on a charge of heresy, and, amid considerable tumult, was acquitted.

quitted. Lydda and St. George. — The celebrated St. George, called by the Moslems el-Khudr, 'the ever-green or undying,' was born at Lydda in the 3rd cent., and is said to have died there. The beautiful cathedral church of St. George was built over his reputed tomb. On account of its fortress-like appearance, it was destroyed by the Moslems when they invaded the land. After being rebuilt with much magnificence by the Crusaders, it was demolished by Saladin in 1191, after the disaster of Kurn Hattin, where a disorderly rabble, bearing the name and mission of the Cross, was annihilthe name and mission of the Cross, was annihil-ated on the reputed Mount of Beatitudes.

After so many years of conflict, the church now enjoys a truce of dilapidation, with a mosque in one end of the ruin and a Greek church in the other.

From the 2nd cent. onwards Lydda was called Diospolis, but the old name was never quite super-seded, and in the Arabic Ludd survives to the present day.

LITERATURE.—Bobinson, BRP<sup>3</sup> ii. 244-248; Guérin, Judée, 1. 322 ff.; Thomson, Land and Book, Southern Pal. 108-107; Neubauer, Géog. du Talm. 76ff.; Schürer, HJP (Index, s. 'Lydda'); Buhl, GAP 197. G. M. MACKIE.

**LODDEUS** (B Aaadaîos v.<sup>44</sup>, Aodaîos v.<sup>45</sup>, A Aod daîos; AV Saddeus, Daddeus; 1 Es 8<sup>40.46</sup> [<sup>44.46</sup> LXX]).—The 'captain in the place of the treasury' (or 'at the place Casiphia,' Ezr 8<sup>17</sup>), to whom Ezra sent, while encamped on the river Theras, for Levites to accompany him on the return. He is called IDDO in Ezr 8<sup>17</sup>. The form Acdalos appears to have arisen from repeating the ל in אלאדין לס Iddo.' H. ST. J. THACKERAY.

LO-DEBAR (in 2 S 94. <sup>5</sup> γςr, Β Λαδαβάρ, Α Λαβα-δαρί; in 17<sup>27</sup>, ΒΑ Λωδαβάρ, Luc. Λαδαβάρ). A place in Gilead, near to, and apparently east from, Mahanaim. It was the retreat of Mephibosheth till he was summoned to court by David, 2 S 9<sup>4 0</sup>. It is mentioned also upon the occasion of David's flight to the east of the Jordan, 17<sup>27</sup>. The site has not been recovered.

Wellhausen and Nowack (in their Comm. ad loc.) and Buhl (GAP 71), following Grätz, find the (followed by Driver) read and tr. 77, where EVV nought.' Lo-debar is perhaps intended in the לדְרָי of Jos 13<sup>34</sup>. See DEBIR, No. 2. J. A. SELBIE.

**LODGE.**—To lodge is in AV nearly always to spend the night, as Jos 8<sup>9</sup> 'Joshua lodged that night among the people'; Ru 1<sup>16</sup> 'where thou lodgest, I will lodge'; Job 31<sup>24</sup> 'the stranger did not lodge in the street: but I opened my doors to the traveller'; Zoph 2<sup>14</sup> 'both the cormorant and the bittern shall lodge in the upper lintels of it.' In (17 that is always the meaning. The verb is In OT that is always the meaning. The verb is some part of  $1^{4}$ , except in Jos  $2^{1}$  'And they went, and came into an harlot's house, named Rahab, and lodged there '( $\pi\gamma\gamma'$ ), RV 'and lay there'); and 4<sup>5</sup> 'the place where they lodged.' Heb.  $\beta\gamma$ , elsewhere translated 'lodging' (2 K 19<sup>33</sup>), Is 10<sup>39</sup>), 'lodging place' (Jos 4<sup>3</sup>, Jer 9<sup>2</sup>), 'inn,' with RV 'lodging place' (Gn 42<sup>37</sup> 43<sup>21</sup>, EX 4<sup>24</sup>). In Apoer. and NT we find 'lodge' as the tr. of (1)  $ai\lambda ljoua, To 6<sup>1.10</sup> 9<sup>5</sup>$ , Sir 14<sup>26</sup>, Mt 21<sup>17</sup>; (2)  $\kappa ara\lambda i\omega$ , Sir 14<sup>24</sup>.<sup>25</sup>, LK 9<sup>12</sup>; (3)  $\kappa outdojua, 1$  Mac 11<sup>6</sup>; (4)  $\kappa ara\sigma \kappa \eta \nu \delta\omega$ , Mt 13<sup>32</sup>, MK 4<sup>23</sup>, LK 13<sup>19</sup>. In all these places the meaning of 'lodge' is 'spend the night.' But we also find  $\xi \epsilon \nu j \omega$  so translated in Ac 10<sup>6</sup>.<sup>18.22.32</sup> 21<sup>18</sup> 28<sup>7</sup>, and  $\epsilon \pi i \xi \epsilon \nu j \omega$  so translated in Sir 29<sup>27</sup>, and then the meaning is, if trans., 'receive as a guest.' 'entertain,' or if intrans. 'be entertained,' 'be a guest.' Thus the only meanings that the night in a place, and (2) entertain one or be enterwent, and came into an harlot's house, named night in a place, and (2) entertain one or be enter-tained by one as a guest. For the meaning 'pass the night' see Shaks. II Henry VI. I. i. 80-

' Did he so often lodge in open field,

In winter's cold, and summer's parching heat, To conquer France, his true inheritance?'

Rom. and Jul. II. iii. 36-

' And where care lodges, sleep will never lie.' Macbeth, 11. ii. 26-

' There are two lodged together. One cried, "God bless us !" and "Amen" the other.'

And for the sense of 'entertain' or 'be enter-tained,' He  $13^2$  Tind. 'Be not forgetfull to lodge straungers'; Taming of Shrew, IV. ii. 107

'And in my house you shall be friendly lodged.'

Lodge as a subst. occurs but twice: (1) Is  $1^8$ 'And the daughter of Zion is left as a cottage in a

dwells while the crop is ripening until it is gathered in : see Wetzstein in Delitzsch's *Job*, ii. 74 f., and art. BOOTH, with illustration under CUCUMBER); (2) Jth 3<sup>3</sup> 'Behold, our houses, and all our places, and all our fields of wheat, and flocks, and herds, and all the lodges of our tents, The before thy face' (at  $\mu d\nu \delta \rho a$ ;  $\tau \omega \nu \sigma \kappa \nu \omega \nu \tau \mu \omega \nu$ ; RV 'the sheepcotes of our tents,' as AV in 2<sup>28</sup> for the same word; 'lodges' is from the Geneva Bible, which has 'lodge' also in 226

Bible, which has 'lodge' also in  $2^{\omega}$ ). **Lodging** or lodging place is found in both mean-ings belonging to the verb lodge: (1) a place to spend the night in, as Jer 9<sup>2</sup> 'Oh that I had in the wilderness a lodging place of wayfaring men' ( $\varphi^{(1)}$ ); Sir 14<sup>25</sup> 'He shall lodge in a lodging where good things are' ( $\kappa a \tau d \lambda \nu \mu a$ ); (2) a place of enter-tainment, only Ac 28<sup>23</sup> and Philen <sup>21</sup> ( $\xi e r d a$ ).

J. HASTINGS.

LOFT (from the Scand., but the same as Anglo-Saxon lyft, the sky) is used twice in AV. In 1 K 17<sup>19</sup> it means an upper room in a house, 'And he took him out of her bosom, and carried him up into a loft, where he abode, and laid him upon his own bed' ( $\pi/2\pi^{-1}$ , RV (into the chamber'). Else-where  $\pi/2$  is tr. 'chamber,' 'upper chamber,' 'par-lour,'etc. (but see Moore on Jg 3<sup>30</sup>). LXX has  $i\pi e \rho \omega \sigma r$ , arcke shalt thou sette in the syde of it : and thou shalt make it with three loftes one above an other. In Scots a 'lofted' house was a house of more than one storey. Jamieson quotes from Scott, *Waverley*, i. 298, 'Ian nan Chaistel's mansion, a high rude-looking square tower, with the addi-tion of a lofted house, that is, a building of two stories. J. HASTINGS.

LOFTINESS.—The adj. 'lofty' is used literally as in Is 57<sup>7</sup> 'upon a lofty and high mountain'; as in 18 5, ' 'upon a lofty and high mountain'; and also metaphorically when it means 'haughty,' as Is  $2^{11}$  'The lofty looks of man shall be humbled'; so the adv. which occurs only in Ps 73<sup>8</sup> 'They speak loftily' (a)720, RVm 'from on high'). Loftiness is only metaphorical, haughti-ness, Is  $2^{17}$  'the loftiness of man shall be barre' night). Lottiness is only incorporation, moved ness, is 2<sup>17</sup> 'the loftiness of man shall be bowed down' (בידי היקים), and Jer 48<sup>29</sup> 'his loftiness' (הכיו). Cf. Shaks, Love's Labour's Lost, v. i. 11-'His humour is lofty, his discourse peremptory'; Sandys, Sermons, 107, 'Another exposition is, to make this a proper mean to keep and conserve unity, rather than a way only to diminish lofti-ness and pride.' J. HASTINGS.

#### LOG.—See WEIGHTS AND MEASURES.

LOGOS (6 λ6γos) signified in classical Greek both Word (verbum, sermo, oratio) and Reason (ratio), but in biblical Greek is used only in the former but in biblical Greek is used only in the former sense, except in a few passages where it means 'account' (e.g. Mt 18<sup>23</sup>, Ro 14<sup>12</sup>, Ac 20<sup>24</sup>), and a few brief phrases in which the sense of 'reason' more plainly appears (Ac  $10^{29} \tau in \lambda \delta \gamma \varphi$ , 'for what reason';  $18^{14}$  'reason would'  $\kappa a \tau \lambda \delta \gamma \varphi$ , 'for what '3 Mac  $7^9 \pi a \rho \lambda \delta \gamma \varphi$ . By the LXX it is used to In NT it signifies a verbal utterance, then discourse, speech, instruction, narrative, and, when applied And the darghter of zion is first as a cottage in R in the transmission transmission to zion is first as a cottage in R in the transmission tra

employed by St. John to denominate the Son of God, both before and after His incarnation. This latter use gives the doctrine of the Logos which the present article is to describe.

The present article is to describe. St. John's peculiar use of Logos is found six times, namely, Gospel 1<sup>1</sup> (three times) and <sup>14</sup>, where we read simply 'the Word,' 1 Jn 1<sup>1</sup> 'the Word of life,' Rev 19<sup>13</sup> 'the Word of God.' [1 Jn 5<sup>7</sup> of TR and AV is spurions]. In Rev 19<sup>13</sup> the term is applied to the conquering Christ, since His progress is the trimm of the divergence and the progress is the triumph of the divine revelation, of which He is both agent and substance. The title naturally associates itself with the author's Logos doctrine, either exhibiting an approach to it or an applica-tion of it, according to the dates we assign to the Gospel and the Apoc.; for in the Gospel the Logos is identified with the historical Christ  $(1^{14})$ , and in the Apoc. Christ is affirmed to be the divine agent of revelation and redemption (e.g.  $1^{3.6.17}$  56  $21^{22}$   $22^{12}$ ). The reference of 1 Jn  $1^1$  to the personal Logos is disputed (e.g. Westcott, Comm.); but the verbs used, the parallelism with the pro-logue of the Gospel, and the clear reference of  $v.^2$ to the incarnation, indicate that here also Logos means the personal Word (so Haupt, Schmid, Weiss, etc.), although the subject of the Epistle is not the person of the Logos, but the life which He possesses and has manifested. It is, however, from the prologue of the Gospel that we must derive St. John's doctrine of the Logos. Yet the acrive St. John's doctrine of the Logos. Yet the prologue is illuminated by many passages of both the Gospel and the first Ep.; for, though with historical fidelity St. John does not impute to Christ his own Logos terminology, the latter was evidently meant to be supported by Christ's self-testimony which the Gospel records and the Epistle implies. Nowhere else in NT is the term Logos certainly applied to Christ. He 4<sup>12</sup> has often been so understood, while others (e.g. Köstlin been so understood, while others (c.g. Köstlin, Bleek, Delitzsch) see in it, at least, an approach to the Johannean usage ; \* but the context and adjectives used have led most commentators to refer the phrase to revelation, written or un-written. Neither should 1 P 1<sup>28</sup> nor 2 P 3<sup>5</sup> be understood of the personal Logos.

We shall first state St. John's doctrine, and then discuss the reason for his peculiar terminology.

I. ST. JOHN'S DOCTRINE is that Jesus Christ is I. ST. JOHN'S DOCTRINE is that Jesus Christ is the real incarnation of an eternally divine person (elsewhere called by him 'the only-begotten Son' of God, Jn 1<sup>14. 18</sup> 3<sup>16. 16</sup>, 1 Jn 4<sup>9</sup>; a term which declares His Sonship to be unique; in Jn 1<sup>16</sup> Tregelles and WH with much force prefer the reading 'only-begotten God'), who has ever been the medium through whom God (called  $\delta \theta \epsilon \delta r$  in antithesis to the Logos, and 'Father' in antithesis to the 'Son') has exercised His activity in relation to the finite universe. and who, as the perfect manifestation of universe, and who, as the perfect manifestation of God's nature and will, is called the Word (Logos). For  $v_{r}$ ,  $v_{r}$  of the prologue the relation of the Logos to God is stated. 'In the beginning' of all finite, temporal existence—a phrase suggested doubtless by Gn 1<sup>1</sup>—the Logos vas. He belongs, therefore, to the superfinite category of being, and is an eternal person. His existence is then more specifically defined as to both His personality and essential Deity. 'The Logos was with ( $\pi\rho\delta$ , towards) God ( $\tau\delta\sigma$  de $\delta\sigma$ ),' i.e. eternally in relation to God, and, therefore a dirict personality form is defined as therefore, a distinct personality from  $\delta$  decs, but in intimate communion with Him ( $\pi \rho \delta s$ ). 'The Logos was God ( $\theta \epsilon \delta s$ ), i.e. in His essential nature He was Deity. The formality of these condensed statements, as well as the emphatic repetition, 'the same was in the beginning with God,' forbid

<sup>6</sup> Grimm (*Clavis*: followed by Thayer, *Lex.*) gives this as a solitary instance of the use of Logos in the sense of the divine mind or reason; but for this there is neither necessity in the context nor warrant in NT usages.

the idea that they are not to be taken literally (against Beyschlag, *Bib. Theol. of NT*). In vv.<sup>3-5</sup> the activity of the Logos in relation to the universe is stated. 'All things were made (came into existence,  $\epsilon_{\gamma}\epsilon_{\nu\epsilon\tau\sigma}$ ) through him, and without him was not anything made that hath been made'; a phrase which describes the Logos as the medium of the entire creative activity of God, and which excludes, at least by implication, the notion that creation was the formation of the cosmos from existing matter.\*

'In' the Logos, moreover, 'was life,' *i.e.* He possessed the divine fulness of physical, rational, and ethical energy, with the implication that all the manifestations of life in the universe are due to His activity + (cf. Col 1<sup>17</sup>. Note here also 1 Jn Hence to men, endowed with intelligence, the life possessed by the Logos and manifested in creation was originally the illuminating truth ('the light') by which they apprehended God and duty; but when man became immersed in darktinuing to shine, was not comprehended. This divine person crowned His manifestation of God by becoming flesh, —an expression which includes the reality and totality of Christ's human nature, the identity of His personality with that of the divine Logos, and, when taken with the context, divine Logos, and, when taken with the context, the voluntariness of the incarnation, — and in the flesh manifested to His disciples, like the Shechinah in the tabernacle, His glory, such as became God's 'only-begotten One,' being 'full of grace and truth.' Attested by the Baptist (vv.<sup>6-9.16</sup>) and the apostles (vv.<sup>14.19</sup>), He surpassed the earlier revelation through Moses (vv.<sup>16.17</sup>), though after, as before, His incarnation He was rejected by the world, and even by the Jews (v.<sup>11</sup>), and was received only by the true children of God (vv.<sup>12.13</sup>). He, however, is the only, but perfect, medium through whom God is known (v.<sup>16</sup>). From this summary it appears (1) that  $\delta \lambda \delta \gamma \sigma s$  is

From this summary it appears (1) that  $\delta \lambda \delta \gamma \sigma \sigma$  is not equivalent to  $\delta \lambda \delta \gamma \omega s$ , 'he who speaks,' as if the term were used because Christ was the teacher of whom St. John wrote; nor to  $\delta \, key \delta \mu e vos,$  'the promised one'; but is a designation of the divine Son in His everlasting function of revealer of God. (2) That Logos means 'Word,' not 'Reason,' since it represents Him as the personal manifestation, not of a part of the Divine Nature, but of the whole of Deity (cf.  $14^{9.10}$ ). (3) That the purpose while of pologue was to summarily express the teaching of the gospel (see  $20^{31}$ ) by representing Jesus as the real incarnation of God (cf. 1 Jn  $5^{20.21}$ ), His spoken message (Christianity) as the expression of His inmost and eternal nature, and His historical activity in the flesh as the crown of all other manifestations of God, since these were mediated by the same divine person. For this purpose the term Word was an appropriate means of describing the Son as the perfect medium of God's self-revelation.

II. ST. JOHN'S TERMINOLOGY .- In discussing the historical origin of St. John's teaching, it is fair to distinguish between the source of the This to distinguish between the source of the doctrine and of the phraseology in which he clothed it. Writers who regard the doctrine as an offshoot of the Alexandrian philosophy (see, e.g., among more recent writers, Holtzmann, Einleit: in das N.T. p. 430, and, still more uncompromisingly, Réville, La Doct, du Logos dans le quat. Évang. et dans les œuvres de Philon) fail to do justice to the testimony of the Fourth Gospel itself, to the teaching concerning Christ's person found in earlier

Philo's phrase, λίγος δἰ iστιν εἰκῶν θεοῦ, δι' ῶ σίματας ἐ κόσμος,
 Philo's phrase, λίγος δἰ iστιν εἰκῶν θεοῦ, δι' ῶ σίματας ἐ κόσμος,
 iš nμουργιάτος (de Monarch. c. 5), or κατισκυκάσθη (de Cherub. c. 55), is quite different from St. John's.
 † Many MSS and the earliest Fathers and Versions punctuate,
 'That which hath been made in him was life,' and WH prefer this; but the perfect would then seem to require 'is,' not 'was,' a reading not sufficiently supported (see Meyer, Comm. in loc.).

.

#### LOGOS

apostolic literature, and to the profound differences between Philo's doctrine and St. John's. Thus the Fourth Gospel itself indicates that the historical personality and teaching of Jesus was the primary source from which the writer drew his belief in the Lord's divinity and mediatorial function (see, e.g., Jn 1<sup>30</sup> 3<sup>13-11</sup>. <sup>30</sup>. <sup>45</sup> 5<sup>19-30</sup> 6<sup>37</sup>. <sup>47</sup> 2<sup>38</sup>. <sup>30</sup> 2<sup>14</sup>. <sup>30</sup> 3<sup>14</sup>. <sup>10</sup> 3<sup>13-11</sup> 16<sup>15</sup>. <sup>30</sup> 17<sup>2</sup>. <sup>30</sup> 3<sup>14</sup>. <sup>31</sup> 18<sup>57</sup> 20<sup>28</sup>. <sup>30</sup>. <sup>31</sup>). As the author appeals to historical testimony (e.g. 1<sup>14</sup> 2<sup>11</sup> 14<sup>30</sup> 20<sup>30</sup>. <sup>31</sup>) for his narrative, so the prologue cannot be separated from the narrative which follows it, but, while evincing the writer's reflection upon the nature of Christ, evidently appeals to Christ Himself for proof of the doctrine. Moreover, St. Paul and the Ep. to the Heb. had already set forth the person of Christ in terms which include every element of St. John's doctrine, though in different phraseology (see esp. Col 1<sup>13-30</sup> 2<sup>9</sup>, Ph 2<sup>9-11</sup>, He 1<sup>1-4</sup>). The doctrine of Christ's eternal divine Sonship, and His function as revealer of God (note elsair, dwairyaoµa, etc.), was therefore, long before St. John wrote, an explicit belief of the Christians, so that there is no need to go beyond the sphere of apostolic testimony and teaching to account for the substance of his doctrine.

The difference between St. John and Philo will appear later. St. John's doctrine therefore is not to be regarded as a philosophical speculation, nor may it be rationalized into the idea that intelligence originated the universe, or that Christianity is the realization of God's eternal thought. It is rather the careful and complete statement, in peculiar and significant phraseology, of a belief which already existed in the apostolic Church, and which was based on Christ's own testimony as well as on later revelations and reflections.

But what led St. John to use his peculiar phraseology?

(a) Its source has been found by many in the OT and in post-canon. Jewish literature.

and in post-canon. Jewish literature. In Gn creation is attributed to the command or word of God, and this led to a quasi-personification of the divine word in later poetical descriptions of creation (Ps 33°) and providence (Ps 107°0 14718-18 148°). Still more emphatically was revelation called 'the word of the Lord', and hence such phrases occur as 'the word of the Lord came,' or even 'the word which Isaina saw' (Is 2?, so Mic 11, Am 11), which tended to represent the divine utterance as a separate and continuous object, distinguishable from the spoken and written word. With his are to be joined the OT representations of 'the angel of 37', or 'of God,' or 'of the covenant' (Gn 16<sup>7,12</sup> 2117 18<sup>13</sup> compared with 2 2211 247 3111.18 3243 32(Ho 125-3) 4816, Ex 225 1419 212 323, Jos 514.15 with 6<sup>2</sup>, Jg 21 524 611.21.22, Zec 112 31, Mal 31), who appears now identical with and now distinguished from God; as well as the apparent personifications of the divine 'mame' (Ex 23<sup>21</sup>, 1 K 82<sup>2</sup>, 1 s 30<sup>27</sup>, Ps 541, Jet 10<sup>6</sup>, and perhaps Dt 12<sup>5</sup>.11.21 acc.) and 'presence' (Ex 33<sup>14</sup>, Dt 47 [RV], Is (389) and 'glory' (Ex 33<sup>18</sup> [cf. v.<sup>20</sup>] 40<sup>34</sup>, 1 K 8<sup>11</sup>). Certainly, some of these passages represent J'' as revealing Himself through a special personal organ, whether that be identified with a divine person or regarded as a created agent employed by such (see Ochler, OT Theol. § 60). That Heb. thought tended to conceive of the medium of revelation as personal is also shown by the description of 'wisdom' (<sup>77777</sup>) in some of the later books (Job 23<sup>12</sup>23, and especially Pr 22<sup>231</sup>), though it is doubtful if the language amounts to more than poetical personification. Heb. belief in a living God, in immediate relation to the world and to lareal, certainly called for no intermediate being in the interest of philosophy, and the approaches made in OT toward the idea of a second divine person appear chieffy in the special theophanies and other manifestations of God recorded in the hintory: yet the description of 'wisdom,'

#### LOGOS

war in a land devoted to destruction, bearing thine unfeigned commandment as a sharp sword). The influence of Alexandrianism on this book is probable, and its conceptions move in a different direction from St. John's; but in the Targums a similar tendency appears in phraseology more akin to the apostle's. This is shown in their frequent use of 'Word' MTOTO in connexion with the name of God to express His agency (e.g. Onkelos, Gn 3<sup>5</sup> RELLS TOTO TOTOR THE CONF ON WORD' MTOTO 'They heard the voice of the Word of the Losp God walking in the garden'); Targum on Ps 2<sup>4</sup> jin's TATOTO 'TTOTO' 'The Word of the Lord shall have them in derision'). Other like expressions are also used, TTOTO, TATOTO, 'TATOTO' 'TATOTO' 'They was commonly applied to the visible presence of J'' in the tabernacle (e.g. Onkelos, Ex 25<sup>8</sup> 'I will make my Shechinah to dwell among them'). The Targums Go not appear to have applied these epithets to the Messiah, though the application did not lie far distant (e.g. Jerus, Targ, explains Gn 49<sup>18</sup> of deliverance, 'not through Samson or Gideon, but of the redemption through thy Word'). Their usage perhaps arose from an unvillingness, which the canone writers did not feel, to bring the  $\lambda oly$  God into immediate contact with men, and, therefore, easily allied itself with the fet he do a Mediator; while the terms employed lent themselves more readily to Johannean doctrine than those of the Wiselow literature did." Thus Heb. thought the advolt to represent God's

Thus Heb. thought tended to represent God's self-manifestation as mediated by an agent, more or less conceived as personal and yet blending with the divine personality itself. Of the descriptive terms used, one of the commonest, and the one which seemed to rest directly on biblical language, was the 'Word'; and many consider this the probable source of St. John's phraseology. In favour of this may be urged the fact that St. John was a Pal. Jew; that his familiarity with current Jewish religious ideas is abundantly shown in his Gospel; that in Rev  $19^{13}$  the title 'the word of Goa' is thought; that his writings evince loyalty to OT teaching (cf. Jn  $1^{17}$   $3^{10}$ .  $1^4$   $4^{22}$ . 38  $5^{39}$ . 66  $10^{25}$   $12^{28}$ . 19<sup>33</sup> <sup>37</sup>); and that some expressions in the Gospel indicate his belief that Jesus was the full realizain the top the typical divine manifestations recorded in Heb. history (1<sup>14</sup>  $\epsilon\sigma\kappa\eta\nu\omega\sigma\epsilon\nu$ ,  $\delta\delta\xi\alpha\nu$ , <sup>29, 51</sup> 2<sup>19</sup> 3<sup>14</sup>  $\delta^{32}$  <sup>33, 49-50</sup> 8<sup>55</sup>, perhaps 10<sup>35, 36</sup>, 12<sup>41</sup>). The description also of revelation as the word of God, common to Jews and Christians (cf. Jn 10<sup>36</sup>), together with St. John's view of Christ as the living embodiment of the Truth (cf. 1<sup>16</sup> 6<sup>49</sup> 8<sup>12</sup> 11<sup>26</sup> 14<sup>6</sup>, 1 Jn 1<sup>1-3</sup> etc.), would furnish additional reason for the application of this current term to Him whom he wished to set forth as the personal divine organ through whom God ever has revealed Himself.

(b) The other source from which St. John might have derived his phraseology was the Alexandrian philosophy, chiefly represented by Philo. Since the time of Heraclitus, a Logos doctrine had been developing in Greek thought for the purpose of explaining how Deity came into relation with the world. By the Logos, however, in this connexion, the Greeks meant *reason*. With Heraclitus the Logos was merely the universal law in accordance with which the evolution of the universe from primordial fire proceeds. When later thinkers had risen to a clear distinction of mind from matter, and had perceived its formative and pervasive presence in nature, the Logos came to denote the distinctively rational principle manifested in the cosmos. Plato, indeed, commonly employed for this the term rois; but he occasionally used  $\lambda \delta \gamma os$  as descriptive of the divine force from which the world has arisen (*e.g. Tim.* 38 C), and his doctrine of 'ideas' prepared the way for Philo. It was, however, the Stoics who formally developed the Logos idea. Interested mainly in the ethical problems of life, yet reverting to the earlier monism, theysaw in the universe a rational principle (the Logos), in one aspect divine and in another finite, at once the divine reason and governor of the cosmos and, as the 'seminal Logos,' distributed in

• In the Book of Enoch the term 'Word' also occurs, and once (9034) is applied to Messiah; but most critics, after Dillm., consider this latter passage a gloss.

# LOGOS

the rational germs from which all separate realities emerge. Finally, in the Jewish philosophy of Alexandria, Judaism united with Platonism and Stoicism for the purpose of showing that the OT taught the true philosophy, and expounded the Scriptures in this interest by allegorical interpretations. Philo adopted, after others, the term Logos, probably because it was familiar to both Judaism and Hellenism, to denote the total manifeetation of divine powers and ideas in the universe. God is abstract being, without qualities, but from Him has proceeded the Logos, His rational thought, which first existed, as the ideal world, in the divine mind, and then formed and inhabited the actual cosmos. The Logos is thus the former of the world out of amorphous matter, and the one through whom God may be rationally known. Eternally in God, it has been implanted and made active in the world, and has especially disclosed itself to the Hebrews and in the Scriptures; and Philo describes the Logos in terms which often bear striking resemblance to NT descriptions of Christ.\* The influence of this or similar speculation must have been felt among the Christians, and especially in Asia Minor; for the tendency to unite Christianity with philosophy appears as early as the Epistle to the Colossians, and is combated in St. John's first Epistle; Cerinthus, John's contemporary, was probably affected by the Alex. philosophy itself (see Neander, *Ch. Hist.* 'vol. i. p. 396); and from the middle of the 2nd cent. the influence of Philo can be clearly traced within the Church. Hence it is not improbable that St. John's phraseology was partly determined by the prevalence of this philosophic use of the term.

Yet it is clear that Alexandrian philosophy did not enter constructively into St. John's doctrine. Philo's conception of the Logos was radically different from St. John's, as was the philosophy which underlay it. His Logos was the divine Reason, only attaining existence objective to God for the purpose of creation. It cannot be regarded as really personal, though constantly personified, and, if identical with divine thought, was in another aspect identical with the rationality possessed by creation, being the totality of the many *logoi* (ideas) that exist in the world. God, moreover, according to Philo, may be known, by estatic intuition, more immediately than through the Logos, and Philo's notion of the whole relation of God and the world was dominated by his abstract conception of Deity and the impossibility

abstract conception of Deity and the impossibility \* The Logos is called *insir fun* (de Mundi Opif. c. 8, Mang. i. 6; de Confus. Ling. c. 20, Mang. i. 419; de Profugis, c. 19, Mang. i. 501; de Sonniki, c. 41, Mang. i. 665; de Monarch. c. 5, Mang. ii. 251; *i supfirequeue*, the cosmos being *i vistare vist* (Quod Deus innuet. c. 6, Mang. i. 277); *supefireares vist* and *superspose* (de Confus. Ling. c. 14, Mang. i. 414; *ibid.* c. 28, Mang. i. 427; de Apricut. C. 12, Mang. i. 414; *ibid.* c. 28, Mang. i. 427; de Apricut. C. 12, Mang. i. 305; de Sonniki, c. 37, Mang. i. 653). God is its Father, and Windom its mother; it is the eldest of things that have had birth, and puts on the cosmos as a garment (de Profug. c. 20, Mang. i. 106; de Migrat. Abr. c. 1, Mang. i. 437; especially de Cheruto. c. 35, Mang. i. 102, where Philo distinguishes God as the cause by which (*rè airem iq' of*), matter as that from which (*if of*), the Logos as that through which (b' of), and divine goodness as the end on account of which (b' of), and divine goodness as *informatical construct*, *Mang.* i. 562), and, *isirus* (intercessor) (Quis Rer. Div. Her. c. 42, Mang. i. 501); *ipuavite* dev*ü* (Ley. Allegor. c. 20, Mang. i. 562), and, as such, free from sins (de Profug. c. 20, Mang. i. 562), and probably the human priest's *arginizer*, *iformal.* c. 24, Mang. i. 155) It is Godris viogerent (*iveapze*, de Apricut. a. 12, Mang. i. 155) It is Godris viogerent (*iveapze*, de Apricut. a. 12, Mang. i. 158; de Sonnais, c. 61, Mang. i. 650), and even fair in a subordinate sense (Ley. Allegor. c. 73, Mang. i. 560), and even fair in a subordinate sense (Ley. Allegor. c. 73, Mang. i. 560), and even fair in a subordinate sense (Ley. Allegor. c. 74, Mang. i. 128; *de Sonnais*, c. 39, Mang. i. 656). Eusebius (Preparat. Beong. vii. 13, Mang. i. 655) states that Philo called the Logos *i diverse* fairs. He constantly describes it as *i bire xiyes*, and, in one place (de Profugie, c. 18, Mang. i. 560), as even fai

of the latter's contact with matter. Philo's Logos, moreover, was not identified with Messiah, nor was there a place in his philosophy for an incarnation, nor in his theology for redemption in the biblical sense.

It is, therefore, perhaps the most probable view that St. John adopted his Logos phraseology be-cause, in *both* Jewish and Gentile circles, the term was familiar. It was a leading term by which religious thought was striving to express the idea, though with much misconception, of an all-comprehensive, all-wise, and directly active revelation of God to the world. Its current uses, among the Jews, rested ultimately on biblical language, and suggested an intimate relation, amounting in some aspects to identity, between the substance and the agent of revelation, as well as between the latter and God Himself. It was, moreover, among Christians as well as Jews, the constant phrase for revelation itself, whether oral or written. Hence. as employed by St. John, it formed a synthesis of several elements of truth. It set forth the Divine Christ as sustaining a central and vital relation to Christianity; the latter being, on the one hand, the didactic statement of the significance for men of His person and mission, and, on the other hand, the participation of the life with God which He possessed and mediated for believers. As Christianity is the revealed Word of God, so He, out of whose being and mission it has emerged (cf. 1 Jn  $1^{1-4}$ ), may be called emphatically the Word of God. The term further set forth Christianity as the final and perfect revelation of God to His creatures, since it represents it as the highest manifestation of the same Divine Person who has ever been the medium through whom God has been manifested in the creation and maintenance of the universe. Finally, this term, thus applied to the Divine Son in the whole series of His activities, represented Him as the immediate expression and vehicle of God's mind and will, while the careful statements of the prologue prevent the term from obscuring the Son's essential deity and eternal personality, as well as His true humanity after the incarnation. St. John's doctrine of the Logos therefore may be said to sum up the biblical teaching concerning the person of Christ, and, in doing so, to represent Christianity itself as the final, absolute, and universal religion.

Among post-apost. Christian writers the doctrine of the Logos is prominent, but was often affected by philosophical speculation. Gnosticism was an effort to unite Christianity with philosophy, and indicates a direction which post-apostolic thought and controversy largely took. In the Gnostic systems, however, the Logos terminology is not conspicuous. But, beginning with Justin Martyr, it is constantly met with in the writings of the Church Fathers. In Justin the biblical idea of God struggled with that of Absolute Being, and the Logos, represented as begotten by the Father before creation, unites the biblical conception of Word with the Hellenic one of Reason; a result which further tended to obscure the apostolic doctrine of salvation. In Theophilus of Antioch also the procession of the Logos from God appears as dependent on the Father's will, though his eternal relation to the latter is expressed more clearly than by Justin. With Tatian the Logos was the eternal world-principle, ideal in God and hypostatized at creation. In Athenagoras there appears a firmer grasp of the biblical doctrine which, at the close of the 2nd cent., was still more adequately expounded by Irenæus. The doctrine of the Logos in the post-apost. age was the natural meeting-point of Christianity with the best elements in the old religions. It seemed to many to furnish proof that the new religion was in

136

#### LOIS

reality the full expression of truths taught by philosophy. Hence its prominence in the apologists. But it was also easy for them to lose the biblical conception of Word in the Hellenic one of Reason; so that the doctrine became also a point of divergence between different schemes of theology according to the view taken of the term. The subsequent history of the doctrine lies beyond the limits of this article.

The subsequent history of the doctrine field beyond the limits of this article. LITERATURE.—Out of the large literature bearing on this subject, the following works may be mentioned as useful and representative :—(A) On St. John's doctrine, the Comm. of Lücke, Meyer, Meyer-Weise, Godet, Westcott, and Luthardt; Lightfoot, Horce Hab., Ezercitatio on Jn 1; Liddon, Bampt. Lectt. (1868) on The Divinity of our Lord, Lect. v.; Watkins, Bampt. Lectt. (1800) on Mod. Criticism and the Fourth Gospel, Lect. vili.; (Gloag, Introd. to Johan. **LOIS** ( $\Lambda\omega i$ , apparently a Greek name, akin to  $\lambda\psi\omega\nu$ ,  $\lambda\psi\sigma ros$ ; 'die Liebe, Angenehme' [Pape, Handwörterbuch der griech. Eigennamen], but not found elsewhere except as the name of an island off the Thessalian coast—Steph. Byz. s.v.).—The grandmother of Tinnothy, and probably mother of Eunice (2 Ti 1<sup>6</sup>). She was a lady of Lystra (but see Blass on Ac 16<sup>3</sup>), probably, as the Greek names of all the family suggest, Hellenistic by birth, but a devout and sincere Jewess of 'unfeigned faith,' who trained her family in the Jewish scriptures (2 Ti 3<sup>15</sup>), and was probably converted to Christianity on St. Paul's first visit to Lystra.

W. LOCK. LONGSUFFERING.—This fine word is both an adj. and a substantive. As an adj. it is thrice used of God in OT (Ex 34<sup>6</sup>, Nu 14<sup>18</sup>, Ps 86<sup>19</sup>) as the translation of Dige Try, elsewhere translated 'slow to anger,' and so translated in these passages by RV. In Apoer. the adj. occurs thrice again of God as tr. of  $\mu \alpha \kappa \beta \delta \nu \mu os$  (Wis 15<sup>7</sup>, Sir 2<sup>11</sup> 5<sup>4</sup>). And in NT it occurs once, 2 P 3<sup>9</sup> 'The Lord is not slack concerning his promise, as some men count slackness; but is longsuffering to us-ward' ( $\mu \alpha \kappa \rho o \theta \nu \mu c \delta$ ). The adj.  $\mu \alpha \kappa \rho \delta \nu \mu os$  only once, Ac 26<sup>3</sup>, where it is rendered 'patiently'; but the verb  $\mu \alpha \kappa \rho o \theta \nu \mu c \delta$ occurs often. In 1 Th 5<sup>14</sup> for AV 'be patient toward all men' ( $\mu \alpha \kappa \rho o \theta \nu \mu c c r \sigma \rho \delta \pi d \kappa r \alpha \beta$ ) RV prefers 'be longsuffering toward all'; in Lk 18<sup>7</sup> for AV 'though he bear long with them' ( $\kappa \alpha \mu \mu \alpha \kappa \rho - \theta \nu \mu \omega \kappa \rho (\epsilon \alpha \kappa \rho \sigma \theta \nu \mu c c)$ ; and he is longsuffering over them' (Amer. RV 'and yet he is, 'etc.).

ne is, etc.). The subst. is found but once in OT, Jer 15<sup>15</sup> 'take me not away in thy longsuffering' (קאָרָ אָרָן אָרָ LXX εls μακροθυμίαr; Vulg. in patientia tua, whence Wyc. 'in thi pacience'; Cov. 'in thy longe wrath'; Gen. 'in the continuance of thine angre'; Bish. 'in the time of thine angre.' Cheyne interprets, 'suffer not my persecutors to destroy me through the longsuffering which thou displayest towards

# LOOK

them'; so Streane; but Orelli translates, 'According to thy longsuffering, carry me not away'). In NT 'longsuffering' is the tr. of  $\mu \alpha \kappa \rho \sigma \theta \mu \mu \alpha$  in all its occurrences except two (viz. He 6<sup>12</sup> and Ja 5<sup>10</sup>, where AV and RV have 'patience'). The Gr. word is the opposite of  $\delta \xi \upsilon \theta \mu \mu \alpha = 4$  quick temper,' 'irascibility': it is distinguished from  $i \pi \sigma \mu \sigma \kappa \beta$ ,  $\mu \alpha \kappa$ . being the temper which does not hastily avenge a wrong,  $i \pi$ . the temper which does not easily succumb under suffering. See Lightfoot on Col 1<sup>11</sup> and Ro 2<sup>4</sup> (in Notes on Epistles of St. Paul, p. 259), Sanday Headlam on Ro 2<sup>4</sup>, Abbott on Eph 4<sup>2</sup> and Col 1<sup>11</sup>, and Trench, NT Synonyms, 188, 359. In his 'Prologe' to Exodus, Tindale says, 'Marke the longesoferinge and softe pacience of Moses and how he loveth the people and is ever betwene the wrath of god and them and is readye to lyve and dye with them and to be put out of the boke that god had written for their sakes (as Paule for his brothren Roma. ix.) and how he taketh his awne wronges pacientlie and never avengeth him silf.' Cf. also Tindale's tr. of Nu 14<sup>18</sup> 'the Lorde is longe yer he be angrye, and full of mercy, and suffereth synne and trespace, and leaveth no man innocent.' See FORBEARNCE, vol. ii. p. 47. J. HASTINGS.

**LOOK.**—The simple verb to look was formerly used in the sense of 'look for,' 'expect,' as Hall, *Works*, ii. 107, 'Little did Zacheus looke that Jesus would have cast up his eyes to him'; Rutherford, *Letters*, No. II., 'Our Lord, that great Master of the feast, send us one hearty and heartsome supper, for 1 look it shall be the last.' There are three examples in AV, Is  $5^2$  'he looked that it should bring forth grapes, and it brought forth wild grapes'; Sir 20<sup>14</sup> 'he looketh to receive many things for one' (RV 'his eyes are. many instead of one'); Ac 28<sup>6</sup> 'they looked when he should have swollen' (RV 'they expected that he would have swollen').

would have swolfen ). Driver in his Parallel Psalter (p. 448) draws attention to the specially biblical phrase look on or look upon. This has sometimes a good sense, sometimes a bad, but generally denotes satisfaction, and is occasionally paraphrased by 'see one's desire on.' Thus Ex 5<sup>21</sup> 'The Lord look upon you, and judge'; Dt 26<sup>7</sup> 'the Lord heard our voice, and looked on our affliction'; 2 S 9<sup>8</sup> 'what is thy servant, that thou shouldest look upon such a dead dog as I am ?'; 1 Ch 12<sup>17</sup> 'the God of our fathers look thereon, and rebuke it'; 2 Ch 24<sup>22</sup> 'The Lord look upon it, and require it'; Lk 1<sup>26</sup> 'Thus hath the Lord dealt with me in the days when he looked on me, to take away my reproach among men.' But 'look unto' in Dt 9<sup>27</sup> 'look not unto the stubbornness of this people,' means 'regard'; cf. Lv 19<sup>4,31</sup>, Dt 31<sup>18, 20</sup> etc. Driver's examples (in all of which Heb. is  $\neg \pi \times \rceil$ ) are Ps 22<sup>17</sup> 27<sup>4</sup> ('gaze upon') <sup>13</sup> 37<sup>34</sup> 50<sup>23</sup> 54<sup>7</sup> 59<sup>10</sup> 91<sup>16</sup> 92<sup>12</sup> 106<sup>3</sup> 112<sup>8</sup> 118<sup>7</sup> 128<sup>5</sup>. The same phrase occurs in line 4 of Mesha's inscription, '8,  $\pi \times \pi^{27} \rightarrow \pi^{27}$ 'he made me to look upon [*i.c.* let me see my pleasure on] all my enemies.'

The phrase look upon is used occasionally in another sense, Gn  $24^{16}$  'the damsel was very fair to look upon';  $2 \text{ S} 11^2$  'the woman was very beautiful to look upon'; Rev  $4^3$  'he that sat was to look upon like a jasper and a sardine stone.' So to look on, Est  $1^{11}$  'she was fair to look on.' And to look to, 1 S  $16^{12}$  'Now he was ruddy, and withal of a beautiful countenance, and goodly to look to'; Ezk  $23^{15}$  'all of them princes to look to.' To look to a person or thing in the sense of

To look to a person or thing in the sense of 'give attention to' it, is also occasionally found, Ex  $10^{10}$  'look to it; for evil is before you'; Pr  $14^{13}$  'the prudent man looketh well to his going,' so  $31^{27}$ ; Jer  $39^{12}$  'Take him, and look well to him, and do him no harm,' so  $40^4$ ; Ac  $18^{15}$  'But if it be

a question of words and names, and of your law, look ye to it.' Cf. Cranmer, Works, i. 160, 'My chaplains and divers other learned men have reasoned with him, but no man can bring him in other opinion, but that he, like unto Esau, was created unto damnation ; and hath divers times and sundry ways attempted to kill himself, but by diligent looking unto he hath hitherto been preserved.

In 2K14<sup>6.11</sup> occurs the phrase 'to look one another in the face,' of which the meaning is apparently 'to join battle.' The Heb. phrase occurs nowhere else (though 2 K 23<sup>20</sup> is very like it, 'he slew him at Megiddo, when he had seen him'), and the Eng. is a literal translation. But see Barnes in vol. ii. p. 513°, and in *Expos. Tim*28, ix. 464, 521.

Look ! as an exclamation, having no corresponding word in Heb. or Gr., is common in Coverdale: thus Ru 1<sup>16,17</sup> 'Loke where thou abydest, there wil I abide also . . . Loke where thou diest, there wil I dye.' One example of this 'graphic and pic-turesque pleonasm,' as Driver calls it, has been introduced by the AV translators (it does not seem to occur in any earlier version) at 1 Mac 464 ' Look, at what time and what day the heathen had proand eitherns, and harps, and cymbals.' RV omits. J. HASTINGS.

LOOKING-GLASS.-See GLASS, vol. ii. p. 181\*.

LOOPS (ζέκη), άγκύλαι).—Ex 264. 101. 36111. 17 only. The term is used in connexion with the curtains of the Tabernacle, and the arrangement for coupling these together. Full details will be found under these together. art. TABERNACLE.

LORD.-Both AV and RV print this word in three different ways, LORD, Lord, and lord. (1) LORD. This form represents mm, the proper name of the God of Israel. It is a substitution adopted by the Hebrews themselves, who shrank from pro-nouncing a name so sacred, and directed that yre should be read instead, except in the cases where bat word itself precedes the holy name, for which ring was then substituted. When the vowel points were invented, those belonging to these words were respectively attached to the consonants mm.

sonant:  $m^{m}$ . When this feeling first asserted itself cannot be accurately ascertained. It prevailed before the date of LXX, where Kóµor always represents the divine name. The Jews justify the custom by an appeal to Lv 24<sup>16</sup>, but this passage is rather an indication of the strength of the feeling than a justification of it. It was a grand opportunity missed when RV followed AV in this practice, especially in such passages as K 18<sup>29</sup> where the missed when KV followed AV in this practice, especially in such passages as 1 K 18<sup>30</sup>, where the whole meaning depends on the contrast of the names J" and Baal. On the other hand, the gradual suppression of the proper name was an undoubted gain to religion. Had it, for instance, appeared in the NT, the spread of Christianity might have been seriously impeded.\* The faith that is to embrage the world must have no special that is to embrace the world must have no special name for its God. J", Molech, Chemosh were divini-ties of tribes or nations. The God of Christianity is universal, the God of the human race. (2) Lord. This term in OT is used to translate

(2) LOR. This term in O'I is used to transite -1.  $\forall \mathbf{x}'$  when applied to the Divine Being. The word is in form a *plur. majestatis* (see e.g. Gn 39<sup>20</sup>), with suffix of 1st person with ' $\neg$  instead of ' $\neg$ , presumably for the sake of distinction (meaning, therefore, properly, '*my* Lord'). It is of infrequent use in the historical books, and in some cases it is uncertain what here it is a divine or a huppen appeal. uncertain whether it is a divine or a human appel-lative (Gn 18<sup>3</sup> 19<sup>18</sup>). The MT sometimes decides

• Neither AV nor RV of NT print LORD in quotations, pre-serving in this way the change made by the LXX.

this by a note distinguishing between the word when 'holy' or only 'excellent,' sometimes by a variation in the pointing (1, 1, or i). 'Lord' appears in combinations : O Lord my God (Ps 38<sup>15</sup>), Lord God (Gn 15<sup>2, 8</sup>), the Lord God (Is 25<sup>8</sup>). In the two latter 'God' is a substitute for the proper name. 2. *i*'ry in its regular forms, when used of the Divine Being (Ex 23<sup>17</sup>). This rule has not, how-ever, been observed with strict uniformity. In Neh 3<sup>6</sup> 8<sup>10</sup> copies of 1611 printed LORD. **3.**  $\varkappa$ <sup>27</sup>, an Aram. word (Dn 2<sup>47</sup> 5<sup>23</sup>). The same word is repre-sented by 'lord' (Dn 4<sup>24</sup>). In NT, 'Lord' renders Kópos when it refers directly to God or Christ, or appears in the vocative case. (This rule is more consistently followed in RV than in AV. Comp. them in Mk 2<sup>-8</sup>, Rev 17<sup>14</sup>). It also renders  $\delta e \sigma \pi \sigma r \eta$  five times,

2.8, Rev 17<sup>14</sup>). It also renders *deraforms* five times, Lk 2<sup>29</sup>, Ac 4<sup>23</sup>, 2 P 2<sup>1</sup>, Jude <sup>4</sup>, Rev 6<sup>10</sup>. In the last three of these RV prefers ' master.'

(3) lord. This form represents ten Heb. words. The most common of them all is jury (Phœn. inscriptions often show ארן. The name Adonis is of Phen. origin.), which is used to denote eminence or superiority in every domain of life, of kings (Jer 22<sup>18</sup>), governors (Gn 42<sup>10</sup>), prophets (1 K 18<sup>7</sup>), fathers (Gn 31<sup>35</sup>), masters (Gn 45<sup>9</sup>). In the vocative it is especially frequent. Joseph is so addressed (Gn 42<sup>10</sup>), Moses (Nu 11<sup>28</sup>), Elijah (1 K 18<sup>7</sup>), the theophanic angel (Jos 5<sup>14</sup>), a captain (2 S 11<sup>11</sup>), a priest (1 S 1<sup>15</sup>). In Jg 5<sup>35</sup> a bowl fit for lords is the high places of Arnon' tr. the plural of 5<sup>12</sup>, which generally appears as 'the Baalin.' Baal means 'master' or 'occuer.' In Gn 27<sup>29, 37</sup> (lord' tr. <sup>17</sup>, a strong man.' Lords of the Phillstines (Jos 13<sup>3</sup> etc.) no doubt Phœn. origin.), which is used to denote eminence

Lords of the Philistines (Jos 13<sup>3</sup> etc.) no doubt represents some title peculiar to that people. The Heb. is oftic (const. 'oftic always applied to the heads of the five chief cities, except in 1 S 1830, where they are called אָדְים In consequence of this, Ewald would connect אָדָים with ש. But an Arab. word meaning 'axle' is also used as a designation of a chief, and, till a better origin of the name is found, this analogy cannot be disregarded (see Gesen. Thes. under , or, and Keil on Jos 133). The LXX em-

ploy cather is, and there is the birth of the birth of the properties of prime parties of prime parties of prime parties of the verb ", the verb ", RV has 'we are broken loose.' The proper sense of the word is 'to roam at large' The proper sense of the word is 'to roam at large' (see vol. ii. p. 527<sup>b</sup> note \*). In Ezr 8<sup>25</sup>  $\forall$  is more properly by RV tr. 'prince.' In Dn 2<sup>10</sup> the adjective  $\exists$ ' great' is tr. 'lord' (see RVm), and in the same book  $|\overline{\gamma}\gamma_{\mu\nu}\rangle$ , LXX  $\mu\epsilon\gamma_{\nu\sigma}\pi^{\mu}\epsilons$ . The word  $\forall\gamma_{\nu}$  tr. 'lord' in 2 K 7<sup>2. 18. 19</sup> ( $\tau\rho_{\nu\sigma}\tau_{\alpha}\tau_{\eta}s$ ), and Ezk 23<sup>-3</sup> ( $\eta\gamma\mu_{\mu}\omega_{\nu}$ , RV 'princes'), apparently means a captain of a chariot or of charioteers. A. S. AGLEN.

LORD OF HOSTS ("THE EXEMPT STREET AND A CONTRACT A CONTRACT AND A CONTRACT A CON LORD OF HOSTS (ההה צָרָאוֹת).-This divine title Ps  $80^{\mu}$  (9, and with the strange orbit for value originally, no doubt (see Cheyne or Baethgen on Ps 596) a correction, made mechanically, for mm, which, however, afterwards regained its place beside it—Ps 59<sup>5</sup> (\*) 80<sup>4</sup> (\*).<sup>19</sup> (2\*) 84<sup>8</sup> (\*); 'the Lord J", the God of Hosts, 'Am 3<sup>13</sup> \*; 'the God of Hosts' (without J") Am 5<sup>27</sup>, and, as before, with at the God of Hosts' (without J") <sup>14</sup> (<sup>15</sup>). So far as usage is concerned, it is pre-eminently the *prophetical* title of God. It occurs

\* הצבאות (with the art.) in these passages.

LORD OF HOSTS

with great frequency in the prophets \* (except Ob, Joel, Jonah, Dn, and, somewhat remarkably, Ezk; blue other prophets, however, use it once only, viz. Hos  $12^{5}$  (\*), Mic 4', Hab  $2^{13}$ , and two only twice, Nah  $2^{13}$  3'', Zeph  $2^{4}$ .  $1^{0}$ ); in the hist. books it is found only 1 S  $1^{3}$ . 11 4'  $15^{2}$   $17^{45}$ , 2 S  $5^{10}$  (=1 Ch 11'') (=1 Ch 17''.  $2^{3}$ )  $\frac{7}{1}$  1 K  $18^{15}$   $19^{10}$ .  $1^{4}$  2 K  $3^{14}$  $19^{31}$  (= Is  $37^{32}$ ), several of these occurrences being in the mouth of prophets : it occurs also in 8 Psalms (24<sup>10</sup> 46<sup>7.11</sup> 48<sup>8</sup> 59<sup>5</sup> 69<sup>6</sup> 80<sup>4.7.14</sup> 19 84<sup>1.3.5.12</sup> 89<sup>8</sup>), but not in any other part of the Hagiographa (except 1 Ch 11. 17, from 2 S, just quoted).

The fuller and seemingly more original form, 'J", the God of hosts,' used by Amos + and Hosea, might suggest — though the inference is not a necessary one-that the expression was in their days of comparatively recent origin. The origin of the title is matter of conjecture.  $x_{yy}$  ('host') is used in Heb. in the sense of an army of men, as in the common expression 'captain of the host': the angels, and stars, were, however, also pictured by the Hebrews as constituting a 'host,' and are spoken of as the 'HOST OF HEAVEN' (which see). The title thus signifies 'J" of armies'; and the question is, What armies are intended? One opinion is that the armies are those of Israel-the opinion is that the armies are those of Israel—the supposition upon this view being that the title originally denoted J" as a warrior, the triumplant leader of Israel's forces against its heathen foes (cf. Ex 15<sup>5</sup>, Nu 21<sup>14</sup> [the 'Book of J"s wars'], Jg  $5^{23}$ , 1 S 17<sup>45, 35, 45</sup> 18<sup>17</sup> 25<sup>28</sup>, 2 S 5<sup>24</sup>, Ps 24<sup>5</sup> 44<sup>9</sup> 60<sup>10</sup>, Dt 23<sup>14</sup>, Is 13<sup>4</sup> 31<sup>4</sup> [where the word for 'fight' is cognate with that for 'hosts'] 42<sup>13</sup>); but, as it occurs in many passages where a distinctively martial sense would be inappropriate, and as, moreover, it is used often when (5<sup>od</sup> is represented moreover, it is used often when God is represented as judging Israel, that the sense expressed by it was gradually enlarged under the influence of the other applications of the word 'host' just men-tioned, so that it came to denote Him as the God tioned, so that it came to denote Him as the God who had also other 'hosts,' or agencies, at His command, and could employ, for instance, the armies of heaven (cf. Jg  $5^{20}$ , 2 K  $6^{17}$ ) on His people's behalf, and even the powers and forces of nature in general. This is substantially the view of Herder (Geist der Ebr. Poesie, ed. 1825, iii ell b) it here here developed most following ii. 81 f.); it has been developed most fully by Kautzsch in Herzog's *Real-Enryk.*<sup>2</sup> s.v. 'Zebaoth,' and ZAW, 1886, p. 17 ff.; it is also that of G. A. Smith, XII Proph. i. 57 f., Riehm, HWB, s.v. 'Zebaoth,' and Dillm. AT Theol. 220 f. In support of it Kautzsch points to the association of the title, in the first passages in which it occurs in the hist books, with the ark (1 S 1<sup>3, 11</sup> [the ark was now at Shiloh,  $4^3$ ]  $4^4$ , 2 S  $6^2$ ), the significance of which in time of war is very evident (Nu  $10^{35t}$ , Jos  $6^{4\pi}$ , 1 S  $4^{3\pi}$ , 2 S  $11^{11}$ ). The larger ideas associated with the title afterwards are apparent from the solemnity and emphasis with which the prophets habitually use it (observe, e.g., the climax in Am  $4^{13}$   $5^{27}$ , Jer  $31^{23}$ , Is  $48^2$   $54^5$ ), and from such passages as Am  $4^{13}$ , Is  $51^{15}$   $54^5$ , Jer  $10^{16}$   $31^{23}$ , where it is applied to J" as Creator and Ruler of the world; these ideas, it may be noted, appear already in Hos and Am. Another opinion is that the armies intended were originally the hosts of angels. Thus Ewald (Hist. iii. 62, Lehre der Bibel von Gott, II. i. 339 f.), adopting this view, made the clever and original conjecture that the title may have arisen first on occasion of some victory under the Judges, when it seemed as if J'' descended (cf. Jg  $5^{13}$ ) with His celestial hosts to the help of the armies of Israel: 'born' thus 'in the shout of victory,' it fixed itself on the memory of the people, and im-plying, as it did, that J'' was the commander and

# LORD'S DAY

organizer of the hosts of heaven (including stars as well as angels), it was suggestive of His onnipotence, and became in the prophets 'the loftiest and most majestic title' of Israel's God. Ochler, *OT Theol.* § 196 end, and Schultz, *OT Theol.* ii. 141, also think that the expression was used originally with reference to the hosts of angels. A third view is that of Smend (AT Rel.-gesch. 185 ff.), according to whom the title was used probably first by Amos, the 'hosts' intended by him being the forces and elements of nature (cf. 9<sup>267</sup>.). Such a sense is, however, too abstract to stand at the origin of the expression ; nor is it borne out by the usage of xcx in independent passages (not even by Gn 21, Ps 10321, cited by Smend).

Borchert, in SK, 1896, p. 619 ff., argues forcibly in support of the view that angels were originally denoted by the expression. He points out, as against the first view mentioned above, (1) that MMNIS 'hosts' is hardly used of the armies of Israel except in three Psalms (449 6010=10911) of uncertain date, and in the late source P (Ex 626 74 1217.41.51, Nu 13.52 92.597.101457.331),\* where it forms part of the unhistorical conception of the nation t the Forduce as consisting of a vasi conception of the nation Inte source  $P(2x \in a) / a 12/a ... (N I Is 2x ... ) 2x ... (2x ... ) where it forms part of the unhistorical conception of the nation$ at the Exodus as consisting of a vast organized army; (2) thatthe passages in which the title is brought into connexion withthe ark are, relatively, few, and that the connexion itself isno specific or distinctive one; and (3) that the books whichprincipally use the title 'J' of hosts' do not speak of the'hosts' of Israel (and conversely), and that, in general, it isvery rarely used in a connexion which suggests them. Onthe other hand, passages such as Gn 28<sup>12</sup>, 1 K 22<sup>19</sup>, 1s 6<sup>22</sup>, Ps29, show that J' was habitually pictured as attended by angels,-the objection that, where angels are intended, 'host' (not'hosts') 'of heaven' is used, being met by the considerationthat such beings are not necessarily conceived as a singledefinite host, but might, from their numbers, be with equaljustice conceived as forming 'hosts': they attend Him naturallychange in the meaning of 'hosts,' such as is postulated in theother explanation, it is at once adapted to express those ideas ofsovereign majesty and power which are undoubtedly associatedwith it by the propheta.

Upon the whole, this seems to be the most probable explanation of the title. Though other armies' might not be entirely excluded, the idea which would most naturally suggest itself, when the term was used absolutely in connexion with J", would, it seems, be the armies of heaven. But, whatever uncertainty may rest on the origin of the expression, all agree that as used by the prophets it is J''s most significant and sublimest title: it designates Him, namely, as One who is supreme over untold 'hosts' of spiritual or other agencies, over untoin 'nosis' of spiritual of other agencies, whom He can employ to give effect to His purposes (Ps 103<sup>20</sup>.<sup>21</sup>),—in a word, as the *Omnipotent*. It is accordingly in the LXX often + very appropriately represented by  $\kappa i \rho \omega \pi a \pi \sigma \kappa \rho a \tau \omega \rho$ , 'Lord Omnipotent' -or, more exactly (in contrast to the more abstract marrodúraµos), 'Lord all-suvereign' (see Westcott, The Historic Faith, p. 21 ff.).‡ S. R. DRIVER.

**LORD'S DAY** ( $\eta$  Kupiak $\eta$   $\eta\mu\epsilon\rhoa$ ).—This term has from the very earliest times been applied in Greek and Latin Christian literature to the first day of the week in its religious aspect. The scope of this article is necessarily limited; we can here discuss only (i.) the term 'Lord's Day' itself, (ii.) The connexion of the Lord's Day with the Sabbath, (iii.) the origin of the institution, (iv.) the nature of Lord's Day worship in NT times.

\* The isolated passages Dt 209, 1 K 25, 1 Ch 273 (even if they are not to be explained, with Borchert, by Ges-Kautzsch, § 124. 22) do not detract from the force of the remark. † 2 S and Minor Prophets (usually), Jer (12 times). Elsewhere *zionet* Zx3*a*±# is generally used (so Ro 929, Ja 54 : see SABAOTH): in Ps, however, and occasionally also in other books, *zionet* for *withet* (i. d) forces grunities are the use of *Xionet* for *with* 

in Ps, however, and occasionally also in other books, *xipis*, *xip*, *δivisuus* (i.e. of forces, armies : see the use of *δivisus* for NIX in Nu J. 2, 1014<sup>67</sup>, *passim*, and in other similar passages). I So in NT, 2 Co 6<sup>18</sup> (a reminiscence of the usage of the LXX, but not an exact quotation); comp. **x**. *i* 60*i i wavraspirus*, Rev 19<sup>4</sup> 47 117 153 107 105 2122 (as Am 313 413 al.); *i* 60*is i x*., Rev 1614 19<sup>15</sup> (as Am 5<sup>27</sup>). A title borne by Nebo, 'Overseer or ruler (*pabid*) of the multitudes of heaven and earth' (*KAT* 2413, cited by Cheyne, Orig. of Pattler, 323, ct. Isoiah 3, i. p. 13; *KIB* iii. 2, 53; Delitzsch, Assyr. HWB 3601.), is perhaps worth comparing.

# LORD'S DAY

i. The scriptural authority for the term 'Lord's Day' is Rev 110 'I was in the Spirit on the Lord's Day, 'éyerbany ér trechant ér ty kupaký huépa. Few will agree with Eichhorn in referring thus to Easter Day. The opinion of Wetstein and others, who interpret it of the day of Judgment, seems plaus-ible but is opine to two formidable objections ible, but is open to two formidable objections. (1) A writer so impregnated with OT phraseology as is the author of the Apocalypse would surely have used, in this sense, the familiar  $\dot{\eta}\mu\epsilon\rho a \tau o\tilde{v}$ Kuplov (Kuplakós is not in LXX). (2) Such a use of the term is quite unknown to the Greek Fathers. From the *Didaché* and Ignatius onwards they use ή κυριακή ήμέρα, or simply ή κυριακή, only in the sense of Sunday. Such an unbroken and unquestioned of Sunday. Such an unbroken and unquestioned Church usage must be regarded as decisive on this point. To this may be added that as in v.<sup>9</sup> Patmos gives the *place* of the vision, so here 'the Lord's Day' naturally seens to fix the *time*. It would, however, be a mistake to conclude that Rev 1<sup>10</sup> is the origin of the term. It is merely the first extant example of its use (*Didaché* 14, Ignat. Ep. Magn. 9 are certainly later). The phrase might have arisen as early as A.D. 57, for in 1 Co 11<sup>20</sup> we find *xupaxis* defavor. This is the first occurrence of *xupaxis* defavor. This is the first occurrence of *xupaxis* mextant Greek literature. The absolute use of K $\omega_{pero}$ , which indicates an identification of Christ with the J" of the OT, naturally led to the formation of a corresponding adjective. However, ή κυριακή ήμέρα was not yet in current use, for in this same Epistle  $(1 \text{ Co} 16^2)$  St. Paul uses 'the first day of the week,'  $\mu ia \sigma a \beta \beta a \tau ov$ ; and a little later, Ac 20<sup>7</sup>, we find the similar  $\dot{\eta}$  µla  $\tau \hat{\omega} r$   $\sigma a \beta \beta \dot{a} \tau \omega r$ , St. Luke with his usual historical accuracy using, doubtless, the phrase current at the time of which he was writing. Contrast the inexactness of the Gospel of Peter, where  $\dot{\eta}$  κυριακή is twice used of the actual day of Christ's resurrection, and betrays at once by the anachronism a 2nd cent. writer. At some time, then, between A.D. 57 and A.D. 96 the term 'Lord's Day' arose, and it was probably first used in Churches which had to contend with Judaism.

ii. It has been reckoned a pious opinion (Bramhall, Works, vol. v. pp. 41, 58) that the observance of the Lord's Day was one of 'the things concerning the kingdom of God' of which the risen Lord spoke during the forty days preceding the Ascension. This idea is probably due to the instinctive desire to base on a direct divine sanction an institution so universal and so binding on all Christians. But the assumption is quite unnecessary. Whether the first day of the week was 'blessed and hallowed' by Christ Himself with His own lips, or by the Church, His body, His visible representative, under the guidance of the Holy Spirit, in any case the Lord's Day was certainly sanctioned by inspired apostles, and thus confessedly stands on a level with ordination, and perhaps one or two other ordinances, as an institution as much beyond the power of the Church to alter or to abrogate as it would be for her to change the number of the Gospels.

The claim of the Lord's Day to this pre-eminence has been unfortunately prejudiced by controversies onits relation to the Sabbath. This question has been thought to be of much practical interest, especially by that large class of persons who think that they require guidance in details, and who feel that a general direction to keep a day holy is too vague, and leaves too much to their individual responsibility. On the one hand, those who incline to a severe observance of the day identify the Lord's Day with the Sabbath, regarding it as the same institution with a Christian reference added, the change of day being regarded as immaterial. They combine with this assumption a theory of scriptural Sabbath observance, for which there is

but slender evidence from ancient or modern Jewish life. On the other hand, some of those who revolt from this rigidity feel constrained to justify themselves by a denial of any relation whatever between the two days; and then, in the default of any divinely ordained rules for its observance, they are in danger of not observing it at all. The truth will be found to lie midway between these two extremes. The Lord's Day is, and is not, the Sabbath, much as John the Baptist was, and was not, Elijah.

When Jesus uttered the cry, 'It is finished,' the Mosaic dispensation virtually passed away. His Resurrection, Ascension, and Outpouring of the Holy Spirit were successive affirmations of the great fact, and the destruction of the temple made it plain to all but the blindest. But in the mean-time nothing is more striking than the tender way in which the apostles and Christians of Jewish birth were weaned from the old religion. The dead leaves of Judaism fell off gradually, they were not rudely torn off by man. The new facts, the new dogmas, the new ordinances first established themselves, and then little by little the incompatibility of the old and the new was realized, which necessarily issued in the casting out of the old. The old things of Judaism were made new in Christianity. This, however, was not accom-plished by a deliberate substitution of one ordinance for another; but first the old ordinances were simply antiquated, and then experience matured under the influence of the Holy Spirit proved that the positive institutions of the new religion more than fulfilled those of the old. This rengion more than fulfiled those of the old. This was realized, first of all, in the case of the sacra-mental ordinances. Baptism was soon seen to be analogous to circumcision (Col 2<sup>11</sup>), and also to the legal ablutions (He  $10^{22}$ ); while the Eucharist corresponded to the peace-offerings (1 Co  $10^{16-21}$ , He  $13^{10}$ ). But the realization of the fulfilment of the Sabbath in the Lord's Day does not find expression in the NT. This silence is especially marked in the Epistle to the Hebrews. In that Epistle the writer is addressing some who were in danger of relapsing into Judaism, who could scarcely bear to forego all the associations of the scattery bear to forego an the associations of the old religion, its antiquity, authority, splendour, variety. His design therefore is to adduce all that Christianity had analogous to the cherished rises of Judaism. The priesthood, sacrifice, the temple, the solemn services, are all shown to have their more than parallels in the gospel. But when he touches on the Sabbath, it is as a type of the state of salvation on which believers have entered, a Sabbath rest to be consummated in the world to come  $(4^{3,1})$ . Hessey (*Bampton Lectures*, 1860) proves by copious quotations that up to the end of the 5th century, and even later, the two days were not considered to have any relation to each other D but a balication in the any relation to each other. But a believer in the perpetual guidance of the Church by the Holy Spirit will scarcely accept this as conclusive that the Church of later ages was not right in seeing a close analogy between the Lord's Day and the Sabbath; an analogy expressed by the retention of the Fourth Commandment by all Christian Churches, as part of the Decalogue considered as a convenient summary of the Moral Law. Assuming that public worship is a moral duty, it is absolutely necessary that a day of rest from ordinary labours be set apart for that purpose, and for the cognate duties of reliations instruction and appoint private duties of religious instruction and special private devotion. As regards the proportion of our time which should be given to such duties, we may well follow the apostles in accepting unquestion-ingly that laid down in the Mosaic Law. This is the moral element in the Fourth Commandment. Experience has shown that the excessive multipli-

140

cation of holy days regarded as in any degree co-ordinate with the Lord's Day is fatal to the maintenance of those objects for which the Lord's Day was designed. The antiquation of the Day was designed. The antiquation of the Sabbath equally with circumcision, etc., was gradu-ally realized as the sequence of events led up to it. The key to a right understanding of the revolution In each of the apostolic Church: 'continuing's the revolution is found in the first description of the public worship of the apostolic Church: 'continuing steadfastly with one accord in the temple, and breaking bread at home' ( $Ac 2^{40}$ ). To the customary lowich dependions was added the one distinctive Jewish devotions was added the one distinctive Christian service. The Church professed to be a divine development of Judaism (Ac 2414 etc.). All that was eternally true in the Law is with us still, and that which was essentially transitory was tolerated until it became positively hurtful. At Jerusalem an inconsistent allegiance both to the old and the new was maintained probably until the destruction of the temple, but even there we early find traces of the antiquation of the Sabbath. Considering the prominence assigned to it in Pharisaic Judaism, there can be little to it in Pharisaic Judaism, there can be little doubt that it is one of 'the customs which Moses delivered,' the changing of which by Jesus of Nazareth was announced by St. Stephen (Ac  $6^{14}$ , cf. 21<sup>21</sup>). The falsity of the witnesses lay in the malicious spirit which prompted the accusation rather than in the charge itself. Thirteen years rather than in the charge itself. Thirteen years later, Sabbath keeping is not one of the 'necessary things' enjoined on Gentiles by the apostolic council (Ac  $15^{20}$ ). This decision amounted to an acknowledgment that the Sabbath as well as circumcision, etc., was no longer binding on Gentiles, though James, as we should expect, seems to contemplate the continuance of the ordinance for Jews'(v.<sup>21</sup>). No valid objection can be drawn from the frequent references in Ac to be drawn from the frequent references in Ac to the apostles preaching in synagogues, or in Jewish places of prayer, on the Sabbath day  $(13^{14} \cdot 43 \cdot 41)^{13} \cdot 17^2 \cdot 18^4$ ). Their mission was to the Jews first, and, apart from the natural desire on their own part is in the only public apostles. part to join in the only public worship avail-able, common-sense would lead them to go where they could address large bodies of Jews assembled with minds disposed to receive religious assumed with initial disposed to receive rengions truth. About A.D. 58 St. Paul in Gal  $4^{9,10}$  reckons 'the observation of days' as one of the 'weak and height rudiments'. Now as we 'weak and begarly rudiments.' Now, as we may gather from 1 Co  $16^{1.2}$  that St. Paul had himself bidden the Galatians observe in a certain way the first day of the week, it is plain that he is not here condemning the principle of religious distinction of days; and the fact that in this Epistle he is combating Judaistic teachers forces us to the conclusion that the compulsory observance of a specially Jewish day, *i.e.* the Sabbath, is what is meant. On the other hand, in Ro  $14^{5.6}$ , written a little later, to a Church where the controversy may not have reached such a height. the regarding or not regarding of such a height, matter of indifference. Finally, in Col 2<sup>16</sup> the Sabbath is distinctly mentioned as one of the ordi-nances 'which are a shadow of things to come.'

iii. The necessary separation of Christians from Jews, in Jerusalem, for a part of public worship (Ac 2<sup>46</sup>), naturally led to a total separation elsewhere, as in successive cities the Jews rejected the gospel altogether (Ac  $13^{46} 14^{2.3} \cdot 2^{1} 18^{7} 19^{9}$ ). Besides these passages, assemblies consisting exclusively of Christians are implied wherever we find directions for the reading of apostolic epistles (Ac  $15^{30}$ , 1 Th  $5^{27}$ , 2 Th  $3^{14}$ , Col 4<sup>16</sup>, cf. He 10<sup>26</sup>). Assemblies of a whole Church, of course, imply fixed days for meeting. The antagonism already marked by different places for worship, coupled with the confessed antiquation of the Sabbath, would naturally find further expression in the observance of a

# LORD'S DAY

holy day different from that of the Jews. The origin of the Lord's Day must not indeed be traced to mere opposition to Juduism, such as that naïvely confessed in the *Didacht* (8), 'Let not your fastings be with the hypocrites, for they fast on Monday and Thursday; but do ye keep your fast on Wednesday and Friday'; but this motive must have commended the observance of the first day of the week to a considerable number of Christians; and if the argument from silence could be pressed, -an argument especially precarious in the case of an ordinance presumably so much a matter of course,—it would be significant that the distinct notices of the Lord's Day in the NT are in connexion with Churches outside Palestine, *i.e.* Corinth, and by implication, Galatia (1 Co 16<sup>1, 2</sup>), Troas (Ac 20<sup>6</sup>), by implication, Galatia (1 Co 16<sup>4,2</sup>), Troas (Ac 20<sup>6</sup>), and Asia (Rev 1<sup>4</sup>), while  $K_{0\mu}ax\delta s$  seems to have been applied to a specially Christian service before it was applied to a specially Christian day. Be that as it may, the first day of the week was certainly selected because the Lord Himself had sanctified it by His resurrection (Mt 28<sup>1</sup>, Mk 16<sup>2, 19</sup>, Lk 24<sup>1</sup>, Jn 20<sup>1, 19</sup>), and had further emphasized it by a coord appearance to the disciples (Lr 20<sup>4</sup>) and second appearance to the disciples  $(Jn 20^{23})$ , and again by the outpouring of the Holy Spirit on the day of Pentecost, which that year was also the first day of the week. We cannot cite as instances of the observance of this day the fact that on these three occasions the disciples were assembled together as if for a religious purpose. In those days of fear and excitement they would naturally come together every day. The Lord's Day is therefore, in an especial sense, the feast of life. The resurrection of Jesus Christ was not merely the raising to life of an individual man, but of human nature. On that first Lord's Day our nature entered on a new life: actually, as regards the first-fruits of it; potentially, as regards every Christian in succeeding ages. But besides the life of the individual members, there is also the life of the body, and this sprang into birth on the day of Pentecost. Thus, without having recourse to the more or less fanciful analogies of some of the Fathers, we may, on sure grounds, contrast the remembrance on the Sabbath of the repose of the Creator of the physical world with the com-memoration on the Lord's Day of the beginning of the activity of the new spiritual creation.

iv. Much reflex light is thrown on the apostolic Lord's Day worship by the well-known passage (1 Apol. c. 67) where Justin Martyr, A.D. 150, describes the Sunday service. It consisted of the reading of the memoirs of the apostles and the writings of the prophets, followed by an exhortation on the lessons read, common prayer, the Eucharist, and a collection for the orphans, etc. This service was probably modelled on that of the synagogue, with the necessary additions, the chief being the Eucharist, as in Ac 2<sup>46</sup>. If the passage in Ac be rightly understood to mean a daily service, it must be noted that the daily Eucharist of the early Jerusalem Church belongs to the same order of things as its community of goods; an ideal which is practicable only under very special circumstances. It may reasonably be conjectured that experience which speedily led to the abandonment of the experiment in socialism, showed the wisdom of restricting the Eucharist is especially connected with the Lord's Day, not only as the perpetual memorial of the great sin-offering (1 Co 11<sup>20</sup>), but also as a means of renewing in us the divine life communicated in the first instance by the power of Christ's resurrection, and as an anticipation of the consummation of this divine life at His coming (He 10<sup>25</sup>, Mt 26<sup>29</sup>, Mk 14<sup>26</sup>, Lk

# LORD'S PRAYER

22<sup>18</sup>). Justin does not mention the agape. had probably been temporarily dropped in obedience to the law of Trajan against clubs (Ramsay, *Ch. in the Roman Empire*, p. 219). In 1 Co 11 the agape seems to precede the Eucharist, in Ac 20<sup>11</sup> it follows ( $\gamma evodueros$ , 'having made a meal'). This change in the order of service was possibly made by St. Paul himself (1 Co 11<sup>34</sup>). In Ac, as in Justin, the sermon precedes the Eucharist. The preaching of Lorus processited the talling of His deads and Jesus necessitated the telling of His deeds and words either from personal knowledge or from the written accounts of eye-witnesses, and this must have been from the beginning; on the other hand, the reading of apostolic Epistles, at first occasional, could become constant only after the Canon was closed. The collection mentioned by Justin is founded on 1 Co 16<sup>2</sup>, where EV 'lay by him in store' conceals the fact that it must have been made at the weekly meeting; otherwise, collections would have been necessary on St. Paul's arrival, the very thing he was anxious to avoid. παρ' έαυτῷ τιθέτω θησαυρίζων means 'let him assign a certain sum as he is disposed, and put it into the Church treasury.' In Corinth and elsewhere the exercise of extraordinary gifts formed part of the Sunday service (1 Co 14<sup>16</sup>), but this soon died out. Contrast the brief list of charismata in Eph  $4^{11}$  with that in 1 Co 1228.

See further, art. CHURCH, vol. i. p. 427<sup>a</sup>, and SABBATH.

LITERATURE - Hessey, Sunday: its origin, history, and present obligation, BL, 1800, 5th ed. 1889; Beet in Expositor, 2nd ser. viii. 338-350; and the Literature under SABBATII. N. J. D. WHITE.

LORD'S PRAYER. — This prayer is so called, not because the Lord used it, which He could not do, for some of the petitions would be meaningless for Him (and cf. Jn  $20^{17}$ ), but because He taught it to His disciples and us. It is given us by two evangelists (Mt  $6^{\mu-13}$ , Lk  $11^{2-5}$ ), in different forms, and in totally different connexions. The form given by St. Luke is not only much shorter, but differs somewhat in wording; and whereas St. Matthew represents Christ as giving this form of prayer spontaneously in the Sermon on the Mount, St. Luke places the delivery of the prayer after the close of the Galilæan ministry, and in answer to a request from one of His disciples, 'Lord, teach us to pray, even as John also taught his disciples.' But St. Luke gives no note either of time or place, probably because his source gave none. And it is quite possible that the incident which he here records took place very much earlier than the point in Christ's ministry at which

he places it. There can be no doubt that if the prayer was delivered only once, then it is St. Luke who has preserved the true historical occasion. His narrative has every appearance of originality, and one sees no motive for invention, wherens it is quite credible that St. Matthew, in recording Christ's injunctions about prayer, might emphasize and illustrate these by adding to them the form of prayer which He had enjoined. Accordingly, a large number of the best critics (Baumgarten -Crusius, Neander, de Wette, Ewald, Bleek, Holtzmann, Weiss, Godet, Oosterzee, etc.) regard the position of the prayer in Mt as unhistorical. But it must be remembered that there is no proof that the prayer was taught on one occasion only. The argument that, if the prayer was delivered in the Sermon on the Mount, then a disciple cannot afterwards have asked for a form of prayer; and that if he asked for one, then it cannot have been previously delivered, holds good only if we suppose that Christ's followers remained always the same. There is nothing to show that 'one of his disciples' (Lk 11') means one of the Twelve.

Different groups of disciples might at different times require teaching as to a form of prayer; and at one time Christ might give such instruction unasked, at another because He was requested to do so. In either case it is remarkable that the prayer is not directly alluded to elsewhere in the Gospels (cf. Mk 14<sup>33</sup>), nor in the Acts (cf. 2<sup>42</sup>), nor in the Epistles (cf. Ro 12<sup>13</sup>, Col 4<sup>2</sup>). There may be indirect allusions to the last petition, Jn 17<sup>15</sup>, 2 Th 3<sup>3</sup>, and possibly 2 Ti 4<sup>38</sup>. See Lightfoot on 2 Th 3<sup>3</sup>.

But if we admit that the prayer was delivered only once, and that St. Luke gives the actual occasion, it by no means follows that he gives the original form of the prayer, as Meyer, Kamphausen, and others suppose. In one sense neither form is original, for the original would be in Aramaic; and it is quite evident that both Mt and L<sub>k</sub> used a Gr. source, as the large amount of agreement in wording, and, above all, their common use of the unique word  $\epsilon \pi i o \sigma \sigma \sigma$ , shows. Their versions cannot be independent  $tr^m$  of the same Aram. original. Much more probably they had the same Gr. original; and Mt, although he puts it in the wrong place, yet reproduces it more exactly. Of course, if the prayer was delivered more than once, then both forms may be original, in the sense that both represent in Greek a form which Christ used in His instructions. It is conceivable that one form was suitable for one group of disciples, another for the whole body of them.\*

Accepting, however, the hypothesis that Mt more accurately gives us the original form, it may be asked whether the variations in Lk are due to himself or to the source which he used. There are good reasons for believing that some of them are due to himself. This is most apparent in the fourth petition. For  $\delta \delta \pi \mu \bar{\nu} \sigma \tau \mu e \rho \sigma$  (Mt) Lk has  $\delta \delta \delta \upsilon ~ \dot{\mu} \mu \bar{\nu} ~ \tau \delta x a \theta' ~ \dot{\mu} \mu e \rho \sigma$  (Mt) Lk has  $\delta \delta \delta \upsilon ~ \dot{\mu} \mu \bar{\nu} ~ \tau \delta x a \theta' ~ \dot{\mu} \mu e \rho \sigma$  (Mt) Lk has  $\delta i \delta \upsilon ~ \dot{\mu} \mu \bar{\nu} ~ \tau \delta x a \theta' ~ \dot{\mu} \mu e \rho \sigma$  (Mt) Lk has  $\delta i \delta \upsilon ~ \dot{\mu} \mu \bar{\nu} ~ \tau \delta x a \theta' ~ \dot{\mu} \mu e \rho \sigma$  (Mt) Lk has balanced  $\sigma \eta \mu e \rho \sigma$  into  $\tau \delta x a \theta' ~ \dot{\mu} \mu e \rho \sigma$  rather than St. Matthew who has done the reverse. This change from the aorist to the present imperative; and thus 'Give us this day' became 'Continually give us day by day.' In Lk the petition is made more comprehensive. That the aorist rather than the present was the original form, is shown by the fact that in all the other petitions the aorist is used. Again, when we find  $\delta \phi e \tau h \mu \bar{\nu} \tau \delta \phi \phi e i \lambda \mu \mu a \tau$  $\sigma e consist is Lk who has changed the ex$ pression in order to make the meaning clearer $to Gentile readers. The insertion of <math>x a \tau i$  with  $\delta \phi e i \lambda \sigma r i$  is also very characteristic of St. Luke, and certainly  $\dot{\omega}s x a i a \dot{\sigma} \sigma i d \phi i \rho a \mu e than$ cice versd; all the more so, as Lk is specially fond $of the combination sal a b <math>\sigma \delta s$ , a a b  $\sigma \delta s$ ,  $x \cdot \lambda$ .

The differences which are the result of the presence in Mt of clauses that are wanting in the best texts of Lk require more detailed discussion. These clauses are: (1)  $\eta\mu\omega\nu\delta$   $d\nu$  rosc ovparosc, (2)  $\gamma ern \theta \delta r m \sigma \tau \delta \theta \delta n \mu \Delta \sigma \sigma \omega \delta \epsilon \nu$   $obpav \omega$  kal  $\epsilon rl$   $r \eta s$ ,  $\gamma \eta s$ , (3)  $d\lambda\lambda \Delta$   $\beta \delta \sigma a i$   $\eta\mu a \delta \sigma \sigma \sigma \sigma \eta \rho o \delta$ . Tisch., Treg., WH, RV, Alford, Weiss, Godet, Scrivener, Hammond, and many others, reject these passages as insertions in Lk from the text of Mt. 'If one of the Gospels contained the Lord's Prayer in a shorter form than the other, nothing was so likely as that a scribe in perfect innocence would supply what he considered an undoubted defect' (Scriv.

\* F. H. Chase supposes that the disciples themselves adapted the prayer to special occasions, both altering and adding, and that *irreforms* is one of the subsequent changes made for liturgical purposes (*Texts and Studies*, i. 3, Camb. 1891). LORD'S PRAYER

Introd. ii. p. 280). The evidence is not quite the same in all three, cases, but in all it is conclusive against the clauses.

(1) For this clause entire we have ACDPXTAAII and nine inferior uncials, nearly all cursives, be flg of Vet. Lat. (a cff\_i have sancts for noster), three Syriac Versions (Cur. Pesh. Harcl.), have sancts for noster), three Syriac Versions (Our. Pean. HarCl.), Boheiric, and Ethiopic. Against the whole clause, #B, 1, 22, 57, 130, 346, nearly all the chief MSS of the Vulg., and the recently discovered Sinaitic Syriac. Against all but ήμῶν, L and one cursive, one early MS of the Vulg. and the Armenian. Origen expressly states that the words are wanting in Lk. Tertullian and Cyril of Alexandria support the omission. (2) For the clause, MACD and many inferior uncials, nearly all cursives most MSS of Vat Lat Surg (Pean Haral) Boh Fth

(2) For the clause, #ACD and many inferior uncials, nearly all cursives, most MSS of Vet. Lat. Syrr. (Pesh. Harcl.), Boh. Eth. Against it, BL, 1, 22, 130, 346;  $\Pi_2$  of Vet. Lat., best MSS of Vulg. Syrr. (Our. Sin.) and Arm. Orig. Tert. and Aug. give express testimony against, and are supported by Oyr. Alex. (3) For the clause, ACD and many inferior uncials, nearly all cursives; Vet. Lat. Syrr. (Cur. Pesh. Harcl.) Boh. Eth. Against it, \*BL, 1, 22, 57, and six other cursives, most MSS of Vulg. Syr. Sin. and Arm. Orig. Aug. and Cyr. Alex. give express testimony against, and are supported by Tert.

The evidence for the clauses may look imposing, but the explanation of it given by Scrivener is simple and adequate; whereas neither accident nor intention can explain the early and widespread omission of all three, if they were found in the original text of Lk. In such a case the temptation to insert would be at a maximum, the temptation to omit at a minimum. A scribe might insert the missing words almost mechanically, being so familiar with them.

Convinced, therefore, that the clauses are not genuine in Lk, we return to the question, What can have induced Lk to omit them, if he and Mt had the same Gr. version of the prayer? His verbal alterations in the fourth and fifth petitions are intelligible; but why should he, with his love of completeness, omit? He does sometimes abbrevi-ate; but would he have abbreviated here? The difficulty of finding an adequate motive for his curtailing such words is in favour of the view that Christ Himself on one occasion gave this shorter form to some disciples. To suppose that Lk 'contented himself with words just sufficient to remind his hearers of the fuller form,' is quite inadequate. In that case he would have left out nearly the whole of the prayer. And to point out that the five petitions in Lk correspond to the five

fingers, is grotesque. The sources of the prayer have been often discussed, and rabbinical parallels to the different petitions have been pointed out by John Lightfoot, Schoettgen, Vitringa, Wetstein, and others. Tota hace oratio ex formulis Hebraeorum concinnata est tam apte, ut omnia contineat que a Deo peti possunt (Wetst. on Mt 6<sup>9</sup>). But the parallels do not carry us very far. The use of 'Father' ['yaw carry is a very common later Jewish title, Dalm. 151 ff. ] to designate God, and the petition, 'Hallowed be thy name through our works,' are perhaps the strongest instances [of. also הספר הקרות and היסי יסלי of the Kaddish, Dalm. 305]. Others are similarities of wording rather than of meaning, and some of these are not at all close. And in most cases the date of the Jewish prayers in which these expressions occur is either late or uncertain ; so that the borrowing, if there is any, is on the so that the borrowing, if there is any, is on the side of the Jews, or may be so. But no horrowing is needed to explain such a petition as 'Forgive us our sins' (Ex  $32^{23}$ , 1 K  $3^{24}$ ,  $3^{25}$ ,  $3^{2$ the best Jewish aspirations and combined them in one prayer. He probably took the Messianic title 'Son of man' from the Bk. of Enoch, and applied it to Himself with a fulness of meaning unknown before. He might have done the same in the Lord's Prayer; but He does not appear to

# LORD'S PRAYER

have done so. Indeed, the prayer is free from anything that can be called purely Jewish. (1) Its symmetry and progressive development of thought, and (2) its inexhaustible adaptability, are char-acteristics which do not harmonize well with the hypothesis that it is a compilation (Edersheim, Life and Times of the Messiah, i. p. 536. Cf. Taylor, Sayings of the Jewish Fathers, p. 138 fl.). Let us examine these characteristics.

(1) The Lord's Prayer is commonly regarded as consisting of seven petitions.\* The frequent occurrence of the number seven in the Apoc. and elsewhere renders this arrangement attractive. But there are really only six; for 'Lead us not into temptation, but deliver us from the evil one,' should be regarded as the negative and positive expression of one and the same petition.† These six are found to correspond to the Decalogue and the Two Great Commandments (Mt  $22^{10}$ , Mk  $12^{31}$ ), in that the first half has reference to God, the second half to man. In the first three petitions we seek the glory of our heavenly Father; in the last three the advantage of ourselves and our fellow-men. But these two are closely connected. What is to God's glory benefits His children; and what is to the advantage of men glorifies their heavenly Father. Thus the first half shows the end which man must have in view-the accomplishment of God's glory, kingdom, and will; the second half shows the means—daily provision, forgiveness, and protection. And the parts correspond with one another in each triplet. The first petition is addressed to God as our Father, the second as our King, the third as our Master. It is to our Father that we look for sustenance ; to our King for pardon; to our Master for guidance and guardianship. Moreover, the transition from heaven to earth is beautifully made in the third petition, which raises earth to heaven. And in each of the triplets we can observe progression. The hallowing of God's will shall be ful-name leads to the coming of the kingdom; and when the kingdom is come God's will shall be fulwe have first the obtaining of good, and then the removal of evil, past, present, and future. Or, if we take the six petitions consecutively, we shall had that they begin with the glories of heaven, pass on to life on earth, and end with the powers of hell.: Such exquisite proportion and develop-ment (of which only specimens have been given) are strong evidence that, if this marvellous prayer was constructed out of fragments of other prayers, it was composed in the spirit and power of Him who said, 'Behold, I make all things new' (Rev 215).

 $\frac{1}{2}$ . We are not to suppose that the disciple who asked Christ to teach him and his fellows to pray had never prayed, and did not know how to do so. He had no doubt often performed this duty. But he had just witnessed Christ's devotions; and His manner showed him the difference between Christ's prayers and his own. There was a more excellent way than he knew, and he desired to learn it. Moreover, the Baptist had taught his disciples a distinctive form of prayer; and this suppliant thought that Jesus also should give a similar dis-tinctive mark to His followers. As so often, Christ grants the substance rather than the letter of the request. Just as a Christian mystery is a divine secret revealed to all the world, so the distinctive

secret revealed to all the world, so the distinctive \* So Augustine, Luther, Tholuck, Bleek, Hilgenfeld, Keil, Köstlin, Nosgen, Wordsworth, etc. + This is Tertullian's view (de Orat, vili.). In his form of the prayer fact voluntas tua in actis et in terrs preceded sensist regnum tuum. Origen, Chrysostom, Calvin, Keim, Weiss, and others, make six petitions. But an allusion to the Trinity is very doubtful. To make the second petition refer to the Son, and the third to the Spirit, is very forced and fanciful. 1 All this is lost in Lk; and this is storing evidence that, if only one form is original, his form is not the original one.

# LORD'S PRAYER

LORD'S PRAYER

prayer of a Christian is one which every human being who believes in God can use. There are no other limits to its unique adaptability. Any one, of any race or age or condition, who believes in God, can use the Lord's Prayer, and use it just in proportion to his belief. A peasant child can understand enough of it to make it the expression of his daily needs. The ripest scholar, philosopher, and saint cannot exhaust all its possibilities of meaning. In a few minutes it may be committed to memory; but it is the work of a lifetime to learn it by heart. A Christian's knowledge of the import of it grows with his spiritual experience.

The prayer is at once a form, a summary, and a pattern.

It is a form which every one can use, and be certain that in using it he is expressing his needs in a becoming manner. This advantage is possessed by forms of prayer which have been composed by saintly men, and which have been tested in use by generations of Christians. How much more, then, does it belong to a form prescribed by Christ Himself. Que enim potest esse spiritalis oratio quam quae a Christo nobis data est . . . agnoscat pater filli sui verba, cum precent facimus (Cypr. de Domin. Orat. ii. iii.). Not that one form of words affects God more than another, so long as the language of the heart is according to His will; but that the form of words that we use reacts on our hearts, and if the words are unseemly our hearts may become less subdued. And in prayers that are to be used in common, the effect of the words upon others must be considered. In giving this prayer, Christ has both sanctioned the principle of forms of prayer and has also provided us with a form which is always safe. The lard's Duran in the same of all others

The Lord's Prayer is also a summary of all other prayers. As Latimer says, 'Like as the law of love is the sum and abridgment of the other laws, so this prayer is the sum and abridgment of all other prayers.' It covers all earthly and spiritual needs and all heavenly aspirations. It is not meant to supersede all other forms of supplication. When Christ gave us this, He did not forbid others. But this one rightly accompanies all other prayers, either following them to sum them up and prevent grave omissions, or preceding them as a guide or model : praxmissa legitima et ordinaria oratione quasi fundamento, accedentium desideriorum jus est superstruendi extrinsecus petitiones (Tert. de Urat.). It is breviarium totius evangelii (ib. i.).

For the prayer is also a *pattern*. It shows in what manner and spirit our other supplications are to be made. We may pray only for those things which tend to the glory of God and the good of man; and the glory of God comes first. The final end of prayer is not that our will should be done by Him, but that His will may be done in us. In the beautiful image used by Clement of Alexandria, 'Just as men at sea attached to an anchor by a taut rope, when they pull at the anchor, draw not it to themselves, but themselves to the anchor; so in the gnostic life those who (as they mean it) draw (Jod to themselves are unawares bringing themselves towards God' (Strom. IV. xxiii. p. 633, ed. Potter).

A consideration of the petitions one by one belongs to commentaries and homiletics rather than to a dictionary; but some notice must here be taken of three details in the prayer, (a) the opening address, (b) the central word  $\epsilon\pi colorios$ , and (c) the last clause.

(a) The address IIdrep  $\eta\mu\omega r$  has no parallel in OT. There God is spoken of as the Father of the Jewish nation (Dt 32<sup>6</sup>, Is 63<sup>16</sup>, Jer 3<sup>4, 19</sup> 31<sup>9</sup>, Mal 1<sup>6</sup> 2<sup>10</sup>); but He is nowhere called the Father of individuals. This step is taken in the Apocr. (Wis 2<sup>16</sup> 14<sup>3</sup>, Sir 23<sup>1, 4</sup> 51<sup>16</sup>, To 13<sup>4</sup>, 3 Mac 6<sup>3</sup>). But it is only in NT that

we are told that men have received the 'right to become children of God' (Jn 1<sup>13</sup>, cf. Ro 8<sup>23</sup>, Gal 4<sup>3</sup>). Every Christian, and indeed every human being, is justified in regarding himself as the offspring of God (Ac 17<sup>28, 29</sup>), and in addressing Him with reference to his fellow-men as 'Our Father.' The address is at once a claim to be heard, and to be heard for others as well as for oneself. Quid enim jam non det filis petentibus, cum hoc ipsum ante dederil, ut filis essent (Aug.). See vol. ii. p. 618. (b) It is not likely that we shall ever know with

(b) It is not likely that we shall ever know with certainty either the origin or the exact meaning of the adjective in the origin or the exact meaning of the adjective in the origin or the exact meaning of the adjective in the origin or the exact meaning of the adjective in the origin of the adjective in the prayer. Nowhere in Gr. literature is the word found until the Gospels gave it currency. To derive it from  $i\pi einema, i\pi win, or in and obtal, is precarious: for in that case we should expect <math>i\pi ownore, in the derivation from <math>i\pi i einema = 0$  and  $i\pi i = 0$  for the derivation from  $i\pi i einema = 0$  for the derivation from  $i\pi i einema = 0$  for the derivation from  $i\pi i einema = 0$  for the coming day, or ' that cometh,' or ' continual,' or ' daily.' Jerome changed guotidianum in Mt to supersubstantialem, but made no change in Lk; so that in the West there was a general belief that the two evangelists had used different words. It is possible, as Chase suggests, that there was no epithet in the Aram. original, and that its insertion comes from liturgical use. But that hypothesis, if true, is not decisive as to meaning, although it supports the temporal rather than the qualitative interpretation. For the temporal meaning see Grotius, Wetstein, Fritzsche, Meyer, and, above all, Lightfoot, On a Fresh Revision of the NT, App. I. For other views see Suicer, Tholuck, Alford, Wordsworth, and, above all, M'Clellan, The NT, i. pp. 632-647. RV retains 'daily' in the text, and puts 'for the coming day' in the margin. The American Committee would add 'needful' in the margin. It is a strange phenomenon that the meaning of this unique word in the model prayer should, almost from the earliest times, have been doubtful. The Didroche, which has the earliest quotation of the prayer (viii.), throws no light on this point.

throws no light on this point. (c) Does jour in the point is the point point is the point point is the point is point in the point is the point is point in the point is point in the point is point in the point is point to the point p

\* But this is not conclusive; for the word may have been coined in contrast to expansion (Ex 198, Dt 75 142  $\pm$ 3615); and in that way the *i* of the isri might be retained contrary to usage (Jannaris, Tholuch).

line; Luther, Tholuck, Keil, Nösgen, Alford, M'Clellan, follow Augustine in accepting the neuter. Canon Cook's defence of this view in the Guardian, Sept. 1881, should be consulted.

That the doxology in St. Matthew is an interpolation due to liturgical use is admitted by all competent critics on the authority of NBDZ, five cursives, Latt. Boh. Orig. Tert. Cypr. Aug. Those authorities which contain it vary as to the wording, and as to the addition or omission of 'Amen'; while some have 'Amen' without the doxology. Even Wordsworth surrenders it, although 'with hesitation.' Perhaps its original source is the Heb. of 1 Ch 29<sup>11</sup>; and not until Chrysostom does its wording become in general stereotyped. But as it is found in the Syr-Cur. and in the Sahidic, it must have been added to the Lord's Prayer in some places as early as the 2nd cent. Comp. 2 Ti  $4^{18}$ , where we have an ascription of glory to Christ, which is erroneously supposed to favour the genuineness of the doxology in Mt 613.

From Tertullian (adv. Marcion. IV. xxvi.), from Gregory of Nyssa (de Orat. Dom. p. 60, ed. Krabinger), and from the cursive 604 (Hoskier, 1890), we see that in Lk some texts had a petition for the gift of the Spirit instead of either 'Thy kingdom come' or 'Hallowed be Thy name.' The fullest text of this petition reads thus : 'E $\lambda \theta \epsilon \tau \omega \tau \delta$ fullest text of this petition reads thus: ENStruction  $\dot{\tau}$   $\pi re \tilde{v} \mu d \sigma ov \tau \delta d \gamma or \dot{\epsilon} \phi' \dot{\eta} \mu \hat{a}s$  kala had had  $\tau \phi \dot{\tau} \phi$ Comp. the  $\dot{\epsilon} \phi' \dot{\eta} \mu \hat{a}s$  in D, which has  $\dot{\epsilon} \gamma a \sigma \delta \dot{\tau} w$  troud  $\sigma ov \dot{\epsilon} \phi' \dot{\eta} \mu \hat{a}s$ ,  $\dot{\epsilon} \lambda \theta \dot{\epsilon} \tau w \sigma ov \dot{\eta} \beta a \sigma i \lambda \dot{\epsilon} la$ , sanctificetur nomen tuum super nos, veniat regnum luum. Against all reasonable probability Keim holds this petition for the Spirit to be 'really original in Luke,' and points to 11<sup>13</sup> as evidence (Jesus of Nazara, iii. p. 338 n.). There is evidence also of an early Latin gloss

There is evidence also of an early Latin gloss on Ne nos inducas in temptationem which was sometimes admitted into the prayer. Both Cyprian (de Dom. Orat. xxv.) and Augustine (de Serm. Dom. ix. 30) have ne patiaris induci nos,-obviously in order to lessen the difficulty of supposing that God brings us into temptation. This difficulty produced another Latin gloss: ne inducas nos in temptationem quam ferre non possumus (Jerome, in Ezek. xlviii. 16). And these two glosses are sometimes found combined. Each of them is found in writers of different ages and countries, and of liturgies of different families; they must therefore be of early origin. Comp. Hilary, *in Ps.* cxviii.

LITREATURE -- This is very abundant. Among the most important: Origen, rap: uzer; Chrysost. Hom. ziz. in Matt. and Hom. de inst. secundum Deum vita; Greg. Nyss. de Orat. II.; Tertul. de Orat.; Oypr. de Orat. Dom.; August. de Serm. Dom. in Mon.; Jerome, Dial. c. Pelagianos, III. xv.; Luther, Small Catechism, and other writings; Gebser, de Orat. Dom., Regiom. 1830; Tholuck, Bergpredigt, 1833, 1844 [translation by Brown, Edinburgh, 1869]: Kamphausen, Das Gebet des Herrn, 1866; Chase, Lord's Prayer in Early Church, 1891; Wünsche, Erläuterung der Evangg. p. 34 fl. I. TERMINOLOGY .- A discussion of the language used in Scripture respecting the Lord's Supper is of necessity confined to the NT. But only once in NT is the Lord's Supper so called,  $K\nu\rho\mu\alpha\kappa\delta\nu$   $\delta\epsilon\hat{\kappa}\nu\rho\sigma$ (1 Co xi. 20); for we may safely follow the con-

# LORD'S SUPPER

sensus of ancient and modern commentators in interpreting this unique expression of the Eucharist (see, however, Maldonatus on Mt 20<sup>20</sup>). The emphasis is on Kuptakir : 'it is not (possible) to eat a Lord's Supper,' for the unseemly conduct turns it into lowrinder deferror (Chrys.). And we may possibly infer from the use of an adjective rather than a genitive that the name Kupiakor deinror was already in use when St. Paul wrote. Cf. Kupiary nuepa

(Rev 1<sup>10</sup>). There are, however, other expressions in NT There are, however, other expressions in NT which certainly or possibly mean the Lord's Supper. 'The cup of blessing,'  $\tau \delta \pi \sigma \tau \hbar \rho \omega \tau \tau \tilde{\tau} s$ ei $\lambda \sigma \gamma i a s$  (1 Co 10<sup>16</sup>), *i.e.* the cup over which the blessing has been pronounced, unquestionably refers to the eucharistic cup, as the context shows. It is that  $\delta ei\lambda \sigma \gamma \delta \eta \omega \epsilon \sigma$ , which we consecrate by  $ei\lambda \sigma \gamma i a$ , by the expression in words of our  $ei\chi a \rho \omega \sigma \tau i a$ . We might tr. 'the cup of thanksgiving over which we give thanks,' or 'which we give thanks for' (Crem. Lex. p. 767). But the use of  $ei\lambda \sigma \gamma \alpha \sigma \tau i a$  is evidence that the latter word has than examoria is evidence that the latter word has not yet gained its special meaning. The ex-pression is borrowed from Judaism, being the name of the most sacred of the cups handed round at the paschal meal, of which cups it is commonly identified with the third (Edersh. Life and Times, ii. 511). Nor is there any doubt that  $\pi \sigma \tau \eta cov$ Kuptov (1 Co 10<sup>21</sup>) and  $\tau \rho d\pi \epsilon f a$  Kuptov (1 Co 10<sup>21</sup>, cf. Mal 1<sup>7. 12</sup>) refer to the eucharistic cup and the eucharistic table with the food thereon. Here we have the genitive and not an adjective; and the context shows that the dominant idea is union between the recipients and Christ, rather than union of the recipients with one another. About thich of the feelplenes when there is more doubt. In Scripture 'bread' is a common name for any In Scripture 'bread' is a common name for any food, and includes drink also. 'Eating bread' (Mk 3<sup>20</sup>) and 'breaking bread' (Ac 2<sup>46</sup>) may be the same as 'taking food' (Ac 9<sup>19</sup> 27<sup>36</sup>); but 'eating bread' is the common general term, whereas 'breaking bread' is rare (Jer 16<sup>7</sup>, La 4<sup>4</sup>; cf. Lv 2<sup>4</sup>, Is 58<sup>7</sup>, Xen. Anab. VII. iii. 22). St. Luke is the only writer who uses ή κλάσιs τοῦ άρτου (2435, Ac 212). The former passage probably does not refer to the Eucharist; for the meal at Emmans (Lk 24<sup>30</sup>) most probably was not such. The context and the imperf.  $e \pi e \delta i \delta o v$  are against it. Nowhere is the imperf. used of the distribution of the Eucharist (Mt 26<sup>20</sup>, Mk 14<sup>22</sup>, Lk 22<sup>19</sup>, 1 Co 11<sup>20</sup>); whereas it is used of the distribution of ordinary food, *e.g.* at the feeding of the 5000 (Mk 6<sup>41</sup>, Lk 9<sup>16</sup>) and of the 4000 (Mk 8<sup>6</sup>, Mt 15<sup>29</sup>). But in Ac 2<sup>42</sup> the context favours the eucharistic interpretation, which the Lat. version of Cod. Bezæ, followed by Vulg., enforces with in communications fractionis panis (cf. Clem. Recog. vi. 15). The four elements of the common Christian life are given in two pairs; and the combination  $\tau_{\beta}$  kλάσει τοῦ άρτου και ταῖs προσευχαῖs indicates that 'the breaking of the bread' means something more than an ordinary meal; and the context here and in 20<sup>7. 11</sup> 27<sup>35</sup> forbids us to interpret it of distributing food to the poor (Is 587). Yet even here the explanation must not be confined to even here the explanation must not be confined to the Eucharist. In Scripture there is no trace of the Eucharist being separated from the joint evening meal or  $d\gamma d\pi\eta$ ; and 'the breaking of the bread' covers the whole. We must not lose sight of the family character of the life of the first Christians. 'The breaking of the bread' took place in their own homes; 'the prayers' may refer to their constant devotions in the temple (Lk 24<sup>83</sup>). Ac 2<sup>46</sup> 3<sup>1</sup>). It is doubtful whether the Eucharist is included in  $\kappa\lambda\omega rres \kappa a \tau$  of or  $\delta \sigma r \sigma r$  (Ac 2<sup>46</sup>) " or in  $\kappa\lambda d\sigma a s$   $\beta \beta \xi a \tau o \ \epsilon \sigma \theta (\epsilon i r (27<sup>36</sup>))$ . The latter is specially

 $^{\circ}$  If Ac 2<sup>46</sup> does not refer to the Eucharist, then the supposition that the Eucharist was celebrated daily in the earliest age has no foundation. Ac 207-11 points to Sunday as the usual day.

improbable; and here the Western interpolation eridedous sai quir was added to suggest a Eucharist, an interpretation which Tertullian adopts (de Orat. 24). On the other hand, both the Eucharist and the common meal are perhaps indicated in Ac 20<sup>7, 11</sup>. The mention of the first day of the week points to religious observance : and yevoduevos seems to refer to the common meal after the «lágas rd» dpror in the Eucharistic rite. Only in 1 Co 14<sup>16</sup> is it supposed that  $\eta \, \epsilon v \chi a \rho \iota \sigma \tau \iota a$  is used in the specific sense of Eucharist rather than in that of thanks-giving generally. Yet it is not probable that St. Paul is here deviating from his use of the word elseration is here deviating from its use of one work effective where ( $2 \text{ Co } 4^{15} 9^{11}$ , Eph 5<sup>4</sup>, Ph 4<sup>6</sup>, Col 2<sup>7</sup> 4<sup>7</sup>, 1 Th 3<sup>9</sup>, 1 Ti 4<sup>3, 4</sup>, and in the plur. 2 Co 9<sup>13</sup>, 1 Ti 2<sup>1</sup>), which is also the common use both in NT (Ac 24<sup>3</sup>, Rev 4<sup>9</sup> 7<sup>13</sup>) and in LXX (Wis 16<sup>26</sup>, Sir 37<sup>11</sup>, 2 Mac 2<sup>27</sup>). The use of  $ev_{\chi a \rho_{i} \sigma \tau e \hat{\nu}}$  in the next two verses (<sup>17, 18</sup>) shows that thanksgiving generally is meant. And And this is confirmed by the use of evapioreiv in Clem. Rom. Cor. 41. But the use of eixaptoria in the specific sense begins very early. We find it in the Ignatian Epistles (*Philad.* 4; *Smyrm.* 7) side by side with the general meaning (*Eph.* 13). The same double use is found in Justin Martyr (*Apol.* i. 64–66, Try. 116, 117). The specific sense is common in Teruthing (*Depart of Alchapteria* and Currier in Tertullian, Clement of Alexandria, and Cyprian. But it is remarkable that neither Justin, nor Cyprian (Ep. 63), nor Firmilian in his letter to Cyprian (Ep. 65), nor Cyril of Jerusalem (Catech. 19, 22, 23), say anything about either the εύλογία or the  $\kappa\lambda d\sigma \omega$ , both of which are so prominent in NT. Other terms which in course of time became names for the Lord's Supper are *kourwrla*,  $\tau \hat{\omega} r$ μυστηρίων κοινωνία, προσφορά, λειτουργία, μυστήριον συνάξεως, μετάληψις άγιασμάτων, άγία μετάληψις, communio, communicatio, perceptio corporis et san-guinis, etc. Words which originally designated one part of the rite were used to express the whole.

The part of the rite were used to express the whole. II. OT TYPES.—(a) We have the authority both of Christ and of St. Paul for regarding the manna as a type of the Eucharist. The great discourse on the Bread of Life, no doubt, covers all those means of grace by which Christ is imparted to believers. But a special reference to the Lord's Supper is clear from the words used about eating the flesh of the Son of Man and drinking His blood, and from the fact that just a year after this discourse Christ instituted the Eucharist. It is incredible that this momentous act in the work of redemption had not yet been thought of by Him when He spoke at Capernaum. The references to the manna in the discourse are frequent, and the correspondence between the language used (Jn 6<sup>31, 69-59</sup>) and the accounts of the institution cannot be fortuitous. The *wevyarixiv βρûµa* of 1 Co 10<sup>3</sup> refers to the manna regarded as supernatural food. The apostle takes this supernatural food as a type of the Eucharistic bread; and it is possible that the epithet *wevyarixiv* is selected with reference to the Lucharist rather than to the manna. The exact meaning of what is said about the *wevyarixiv ropa* is doubtful; but evidently the water supernaturally supplied to the Israelites is regarded by St. Panl as a type of the blood of Christ received in the Eucharistic cup.

(b) Patristic writers find types of the Lord's Supper in the gifts made by Melchizedek, in the shewbread, and in other offerings. With regard to Melchizedek, it is remarkable that the author of the Ep. to the Heb., who is the only NT writer who mentions him ( $5^{6.10}$   $6^{20}$   $7^{1-17}$ ), passes over the fact that Melchizedek 'brought forth bread and wine' (Gn 14<sup>16</sup>). As we are immediately afterwards told that 'he was priest of God most High,' it is not surprising that patristic writers treat this bread and wine as a sacrifice offered by the priest-king, and as a type of the Eucharist:  $\tau \eta \nu \eta \eta \tau$ . VOL. 111.—10

ασμένην τροφήν είς τύπον εύχαριστίας (Clem. Alex. Strom. iv. 25, p. 637, ed. Potter); imago sacrificis in pane et vino constituta (Cypr. Ep. 63). Jerome goes further, and says that this sacrifice of bread and wine was offered for Abraham (ad Matt. 22<sup>41</sup>). See Westcott on He 7<sup>1</sup>.

(c) It is obvious that, as the Lord's Supper commemorates the sacrifice made by Christ on the Cross, whatever was a type of that sacrifice may be called a type also of the rite which commemorates it; and, where the offering was bread, the inducement to treat it in this way would be the greater. Cyril of Jerusalem thus uses the shewbread (*Catech.* 22). In a similar manner Justin treats Is  $33^{16}$  (*Try.* 70), and Irenzeus treats Mal  $1^{11}$  (IV. xvii. 5, 6) as a prediction of the Eucharist.

III. PARTIAL ANTICIPATIONS.— $(\alpha)$  Just as the chief type, viz. the manna, is indicated by Christ Himself, so also is the chief anticipatory rite, viz. JESUS CHRIST, vol. ii. p. 634] while celebrating the paschal supper that He instituted the rite which was to supersede it, and be known as the Lord's Supper. And here a remarkable parallel with the institution of Christian baptism exists. The original rite for admission to Judaism was circumcision. This was supplemented by baptism, which in later times became the only rite of initiation applicable to both sexes. In the original ritual of the Passover, the lamb, unleavened bread, and bitter herbs were the essentials (Ex 12<sup>6</sup>). The wine and the solemn 'cup of blessing' were later accessories. Just as in the one rite Christ abandoned the circumcision and retained the baptism, so in the other He abandoned the lamb and retained the wine. In both cases the rite was made unbloody and painless; and from the treasure-house were brought forth things new and old. There is a new departure; but also a clear connexion with the past; for Providence, even in its revolutions, is conservative.

(b) By speaking of 'my blood of the covenant,' or 'the new covenant in my blood,' Christ seems to have connected this new feast with those sacrificial feasts in which the worshippers, by partaking of the sacrifice, partook of the blessing which the sacrifice was to win. This was an idea with which the disciples were quite familiar. That there was any idea of a death-feast, or of an adoption-feast, is much less probable. We know little about death-feasts among the Jews. And although some Semitic peoples had rites in which the partaking of the tribal animal was supposed to put the blood of the tribe into the partaker's veins (W. R. Smith, RS pp. 317, 318), yet there is no trace of this idea in the Lord's Supper. It is by baptism that aliens are admitted to the Christian family.

IV. HISTORY OF THE CHRISTIAN RITE.—This can be conveniently treated under four heads: (a)the Institution, (b) the Recipients, (c) the Minister, (d) the Rite.

(a) The Institution, according to the universal testimony of Scripture and of tradition, dates from the act and command of Christ at 'the last supper,'-the last meal of which He partook before His death. An attempt has been made to show that He must have instituted the Eucharist earlier in His ministry: (1) because 'St. John in his sixth chapter represents our Lord as using Eucharistic language which would have been absolutely without meaning, if the Eucharist had not been already in common use'; and (2) because 'the two disciples journeying to Emmaus recognized our Lord in the Breaking of Bread (Lk  $24^{30.36}$ ). They had not been present at the Last Supper. The rite, if it was really then instituted for the first time, would

have had no significance for them' (Wright, Synopsis, p. xiii).

This is very unconvincing. (1) It was Christ's way, even with the disciples, to utter about future events words which they did not, and in some cases could not, understand at the time, but which they did understand when the events had taken place. He knew that the discourse on the Bread of Life would acquire fresh and fuller meaning when the rite which He intended to found was instituted. But it is an exaggeration to say that it was 'absolutely without meaning' and an 'insoluble enigma' until the Eucharist was instituted. Had it no meaning for the large majority of the audience, who, upon any hypothesis, did not know, and never would know, anything of the Eucharistic rite ? (2) The two disciples at Emmaus may have been present when Christ proke order and gave thanks at ordinary meals, or at the feeding of the 4000 and of the 5000. It was something in His way of doing this at Emmaus that enabled them to recognize Him at the supper there which was probably not a Eucharist. We may have been present when Christ broke bread there, which was probably not a Eucharist. may safely follow the clear and strong evidence of the Synoptists and of St. Paul, that the Eucharist was instituted at the last supper. St. Paul's reference to it,  $\tau \delta$  Kuplander  $\delta \epsilon i \pi \nu \sigma r$ , which is older than any of the Gospels, could hardly have been made in this form, if the Lord's Supper, on the night of His betrayal, had not been the time when it originated. See vol. ii. p. 636.

Of the institution we have four accounts; and it will be worth while to place them side by side in two pairs, to facilitate an estimate of their substantial agreement.\* Brandt's assault on their Statistical agreement. Drainer's assault on them trustworthiness has been answered by Schultzen, Das Abendmahl im NT, 1895, p. 67 ff. They are neither intrinsically incredible, nor inconsistent with other statements in the Gospels, nor contradicted by early evidence outside the NT.

#### Mt 2628-29.

έσθιόντων δέ αὐτῶν λαβών ο Ίησοῦς άρτον καὶ euroynoas Extager rai δούς τοις μαθηταίς είπεν, Λάβετε φάγετε, τοῦτό ἐστιν τὸ σῶμά μου. καὶ λαβών ποτήριον και εύχαριστήσας έδωκεν αύτοις λέγων, Πίετε έξ αὐτοῦ πάντες, τοῦτο γάρ ἐστιν τὸ αξμά μου της διαθήκης το περί πολλών έκχυννόμενον είς αφεσιν άμαρτιών λέγω δὲ ὑμῖν, οὐ μὴ πίω ἀπ άρτι έκ τούτου τοῦ γενήματος τῆς άμπέλου ἔως τής ήμέρας εκείνης δταν αύτο πίνω μεθ' ύμων καινόν έν τη βασιλεία του πατρός μου.

Lk 2217-20.

LORD'S SUPPER

μου [τὸ ὑπερ ὑμῶν διδόμενον τοῦτο ποιείτε els την έμην άνάμνησιν. και τό ποτήριον ώσαύτως μετά τό δειπνήσαι, λέγων Τοῦτο τὸ ποτήριον ή καινή διαθήκη έν τῷ αίματί μου τὸ ὑπέρ ύμῶν ἐκχυννόμενον].

els την έμην άνάμνησιν. ώσαύτως και το ποτήριον μετά το δειπνήσαι, λέγων Τούτο τό ποτήριον ή καινή διαθήκη έστιν έν τῷ έμῷ αίματι τοῦτο TOLEITE. όσάκις έαν πίνητε, els την έμην άνάμνησιν.

There is strong reason for believing that the latter part of the passage in the Third Gospel is not original, but a very early interpolation from 1 Co. Dad If al omit from  $\tau \delta$  is the bulk of the expursion  $\mu \epsilon r \sigma r$ , while be Syr-Cur. omit and put vv.<sup>17, 18</sup> in the place of the omitted passage, so as to harmonize with Mt and Mk and relieve the difficulty of the two cups. Syr-Cur., like Syr-Sin., retains the whole of v.<sup>19</sup>, be only the first half. According to this arrangement the verses run <sup>16, 19, 17, 18, 21, 22</sup> etc. Syr-Sin. exhibits a more elaborate rearrangement with considerable changes of wording ;—<sup>16, 19, 204, 17, 205, 18,</sup> 21.32 etc. In Internat. Crit. Comm. on St. Lukz, pp. 567, 568, these attempts at avoiding difficulties by transposing parts of the text are shown in full. WH consider that there is 'no moral doubt that the words in question were absent from the original text in Lk' (ii. App. p. 64; see Introd. § 240). With this Brandt, Grafe, Grass, Haupt, Schürer, J. Weiss, and Wendt agree. Spitta rejects v.<sup>39</sup> only, and accepts as original the whole of v.<sup>19</sup>, the second half of which has the support of Syr-Cur., Syr.Sin., and Justin. Scrivener, Schultzen (op. cit. pp. 5-19), R. A. Hoffmann (Abendmaths-gedanken Jesu Christi, 1896, pp. 5-25), and others defend the genuineness of the whole passage. But in a discussion of the accounts of the institution the whole passage should be treated as at least doubtful. It does not support the Pauline account, if it is (as is probable) borrowed from it.

The primary account is that given by St. Paul. Those in Mt and Mk are virtually one and the same; an account written later than his and independent of it. Among the features which are found in both Mt and Mk but not in 1 Co are the change from europhoas of the bread to europhoas of the cup, the  $\Lambda \dot{a}\beta\epsilon\tau\epsilon$  of the bread, the  $\lambda a\beta\dot{\omega}r$  $ei\chi_{\alpha\rho\sigma\sigma\tau\dot{\sigma}\sigma\alpha}$  for  $\delta\omega\kappa\epsilon\nu$  of the cup, their all drinking of it, the blood being 'shed for many,' and the declaration about not drinking of the fruit of the vine. This last, and  $\epsilon i \chi a \rho i \sigma \tau \eta \sigma a s$  of the cup, are common to Lk also. The features which are common to all four are the taking bread, giving thanks or blessing, breaking, the words 'This is my body,' and the mention of the cup.

In four points St. Paul differs from the Synoptists. (1) He gives no indication that the meal was a paschal one, and thus seems to agree with St. John : it is the new covenant, rather than the connexion with the old rite, which interests him (Baur, Ch. Hist. i. pp. 161, 162). But I Co 5<sup>7</sup> must be remembered. (2) While Mt and Mk place the taking of the bread during the meal (ἐσθιδντων αὐτῶν), he places the taking of the cup after the supper ( $\mu \tau \dot{\alpha}$  $\tau \dot{\sigma} \delta \epsilon_{(\pi \nu \eta \sigma \alpha)}$ ). If both are right, there was a considerable interval between the distribution of the bread and the circulation of the cup. Lk gives no intimation. (3) While St. Paul has 'This cup is the new covenant in my blood,' Mt and Mk have 'This is my blood of the covenant,' where 'new' may have been dropped for the sake of closer resemblance with Ex  $24^8$ . In any case, Rückert's proposal to take  $\mu o\nu$  with  $\delta_{ia}\theta \eta \kappa \eta s$ -'the blood of my covenant,' and Bousset's to reject the words about the covenant, because Justin omits them, are inadmissible. (4) St. Paul gives twice, Mk and Mt not at all, and Lk probably not at all, the important charge, τοῦτο ποιεῖτε εἰς την έμην ἀνάμνησιν. The explanation perhaps is, that the evangelists

treat the repetition as a matter of course, and as involved in the word 'covenant,' which implies permanence: whereas, in order to convince the Corinthians of the enormity of their misconduct, it was necessary to point out that irreverence to either bread or cup was a violation of what Christ Himself had prescribed. It follows from this that the divine injunction to the Church to continue the Eucharistic celebration in memory of its Founder rests solely upon the testimony of St. Paul. Let us admit that this is so. We do not thereby render probable the hypothesis that Jesus gave no such charge. The apostle could not have invented such an injunction, if it had not been in harmony with Christian practice already established. And how could such a rite have been established without the anthority of the Twelve, who knew well whether Christ had commanded it or not?

Paulus was perhaps the first to deny that Christ said rowro macire. But Briggs, P. Gardner, \* Grafe, Immer, Jülicher, Mensinga, Pfleiderer, Spitta, Titius, and Wittichen are disposed to think that the earliest tradition, represented by Mk and Mt, knew nothing of an institution by Jesus, on the night of His betrayal, of a sacrament to be observed continually.<sup>†</sup> And the earliest Christian observance of the Lord's Supper as a permanent institution is explained by the hypothesis that Christ gave this command after His resurrection (Briggs, *The Messiah of the Gospels*, p. 123).

The Messiah of the Gospels, p. 123). In what sense is the tradition represented by Mk and Mt 'the earliest'? That given by St. Paul was written earlier, and is the earliest written record of any words of Christ. It had been pre-viously communicated to the Corinthians. And St. Paul had derived it direct from the Lord Himself (1 Co 11<sup>23</sup>). His words can mean no less. Had he mercly been told by apostles, he would have had no stronger claim to be heard than hundreds of other Christians. The silence of Mt and Mk does not warrant us in contradicting such explicit testimony, which would be sufficient, even if it were unsupported, for the unvarying belief of the Church from the earliest ages, that it was on the night in which He was betrayed that Christ instituted the Eucharist and gave the command 'continue to do this (pres. imperat.) in remembrance of me.' The proposal to place the institution of the Eucharist as a permanent rite later than the last supper, is as unnecessary as the proposal to place it earlier. The Pauline account fully explains the connexion of the new rite with the Passover and the Passion. If the command, rouro routire, K.T. A., was given on some other occasion, how did the new rite become so universally connected with these two facts? Any internal or doctrinal connexion between the Lord's Supper and the Passover is denied by Haupt, Hoffmann, Jülicher, Spitta, and others. Their reasons differ; but the fact that the Passover was celebrated only once a year, and the Lord's Supper frequently, is no argument. The Passover celebrated a deliverance effected with blood; and the Lord's Supper celebrated a deliver-ance effected with blood. This is a real and natural connexion.

But it is possible that there were sources for the conviction that Jesus gave this command on the night of His betrayal which were independent of

1

<sup>\*</sup>Gardner argues, moreover, that the whole account in I Co 11<sup>226</sup>, is the record of an ecstatic revelation experienced by St. Paul, and has no historical objective foundation. He supposes an influence to have been exerted on St. Paul during his stay at Corinth by the proximity of the Elcusinian mysteries. <sup>†</sup>The view that Christ gave no command, but merely permission, to continue the ordinance, is found in Luther, who regards search is wirner as making review such purely permussive (De capt. Bab. eccles. productium, ed. Pfizer, p. 105). Straues, Kaiser, and Stephani have urged that Jesus was too humble to give such a command, and have been answered by Hase (Gesch. Jesu, p. 691).

St. Paul. Justin Martyr states that 'the apostles, in the memoirs produced by them which are called Gospels, related that Jesus, having taken bread and given thanks, thus commanded them and said, Do this for a remembrance of Me, this is My body; and that in like manner, having taken the cup and given thanks, He said, This is My blood; and distributed to them alone' (Apol. i. 66). Although Justin omits the reference to the covenant, yet he regards the rooro movere as part of the evangelistic record.

(b) The Recipients of the Lord's Supper were required to 'prove themselves,' lest they should 'eat the bread or drink the cup of the Lord unworthily,' and thus 'be guilty of (profaning) the body and the blood of the Lord. . . . For he that eateth and drinketh without rightly judging ( $\delta a$ - $\kappa \rho i \nu \omega \nu$ ) the body, eateth and drinketh judgment ( $\kappa \rho i \mu a$ ) to himself,'—a judgment which involves the gravest consequences, as the experience of many in ('orinth proved. 'But if we were in the habit of rightly judging ourselves ( $\delta i \epsilon \kappa \rho i \nu \rho \omega \rho \omega$ ).' Throughout the passage (1 Co  $11^{27-31}$ ) the repeated contrast between  $\delta i a \kappa \rho i \nu \rho \omega \rho \omega$  and  $\kappa \rho i \kappa \rho a \omega \rho \omega \rho \omega$  immediately afterwards.

No definition of draglus is given. The context shows that what is primarily meant is disorderly irreverence in receiving either the bread or the cup (#, not kal). This external irreverence is proof of internal contempt. It could not occur, if the nature of the body were rightly judged; *i.e.* if the partaker devoutly realized that to which his eating and drinking referred, viz. the death of Christ: just as a loyal subject could not insult the king's effigy, if he knew that it was the king's. The context also shows that selfishness and greediness are included in draglws. Surfeiting at the common meal, while others are made to wait famished, renders a worthy partaking of the Lord's Supper impossible; for love of the brethren is indispensable. This irreverence and selfishness spring from a wrong estimate of one's own condition. Therea wrong estimate of one's own condition. fore a man must prove himself and acquire a right judgment as to his spiritual state. Reverence towards God, His Church, and His sacraments; charity towards the brethren; a humble esti-mate of self,-these are among the requirements Fasting could not be required so long as the Eucharist was united with the agape, which it often followed, as at the last supper, although it sometimes preceded it.

(c) The Minister in the Eucharist is not determined by Scripture any more than the minister in baptism. The primary charge to continue the rite (1 Co 11<sup>24, 20</sup>) was made to the apostles, and, on the only occasion when the minister is named, the celebrant is the apostle St. Paul (Ac 20<sup>11</sup>). Yet, assuming that 'the breaking of the bread,' which habitually took place among the first Christians (Ac 2<sup>42</sup>), includes the Lord's Supper, we need not suppose that the celebrant was invariably one of the Twelve. But this much may be asserted with confidence. The NT tells us that from the first there was a distinction between clergy and laity, *i.e.* the Church had officers who discharged py ordinary Christians. This distinction appears in various writings from the earliest to the latest (1 Th 5<sup>12, 13</sup>, 1 Co 12<sup>29</sup>, Eph 4<sup>11</sup>, Ph 1<sup>1</sup>, Past. Epp. possim, He 13<sup>17</sup>, 3 Jn <sup>9, 10</sup>), and is abundantly confirmed by evidence outside the NT which is almost if not quite contemporaneous with the last of these (Clem. Rom. and the *Didaché*). These witnesses do not define the functions of the ministers whom they name. But the clergy, whether missionary (as apostles, pro-

phets, and evangelists) or stationary (as bishops or presbyters, and deacons), discharge spiritual duties. They deal with men's souls rather than their bodies ; and they have to do with religious service. It is reasonable to suppose that one of the first things that was reserved to the clergy was the right of presiding at the Eucharist. This reservation is presiding at the Eucharist. This reservation is found clearly enough in the first half of the 2nd cent. (Ign. Smyrn. 8, cf. Trall. 2. 7, Philad. 7; Tert. de Bapt. 17; Apost. Const. ii. 27).

(d) The Rite is nowhere described in Scripture with so much detail as in the accounts of the institution; and the small amount of detail given there is strong evidence of the authenticity of the accounts. A fiction of a later age would have represented Christ as using the ceremonial which was customary in that age, as is seen clearly in the *Apost. Const.* ii. 57, viii. 12. The taking a loaf or cake, giving thanks, breaking and dis-tributing, and then the taking a cup, giving thanks, and distributing are the external acts of the Founder, accompanied by the words, 'This is my body,' 'This is my blood.' We know too little about the ritual of the Passover at this time to say how much, if any, of the new Eucharistic rite was part of the paschal meal. Later Jewish writers have described how the Passover was celebrated in their time, with four (and sometimes five) cups circulating at intervals, one of which may have been the Eucharistic cup.\* But we do not know that this ritual was in existence in the time of Christ. And if it was, we do not know that Christ, in this highly exceptional celebration, -which anticipated (?) that year's Passover in order to supersede it for ever, -followed the existing ritual. In none of the reports is there any mention of the lamb, or of the 'passing over' of the destroying angel, or of a deliverance from bondage; whereas the idea of a covenant, which of necessity is a new covenant, is very conspicuous. It need not be doubted that 'my blood of the covenant' (Mt, Mk) is essentially identical with 'the new covenant in my blood' (1 Co). In either case the blood is treated as the vehicle of the covenant, which the disciples appropriate by partaking of the cup. And this idea of a covenant is not con-spicuous in the ritual of the Passover. The three fundamental acts seem to be, (1) the breaking and pouring, (2) the distribution to the disciples, (3) their eating and drinking; which represent (1) the death of Christ, (2) for the disciples' salvation,

 (3) which they must appropriate.
 As regards subsequent Christian usage, we know that in the apostolic age the breaking of the bread was preserved (see above); and we may feel sure that most of the other external acts of the Lord were preserved also. Moreover, the Eucharist, which at the institution was part of the paschal super, is in the apostolic age always part of the common meal or  $d\gamma d\pi \eta$  (1 Co 11<sup>17</sup>, Ac 20<sup>7, 11</sup>), a practice which continued down to the time of Ignatius (see Lightfoot on Smyrn. 8). But whether there was as yet any fixed form of words either for the thanksgiving or blessing, or to accompany the dis-tribution, is uncertain. The differences in the four reports of Christ's words seem to show that exactness of wording was not regarded as essen-tial. In the *Didaché* 9, 10 we find three forms of thanksgiving : one for the cup, one for the broken bread, and a third which apparently is to be used after both  $d\gamma d\pi \eta$  and Eucharist are over ( $\mu\epsilon\tau d$   $\tau\delta$  $\epsilon_{\mu\pi\lambda\eta\sigma\theta\bar{\eta}\nu\alpha i}$ ). But it is expressly stated that 'the prophets' are not tied to these forms ( $\tau o\hat{s} \delta \epsilon \pi \rho o$ φήταις έπιτρέπετε εύχαριστείν δσα θέλουσιν). A similar

<sup>•</sup> Those who assume that the disputed passage at Lk 22<sup>19.20</sup> is genuine, commonly regard the two cups (vv.<sup>17.20</sup>) as two of Lie tour or five Jewish cups. † But see Trumbull, *Threshold Covenant*, p. 208 ff.

# LORD'S SUPPER

feature is found in Justin Martyr, who states that the presiding minister ( $\delta \pi \rho o \epsilon \sigma \tau \omega s$ ), after general prayer is ended, and bread and wine mixed with water have been brought, offers prayers and thanks-givings according to his ability  $(\delta\sigma\eta \,\delta \dot{\upsilon}\sigma\mu s \, \sigma\dot{\sigma}\dot{\psi})$ , to which the congregation respond with the Amen (Apol. i. 67). It would seem, then, that this is the second stage in the development of liturgies. First there was no form, but the minister used what words he pleased. He would, however, be influenced by the words of institution as well as by Jewish forms; and perhaps he commonly in-cluded the Lord's Prayer. Basil asks, 'Which of the saints has left us in writing the words of the invocation at the displaying (drddeugis) of the bread of the Eucharist and the cup of blessing? For we are not content with what the Apostle or the Gospel has recorded, but both in preface and conclusion we add other words' (de Spiritu, 27). And Gregory the Great seems to have believed that the apostles used the Lord's Prayer, and that only "(ix. Ep. 12; Migne, lxxvii. 956). But the meaning of the pas-sage is not clear; and Gregory is very late authority for apostolic usage (Maskell, *The Ancient Livurgy* of the Ch. of England, 3rd ed. p. xviii). At the next stage forms were drawn up, but some ministers were allowed discretion as to the use of them. Finally, all ministers were restricted to prescribed forms. In NT we seem to be at the first stage. In the *Didaché* the omissions are remarkable, and power to supplement would seem to be almost necessary. Among the gifts for which thanks are given (swh, yrwois, mloris, adaraola, swh alwrios) there is no mention of aperis apapriar. And although these gifts come dia 'Inrov rov raid's σου, there is no mention of the death of Christ.

Harnack's theory, that until the 3rd cent. the use of wine in the Eucharist was neither obligatory nor universal, has been opposed by Zahn (Brot und Wein im Abendmahl der alten Kirche, Erlangen, 1892) and Jülicher (Theolog. Abhandlungen, Frei-burg, 1892, pp. 217-231), and need not be discussed here. Christ took the two simplest and most universal representatives of sustaining food, bread that strengtheneth man's heart, and wine that maketh glad the heart of man, and employed them as the universal representatives of spiritual food, of His body broken and His blood poured out. His loyal followers have from the first retained these.

V. THE DOCTRINE OF THE LORD'S SUPPER.-There are few things more tragic in the history of Christ's Church than the fact that its central act of worship has for centuries been, and still act of worship has for centuries been, and still continues to be, a subject for the keenest con-troversy, and that Christians have cruelly perse-cuted, and even put to cruel deaths, other Chris-tians, for not holding doctrines respecting the Lord's Supper which cannot be proved, and which are possibly not true. The Sacrament of Love and of Life has been made an instrument of hate and of destruction because men have insisted upon of destruction, because men have insisted upon possessing knowledge which cannot be possessed, and upon explaining what cannot be explained. In the first centuries the Church was content to enjoy and to use without explaining, and it would be our wisdom to do the same.

be our wisdom to do the same. 1. The chief point of controversy has been the meaning of the 'is' in 'This is my body' (Mt, Mk, Lk, 1Co) and 'This is my blood of the covenant' (Mt, Mk), or 'This cup is the new covenant in my blood' ([Lk] 1 Co). The suggestion that at the institution our Lord spoke in Aramaic, and that

\* Orationem dominicam ideirco moz post precem dicimus, quia mos apostolorum fuil, ut ad ipean solummodo orationem, oblationis hostiam consecrarent. Cf. Amalarius, de Eccles. Of. iv. 26; Migne, cv. 1210. What is the exact meaning of the ad?

148

in Aramaic the 'is' would not be expressed, renders no help. It is not quite certain that He spoke in Aramaic then, or that it was in Aramaic that He made the special revelation to St. Paul. But we may assume that He did so. Nevertheless, the 'is' must be supplied; and, as soon as it is there, inquiry will arise as to its meaning. Moreover, not in Aramaic, but in Greek, has Christ handed down these words of His to His Church. All four accounts have the *erru* of the bread; and, excepting the disputed words in Lk, all have the *erru* of the cup. The fact that Christ probably used a language in which the copula was not expressed is no good reason for giving the minimum of meaning to the *erru*, which is conspicuous in the Scriptures given to us by Him.

Perhaps the nearest approach to an explanation that can be found in Scripture is that given by St. Paul: 'The cup of blessing which we bless, is it not *karwaria* of the blood of Christ? The bread which we break, is it not *konvurla* of the body of Christ?' Here korwia is more than 'a partaking of, which would be  $\mu \epsilon \tau o \chi \eta$  or  $\mu \epsilon \tau \delta \lambda \eta \mu \psi \iota s$  rather than korwia. The latter is 'fellowship with.' Just as the bread is made up of many particles, gathered together in one loaf, so those who partake of the bread that is broken are gathered together in one body. 'The bread which we break is fellowship with the body of Christ.' [See COMMUNION]. What, then, is the meaning of the 'is'? Probably that common use of the copula which identifies cause and effect is part of the meaning (Hooker, Er: Pol. v. lxvii. 5, 6). J. H. Newman once warned a friend who was visiting Rome for the first time, and in the summer, 'Beware of a chill in Rome. A chill is a fever; and a fever is a shattered con-stitution for life,' which meant that a chill causes a fever, and that a fever causes a shattered constitution. By the same usage St. Paul may mean that the cup, when drunk, is a cause of fellowship with Christ's blood, and the bread, when eaten, is a cause of fellowship with Christ's body; or (as in the words of institution) this bread is a cause of the body. 'The bread and wine after their benediction or consecration are not indeed changed in their nature, but become, in their use and in their effects, the very body and blood of Christ' (T. S. Evans on 1 Co  $10^{16}$ ). This meaning is in harmony with the context. The union with the Lord Himself, which those who partake of the Lord's Supper have, is compared with the union which those who partake of a sacrifice have with the deity to whom the altar is devoted ;- in the case of the Israelites with God, of the heathen with demons. This idea, that to partake of a sacrifice is to devote one's self to the deity, lies at the root of the ancient idea of worship, whether Jewish or heathen; and St. Paul uses it as being readily understood. In this connexion the symbol is never a mere symbol, but a means of real union; and in the Lord's Supper the symbol is very significant. It is a means of union with Christ in that character which blood; i.e. union with the crucified Redeemer (Pfleiderer, Paulinismus, ch. vi. p. 240, Eng. tr.).

Those who insist on the literal meaning of the 'is' as expressing identity, must be prepared to accept the literal meaning of the subject also; and this in the case of the cup produces great difficulty. '*This cup* (not its contents) actually is (not is an instrument or a symbol of) the covenant.' 'The fellowship with the body of Christ' is two-

one body, we the many are.' The act of eating and drinking together proclaims the union of Christians in Christ. And this union and communion is symbolized in the composite unity of the bread and of the wine. 'As this broken bread ( $\kappa\lambda d\sigma\mu a$ ), scattered upon the mountains and gathered together became one, so let Thy Church be gathered together from the ends of the earth into Thy Kingdom' (Didacht, ix. 4).

A Bible Dictionary is not the place in which to discuss late developments of Eucharistic doctrine; but it may point out scriptural tests for judging some of these.

(1) Christ placed the new rite in close connexion with the Passover. Even if He had not done so, the apostles would inevitably have been influenced by Jewish ideas, and especially by paschal observ-ances, in interpreting the new rite. This fact seems to exclude all doctrines which teach that the consecrated elements become or contain the physical body of Christ which was 'born of the Virgin,' with 'bones and nerves and all that per-tains to the true idea of a body.'\* To partake of the blood of an animal was abomination to a Jew. In the paschal ritual it was expressly provided that the blood should be separated from the flesh that was to be eaten. The idea of eating human flesh and drinking human blood would have inspired the apostles with unspeakable horror; and it is incredible that Christ can have intended to shock them with any such doctrine. He had warned them beforehand  $(Jn 6^{ss})$  against any such carnal notion—σωματική έννοια (Athan. ad Serapion. iv. 19). (2) The words els the eun du du un ou exclude 1v. 19). (2) In e words es  $\tau \eta \neq \mu \eta \varphi$  adapted be kettude a corporal presence; for a memorial of what is bodily present would be meaningless. (3) St. Paul repeatedly calls the consecrated bread, not 'body' or 'flesh,' but 'bread' (1 Co 11<sup>26-28</sup>). Can we believe that the celebrant now distributes more than Christ distributed then; or that what He held in His hands and distributed to His disciples was nothing less than His own Person, Body, Soul, and Godhead? (See Thirlwall, Charges, ii. p. 251; Schultzen, Das Abendmahl, p. 48.)

2. Another aspect of the Lord's Supper is pointed out by St. Paul; and again it is an explanation of the words of Christ. The Lord said, 'This do ye, for the remembrance of me,' to which the apostle adds, 'For (confirmatory) as often as ye eat this bread (bread thus blessed and broken) and drink the cup, ye proclaim the Lord's death till he come' ( $d_X \rho a$ of  $\ell \lambda \partial \eta$  without  $d_{\sigma}$ , because the coming is certain). As the Passover was for a memorial of the deliverance wrought by J", to be kept 'throughout your generations' (Ex 12<sup>14</sup>), so the Eucharist is a memorial of the deliverance wrought by Christ's death, to be kept 'till he come.' Commemoration ceases when He who is commemorated returns. Meanwhile the Eucharist is the Church's consolation for the Lord's withdrawal from sight. It links the second Advent to the first by keeping both in mind. Like the dramatic actions of the Hebrew prophets, it illustrates, and emphasizes, and impresses on the memory a special proof of God's care for His people. It is Christ's last and supreme parable; a parable not merely told but acted by Himself. He sets forth His own death, and shows that those who would profit by it must make it their own by faith and love. As Chrysostom says, 'We do not then offer a different sacrifice, as the high priest formerly did, but always the same: or rather, we celebrate a

\* Verum Christi Domini Corpus, illud idem, quod natum ex Virgine, in czelis sedat ad dexteram Patris, hoc Sacramento contineri (Catechismus Romanus, Pars II. czp. iv. Quzzt. 22). Hoc loco etiam explicandum est, non solum veri Christi Corpus, et quiequid ad veram corporis rationem pertinet veluti, ozca et nervoe, sed etiam totum Christum in hoc Sacramento contineri (ibid. Quzzt. 27).

LOT

memorial of a sacrifice' (on Hebrews, Hom. xvii. 3). This leads on to another aspect.

3. Christ's death was a sacrifice: and to proclaim His death, and appropriate His body and blood offered in that sacrifice, is to realize the sacrifice and to appropriate its effects. The  $i\pi i\rho i\mu \hat{\omega} r$  of the body (1 Co) and the  $i\pi\epsilon\rho$  or  $\pi\epsilon\rho i \pi\epsilon\lambda\delta\mu$  of the blood (Mk, Mt) point to this. And they mean much the same; for it is unreasonable to restrict in our behalf that the disciples then present. It was in our behalf that the body was broken and the blood shed. The sacrificial idea appears in He 13<sup>10</sup>, where  $\theta$ usias there probably refers indirectly to the Eucharist. But the altar on which Christ offered His sacrifice is the Cross; and the altar on which we offer is Christ Himself. The Ovolastipler is not the holy table. And it may be doubted if there is a sacrificial meaning in the double rouro roteire (1 Co  $11^{24, 23}$ ). For (i.) in LXX the frequent Heb. words which mean 'offer' or 'sacrifice' are not translated by ποιείν, but by προσφέρειν, άναφέρειν, θύειν, θυσιάζειν, and the like. (ii.) The ordinary meaning of  $\pi \circ \epsilon i r$ in LXX, in NT, and elsewhere, is the natural meaning here. (iii.) The Gr. Fathers adopt this ordinary meaning and interpret, 'Perform this action.' (iv.) Syr-Sin. has, '*Thus* do in remembrance of me.' (v.) The ancient liturgies do not use  $\pi \omega \epsilon \hat{\nu}$ or facere of the bread and wine, but mpos pepeer or offerre. (vi.) The sacrificial meaning might easily have been made clear by the use of  $\pi \rho o \sigma \phi \epsilon \rho \epsilon i r$ . nave been made clear by the use of  $\pi_{postphetapprox}$ . Moreover, we have  $\tau_{o}\tilde{v}_{ro}$ , not  $\tau_{o}\tilde{v}_{rov}$ : not 'Do this bread,' but 'Do this thing.' (See Expositor, 3rd series, vii. p. 441; T. K. Abbott, Essays on the Texts of the OT and NT, 1891, p. 110; J. R. Milne, The Doctrine of the Eucharist, 1895, p. 19). The use of  $\tau_{o}\tilde{c}\tilde{v}$  here is exactly analogous to that in Ex 12<sup>28</sup> of the Passover : εποίησαν οι viol 'Ισραήλ καθά ένετείλατο Κύριος τῷ Μωση, οίτως έποίησαν. Comp.

There is a state of the second strengthene in the second strengthene in the second strengthene in the second strengthene is the spiritual food, which continues and strengthene the spiritual food, which continues and strengthene the spiritual life begun in baptism. The soul is nourished by the body and blood of Christ as the body is by the bread and wine. His flesh is meat indeed, and His blood drink indeed (Jn 6<sup>35</sup>), and to partake of Him who is the Life (Jn 14<sup>4</sup>) is to have eternal life (Jn 6<sup>30, 34, 55</sup>). Comp. Ign. Eph. 20, Rom. 7; Clem. Alex. Pad. ii. 2; Cypr. de Dom. Orat. 18. 5. By Christ's example this rite includes an act of thanksgiving. In all four accounts we have evaportform either of the bread or of the cup; and Mt here a blowing on the conduction with

5. By Christ's example this rite includes an act of *thanksgiving*. In all four accounts we have  $e\dot{v}_{\lambda}a\mu\sigma\tau\eta\sigma as$  either of the bread or of the cup; and Mt and Mk have a blessing or thanksgiving with both elements. The very early use of  $\dot{\eta} e\dot{v}_{\lambda}a\mu\sigma\tau ia$  as a name for the whole service shows that it was regarded as the highest form of thanksgiving.

as a mine to the index structure shares that it was regarded as the highest form of thanksgiving. With regard to all Eucharistic controversy we may wish, with Hooker, 'that men would more give themselves to meditate with silence what we have by the sacrament, and less to dispute of the manner how.' There have been those who 'because they enjoyed not disputed,' and others who 'disputed not because they enjoyed' (Ec. Pol. v. lxvii. 3). Jam missa, quanto vicinior et similior prima omnium missar, quan Christus in cana fecit, tanto Christianior (Luther).

Christianion (Lutrier).
LITERATURE. – This is overwhelming. The following works may be selected: Smith, Dict. of Chr. Biog. ii, p. 254; Schaff-Herzog, *Rneycl.3* ii, p. 1352; Herzog, *RR2* pp. 47, 61; Encycl. Britan.<sup>9</sup>

LO-RUHAMAH.—See HOSEA, vol. ii. p. 421<sup>\*</sup>, and LO-AMMI.

LOT ( $\delta \omega \tau$ ).—The son of Haran, the brother of Abraham, and consequently Abraham's nephew (Gn 11<sup>27, 31</sup> [both P]). Particulars of his life are found in parts of Gn 11-14. 19: the circumstantial narrative belongs to J (except ch. 14, which comes from an independent source), P giving only a brief summary (11<sup>27, 31-32</sup> 12<sup>40-5</sup> 13<sup>6, 11b-12</sup> [to Plain] 19<sup>29</sup>). summary (11.1.1.1.4. 12.1.5 13.1.12.1.5 13.1.11.1 [to *Plain*] 19.). Lot's father Haran died before the migration of Abraham into Canaan—according to J, in 'the land of his nativity' (*i.e.* Haran in Mesopotamia), accordingto P, in 'Ur of the Kasdim'; and when Abraham left Haran for Canaan, he took Lot with him (12<sup>44</sup> J; 12<sup>40-5</sup> P). Lot, it may be inferred, was with his upde when he rested at Sheehem was with his uncle when he rested at Shechem, and again on the mountain between Bethel and Ai, as well as afterwards, when he journeyed through the Negeb, or 'South' of Judah  $(12^{6.8.9})$ . Whether, in the view of the narrator, Lot accom-panied Abraham into Egypt (12<sup>10-30</sup>), is less certain : the complete silence respecting him in the some-what circumstantial narrative of  $12^{10-20}$  is noticeable; and it is possible that the words 'and Lot with him' in  $13^1$  are a gloss (see, further, Dillm. 226, 229). However that may be, Lot is with Abraham when he revisits the hill between Bethel and Ai, which now becomes the scene of Lot's memorable choice  $(13^{1-13})$ . Both Abraham and Lot, we are told, had numerous herds: the land 'was not able to bear them, that they might dwell together, for their substance was great' (P: cf. 36'), i.e. it could not supply pasture great (F: cf. 30<sup>5</sup>), i.e. it could not supply pasture for both of them; strifes arose between their respective herdmen (J), viz. about wells and water-ing-places (cf. 21<sup>22</sup> 26<sup>20</sup>), which appear to Abraham to be unseemly between 'brethren,' *i.e.* relatives (cf. 14<sup>16</sup> 24<sup>27</sup> 29<sup>16</sup>), and he proposed accordingly a separation. Though the elder, he generously offers his nephew the first choice: 'is not the whole land before theory? land before thee ? . . . if thou wilt take the left hand, then I will go to the right; or if thou take the right hand, then I will go to the left.' The the right hand, then I will go to the left.' The soil about Bethel is stony and bare ; but a little to the S.E. there is 'a conspicuous hill; its topmost summit resting, as it were, on the rocky slopes below, and distinguished from them by the olivegrove which clusters over its broad surface above (S. and P. 218); and here, it seems, the narrator must have pictured Lot and Abraham as standing. To the east there rises in the foreground the jagged range of the hills above Jericho; in the distance the dark wall of Moab; between them lies the wide valley of the Jordan, its course marked by the track of tropical forest growth [the 'pride of Jordan' of Jer 12<sup>9</sup> 49<sup>19</sup>=50<sup>44</sup>, Zec 11<sup>3</sup>] in which its rushing stream is enveloped; and down to this valley runs a long and deep ravine, through which, it seems, parts of the plain across the river can be descried, with long lines of verdure fringing the numerous streams which descend from the mountains beyond into the Jordan: on the S. and W. appear the bleak hills of Judah. The 'Kikkār, -the 'round,' or 'oval,' of Jordan, *i.e.* (cf. Buhl, Geogr. 112) the middle, broader part of the Jordan Valley beginning about 25 miles N. of the Dead Sea, and including (probably) the Dead Sea itself, and the small plain at its S. end,-though in parts the soil, once a sea-bottom, is desolate and barren, is in other parts extremely fertile, and produces an exuberant vegetation (see *HGHL* 483 f., 487, 489); and the writer, it seems, pictured it as having been

yet more fertile, before Sodom and Gomorrah \* had been destroyed-'well-watered everywhere, like the garden of Eden, or the valley of the Nile. A region so blessed by nature proved to Lot an irresistible temptation : heedless of his uncle, heedless of the wickedness of its inhabitants-significantly emphasized by the narrator in  $v.^{13}$ he made his choice; he left his uncle on the bare hills of Bethel, while he himself descended into the fertile valley, 'and moved his tent (אדל) as far as Sodom.' 'By thus voluntarily quitting Canaan, Lot resigns his claims to it, and the later territorial relations of Moab and Ammon [see below], and of Israel, are prefigured ' (Dillm.). The next incident in Lot's life which is mentioned

is his rescue by his uncle after he had been taken captive by the expedition headed by Chedorlaomer (Gn 14). After the defeat of the king of Sodom and his allies in the 'Vale of Siddim,' Lot, who now 'dwelt in Sodom,' is, amongst others (v.16), taken prisoner by the victorious kings from the East, and carried off by them. Abraham, who was now at Hebron, hears of what has happened, and immediately, with 318 followers, starts in pursuit. All through Canaan, as far as Dan, near the foot of Hermon, he follows the retreating hosts : there he surprises them by a night attack, pursues them as far as the probably some 80 miles N. of Damascus, recovers Lot and his possessions, and brings him back (it is implied) to Sodom (vv.<sup>12-10</sup>).

The next time that we hear of Lot is in the familiar narrative of Gn 19. The two angels, whose mission it is to destroy the guilty cities of whose mission it is to destroy the guilty cities of the 'Kikkär,' arrive at Sodom at even. Lot, sitting in the gateway of the city,—the common place of resort in the East, whether for conversa-tion or business (cf. Ru  $4^1$ ),—rises up, with the same ready courtesy which Abraham had shown before  $(18^{2-6})$ , and which is still usual among the Arabs, to offer them hospitality: at first, wishing, it may be, to test his sincerity, they decline the invitation, but being pressed by him they yield, and are entertained by him sumptuously, at a 'feast' ( $\pi n \sigma$ ; cf. 21<sup>8</sup> 26<sup>30</sup> 29<sup>22</sup>). Lot's hospitality on this occasion is alluded to (probably), in conjunction with that of Abraham (ch. 18), in the well-known words (He 13<sup>2</sup>), which have passed into a proverb, 'Be not forgetful to entertain strangers  $(\tau \bar{\eta} s \ \phi c \lambda \alpha \xi \epsilon r las \ \mu \eta \ \epsilon \pi i \lambda a \nu \delta d \pi \epsilon \sigma \theta \epsilon)$ ; for some have thereby entertained angels unawares.' The character of the men of Sodom soon discloses itself (cf. Is 3°); and Lot, obliged to act quickly in a trying situation, made the mistake of placing his duties as a host (which, as is well known, are regarded in the East as peculiarly sacred) above his duties as a father. 'The words of Lot ('I have two daughters,' etc.) have been much canvassed in all times. St. Chrysostom thought it virtuous in him not to spare his own daughters, rather than sacrifice the duties of hospitality, and expose his guests to the wicked-ness of the men of Sodom (*Hom. xziii. in Gen.*). So St. Ambrose (*de Abrah.* i. 6), speaking as if a smaller sin were to be preferred to a greater. But St. Augustine justly observes, that we should open the way for sin to reign far and wide if we allowed ourselves to commit smaller sins, lest others should commit greater (Lib. contr. Mend. c. 9. See also Quarst. in Gen. 42). We see in all this conduct of rightly, but did it timidly and imperfectly.' In fact, Lot 'brought his troubles upon himself by the home he had chosen. He was bound to defend

• On the difficult question of the site of these cities, see HGHL 505 ff., and App. 678. To the present writer, the arguments in favour of a site at the 8 end of the Dead Sea appear to preporderate: cf. the note below on Zoar. It is not necessary to suppose that Lot saw the exact part of the kikkär in which the cities were; in any case, the word 'all' in Gn 13<sup>10</sup> must be an exaggration.

LOT

his guests at the risk of his own life, but not by the sacrifice of his daughters' (Speaker's Comm. on The profligate multitude, resenting Lot's interference, and the assumption of moral superi-ority which it implied, essay to lay hands upon him; and are only prevented from carrying out their purpose by the intervention of the two angels, who forcibly bring Lot into the house, and strike his would be assailants with a dazzling (סַנְרֵים, only besides 2 K 6<sup>18</sup>), preventing them from being able to find the door. The angels, satisfied now that even 'ten' righteous men (1832) are not to be found in Solom, urge Lot to quit betimes the doomed city, taking with him all those belonging to him. But his 'sons-in-law' mocked at his warnings; and even Lot himself, though hastened by the angels as soon as morning broke  $(v, i^3)$ , (lingered'  $(v, i^6)$ , re-luctant to leave his 'house'  $(v, {}^3 \text{ etc.})$ , and the city which he had made his home. But the angels are tender to his weakness, J" being desirous to 'spare' him; they accordingly take hold of his hand, and lead him, together with his wife and daughters, outside the city. There they bid him escape for his life, neither looking behind him—whether to he tempted lack, or to watch with curious eye the fate of the city — nor tarrying even for a moment in any part of the coveted  $(13^{10})$  'Kikkär': moment in any part of the covered  $(13^{\circ})^{\circ}$  Kikkär': 'escape to the mountain,'-or 'mountainous coun-try,' viz. of the later Moab  $(v.^{*0} 14^{\circ}), --'$  lest thou be swept away'  $(v.^{17})$ . But the mountains are too distant for Lot's faith, or strength of purpose: fearing he will not be able to reach them in time, he asks to be allowed to take refuge in a city he asks to be allowed to take reinge in a city nearer at hand, which, being a 'little one,' might have been less guilty than the other cities, and more easily spared. His request is granted, and he escapes to Zoar. The aim of this part of the The aim of this part of the narrative is evidently to explain the origin of this name. Zoar is in all probability the  $Z\bar{o}ara$ , or  $Zo\bar{o}r$ , of Josephus, and the Zughar of the Arab. geographers; \* and this, as Wetzstein has shown (in Del. Gen. \* 564 ff.), lay in the plain at the S.E. extremity of the Dead Sea, now called the Ghôr es-Sāfieh,† which, in striking contrast to the saft and marshy plain approxite (S W of the Sec). and marshy plain opposite (S.W. of the Sea), at the foot of the Jebel Usdum (see p. 152), is wellwatered, and 'covered with shrubs and verdure, watered, and 'covered with shrubs and verture, like the Plain of Jericho' (Grove in Smith, *DB* iii. 1182; *HGHL* 508 n.). Lot reached Zoar soon after sunrise (v.<sup>23</sup>); and the destruction of the other cities of the 'Kikkār' then took place. His wife, disregarding the injunction of v.<sup>17</sup>, looked back from behind him, and became 'a pillar of salt' (v. 26). ‡

After these events, Lot, dreading lest, after all, a similar fate should overtake Zoar, 'went up' out of it into the 'mountain,' *i.e.*, as in  $vv_1^{17.19}$ , the hill-country on the E. of the Dead Sea; and dwelt there 'in a cave' (19<sup>30</sup>), according to a custom which appears still to prevail in this neighbour-hood.§ The only other incident in his life which is mentioned is the story which now follows (1931-38) of the origin of the nations of Moab and Ammon from his incestuous intercourse with his two daughters. Naturally, this narrative is not to be understood as a record of actual fact. The story is based in part upon a popular etymology of the two names: but this does not explain it entirely. There was much rivalry and hostility between Israel and its trans-Jordanic neighbours, Moab and Ammon ; it is also, as Dillm. has remarked, a probable inference from the present narrative, that incestuous marriages, such as were viewed in

\* See IIGHL 508-7 n. + So also Keil, Del., Dillm., Socin (ZDPV, 1880, p. 81), Buhl (Group: 271 f.), Blanckenhorn (ZDPV xix. 1896, 53 f.). ; V.2<sup>3</sup> is a summary acrount, from P, of what has been described at length, in vv. <sup>1,29</sup>, by J. § Buckingham, Tracels in Syria (1825), pp. 61-8, 87.

Israel with abhorrence, were not uncommon among these two nations ; and these feelings are reflected in the discreditable story of their origin, which the narrator has here preserved. 'It was the coarse humour of the people which put into words its aversion to Moab and Ammon by means of this narrative' (Dillm.).

The only other mention of Lot in the OT is in the expression 'children of Lot,' applied to Moab in Dt 29, and to the Ammonites in Dt 219; and to both peoples indiscriminately in Ps 83<sup>8</sup>.

Lot is in character a strong contrast to Abraham. He is selfish, weak, and worldly : he thinks of himself before his uncle, and chooses, for the sake of luxury and ease, to dwell in the midst of temp-tation. Relatively, indeed, he was 'righteous' (2 P 2<sup>7.8</sup>); his personal character was without reproach ; and he was deemed worthy by God of a special deliverance.\* His 'righteous soul' was, moreover, 'vexed ( $i\beta a\sigma a\nu i\beta e\tau o$ ) from day to day 'by the 'lawless deeds' which he saw around him; but he had not strength of purpose to quit his evil surroundings, and even betrothed his daughters to natives of the sinful city. When ultimately he left Sodom, it was with manifest reluctance, and only after his daughters had become (if we may follow the representation of the narrator) depraved by contact with vice. He brought temptations, and also troubles, upon himself,—and the man who once was rich in 'flocks and herds and tents' (13<sup>6</sup>) was, as the result of his own actions, stripped of his possessions, and reduced to living penu-riously in a cave. Lot is one of the many  $\tau \dot{\nu} \pi o \iota$  $\eta\mu\hat{\omega}\nu$  in the OT; and his history is a lesson of the danger of thinking too exclusively of worldly advantage and present ease.

The historical character of Lot must be judged by the same principles as that of ISHARL and JACOB(vol. ii. 533 t.): no doubt tribal relations and characteristics are, to a certain degree, reflected in him. Cf. Dillm. AT Theol. p. 79. On Jewish traditions about Lot, see the Breshith Rabba (tr. Wünsche), and the Dirke B. Elizater of 26 (where his mith a celled arun Edit the Pirke R. Eliezer, c. 25 (where his wife is called ny Edith, the *Pirke R. Eduzer*, c. 20 (Where his wite is called h<sup>-1</sup>y *Eduta*, and one of his daughters h<sup>-1</sup>b<sup>-1</sup>b *Pelotith*). In Fabricius, *Cod. Pseudepigr. VT*, i. 428-431, there is a Greek legend of a tree planted by him, which afterwards provided wood for the cross. Irensus (iv. 31; 33. 9) interprets typically some of the incidents of his history. In the Qoran, Lot is often alluded to as a preacher of righteousness to the people among whom he dwelt, Qor. 778 for 117244 16567, 214-75 224 26160176 2784-59 292734 5433 st. Got, the passages (as well as elsewhere) the men of Sodom are called the 'people of Lot,' as the Dead Sea is still called by the Arabs Bahr Lút, the 'Sea of Lot.'

Lot's Wife.-Gn 1926 'But his wife looked back from behind him, and she became a pillar of salt." At the S.W. end of the Dead Sea is the singular formation called Jebel Usdum, 'the mountain of Sodom,' a range of cliffs, some 6 miles long and 600 ft. high, consisting of crystallized rock-salt-once part of the bed of the ancient Salt Sea-'covered with a capping of chalky limestone and gypsum. . . . It has a strangely dislocated, shattered look, and is all furrowed and worn into huge angular buttresses and ridges, from the face of which great fragments are occasionally detached by the action of the rains, and appear as "pillars of salt" advanced in front of the general mass. At the foot the ground is strewed with lumps and masses of salt.' Such pillars, or pinnacles, of salt have been often noticed by travellers. Lieut. Lynch, for instance, ‡ describes one which was about 40 ft. high, cylindrical in form, and rested on a kind of oval pedestal, some 50 ft. above the level of the sea. It is probable that some such pillar, conspicuous in antiquity, gave rise to the story. Writers of a later age often felt satisfied that they \* Cf. Clem. Rom. Ep. 1 ad Cor. xi. 1, dià gilogiviar nai

<sup>6</sup> Cf. Clem. ROM. Bp. 1 and Cor. M. 1, our prosperse are birigues Americades, ar. A. † Sir G. Grove in Smith, DB iii, 1180; see also Rob. BR ii. 107-9; Hull, Mount Seir, Sinai, and W. Pal. (1889) 129-132. ‡ Narrative of U.S. Erped. to the Jordan and Dead Sea, ed. 1849, p. 307 f. (with a view), ed. 1552 (condensed), p. 201 f.

could identify the pillar in question. In Wis 107 mention is made of a  $\sigma \tau \eta \lambda \eta$  abos, near the Dead Sea, standing as a  $\mu \nu \eta \mu \epsilon \hat{i} o \nu d \pi i \sigma \tau o \nu \sigma \eta s \psi v \chi \hat{\eta} s$ . Josephus (Ant. I. xi. 4) says,  $l\sigma \tau \delta \rho \eta \sigma a$  d'arthy fr.  $\gamma d\rho$  kal  $\nu \partial \nu$   $\delta la \mu \ell \nu \epsilon l$ . Clem. Rom. (1 Cor. 11<sup>2</sup>), Irenaus (Hær. iv. 31. 3), and the unknown author The function of a poem on Sodom (ap). Tertull, ed. Oehler, ii. 771 ff., l. 121 f.), speak of it, though not apparently from personal knowledge, as still remaining. Whether, however, the pillar referred to by all those writers is the score one matter and the states of the score one matter in the score of the score these writers is the same one, must remain uncertain ; as Robinson (ii. 108) remarks, during the rainy season such pillars are constantly in the process of formation and destruction, so that it is doubtful how far any particular one would be permanent (cf. Grove in Smith,  $DB^1$  ii. 145\*).

Lot's wife 'looked back' with regretful longings for the possessions and enjoyments which she was leaving behind her, and so proved herself unworthy of the salvation offered to her. Our Lord (Lk  $17^{32}$ ) refers accordingly to the narrative about her, when inculcating indifference to all worldly interests, as the attitude with which the advent of the Son of man should be met. 'Note that Christ says, "Remember," not "Behold." Nothing that is in existence is appealed to, but only what has been told' (Plummer, ad loc., in the 'International Crit. Comm.'). S. R. DRIVER.

LOTAN (iσi), Λωτάν).—The eponym of a Horite clan, Gn 36<sup>30, 23, 39</sup>=1 Ch 1<sup>38, 39</sup>. Ewald (Gesch.<sup>3</sup> i. 448 [Eng. tr. i. 313]), followed by Dillmann (Genesis, ad loc.), identifies with Lot, the father of Moab-Ammon, who appears in Gn 19<sup>30</sup> as a הורי cave dweller.' See Lor.

LOTHASUBUS (Λωθασουβος), 1 Es 944.—A corruption of HASHUM in Neh 84; was perhaps read לותשב.

LOTS (دارجز). In Est 37 934. 36 we have the problematic word mp, the plur. of which is tr4 by LXX in 9<sup>36</sup> φρουραί [see PURIM, FEAST OF]. The ordinary rendering in LXX for λis κλήρος, which is the NT term also).-The lot was employed in ancient Israel as a mode of deciding important issues in cases when they were not decided by other mechanical modes, or were not left to the expressed or king. The use of lots was governed by the presupposition that divine influence controlled their employment, and that the result coincided with God's will. We have, in fact, here only one of a large cycle of modes of divination practised by Israel and other nations of antiquity. Some of these, as Urim and Thummim, were sanctioned by the Jewish Torah as legitimate (see art. URIM AND THUMMIM), and were at all events tolerated (as the use of the ephod) in pre-exilian Israel (see art. EPHOD, No. 2). Others, on the contrary, were regarded as illegitimate, as the pieces of stick  $(\mu\alpha\beta\delta\sigma\mu\alpha\nu\tau i\alpha, \text{Hos } 4^{12})$  or arrows  $(\beta\epsilon\lambda\sigma\mu\alpha\nu\tau i\alpha, \text{Ezk } 21^{29} \text{ [Heb.]})$ . See Davidson on Ezk  $21^{21}$  in Camb. Bible for Schools; and for the usage among ancient Arabs, Wellhausen, Reste Arab. Heiden-tums<sup>2</sup> p. 132. For Assyr. parallels see Lehmann, Aberglaube u. Zauberei, p. 40. The religious aspect in the employment of lots is expressed in the phrase may up (Jos 18<sup>6, 8</sup>), and still more explicitly in Pr 16<sup>33</sup>—

'The lot is cast into the lap, But all its decision cometh from Jehovah.'

The verb used here for casting the lot is the Hiph. of אים. In Jos 18<sup>8</sup> it is אָלָליף, in v.<sup>6</sup> it is ייזי. In Jl 3<sup>3</sup>, Ob<sup>11</sup>, and Nah 3<sup>10</sup> the verb ייזי is employed, while in Jon 1<sup>7</sup> and many other passages we have  $5^{3}$ . When the word for 'lot' stands as subject,

the intransitive verb אלה (Lv 16°) or אין (Nu 33<sup>54</sup>, Jos 19<sup>14</sup>) is employed. To *take* by lot is דגי. The occasions on which decisions were deter-

(1) In criminal cases, in order to discover the culprit. The earliest recorded instance is that of Achan (Jos  $7^{14}$ ). Next comes that of Jonathan (1 S 14<sup>44</sup>). In Jon 1<sup>7</sup> we read that the lot was used as a means of fixing on the guilty source of the continued stormy weather. This example is instructive, as it exhibits the common and identical tradition as existing among ancient Hebrews and the Phœnician sailors, as we may assume them to have been, who accompanied Jonah (cf. Josephus, BJ III. viii. 7).

(2) In appointing to office, e.g. to that of king (1 S  $10^{200\pi}$ , where the choice of Saul as the first king of Israel is recorded). We have another example in the NT, when the vacancy occasioned by the death of Judas is supplied by the election by lot of Matthias (Ac 1<sup>26</sup>). Similarly, priestly

by lot of Mathias (A 1<sup>30</sup>). Similarly, priestly functions in the temple-worship were apportioned among the sixteen sons of Eleazar and eight sons of Ithamar (1 Ch 24<sup>4,5</sup>; cf. Lk 1<sup>9</sup>); so also in the service of song (1 Ch 25<sup>50</sup>;) and in the delivery of wood for the altar (Neh 10<sup>35</sup>; cf. 11<sup>1</sup>). (3) In the division of property. The most notable instance of this is in the assignment of territory among the tribes of Israel (Nu 26<sup>3667</sup>, 33<sup>64</sup> 34<sup>13</sup> 36<sup>3</sup>, Jos 13<sup>6</sup> 14<sup>3</sup> 16<sup>1</sup> etc., Ps 105<sup>3</sup>, Ac 13<sup>19</sup>). Thus by a natural transition the land itself, when divided, came to be designated by this word  $7^{13}$  (Jos 15<sup>1</sup>  $17^{147}$ , Jg 1<sup>3</sup>, Is 57<sup>6</sup>). Hence we frequently find this term metaphorically applied to express the destiny which is awarded by God, whether favour-able or the reverse (Ps 16<sup>6</sup>, Is 17<sup>14</sup> 34<sup>17</sup>, Jer 13<sup>26</sup>, Dn 12<sup>15</sup>). The division of the booty taken in war, or of the property of prisoners or criminals, was or of the property of prisoners or criminals, was often carried out by means of the lot (JI 3<sup>3</sup>, Nah 3<sup>10</sup>, Ob<sup>11</sup>, Ps 22<sup>18</sup>, Mt 27<sup>35</sup>, Jn 19<sup>24</sup>).

(4) The lot was also employed on the great Day of Atonement in the selection of the he-goat for Jehovah and for Azazel respectively (Lv  $16^{7-10}$ ). See arts. AZAZEL and ATONEMENT (DAY OF). According to the Mishna Tractate Jona (iii, 9) these lots were made at first of boxwood and afterwards of gold, and shaken in an urn.

We have no clear indications as to the actual nature of the lots used by ancient Israel. Probably they were small tablets of stone or wood, and were inscribed with the name of the person or tribe; or, in cases of criminal trial, they may have been of different colours, one (to express guilt) differing from all the others. Probably in many cases (as in the assignments of property) there was a second vessel containing lots inscribed with the name of the property (as land or slaves). But it is not necessary property (as land or slaves). But it is not necessary to suppose this. The name of the property might be called out and a lot containing the name of the tribe or person would be drawn from the vessel, or *vice versa*. All this belongs to the uncertain realm of conjecture. We do know, however, that the lots were sometimes held in the fold of the outer garment (Pr 16.3).

Another point which is obscure is whether the function of deciding by lot was predominantly exercised by priests or not. From Neh 11<sup>1</sup> we are led to infer that, unlike the use of the ephod and Urim and Thummim in pre-exilian times, the employment of the lot, in the times both before and

after the Exile, was open equally to priests and laity. Last of all, we have to consider the obscure derivation of the name of the feast of Purim from the supposed Persian word pdr, meaning 'lot' (Est  $9^{*4}$ ; cf. 3'). Lagarde has shown that no such Persian word exists. Pers. pdre= 'portion,' not 'lot.' Zimmern's combination of the name with the Babyl. *pubru*, 'assembly' (ZATW, 1890,

p. 158 ff.), is far more probable. Comp. the Mand. mms, Syr. אסטען 'meal,' 'feast.' The interesting Babylonian parallels with the Esther narrative. suggested by him and by Jensen, will be found in Nowack's *Heb. Archäol.* ii. pp. 194-200, and in Wildeboer's 'Esther' in the *Kurzer Hand Com*mentar, p. 172 ff. See, further, PURIM (FEAST OF).

On the use of the lot in classical antiquity consult Warre Cornish's Concise Dict. of Greek and Roman Antiquities, sub voce 'Sortes.'

Owen C. WRITEHOUSE. LOYE (אַדָּבָה, לאַלאַד, Love to God and love to man are primary principles of the NT religion. But Jesus declares that on these two commandments hang all the law and the prophets (Mt 22<sup>30</sup>; cf. 7<sup>12</sup>, Mk 12<sup>21-34</sup>). They are therefore primary principles of the OT religion as well. They are not, however, independent or co-ordinate, but are so related that the second springs from, or is conditioned by, the first. The love to man, in the biblical sense, springs from a heart renewed, and possessed with the love of God  $(1 \text{ Jn } 4^{21}; \text{ cf. } 2^{7-11}; 3^{10} 4^{11.12});$  for only by such a heart will the view be taken of man's essential worth and dignity, of the true ends of his life, and of the possibilities of his recovery from sin, that makes love possible (cf. Lk  $15^{10}$ ); only in such a heart is the egoistic impulse conquered which leads us to regard other men as rivals to ourselves, to seek our own good in preference to theirs, to use them as means to our own ends, to treat them with indifference and neglect, or, if they come into collision with our interests, with envy, irritation, and resentment; only in such a heart is there the disposition and a sufficiently powerful motive, to a sustained, holy, spiritual, ungrudging, truly disinterested love to our fellow-men, even to those who have no claims upon us, or who may have injured us, or may be personally unworthy (Mt 5<sup>43-45</sup>, Ro 12<sup>19-21</sup>, 1 Jn 3<sup>16, 17</sup>  $4^{11}$ ).\* On the other hand, it is vain for us to profess to love God if we do not love our brethren (1 Jn 2<sup>9-11</sup> 3<sup>10</sup>  $4^{29}$ ). But this love to God, again, which is the spring of love to man, has its source in the knowledge we have of the love which God has to us (1 Jn 4<sup>7, 19</sup>). It is the loving character of God as revealed in His words and acts to men (Ps 114<sup>1</sup> etc.), peculiarly in His grace in Christ, culminating in the sacrifice of the Cross (Eph 5<sup>1.3</sup>, 1 Jn 4<sup>9.10</sup> etc.), in conjunction with the love which Christ Himself has manifested to us (Jn 13<sup>34</sup>) 15<sup>12</sup>, Gal 2<sup>20</sup>, Eph 5<sup>26</sup> etc.), which begets responsive love, and leads to the entire surrender of ourselves to the service of God, and of our fellow-men for God's sake. Alike in OT and in NT, love to God and love to man lead up as their last source to love in God Himself, and it is from this highest point of view, accordingly, that our proper study

of the subject must begin. i. LOVE OF GOD.—(A) The OT Doctrine.—Love, generally, is that principle which leads one moral being to desire and delight in another, and reaches its highest form in that personal fellowship in which each lives in the life of the other, and finds his joy in imparting himself to the other, and in re-ceiving back the outflow of that other's affection into himself. The quality and degree of love vary with the relation in which the persons loving and loved stand to each other, the highest examples of human love-those, therefore, which

\*Trench accordingly remarks that dydew is a word born within the bosom of revealed religion. It occurs in the LXX, but there is no example of its use in any heathen writer whatever; the utmost they attained to here was  $e_{\lambda z a \beta d x \sigma}$ , and  $e_{\lambda z a \beta d x \sigma}$ , and the last, indeed, never in any sense but as the love between brethren in blood' (Trench, Symonyme, 42). It has, indeed, been argued by Deissmann (but his grounds are very weak) that  $d_{\gamma x \gamma \gamma}$  was a word in use in the Egyptian vernecular, from which it was adopted both by Jews and Christians. See Expos. Times, ix. (1895) pp. 272, 501, 567.

154

are peculiarly taken as the images of the divine in its tenderest relations (Is 546, Ezk 23, Hos 111) -being the love of husband to wife, and of parent to child. Love, therefore, in God, is in general that principle which leads Him to desire and seek the good of all His moral creatures; to impart benefits to them in every scale and degree of blessing; to establish relations of fellowship with them, that He may bless them more fully; to recover and restore them when they have turned aside from their true end, and lost themselves through sin (Hos  $13^9$ ); highest of all, to admit them to participation in His own holy, blessed life  $(1 \text{ Jn } 1^3)$ , in which He and they become one, as the Father and Son are one (Jn  $17^{21}$ ). As the central principle of the divine character—for 'God is love' (1 Jn 4<sup>6</sup>)—every other attribute stands in relation and subordination to this, though they are not on this account (as by Ritschl and others) to be immediately identified with it. 'All the divine attributes are combined in love, as in their centre and vital principle. Wisdom is its intelligence; might its productivity; the entire natural creation and the entire revelation of righteousness in history are means by which it attains its teleological aims (Martensen). (For an exhaustive examination of the idea of the divine love in its theological and

ethical relations, see Dorner's System of Christian Ethics, pp. 58-96, 374-382). When, with this general conception of love as an attribute of God, we turn to the OT, we are apt to feel disappointment. Holiness is in the forcer und the second in the background the foreground; love seems in the background. The term 'love' (vb. אָהָב noun, noun, used of God's The term 'love' (VD. 278, noun 7278), used of God s love to His people, is not found, if Dt be late, till the time of the prophets. Hose is the first who develops the idea (under the images of marriage and sonship, Hos 3<sup>1</sup> 11<sup>1</sup> 14<sup>4</sup>). In Dt, Is, Jer, etc., it occurs repeatedly (Dt  $4^{37}$  7<sup>13</sup> 10<sup>15</sup> etc., Is  $48^{14}$  63<sup>9</sup>, Jer 31<sup>3</sup>, Zeph 3<sup>17</sup>). Moreover, the love thus spoken of is a love only to the covenant people. "The particular word love,' says Schultz, 'is hardly ever applied to God; and where it does occur in a late writer (Mal 1<sup>2</sup>), it denotes God's occur in a late writer (Mai 1-), it denotes God s special covenant love for Israel; and the reverse side of this is, of course, hatred of the hostile peoples' (*Alttest. Theol.* p. 547). This first impression, however, regarding the OT religion, gives way to a different one on narrower inspection. As respects the mere word, we shall find that a quite analogous phenomenon meets us in the NT. Singular as it may appear, it is the case that the terms  $d\gamma d\pi \eta$  and dyamar are never once applied to God in the Synoptic Gospels. The nearest approach is  $d\gamma a\pi\eta\tau \delta r$  as a designation of the well-beloved Son (Mt 3<sup>17</sup> 12<sup>18</sup> etc.). The Synoptics are full of a Father who loves, yet the word is never once used. In the Acts the words  $d\gamma d\pi \eta$ and  $d\gamma a \pi \delta r$  never once occur as applied either to God or man. In the Gospel of St. John, apart from the (evangelist's) statement, 'God so loved the world' (Jn 3<sup>16</sup>), it is, as in the Synoptics, the Son who is primarily the object of the Father's love (Jn 3<sup>20</sup>) 7<sup>28</sup>); and this love of the Father is extended to the disciples in union with Him (Jn 14<sup>21</sup> 17<sup>23. 26</sup>). But after the earthly manifestation of Christ had been summed up in His death and resurrection, and reflection had begun on the completed revelation, there was no difficulty in speaking of the love of God (Ro 5<sup>5, 8</sup> 8<sup>35, 39</sup>, 2 Co 13<sup>14</sup>, 1 Jn 3<sup>1</sup> 4<sup>9-12</sup> etc.). In a similar way God's acts of love in OT precede the use of the term. As Dillmann remarks of the term 'righteousness' ( $p_{TY}$ ), which likewise is not found in the Mosaic books, 'The ethical norm, the will of God must first he revealed according to its will of God, must first be revealed according to its content, before there could be mention of an agreement of the acts of God with this norm' (Alttest. Theol. p. 271; see his whole excellent treatment of the love of God, pp. 258-283).

When Dt and the prophets speak of the love of God, they carry back that love to the beginning of God's dealings with Israel as a nation, and find the proof of it in His acts towards that people, and the covenant He made with them (Hos 11<sup>1</sup>, Is 63<sup>9</sup>, Ezk 16). Dt carries the love further back still, to the time of the patriarchs, for whose sake this kindness was shown to their descendants (Dt 4<sup>37</sup>, cf. Is 51<sup>1</sup>). And the biblical history has only to be studied in its entirety to see that it is a revelation of the love of God to Israel throughout. The word itself may not be employed,—in the psalms we find it used with such objects as 'righteousness,' 'judgment,' 'Zion,' 'the gates of Zion,'etc. (Ps 11<sup>7</sup> 33<sup>6</sup> 78<sup>48</sup> 82<sup>2</sup>),

-but there is a rich vocabulary of terms to denote the particular manifestations of love: as  $\neg \overline{r},$ goodness, long-suffering, etc., and these are con-stantly in use. The wrath of God also is not a blind impulse, but springs from an ethical ground, and is tempered and restrained by His long-suffering and mercy (Ex 34<sup>6</sup>, Nu 14<sup>18</sup>, 1s 48<sup>9</sup>, Jer 15<sup>16</sup>, Nah 1<sup>3.7</sup>, Ps 78<sup>36</sup> etc.). It is no doubt true, as alleged, that the special object of this love of God is the covenant people Israel-a fact which has again its exact analogue in the use of  $d\gamma d\pi \eta$  in NT (see below); but it is to be borne in mind that this below; but it is to be view to an ultimate wider blessing (Gn  $12^{1-3}$ , Ps 67. 87 RV); and the term 'hate' in Mal  $1^3$  is not to be more rigidly interpreted than Christ's own use of the same term (Lk 14<sup>26</sup>). Schultz observes, 'Passages like Gn 29<sup>31</sup> and Pr 30<sup>22</sup> show that the expression "hatred" is taken from the idioms of polygamy, and denotes, not hostility, but neglect' (Alttest. Theol. p. 547). As against the idea that the love of God was that of the narrow partiality of a tribal deity for his protégés many facts speak. The original creation was evidently an outcome of goodness (Ps 136<sup>1-9</sup>), and God 'blesses' the original representatives of mankind, and richly dowers them with dominion over the creatures (Gn  $1^{27-29}$ ). The patience of God bears with the antediluvian world (Gn  $6^3$ ); and after the flood His covenant is made with (0h 0'), and all flesh (Gn  $9^{s-17}$ ). The Abrahamic covenant has, as shown, an aspect of blessing to the world. It is repeatedly declared that the whole earth is full of Gold's goodness, and that His mercies are over all His works (Ps 33<sup>5</sup> 119<sup>64</sup> 145<sup>7-9</sup> etc.). When it is declared that God desireth not the death of a sinner, but rather that he turn from his wickedness and live (Ezk 18<sup>20</sup> 33<sup>11</sup>), this cannot be held to apply exclusively to Israel; and the Bk. of Jonah furnishes a proof that the pity of God extends to furnishes a proof that the pity of God extends to heathen nations as well as to His own people (Jon 4<sup>10, 11</sup>). The classical passage on the divine char-acter in OT is that in the Mosaic history in which J" proclaims His name, 'The Lord, the Lord, a God full of compassion and gracious, slow to anger,' etc. (Ex 34<sup>6, 7</sup>); and it is also that in which the graciousness of this character is brought to fullest expression. If the sins of the fathers are visited on the third and fourth generation of those that on the third and fourth generation of those that hate Him, mercy is kept for thousands of those that love Him (cf. Ex 20<sup>5.6</sup>).

It is, however, doubtless, in the special relation of God to Israel that, in OT, His love is distinctively manifested, for this people He has bound in covenant with Himself, and set them apart, that He might be glorified through them. This relation of love is already implied in the term 'son' which He applies to the nation (Ex  $4^{25.29}$ ); but comes out with peculiar distinctness in the glowing language in which the covenant is proposed to the people at Sinai (Ex  $10^{9-6}$ ). This relation springs in no sense from desert, but is a result of God's free electing grace (Dt 7<sup>7</sup>); and, so far from placing Israel in a position of favouritism in which

their offences are lightly condoned, it lays on them an increased responsibility and subjects them to special chastisements in case of unfaithfulness (Am 3<sup>2</sup>). But the same love secures that God will not cast His people off, but will work on them by judgment and mercy till He has finally subdued them to Himself (Hos 2, 14 etc.).

An interesting point of inquiry relates to the relation of this 'love' of God in OT to His other ethical attributes of 'righteousness,' 'truth,' 'zeal, (wrath, holiness, etc. On the relation to 'wrath' (with 'zeal,' 'holiness'), see ANGER; but a word may be here said on the relation to 'righteousness' (with 'truth,' 'faithfulness,' etc.). These two ('righteousness' and 'love') are not to be identified (as with Ritschl, etc.), yet they stand in the closest relation, and God's 'righteousness' is manifest in His saving acts (Ps 31<sup>1</sup> 48<sup>10, 11</sup> 103<sup>6, 7</sup>, Hos 2<sup>19</sup> etc.). Righteousness, with Ritschl, is identical with grace; it is the consistency of God in carrying out the ends of His love (Recht. und Ver. ii. pp. 102-113). But ethical norms are implied alike in the determination of these ends, and in the choice of the means by which they are accomplished, and it is these ethical norms with which 'righteousness' has to do. 'Righteousness' is that which answers to the ethically right norm or standard. So far as ·love' is involved in ethical perfection, or is demanded by that, it falls under the category of 'righteousness,' and, so far as God has bound Hinself by covenant obligations to His people, to His pledges (cf. 1 Jn 1<sup>9</sup>). 'Righteousness' thus interposes for their salvation, help, protection, etc. But it has other and more general functions in the upholding of the moral order and judgment of the (e.g. Ps 94. 96<sup>13</sup> 98<sup>9</sup>). Its highest satisfaction, nevertheless, is not the infliction of judgment, but the conversion and salvation of the sinner and the production of righteousness in the earth (Ezk 33<sup>11</sup>, Ps 11<sup>7</sup>, Is 45<sup>8</sup> 61<sup>11</sup> etc. Dorner has an original investigation of the relation of love to righteousness in his System of Christian Ethics, pp. 68-93). We may add that it is of the essence of love in God as in man that it does not remain a mere selfenclosed or inoperative principle, but reveals itself in acts for the benefit of the beloved object. It is impossible to believe in a God of love who, as Carlyle said, 'does nothing.' The religion of the Old Testament, therefore, and of the New as well, is pre-eminently that of a God who reveals His gracious purposes in history, and acts for man's salvation (Ps 103<sup>6.7</sup>, Ro 5<sup>8</sup> etc.).

(B) The NT Dortrine of the love of God presupposes that of OT, and stands in no essential contradiction with it (as Marcion supposed), but perfects and completes it in the full revelation of the character of God in His Son, and in the discovery of His plan of love for man's salvation, in the gospel. It is certainly a striking fact especially for those who would have us find the whole revelation of Christ in the Synoptics—that, as remarked above, Jesus in no single saying in these Gospels speaks directly of the 'love'  $(d\gamma d\pi \eta)$ of the Father, or uses the corresponding verb  $(d\gamma a\pi \hat{a}\nu)$ . The impartial beneficence of the Father is indeed urged as an example (Mt 5<sup>40</sup>); and the Father is set before us as rewarding, hearing prayer, giving good gifts, forgiving trespasses, caring for His children, as for the lilies and the fowls, revealing Himself to babes, avenging injuries to His little ones, etc. (e.g., Mt 6<sup>1-4.6.5, 23-32</sup> 10<sup>25-31</sup> 11<sup>25</sup> 18<sup>4.10.14</sup>). But perhaps even these determinations do not carry us essentially beyond the bounds of OT. Yet there is a new significance in the very name 'Father,' the depth and tenderness of which are revealed in the relation of the

Father to the 'beloved' Son  $(d\gamma a \pi \eta \tau \delta s)$ ; and the whole spirit, character, and gracious words and deeds of Jesus are a revelation of the meaning of love in God which is altogether new. It is in the Gospel of St. John that we have the assurances that those who are in union with the Son are loved with the same infinite and tender love with which the Son Himself is loved by the Father (Jn  $14^{21, 23}$  $17^{23, 23}$ ). In Ac the word 'love' is not used of God's attitude to men, though God's acts of grace ( $\chi \epsilon \rho_{03}$  frequently) in the sending of His Son, raising Him from the dead, exalting Him to heaven, sending the Spirit, granting forgiveness of sins, salvation, and healing through His name, are abundantly extolled (Ac 2. 3. 4<sup>1-12</sup> 10<sup>24-45</sup> 13<sup>25-32</sup>) etc.). It is, however, in the Pauline and Johannine Epistles that this doctrine of the marvellous love of God, as revealed in the gift, incarnation, life, death, resurrection, and glorification of the Son, and in the salvation and eternal life that have and in the salvation and eternal life that have come to men through Him, with unspeakable spiritual blessings and privileges here, and ever-lasting glory hereafter, is discovered in its full-orbed splendour (Ro 5<sup>5, 8</sup> 8<sup>35-30</sup>, 1 Jn 3<sup>1</sup> 4<sup>8-13</sup> etc.). In so far as God desires the salvation of all (1 Ti 1<sup>16</sup> 2<sup>4</sup> 4<sup>10</sup>), and has provided in the mission and sacrifice of His Son for the salvation of all (1 Ti 2<sup>6</sup>, 1 Jn 2<sup>2</sup> 4<sup>10</sup>), His love embraces the whole world (Jn 3<sup>16</sup>),—this extension of the blessings of salvation to the Centiles on coult terms with the solvation to the Gentiles on equal terms with the Jews being the peculiar 'mystery' of God, which had been hid from earlier ages, and which St. Paul was commissioned to reveal (Eph  $3^{1-11}$ ; in this sense the NT doctrine is a transcending of the 'particularism' of the OT. Gal 5<sup>6</sup>, Col 3<sup>11</sup> etc.). Nevertheless, the love of God is not in NT, any Therefore the provide the set of adoption of children, and all spiritual blessings, according to the good pleasure ( $\epsilon i \delta i a c a$ ) of His will — 'the purpose of Him who worketh all things after the counsel of His will' (Eph 14-12) —are conducted by God ('foreknown,' 'fore-ordained,' 'called,' justified,' 'glorified') to the glory destined for them (Ro 8<sup>28-39</sup>, cf. Jn 6<sup>37-40</sup> etc.). The highest form of love, alike in God and man, is not a matter of vague impulse, but involves intelligent choice (diligo), the grounds of choice lying sometimes in the objects loved, but in the case of God, in dealing with the unworthy, lying solely in His own good, wise, and holy will  $(\chi d\rho s, Eph 2<sup>9</sup> etc.)$ . The exponent of this love of God to us is Jesus Christ, whose own love is joined with God's as part of the same manifesta-tion of the divine character (Jn  $10^{7-18}$ , Ro  $5^{9-11}$ , Eph  $3^{19}$   $5^3$ , 1 Jn  $4^{10}$ , Rev  $1^5$  etc.). In the com-passion, tenderness, devotion, grace of Jesus in His earthly life; in His hope for the vilest, and yearning desire to bring them back to God; in His self-sacrifice and surrender of Himself for His sheep (Jn  $10^{11.14}$ ), we have the 'interpretation'  $(\epsilon \xi \eta \gamma \eta \sigma a \tau \sigma, Jn 1^{18})$  of the Father's heart to us. Love, as thus exhibited, is not simply complacency in the good; it unites itself also with the bad, yearns' over them with inexpressible tenderness and sorrow (Mt 23<sup>37</sup>), identifies itself so closely with them that their sin and shame and sorrow are felt and shared as if they belonged to the loving One Himself,love, in other words, becomes substitutionary, and in the case of Christ propitiatory (Mt  $8^{17}$  9<sup>36</sup>, Lk 15, Jn 10<sup>10-18</sup>, 1 Jn 4<sup>3-14</sup>). The last and all-comprehen-sive word on this subject is spoken by the Apostle of Love when he sums up the whole significance of the gospel revelation in the saying — 'GOD IS LOVE' (1 Jn 4<sup>8</sup>).

156

LOVE

It lies beyond our province to discuss the more properly theological questions which arise out of this scriptural doctrine of the love of God—its bearings, c.g., on the doctrine of the Trinity (cf. Sartorius, Doctrine of the Divine Love, p. 8 ff., Eng. tr.); or its relation to Creation, and the supreme ethical end (cf. Ritschl, Recht. und Ver. iii.<sup>5</sup> pp. 263-266). It is a tempting, and not baseless, speculation, that, as love in its essential nature has relation to another, and involves, in its fulness, surrender and self-communication to another, so, if love and fatherhood are to be predicated eternally of God, there must be self-distinction and sonship also within the divine essence (for the world and human spirits, as non-eternal, contingent, and finite, cannot be adequate objects of this eternally complete, and infinite, and active love of (God). It is a speculation, however, which lies, in this form, beyond Scripture, though the NT doctrine of the Trinity throws back light on it, and it has a point of relation to the recognition of the Son in the Gospels as the peculiar object of the Father's knowledge and love (Mt 3<sup>17</sup> 11<sup>21</sup>, 12<sup>18</sup>, Jn 5<sup>30</sup> etc.). ii. LOVE IN MAN.—The primary and unalterable duty of man, in both OT and NT, is to love (God

(Dt  $6^5$ , Mt  $22^{57.36}$ , Mk  $12^{29-33}$ ). This obligation is based in part on the natural relation of man to God as created and dependent (Dt  $8^{17.16}$ , Ps  $95^{5.7}$ )  $100^3$ , Is  $1^3$ ); but a specially on the morally perfect character of God (Mt 5<sup>48</sup>, Mk 10<sup>18</sup>); and, above all, on the fact that God is Himself a Being of Love this, too, not simply in a general respect, but as having manifested His love in gracious relations to ourselves. 'Thou shalt love the Lord *thy God*,' etc. (Dt 6<sup>6</sup>). In OT it is the superabounding grace to ourselves. Information the superabounding grace etc. (Dt 6<sup>5</sup>). In OT it is the superabounding grace of God in His relations to Israel in the covenant (Dt 4<sup>1-14</sup> <sup>32-40</sup> 11<sup>1, 13, 22</sup> 19<sup>9</sup> 32<sup>1-14</sup>, Ps 5<sup>11</sup> 31<sup>23</sup> 116<sup>1</sup>, Is 54, Hos 11<sup>1-4</sup> 14, etc.); in NT it is the love of God in Christ (Ro 8<sup>25, 29</sup> 12<sup>1</sup>, 1Co 2<sup>9</sup>, Eph 2<sup>4-10</sup>, 1 Jn 4<sup>19</sup>) which is the ground of obligation. It is a bare from the abstract evident how far we are here from the abstract grounds of natural theology. This love, moreover, is no mere sentiment, or excitement of feeling, but is connected in both OT and NT with an obedient will and the keeping of God's commandments (Dt 6, Jos 22<sup>5</sup>, Is 1<sup>10-18</sup>, Mt 7<sup>21-23</sup>, Jn 14<sup>15</sup> 15<sup>9-14</sup> etc.). 'This is the love of God,' St. John says emphatically, 'that we keep his commandments' (1 Jn 5<sup>3</sup>). The scriptural love to God is thus entirely practical, it is also intelligent, and fed through growing knowledge ('thy mind'; cf. Eph 1<sup>17, 18</sup> 3<sup>17, 18</sup> etc.). It will specially manifest itself in the intelligent adoption of the ends of God's kingdom as our own (Mt  $6^{33}$ ). The love of God thus enspheres the being of the true child of God; it is shed abroad in the heart (Ro  $5^5$ ); the soul dwells in love, *i.e.* dwells in God and God in it (1 Jn 416). But this feeling and enlargement of the heart in love to God, and experience of the love of God, cannot remain self-contained. It spontaneously overflows in love to others, and yearns with the desire to bring them within the same circle of blessing. Specially will it feel a peculiar delight in those who are within the same sphere of love as itself. The love of God thus necessarily issues in love to our brother; and so imperative is this connexion, that where the latter does not exist, we are warranted in declaring that the former is absent also  $(1 \text{ Jn } 3^{14-17} \text{ } 4^{7.8})$ .

Love to man has thus its spring and principle in love to God, and here a wider and a narrower sphere is recognized—the one, the entire human family; the other, the peculiar brotherhood in Christ (Gal  $6^{10}$ , 1 P  $2^{10}$ ). The grounds on which this duty of love is based are entirely different from those of philosophical ethics. The stoical ideal of a brotherhood of reason remained an

#### LOVE

The ethics of Jesus laid the unrealized dream. foundations of a true love to man in spiritual relation to God, and the destination to sonship in His kingdom. A brotherhood arises out of the Fatherhood. If we inquire more narrowly into the biblical development of this great duty of the gospel, we find the principle in which the whole is involved already enunciated in OT, though its full scope and bearing were not apparent under the Old Covenant. It is from Leviticus (1918) that Jesus quotes the precept, 'Thou shalt love thy neighbour as thyself, as one of the two 'great' commandments on which hang all the law and the commandments on which hang all the law and the prophets (Mt 22<sup>30, 40</sup>, Mk 12<sup>31</sup>); even as He declares of His enunciation of 'The Golden Rule'—'for this is the law and the prophets.' The question was as to the breadth of the signification of the term 'neighbour'; and while here also the correct principle was already involved in the doctrine of the oneness of the human family as made in the image of God (Gn  $1^{27}$ ), and in the truth of one God of the spirits of all flesh (Nu  $16^{22}$ ), it was alien to the modes of thought of antiquity, and perhaps was impossible to the Hebrews under the peculiar limitations of their national economy, to give to this pregnant term 'neighbour' a universal appli-cation. (How few do so even now under Christian teaching !) It is certain in any case that they did not give it this wider scope ; and it was reserved for Jesus to correct 'particularism' here also, and, in the light of His broad, universal doctrine of God and man, to lift this duty to its proper level of unlimited obligation. Our 'neighbour,' He teaches in the parable of the Good Samaritan, is *every* man without distinction of nationality (Lk  $10^{29-37}$ ); and the obligation of love is extended to embrace even enemies (Mt  $5^{43-49}$ ), the pattern in this case being the example of the Father in heaven. (The germ is found here also in OT both in precept and example, Lv 19<sup>17.18</sup>, 1 S 24. 26, Ps 7<sup>5</sup>). This principle, then, becomes in Christian morality the single principle in which all duty to our fellow-men is summed up, for it requires, comprehensively, that we do our neighbour no injury (Ro 1310), but do him all the good we can; it requires even that we overlook his wrongs to us, and strive to over-come his evil with our good (Ro 12<sup>19-31</sup>); and it furnishes the only, but all-powerful motive, through which this discharge of duty can be accomplished. He who loves his neighbour as himself will not, e.g., kill him, will not steal from him, will not bear false witness against him, will not covet his possessions (Ro 13<sup>9</sup>). But this love will further change these negative precepts into positive ones, and lead him to seek his neighbour's highest well-being in soul and body. In this one word, therefore, as it is repeatedly said, the whole law is fulfilled (Ro  $13^{8.10}$ , Gal  $5^{14}$ , Ja  $2^{8}$ ). The example of Jesus in His earthly life is again the interpretation to us of the doubt and range of this present of the set of depth and range of this precept, alike in its practical beneficence, its compassion for the lost, its forgiveness of injuries, and its voluntary selfsacrifice, even unto death, for others (Ac 10<sup>28</sup>, Ro 15<sup>3</sup>, He 12<sup>2, 3</sup>, 1 P  $2^{21-24}$ , 1 Jn  $4^{16}$  etc.). How high and wide-reaching the spiritual requirements of this law of love are-how love is patient and kind : excludes envy ; is humble ; not easily provoked; does not impute motives; mourns over iniquity, and rejoices in truth; endures wrong; believes the best; where it cannot believe, hopes; where it cannot even hope, suffers—is magnificently brought out in that incomparable hymn of love chanted by St. Paul in 1 Co 13. In this principle of love, as we are further taught by Christ's example, and by apostolic teaching, there lies, not only the fulfilling of the law, but a great, nay, the chiefest, part of practical religion (Ja  $1^{27}$  $2^{14-18}$ , 1 Jn  $4^{14-17}$ ). And we are reminded that it is

# LOVE (BROTHERLY)

precisely these deeds of love which the King is represented as inquiring into at the great last day of account, and it is by their presence or absence that men's everlasting destinies are adjudged (Mt 25<sup>34-46</sup>).

LITERATURE. --OT Theologies of Oehler, Schultz, Dillmann; Sartorius, The Doctrine of Divine Love; Wendt, Die Lehre Jesu, vol. ii.; Weiss, NT Theology; Ritschl, Recht. und Verschnung, vols. ii. iii.; Christian Ethics of Martensen (vol. i.) and Dorner. J. ORR.

LOYE (BROTHERLY).-See BROTHERLY LOVE.

LOYE, LOYELY, LOYER.-In 1 Es 4<sup>24</sup> we find 'love' used in the concrete, one that is loved, 'when he hath stolen, spoiled, and robbed, he bringeth it to his love' ( $\tau \hat{y} \ \epsilon \rho \omega \mu \epsilon r y$ ; Vulg. amabili sume; Wyc. 'leef' [=loved one]; Cov. 'his love'). Cf. Shaks. Venus and Adonis, 867-

#### She hears no tidings of her love.

The adj. lovely has come to be used somewhat carelessly, and now means scarcely more than attractive; but in AV it always carries a distinct sense of its origin. It has two meanings, however. 1. Worthy of being loved, Ezk 33<sup>32</sup> 'thou art unto 1. Workey of being loved, E2K 33<sup>26</sup> thou art unto them as a very lovely song of one that hath a pleasant voice' ( $\Box_{2,2,2}^{-} \forall \forall'$ , lit. as AVm 'a song of loves,' RVm 'a love song'); Ca 5<sup>16</sup> 'he is altogether lovely' ( $\Box_{2,2,2}^{-} \forall \forall \phi'$ , lit. 'all of him is loveablenesses'); Ph 4<sup>5</sup> 'whatsoever things are lovely' ( $\delta \sigma a \pi \rho o \sigma \phi i \lambda \bar{\eta}$ ). Cf. Preface to AV, 'A man may be counted . . . a comely man and lovely, though he have some warts upon his hand'; Tindale, *Expositions*, p. 26, 'If thou believe in Christ, that he is thy Saviour that faith will lead thee in immediately. Saviour, that faith will lead thee in immediately, and show thee God with a lovely and amiable countenance'; Fletcher, Wildgoose Chase, i. 3-

"Mir. Can you love a man? Lil. Yes, if the man be lovely, That is, be honest, modest."

Milton, PL ix. 232-

'Nothing lovelier can be found In woman than to study household good.

156-

'Many a lovely look on hem he caste.'

Shaks. Taming of Shrew, 111. ii. 125-

'I should bid good-morrow to my bride, And seal the title with a lovely kiss.'

Lover has become restricted in meaning. Its wider application formerly may be seen in Tindale's tr. of Lk  $6^{22}$  'For the very synners love their lovers'; 15<sup>9</sup> 'And when she hath founde it she calleth her lovers and her neighbours'; 15<sup>29</sup> 'and yet gavest thou me never soo moche as a kyd to make mery with my lovers';  $3 \text{ Jn}^{14}$  'The lovers salute the. Grete the lovers by name.' So in AV, 1 K 5<sup>1</sup> 'Hiram was ever a lover of David'; Ps 38<sup>11</sup> 'My lovers and my friends stand aloof from my sore.' But if it was wider, it was also darker in meaning sometimes and definite enough, as in Hos 25 ' For their mother hath played the harlot: she that conceived them hath done shamefully; for she said, I will go after my lovers.' Cf. Knox, Works, iii. 196, 'And Jeremie lykewyse in mokage of thame, sayis, Lat thy loveris delyver thee; call upon thame, and lat tham heir thee! Thow hast committed fornicatioun with thame, and hes committit huredome with stoke and stone.

#### J. HASTINGS

**LOVE-FEASTS** ( $d\gamma d\pi \alpha \iota$ , Jude <sup>12</sup> and some MSS of 2 P 2<sup>13</sup>;  $\delta \alpha \chi \eta$ , Apost. Const. ii. 28;  $i \pi \sigma \delta \alpha \chi \eta$  or biaxorla  $\tau \rho a \pi \epsilon f \delta r$ , Julian, Frag. Epist. p. 305 [ed.

Spanheim, 1696]; δημώδης έστίασις, Clem. Alex. Pæd. 11. i. 12; cf. συνευωχείσθαι, Jude, 2 P, U.cc.; Latin, epulæ, Jude <sup>12</sup>, Vulg. convivium, 2 P 2<sup>13</sup> ib., Latin, epute, duce ", vulg. convorum,  $2 + 2^{-1} c_{-1}$ , but, technically, agapt from the 2nd cent. onwards [cf. Tert. Apol. 39, 'cena nostra . . . id vocatur quod dilectio apud Greecos est'; Acta Perpet. et Fel. 17; Aug. c. Faustum, xx. 20]; Eng. RV 'feasts of charity').—These feasts sprang out of the common meals of the early Christian Church, in which all the members of the local church shared, and which second at once as a token of brotherhood (Ac 2<sup>46</sup>) served at once as a token of brotherhood (Ac  $2^{46}$ ) and as a method of helping the poor (Ac  $6^{1.3}$ ; cf. Chrys. ad 1 Co  $11^{17}$  kal  $\gamma d\rho d\gamma d\pi \eta s \dot{\upsilon} t\delta \theta e \sigma s \tilde{\eta} r$  kal πενίας παραμυθία και πλούτου σωφρονισμός και φιλοσοφίας ἀφορμὴ τῆς μεγίστης και τατεισφροσίνης διδα-σκαλία). They probably originated in an imitation of the private meal of a Jewish household, widened out by the Christian conception of brotherhood, and consciously reproducing the last Supper which the Lord had kept at Jerusalem; but their wide dissemination among the Gentile Christians would have been facilitated by the similar common meals have been matrixed by the similar common means which were usual in the pagan religious brother-hoods (Hatch, BL ii. p. 31 note). The fullest account of a love feast in the NT is to be found in 1 Co 11<sup>17-34</sup>; in subsequent writers, in Tert.

Apol. 39. The feast was an afternoon meal at which rich and poor met together in one common building. Formal prayers of benediction, based upon the Jewish benedictions, were said over the food; the prayers preserved in *Didaché*, c. 9, are possibly specimens of those used at the Agape. The 'Kiss of Charity'  $(\phi \lambda \eta \mu a \ d\gamma a \pi \eta s, 1 P 5^{14})$  perhaps concluded the meal. After the meal, hands were washed, lights were lit (cf. Ac 20<sup>7</sup>), and there followed singing and prayer under the leadership of a prophet (*Did.* c. 14) or some other minister. The Agape stood in close connexion with the Eucharist, which possibly preceded it (so Chrys. *loc. cit.*), but more probably followed it; and hence the physical definition of the probably followed to include the the phrase  $d\gamma d\pi \eta \tau$  race seems to include the Eucharist in Ign. ad Smyrn. c. 8 (where see Lightfoot), and eixaporta is applied to Christian meals in Clement of Alexandria (*Pæd.* ii. 10).

But the NT itself bears witness to the dangers which such a meal ran of degenerating into licence. St. Paul had to check this at Corinth, and perhaps also at Ephesus (Eph  $5^{18.19}$ ). St. Peter mentions the presence of immoral men degrading the feast into a banquet ( $\sigma_{uvevu\chi} o i \mu e \sigma_{u}$ ). The heathen were not slow to exaggerate this, and to accuse the Christians of wild licence and immorality. Hence in the course of the 2nd cent, throughout many parts of the Christian Church, the Agape was separated from the Eucharist, the former being celebrated in the evening, the latter in the morning. This was already the case in Bithynia at the time of Pliny's letter to Trajan (Ep. 96), and the Agape was dropped there owing to Trajan's edict against sodalitates. Justin Martyr (Apol. i. 67) describes the Eucharist without any refer-ence to the Agape; Tertullian (Apol. 39) describes the Agape without any reference to the Eucharist, and speaks of the Eucharist as celebrated before daylight (de Corona, c. 3). At Alexandria the connexion of the two, at any rate on some occasions, is found much later (cf. Socrates, HE v. 22), and the Agape took two forms there : either it retained the old idea of a common meal in the church, and tended at Alexandria to become an elaborate banquet; or it took the form of a dinner for the poor given by a richer brother at his own house, and apparently it was then called  $\delta_{0\chi\eta}$  rather than Agape (Bigg, Christian Platonists, pp. 102-105). By the time of St. Augustine it was little more than a dole for the poor (c. Faustum, xx. 20; cf. Canons of Hippolytus, xxxi.-xxxv.). The changes

LOVINGKINDNESS

in the observance of the Agape may be compared with those in the Roman 'sportula.' For the later history in which the meal was first banished from the churches and then entirely disused, the reader is referred to Smith's *Dictionary of Christian Antiquities.* The institution has left its per-manent mark in two ways upon the Christian Church: first, in all acts of charity that take the form of entertainment of the poor; and, secondly, in certain points of ritual connected with the Eucharist, such as the offertory, the washing of hands, the kiss of peace, and in the Oriental Church the distribution among the poor of bread which had been blessed but not consecrated. The Methodist 'Love-feasts' were a deliberate attempt on Wesley's part to revive the apostolic practice.

(Gottingen, 1893); Zahn in Herzog's RE<sup>3</sup>, s.v. 'Agapen'; Brightman, Liturgies, Eastern and Western. W. LOCK.

LOYINGKINDNESS.—We owe this beautiful ord to Coverdale. His use of it is somewhat word to Coverdale. capricious, and in that respect he has been imitated by all subsequent versions until we come to the American Revised Version. The Heb. word so translated (upp hesed) is used of God's love to man, and less frequently of man's love to man. It is disputed whether it also denotes man's love to God. The passages relied on for the last meaning are Jer 2<sup>2</sup>, Hos 6<sup>4.6</sup>, together with Is 57<sup>1</sup> men of piety, and 2 Ch  $32^{32} 35^{36}$ , Neh 13<sup>11</sup> pious acts. The Oxf. Heb. Lex. favours the sense of piety to God in all these places. It is only when the word means God's love to man that it was translated by Coverdale (followed by AV) 'lovingkindness,' and that was well, for, as Driver says, that term is too strong to be used generally of men. But unfortunately it is only some of the passages with that meaning that have been so translated, chiefly in the Psalter, the other renderings in AV being 'mercy' (Gn 19<sup>19</sup> 24<sup>27</sup> 32<sup>10</sup>, Ex 15<sup>13</sup> 20<sup>6</sup> 34<sup>7</sup>, Nu 14<sup>16</sup>, Dt 5<sup>10</sup> 7<sup>8, 12</sup>, 2 S 7<sup>15</sup> 22<sup>31</sup>, 1 K 8<sup>23</sup>, 1 Ch 16<sup>34, 41</sup> 17<sup>13</sup>, 2 Ch 5<sup>13</sup> 6<sup>14, 42</sup> 7.<sup>5</sup> 6 20<sup>21</sup>, Exr 3<sup>11</sup> 7<sup>26</sup> 9<sup>6</sup>, Neh 1<sup>5</sup> 9<sup>32</sup> 13<sup>22</sup>, Ps 5<sup>7</sup> 6<sup>4</sup> 13<sup>5</sup> 18<sup>50</sup> 21<sup>7</sup> 23<sup>6</sup> 25<sup>7, 10</sup> 31<sup>7, 16</sup> 32<sup>10</sup> 33<sup>5, 18, 22</sup> 36<sup>5</sup> 44<sup>36</sup> 52<sup>8</sup> 57<sup>3, 10</sup> 59<sup>10, 16</sup> 1.<sup>7</sup> 61<sup>7</sup> 62<sup>12</sup> 66<sup>36</sup> 69<sup>13</sup> 7<sup>8</sup> 85<sup>7, 10</sup> 50 44 52 57 10 59 56 56 17 10 16 223 663 6613 778 857 10 865 13 15 861 2 14 24 25 9014 948 983 1006 1011 1036 11 17 1061 7 45 1071 1084 1091 36 1151 1181 x 8 4 29 11941 64 134 1307 1361 2 8 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 1307 136<sup>1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 34, 25, 26 1388 143<sup>12</sup> 145<sup>8</sup> 147<sup>11</sup>, Pr 16<sup>6</sup>, Is 55<sup>3</sup>, Jer 33<sup>11</sup>, La 3<sup>22, 32</sup>, Dn 9<sup>4</sup>, Mic 7<sup>18, 29</sup>); 'goodness' (Ex 34<sup>6</sup>, Ps 33<sup>5</sup> 52<sup>1</sup> 107<sup>6, 15, 21, 31</sup> 144<sup>2</sup>); 'kindness' (Ps 31<sup>21</sup>, Jon 4<sup>2</sup>); 'merciful kindness' (Ps 117<sup>2</sup> 119<sup>76</sup>). The RV has made but few changes. It has preferred 'lovingkindness' to 'mercy' in 2 S 22<sup>51</sup>, Ps 5<sup>7</sup> 6<sup>4</sup> 18<sup>50</sup> 21<sup>7</sup> 25<sup>7, 10</sup> 31<sup>6</sup> 36<sup>5</sup> 44<sup>56</sup> 61<sup>7</sup> 143<sup>12</sup>, to 'goodness' in Ps 33<sup>3</sup>, to 'kindness' in Ps 31<sup>21</sup>, to 'merciful kindness' in Ps 119<sup>76</sup>, and once it goes the other way, changing 'lovingkindnesse' in Ps</sup> the other way, changing 'lovingkindnesses' in Ps 89<sup>49</sup> into 'mercies.' But the Amer. Revisers have chosen 'lovingkindness' for all the passages in which the meaning is God's love to man, and for these only. See their note on this word under 'Classes of Passages' in the Appendix to the English RV.

The best statement of the meanings of *hesed* in the OT will be found in the Oxf. Heb. Lexicon. the former being right feeling towards 5 as the root of right action, the latter 'right action as the flower of right feeling'); see also W. R. Smith, *Prophets*<sup>2</sup>, pp. 160 f., 408 f.; Driver on Dt 7<sup>9</sup>; Kirkpatrick, *Psalms*, i. 220; Girdlestone, *Synonyms* 

# LUBIM

of  $OT^2$ , p. 111 f.; and the art. HASIDÆANS. English word is purely biblical. The J. HASTINGS.

## LOW COUNTRY .--- See SHEPHELAH.

#### LOZON (Aojúr), 1 Es $5^{33}$ = Darkon, Ezr 26, Neh 758.

**LUBIM** ( $\alpha_{23}$ ), in Dn 11<sup>45</sup> Cr3<sup>5</sup>, Alforst LXX, Libyes Vulg.). — They are mentioned as auxiliaries and neighbours of the Egyptians: 2 Ch 12<sup>3</sup> as the chief auxiliaries of Shishak, 16<sup>8</sup> with the Ethiopian Zerah, Nah 3<sup>9</sup> as helpers of Thebes at the side of Put, Dn 11<sup>45</sup> together with the Ethiopians as neighbours of Egypt. Most probably the Le-habim of Gn 10<sup>13</sup>, 1 Ch 1<sup>11</sup> are the same nation (see LEHABIM); the identification with the LUDIM (which see), attempted by some, has many difficulties to contend against. The name

appears in Arabic as Lûbî  $e^{i}$  = the singular 'diccurring in the Talmud) 'Libyan' (on the Egyptian form, see below). The Greeks first used Libya of the whole country W. of Egypt which was reckoned as a part of Asia; consequently Libya was equivalent to Africa. Later, Libya was used only of the part between Egypt and the Roman province of Africa, consisting of Marmarica in the E. (Libya Inferior, modern Barka) in the W. (Libya Interior was S. of both). The Libyan Nomos (*i.e.* country) of Egypt extended from Marea to Apis (W.) and, of Egypt extended from Marea to Apis (W.) and, along the frontier of Egypt, to Memphis (S.), a strip of borderland always visited by Libyans with their flocks.

The **Libyans** appear on Egyptian monuments from the earliest period, but more frequently from about B.C. 1600. They are depicted (earliest example in Newberry, *Benihasan*, I. pl. 45, 47) as tall, well-built, of whiter complexion even than the Syrians and Europeans, with blue eyes, blond hair and beard. These pictures agree closely with the type of the modern Kabyles in Algeria, in the type of the modern Kabyles in Algeria, in whom many travellers have sought descendants of strayed Germans, e.g. Vandals (very errone-ously, as the Egyptian pictures show). Their hair, ornamented with ostrich feathers, was worn tied in a long pig-tail hanging over the ear, while it was cut half-length at the back part of the head : the beard was pointed. Blue tatoo-marks, vary-ing according to the tribe, ornamented the body. The dress consisted of a girdle and a long mantle. They were chiefly a pastoral people, wandering with their leather tents and their flocks of goats and sheep over their sandy country. Frequently they appeared at the W. frontier of Egypt as invaders, especially under the 19th and 20th dynasties, *i.e.* after 1350. Seti I., Ramses II. and III. record invasions warded off with great difficulty. Merenptah, the successor of Ramses II., defeated an army of Libyans allied with pirates from Asia Minor and Europe, after they had nearly reached Memphis, slaying almost 10,000 of them. They fought with arrows and long swords, the chiefs from chariots. Being very brave, they were employed as mercenaries by the Pharaohs, more and more frequently after B.C. 1100. Finally they became the privileged soldiers of Egypt ; and their leaders, as Egyptian generals, grew so influential that several dynasties of Egyptian princes, as well as the great Bubastide (22) and Saïtic (24, 26) dynasties, which include most of the Pharaohs mentioned by name in the Bible, were of Libyan descent. E.g. Shishak (more correctly Shoshak for Shoshank) is a name of Libyan etymology. In their own country the Libyans assumed a few

Digitized by Google

elements of Egyptian culture, e.g. the worship of the god Am(m)on (whose principal temple was in the oasis of Amon, now Siwah), circumcision, etc., but always remained at a low stage of civilization. Their strange and rude system of writing, still employed by the desert tribes S. of Algeria, and now called *Tifinaghen*, was borrowed from Southern Arabia, it would appear, about the Persian period. Also the introduction of the camel, and several customs, possibly also elements of their language, point to later connexions with this country—a strange fact, and not yet suffi-ciently understood. Their difficult language is, however, witnessed to by Egyptian monuments from about 1400, so that only a small part of the people can have consisted of immigrating Eastern-Under Greek (in Cyrene) and Carthaginian influence, and still more under Roman dominion, the Libyans were only superficially civilized in the cities; a large part of them, especially in the interior, always remained barbarous shepherds. They extended from Egypt to Timbuctoo and the Senegal river until the invasion of the Arabs; the subsequent adoption of Arab religion made a great subsequent adoption of Arab religion made a great part of them give up their language and nation-ality. Their language (the Tamasheg), which recently has been studied very zealously (in Eng-land especially by the late Prof. Newman), is at present much mixed with Arabic. Gram-matically, however, it shows the purest Hamitic type. It is not so closely related to ancient Egyptian as we should expect, and betrays more affinity with the Hamitic languages on the coast of the Red Sea. The national name of this great race (at present pronounced Imushagh, Imuhag, etc.) is of obscure etymology. The Egyptians called them *Themheu* (plural, perhaps the same word), later *Phaiat*, and the easternmost part *Thehnu* (or *Thehnyu*, plural) and distinguished various tribes. Of these the Mashauasha (Mágues of Herodotus?) and Lob (written Ra-bu, plur.  $Ra \cdot bu \cdot y$ ) were most prominent in the wars of Dyn. 19 and 20 (minor tribes Kahak, Qaiqasha, Shaïtep, etc.), and we can observe how the name Lob gradually became general, as we find it among the Greeks and all Semites. It is probable that in Gn 10 it already includes the whole of the white Africans W. of Egypt, although the Egyptians (and through these the Hebrews) hardly knew any tribes W. of Cyrene; the dominion of the conquering Pharaohs did not extend even so far. W. MAX MÜLLER.

#### LUCAS, Philem <sup>24</sup> (AV only) for LUKE (wh. see).

LUCIFER ( ; v; c; shining one, ' i.e. the morning star, as explained by the following words "; r; 'son of dawn,' Is 14<sup>12</sup>).—The word is applied by the writer of the prophecy to the king of Babylon, partly in reference to the astrology for which Chaldæa was famous in ancient times, partly to Chaldrea was famous in ancient times, party to the prevailing belief in the deification of heroes. The king of Babylon had complacently looked forward to the time when he would ascend into heaven and exalt his throne above the stars of God. But in reality his dead body would be treated with the utmost contempt, 'a carcase trodden under foot'; while his soul would descend into Sheel and there receive but an empty honour into Sheol, and there receive but an empty honour from the shades, astounded that the great and mighty king could become like one of themselves.

From a supposed reference to this passage in our from heaven' (Lk  $10^{18}$ ), in connexion with Rev  $9^{1-11}$ (the language of  $9^1$  being in part probably derived from this passage), Lucifer came in the Middle Ages to be a common appellation of Satan. The star of Rev  $9^{1-11}$  is a fallen angel who has given to

him the key of the abyss, from which he sets loose upon the earth horribly formed locusts with scorpions' tails, who have, however, power to hurt only such men as have not the seal of God on their foreheads. But this angel is not actually identifield with Satan by the writer of the Apocalypse. The imagery in Is was no doubt suggested by a meteor, and possibly it was so in Rev also.

# F. H. WOODS.

LUCIUS (Acúnios) is described in 1 Mac 15166. as the 'consul of the Romans' (Umaros 'Pupalur), who, in consequence of the embassy sent to Rome by the high priest Simon, wrote to Ptolemy VII. Euergetes, king of Egypt, to inform him that the Jews were under the protection of Rome. He sent copies of the same decree to other Eastern sovereigns, and to several small independent states. The title of this decree of the Senate is clearly imperfect, and it is not certain who is intended by this consul, whose prænomen is alone given. His date is approximately determined by the fact that Numenius and his fellow-ambassadors returned to Palestine in B.C. 139-138 (1 Mac 1510-16). Three

possible identifications may be mentioned. 1. Lucius Cæcilius Metellus Calvus was consul in B.C. 142. This, however, seems too early, though the historian places the despatch of the embassy to Rome before the decree of the Jews in favour of Simon, made on the 18th Elul, B.C. 141 (1 Mac 14<sup>24-28</sup>).

2. Josephus mentions a decree of the Senate, passed under similar circumstances, and couched in similar terms, which he assigns to the 9th year of Hyrcanus II. (Ant. XIV. viii. 5). Most moderns, however, except Mommsen, consider that Josephus is in error with regard to the date, and identify this senatus-consultum with that passed in the time of Simon. In Josephus the pretor Lucius Valerius is named as presiding in the Senate; it is possible that he is the 'consul Lucius' of 1 Mac  $15^{16}$ (cf. Schürer, HJP I. i. 266 ff.).

3. Most probably the reference is to L. Cal-purnius Piso, who was consul B.C. 139. His prenomen is often given as Cneius, but Lucius is the best authenticated reading in Valerius Maximus i. 3. 2 (see Westcott in Smith's DB 'Lucius'; Schürer, l.c.). H. A. WHITE.

**LUCIUS** ( $\Lambda o \forall \pi \cos \delta$ ). -1. Of Cyrene ( $\delta K u \rho \eta \pi a \cos \delta$ ). In Ac 13<sup>1</sup> we are told that certain prophets and teachers were at Antioch, and amongst them is mentioned Lucius of Cyrene. He comes third in the list, and is supposed to have been one of the prophets. Nothing further is known about him. The suggestion that he was the same as St. Luke ( $\Lambda ovk\hat{a}_s$ ) has nothing in its favour. Such evidence as there is points the other way. For the difference between the descriptions of scenes at Antioch and those at places which the author of Acts must have visited is striking, and makes it clear that the writer had no intimate knowledge of the place, and doubtful if he had ever been there. It is probable, however, that it was this mistaken identification which first caused the tradition that St. Luke was an Antiochene by birth, which appears in Eus. HE iii. 4, and in many subsequent writers, and which

is also without foundation. 2. In Ro 16<sup>21</sup> a certain Lucius is introduced as 2. If NO 10<sup>-5</sup> a certain Endous is information as sending greetings with Timothy and others. Whether he was the same person as Lucius of Cyrene we have no means of judging. A. C. HEADLAM.

LUCRE (from Lat. lucrum through Fr. lucre, gain) had not always the bad sense which belongs to it in AV and in modern use. Erasmus, On the Crede (1533), fol. 70, says 'God is very greatly e to be thanked, whose goodness hath tourned the malyce and wickednes of other men unto his LUD, LUDIM

servauntes, into the lucre and encreace of godlynesse.' In 1 S 8<sup>3</sup> yzz, which means gain obtained by violent or dishonest means, is rendered 'lucre,' 'And his sons walked not in his ways, but turned aside after lucre, and took bribes, and perverted judgment' (LXX  $\dot{\epsilon}\xi\epsilon\lambda\nu\alpha\nu$   $\dot{\sigma}\pi$   $\sigma\nu\tau\epsilon\lambda\epsilon$ (as, Vulg. declinarerunt post avariciam, Wyc. 'boweden aside after averyce,' Cov. 'enclyned unto covetousnes,' Gen. 'turned aside after lucre'). The word is not again used in OT, but occurs five times in NT, always qualified by the adj. 'filthy.' In 1 Ti 3<sup>3</sup>.<sup>8</sup>, Tit 1<sup>7</sup> the adj.  $alo\chi\rho\sigma\epsilon\rho\delta\sigma$ ; is translated 'for filthy lucre'; and in Tit 1<sup>11</sup> the phrase  $alo\chi\rho\sigma\sigma$  $\epsilon\rho\delta\sigma\sigmar$   $fa\rho\omegar$  is rendered 'for filthy lucre's sake.' All these expressions we owe to Tindale. Except in language coloured by biblical recollection the word is no longer used. Bacon (*Essays*, 'Of Superstition,' Gold. Treas. ed. p. 69) shows the ordinary use in his day: 'The Strategems of Prelates for their owne Ambition and Lucre.' Shaks. uses the word twice (*I Henry VI*. v. iv. 141, *Cymb.* IV. ii. 324), both in the same sense. J. HASTINGS.

The many difficulties that arise from these references are due to two causes-the difficulty of recognizing the people referred to, and doubts as to the integrity of the text. Since the time of Josephus (*Ant.* I. vi. 4) a prevailing opinion has been that the Semitic Lud denotes the Lydians of Asia Minor; and would then correspond with their mythical ancestor Lydus, mentioned by Herodotus, i. 7. Herodotus (l.c.) also describes their first king Agron as a descendant of Ninus and Belos, which may be taken to imply an Assyrian (or Babylonian?) origin. To support this opinion, the many affinities of Lydian worship with Syrian, and the marked similarity of their art to Assyrian types, have been pressed. Against the Semitic origin of the Lydians is the evidence of the remains of their language embodied in place names and preserved in native personal names. It is not too much to say that in the earliest times of which we have evidence Lydia was not Semitic, but peopled by a race that every-where preceded the Greeks and spread wide into Europe. Lydia admitted several successive overlying strata of population, Greeks and Persians, not to mention Kimmerians and Scythians. These were not Semitic. It is difficult to see in what sense the classical Lydia was ever Semitic. That Josephus meant that country seems certain, not only from his own words, but from the fact that Lydia was known by name to the Jews (1 Mac 8<sup>8</sup>). To the author of Gn  $10^{22}$  Lud may not, however, have meant Lydia at all, but some more southerly folk. The direction of the geographical distribution of the sons of Shem runs from S.E. to N.W., then apparently W. and no farther S. than Aram. Stress cannot be laid on this till we are sure which way Arphaxad lay from Asshur. But as the genius

# LUD, LUDIM

of Winckler has compelled us to admit the Syrian land of Musri in passages where Egypt had always been seen before (see *Expos. Times*, vii. p. 405 f.), and as even Cush may be the land *Kusu* in the same horse-producing Cilician direction, so it may be that cuneiform evidence will yet locate a Lud in some North Syrian land. To the early Greeks Lydia was unknown by that name, they called it *Maconia*; its later name does not appear till the 7th cent. B.C. What if the founder of the Lydian name were, after all, a Semitic Lydus bringing with him Assyrian culture? He need not have made Lydia Semitic, but he might have left a Semitic Lud behind him. When Gyges, king of Lydia (about B.C. 660), sent an embassy to Assurbanipal, king of Assyria, to seek alliance against the Kimmerians, it is stated that the Lydian tongue was not understood by the king's interpreters, and that only with difficulty was an interpreter found (G. Smith's *Assurbanipal*, p. 79). This seems decisive against Lydian being then a Semitic tongue. We are further told that the name *Lu-ud-di* had not been known before in Assyria (*KIB* ii. p. 172). Whether this means that no intercourse had ever taken place between the countries is open to question; perhaps it only means that the name was fresh. The mere absence of any Assyrian mention of a Semitic Lud may be pressed too far.

On the other hand, the theory of a widespread Semitic nation, Lud, including (according to Knobel) Amalek, the Amorites, the Philistines, the Egyptian Ludim, and the Lydians of Asia Minor, seems out of the question.

If it is difficult as yet to locate a Semitic Lud, the Egyptian Ludim are quite as difficult to locate. No satisfactory identification from native Egyptian sources has yet been given. The *Rutu* or *Retu*, suggested by some, appear not to be a nation at all; the word even is now read *Romet* (see Dillm. on Gn 10<sup>13</sup>). It has been suggested to read Lybians,<sup>\*</sup> which is simply cutting the knot. Movers would identify with the great Berber tribe of the Lewâta, inhabiting the shores of the Syrtes; but these people do not appear in history till the 6th cent. A.D. According to the direction of the Generaphical

According to the direction of the geographical distribution of Mizraim's offspring, perhaps we should find them W. of Phut, and so somewhere S. or even W. of the Syrtes. This can hardly be separated from the localization of Phut near Egypt.

When we turn to the prophetical passages, we find some marked characteristics. The Ludim are warriors and bowmen. Nowhere in antiquity do we find the Lydians famous as warriors or bowmen. This, however, is not of much weight against the fact that the Carians and Ionians were mercenaries of Egypt from the time of Psammetichus I. (B.C. 663-610). The biblical Ludim may cover these. Winckler has pointed out that in an inscription of the 37th year of Nebuchadnezzar, a fragmentary account of his wars with Amasis, king of Egypt, we have mention of the people *Put-Iaman*. As *Iaman* (Ionians) is the regular Assyrian term for Greeks, we are forced to conclude that Put, the biblical Phut, was, if not exactly Greek in race and language, at least indistinguishable from them for political purposes in Egypt. The prophets may have had better knowledge of the racial affinities of these Egyptian mercenaries, and kept the term *Phut* for one, *Ludim* for another.

The versions, whether influenced by Josephus and Herodotus or independently preserving a historical tradition, frequently render Ludim by Lydians. The various commentators on the books of the OT resort to all kinds of devices to bring the text into accord with the facts known to them.

\* For instance, by Stade (Javan, 51.), who proposes to read in Gn 10<sup>12</sup> and Jer 469 ליבָים (Libyans) for היארים.

Many of these difficulties will doubtless disappear with greater knowledge of the ancient inhabitants of Egypt and Syria. They cannot be discussed here. See also art. LYDIA.

LITERATURE.—Dillmann and Holzinger on Generie; Cheyne on IsaiaA; Kretschmer, Einleitung in die Geschichte der Griechischen Sprache, p. 284 f. (tor Lydian race, Buresch, Auz Lydien, must also be taken into account): Winckler, Altoriental-ische Forschungen, series i. p. 513; Frd. Delitzsch, Paradies, 257, 310; Schrader, KAT<sup>3</sup> 114 [COT ii. 98 fl.]; Movera, Phénizier, ii. 1, 377 fl.; Ebers, Mygyten u. die Bücher Mose'a, i. 98 fl. C. H. W. JOHNS.

(Action of ): LAX in its noted, in set is noted, if  $\Delta \Delta \omega \theta$ ).—A place which practically is only once mentioned in OT. It occurs, as 'the ascent of' or 'to Luhith,' in Is 15<sup>8</sup> and in the corresponding section of Jer (48 [LXX 31]<sup>8</sup>). The refugees from ruined Moab are there represented the sector of Jer between the sector. as fleeing to Zoar, by the ascent of L. and in the way of Horonaim, names which may be selected as local asylum sanctuaries where fugitives would be secure, or as merely different roads for escape out of the wasted country. The 'ascent' may then mean either the hill on which the sanctuary stood (cf. בְּצָלָה הַנְיחים = mount of olives, 2 S 15<sup>30</sup>), or the pass which led to safety (cf. בעלה על על שנה) scorpion ascent, Nu 34<sup>4</sup>). The derivation of the name must at present remain uncertain. Gesenius (*Thes.*) translates it

made of boards, i.e. probably having houses made of boards'; but this derivation ignores the fact that Luhith must be a more or less exact transliteration into Heb. of an originally Moabite word. In that connexion the variation between Is and

Jer (Kethibh) is noteworthy. Eusebius still knew a village which bore the name. The Onomasticon (s.v. Luith, Aou(0) states there is to-day a village between Areopolis (i.e. Rabbath-moab) and Zoar which is named Luitha.' See, further, RABBAH and ZOAR.

## A. C. WELCH.

LUKE, THE EVANGELIST.—The name Aouxâs does not seem to occur before the time of the NT (Zahn, Einl. ii. 336). As a Greek name, it is found without any variation in spelling, unless Aouxovâs (Eus. HE iv. 2) is to be regarded as such. It is, no doubt, a contracted form of Lucanus, a Latin name which occurs frequently in inscriptions Latin name which occurs requently in instructions (Lightfoot on Col 4<sup>14</sup>), and is found in one Vulgate MS at the head of St. Luke's Gospel (as well as in  $b f g^2 i$ ), the other MSS quoted by Wordsworth and White giving only a Latinized form of the Greek name, 'secundum Lucan or Lucam.' The identification of the name with Aoúrios or Aoúreios (Ac 131, Ro 16<sup>21</sup>) is not philologically impossible, but is un-

likely. As to the *person*, see LUCIUS and below. A person of this name is mentioned three times in the NT, viz. Col 4<sup>14</sup>, 2 Ti 4<sup>11</sup>, Philem<sup>24</sup>. From these passages we infer that he was with St. Paul at Rome when these Epistles were written, and was alone with him at the date of the latest. In the first passage he is spoken of as & larpos o ayaryris, and as he sends a greeting to the the link passage he is spoken of as of the spoken of the order  $\dot{\alpha}_{\gamma\alpha}\pi\gamma\tau\sigma_{\gamma}$ , and as he sends a greeting to the Colossians, he must have been known to that Church. He is, in this passage, distinguished from of brres is  $\epsilon \pi \epsilon_{\rho_{1}\tau\sigma_{\mu}}\eta_{\tau}$  (Col 4<sup>11</sup>), and so was a Gentile by birth. This makes the identification with Aoúrios of Ro 1621 (see Orig. ad. loc.) impossible,-for the latter was a kinsman of St. Paul. and disproves the view of Tiele and others that St. Luke was a Jew. Jerome (Quæst. in Gen.) refers to a tradition that he was a proselyte (and as such ignorant of Hebrew), but it is more probable that he became a Christian without becoming a Jew. and the Western reading of Ac  $11^{20}$  (D) would require that his conversion to Christianity took

place before St. Paul met him (but cf. Tert. c. Marc. iv. 2). In the other passage, Philem<sup>24</sup>, St. Luke sends greeting to Philemon, and is spoken of as one of St. Paul's  $\sigma u = \rho \gamma o t$ . We know then that he was with St. Paul in both his imprisonments at Rome, but, from our finding no mention of him in Ph, Lightfoot (*Phil.* p. 35) argues that he was not there continuously. If we may assume (see ACTS for the arguments to justify this assumption) that St. Luke was the writer of the Acts, and refers to himself in the 'we sections,' then we may note the connexion with Antioch in Syria,' implied by the Western reading of Ac  $11^{29}$ , mentioned by Eus. (*HE* iii. 4) and others, but perhaps based on a supposed identification with Lucius of Ac  $13^{12}$ (Wetstein, Bengel). More certain is the inference that he joined St. Paul at Troas (Ac 1610) about the that he joined St. Faul at 1 roas (Ac 15") about the year 50 A.D. (see CHRONOLOGY OF NT, vol. i. p. 422), and was with him until his arrival at Rome about A.D. 59, except during the period which elapsed between St. Paul's departure from Philippi on the Second Missionary Journey (17<sup>1</sup>), and his arrival again there on the Third (Ac 20<sup>5</sup>). If we may anticipate here the proofs (given in next art.) that St. Luke was the writer of the third Gospel, then, from the preface to that book, we may add that he did not belong to those who could claim to be of  $d\pi'$   $d\rho\chi\eta$ ;  $d\sigma'\tau\sigma\pi a$ . The refer-ences to St. Luke in NT may be completed by a mention of the tradition, first found in Orig. (Hom. i. in Luc.), that he is the 'brother whose praise is in the Churches' (2 Co  $8^{18}$ ), sent by St. Paul with Titus to carry the letter. He is also mentioned in the subscription to that Epistle as one of the bearers.

161

When we pass outside the NT we find a number of assertions made about him, some of which are contradicted by the statements already noticed in the NT. Thus the late tradition that he was one of the Seventy (Epiphanius), or the unnamed companion of Cleophas, mentioned in Lk  $24^{195}$  (The-ophyl.; Gr. Menol. etc.), are both untenable in face of Lk 1<sup>2</sup>. The tradition that he was a painter is also late, though not so late as it used to be thought.<sup>‡</sup> What its origin was we cannot say. It is first mentioned by Theodore the Reader, whose date may be assigned to the 6th century. Zahn suggests (*Einl.* ii. 337) that the tradition may be due to a migniturerretation placed on the may be due to a misinterpretation placed on the word radioropeir in Theodore's statement as to την είκόνα της θεοτόκου, ην ο απίστολος Λουκας καθι-στόρησεν. A much earlier authority-the Progratio Lucar, given in Wordsworth's Vulgate, p. 269, and ascribed by Harnack (Chronologie, p. 653) to the 3rd cent. at latest—gives us many additional facts about St. Luke : 'Luke, by nation a Syrian of Antiophe a dispile of the apprehence of desarrows' Antioch, a disciple of the apostles, and afterwards a follower of St. Paul, served his Master blamelessly till his confession. For having neither wife nor children he died in Bithynia at the age of seventy four, filled with the Holy Ghost.' To Eusebus (HE iii. 4) we are indebted for some facts, and he has been followed by Jerome (de Vir. and he has been howed by before (at V). Illustr. 7). Probably, though not certainly, Euse-bins' words— $\tau \delta \mu \epsilon \gamma \gamma \epsilon \rho s \omega \tau \tau \omega r a \pi' A \sigma \tau \alpha \chi \epsilon ta s-$ imply that St. Luke came himself from Antioch,§though some scholars regard this belief as resting on nothing more substantial than the identification of St. Luke with Aoúrios of Ac 131 mentioned above. His special sphere of work is said to have been

\* Not Antioch in Pisidia, as Rendall argues on the ground of the  $i_{\mu\nu\bar{e}\nu}$  in Ac 14<sup>23</sup>. † For the various forms of the tradition connecting him with the Epistle to the Hebrews, see HEBREWS in Vol. ii. p. 3858. ? Plummer, *Commentary on St. Luke*, pp. xxi, xxii. § Ramsay (*St. Paul the Trav.* 2007). 389 f.) regards St. Luke as a Macedonian, who 'belonged to a family that had a con-nexion with Antioch,' and thinks Eusebius' phrase was intended to preclude the belief that St. Luke himself belonged to Antioch

Achaia, but (Const. Apost. vii. 46) another tradition connects him with Alexandria, where he is said to have consecrated the second bishop. In Achaia or in Bithynia (Rom. Martyr., etc.) he died. As to the mode of his death there are two traditions, one of which (Menol. Basil.) says that the died a peaceful death, the other (Greg. Naz., ap. Migne, Pat. Gr. xxxv. 589) that he was martyred under Domitian. His bones are said to have been carried from Achaia to Constantinople, and buried there in the twentieth year of Constantius.

 Purpose and Arrangement of the Gospel.
 General Characteristics of the Gospel.

1. AUTHORSHIP AND CANONICITY.-(a) Authorship .- The proof that St. Luke was the writer of the Third Gospel depends partly on internal, partly on external, evidence.

The internal evidence consists in the connexion between the Gospel and the Acts which is seen in the style, and also in the common dedication of the two books to Theophilus, and the reference in  $Ac 1^1$  to a 'former treatise,' which was no doubt the Gospel. It is here assumed (see Acrs for the arguments to support this view) that St. Luke was the writer of the Acts, and on this assumption it is impossible not to accept the Lucan authorship of the third Gospel. The argument from style (see below) is quite conclusive. Again, there are many points of connexion between the Gospel and Acts other than those of style, as, for instance, the reference to the Holy Spirit as 'the promise of the Father' (Ac 1<sup>4</sup>; cf. Lk 21<sup>49</sup>), the idea of apostolic 'witness' (Lk 21<sup>46</sup>, Ac passim), the common explanation of Simon as  $\delta \gamma \lambda \omega \tau \eta \sigma$  in Lk  $\delta^{15}$  and Ac  $1^{13}$ , but not in the other lists.

The external evidence \* is to be found in the references which mention St. Luke by name as the writer of one of the four Gospels. It is well known that the earliest allusions to the Gospels do not give the names of the writers, but so soon as this mode of reference begins we find St. Luke's name connected with one of the Gospels. The earliest of these is in the Muratorian Fragment, which opens with the words tertio erangelii librum secundum Lucan Lucas . . . conscripsit. Irenæus re-peatedly refers to St. Luke by name, the strongest passage being perhaps Hær. 111. xiv. 3, where he mentions multa quæ inveniri possunt a solo Luca dicta esse, quibus et Marcion et Valentinus utuntur, and earlier in the same section a rejection of St. Luke is spoken of as tantamount to a rejection of 'the Gospel of which he claims to be a disciple.' In very many other passages Irenæus definitely quotes St. Luke  $(e.g. 31.3^{22} \text{ etc.})$ , and nowhere is his authorship called in question. Another passage which gives unquestionable support to St. Luke's authorship is to be found in Tert. c. Marc. iv. 2—cf. ib. iv. 5, id evangelium quad Lucæ refertur penes nos. So Clem. Alex. (Strom. i. 21) quotes the Gospel often as by St. Luke.

It is unnecessary to multiply the evidence of

\* The title sarà Aousâv cannot be taken to prove much, though the forms cata Lucam, etc., in MSS of the old Latin, in Cypria, and elsowhere, show that the Greek MSS on which they were based had the titles in 2nd or 3rd cent. (Zahn, Einl. ii, 178).

# LUKE, GOSPEL OF

later authorities, for the passages quoted show that writers of a comparatively early date and coming from all parts of the Christian Church unhesitatingly ascribe the authorship of one of the Gospels to St. Luke. 'It is manifest that in all parts of the Christian world the third Gospel . . . was universally believed to be the work of St. Luke. No one speaks doubtfully on this point' (Plummer, St. Luke, p. 16). (b) Canonicity.—Though the references which

connect Luke by name with the Gospel are, from the nature of the case, comparatively late, those which prove its use as an authoritative writing carry us back very much further. We find, it is true, no certain trace of its use in the Apostolic Fathers. 'We must be content to leave it doub'ful whether Clement of Rome knew our Gospel according to Luke, and the same must be said of Polycarp and of Ignatius' (Plummer, l.c. p. xxv); but when we come on to Justin Martyr and to Tatian, the evidence of a use of this Gospel is abundant and unquestionable. Justin refers to a number of details which are found only in this Gospel: thus he mentions particulars given only in Lk 1. 2, such as the message of Gabriel (1<sup>36</sup>) and the journey to Bethlehem in consequence of the enrolment; he also alludes to other incidents from later chapters, such as our Lord's being sent to Herod (23<sup>i</sup>), or the last word from the Cross (2346), or the explanation of the Scriptures to the disciples on the way to Emmaus (24<sup>45</sup>). The use of St. Luke's Gospel by Tatian, who was a scholar of Justin, is equally clear from the *Diatessaron*, the second section of which (as given by Hemphill) contains Lk 15-80.

These writers sufficiently prove the use of the Gospel within the Church, but perhaps more striking testimony is to be found in the fact of its use by those outside the Church. Thus it formed the basis of the narrative which Marcion drew up (see below), it was used by the Valentinians in their system of chronology (Lightfoot, Biblical Exsays, p. 67), and was the subject of a commentary by Heracleon (Clem. Alex. Strom. iv. 9).

It was then, from the first, fully recognized and used in the Church, and is omitted in no lists of the canonical books.

Its position in the New Testament Canon among the Gospels varies. It must be remembered that the order in which the books succeed each other would not tend to be fixed until the Codex began to take the place of the Roll, that is, in the beginvi. 25) mentions as traditional that order with which we are familiar, Matthew, Mark, Luke, John, and this order is found in most of our authorities, beginning with the Muratori Canon. After this the order most frequently found is the Mark. The object of this—which is met with in D, many MSS of the Old Latin, the Gothic version, and elsewhere—was, no doubt, to bring for the two encodes and black the formed together the two apostles and place them first, and sterwards the 'apostolic men.' The Curetonian Syriac puts St. Luke's Gospel last, k and X (a Munich MS of the 9th cent.) have the order John, Luke, Mark, Matthew, while in two cursives the order is John, Luke, Matthew. The order in which the Gospels come in the MSS may have been affected, moreover, by their supposed chronological order, or by the symbols assigned to them. We may perhaps notice here Blass's view (*Philol.* of the Gosp. p. 77) that there is evidence in the spelling adopted by D of 'a time when there was a closer connexion between Luke's first and second parts than between Luke's Gospel and the other Gospels.'

2. DATE AND PLACE OF WRITING .- (a) Date .-Various dates have been assigned to the Gospel, \*\* Copyright, 1900. by Charles Scribner's Sone.

#### LUKE, GOSPEL OF

ranging from A.D. 56-60 (Blass, Philol. of Gospels, pp. 53, 54) to some date after A.D. 130. The main argument in favour of the latest date, which was that accepted by Baur, Zeller, and others, was the supposed dependence of the Gospel on that of Marcion; but this argument has been proved to be valueless by the almost universal agreement of critics that Marcion is really dependent on St. Luke. A comparatively late date for the Gospel has also been urged on the ground of a similar dependence on Josephus. This, if proved, would make the date about A.D. 100; but here, again, the hypothesis must be regarded as unproven. Nor can any definite and certain conclusion be reached by comparing St. Luke's Gospel with those of St. Matthew and St. Mark, for the dates of These two books are uncertain. It is true we have a tradition which Clement of Alexandria received from of  $drexafer \pi perforepoin (Eus. HE vi.$ 14) that the Gospels of St. Matthew and St. Luke -ra repléxorra ras reveadorlas-were the first written. The statement of Irenseus (iii. 1. 1) need not be taken as giving the chronological order of the Gospels (as Zahn, Einl. ii. 181), for the  $\xi \pi e \epsilon r a$ , on which Zahn lays stress to prove this, only implies that St. John's Gospel was written later than the other three, and though dates are by him assigned to St. Matthew and St. Mark, none is given for St. Luke. External evidence of any value as to the relative dates of the three Synoptic Gospels is therefore not forthcoming; nor does a comparison of them show very clear results, as will be seen below.

The first definite piece of evidence to be considered is that afforded by Ac 1<sup>1</sup>, where reference is made to a  $\pi\rho\omega\sigma\sigma\sigma$  Mayor, which, on the assumption that the Acts and the Gospel were both St. Luke's writings, is the Gospel, the date of which we are discussing. The Gospel is therefore prior to the Acts, but the date of the latter book cannot be regarded as fixed; and the question is further complicated, if we attach any weight to Blass's view that there were two separate editions of the Gospel and the Acts. In any case the date of the Gospel must depend on that of the Acts, and from a careful comparison of the style of these two books Sir John Hawkins (*Horæ Synopticæ*, pp. 143-146) draws the conclusion that 'a considerable time must have elapsed between the writing of the two books,' and that there is 'some internal evidence in favour of placing the Gospel at a considerably earlier date than Acts.'

Another class of arguments is concerned with data afforded by the Gospel itself. (1) Ramsay (St. Paul the Traceller, p. 387) argues that St. Luke's dating of Tiberius' reign in 3<sup>1</sup> requires us to reckon it from the time when he was associated by Augustus in the empire. Such a method of reckoning, he implies, is so unusual, that 'there can be hardly any other reason' for it 'than that the calculation was made under an emperor whose years were reckoned from his association as colleague.' This was the case with Titus, who began to reign in association with his father in A.D. 71, and therefore Ramsay dates the writing of St. Luke's Gospel about that time, the 'finishing touches' being given while Titus was reigning as sole emperor, A.D. 70-81. This argument, as the writer allows, 'taken by itself would be insufficient.'

(2) The preface to the Gospel  $(1^{14})$  states that there had been 'many' previous attempts to draw up a narrative of our Lord's life, and this requires us to assume the lapse of some time after our Lord's death. The length of the interval will depend on whether St. Luke's words are taken to imply written narratives. 'The process described in the preface implies a longer period than

would fall within the year A.D. 63: it is probable that the common basis of our three Synoptic Gospels was not committed to writing so early' (Sanday, *Inspiration*, p. 278).

(3) It is argued that we find in St. Luke's Gospel language so definite and precise in regard to the circumstances of the destruction of Jerusalem, as to suggest to us to date the writing of the Gospel after that event. The three chief passages ad-duced are 1943.44 2130 2124. The first of these passages occurs in the account of our Lord's triumphal entry, on His first coming in sight of the city of Jerusalem. The words are ήξουσιν ημέραι έπι σέ, και παρεμβαλοῦσιν οι έχθροι σου χάρακά σοι και περικυκλώσουσιν σε, και συνέξουσιν σε πάντοθεν και έδαφιοῦσίν σε και τὰ τέκνα σου έν σοι. άνθ' ῶν οὐκ έγνως τόν καιρόν της έπισκοπής σου. Here the concluding words imply that the whole passage is a comment on the verse which precedes, and which contains a statement of our Lord's grief over Jerusalem for her failure to forecast the conse-quences of her conduct. The whole incident is recorded by St. Luke only, which is a sufficient explanation as to why the words in question should not be found in Mt or Mk, and they form an integral part of the incident. Nor is there an integral part of the incident. Nor is there anything suspiciously definite in the words, for if our Lord could foretell (Mt 24<sup>2</sup>, Mk 13<sup>2</sup>, Lk 21<sup>6</sup>) such a destruction of Jerusalem that 'not one stone should be left on another,' there is nothing so precise in the words quoted above-which refer to the process by which that destruction was to be effected—as to require that St. Luke has inserted these words-and not only these words, but the whole incident of which they form a part-after the event. In the next passage, 21<sup>20</sup>, the reference made by St. Matthew and St. Mark to Dn 927 has been dropped, and, instead of the words δταν ουν ίδητε το βδέλυγμα της έρημώσεως, κ.τ.λ., we find the phrase δταν ίδητε κυκλουμέτην ύπο στρατο-πέδων Ιερουσαλήμ, κ.τ.λ. The fact of our having here a substitution for words found in St. Matthew and St. Mark, and not, as in the last case, an addition, is at first sight more suspicious. But one very reasonable view is that St. Luke is giving here an explanation of the words quoted from Daniel, the exact meaning of which is uncertain even now, while they would probably have been quite unintelligible to St. Luke's Gentile readers. Some support is to be found for this view in St. Luke's use of the word ephymons at the end of the verse, which may be an allusion to the words  $\tau \delta$ βδέλυγμα της έρημώσεως. Another equally possible explanation of St. Luke's divergence from St. Matthew and St. Mark here is that he is drawing from a different source from that used by the other two Gospels, and this is borne out by numerous other passages in this chapter, where St. Luke's independence is clear. The suggestion, therefore, that the words were inserted after the destruction of Jerusalem is only one of three posby the words themselves, which, like those in 19<sup>43, 44</sup>, are not, after all, particularly definite. The last passage mentioned above, viz. 21<sup>24</sup>, is also peculiar to St. Luke-regourras στόματι μαχαίρης καί αίχμαλωτισθήσονται els τὰ ἔθνη πάντα, και Ἱερουσαλήμ ἔσται πατουμένη ὑπὸ ἐθνῶν, ἄχρι οῦ πληρωθώσιν καιροί ease. But these words only state the destruction of Jerusalem by the Gentiles, and the further thought of a terminus ad quem for the punishment of the Jews is found in Ro 1125, an Epistle earlier than the earliest date assigned to the Gospel.

Not one of the passages just examined seems to the writer to contain anything incompatible with the reference of the Gospel to an early date, and all the arguments appear to rest on a very precarious basis. Another passage  $(21^{S1.S2})$  has been

164

LUKE, GOSPEL OF .

thought to imply that, by leaving out the words  $i\pi i \,\,\theta i\rho_{\alpha is}$  found in the parallel passages of St. Matthew and St. Mark,— $\delta rav i\delta\eta re raira \gamma_i\gamma_i\rho_{\mu}era,$   $\gamma_{ir}\delta\sigma\kappa ere \,\,\delta ri\,\,\ell\gamma\gamma s\,\,\delta\sigma rir\,\,\epsilon rl\,\,\theta i\rho_{\alpha is},$ —St. Luke has emphasized a distinction between the fall of Jerusalem and the end of the world which they have not, and is therefore later. The next verse, stating that 'this generation shall not pass away till all these things be fulfilled,' has, on the other hand, been used (e.g. by Weiss, Introduction to the NT, ii. S13) as a proof that because it is implied that the 'second coming of Christ was still expected by the first generation of Christians,' therefore the words would not have been allowed to stand in this form after about A.D. 80.

Nore weight may perhaps be attached to the evidence afforded by the theological terms used in this Gospel—as, for example, the expression  $\delta \kappa \delta \rho \mu os$  of our Lord (cf. Ev. Pet.)—some of which point to a date later than that of St. Matthew or St. Mark. Another proof of a similar kind is to be found in the points of contact which have been noticed between this Gospel and that of St. John (see below, p. 167).

These arguments, and that based on the lapse of time required by the circumstances presupposed in the preface, seem to preclude a very early date, and there is little or no evidence to require a late date. We may accept, perhaps, some date about the year 80, that is, the beginning rather than the end of the period ( $\Lambda$ .D. 78-93) within which it is placed by Harnack (*Chronologie*, p. 246 ff.).

(b) Place.—In regard to the place at which the Gospel was written, the data are too vague or too late to give a certain conclusion. We have seen above (p. 162) that St. Luke's sphere of preaching was associated with Greece, and so Jerome tells us that 'in Achaiæ Bæothiæque (var. lec. Bithyniæ) partibus volumen condidit' (Vulgate, ed. Wordsworth, i. p. 12), and within this district Godet selects Corinth. Another tradition connects St. Luke with Egypt, and accordingly a catalogue of NT books ascribed to Ebed Jesu (14th cent.) assigns the writing of the Gospel to Alexandria. The address to Theophilus, and the mention of St. Luke as St. Paul's companion at Rome, have led Keim, Holtzmann, and others to place it at Rome, but we have no evidence to prove this. Other scholars (as Michaelis, Thiersch, and Blass) have fixed on Cæsarea, others again (e.g. Hilgenfeld) have suggested Asia Minor. Many of these places and also others will be found mentioned in the subscriptions to the Gospel found in MSS of the Greek and of the versions (Tischendorf, NT, 1. 738). We cannot attempt, in the absence of data, to decide finally between the many various alternative suggestions just mentioned, and may agree with Weiss (Introduction, Eng. tr. ii. 314) that 'all conjectures as to the place of composition are quite visionary, and have no value whatever.'

3. TRANSMISSION OF THE TEXT.—It is necessary to devote a separate section to this point, because of the questions suggested by the 'Western' readings in St. Luke's Gospel. Blass began by basing on the 'Western' readings in the Acts (which see) a theory that they preserve for us another and earlier edition than that with which we are familiar, and in his Acta Apostolorum secundum formam quæ videtur Romanam (Leipzig, 1896) he attempted a reproduction of this. Since then he has extended his theory to the Gospel (Leipzig, 1897), but with this important difference, that while the Western text of the Acts gives us the earlier of the two editions, the same text of the Gospel is in his opinion the later and revised edition. Some explanation is necessary of the difference between the characteristics of the

Western text in the two books, for in the Acts these consist largely of additions to the ordinary text, while in the Gospel they are, for the most part, omissions, and Blaas's view (*Philol. of the Gospels*, pp. 103, 104) is that the second edition would in each case be shorter, for the author would be naturally 'disposed to omit many unessential circumstances and details.' This is one of several 'a priori arguments,' as Blass himself calls them (*l.c.* p. 102), for a theory, which is an extension of a view tenable and accepted by many in regard to the Acts, but in the Gospel not established by the facts.

As far as the Acts is concerned, the theory of two editions goes back to J. le Clerc (Clericus), i.e. to the middle of the 17th cent. Lightfoot (Fresh Revision, p. 29) seems not unfavourable to the view that in the Gospel also 'the evangelist may have issued two separate editions.' It is only within the last few years, however, that this theory has seriously challenged the attention of textual critics. What, then, are the facts as far as the Gospel is concerned? The most striking are the series of omissions which we meet with chiefly in the later, but also more sparsely in the earlier, chapters. In these cases the omissions are made by the same authorities for the most part, sometimes with the support of a MS or version not necessarily 'Western.' As illustrations of such omissions may be quoted the leaving out in 2436 of the words sal heyes abrois Elphyn upir, in 2440 of the words kal τούτο elaw v έδειξεν αύτοιs τάs xeipas kal rods modas, and in 2461 of the words kal description of the next verse is omitted, or  $12^{19}$ where (in the parable of the Rich Fool) the words έχεις πολλά άγαθά κείμενα είς έτη πολλά, άναπαύου,  $\phi \dot{d} \gamma \epsilon, \pi i \epsilon, \epsilon \dot{\epsilon} \phi \phi a i rov, are reduced to <math>\dot{\epsilon} \chi \epsilon_{15} \pi \sigma \lambda \lambda d d \gamma a \theta d,$ dramaúov. These passages sufficiently illustrate the nature of the omissions. We find also some additions, but they are very few. As an instance may be quoted the long addition in regard to the man working on the Sabbath day, which we find in D after 64. Of course Blass has to give some explanation as to why in a second draft these omissions or additions were made. Thus, of the insertion at 6<sup>t</sup>, he says (*l.c.* p. 154) that it was probably omitted by St. Luke as likely to give offence to Christian or other Jews who would form a 'considerable part' of the Oriental conare at the second of the account of the Account of the Ascension in  $24^{51}$  the explanation given is that it was (l.c. p. 140) 'to fit the close of the Gospel (Western text) to the beginning of the Acts (Western text),' or that it 'might be not without some degree of probability ascribed to some reader of Luke who was offended by the repetition in Ac 1 ' (l.c. p. 142). These will illustrate the explanations by which the position is maintained, and in regard to the last it will be noticed that the theory of revision by St. Luke is so far modified that it is referred to 'some reader.'

What are we to say in regard to this theory as an explanation of the facts? We may admit that this Gospel, as having been addressed firstly to an individual, and afterwards to a wider circle, may have had a different textual history from the others, and we may make all allowance for the greater difficulty of establishing the theory in the Gospel than in the Acts, because the Western text in the Gospel differs almost entirely by its omissions, and because the early history of the Synoptic text must be obscure. Further, we may allow that the term 'Western non-interpolations' given to these omitted passages by Westcott and Hort is not applicable, inasmuch as there is, as

a rule, little besides the suggestion of 'assimilation' to show that they are interpolations. And yet we must demand further proof before we can accept Blass's view, for the arguments on which it rests are inconclusive.

In the first place, the distribution of the phenomena is at once too wide and too narrow. Similar omissions are found in the same group of authorities, or in some members of the group, in the other Gospels, and elsewhere in the NT. We might quote, for example, the omission of all reference to the Pharisees in Mk 10<sup>2</sup> and other similar instances, but two illustrations from Mt 19<sup>9</sup> and 1929 will serve to show not only that the omissions are widely distributed, but also that they are capable of being explained by a divergence in the oral tradition. In the first passage, a number of Western authorities (here with X and other Greek MSS) omit the words sal & dwolelupérny  $\gamma_{a\mu\eta\sigma as}$   $\mu_{oi\chi}\hat{a}\tau_{ai}$ , and in the second many of the same authorities (here with B) omit the words  $\eta$   $\gamma_{\mu\nu\alpha}\hat{a}\kappa_{a}$ . The distribution of the instances of omission in Western texts is therefore too wide. It is also too narrow, for the most important of the cases come in the last few chapters of the Gospel, and are sufficiently explained by 'the matural variations between the reports given by two different hearers of a story orally delivered in the presence of both' (Salmon, *Text. Criticism*, p. 148).

Again, it may reasonably be objected that 'if there had been a definite Western written text we should have been able to reproduce it in a way we cannot now' (Salmon, l.c. p. 148). There is certainly very early support for many of the readings, so that we may well believe that many of them 'express the form in which the Gospel was read in the Church of Rome in apostolic or sub-apostolic times,' yet still the distribution of the support cannot be regarded as indicating two editions, one Eastern and one Western, and to meet this difficulty Blass has to fall back upon the position that in none of our authorities have we 'the Western text while still in its pure form.' Blass, indeed, states that 'besides conflations with the other Gospels, which began at a very early date, conflations [of the Western] with the Oriental text must have been more inevitable than in the case of the Acts.' As instances of such 'conflation,' by which we suppose he means corruption of the Western text by the Eastern, he would, presumably, regard cases where the authorities on which he relies are divided, as, for example, the insertion of  $\delta \epsilon v \tau \epsilon \rho \sigma r \rho \omega \tau \psi$  ( $\beta^1$ ), or the word from the Cross (23<sup>84</sup>). We cannot deny the very early and varied character of the attestation which is found for the Western readings, when we meet with them in Justin, Tatian, and Marcion. We can say that the evidence of these authorities does not allow us to rest on their evidence an edition such as that of Blass.

Again, it is urged by Corssen, whose view is endorsed by Bousset (*Theol. Rundschau*, July 1898), that the language of the Western text, as Blass has constructed it, often shows an absence of marked characteristics of St. Luke's style, and therefore is not the work of St. Luke himself, but a revision by another hand.'

Finally, it has to be urged, if not against the theory as a whole, at any rate against Blass's presentation of it, that the selection of one reading in preference to another is often very arbitrary and that readings are adopted which have only very slight support, or may be shown to be inferior to the ordinary text, and less original. Some of these are collected by Zehn (*Einl.* ii. 354 ff.).

The theory, then, of two editions has been rejected by most scholars, even by those who have

accepted it in regard to the Acts, and we must say that it is at any rate unproved. The phenomena on which it rests point at most (Harnack, Chronologie, p. 700 n.) to a correction of St. Luke's Gospel, not to two editions of it; they are not peculiar to the third Gospel, and, though they often preserve an original reading, they are far from representing always the best text, and they are sufficiently explained by a consideration of the circumstances under which the Gospels were first circulated and took written shape.

4. THE SOURCES OF THE GOSPEL.—The deter-mination of the sources used by St. Luke must depend partly upon external, partly upon internal, evidence. Under the first head fall the assertions of the preface, and the statements made by early writers as to St. Luke's connexion with St. Paul. Both these are dealt with below. Under internal evidence will be included arguments based on which involve the question of St. Luke's relation to the other Gospels, and bring us face to face with the Synoptic problem. This problem, which is one of 'extraordinary difficulty and complexity' (Sanday, Inspiration, p. 281), need be discussed here only so far as it concerns St. Luke.

The first point to consider is the amount of matter which is peculiar to St. Luke, and this may be estimated in different ways.\*

According to one calculation, if the contents of the Synoptic Gospels are divided into 172 sections, of these 172 Luke has 127, Matthew 114, and Mark 84: and of these 172 Luke has 48 which are peculiar to himself, Matthew has 22, and Mark has 5. According to another calculation [that of Reuss], if the total be divided into 124 sections, of these Luke has 93, Matthew 78, and Mark 67, and of these 124 Luke has 38 peculiar to himself, Matthew 17, and Mark 2' (Plummer, St. Luke, p. xxxv).-Or we may consider the kind, as well as the quantity, of peculiar matter, and then we find that of the recorded miracles 6 are peculiar to St. Luke, 3 to St. Matthew, and 2 to St. Mark; while of the parables, 18 are peculiar to St. Luke, 10 to St. Matthew, and 1 to St. Mark. Or we may take the more mechanical method of reckoning by the number of verses, and we find that St. Matthew (RV) has 1068 verses, of which 337 are not found in St. Mark or St. Luke ; St. Mark (RV) has 674, of which 50 are peculiar to this Gospel; while St. Luke (RV) has 1149, of which 612 are only found there. These figures show roughly the state of the case, and we may say that the peculiar matter in St. Luke is rather more than half of the whole Gospel. The following is a list of the more important longer sections found only in St. Luke:-

1-2.
Sta-14 the questions asked of John the Baptist by 'the multi-tudes,' publicans,' and soldiers.
Sta-26 the genealogy of our Lord.
4<sup>16-30</sup> at Nazaresh in the synagogue [this may be the narrative of Mt 18<sup>24,0</sup> and Mk 6<sup>10</sup>, but is quite independent].
5<sup>1-11</sup> the miraculous draught of itshes, and call of the disci-ulas.

plos. 634 35 the denunciations on the rich, and on those well spoken

of. 711-11 the raising of the widow's son at Nain. 728-20 the anointing by the sinner, and parable of the Two

Debtors. 81-3 the attendant women, the wife of Chuza 931-36 the rejection at the Samaritan village. 931-36 the rejection at the Samaritan village. 931-36 the seventy [our Lord's address has much in common with the address to the Twelve, Mt 10<sup>12</sup>, Mk 6<sup>12</sup>.] 10<sup>17-30</sup> the return of the Seventy—Satan fallen from heaven. 10<sup>32-43</sup> parable of the Good Samaritan.

\* See, e.g., Westcott, Introduction to Study of Goepele<sup>5</sup> p. 191 ff.; Plummer, St. Luke, p. xxxv ff.; Rouse, Iltel. of Scr., Eng. tr. p. 176 ff.; Hawkins, Hora Synopticas (from which the calculation by verses is taken).

166

115-5 parable of the Importunate Friend. 1127. 8 the comment of the woman on our Lord's teaching. 1221-21 the avaricious brother, leading to the parable of the Kich Fool. 1247-80

- 1247-30. 181-37 the Gailleans slain by Pilate, the falling of the tower in Siloam, the parable of the Harren Fig-tree, healing of the woman with the spirit of infirmity. 18<sup>31-33</sup> the message to Herod Antipas. 14<sup>1-34</sup> healing of the man with the dropsy. 14<sup>35-34</sup> parable of the Supper [cf. Mt 22<sup>3</sup>]. 14<sup>54-35</sup> conditions of discipleship—the man building a tower— the king going to war.

the king going to war. 15<sup>8-33</sup> parables of Lost Piece of Silver, and Prodigal Son.

138-39 parables of Lost Piece of Silver, and Prodigal Son.
136-39 parables of Lost Piece of Silver, and our Lord's rebuke.
1614-31 parable of Unjust Steward.
1614-31 parable of Rich Man an 1 Lazarus.
177-19 the nature of service—the Healing of the Ten Lepers.
178-38.38 references to Lot.
181-19 the parable of the Pounds [but cf. Mt 25145, the parable of the Talents].
1924-41 the Lament over Jerusalem.
291-43 the Lament tover Jerusalem.
291-44 the Lament over Jerusalem.
291-45 the Lament over Jerusalem.

287-31 Jesus sent to Herou.
287-31 the daughters of Jerusalem.
288-3 the penitent thief.
284 the word from the Cross.
2473-32 the walk to Emmans; the appearance to the Eleven, and final instructions; the Ascension(?).

Besides these longer sections there are a number of shorter passages of varying length and importance, which are peculiar to St. Luke, but are embedded in material common to St. Luke and one or both of the other Synoptic narratives. These amount to about 113 verses out of the 612 mentioned above as peculiar to St. Luke, and will be found collected in Hawkins, Horæ Synopticæ, p. 158 ff. In his 'tentative and to a large extent speculative attempt' Sir John Hawkins classifies these variations as follows : --(1) Cases where Luke may have retained while Matthew omits the occamay have retained while Matthew omits the occa-sions of sayings, which they drew from a common source, e.g. 11<sup>1</sup> 13<sup>22</sup>.<sup>23</sup> etc.; (2) cases where Luke may have retained while Matthew, after his manner, shortens, e.g.  $7^{4-6}$ ; (3) later insertions from other sources, e.g.  $22^{43-44}$ ; (4) independent traditions, or variants of traditions, preserved also elsewhere, e.g.  $12^{33-38}$  [cf. Mt  $25^6$ , Mk  $13^{34}$ ]; (5) additions which may be editorial, bringing out the preverfulness of Lecus e.g. (40%) or the right use of prayerfulness of Jesus, e.g. 612b, or the right use of wealth, e.g.  $6^{33.34}$ , or heightening the effect of the narrative, e.g.  $3^{13}$  9<sup>13</sup>; (6) Pauline expressions, e.g.  $21^{34}$ ; (7) other various additions, probably editorial.

Finally, we have to mention cases where the general agreement of St. Luke with the other Synoptic narratives is clear, but where we find changes of expression or of order made by him in going over common ground. Such will be in part editorial and due to preference for a particular word or to the need of explanation, in part due no doubt to oral transmission. Special mention must also be made of the evidence afforded by 'doublets,' i.e. passages of similar content occurring in two different places in the same Gospel, and possibly introduced from different 'sources.' These are carefully examined in Hawkins (Hor. Sym. p. 64 ff.), who sums up the evidence as pointing in three directions-(1) to a use of two sources, probably Marcan and Logian; (2) to a freedom of the editors in using their own phraseology; (3) to divergencies between Matthew and Luke which may perhaps imply the use of a special source by the latter.

Such are the data we have to discuss, and in dealing with them in relation to St. Luke's sources two general considerations are clear-(1) that St. Luke must have had some source or sources not used by St. Matthew and St. Mark, and that, as the above references show, not merely for one part of our Lord's ministry, but affecting the whole of it.

both narrative and teaching: (2) that 'both St. Matthew and St. Luke, and especially St. Luke, have so "worked over" the sources they employed that they frequently represent to us the substance rather than the words of the original documents' (Hawkins, *l.c.* p. 92). This fact obviously increases the difficulty of tracing the sources. It will only be possible here to state, in a very

summary way, the relation of St. Luke (a) to St. Mark, (b) to St. Matthew, (c) to St. John, and then (d) to consider this special source or sources.

(a) St. Mark and St. Luke are mentioned as at Rome together (Col  $4^{10-14}$ , Philem<sup>21</sup>, cf. 2 Ti  $4^{11}$ ), and, moreover, it is generally agreed that St. Mark's Gospel represents, in the main, the earliest form of the Gospel narrative, and may, therefore, have existed in substance before St. Luke. Weiss, in his Markus-Erangelium, established the fact of a relationship between them; and now 'it is unnecessary to prove anew that Luke used Mark' (Harnack, Chronologie, p. 652), for 'the use of Mark as one of Luke's sources is a generally-established fact of Gospel criticism' (Feine, Eine vorcanonische Ueberlieferung, etc. p. 4). At the same time, the following points require explanation. Things are omitted by St. Matthew and St. Luke which are recorded by St. Mark, e.g. Mk 4<sup>3667</sup> 8<sup>2267</sup>, or omitted by St. Luke which are recorded by St. Matthew and St. Mark, e.g. 645, and we ask, why, if St. Mark was used by St. Luke, were these omitted? Again, we find instances in which St. Matthew and St. Luke agree against St. Mark, and frequent cases where St. Mark and St. Luke are independent in regard to details. A sufficient explanation of these facts would be that St. Luke used not St. Mark as we have it, but the source which underlies St. Mark, an Ur-Markus, which, by additions and alterations made after St. Luke used it, became our canonical St. Mark. Weiss, however, maintains strongly that it was our St. Mark which St. Luke used, and Sir J. Hawkins explains away the difficulties which have just been urged (1) by showing that many of the omissions from St. Mark, which St. Mathew and St. Luke make (generally independently), may well have been made by them with St. Mark before them, and that 'the results are largely in favour of the view that the Petrine source used by the two later Synoptists was not an Ur-Markus, but St. Mark's Gospel almost as we have it now' (l.c. p. 122); (2) by suggesting that the agreements of St. Matthew and St. Luke against St. Mark, so far as they imply a common source, were first made in one of these two later Gospels, and then were In one of these two next correct, and consciously, to carried across, intentionally or unconsciously, to the other, either by scribes or more probably in the course of oral transmission (l.c. p. 176).

(b) St. Matthew and St. Luke have a great deal in common which is not found in St. Mark, and of this very much is occupied with our Lord's dis-courses. This general resemblance in material not found in St. Mark may be explained on the hypothesis of Simons, Holtzmann, Wendt, and others, that St. Luke used the Gospel of St. Matthew, or by supposing that both used a common written source, such as the Aóyıa might have been, or a common oral tradition. It is difficult to believe that St. Luke had St. Matthew's Gospel before him, when we consider their great independence, amounting sometimes to divergence, are regard to chs. 1 and 2, and the genealogy, or in the same to details of fact as in 18<sup>45</sup> 24<sup>4</sup>. We may ence, amounting sometimes to divergence, as in accept Weiss' statement (Introduction to the NT, ii. 294) that 'Luke's acquaintance with and use of the apostolic source of the first Gospel is just as certain as his want of acquaintance with the Gospel itself.' Zahn, indeed, maintains (*Einl.* ii. It is clear also that this source preserved 402ff.) not only that St. Luke did not use St.

### LUKE, GOSPEL OF

Matthew, but also that their resemblances in parts where they are not both dependent on St. Mark are sufficiently explained by the use of a common oral tradition. But such close verbal agreement as we find in Mt  $6^{24} = Lk \ 16^{18}$  and Mt  $6^{27} = Lk \ 12^{26}$ seems to require the use of a common written Greek source (Feine, l.c. pp. 10, 11) and not (as Resch) different Greek translations of an Aramaic original. It is probable that they had collections of our Lord's sayings in several forms and in different connexions. The use of some such sources will explain on the one hand how it is that the peculiarities of St. Luke's style are most rare in reports of discourses common to him and St. Matthew, showing the fidelity with which he has reproduced them, while on the other hand it will explain the differences both in expression and context which exist in the two Gospels. We see how it may have been possible for St. Matthew to bring together all the sayings, as in the Sermon on the Mount, which St. Luke has scattered over many parts of his Gospel. We get also on this hypothesis an explanation of the 'doublets,' and see why 'the original form is preserved sometimes in the first, sometimes in the third Gospel' (Weiss), while the original context also seems to be kept sometimes in St. Luke, sometimes in St. Matthew

(Weiss, *l.c.* p. 292 ff.). (c) St. Luke and St. John.—We have already noticed (above, p. 164) that St. Luke has more points in common with St. John than either St. Matthew or St. Mark has, but they are not enough to establish any literary relation. Among such points of contact may be noted the allusions to a ministry in Judæa (4<sup>44</sup> 13<sup>84</sup>); the Galikæan journey before the death of John the Baptist (wh. see), implied by the term  $b\pi e \sigma r p e \psi e r$  (4<sup>14</sup>), 22<sup>69</sup> (= Jn 18<sup>19</sup>  $\tau \delta \delta \epsilon_{\ell} \delta \sigma$ ); the visit of Peter to the sepulchre, 24<sup>12</sup> (= Jn 20<sup>8</sup>). Others may be seen by a reference to the ninth of the groups marked in the Ammonian sections, or in Weiss (*l.c.* p. 297 n.) or in Holtzmann (Joh. Evang. p. 6 ff.). The result of a comparison does not 'establish a literary relation,' but indicates some common points in the oral tradition used by both.

(d) St. Luke's special source or sources. -In face of the large amount (see above, p. 165) peculiar to St. Luke, we are justified in assuming that St. Luke had access to some source or sources not used by St. Matthew or St. Mark. Our object here must be to try and determine the extent and nature of these sources. This we might expect to do, partly from the style, partly from the subject-matter. (1) In regard to the first we do not get much help, because St. Luke has so worked over the sources that they are permeated by his own style; nor do the Hebraisms really help us much, if at all, because on one theory (see below, p. 169) they are artificially distributed by St. Luke to suit his subject-matter, while according to another, and, as it seems to the present writer, much truer, view they are not due to the sources but are characteristic of St. Luke's style, and therefore appear in the connecting links between the narratives. It is possible that in such summaries of history or teaching as we get in 414.15 444 etc., we may find, as in Ac, the marks of the beginning or end of documents used. Other expressions, like  $el \pi e r$   $\delta e$  (4<sup>21</sup> 6<sup>23</sup> etc.) or  $er e keirg \tau \hat{y} h \mu e \rho a$ , may point in the same direction, but they occur too frequently to be safely used in this way.

(2) The subject-matter has to be considered under the two main divisions of *narrative* and *dis*course. The additions in the narrative begin with the first two chapters, and are scattered over the whole Gospel. Some of these are sufficiently explained by oral tradition, such as the additional references which St. Luke makes to Herod  $(e.g. 3)^2$ 

9° 13<sup>31</sup> 23<sup>7</sup>), which it is not fanciful to connect with Chuza. To the same sort of tradition may be due the additions which we find in the narratives of the Passion and Resurrection (e.g.  $22^{347.51} 23^{-12}$ etc.), or the little differences of detail either by way of addition or correction which we find in the material which St. Luke has in common with the other Gospels (see p. 165). This would explain also points of difference in the order in which the material is arranged (e.g.  $22^{33.34}$ ). We have also, finally, to take into account cases where a narrative is preserved in St. Luke, but in a form quite independent of the other Gospels, e.g. those of  $4^{167.}$  $5^{127.780}$ .

In regard to the discourses we find very puzzling phenomena. A large amount of them is common to St. Matthew and St. Luke and not found in St. Mark. These are no doubt due to some such source as the  $\Lambda \delta \gamma \iota a$ , and Sir J. Hawkins (*l.c.* pp. 88, 89) in a 'tentative' list ascribes some 72 passages to this source, apart from the passages derived through St. Mark. These amount to some 185 verses, or about one-sixth of the whole Gospel. The special point which requires notice is that more than two-thirds of this material appears in quite a different connexion in St. Matthew and St. Luke. There is nothing impossible in the supposition that some of this teaching was repeated by our Lord on more than one occasion, and so preserved in both places. Thus the teaching about anxiety occurs in the Sermon on the Mount (Mt  $6^{25}$ ) and also as a corollary to the parable of the Rich Fool (Lk  $12^{22}$ ). The warning against serving two masters occurs in the Sermon on the Mount (Mt  $6^{24}$ ) and also as an addition to the parable of the Unjust Steward (Lk 16<sup>18</sup>). As a rule, St. Matthew has collected together (e.g. ch. 10) what St. Luke has pre-served in connexion with separate incidents; but sometimes the reverse has happened, as in the passage beginning Lk 12<sup>22</sup>. The 'doublets' already referred to (see p. 166), which occur chiefly in the discourses, are another perplexing factor. These have been most fully dealt with by Sir J. Hawkins (l.c. pp. 64-92), and his conclusions have been already given.

These differences in regard to the discourses may or may not have been due to the use of a special source by St. Luke. There can be no doubt as to some special source for a large part of the material found in the long section from  $9^{61}$  onwards, most of which is recorded with only the vaguest references to time and place, and some of which seems obviously out of place, *e.g.* the lament over Jerusalem 13<sup>84</sup>, while in other places there are marks of a grouping which regards the subject dealt with, such as prayer or the responsibility of riches.

The most elaborate attempt to reproduce the special source used by St. Luke is that of Feine. He regards this special source as an enlarged edition of the collection of discourses common to St. Luke with St. Matthew. To this had been added (1) a number of discourses and parables, (2) a series of narratives. Following Lipsius, he regards it as a Jewish-Christian source, perhaps (*l.c.* p. 154) originating from the Jerusalem community, written in Greek, not after A.D. 70, and later than the common groundwork of the Synoptic Gospels.

A summary of the results of this section would show that the sources which St. Luke used were as follows:—*Firstly*, he follows, over a large part of the narrative, the Gospel of St. Mark, and that probably in the form in which we have it, and not merely some underlying document.—*Secondly*, the natter common to St. Luke and St. Matthew, not found in St. Mark, implies a common written source, and that requirement is to be satisfied by the hypothesis, not of a direct use of St. Matthew by St. Luke, but by the supposition that both have

167

168

# LUKE, GOSPEL OF

used some one collection, or more, of our Lord's discourses.—Besides these, St. Luke seems to have had access to oral tradition, by which he corrects, or supplements, the narratives common to him and the others.—Lastly, he used, especially for chs. 1 and 2 and the section beginning with  $9^{51}$ , some special written sources, which do not supply much information as to Galilee, and may have been connected in origin with Jerusalem. This would suit Feine's view that the special source of St. Luke is that used in Ac 1-12, and would explain the points of contact with St. John noticed above. There is nothing to warrant the view that this source was Ebionitic in character, or prejudiced in favour of any peculiar and one-sided presentation of the history and teaching of our Lord.

5. ST. LUKE AND ST. PAUL.—The passages already quoted (Col 414, 2 Ti 411, Philem<sup>94</sup>) are evidence of a close connexion of St. Luke with St. Paul at Rome, and if we add to these the 'wesections' of Ac, St. Luke will be seen to have been with St. Paul for long periods together be-tween the date of Ac 16<sup>10</sup> and that of 2 Ti 4<sup>11</sup>. To describe this intimate relationship many different expressions are used by early writers. The Muratorian Fragment (as emended by Westcott) says: Lucas iste medicus post ascensum Christi cum eum Paulus quasi ut juris studiosum secundum adsumsisset nomine suo ex opinione conscripsit; Irenæus (Hær. iii. 1) says : ό άκόλουθος Παύλου το ὑπ έκείνου κηρυσσόμενον εύαγγέλιον έν βιβλίψ κατέθετο, and more generally describes St. Luke (Hær. iii. 10. 1, 14. 12) as sectator et discipulus apostolorum, and inseparabilis a Paulo et cooperarius eius in evangelio; Tertullian (c. Marc. iv. 2) describes St. Paul as St. Luke's illuminator, and (ib. iv. 5) says: Lucæ digestum Paulo adscribere solent. Jerome (de Vir. Illustr. § 7) says St. Luke was sectator apostoli Pauli. None of these terms seems to approximate Figure 1 and the set of the set tioned by Origen (ap. Eus. HE iii. 4, vi. 25) that the expression 'according to my Gospel' (Ro 2<sup>1</sup>) 16<sup>25</sup>, 2 Ti 2<sup>8</sup>) refers to that of St. Luke. Nor do they lead us to believe that St. Luke derived all or most of his information from St. Paul, for that would be contrary to his own words in his preface. Nor is there any reason, apart from the 'strong personal affection and enthusiastic admiration for Paul' manifest in Ac, to regard the third Gospel as Pauline, in the sense of its being a polemic in favour of Pauline doctrine, or a 'revision of a hypothetical one-sided Pauline primitive Luke, written with a conciliatory aim' (Baur, Scholten, etc.). On the other hand, it is difficult to maintain (as Jüngst, SK, 1896, p. 215 ff.) that there are no traces of Pauline influence. The points in which this influence are indicated are firstly in the actual Greek words and expressions used, secondly in the mode in which the teaching is presented. Thus, in regard to the first point, while the vocabularies of the Gospels give 32 words found only in St. Mt and St. Paul, 22 found only in St. Mark and St. Paul, and 21 found only in St. John and St. Paul, we get as many as 101 found only in St. Luke and St. Paul. Again, of the 'character-istic words and phrases' which mark the three Synoptists, the proportion common to St. Paul and St. Matthew is rather above, and to St. Paul and St. Mark rather below one-half, while nearly two-thirds are common to St. Luke's Gospel and St. Paul. These details are taken from Hawkins (l.c. p. 154 ff.), but the points of language common to St. Paul and St. Luke have been often collected, and are clearly and most fully tabulated in Plummer (Commentary on St. Luke, p. liv ff.). In regard to the actual teaching conveyed in the Gospel, there is evidence

that many leading ideas of St. Paul's are to be found in St. Luke. Thus both agree in laying stress on the universality of the Gospel, on the need of  $\pi l \sigma r s$ , on the  $\chi d\rho s$  shown by God to men, on the importance of the work of the Holy Spirit. Thus there are many points of contact between St. Luke and St. Paul, both in the language they use and in the teaching which they emphasize. Many passages have been set side by side to show the close relation of St. Luke to St. Paul (Resch, Aussercanonische Paralleltexte, p. 121; Plummer, *l.c.* p. xliv; Weiss, *l.c.* p. 312); from among them the following may be selected, 1 Th 5<sup>6</sup>=Lk 21<sup>24</sup>, 1 Co 11<sup>52-52</sup>=Lk 22<sup>1967</sup>, 1 Co 15<sup>6</sup>=Lk 24<sup>241</sup>, 1 Ti 5<sup>18</sup>= Lk 10<sup>7</sup>, 1 Co 10<sup>27</sup>=Lk 10<sup>8</sup>, Eph 6<sup>14</sup>=Lk 12<sup>35</sup>. 6. ST. LUKE AND JOSEPHUS.—The relation of

St. Luke to Josephus has been discussed in regard to Acts (see vol. i. p. 30), and for the Gospel it is equally true that the differences 'are only conceiv-able on the supposition of independence.' Belser. in two articles in the Theologische Quartalschrift for 1895 and 1896, shows that the arguments of Krenkel (Josephus und Lucas, Leipzig, 1894) to establish a connexion, are based partly on resemblances which prove nothing, such as the use of words like πορεύεσθαι and aufáreir, partly on expressions used certainly by both writers, but in different senses. The literary points in common are sufficiently explained in other ways, as, for are sufficiently explained in other ways, w, instance, by the influence of the LXX on both, while many of the alleged instances are 'the common material of various Greek writers.' When we pass from the language used to the facts referred to by the two authors, their connexion is equally unproved. Zahn (Einl. ii. 394 ff.) shows this in regard to their references to the Census. Both writers mention it, but the area which it concerned is limited in Josephus to the territory of Archelaus (Aut. XVIII. i. 1; BJ VII. viii. 1), or at most extends to Syria (Aut. XVII. xiii. 5), and is not, as in Lk  $2^{1-3}$ , an event of world-wide importance. Again, Josephus seems to know nothing of the official position of Quirinius in Syria, or at most only vaguely implies it. 'No single historical fact of Luke finds its explanation by means of the hypothesis that he has read Josephus. On the contrary, he often shows a knowledge clearly independent of Josephus in regard to historical events of the time, and in regard to persons more or less prominent' (Zahn, i.e. p. 397). As instances may be quoted the facts mentioned in Lk  $8^{8}$  13<sup>1</sup> 23<sup>12</sup>. These, however, only show that, independ-ently of Josephus, St. Luke had detailed information; they do not disprove a use of Josephus. The arguments dealing with the question are summed up by Clemen in his Chronologie d. Paul. Briefe, Halle, 1893. We must suppose (with Schürer) either that St. Luke did not use Josephus at all, or that if he did he forthwith forgot what he had learnt from him. As maintaining a connexion between the two writers may be quoted Holtzmann, Krenkel, Keim, Hausrath, and others; while their inde-pendence is upheld by such authorities as Schürer, Harnack, and Zahn. In the words of the lastnamed we need not use further argument to support the view that 'Luke could have followed Josephus as an authority neither in historical

matters nor in his Greek style' (*l.c.* p. 397). 7. ST. LUKE AND MARCION.—It is generally admitted by all scholars at the present day that the Gospel of St. Luke was the foundation of Marcion's Gospel, and that Marcion's work was not enlarged so as to become our third Gospel. Such was the unanimous opinion of early and independent witnesses. Thus Irenæus (*Hær.* I. xxvii, 2) speaks of Marcion as circumcidens id quod est secundum Lucam evangelium, and (*ib.* 111. xii. 12) describes Marcion and others as decurtantes secunLUKE, GOSPEL OF

LUKE, GOSPEL OF

dum Lucam evangelium; Tertullian (c. Marc. i. 10. 1) speaks of Marcion as one qui erangelia corrosit. The same is true of Epiphanius. It is only in quite recent times, and partly on grounds of textual criticism, that it has been maintained, as by Baur and Ritschl, that Marcion's was the earlier form; but subsequent investigations have established, beyond a possibility of doubt, that the statements of Irenæus, quoted above, give the true state of the case. It is possible to reconstruct, almost in its entirety, from the quotations of Tertullian and others, the form of Marcion's Gospel. This has been done most recently by Zahn (Geschichte des Kanons, i. 674 ff., ii. 409 ff.). Omitting all the first three chapters except the chronological data in 3<sup>1</sup>, Marcion begins with 4<sup>14</sup>, and, except for one or two small omissions, e.g.  $7^{29-53}$ , goes on to  $11^{38}$ . Then,  $11^{29-53}$  (the reference to Jonah),  $11^{49-51}$  (ref. to OT history),  $13^{1-9}$  (the massacre of the Galileans),  $13^{29-53}$  [5<sup>11-53</sup> (prodigal massacre of the Gameans), 10<sup>-10</sup> (prongan son), 17<sup>5-10</sup> (38<sup>31-34</sup> (announcement of the Passion), 19<sup>30-48</sup> (triumphal entry), 20<sup>9-18</sup> (wicked husband-men). 20<sup>37-88</sup> (refs. to OT), 21<sup>1-4.</sup> <sup>18</sup> <sup>21</sup> <sup>22</sup> <sup>22</sup> <sup>16-18</sup> <sup>38-30</sup> <sup>33-38</sup> <sup>40-51</sup> <sup>24</sup> <sup>47-33</sup>, are all omitted. It is to be noticed that Marcion's Gospel differs from that of St. Luke almost entirely by omission, and that many of the omissions are sufficiently explained by Marcion's dogmatic views. Such minor changes as 'all the righteous' for 'Abraham and Isaac and Jacob and all the prophets'  $(13^{29})$  are also explicable in the same way. The omissions amount in all to some 309 verses. Another point to notice is that St. Luke's Gospel and Marcion's agree so closely that not only has Marcion preserved almost all the sections peculiar to St. Luke, but he has kept the same order. In settling the question which of the two documents was prior, the question of style is decisive. This has been carefully worked out by Sanday (Gospels in the Second Century, ch. viii.), and he comes to the conclusion that there is a unity of style, both in regard to words and syntax, so that ' the verified peculiarities of St. Luke's style are found in the portions omitted by Marcion in a proportion of more than one to each verse' (l.c. p. 229).

But while there can be no doubt that Marcion's work is only an abridgment of St. Luke's Gospel, made with a doctrinal object, the text preserved in it often contains readings of great interest, which cannot be regarded as arbitrary changes, for they are supported by other early authorities. The assertions of Epiphanius (*Hær.* xlii.) and Tertullian, that Marcion altered the text of his authorities to suit his views, must be qualified by the fact that, in many of the instances mentioned, Marcion's reading finds other support, and represents (according to Blass) one of the two early recensions of St. Luke's Gospel (see above), though not always 'in its pure form.' Blass, in his edition of St. Luke (see p. xliii ff.) has collected together the passages where Marcion departs from D and other authorities. On the ground of the readings they contain, the fragments of Marcion may have an importance; but they throw no suspicion on the integrity of St. Luke's Gospel, from which they are extracted.

8. ST. LUKE'S STYLE.—The verdict of Jerome (Migne, Pat. Lat. xxiv. 100) in regard to St. Luke's style is sermo comptior est et secularem redolet eloquentiam, and Renan (Les Évangiles, ch. xiii.) says of it that St. Luke's 'is the most literary of the Gospels.' The opening verses, 1<sup>14</sup>, arrest our attention at once on account of their classical character, and offer a strong contrast to the verses which follow, which are marked by a number of Hebraisms. This combination of characteristics is traceable in varying degrees throughout the Gospel, but it seems a little fanciful to suggest

that St. Luke 'has in places allowed his style to be Hebraistic because he felt that such a style was appropriate to the subject-matter.' It will be necessary to say something as to St. Luke's characteristics of style in regard to vocabulary and syntax, and then to notice some points connected with the Hebraistic usages.

(a) An examination of St. Luke's vocabulary shows that he uses a very large number of words not found in any other NT writer. Sir John Hawkins\* (*l.c.* p. 162 ff.) gives the number of words peculiar to the Gospel as 261, which number is increased by 471 if we add words used only in the Gospel and the Acts. If we further analyze the character of these peculiar words, we find that not quite three-fourths of them occur in the LXX, St. Luke showing himself more familiar with the vocabulary of the LXX than St. Matthew or St. Mark. Out of the same total of peculiar words 38 are marked as non-classical, i.e. inot occurring in Greek writers earlier than the Christian era'; the proportion of non-classical words is therefore about one-seventh, which is the same as that in St. Matthew, and very much smaller than that in St. Mark. But these figures do not adequately represent the classical colouring of St. Luke's style, which may be illustrated in almost every narrative which he has in common with St. Matthew and St. Mark, by his rejection of a non-classical word or expression in favour of one which is classical. Thus, to take a few illustrations, ratarelyeroi yoar (529) is preferred to the *ouravékeuro* of Mt 91) and Mk 215 ; preferred to the objective of the  $\delta^{(1)}$  and  $\delta^{(2)}$  twice (483 837) a more classical expression is adopted for St. Mark's expression  $\delta^{(2)}$  and  $\delta^{(2)}$  and  $\delta^{(2)}$  and  $\delta^{(2)}$ draddpr $\omega$ ; St. Luke avoids (with St. Matthew) the unclassical word  $\kappa\rho\delta\beta\beta$ aros (Mk 2<sup>4</sup> 11);  $\pi\alpha\rho\lambda\delta\lambda\mu\mu$ - $\mu$ tros is preferred to  $\pi a \rho a \lambda v \tau i \kappa \delta s$ . Other instances will be found in Plummer (l.c. p. li) or Zahn (l.c. ii. 419). A very striking, because obviously un-premeditated, illustration of the classical character of St. Luke's vocabulary will be found by examining in a concordance the distribution of the use of  $\tau \epsilon$  in the books of the N'T. Besides the greater purity in choice of words, as compared with those purity in choice of words, as compared with those used by St. Matthew and St. Mark, another char-actoristic of St. Luke's vocabulary is his use of medical terms. This point has been carefully examined by Hobart (*The Medical Language of St. Luke*, London, 1882), who has made a long list of words which in the NT occur chiefly or solely in St. Luke, and are also found in Greek medical writers. Plummer (l.c. p. lxiv) points out that a very large proportion of these words occur in the LXX, and may have come to St. Luke through that channel, while he allows a large residuum, which, taken together, point to a familiarity with medical terms which would be natural in 'the beloved physician? As illustrations may be quoted  $\sigma \upsilon \varkappa \chi \circ \mu \varepsilon \eta \pi \upsilon \rho \varepsilon \tau \tilde{\varphi} \mu \varepsilon \gamma a \lambda \tilde{\varphi}, 4^{88}$ ;  $\eta \mu \iota \theta a \tau \eta s, 10^{33}$ ;  $\xi \sigma \tau \eta \eta$   $\rho \upsilon \sigma \iota s \tau \sigma \vartheta a \ell \mu a \tau \sigma s, 8^{44}$ ;  $\kappa \rho a \iota \pi d \lambda \eta, 21^{34}$ . Another point in regard to St. Luke's vocabulary is the amount common to him and St. Paul, which has been alluded to above (see p. 168). The last character-istic which need here be noticed is St. Luke's fondness for compound words, e.g. *apogaraßalreir*, έπεισέρχεσθαι, etc.

(b) In regard to St. Luke's syntax, a number of usages recur so frequently that they may be regarded as characteristic. Thus  $\pi\rho\delta s$  with the accusative is preferred to the simple dative after verbs of saying. This construction occurs 151 times in the Gospel and Acts, and 25 times in the rest of the NT. Another noteworthy usage is that of  $\gamma I \approx \mu \alpha \omega s$  followed by  $\kappa a I$ , a finite verb, or an infinitive; these are almost confined to St. Luke, in whose writings they are found more than 50

\* Plummer (l.c. p. lii), following Thayer's Lewicon, p. 708, gives the number rather differently.

169

LUKE, GOSPEL OF 170

times. His use of the optative, a mood comparatively rare in the NT, is also remarkable. In regard to conjunctions, his fondness for  $\tau e$ , especially in Ac, has been already noticed; he shares with St. Paul a fondness for the expression de ral. These may be taken as illustrations of points in St. Luke's syntax. Complete lists will be found in Plummer's *Commentary*, which is particularly good and full on the linguistic side, and in the work of Sir John Hawkins already quoted, as well as in the older books of Gersdorf, Vogel, and Holtzmann.

(c) The Hebraisms have attracted especial attention in St. Luke because of the purity of his own style. Their distribution is not altogether ex-plained by saying that St. Luke has preserved them as he found them in his sources, for if they had offended his ear he would no doubt have removed them, with the same freedom which he has shown generally in regard to the use of his authorities. It is pointed out by Zahn (l.c. ii. 400) that these Hebraistic turns of expression are used in the editorial links between the narratives, and in these places must be due to St. Luke himself. This is especially true of the expression sal evero  $\kappa al$ ... or externo  $\delta e$ . This seems to indicate that, though St. Luke, no doubt, did preserve the Aramaic expressions of his sources, or may even (as in the first two chapters) have directly imitated the style of the LXX, yet his Hebraisms are in the main to be attributed to the fact that he was thoroughly imbued with the style of the LXX, and not only (as we have already seen) with its vocabulary. Whatever the cause, the number of Hebraistic usages is very large in St. Luke, and they are scattered over the whole Gospel. Besides the uses of  $\gamma$  loopan, already mentioned, we may notice his periphrastic use of the participle, his use of ido' and kal ido', such genitives as o' spirits  $\tau \tilde{\eta} s$  doixias (18<sup>3</sup>), or o oikoropos  $\tau \tilde{\eta} s$  doixias (18<sup>3</sup>), and circumlocutions by means of words like πρόσωπον, χείρ, στόμα, etc., as in the expression πρό προσώπου (7<sup>27</sup> 9<sup>42</sup>). 9. ST. LUKE'S PREFACE.—This is so unique in

character as to claim separate special notice. Lagarde, in his Psalterium iuxta Hebræos Hieronymi, tried to show that St. Luke's is modelled on that of Dioscorides in his Materia Medica. There does not seem, however, to be much more resemblance than would be natural in two cases where the writers were referring to the work of their predecessors in the same field, and therefore used a number of similar words. The dedication, though unique in form, as far as the NT is con-cerned, is in itself only an instance, as Zahn tells us, of a custom which prevailed widely at that time among Greeks and Romans.

What is of more importance for us is the evidence afforded by the preface in regard to the early narratives of our Lord's life, in reference to St. Luke's use of his materials, and other similar questions. The exact meaning of each of the more important words has been closely investigated, as well as the inferences which may be drawn from them. This has been done most recently by Blass in his Philology of the Gospels. The follow-ing points deserve attention: (1) Many had before Luke attempted to 'restore from memory' (Blass) a continuous narrative, not necessarily written (difynois, see Liddell and Scott). The word exceptorar does not necessarily imply (as Origen) an unfavourable criticism of these 'attempts,' and in the *kal éµol* of v.<sup>3</sup> St. Luke puts himself on the same footing as these predecessors. (2) These accounts were all second-hand, and handed down orally (so Zahn argues from  $\pi a \rho t \delta \sigma a \nu$ ), but based on the evidence of those who had been eye-witnesses

ministry). Are we precluded by these words from supposing that amongst the  $\delta_{i\eta\gamma\gamma\sigma\sigma\epsilon\sigma}$  of v.<sup>1</sup> was any apostolic narrative? (3) St. Luke, inasmuch as he had at some earlier date carefully investigated all the facts to the very beginning (druber perhaps goes further back than  $d\pi' d\rho \chi \eta s$ , ventures to write, and that (4) radefirs, *i.e.* either a continuous narrative in contrast with a number of narratives of separate events, or a complete account in contrast with accounts marked by omissions. The word does not necessarily, or probably, imply an order of time. (5) St. Luke's purpose in writing was to supply Theophilus, as yet, perhaps, not a Christian, with a convincing account of the things in which he had been instructed.

The exact meaning of almost every word has been pressed in one direction or another, and corre-spondingly divergent inferences have been made.

10. PURPOSE AND ARRANGEMENT OF THE GOS-PEL.-The primary purpose of the Gospel (as well as of the Ac's) is stated in the preface, namely, that Theophilus may have *full* knowledge in re-gard to the truth of the accounts given to him in the teaching which had been imparted orally fra επιγρώς περί ων κατηχήθης λόγων την dσφάλειαν. What was intended for a single person was adapted for others in similar circumstances, and so St. Luke may have sent out the Gospel in a second form (as Blass holds), though it has been said above that this is unlikely, and not required by the facts of the case, so far as the Gospel is concerned. The principle of arrangement is also stated in the preface, in the word kasefin, but the interpretation to be put upon the word is doubtful, and has to be gathered from the Gospel itself.

(a) Purpose.—The first point which may be regarded as significant of St. Luke's purpose is the way in which the facts are definitely brought into connexion with secular history. He alone among the NT writers mentions a Roman emperor by name (21 31, Ac 1128 182), and in Ac other Roman officials, whose names would fix the dates, to some extent at any rate. Another point which would help to carry conviction (Zahn, *l.c.* ii. 375, 391) is the relatively large number of personal names, not only of prominent actors, but also of those of secondary importance (e.g. 2<sup>1. 2</sup> 3<sup>1. 2</sup> 7<sup>40</sup> 8<sup>3</sup> 19<sup>1</sup> 24<sup>18</sup>). Again, it is a noteworthy characteristic of St. Luke that, while St. Matthew seems to collect our Lord's teaching together, he keeps the sayings in what must have been their original setting, and emphasizes the circumstances which called them forth. This may best be illustrated from the way in which the Sermon on the Mount in St. Matthew is scattered over St. Luke's Gospel. This greater definiteness of circumstance could not fail to im-press Theophilus, and from the point of view of conviction is more important than definiteness of place or time, which St. Luke, in the Gospel, as In the Acts, often cannot give. In these ways Theophilus would see the work of 'the critic who has had diligent inquiry made in regard to the external facts of the history, and the historian who makes every effort to bring his figures out of the gloom of vague tradition into the clear light of reality.' Another point which St. Luke emof reality.' Another point which St. Luke em-phasizes is the impression which our Lord's teaching and acts made on those who were present; and just as St. John, in order to instil 'the belief that Jesus was the Christ the Son of God,' is careful to record the impression made by our Lord's work, so St. Luke lays stress on the way in which our Lord's hearers were affected (e.g. 415 948 1848 1987 doubt that St. Luke, all through the Gospel, has in mind the points on which a Gentile reader would from the beginning (i.e. of our Lord's public | want further information or would feel greater or

less interest, or would be more or less impressed, and so we meet with explanations, we find teaching of special Jewish interest ignored or curtailed, and methods of argument such as appeal to the OT dropped. These are all illustrated in the next section of this article.

We see, then, how the expressed purpose of the Gospel seems to be carried out as the narrative proceeds, and we may add that probably St. Luke endeavoured to make his work as complete as possible, and did not omit facts or sayings as irrelevant to his immediate object of convincing Theophilus.

Other objects have been assigned to St. Luke of a polemical or conciliatory character, but the features of the Gospel referred to below show that it will be difficult to make a completely consistent theory on these hypotheses.

(b) In considering St. Luke's arrangement of his Gospel, we may suppose him to have followed in the main the sources which he used, unless he had any occasion to think these were incorrect, or unless his special purpose required him to deviate from them for the sake of clearness. And so we find that over large stretches of the narrative the order of events follows exactly that of St. Mark. (1) After the first two chapters comes the narrative of our Lord's baptism and temptation. Here St. Luke's independence of arrangement is seen in the way in which he finishes the history of John the Baptist before beginning the account of our Lord's ministry. The most important deviation at this period of the narrative is to be found in the previous journey through Galilee, implied in the word beforperes,  $4^{10}$ . The next point to notice is the visit to Nazareth,  $4^{19-50}$ . In this account the reference to miracles at Capernaum (4<sup>28</sup>) seems to indicate that it is inserted out of chronological order, unless we suppose these miracles to have happened on the circuit in Galilee just mentioned. In 4<sup>31</sup> Capernaum is introduced as if it had not been mentioned before, which supports what has just been said. (2)  $4^{s_1}$ - $8^{19}$ —St. Luke's order follows St. Mark's ( $1^{21}$ - $3^{19}$ ) exactly, save for the section  $5^{1-11}$  which records the call of the disciples and the miraculous draught of fishes. But there are marks of independence : thus St. Luke assigns no time or place to the healing of the paralytic ( $5^{11}$ m.), unless the connexion with the call of Levi (527) fixes it. St. Mark and St. Matthew definitely fix it at Capernaum. Again, the two cases which touch Sabbath observance  $(6^1 \text{ and } 6^6)$  St. Luke assigns definitely to two different Sabbaths, St. Mark apparently to the same. (3)  $6^{2}-8^3$ —the record seems to agree generally with St. Matthew. Thus in both the discourse on the Mount (or Plain),  $6^{22-10}$  is followed by, and in both definitely connected with, the healing of the centurion's servant (omitted by St. Mark). St. Luke adds the incident at Nain on the next day  $(?; var. lec. 7^{11})$ , and then in both St. Luke and St. Matthew the message of John the Baptist follows, but with no reference as The incident at the house of Simon the to time. Pharisee follows (7<sup>83</sup>), but with no note of time. The section closes (8<sup>1-3</sup>) with a circuit of Galilee,  $dr \tau \hat{\varphi} \kappa a \theta \epsilon \tilde{t} \tilde{\eta}$ : (4) 8<sup>4</sup>-9<sup>17</sup>—St. Luke and St. Mark (4<sup>1</sup>-6<sup>44</sup>) agree, but St. Luke leaves out Mk 3<sup>30-37</sup>, and inserts later Mk 3<sup>328-10</sup>. Here St. Matthew seems to support St. Luke's order. As to Mk 331-85 the visit of our Lord's mother, St. Matthew and St. Luke put it on the same day as the parable of the Sower, but St. Matthew records it before, St. Luke after, the parable. They all agree in insert-ing here the parable of the Sower, but St. Matthew records the 'other parables' and the private explanation to His disciples, which are only mentioned in St. Mark ( $4^{33.34}$ ). The narratives here diverge, because the crossing of the lake, the out much ea

storm, the events in Gadara are put much earlier in St. Matthew (8<sup>18ff.</sup>), in connexion perhaps with the *first* visit to Capernaum. St. Mark, however, connects these definitely (4<sup>35</sup>) with the parable, while St. Luke, perhaps having St. Mark and also the order of St. Matthew before him, records this in the same place as St. Mark, but  $(8^{22})$  with a vague reference to 'one of the days.' It is possible that St. Luke has acted in exactly the same way with regard to the events which follow in St. Matthew (the healing of the paralytic, the call of Levi, the discourse on fasting, Mt  $9^{1-17}$ ) after the return from Gadara, but are in St. Luke and St. Mark given earlier. Here, again  $(5^{17})$ , St. Luke avoids the need of reconciling the accounts by taking refuge in the phrase 'on one of the days. The narratives then proceed together (but St. Matthew 8<sup>18</sup> definitely adheres to his order, for he connects what follows with the call of Levi), but St. Matthew adds to the healing of Jairus' daughter and of the woman with the issue of blood two miracles, 9<sup>27-34</sup>, which he assigns to the same day. Then follows a departure from Capernaum (Mk 61to Nazareth, and a circular journey through Galilee mentioned by St. Matthew and St. Mark, though the reason for it is to be found in the miracle recorded only by St. Matthew  $(\theta^{s1})$  requiring his withdrawal. In this connexion (though St. Luke does not state the time) occurs the mission of the Twelve, followed by Herod's comments on the result of that mission. St. Luke omits the account of John's death (which St. Matthew and St. Mark here insert). With the withdrawal to St. Mark here insert). With the withdrawal to Bethsaida (which St. Matthew attributes to the news of John the Baptist's death) and the feeding of the five thousand this section closes  $(\theta^{17})$ . (5) Here St. Matthew and St. Mark give in general agreement a long section  $(Mt 14^{22}-16^{12}, Mk 6^{46}-8^{-6})$ , narrating a return to Gennessaret, a visit to Pheni-cia, a return through Decapolis to the Sea of Galilee, the feeding of the four thousand, a crossing by ship and back, and (Mk only) a visit to Bethsaida. All this is practically omitted by St. Luke, except for one or two sayings which he records in another connexion. (6) At  $9^{18-30}$  the three narratives proceed together in recording, exactly in the same order, the confession of St. Peter (the scene of which St. Luke does not mention), the announcement of the Passion, the Transfiguration, the lunatic boy, another announcement of His death, and the dispute as to who should be greatest (the scene of which St. Luke again does not mention). With this St. Matthew and St. Mark connect a discussion as to offences which St. Luke puts much later, and distributes  $(17^{1.2} \ 14^{34} \ 15^{5-7})$ . (7) The section beginning with  $9^{51}$  is independent of the other accounts, as far as  $18^{14}$ . All the narratives (Mt  $19^1$ , Mk  $10^1$ , I.k  $9^{51}$ ) agree in making our Lord leave Galilee at this stage, and St. Matthew and St. Mark add 'for Persea.' St. Luke mentions a journeying to Jerusalem several times during the section, e.g. 951. 53 1322. 23 1711, and St. John (72 1040 117.54) tells us of visits to Jerusalem and its neighbourhood and withdrawals again; and so some, e.g. Wieseler and Ellicott, have supposed that St. Luke here gives us the narrative of three definite journeys to Jerusalem. But St. Luke in this section impresses upon us so often his uncertainty as to time and place, that a chronological sequence seems out of the question; and in certain chapters it is obvious that the subject of prayer, or riches, or something similar, is the link which holds the narrative together. The proposal of Mr. Halcombe (The Displaced Section of St. Luke, Cambridge, 1886) to remove bodily a small part of this section, namely 1114-1321, and to insert it after 822, involves an impossible act of violence to textual evidence with a very slight improvement from the point of

Digitized by Google

172

view of harmonizing the narratives. (8) At  $17^{15}$ the narratives unite again, and go on to the end of 1848; but St. Matthew and St. Mark are independent in details, and St. Luke adds the incident of Zacchæus, and the parable of the Pounds (19<sup>1-28</sup>). (9) At 19<sup>20</sup> the account of the triumphal entry begins, and from here on to the end of the Gospel the question of arrangement does not need to be considered, though even in the events of the last week we may notice  $(e.g. 20^{\circ})$  the same indefiniteness as to time, and resort to summaries  $(e.g. 19^{17})$ 2181). The main facts recorded are the same in all, though there are, of course, additions and omissions in St. Luke's account as in the others. Blass (Philology of the Gospels) and Reuss assume that a different source has been used here also, and certainly St. Luke is independent of St. Matthew and St. Mark in the form in which he gives the eschatological discourses. The general order of events is, however, the same, as must necessarily have been the case. Here and there St. Luke seems to have intentionally put together events separate in time and place. Thus St. Peter's denials are placed together in order 'to add force to the episode' (Lightfoot), and in the account of the appearances after the resurrection St. Luke seems to have summarized and put them all on the day of the resurrection, though he cannot from his acquaintance with St. Paul have been ignorant of the events of  $1 \text{ Co } 15^{5-7}$ .

We have seen that in the main St. Luke follows the order of the framework found in St. Mark.

Are we in a position now to say, looking back over the Gospel, what St. Luke meant when he purposed to write  $\kappa a\theta \epsilon \xi \eta s$ ? Various theories as to St. Luke's principle of arrangement have been put forward. Plummer (*l.c.* p. xxxvi ff.) says, 'we may assert with some confidence that Luke generally aims at chronological order.' Weiss (*l.c.* p. 301) says the evangelist 'has attempted to divide Jesus' public ministry into work in Galilee, outside Galilee, and in Jerusalem.' Another aspect is represented by Godet and Westcott. The former (*Biblical Studies*, p. 43) regards the Gospel as giving an account of the 'organic growth of the person and of the work,' and Westcott (*Introd. to the Study of the Gospels*, ch. vii. note G) gives an elaborate analysis based on a general development of ideas such as 'marks of the future Church,' 'the universal Church,' etc. Zahn (*l.c.* ii. 366) thinks that 'the chronological exactness is not a clearly marked principle in the representation,' but that, in contrast with the disconnected narratives of single incidents,' St. Luke's object is to give Theophilus 'a continuous representation of the history, in which the earlier prepares the way for the later, and makes it intelligible.'

11. CHARACTERISTICS OF THE GOSPEL.—These must depend in this, as in any other work, partly on the nature and extent of the sources to which the writer alludes in his preface and the use he makes of them, partly on his consideration of the readers for whom the Gospel was intended, partly on his own personality. It is not always easy to say to which of these causes the different characteristics are to be assigned : thus the selection of particular incidents may be due to the personal interest of St. Luke, or to consideration for the readers he wished to interest, or it may be explained by the fact of his finding them in the sources he used. 'The following are among the most important characteristics which have attracted attention in the Gospel. Some of them have been alluded to already.

That St. Luke wrote for Gentiles is clear. A number of technical terms are explained. Thus we find romatos ( $7^{30}$  10<sup>25</sup> etc.) instead of  $\gamma pammareos$ , instead of  $\gamma pammareos$ , instead of  $\gamma pammareos$ ,

other word (e.g.  $8^{21}$ ). Hebrew names are translated : e.g. Γολγοθά (2323) and Kararaios (616). The position of places, especially in Palestine, is often defined, e.g.  $4^{31}$   $8^{2_3}$   $23^{o_1}$ . Expressions which might be misunderstood by Gentile readers are modified or added to: thus  $(9^{29})$  in the account of the Transfiguration  $\mu er \epsilon \mu o \rho \phi \omega \theta \eta$  (Mt, Mk) becomes  $\epsilon \gamma \epsilon \epsilon r er o$ .  $\epsilon r \epsilon \rho o r$ . The appeals to the OT are very few, and the quotations from it are found for the most part in the sayings of our Lord (e.g. 44.8 727 etc.), which are reproduced by St. Luke from his authorities, or are reminiscences of the LXX, with which, as we have seen, he was very familiar. There are only five references to prophecy, and of these only one (34) occurs in the narrative of St. Luke. Points in our Lord's teaching which would have no interest for Gentile readers are altogether passed over or curtailed. Thus the teaching, in the Sermon on the Mount, as to the relation of the new to the old Law is omitted; so also is the denunciation of the Jews for observing the 'tradition' at the expense of the Law (Mt 15<sup>1</sup>, Mk 7<sup>1</sup>); the rebuke of the scribes and Pharisees (Mt  $23^{16}$ ) is very much shortened. The frequent allusions to the universality of the Gospel are to be explained by the same reference to Gentile readers. St. Luke alone quotes in full  $(3^5.6)$  the prophecy of Is  $40^3$  — 'All flesh shall see the salvation of God'—a prophecy which all the evangelists connect with John the Baptist. Our Lord's first recorded teaching (424ff.) emphasizes the admission of Gentiles to privileges at the hands of Elijah and Elisha, while His last explanation of the Scriptures at Emmaus (24<sup>47</sup>) showed that 'repentance and forgiveness of sins were to be preached to all nations, beginning at Jerusalem.' Between these limits a number of passages and incidents might be quoted to estab-lish this characteristic of the Gospel, e.g. 10<sup>20</sup> ft. 1329 etc. In accordance with this, we find a 'marked antipathy to exclusiveness and intolerance' (Plummer), and stress laid on those qualifications for entrance to the kingdom, which it is open to all without distinction of birth to attain. On the other hand, the Gospel is not anti-Jewish, though the Jews are strongly condemned directly or indirectly, and that in parts of the Gospel peculiar to St. Luke,  $e.g. 10^{81.32} 16^{15}$  etc. Jewish expressions are often kept in parables or teaching found only in St. Luke, and the regard for temple worship and observance of the law is not depreciated. All the rites of the law are fulfilled in our Lord's case (221 etc.): He is the 'Son of David' (1888 etc.): The commands of the Jewish law are to be observed  $(5^{14} 17^{14} \text{ etc.})$ , and are of lasting importance  $(16^{29} 18^{20} \text{ etc.})$ . In all these and similar cases St. Luke may have been preserving only the language of his sources, but, if his purpose had been to depreciate Judaism, he would no doubt have acted as Marcion did towards the allusions to the OT which he found in St. Luke's Gospel, and removed them.

In regard to the way in which he uses his sources, it has been suggested that St. Luke 'avoids duplicates on principle' (Weiss, Introduction, Eng. tr. ii. 300), and thus gives no account of the cursing of the barren fig tree (Mk 11<sup>18</sup>, Mt 21<sup>18</sup>) because he has already narrated a similar event in 13<sup>367</sup>, does not mention the anointing of Mk 14<sup>3</sup>, Mt 26<sup>50</sup> because of the narrative of 7<sup>3667</sup>, and so on. But this supposed characteristic of 'Sparsamkeit' (as Storr calls it), which may be illustrated by many other omissione of St. Luke (such as the passing over of the miracle of the 4000), has to be taken in connexion with the numerous cases where St. Luke does not show this tendency. Thus we have a twofold dispute as to who should be the greatest 9<sup>46</sup> 22<sup>21</sup>; in regard to the miracles and parables we find similar cases of repetition;

## LUKE, GOSPEL OF

and the so-called 'doublets '(e.g.  $8^{16} = 11^{83}$ ;  $14^{11} = 18^{11}$ ) show that not only in the narratives, but in our Lord's words, the same characteristic of repetition is Other instances may be found in Plummer, found. l.c. p. xxviii, and Hawkins, Horce Synoptice, pp. Another characteristic of the Gospel is a64 ff. vagueness as to time and place, even in cases where the other narratives are more definite. This vagueness may be illustrated from  $5^{12,17}$  etc., is perhaps most marked in the section  $9^{5167}$ , and extends even to the account of the passion,  $e.g. 20^1$ . On the other hand, it must be noted that St. Luke very frequently connects sayings of our Lord with the occasion which called them forth, which in the other Gospels are collected together with no such reference, as for instance in the Sermon on the Mount, e.g. 1222ff. Mention has already been made of the 1456. stress St. Luke lays on the effect of our Lord's words, of his preference for more literary Greek, of his fondness for medical expressions, of his close connexion in thought, and often in language, with St. Paul.

In the account of Jesus' life and teaching the symbol of the ox (with which this Gospel is almost universally associated) may perhaps, as the sacrificial animal, represent St. Luke's Gospel as especially that which emphasizes our Lord's 'gentleness' to the sin-ner and the outcast. This may be illustrated from the parables peculiar to St. Luke, e.g. the Prodigal Son; or from such incidents as that of the sinner in the house of Simon (7367.), or that of the peni-tent robber (2:3597.). Most marked. again, are the repeated references to prayer, both in the narrative of our Lord's life—in which he records many instances of our Lord praying which are not found in the other narratives  $(e.g. 3^{21} 5^{16} 6^{12} \text{ etc.})$ —and also in parables which he alone records  $(e.g. 11^5$ 18-14). Again, it is noticeable how much of the teaching preserved for us only by St. Luke deals with the use of riches. This is to be regarded rather as proclaiming him as the 'Evangelist of Philanthropy' (Herder), than as proving that St. Luke made use of an Ebionitic source. This characteristic appears in much of our Lord's teaching as recorded by St. Luke, as well as in a large number of the parables peculiar to him, e.g. those of Dives and Lazarus, the Rich Fool, the Unjust Steward. It may have had a special appropriate-ness for a rich man like Theophilus (Zahn, *l.c.* ii. 379), or may have been the outcome of St. Luke's great sympathy with the suffering poor, and a great horror of the temptations which beset all the rich.' It does not (as Weiss, Introd., Eng. tr. ii. 309) 'rest on the idea that wealth is perincious in itself and poverty salutary in itself.' There is no sufficient evidence of St. Luke's use of an Ebionitic source or sympathy with Ebionitism, for many of the expressions on which this theory is based are found in the other Gospels; and the latter con-tain many things not found in St. Luke which have as good a claim to be regarded as Ebionitic: thus they (Mt 13<sup>22</sup>, Mk 4<sup>19</sup>), and they alone, speak of 'the *deceitfulness* of riches,' where St. Luke simply says 'riches.' 'There is no evidence that the protest against worldliness is due to some particular source from which he drew and from which the others did not draw' (Plummer).

For a discussion of many difficulties connected with special points in St. Luke, such as the Genealogy, Census, etc., readers are referred to the articles GENEALOOY OF JESUS CHRIST, JESUS CHRIST, vol. ii. p. 645 f., and QUIRINIUS. The present article has aimed at dealing with the main headings of the general topics connected with the cospel, and giving sufficient illustrations to explain the allusions. The literature given below will enable students to follow out the points more in detail.

LUST 173 LITERATURE.—Besides general books of Introduction to the New Testament, and works on the Canon, the following may be mentioned : (A) Commentarics.—A list of these, complete for all practical purposes, may be found in Plummer's volume on the Gospel in the International Critical Commentary. This may itself be recommended as the best English Commontary, especially on the linguistic side, in regard to which it is very full and scholarly. Besides these, reference may be made to Schanz, Das Fcangelium desheligen Lucca; Godiet, Commen-ture sur l'Exanglic de St. Luc; Knabenbauer (in the Cursus Scriptura Sucra); Meyor, Kritisch-exceptioncher Kommentar (last edition of St. Luke by B. and J. Welss). (B) St. Luke and Josephus.—Clemen, Die Chronologie der Paul. Briefe, p. 66 fl., discusses the literature of the question, etc.; see also Zahn, Einl, 11, 894, 414. A connexion between St. Luke and Josephus is maintained by Krenkel (Josephus und Lucca), Keim (Aus dem Urchristenthum), and others, and is denied by Nösgen (SK, 1879), Belser (Theol. Quartutschrift, 1955, 1896), etc. (C) St. Luke's Style.—Besides grammars of the NT, like Winer, Schmiedel, and Blass, books on NT writers like that of Simcox, and lexicons like that of Thayer (in which a list of words peculiar to St. Luke is given), may be mentioned espe-cially Plummor, Holtzmann, Gersdorf (Beiträdge sur Spruch-characteristik, etc.), Vogel (Zur Characteristik des Luccas unct Spructhe und Stil). (D) St. Luke and Marcion.—The most recent discussion of Marcion's Gospel is In Zahr, Geschicht des Kranes, I. 689 fl., 11. 411 ff.; see also Snnday, Gospels in the Second Century, ch. viii.; Westcott, The Canon, p. 814 ff. (Z) N. Luke and Marcion.—The most recent discussion of Marcion's Gospel is In Zahr, Geschicht des Kranes, I. 689 ff., 11. 411 ff.; see also Snnday, Gospels in the Second Century, ch. viii.; Westcott, The Canon, p. 814 ff. (Z) N. The Text of St. Luke's Gospel, with reference to the readings in the later chapters, ha

LL. J. M. BEBB.

LUNATICK.—The Greek vb.  $\sigma\epsilon\lambda\eta\nu\alpha\delta_{\sigma\mu\alpha}$  (from  $\sigma\epsilon\lambda\eta\nu\alpha$ , the moon) occurs in Mt 424 1715 and nowhere else in class, or bibl. Greek. Its lit. meaning is 'to be moonstruck'; the Vulg. has *lunaticus* and (17<sup>16</sup>) *lunaticus* est, and Wyc. followed with 'is lunatik.' The other versions chose the same expression (except Tindale's 'is franticke' in 17<sup>15</sup>).\* which also means literally 'is moonstruck.' RV prefers 'is epileptic,' for which it is taken to task by Beckett (Revised NT, p. 99). See MEDICINE. J. HASTINGS.

LUST (Anglo-Sax. lust = Ger. Lust, 'pleasure,' 'delight') is now restricted to sexual desire, and that special meaning is found also in AV. But the word has a wider application in most passages, and signifies any gross appetite. Thus Ex  $15^{6}$  'The enemy said, I will pursue . . . my lust shall be satisfied upon them' ( $\frac{12}{7}$ ), lit. 'my soul,' Amer. RV 'my desire'); Ps 78<sup>16</sup> And they tempted God in their heart by asking meat for their lust ' (סְלְשְׁשְׁהָ); 78% ' They were not estranged from their lust ' (בְּלְשְׁיָהָ); 78% ' They were not them up unto their own hearts' lust ' (בְּלִשְׁיָהָ); 8112 ' So I gave them up unto their own hearts' lust ' (בְּלִשׁ בִּרָּה). These are all the examples of the subst. in OT. In NT the word most frequently tr. 'lust' is ἐπιθυμίa, 'strong desire' of any kind, the special kind being sometimes designated by an adi. ' worldly ' Tit ?.' sometimes designated by an adj., 'worldly' Tit 2.2, 'fleshly' 1 P 2<sup>11</sup>. In 1 Th 4<sup>6</sup> we have the still more general word  $\pi d\theta os$ ; in Ro 1<sup>27</sup> Spects, a strong word, but capable of a good or a bad sense; and in Ja 4<sup>1-3</sup> noorn, in itself no more than ' pleasure."

In his Com. on 2 P 14, Thomas Adams says, ' Lust, concupiscence in itself, as it is a faculty of the soul, and gift of God, is not sin; but may be the hand of virtue, or the instrument whereby she works. Keep her at home, and set her on work, to light the candle, and sweep the house; let her be under the correction of grace, and she may prove a chaste virgin, fit to meet the Bridegroom Lust is in itself as they write of at his coming. the planet Mercury in the horoscope of man's nativity; if it be joined with a good planet it makes it better; if with a bad one, it makes it worse. There is a lusting of the Spirit; for "the Spirit lusteth against the flesh," Gal  $5^{17}$ . But it

\* Sir John Cheke, however (1550), in his preference for Saxon words, chose 'is moond.'

LUST

is most commonly taken in the worse sense.' And he proceeds to say that, taken in the worse sense, it may be either 'a particular effect of that grand beldam concupiscence,' *i.e.* uncleanness; or stand 'for the whole general corruption of our nature, prone to all sin.' And on the same verse he comments: 'Ambrose saith of Samson, he could choke a lion, not his lust. Another of Hercules—

Lenam non potuit, potuit superare lemnam ; Quem fera non valuit vincere, vicit Hera,

He found the lioness weaker than his lust, and no beast so savage as his harlot.' Whittingham's New Test. of 1557 is distinguished from all other versions by translating Jn 1<sup>13</sup> 'Which are borne not of bloud, nor of the lust of the fleshe, nor of the lust of man, but of God.' The word is no doubt used in the indifferent sense of desire. Cf. Tindale's renderings of Gn 3<sup>16</sup>. 'And thy lustes shall pertayne unto thy husbond, and he shall rule the'; 19<sup>5</sup> 'Bringe them out unto us that we may do oure lust with them'; 27<sup>46</sup> 'Yf Iacob take a wife of the doughters of Heth, soch one as these are, or of the doughters of the lande, what lust shuld I have to lyve.' But the difference between the old and the new use of the word is more clearly seen in his tr. of Nu 14<sup>8</sup> 'Yf the Lorde have lust to us, he will bring us in to this londe'; or of He 10<sup>6</sup> 'In sacrifices and synneofferynges thou hast no lust'; or in Coverdale's tr. of Is 53<sup>2</sup> 'When we loke upon him, there shal be no fayrnesse: we shal have no lust unto him.' Again, in his 'Parable-of the Wicked Mammon' (Works, i. 115) Tindale translates Mt 5<sup>6</sup> 'Blessed are they which hunger and thirst for righteousness' sake (that is, to fulfil the law), for their lust shall be fulfilled'; and still more striking is the use in *Expositions*, p. 168, 'God hath no rod in his hand, nor looketh sour, but merrily,

Lusty, meaning stout and vigorous, is perhaps still in good use. It occurs in AV but once, Jg  $3^{29}$ 'all lusty, and all men of valour.' Heb. 157 is originally 'fat,' as AVm, and some take the meaning here to be 'wealthy,' but AV is better.\* Cf. Ps 73<sup>4</sup> 103<sup>5</sup> [Pr. Bk.] and As You Like It, II. iii. 47—

Though I look old, yet am I strong and lusty; For in my youth I never did apply Hot and rebellious liquors in my blood.

J. HASTINGS.

\* RV adds Is 5910 'among them that are lusty we are as dead men.' for AV 'we are in desolate places as dead men.' The passage is difficult, perhaps corrupt.

LUZ (τ) 'almond' or 'bone'; Ούλαμμαός Gn 23<sup>19</sup>, Λοῦζα 35<sup>6</sup> etc.; Sam. τη, Luzah Gn 28<sup>19</sup> 48<sup>3</sup>).-1. An old Canaanite city, afterwards known as Bethel, Gn 28<sup>19</sup> 35<sup>5</sup> 48<sup>3</sup>, Jos 18<sup>13</sup> (P or R), Jos 16<sup>2</sup> (E), Jg 1<sup>23</sup>. See art. BETHEL. 2. A place in 'the land of the Hittitas' founded by a man of Bethel, Jg 1<sup>26</sup>. The Hittites,' founded by a man of Bethel, Jg 126. mention of the ancient name of Bethel in P is in accordance with the writer's fordness for such archaeological details; cf. Gn 23<sup>4</sup> 35<sup>37</sup>, Jos 15<sup>54</sup> 21<sup>11</sup> (Kiriath-arba), Gn 35<sup>19</sup> 48<sup>7</sup> (Ephrath). The meaning of Luz is 'almond,' Gn 30<sup>38</sup>, as in Arabic; hence in the Talmud the mystical characteristics of the almond are ascribed to Luz, see art. BETHEL, vol. i. p. 277 and n. Another meaning is 'bone'; in particular, a bone of the spine. So in the Midrash Beresh. Rabba, § 28, fol. 31b, lúz is the bone of the spine out of which man is to be re-fashioned in the world to come; similarly Mezora, § 18, fol. 14b, Mid-rash Koheleth, fol. 24a. Levy, NHWB, s.v., takes this meaning as secondary, 'a bone shaped like an almond'; but Lagarde (Bildung d. Nomina, p. 157 f. n.) prefers 'bone' as the original meaning, and sup-poses that the place was called *Luz* from its resem-blance to a backbone. Identifications have been suggested for the Luz in 'the land of the Hittites,' e.g. Lizan in Kurdistan (see Neubauer, Géogr. du where in Cœle-Syria or the Lebanon.

G. A. COOKE.

LYCAONIA (Auxaovia), the land of the Lycaones, was a large country in the centre and south of the great plateau of Asia Minor. It is almost entirely a vast level plain, in the centre of which, like an island in the sea, the lofty Kara-Dagh has been thrown up by volcanic action. On the edge of Kara-Dagh are the remarkable ruins called Bin-Bir-Kilisse (Thousand and One Churches), probably the site of the ancient Barata. The great Lycaonian plain is merged on the north and east in the plains of Galatia and Cappadocia; on the west and south it is limited by hills. The soil has little value except for pasturage; but the immense flocks which grazed on it were a source of revenue to king Amyntas (Strabo, p. 568), and are still a feature that strikes the travellers. Many of the wells supply a brackish water, unfit for human use, but said to have a good effect on the wool of sheep, which drink it freely.

Lycaonia was bounded on the north by Galatia proper, on the west by Phrygia and Pisidia, on the south by the mountainous country that stretches back to the great ridge of Mount Taurus (a country generally summed up in earlier time as Cilicia Tracheia, of which Isauria was part, and in later time as Isauria in its wider acceptation), and on the east by Cappadocia. The exact boundaries varied at different times. On the north a large district, which had originally been part of Lycaonia, was at some uncertain date (perhaps about B.C. 164, see GALATIA, vol. ii. p. 83; Stud. Bibl. iv. p. 46 ft.) transferred to Galatia as one of the twelve tetrarchies into which that state was divided (Pliny, Nat. Hist. v. 95); this district contained fourteen cities, of which Iconium was politieally the capital (though ethnographically and in the feeling of its inhabitants it was a Phrygian city).\* The fact that Iconium was the

# LYCAONIA

last city of Phrygia towards Lycaonia (Xen. Anab. i. 2. 19), and that the frontier must have been in the hill-ridge fringing the vale of Lystra on the north, gives a fixed point in earlier time; but politically and in the estimation of external politically and in the estimation of external nations Iconium regularly, and even Laodicea Combusta, and sometimes Tyriaion, were reckoned to Lycaonia. The hilly country west of Iconium was added to Lycaonia when it was constituted a province of the Empire in A.D. 372; but previ-ously that country was Pisidian. The southern boundary ran through the hilly country between Lystra and Isaura (Zengibar Kalessi) and south of Laranda (Karaman). On the east the limit massed Lycaonia towards Cappadocia on the east and the related Galatia on the north.<sup>8</sup>

Lycaonia was part of the great Seleucid Empire until B.C. 190. Thereafter it was assigned to the Pergamenian kingdom (Livy, xxxvii.); it was so remote that there is little probability that the sovereignty could ever have been made a reality.† The northern part was probably seized by the Gauls. The southern part, after being probably disputed between native and Galatian chiefs, was overrun by Aquillius to Cappadocia in 129, temporarily overrun by Pontus in 74, and finally set free by Pompey's victories over Mithridates. At the settlement of the East by Pompey in 64, Lycaonia seems to have been divided into three parts : the north was added to Galatia (Ptol. v. 4, 10) ; the southeast to Cappadocia, forming an eleventh strategia of that country ; the west was attached to the Roman Empire, and administered by the governor of Cilicia. The Romans evidently retained a right of way through eastern Lycaonia, for the only practicable road for an army between Iconium the Lycaonian capital and Tarsus the Cilician metropolis passed across it by Kybistra and the Cilician Gates; and Cicero's movements during his governorship of Cilicia show that he could go back and forward at will, and yet that Kybistra was part of Cappadocia. Thus Cicero was brought into close and friendly relations with the Cappadocian royal family, which was practically dependent on Rome, and half subject to it.

The eastern part of Lycaonia long continued subject, at least in name, to the weak Cappadocian rule; but Antipater of Derbe, a friend of Cicero, profited by the troubles of the Civil Wars to make himself an independent chief; and Laranda also was perhaps subject to him (see DERBE). Antony gave the western part (certainly including Lystra and Iconium) § to king Polemon in B.C. 39; but in 36 it was transferred to Amyntas, king of Pisidia, who also received all Galatia proper. Amyntas conquered also Derbe and Laranda, which then Amyntas' kingdom was made into the province Galatia in B.C. 25. Roman soldiers from Laranda were serving in the seventh legion not long after

'Laines aurarrissi. The other thirteen cities of the Tetrarchy were Savatra or Soatra, and the towns on the west side of Lake Tatta, probably Laodicea and Lystra, but not Derbe (which was in the eleventh Strategia, attached to Cappadocia; see below and Strab. p. 569).
'Pility, Nat. Hist. v. 95, Ipsius Lycaonics... Hyde in confinio Galatics atque Cappadocias.
I Especially as Fisidian Antioch was free (see Arrioch).
1 See Strabo, pp. 535, 537, 569; Hamsay, Histor. Geogr. of Asia Min. pp. 5361, 310n., 369. It included Derbe (Strabo, p. 559), but certainly not Lystra.
J Lycaonia is not formally mentioned in this transaction; but it is evidently summed up at this time under the general title of Cikicia, for Strabo, p. 569, mentions that Iconium was ruled by Polemon, while Polemon's kingdom is described simply as awer w KLAssier by Appian, Bell. Cis. v. 75, and it was owing to this connexion that Iconium is several times called a city of Cilicia (see Icostura).

this (Corp. Inscr. Lat. iii. 2709, 2818). In A.D. 37 eastern Lycaonia was placed under Antiochus of Commagene along with most of Cilicia Tracheia, and acquired the name Lycaonia Antiochiana or (χώρα) 'Arτιοχιαrή, which is applied to it by Ptolemy, v. 6. 17, in a Latin inscription, Corpus, x. 8660, and probably in a Greek inscription.<sup>•</sup> In 41 Claudius confirmed this arrangement. It is prob-Claudius connrnied this arrangement. It is prob-able that Laranda was at this time reunited to eastern Lycaonia, for the policy of Antiochus (a far more active king than the Cappadocian monarchs) was carried out along lines of road radiating from Laranda; + and his coins reading ATKAONEC were certainly struck at an important city, and Laranda is the only important Lycaonian city that could be within his kingdom. Ptolemy, indeed, mentions even Derbe in Antiochiana ; but the name Claudio-Derbe (like Claud-Iconium) proves that it was in the province under Claudiue (A.D. 41-54), and Ptolemy has probably fallen into error owing to the fact that Derbe had been originally attached to the eastern or Cappadocian half of Lycaonia at the settlement of Pompey in B.C. 64.

Under Claudius and Nero, when St. Paul visited the churches of South Galatia, Lycaonia included the two parts, the Roman and the Antiochian. The former contained two cities, Lystra and Derbe, and a number of villages and small towns, chiefly towards the north-east, and it is correctly de-scribed (Ac 14<sup>6</sup>) as 'the cities of Lycaonia, Lystra and Derbe, and the region round about'; in other words, the apostles, when driven out of Iconium, crossed the frontier of Phrygia into Roman Lycaonia. Moreover, the regions of which the vast province Galatia was composed (see vol. ii. p. 87) were called  $\chi_{\alpha\rho\alpha}$ , 'Territories'; and, as we have seen, the part of Lycaonia not governed by the Romans was called the Antiochian Territory, or Lycaonia Antiochians.<sup>1</sup> In distinction therefrom the Roman part would naturally be called by an adjective derived from the provincial name (for a country became part of the Roman Empire in virtue of being included in a province), i.e. it would be styled either the Galatic Territory (Ac 18<sup>33</sup>) or Lycaonia Galatica, a name which does not occur, but is proved by the similar names Galatic Pontus (as distinguished from Polemoniac Pontus, ruled by king Polemon) and Galatic Phrygia (as distinguished from Asian Phrygia in the province Asia). In place of the bare title  $\Lambda \nu \kappa a \sigma \iota a \tau \tau \tau \eta \tau$  $\Gamma a \lambda a \tau \iota \tau \eta \tau$ , the more descriptive and complete appellation τας πόλεις της Αυκαονίας, Λύστραν καl Δέρβην, καl την περίχωρον is used in Ac 14<sup>6</sup>; and this is practically equivalent to την Γαλατικήν χώραν τής Λυκαονίας, έχουσαν τὰς πόλεις Λύστραν και Δέρβην και περικειμένας κώμας. In Ac  $16^{1-4}$  this Territory is not formally named, but merely its two cities are mentioned in succession. In Ac 1823 the expression The Falatishe  $\chi \omega \rho ar$  sal  $\Phi \rho \nu \gamma l ar$  is explained by Asterius§ (bishop of Amaseia in Pontus in A.D.

401) as την Αυκαονίαν και τας της Φρυγίας πόλεις. Both parts of Lycaonia were included in the united province of Cappadocia-Galatia under the Flavian emperors. When they were again divided about 106 by Trajan, it is probable that eastern Lycaonia continued to be connected with Cappadocia. But about A.D. 137 a new province was formed, commonly called the Triple Eparchy, con-

\* Fränkel, Inschriften Pergam. ii. 451, about A.D. 90, Aproving [Aumanias 'Avviozias, where Fränkel wrongly restores [Herdans 'Avviozias, understanding that the district round Pisidian Antioch was under a special administration. But that was not so, and Antioch is included in the preceding term \$pryms. 'Avviozias is here equivalent to 'Avvioziavis' (Zipast). † On his foundations see Ramsay in Revus Nurnismat. 1894, 1894.

LYCIA

sisting of Cilicia, Lycaonia, and Isauria. The Lycaonian cities were formed into a union called Kardor Auxaorias, meeting in the worship of the Emperors: the cities composing it struck coins in the name of the Koinon. If Ptolemy is correct, neither Lystra nor Iconium was included in the Triple Eparchy, but both continued to be in Galatia; and, certainly, neither struck coins as member of the Koinon. Derbe, on the other hand, was a member of the Koinon and included in the Triple Eparchy.

The name of the Lycaonians ( $\Lambda v \kappa dores$ ) is not used in the Bible, but the adverb  $\Lambda v \kappa a o r \sigma \tau i$ , 'in the speech of the Lycaonians,' occurs in Ac 14<sup>11</sup> (see LYSTRA). While the villages and small towns probably retained the native language and manners of Lycaonia, the cities such as iconium and Derbe were likely to have been Greeized between A.D. 334 and 190, and probably had a Seleucid tone in municipal law and customs (see Ramsay, *Historical* Comm. on Galatians, 1899).

A Jewish element was likely to spread in Lycaonia while it formed part of the Seleucid Enpire (see LAODICEA); on the traces of it see GALATIA, vol. ii. p. 88, and ICONIUM. A strong Christian influence is perceptible in the epigraphy of Western and Northern Lycaonia (v. *ibidem*).

Another people called the Inner Lycaones ( $\Lambda \nu \kappa$ dores  $\pi \rho \delta s$   $\delta \nu \delta \sigma r$ ), who lived in Phrygia, must be distinguished. It was probably this Phrygian people to whom Bartholomew went as an apostle. Their country was probably Cutchuk Sitchanli Ova, north from Sandykli Ova. Their history is treated in *Cities and Bishops of Phrygia*, pt. ii. pp. 664, 693 ff.

LITERATURE.-Lycaonia is treated by Ramsay, Hist. Geog. of Asia Minor, pp. 350-346, 850, 355, 857-360 (in that work, sect. 17 on Castahala should be deleted; there was no Castahala morth of Taurus), and better in Hist. Com. on Galatians. Many Lycaonian inscriptions are given by Sterrett (who discovered Lystra, and approximately located Derbe) in his Wolfe Expedition to Asia Minor. See also the admirable Hamilton and other travellers. W. M. RAMSAY.

LYCIA ( $\Lambda vs(a)$ ) was the country that occupied the sonth-eastern part of Asia Minor. Though it is a land that presents great interest, as regards antiquities, and history, and physical features, yet it is of singularly little importance in the story of early Christianity.

The country consists to a great extent of lofty mountain masses, rising in many parts, especially in the eastern half, almost direct from the sea-But in the fertile valleys of the Xanthos shore. and other smaller streams, which break the mountains, or at their mouths, were situated many great cities, such as Patara, Ac 2<sup>1</sup> (a famous seat of the worship of Apollo), and Myra of Lycia, Ac 27<sup>3</sup>\* (whose important harbour was a common starting-point or finish of the run across sea be-tween Alexandria and the Asia Minor coast). The number of separate glens, by which Lycia is broken up, prevented it from ever becoming a powerful country. It derived its unity only from foreign conquest. It was ruled by the Persians, and con-quered by Alexander the Great; it formed part of the Seleucid Empire, and was disputed between the Seleucid and Ptolemaic kings; it was taken from Antiochus the Great by the Romans in B.C. 188 and given at first to Rhodes, but soon afterwards in 168 it was set free, and for many years it was very prosperous. It is mentioned as one of the self-governing states to which the Romans sent letters in favour of the Jews in B.C. 138-7, 1 Mac 15<sup>23</sup> (see CARIA, DELOS). This implies that there were Jewish residents; and the ships carrying pilgrims to and from Jerusalem would touch at Lycian harbours. The numerous cities \* Myra is mentioned also in the Bezan text of Ac 211.

### LYDIA

of Lycia were united in an association called  $\tau i$ Avkack'  $\Sigma \delta \sigma \tau \eta \mu a$ . Nearly 100 places in Lycia are known to have struck coins, and Pliny, Nat. Hist. v. 28, says there were formerly 70 cities, and in his time only 36; but only 23 had votes in the Assembly, called  $\tau \delta$  kould  $\sigma \delta \sigma \sigma \sigma \delta \delta \sigma \sigma \sigma \sigma \delta \delta \sigma \sigma$  (six cities of the first rank had three votes each, those of the second class two votes, of the third one). In reward for their fidelity to Rome in the Mithridatic war, the freedom of the Lycians was confirmed by Sulla. They suffered exactions occasionally, especially from Cassius in D.C. 43; but their freedom was again confirmed by Antony. Lycia was formed into a Roman province by Claudius in A.D. 43 on account of the dissensions between the cities; and in 74 was formed into a double province along with Pamphylia (see Mommsen on *Corp. Inser. Latin.* III. Suppl. No. 6737). From 43 onwards the governor was a prætorian *legatus* Augusti pro prætore; and the old Systema was transformed into a union called Kardor Auxior, meeting in the worship of the Emperors under the presidency of a Lykiarch.

Christianity does not appear to have spread very rapidly in Lycia; and perhaps to this is due the petition against the Christians addressed by the joint province to the Emperor Maximin in A.D. 312 (similar to many petitions from cities of the Empire, replies to which were returned in identical terms, quoted by Eusebius, *Hist. Eccles.* ix. 7). Part of the petition, with a scrap of Maximin's reply, has been found at Arykanda, and is published by Mommsen in *Arch. Epigr. Mittheil. aus Œst.* 1893, p. 93 ff.

An important Jewish inscription of Tlos in Lycia is published in Eranos Vindobonensis, p. 99.

LITERATURE.—See the series of Austrian publications, the result of numerous recent Austrian explorations and excavations, especially Benndorf-Niemann, Lykia, in two folio vols., Heberdey, Opramoes, etc.: also Finder-Friedländer, Beiträge zur ält. Münzkunde, i. 93-122; Hill, Catalogue of the Coins of Lycia, etc.; Fougéres, de communi Lyciorum; Marquardt, Röm. Stauleatt. i. 375 fl.; and the older travellers, especially Fellows and Spratt. W. M. RAMSAY.

#### LYDDA.-See LOD.

LYDIA ( $\Lambda v \delta i a$ ).—A purple-seller from Thyatira (Ac 16<sup>14.15.40</sup>). It is probable that Lydia was her proper name, as we know that it was a name commonly borne by women (Hor. Od. i. 8, iii. 9, vi. 20); but (see p. 177<sup>b</sup>) it may have been a designation derived from the district of Lydia, in which Thyatira was situated. The account of Lydia's occupation is confirmed by what we learn from other sources of the purple dyes of this district (cf. Hom. *H.* iv. 141; Claud. *Rapt. Proserp.* i. 270); and the whole incident in Acts points to her having been a woman of some position and means (cf. Ramsay, *St. Paul the Traveller*, p. 214). She had made her home apparently at Philippi, and, having become a Jewish proselyte, was in the habit of resorting to a place of prayer which was located by a riverside, according to a common practice among the Jews for the facility of the frequent ablutions which their worship required (Farrar, *St. Paul*, i. p. 487). There she was found along with certain other women by St. Paul and his companions on their first Sabbath in Philippi; and in her, at any rate, the apostle found a ready listener. The Lord opened her heart, and along with her 'household' she was baptized, the first Christian convert, so far as we know, whom St. Paul made in Europe. (For the significance of her conversion, taken in connexion with those subsequently mentioned in this chap., see Lightfoot, *Philipp*. p. 52 ff.). Lydia's gratitude showed itself in the eager desire ( $\pi apc \beta i d \sigma aro, v.^{15}$ , cf. Lk 24<sup>29</sup>) that the apostle and his companions should take

LYDIA

up their abode in her house; and it was thither (v.<sup>40</sup>). To the Church which grew out of this little company St. Paul afterwards addressed the most jubilant of all his Epistles; though the fact that Lydia herself is not mentioned in it by name makes it probable that she had either died or left Philippi in the interval. G. MILLIGAN.

LYDIA (Audia).—A large country on the west of Asia Minor, bounded on the north by Mysia (called in later times Hellespontus), on the east by Phrygia, on the south by Caria, and on the west by the Ægean Sea. It contained the valleys of the Cayster, the lower Hermus with its tributary the Cogamos, and the Caicus, also as much of the lower Mæander valley as lay north of that river. Several of the great Ionian cities, Smyrna, Colo-phon, Ephesus, etc., were situated on its western coast. The ancient Lydian kingdom, once great and powerful, was conquered by the Persians about 546.\* It passed under the rule of Alexander the Great in 334; and it was disputed by his successors after his death, especially between the Perga-menian and Seleucid kings, until the victory of the allied Roman and Pergamenian armies in B.C. 190 near Magnesia, in the Hermus valley, brought it entirely into the Pergamenian kingdom of Eunenes (as is mentioned in 1 Mac 8<sup>8</sup>). In B.C. 133 Lydia, according to the will of Attalus III., the last Pergamenian king, passed into the Roman Empire, and formed part of the province Asia. The name Lydia henceforth had no political, but only a geographical, ethnological, and antiquarian exist-ence. The generic name Asia alone was employed by the Romans; and Lydia was merged in that great province, which embraced also Caria, Mysia, and Phrygia. Geographers and historians wrote about Lydia; coins (e.g. of Tralleis and Kidramos) and inscriptions (e.g. CIG 5852, 5984, 6855d) mention facts of old Lydian religion or mytho-logy; but those who had regard to existing facts of society and government had no reason to use the name.

The avoidance of the name Lydia in the NT to designate the country, though the action often lies in its cities, is due to the fact that the early Church accepted from the first the Roman political divisions (i.e. the provinces), and classified accord-ingly. St. Paul, St. John, and St. Peter always peak of the Roman provinces Achaia, Macedonia, Illyricum, Asia, etc. † So does St. Luke, except that he sometimes uses the Greek instead of the Roman name for each province in the cases where there was a difference, as Hellas for Achaia, Ac 20<sup>o</sup>. Hence Ephesus, Smyrna, Sardis, etc., are summed up, not as 'cities of Lydia,' but as 'cities of Asia.

It has, however, been maintained recently by Blass (Acta Apostolor. p. 176) and Zahn (Einlei-tung in d. NT, i. p. 132) that Luke uses the name bein to indicate only the matter and the Asia to indicate only the western part of the province. According to Zahn, Luke's Asia is province. restricted to Lydia, excluding Caria, Phrygia, and Mysia (which were all included in the Roman province Asia). Blass maintains that Luke's Asia included Mysia, Lydia, and Caria, and excluded only Phrygia: the province had that extent from 133 to 84 B.C., and Ramsay, *Church in Rom. Emp.* p. 150, wrongly admitted that sense in Ac 2<sup>9</sup>. But there is no example of the name Asia being used in

\* Lydia in Ezk 30<sup>5</sup> AV is corrected to Lud in RV. See Lun. † Scholars who hold the North-Galatian theory maintain that in the single case of Galatia St. Paul made an exception to his usual practice, and used that name to indicate, not the Roman province, but the country inhabited by the Asiatic Gaula. ; He does not state his view about Caria explicitly; some of his words would place the Carian coast-lands in Asia, and exclude upper Caria; others would exclude all Caria. VOI. 111.-112

VOL. 111.-12

either of these senses at this time.\* Towards A.D. 295 the province Asia was restricted to the country Lydia, and thereafter Asia bore the meaning which Zahn attributes to it in Luke's writings. But in earlier writers Asia has only two senses: (1) the entire continent, (2) the Roman province distin-guished by Ptolemy as  $\eta' A \sigma ia \, l \delta i \omega s \lambda \epsilon \gamma o \mu \epsilon \tau \eta$ . Some Greek antiquaries, indeed, maintained that Lydia had once, in very early times, been called Asia; but this was a mere theory; not a single example can be quoted in its favour; and, according to Strabo (p. 627), these antiquaries qualified their theory with a 'perhaps' ( $\tau \alpha \chi \alpha \gamma \delta \rho \dot{\eta}$  Myor( $\alpha' A \sigma la \epsilon \lambda \epsilon \gamma \epsilon r \sigma$ ). There appears in Aristides about A.D. 150 a single example (to which no parallel is known) of a third sense, in which, by popular conversational usage, the name Asia is restricted to the greatest and most civilized part of the province, i.e. Asia par excellence ; but even in this narrow sense it includes a considerable part of Phrygia, the Mæander valley from its source, with the rich and important cities, Apameia, Eumeneia, Laodicea, Hierapolis Citles, Apameia, Lumeneia, Laoutea, metapons ( $\lambda \dot{\epsilon} \gamma \omega \delta \dot{\epsilon}$ (1) oùxì từp μέχρι Madarδρου πηγῶν [Asia par excellence], † (2) oùð' δσην ở τῶν ήγεμόνων ὑμῶν κλῆρος όρἰζεται [province], (3) dλλ' ήν ἐξ ἀρχῆs ol ἘΒληνες προσείπον 'Aσίar [continent], xxii. p. 475 C, Dind. vol. i. p. 441), so that it justifies neither Zahn nor Blass. Moreover, it would be unjustifiable to suppose that Luke uses the term in a sense which is not found before Aristides, and is in him indi-cated as a mere conversational expression. Again, in the letter of the Church of Lugudunum, addressed rois  $e\pi$ . Agias sal  $\Phi pvy(as d\delta e \lambda \phi o is$  (initiated by Tertullian, adv. Praz. 1, ecclesiis Asizet Phrygiz), we are not to understand a formal distinction between Asia and Phrygia, as two nutually exclusive divisions. Phrygia was divided between the provinces Asia and Galatia; and Galatic Phrygia, with the Churches of Iconium, Antioch, Apollonia, etc., was closely connected with Asian Phrygia, and is classed along with it as a recipient of the Lugudunensian letter. The name ' $A\sigma la$ occurs very often in inscriptions and coins, both within and beyond the province: usually it means the province, sometimes it has a wider sense (e.g. CIG 5127, 5913, a coin of Nicomedia boasting itself πρώτη 'Aσías), never a narrower sense. It is used in many inscriptions of Phrygia to include that country, in such cities as Apameia, Laodicea, Eumeneia, etc. (*Cit. and Bish. of Phr.*, No. 8, 292; *CIG* 3957, 39022, etc.). The ordinary usage of the mod Act is in the province is how and don't

word ' $A\sigma ia$  in the province is beyond doubt. The feminine of the adj. Lydian ( $Av\delta ia$ ) probably occurs in Ac 16<sup>14, 40</sup>. The Thyatiran hostess of the apostle in Philippi was familiarly known in the town by the ethnic that showed her origin. To every one who considers how common the custom was of using a familiar name (a nickname over) in where of the formal name this cuickname even) in place of the formal name, this opinion will seem practically certain. Even in honorary inscriptions, and on the bases of statues, the familiar name is often added to the formal name, and is sometimes even expressed in a line by itself and in larger letters, to bring home to the minds of citizens their peculiar and intimate relations to the person honoured. But apparently Paul, who is more formal and distantly courteous than Luke

\* Blass quotes Pliny (*Hist. Nat.* v. xxviii, 102) as an example of the sense which he advocates for Asia, but the passage does not justify him, see Studia Biblica, iv. p. 451. Zahn quotes it as supporting himself, equally unjustifiably. † This is much the same as i sairs 'Aris (Pausan, I. iv. 6; Irensous, ap. Euseb. *HE* v. xx. 5), i.e. lower Asia as distinguished from upper Asia (compare i irvis voi Taires 'Aris, Cis-Tauran Asia, as distinguished from Trans-Tauran, a common phrase); but such expressions imply one part taken out of the whole. ; See Marquardt, *Röm. Privatalt.* p. 27; Borghesi, *Euvres*, iii. p. 503 fl.; Orelli-Henzen, No. 0252; Examples in Asia Minor, Sterrett, Wolfe Exped. No. 419 (where read gen. or dat., not accus.); Ramsay, Amer. Journ. Arch. 1838, p. 283.

## LYSTRA

in his allusions to individuals, uses the formal personal name (possibly either Euodias or Syntyche, Ph 4<sup>3</sup>), just as he speaks of Silvanus (whom Luke calls Silas), and once of Prisca (Ro 16<sup>3</sup>, though he elsewhere, like Luke, employs the familiar diminu-tive Prisulle, the Paramety (*Hurshin Row Fam* tive Priscilla; see Ramsay, Church in Rom. Emp.

p. 151 f.). The wealth, the ancient renown, and the high civilization of Lydia (including the central Ionian cities), gave it a specially important influence on the development of Christianity during the first three centuries. The evangelization of Lydia dates from the long residence of St. Paul at Ephesus, Ac 19<sup>107</sup>. The aposte had aimed at evangelizing Asia on his second journey, but was forbidden to preach the word there. Accordingly, he did not touch Lydian soil till he landed at Ephesus while going back to Jerusalem from his second journey (Ac 18<sup>20</sup>), when he made a promise to return shortly. On this subject see the special articles PERGAMUS, SMYRNA, EPHESUS, SARDIS, THYATIRA, Philadelphia. W. M. Ramsay. PHILADELPHIA.

LYE (Jer 22 RV).-See NITRE.

LYING.-See LIE.

LYSANIAS.—The L. mentioned in Lk 3<sup>1</sup> as being tetrarch of Abilene at the beginning of John the Baptist's ministry is not expressly mentioned elsewhere. Jos. (Ant. XV. iv. 1, and BJ J. xiii. 1) relates that Lysanias succeeded to the government Mennæus, and was killed by Antony at the in-stigation of Cleopatra, on the charge of being in league with the Parthians. This was about B.C. 34. In A.D. 42 (Jos. BJ II. xi. 5) the emperor Claudius bestowed on Agrippa, besides the terri-Claudius bestowed on Agrippa, besides the terri-tories given by Augustus to Herod, another king-dom, called that of L. (see also *BJ* II. xii. 8). In *Ant.* XIX. v. 1, Abila of Lysanias is said to have been given by Claudius to Agrippa, and in *Ant.* XX. vii. 1 occur the words ' $A\beta i\lambda a$ , *Ausaria δè altry yerjoret rerpapyla.* St. Luke has been accused of *incomparent interime* that the wintim of Arton inaccuracy in stating that the victim of Antony was tetrarch of Abilene some sixty years after his death. The facts may, however, be set forth as follows:—On the murder of L. the son of Ptolemy, his 'house' (Ant. XV. X. 1), was farmed by Zenodorus, and after the latter's death was given by Augustus to Herod (Ant. xv. x. 3) B.C. 23. Abila is not mentioned among the districts that passed to the latter, and is, in fact, expressly distinguished from the possessions of Herod (Ant. XIX. v. 1). It may well be that Augustus gave this town, with its neighbouring district Abilene, to Lysanias, a descendant of the former possessor. He is known to have acted in a similar way, in at least one instance, when Jamblichus was restored to his father's dominion of Emesa in Parthia, the latter having been killed by Antony. Abila was afterwards called A. of L., and was given by the emperor Claudius to Herod Agrippa I. The title A. of L. seems to point to a restoration of a part of the kingdom of L. to a namesake (probably a descendant) of the original ruler under the name of tetrarch. In defence of this view it may be noticed that the original L. only reigned about five noticed that the original L. only reigned about hve years, scarcely long enough for his name to attach to the district in perpetuity. Again, a medal was found by Pococke in the 17th cent., alluding to a L., found by Pococke in the 17 in cent., alluting to a L., both tetrarch and high priest, who could not have been identical with the king. Two inscriptions, also, of the time of Tiberius prove that there was a tetrarch L., a freedman of whom executed some work to which one inscription refers, while the other implies from the mention of L's sons that the tetrarch was a descendant of the king. L.

was, no doubt, a family name attached to the district of Abilene. The L. mentioned in Lk 3<sup>1</sup> was probably a descendant, possibly a son of the L. killed by Antony, and may have been identical with, or the father of, the L. in the time of Claudius.

LITERATURE.-Godet on I.k 3<sup>1</sup>; S. Davidson, *Introd. to NT*, i. 214-220; Schürer, *HJP* 1. ii. 335-339, and literature there referred to. C. H. PRICHARD.

LYSIAS (Avolas). -- 1. A Syrian general. After the victory of Judas Maccabeus at Bethhoron (B.C. 166), Antiochus Epiphanes, in departing for Persia, appointed 'Lysias, an honourable man, and one of the seed royal, to be over the affairs of the king from the river Euphrates unto the borders of Egypt, and to bring up his son Antiochus until he came again' (1 Mac 3<sup>322</sup>.).\* His orders were to carry on a war of extermination against the Jews  $(v.^{361})$ . In fulfilment of this commission, Lysias assembled a great army, which was placed under the command of three generals, Ptolemy, Nicanor, and Gorgias. Gorgias (or, according to 2 Mac 3<sup>107</sup>, Nicanor) was defeated by Judas at Emmaus (1 Mac Attained by basis of the set of the youthful Antiochus Eupator (wh. see) prose-cuted the war against the Jews, captured Bethsura, and was besieging Jerusalem, when he had to turn his attention to a rival in the person of Philip, In automotion to a rivar in the person of minp, another of the generals of Epiphanes, to whom the latter, before his death, had transferred the care of his son (1 Mac  $6^{146}$ ). Although he defeated Philip (1 Mac  $6^{63}$ ), he was unable to maintain the cause of the youthful king against another claimant to the theory of the person of the person of the set of to the throne, a nephew of Epiphanes, who afterwards reigned under the title of Demetrius Soter (wh. see). Both Lysias and Eupator, having fallen into the hands of the latter (B.C. 162), were by his orders put to death (1 Mac  $7^{2-4}$ , 2 Mac 14<sup>2</sup>, Jos. Ant. XII. x. 1).

2. See CLAUDIUS LYSIAS. J. A. SELBIR.

LYSIMACHUS (Avoiµaxos). -1. L., the son of Ptolemy, of Jerus, is named in the subscription to the Greek edition of Esther (Ad. Est 11<sup>1</sup>) as the translator of that book into Greek. This statement may imply that the additional sections, for which no Heb. original existed, are also to be ascribed to Lysimachus. We are told that the tr. was brought to Egypt in the 4th year of Ptolemy and Cleopatra; but as four Ptolemies had wives named Cleopatra, this information gives hardly

handle Cleoparta, this into inactor gives hardly any clue to the date. 2. The brother of the high-priest Menelaus, whom he left as his deputy ( $\delta(a\delta\delta\phi_{cos})$  in Jerus. when summoned to appear before Antiochus (2 Mac 4<sup>20</sup>). L. excited the hatred of the populace by his systematic plundering of the temple treasures; and seeing that an insurrection was imminent, he took the precaution of arming 3000 men, and letting them loose upon the people. Many were injured in the riot which took place, and L. him-self was killed beside the treasury  $(i\delta, 4^{26-43})$ .

H. A. WHITE.

LYSTRA was founded as a Roman Colony by Augustus, probably about B.C. 6, when an effort was made to tame and regulate the mountain tribes on the southern frontier of the province Galatia by a system of military roads and garrison cities (Antioch, Lystra, Parlais, Cremna, Comama, Olbasa). These colonies all used the Latin language officially, a rare and noteworthy fact in the eastern

<sup>•</sup> Cf. 2 Mac 10<sup>11</sup> 11<sup>167</sup>, where, however, the order of events is less correctly given, the appointment of Lysias to be 'chan-cellor'and his defeat at Bethsura being placed under Eupator instead of Epiphanes.

LYSTRA

provinces, where, as a rule, Rome acquiesced in the use of Greek, and made no attempt to natur-The use of the Roman tongue implies alize Latin. that these colonies felt a special pride in their Roman character. Lystra was about 18 miles S.S.W. from Iconium, and a frontier line passed between them (see ICONIUM, LYCAONIA). It was between them (see ICONIUM, LYCAONIA). situated in a vale at the northern extremity of the hills which fringe the Lycaonian plain on the south, and which grow higher and higher as one proceeds south, till they rise to the main mass of Mount Taurus. A stream, which flows eastward between gentle hills through the smiling vale, about a mile in breadth, loses itself after some miles in the great plain. On the north of the miles in the great plain. On the north of the stream, about a mile north-west from the village of Khatyn Serai, is situated a hillock of consider-able extent, on which stood the fortified Colonia; but the buildings of the city certainly extended to east and south, over the lower ground at least, where a large basis bearing an inscription in honour of Augustus stands probably in its original position, and perhaps indicates the site of a sacred place, Augusteum, dedicated to the worship of the Emperor and of Rome. The city stood about 3780

r.mperor and of Rome. The city stood about 3780 ft. above sea-level, and about 430 ft. above Iconium. The history of Lystra is quite unknown; and even the fact that it was a Roman colony was unknown until 1885, when the inscription just mentioned was discovered by the American Sterrett, and Waddington published a coin with Latin legend of COLONIA · IULIA · FELIX · (jEMINA · LUSTRA (the Latin form Lustra in GEMINA · LUSTRA (the Latin form Lustra, instead of the Grecizing Lystra, is usual on coins and inscriptions). Leake guessed the site in 1820; Sterrett proved it in 1885, after intermediate travellers had rejected Leake's view.

Hardly any remains of the old city are now visible above ground. There is an Ayasma (as the Turks call a fountain held sacred by Christians,  $i\gamma i\alpha\sigma\mu a$ ) in the low ground south of the hill. Not a trace has been found of the temple of Zeus Propoleos, Ac 14<sup>13</sup>; but it is possible that the Augusteum was in the precinct of the temple; it the vary common to unite the variable of the temple of the temple in the provide the temple of the temple in the set of the temple in the set of the temple in the temple in the provide the temple of the temple in the provide the temple of the temple in the temple of the temple in the temple of the temple in the temple in the temple of the temple in the temple of temple of the temple of the temple of was very common to unite the worship of the Emperor to that of the chief god of a city. The Bezan reading, rou for a Lids mpd moleus, is perhaps the original Lukan text, and is certainly excellent. The epithet Propoleos was a sort of technical The epithet Propoleos was a sort of technical term, often given to gods whose temple stood out-side the city; and it is characteristic of Luke's style to use the participle  $\delta \nu$  (much in the same way as  $\kappa a \lambda o \delta \mu e r o s$ ) before a name or technical term; compare Ac 5<sup>17</sup> 13<sup>1</sup> 28<sup>17</sup>. No inscription has yet been found relating to the worship of this god; but the analogy of other great native *hisra* in Asia Minor\* makes it practically certain that Asia Minor \* makes it practically certain that there was a college of priests attached to it; hence the Bezan text lepeir is true to fact, though this reading is rejected by all editors, even including Blass, the special champion of the Western text. The sacrifice to Paul and Barnabas, in celebra-

tion of the Epiphany of the gods, Ac 14<sup>18</sup>, was probably made at the entrance to the sacrel precinct ( $\pi \nu \lambda \omega \nu$ ), and the apostles hearing of it as they were teaching in a public place in the city, ran forth and stopped it.

Lystra, standing in a retired situation some miles away from the high road, was not likely to par-ticipate strongly in the diffusion of Greek civilization, when Lycaonia was ruled by the Seleucid kings; but its neighbourhood to Iconium, the capital, would give it some opportunity of sharing in the Grecizing tendency which was such a power-

\* Good examples are found in inscriptions of Pessinus (Körte in Athen. Mittheil. 1897, pp. 10, 89) and of the Milyadic Zeus-Sabazios (Ramsay, Cities and Bishoprics of Phrygia, pt. i. p. 256)

LYSTRA

ful influence in the Seleucid and Pergamenian cities of Asia Minor. A town doubtless existed there before the Roman colony was founded; but it was only through that event that Lystra became important. The population of the colony would consist of (1) the Latin-speaking colonists, a local consists of (1) the Lathespeaking colonies, a local aristocracy of soldiers; (2) the native population  $(incol\alpha)$ , some of whom were doubtless educated in Greek, and strong supporters of the Roman imperial policy; while the majority were evidently uneducated, not well acquainted with Greek, but more naturally expressing themselves in the Lycaonian tongue, and much under the influence of the native superstition, Ac 14135.

While the presence of Jewish residents in Lystra is clear, Ac 16<sup>1</sup>, no synagogue is mentioned there; and the general tone of Ac  $14^{8+19}$  suggests surroundings more thoroughly pagan and less per-meated by Jewish influence than in Iconium and Pisidian Antioch. That is natural, for the Jews would be found most in cities which lay on the main trade road, and which had been important in Seleucid times (when the large settlements of Jews were formed).

When Paul at Lystra healed the lame man, in whom he discerned the signs of a capacity for faith, the multitude concluded that the two apostles were the gods Hermes and Zeus, who had visited the abodes of men according to a wide-spread ancient belief. The same two gods are The same two gods are mentioned in a legend, localized \* in these regions, as visiting the old couple, Philemon and Baucis, who lived on the Phrygian hills. But afterwards, when hostile Jews from Iconium and Pisidian Antioch came to Lystra (probably in pursuance of the trade which must have existed between those cities and Lystra), they exerted such influence on the weak and changeable superstition of the people that a riot was aroused, and Paul was stoned and thrown out of the city for dead. From 2 Ti  $3^{10, 11}$ it is clear that Timothy, son of a Jewess Eunice, wife of Closek and Paul was in the Lewish wife of a Greek, and brought up in the Jewish faith by his mother and his grandmother Lois, saw this occurrence. Certainly he was converted at this time, and doubtless helped to consolidate the newly founded Church in Lystra, which Paul revisited three times, Ac 14<sup>21</sup> 16<sup>1</sup> 18<sup>22</sup>.

In Ac 14<sup>6</sup> Lystra is named before Derbe, in 16<sup>1</sup> after it, corresponding to the geographical order necessitated by the direction of the journey in each case

The connexion between Colonia Lustra and its Roman metropolis Antioch, the military centre of Southern Galatia (which is well illustrated by the dedication of a statue of Concord at Antioch by Lystra, Sterrett, Wolfe Expedition in Asia Minor, p. 219), was maintained by an imperial road, which is called in the Acta Pauli et Theclæ βασιλική όδις, is called in the Acta Faun et Inscite parities parities over, 'the road made by the  $\beta_{arileis,i}$ ' i.e. the Roman emperor. According to that document (which goes back to a very early original, though much cor-rupted by interpolation), Paul, when expelled from Antioch, Ac 13<sup>50</sup>, went along the 'royal road' that leads south to Lystra until he came to a place where a cross read diverged exclusion to Lystra until the came to a place where a cross-road diverged eastwards to Iconium : here Onesiphorus of Iconium was waiting for him, being warned in a vision, and induced him to go to Iconium with him. †

Little is known about the post-biblical history

\* The name is corrupted in Ovid, Metam. viii. 719, our only authority. MSS. have trineius, fineius, thineyus, Ocineius, chineius, tirinthius, tyreneus, thyrneius, thineyus, Ocineius, chineius or Tyriaius, belonging to Tyriaion, though the editors almost all give the impossible Tyaneius. Tyana was not in Phrygia, and could not give an adi, of this form. † The term royal road, denoting imperial highways as distin-guished from common country roads, occurs also in an inscrip-tion of Termes.vos, Lanckorouski, Studte Pamphyliens, it. p. 203, and regalis via is mentioned at Colonia Contauus, Corp. Inser. Latin. iii. Suppl. No. 6074.

179

of Christianity in Lystra. Artemas, one of the Seventy disciples, is said to have been bishop there according to a late and untrustworthy tradition. Eustochius of Vasada settled at Lystra and was arrested there and carried to Ancyra, where he was executed. The tradition may be good, for it ONIA, ANTIOCH, ICONIUM. W. M. RAMSAY.

preserves the memory that Lystra was under Ancyra, the metropolis of the province Galatia, until about A.D. 295. Tiberius was bishop of

cal with Macch  $\frac{1}{100}$  of 1 S 2/2<sup>+</sup>; but as there is an interval of about fifty years between the events recorded in these two references, we may suppose that Macch was grandson of Macch. Jerome (Qu. Heb. on 2 S 10<sup>2</sup>) maintains the identity, but says that M. was mother of Achish. 2. One of David's wives, daughter of Talmai, king of Geshur, and mother of Absalom (2 S 3<sup>3</sup>, 1 Ch 3<sup>2</sup>). Jerome (Qu. Heb. on 2 S 12<sup>3</sup>) outputs a lawich tradition (Qu. Heb. on 2 S 13<sup>37</sup>) quotes a Jewish tradition that she had been captured in war by David, who used to raid the Geshurites while he was at Ziklag (18 27<sup>8</sup>). Possibly David's marriage with M. was the ratification of a treaty with her father. 3. Favourite wife of Rehoboam and mother of Abijam Favourite wife of Renoboarn and motioner of Autjam or Abijah (2 Ch 11<sup>20</sup>). Probably she was named after No. 2. In 1 K 15<sup>2-10</sup> she is called the daughter of Abishalom (Absalom, 2 Ch 11<sup>20, 21</sup>). But Absalom's only daughter was Tamar; accord-ingly the LXX of 2 S 14<sup>27</sup> adds of Tamar that 'she became wife of Rehoboam' ( $\gamma i \sigma rai \gamma v r h \tau \tilde{\psi}$  'Posodµ). This is followed by Josephus twice (Ant. VII. viii. 5, VII. x. 3). However, in 2 Ch 13<sup>2</sup> she appears as '**Micaiah**, the daughter of Uriel of Gibeah' (LXX '**Bicaiab**, the daughter of Uriel of Gibeah' (LXX and Syriac, Maacah). It is commonly supposed that Uriel married Tamar, and so Maacah was really Absalom's granddaughter (so Josephus once, *Ant.* VIII. x. 1). 'Daughter' is sometimes used in this way, e.g. 2 K 8<sup>28</sup>. Jerome, however (*Qu. Heb.*), distinguishes her father from David's son. M. retained the position of queen-mother (*giblirak*,  $\eta\gamma ov\mu \ell v\eta$ ) until the reign of her grandson Asa. He in his reforming zeal deposed her 'because she had made an abominable image (*simulacrum Prinzi*) made an abominable image (simulacrum Priapi) for an Asherah' (1 K 15<sup>13</sup>, 2 Ch 15<sup>16</sup>). She was apparently shielded from the extreme penalties resolved on by the people according to 2 Ch 15<sup>13</sup>. resolved on by the people according to 2 Ch 15<sup>13</sup>. **4.** Son of Nahor by his concubine Reumah (Gn 22<sup>24</sup>). **5.** One of the concubines of Caleb, son of Hezron (1 Ch 2<sup>45</sup>). **6.** Wife of Machir, daughter of Benjamin, and whole sister of Huppim and Shuppim (1 Ch 7<sup>15,16</sup>). RVm supposes another Maacah, sister of Machir. The text is corrupt according to QPB. **7.** Wife of Jeiel the father of Gibeon (1 Ch 8<sup>29</sup> 9<sup>35</sup>) **8.** Father of Hanan, who was one of David's heroes (1 Ch 11<sup>45</sup>). **9.** Father of Shouhatidh who was centain of the tribe of of Shephatiah, who was captain of the tribe of Simeon in David's reign  $(1 Ch 27^{16})$ .

N.J. D. WHITE. MAACAH. - A small Aramaan kingdom in Gaulanitis, the modern Jaulan, east of the Sea of Galilee (G. A. Smith, HGHL p. 553; Ewald, HI ii. 302). In Dt 3<sup>14</sup>, Jos 12<sup>6</sup> the territory in Bashan assigned to Manasseh extends 'unto the border of the Geshurites and the Maacathites.

M

v.8 Maacah and Tob seem to be distinguished from the other mercenaries, who were Syrians, but in the account of the battle all are alike called Syrians. This is confirmed by the parallel narrative (1 Ch 196), where their country is called Aramtive (1 Ch 19<sup>6</sup>), where their country is called Aram-maacah. It is evident that they were a small community, from a comparison of the numbers furnished by the other allies. Abel-beth-maacah in Naphtali (2 S 20<sup>14, 15</sup>, 1 K 15<sup>20</sup>, 2 K 15<sup>20</sup>) was probably a colony that went north-west. The names of some **Maacathites** are recorded. Esh-temoa (1 Ch 4<sup>19</sup>), who occurs in the genealogy of Judah; Ahasbai, father of Eliphelet, one of David's heroes (see QPB on 2 S 23<sup>34</sup> and 1 Ch 11<sup>35, 36</sup>, where MT, perh. by textual error, has **Mecherathite**); and Hoshaiah, father of Jezaniah, who was one of the captains of the forces who who was one of the captains of the forces who joined Gedaliah (Jer  $40^8$   $42^1$ ). See, further, Dillm. on Gn  $22^{24}$ , Dt  $3^{14}$ , Jos  $13^{13}$ , and Driver on Dt 314. N. J. D. WHITE.

**MAACATHITE.**—See preceding article.

MAADAI (12,5; Β Μοδεδειά, Α Μοοδειά, Luc. Moovδειά). — One of the sons of Bani, who had married a foreign wife, Ezr 10<sup>24</sup>; called in 1 Es 9<sup>24</sup> Momdis.

**MAADIAH** (אָדָרָה; A Maadids, Luc. Maadids, B om.).—A priestly family which returned with Zerub-babel, Neh 12<sup>6</sup>; called in v.<sup>17</sup> **Moadiah** (אָדָרָה, A כי גמוףסוג (apparently through a confusion with called seasons'], Luc. Madal).

MAAI (27; A Maai, Luc. Maid, B om.). —One of the sons of Asaph who took part in the ceremony of the dedication of the walls, Neh 12<sup>36</sup>.

MAALEH-ACRABBIN.—Jos 15<sup>3</sup> AV ('ascent of Akrabbim,' RV). See AKRABBIM, and DEAD SEA in vol. i. p. 575<sup>b</sup>.

**MAANI** (A Maari, B Marel, AV Meani), 1 Es 5<sup>31</sup> = MEUNIM, Esr 2<sup>60</sup>, Neh 7<sup>52</sup>.

**MAARATH** (τζιτ); **B** Μαγαφώθ, **A** Μαφώθ, Luc. Maaρώθ).—A town of Judah, in the mountains, noticed with Beth anoth, Jos 15<sup>59</sup>. The site is at Beit 'Ummar, in the Hebron hills west of Tekoa. See SWP vol. iii. sheet xxi.

meadow of Geba').-The place from which the men placed in ambush rushed forth to attack the Benjamites (Jg 20<sup>33</sup>). There can be little doubt border of the Geshurites and the Maacathites. (men placed in ambush rushed forth to attack the But in Jos 13<sup>11</sup> the border' of these peoples is included in Manasseh. The discrepancy is ex-plained by the fact that they maintained their independence (Jos 13<sup>13</sup>, 1 Ch 2<sup>23</sup>). Accordingly in 2 S 10<sup>6</sup> the Ammonites hire 'the king of Maacah' (B'Aµaλ $f\kappa$ ) to aid them against David. Hére and in

itta, reads קרפרת נ' from the cave which is in Gibeah.' J. A. SELBIE.

**MAASAI** (797); B Maasaus, A Masai, Luc. Maasei).—The name of a priestly family, 1 Ch 9<sup>13</sup>.

**MAASEAS** (Maasalas). — The grandfather of Baruch (Bar  $1^1$ ) = MAHSKIAH (which see) of Jer  $32^{12}$   $51^{10}$ .

**MAASEIAH** ( $\pi_{1}^{ep}$ ) and  $\pi_{1}^{ep}$ , work of  $J^{ee}$ ; on the distribution of this name in different periods of larael's history and the inferences to be drawn therefrom, see Gray, *Heb. Proper Names*, 181, 293).—1. A priest of the sons of Jeshua, who had married a foreign wife, Exr 10<sup>16</sup>, called in 1 Es 9<sup>19</sup> **Mathelas.** 2. A priest, of the sons of Harim, who had committed the same offence, Exr 10<sup>21</sup>. Foreign wives had been taken also by 3, 4. a priest, of the sons of Pashhur, Exr 10<sup>22</sup>, called in 1 Es 9<sup>23</sup> **Massias**, and a layman, of the sons of Pahathmoab, v.<sup>20</sup>. 5. The father of Azariah who helped to rebuild the wall, Neh 3<sup>22</sup>. 6. One of those who stood upon the right hand of Ezra at the reading of the law, Neh 8<sup>4</sup>, called in 1 Es 9<sup>43</sup> **Baalsamus**. 7. One of those who expounded the law to the people, Neh 8<sup>4</sup>, called in 1 Es 9<sup>43</sup> **Baalsamus**. 7. One of those who expounded the law to the second upon the right family name, Neh 10<sup>26</sup>. 9. A Judahite family name, Neh 11<sup>5</sup>, in 1 Ch 9<sup>45</sup> **Asaiah.** 10. A Benjamite family name, Neh 11<sup>7</sup>. 11, 12. Two priests (B om.), Neh 12<sup>211</sup>. 13. A priest in the time of Zedekiah, Jer 21<sup>1</sup> 20<sup>26</sup> 36<sup>4</sup> 37<sup>3</sup>. 14. The father of the false prophet Zedekiah, Jer 29<sup>271</sup>. 15. A Levitical singer mentioned upon the occasion of David's bringing up the ark from the house of Obed-edom, 1 Ch 15<sup>18, 20</sup>. 16. One of the captains who assisted Jehoiada in the overthrow of Athaliah, 2 Ch 23<sup>1</sup>. 17. An officer ( $\neg P^{10}$ ) of Uzziah, 2 Ch 26<sup>11</sup>. 18. A son of Ahaz slain by Zichri the Ephraimite, 2 Ch 28<sup>3</sup>. 19. Governor of Jerusalem under Josiah, 2 Ch 34<sup>8</sup>. 20. In 1 Ch 6<sup>40</sup> **Baaseiah** ( $\neg T_{23}$ ) appears to be a textual error for Maaseiah ( $\neg T_{23}$ ) appears to be a textual error for Maaseiah ( $\neg T_{23}$ ) appears to be a textual error for Maaseiah ( $\neg T_{23}$ ) appears to be a textual error for Maaseiah

**MAASMAS** (Maasual, AV Masman), 1 Es  $8^{48}$ .— Corresponds to SHEMAIAH, Ezr  $8^{16}$ . But the text is corrupt, Zaµalas the Gr. equivalent of Shemaiah being inserted later in the verse.

**MAATH** (Madθ).—An ancestor of Jesus, Lk 3<sup>26</sup>.

MAAZ (72C, Mads).—A Jewish family name, 1 Ch 2<sup>27</sup>.

**MAAZIAH** (קטוויד, קטויד, הסטויד).—The name of a priestly family which constituted the 24th course, Neh 10<sup>8</sup> (B Našeid, A Maajeid), 1 Ch 24<sup>18</sup> (B Maasai).

**MACALON** (of  $\epsilon \kappa$  Marahar), 1 Es 5<sup>21</sup>.—The same as MICHMASH; cf. Ezr 2<sup>27</sup> (Maxµais). The second syllable is perhaps due to reading M as AA.

**MACCABEUS** (Marra  $\beta a \delta o s$ ).—The surname of Judas, the third son of Mattathias (1 Mac 2<sup>4</sup> 3<sup>1</sup> etc., 2 Mac 5<sup>27</sup> etc.). See next article.

#### MACCABEES, THE (of Markabaio). ---

i

i. THE NATIONAL RISING UNDER MATTATHIAS. In B.C. 175 Antiochus IV. (Epiphanes) began to reign over Syria. It was the ill-starred attempt of this monarch to Hellenize the Jews by force that caused the Maccabsean revolt. At the time of his accession to the throne the Greek influences which everywhere followed in the wake of the conquests of Alexander the Great were fast penetrating the life of Palestine; the more aristocratic

section of the population were, in particular, affected by them. The advance of Hellenism was, affected by them. The advance of Hellenism was, indeed, partially checkmated by the organized resistance of the Hasidæans (Heb. Hasidim = the 'pious'), who were the champions of the law. But only partially. The leader of the Hellenistic faction in Judzea was Joshua, a younger brother of the noble-minded high priest Onias III. He Grecized his own name into Jason, and apparently imagined that the name Jahweh might similarly be converted into Zeus. At Antioch he bargained with Epiphanes that the priesthood should be transferred from Onias to himself, and that he should be authorized to start an active pagan probuilt at Jerusalem, and Greek sports were pres-tised quite close to the temple; even the priests forsook the altar to join in the games (2 Mac 4<sup>11-14</sup>). After holding office for three years (174-171), Jason was supplanted by Menelaus, a Hellenistic Benjamite, who became a complete renegade from Judaism, and obtained the help of Syrian troops against the unyielding Jason. An unfounded rumour that Antiochus had died in Egypt led Jason to attack Jerusalem, and Menelaus had to secure himself in the fortress. The Syrian despot viewed these disturbances as a Jewish rebellion (2 Mac 5<sup>11</sup>), and his arrival at Jerus. in 170 was signalized not only by the flight of Jason, but also by the profanation and robbery of the temple, and by the slaughter of many of the inhabitants. At this time Philip the Phrygian, a man of low morale, seems to have been appointed governor of Jerus. so as to assist Menelaus in the

degree of subserviency to the king. Two years later, the Holy City was laid waste by Antiochus' general Apollonius, and Syrian soldiers were placed in the Acra, a stronghold overlooking the temple. The tyrant next gave orders that the temple. Jewish rites should cease and heathen customs be observed, under pain of death. An idol altar ('the abomination of desolation' [see art. ABOMINATION OF DESOLATION], Dn 9<sup>27</sup>) was set up in the temple, and sacrifices offered to Jupiter; copies of the law were searched for and destroyed ; women with the babes they had circumcised were hurled headlong from the city wall. But Antiochus had overshot the mark. Hitherto under the Ptolemies as well as the Seleucidæ religious freedom had been expressly guaranteed to the Jews, and, before the province could be completely Hellenized, the stolid conservatism with which they clung to the observances of the Mosaic law required to be overcome. Experience showed that it could not be overcome. The extreme measures of Antiochus alienated many whose sympathies were largely with the Greek party. In consequence of his avowed intention to extirpate the Jewish religion the whole situation in Palestine was changed, and an invincible spirit of earnest religious patriotism was evoked. Many saved their lives by acquiescing in the king's measures, but others chose rather to die. It soon became clear that nothing would induce Israel to abandon her ancestral worship, and the moral force of her leaders enabled her to withstand the oppressive cruelty of the Syrians, and to achieve what might well have been considered impossible.

The ruthless policy of Epiphanes, adopted at the instigation of some apostate Jews who assured him that the whole country could be Hellenized, speedily brought matters to a crisis. Every village in Palestine was required to set up its heathen altar, and imperial officers were told off to see that heathen sacrifices were duly offered by all the citizens. A brave stand was made by Mattathias, an aged priest whom the persecution had driven to live at Modin, a little country town between Joppa

181

and Jerusalem. When ordered to offer the first heathen sacrifice, he refused; and when a base Jew was about to do the unholy deed, Mattathias slew both him and the king's commissioner (Apelles), and pulled down the altar. Calling on all the faithful to follow him, he then with his five sons-John, Simon, Judas, Éleazar, and Jonathan-fled into the mountains and raised the standard of rebellion. Many who shared his feelings took refuge in the wilderness, but were pursued by the Syrian officers, who bade them yield or die. Rather than profane the Sabbath by fighting, 1000 fugitives allowed themselves to be slaughtered. But after this, to avoid extermination, Mattathias and his friends resolved to defend themselves from attack even upon the Sabbath. Approving of this spirited policy, a large army of Jews who loved their country and their religion now came forward in their support, and openly began to put down heathenism throughout the land. Mattathias died in B.C. 166 after blessing his sons and solemnly charging them

to be zealous for the law, and to give their lives for the covenant of their fathers. The leadership he be-

queathed to Judas, who was (? even then, cf. 1 Mac 2<sup>66</sup>, or only afterwards) surnamed *Maccabacus*, and

whose followers consequently came to be known as

ii. THE NAME MACCABEE. - As already indicated,

**Haccabeus** (Gr. Maxa Baccabeus, Heb. (320) is properly the distinctive surname of Judas, third son of Mattathias, and after him leader of the heroic struggle against the Seleucide (1 Mac 2<sup>96</sup> 3<sup>1</sup> etc.). For long it was held that *Macabee* was formed from the initials of the opening words of Ex 15<sup>11</sup>: mi khāmōkhah bā'ēlim Jahweh ('who is like thee among the gods, Jahweh?'), which were further con-

jectured to have been inscribed by the party upon their banners. But (1) the custom of forming new words in this fashion, although common among the Jews at a later date, does not appear to have as yet come into vogue; (2) the Gr. form as written with KK cannot upon this theory be accounted for; (3) this interpretation of the name is too vague to fit in with the facts of the history, for in the first It in with the facts of the history, for in the mist-instance it was not the watchword of the party, but the individual surname of Judas ( $\delta$  Maxka- $\beta a i o s$ ). In a treatise upon *The Name Machabee* (Leipzig, 1876), S. J. Curtiss contends that the word is derived from  $k \bar{a} h \bar{a} h$  and means 'the ex-tinguisher' (of his enemies), after Is 43<sup>17</sup>; but this derived in a parts on proceedings means. The derivation also rests on precarious grounds. The original Heb. form having been lost, it is impossible to say with certainty whether it was written with k ( $\mathfrak{I}$ ) or with k ( $\mathfrak{I}$ ), and in fact the Rabbinical texts use both letters indifferently. Curtiss argues that Jerome's spelling of the word (Machabaeus) points to his acquaintance with a Heb. form occ. whereas he probably adopted the Latin ortho-graphy current in his time. But as the Old Latin version is derived from the Gr. text of 1 Mac, we are thrown back upon the Gr. form of the name as the nearest indication of the original, and this leaves the matter uncertain, as Marraßaîos might come either from a word with k or from one with k. There remains what must be regarded as the most probable derivation, viz., that from  $mak_{\bar{k}\bar{a}\bar{b}\bar{a}\bar{h}}$ probable derivation, viz., that from  $mak_{\bar{k}\bar{a}\bar{b}\bar{a}\bar{h}}$ ( $\Im$ ) = 'hammer.' If, as Ewald supposes, the surnames of the sons of Mattathias were intended merely as distinctive titles, that of 'hammerer' appears to be natural enough ; while, on the theory that they were symbolical, the idea conveyed will be that of 'vigorous, sharp-beating warrior,' or 'chivalrous hero.' The case of Charles Martel is not strictly analogous, as he derived the title directly from his battle-axe. A better parallel is afforded by the designation of Edward I. as 'Scotorum malleus.' Curtiss may be right in his assertion that in the OT (Jg  $4^{21}$ , 1 K  $6^7$ , Is  $44^{12}$ ,

Jer 104) makkābāh denotes an ordinary hammer, and not the heavy sledge hammer which would more adequately symbolize the impetuosity of Judas; but this circumstance can scarcely be considered decisive. See, further, Kautzsch (Apoer. u. Pseudepigr. d. AT, 24, where the interpretation 'hammerer' is adopted).

The name Maccabe was gradually widened in scope so as to embrace not only the brothers of Judas and all who were his blood relations, but also all his followers and coadjutors in the desperate struggle against the tyranny of the Syrian kings. It became in a special manner connected with the It became in a special manner connected with the seven martyred brethren whose story is (rhetori-cally) told in 2 Mac  $6^{18}$ -7<sup>44</sup>, and whose moral bravery is reckoned worthy to stand alongside of that shown by those who fell in battle for the same sacred cause. Ultimately the name came to have a purely ideal significance, as, *e.g.*, in the titles of the so-called Third and Fourth Books of Maccobes At present howaver it is used to Maccabees. At present, however, it is used to designate only the sons and descendants of Matta-Although even in this limited sense the thias. term *Maccabees* has established itself in general usage, the proper name of the family is that of **Hasmonæans** (or Asmonæans), derived from Hash-mon (i.e. 'fnt,' 'rich' = magnate; cf. Ps  $68^{ii}$  <sup>[21]</sup>), Gr. 'Asaµwaîos (Jos. Ant. XII. vi. 1), the great-grandfather of Mattathias. Jewish writers accord-ingly use this name in preference to that of Maccabees, and among the Jews 1 and 2 Mac are known as 'Books of the Hasmonzans' (DWDETT "DO; see Winer, *Realwörterb*. under 'Makkabäer'). iii. THE JEWISH WAR OF INDEPENDENCE LED

BY THE MACCABEES.

BY THE MACCABEES. (i.) **Campaigns of Judas Maccabæus** (166-161).— The prescience of Mattathias in nominating Judas as his successor was fully justified by events. Judas soon proved himself a born general. He united in his own person the faith of Abraham, the zeal of Elijah, the stature of Saul, and the courage of David. He was at once the terror of his enemies and the pride of his nation. 'He angered many kings, and made Jacob glad with his acts, and his memorial is blessed for ever' (1 Mac 3<sup>7</sup>). In the very first year of his leadership he rose to fame by defeating the Syrian generals Apollonius and Seron: 'Every nation told of the battles of Judas' (1 Mac 3<sup>26</sup>). Enraged at the defeat of his forces, Antiochus sent his kinsman defeat of his forces, Antiochus sent his kinsman Lysias with half of his whole army to root out the Jewish nation and divide their land among strangers, while he himself with the rest of the troops crossed the Euphrates to exact tribute and collect money. Lysias at once sent against Judæa a large army under three trusted generals, Ptolemy, Nicanor, and Gorgias. The Syrians made so sure of victory that they had arranged for the attendance of slave-dealers to buy up Israelitish prisoners, but Judas and his brethren met them fearlessly. Gathering at Mizpeh, they observed a day of fasting and prayer, and further prepared for battle by organizing their troops into a regular army. With a detachment of 6000 men Gorgias planned a night attack on the Jewish camp; but Judas cleverly removed his forces, smote the main army under Nicanor, set fire to the Syrian camp, and waited for the disappointed Gorgias, whose troops fied on sighting the smoke of the burning tents. Thus 'Israel had a great deliverance that day' (1 Mac  $4^{22}$ ). The next year (165-164) Lysias himself led a still larger army against Judea, but was heavily defeated by Judas at Bethzur, between Hebron and Jerusalem. He then retired to Antioch with the view of enlisting the services of mercenary troops to suppress the rebellion in Julava. Meanwhile Judas took occasion to restore the temple worship. The shrubs that were growing wild in

the Maccabees.

1

the courts were cleared away; the idol-altar was destroyed, and a new altar erected; and in general the sacred furniture which had been removed by Antiochus Epiphanes was replaced. On the 25th Chislev (Dec.) 165, just three years after its first defilement, the temple was purified by the offering of the legal sacrifice upon the new altar, and the Feast of the Dedication or Renewal ( $Jn 10^{29}$ ), which continued to be observed until the destruction of the temple by the Romans, was joyfully celebrated for eight days (1 Mac 4<sup>36</sup>). Thereafter Judas went on to fortify the temple mount and the city of Bethzur. These measures conclude the first stage in the history of the wars of the Maccabees. As yet they had never experienced defeat.

The brilliant exploits of Judas and his brethren excited the latent hostility of the neighbouring heathen tribes, who formed a fresh coalition against 'the race of Jacob' (1 Mac 5<sup>3</sup>). Among other and less known parties to the league, Edom and Ammon, both old hereditary enemies of Israel, were routed by Judas. In response to appeals made to them, the Maccabees then busied themselves for a time in delivering from their enemies and lodging safely in Jerus. many Jews who were shut up in the fortresses of Gilead and Galilee. No fewer than 11,000 men were employed in these expeditions—3000 in Galilee under Simon, and the rest in Gilead under Judas and Jonathan. At the fortress of Ephron, which lay in a deep and narrow pass W. of Irbid, the inhabitants tried to obstruct the Jewish caravan, with the result that a way was forced over their dead bodies and through the ruins of their city. In the meantime Joseph and Azarias, who had been left in command at Jerus, foolishly risked an engagement with Gorgias, and were repulsed with the loss of 2000 men. This disaster, however, was counterbalanced by some fresh successes of Judas against the Edomites and Philistines.

No longer under the immediate necessity of defending the Jewish religion, the Maccabees had to aim at the restoration of Jewish independence. Their ambition in this direction must have been stimulated by the unexpected tidings that Antiochus Epiphanes had died in the far East (164). He had appointed Philip, one of his 'Friends,' to He had appointed Philip, one of his Friends, to act as regent and guardian to the minor Antiochus v., but Lysias had the latter crowned as king with the surname of Eupator. In the year following, by making a determined attack upon the citadel of Jerus. (Acra), Judas forced the Syrian garrison to seek help from Antioch. With a great army, including 32 fighting elephants, Lysias laid siege to Bathyar and Ludas sitched bis comp at Bath to Bethzur, and Judas pitched his camp at Bethzacharias, 8 miles nearer Jerusalem. Although in the battle that followed 600 Syrians were slain, the Jews were defeated. This first check to the victorious career of Judas was aggravated by the loss of his brother Eleazar, who, seeing a superbly caparisoned elephant on which he supposed the king to be riding, stabbod the animal from be-neath but was himself crushed by its fall. The neath, but was himself crushed by its fall. Syrians had already got possession of Bethzur, and were on the point of taking the temple mount —it was a Sabbatic year, and the Jews were scarce of food-when Lysias was obliged to hasten to Antioch, where Philip, who had returned from Antioch, where Finite, who had returned from the East, was trying to assert his title to the regency. Lysias therefore quickly made peace with the Jews, and granted them by treaty the religious liberty for which they had fought so well (1 Mac  $6^{100}$ ). As the formal abandonment of the attempt to abolish the Jewish religion by force, this concession marks the second important stage in the Maccabæan struggle. Hitherto it

had been a war for religious freedom; henceforth it became a war for political independence. Lysias soon got the better of Philip, but was

himself, along with his ward, put to death by Demetrius 1., the rightful heir to the Syrian throne, who had until now been kept as a hostage at Rome. The Greek party in Judge induced Demetrius to send an army under Bacchides to install the ungodly Alcinus as high priest. Con-tent to have 'a priest of the seed of Aaron,' the Hasidæans no longer opposed the Syrian rule, but sixty of them were treacherously slain in one day. After Bacchides had returned to Antioch without being able to entrap Judas, the latter speedily got the upper hand in Judæa, and Alcimus had once more to solicit help from Syria. In consequence, Judas again met Nicanor in battle. The Syrian general was beaten, and fell back upon Mount Zion, where he insulted the priests and threatened Adasa (161), where he institute the prests and threatened to burn the temple. But in a further battle at Adasa (161), near the pass of Beth-horon, he was himself slain, whereupon his army fled. The head and hand of the insolent blasphemer were hung up in front of one of the temple gates (Gorionides,  $10^{11} \cdot 20^{12} \cdot 6^{12} \cdot 20^{12}$ up in front of one of the temple gates (Gorionides, iii. 22. 12; cf. 2 Mac 15<sup>31.4</sup>), and the 13th Adar— the day of the hattle—was afterwards kept as 'Nicanor's day' (1 Mac 7<sup>40</sup>). At this stage Judas, despairing of being long able to continue the unequal contest with the imperial armies, sent ambassadors to the Roman Senate to invoke their protection against the Syrians. But although a treaty was concluded, nothing came of it beyond a warning to Demetrius that further interference with the Jews would mean war with Rome. Before the Roman rescript could have reached Antioch, the contingency dreaded by Judas had actually occurred. About six weeks after the defeat of Nicanor, Demetrius sent a fresh army into Judrea under Bacchides. Only 3000 men were with Judas at Elasa, and most of these deserted him on seeing the vastly superior strength of the Syrian host. Even the noble 800 who stood by him vainly tried to dissuade him from risking a battle, and Elasa became 'the Jewish Thermo-pyle.' In spite of all they could do, Judas and his little band were overcome by sheer weight of numbers. 'Judas fell, and the rest fied' (1 Mac 9<sup>16</sup>). His body was carried off by his brothers and laid in the sepulchre of his fathers at Modin (161).

In the long roll of Israelitish worthies we meet with no more striking personality than that of Judas Maccabaeus. His piety was manifest to all; his motives were pure and unselfish; he fought for (iod's glory and his country's good. His unselfish devotion was equalled by his military genius. For seven years, with an enthusiasm that never flagged, and a generalship which has never been surpassed, he led the Jews to victory, and died only when even the noblest heroism could not conquer.

Bint diverses not conquer. (ii.) The leadership and high-priesthood of Jonathan (161-143).—The friends of Judas, now openly persecuted by the Hellenizers, chose as their leader his brother Jonathan, surnamed Apphus (Gr. 'A $\pi\phi o \hat{v}$ 's, 'A $\phi\phi o \hat{v}$ 's,  $\Sigma a \phi\phi o \hat{v}$ 's, 'Syr. Happūs =?cunning), who filled the post with much shrewdness and success. Wishing as yet to avoid Bacchides, Jonathan withdrew to the wilderness of Tekoah, and sent his eldest brother John to deposit the baggage with the friendly Nabathæans. But his plans miscarried, and John fell a prey to a robber clan at Medaba. Jonathan crossed the Jordan and avenged his brother's death, but meanwhile Bacchides seized the fords and lay in wait for him. The Jews thus found themselves in a situation of extreme peril; they saved their lives, however, by swimming across the river. The

return of Bacchides to Antioch on the death of Alcimus (160) so strengthened the Maccabæan party, that within two years their opponents had once more to call in his aid. Although they had given Bacchides the assurance that Jonathan should be made his prisoner, the vigilance of the Maccabees made them cognizant of the plot, and, after slaying about fifty of the conspirators, Jonathan and his followers entrenched themselves at Bethbasi. This stronghold Bacchides could not reduce; he was repulsed with loss by Simon, while Jonathan at the head of a detached squadron overran the adjacent territory. Stung by these reverses, Bacchides slew many of the Hellenizers, accepted Jonathan's proposals for peace, and departed into Syria vowing that nevermore would he interfere in Judæa (c. 156). 'And the sword ceased from Israel' (1 Mac 9<sup>73</sup>). For four years Jonathan dwelt at Michmash, 'judging' the people and restraining the Hellenizers.

Unbroken peace prevailed until Alexander Balas entered upon a contest with Demetrius I. for the Syrian crown (153). Happily for Jonathan, who coveted the power and prestige belonging to the high-priesthood, the office was vacant, and this dispute over the succession to the throne of Syria paved the way for his appointment. The rival claimants looked upon him as a valuable ally, and he knew how to exploit them. While availing himself of certain privileges. granted in a letter from Demetrius, he unhesitatingly threw in his lot with Alexander Balas, who appointed him high priest, invested him with the order of 'King's Friend, and sent him a purple robe and a diadem, the emblems of royalty. The same year, at the reast of Tabernacles, Jonathan assumed the sacred vestments, and showed himself zealous in support of the pretender Balas. Demetrius now, in turn, offered the most tempting inducements (including the abolition of taxes, the cession of Acra, the release of Jewish prisoners, the enlargement of Judzan territory, the payment of Jewish soldiers, and liberal allowances for the temple and the building of the city walls) by way of outbidding his rival; but Jonathan, sceptical as to the sin-cerity of Demetrius, and aware that the claims of Balas were favoured at Rome, wisely adhered to his former choice. In a pitched battle which ensued, Demetrius was defeated and slain. By the distinguished reception given to Jonathan at Ptolemais, where in B.C. 150 Alexander Balas married the Egyptian princess Cleopatra, and the rebuff given to certain apostates from Mosaism who would fair have invested to the set who would fain have impeached him in the royal presence, the triumphant Balas showed his gratitude to his Jewish ally. He also 'wrote him among his Chief Friends, and made him a captain and governor of a province' (1 Mac 10<sup>46</sup>). Subject to the suzerainty of Syria, this gave him both the civil and military command in addition to his spiritual supremacy as high priest. When, three spiritual supremacy as high priest. When, three years later, Demetrius II. came from Crete as the avenger of his father, his cause was espoused by Apollonius, governor of Cœle-Syria. But though Balas had proved a worthless king, and had for-feited the esteem of his subjects, Jonathan stood loyally by him. Taking the field against Apol-lonius has contured longe won a battle at Aphlo lonius, he captured Joppa, won a battle at Ashdod (where he destroyed the temple of Dagon), and (where he destroyed the temple of Dagon), and received the submission of Ascalon. In gratitude for these services Alexander presented Jonathan with the gold buckle worn by princes of the blood, and with the city of Ekron. But no effort on the part of Jonathan could save Balas from ruin after his father-in-law Ptolemy Philometor turned arguing this a priched battle Balas arford against him. In a pitched battle Balas suffered defeat, and fled into Arabia; but a sheikh of that country 'took off Alexander's head and sent it to

#### MACCABEES, THE

Ptolemy' (1 Mac 11<sup>17</sup>). Within three days thereafter the latter died of wounds received in the battle, and Demetrius II. became king (145).

At this juncture Jonathan boldly laid siege to the Acra, and as boldly appeared to answer for himself before the king at Ptolemais. The result was a triumph of diplomacy. He carried costly gifts to the king; and the latter, instead of treat-ing him as a rebel, 'gave him pre-eminence among his Chief Friends' (1 Mac 11<sup>20</sup>), besides confirming him in the high-priesthood, and conceding to the Jews several of the benefits vainly offered by his father as the price of their adherence. Shortly afterwards Jonathan rendered useful service by sending 3000 men to Antioch to aid in putting down an insurrection which had broken out there against Demetrius. The latter promised on his part to withdraw the Syrian garrisons from Jewish strongholds, but as he failed to keep this promise Jonathan went over to the side of Tryphon, a former officer of Alexander Balas, who took advantage of the unpopularity of Demetrius to bring forward Antiochus, the son of Balas, as a claimant for the throne, and who was careful to contirm Jonathan in all his dignities. Jonathan lost no time in bringing the entire territory between Gaza and Damascus into subjection. Proceeding Gaza and Damascus into subjection. Proceeding to Galilee he met the generals of Demetrius, whom, after a threatened reverse, he routed on the plain of Hazor (c. 144). At Hamath the Syrians rallied once more with a view to invade Palestine, but Jonathan marched beyond Lebanon and dispersed them.\* He afterwards subdued the Arab tribe of the Zabadæans on the Antilibanus, returned home by way of Damascus, and set him-self, in concert with the elders, to strengthen the defences of the country. The walls of Jerus. were heightened, and an effort made to isolate the Acra. Meanwhile Simon had not been idle in his new capacity of commander  $(\sigma r \rho a \tau \eta \gamma \delta s)$  of the Palestinian seaboard (1 Mac 11<sup>50</sup>). Besides capturing Bethzur, he reduced and garrisoned Joppa, and fortified Adida. Tryphon now began to distrust the Maccabees, who had containing not hear namination of their

who had certainly not been unmindful of their own interests while 'they fought for one king against the other, and in the name of the Syrians drove the Syrians out of Judæa and the adjacent regions.' Surmising that the Jewish high priest would probably oppose his plans for usurping the throne, he suddenly marched into Palestine and encamped at Bethshan (Scythopolis), where Jonathan prepared to give him battle. But by dint of artful flattery Tryphon induced even this wary Jewish prince to walk into a trap. Having entered Ptolemais, accompanied by only 1000 men, Jonathan found himself a prisoner and had his escort slain. Thus ended his period of active service. Although a high priest of Israel, he was in no sense a religious man; it was merely as a ladder to power that the priest's office had attractions for He was essentially a worldly ecclesiastic. him. And if he was less disinterested in his aims than his brother Judas, he was also less scrupulous in his methods of realizing them. But few men in his circumstances could have achieved more, either for themselves or for their party. By the adroit-

\* According to 1 Mac  $12^{1.23}$  Jonathan at this juncture sent ambassadors to Rome, Sparta, etc., to conclude or renew friendly treaties, and they were favourably received by the Romans. Nothing is said regarding their reception at Sparta, but the writer gives what purports to be a 'copy' of Jonathan's letter, and also—apparently as a precedent—one of a letter formerly written by the Spartan king Arius 1. to the Jewish high priest Onias 1. (s.c. 323-300). Wellhausen ( $IJ/G^2$  p. 266, n. 3) rejects the whole passage as unhistorical. Unquestionably, it interrupts the main narrative in a very awkward manner; but if Jonathan, who was at the time a Syrian officer, did send such an embassy, it must have been because he had no faith in the stability of the Syrian kingdom.

ness with which he turned to account the mistakes of his enemies, he more than made up for the lack of strength in his adherents.

(iii.) The administration of Simon, ethnarch and high priest (143-135).—Simon (Gr.  $\Sigma \nu \mu \epsilon \omega r$ ,  $\Sigma i \mu \omega r$ ), surnamed Thassi (*i.e.*, probably, 'the zeal-ous'), the sole surviving son of Mattathias, now gallantly stepped into the breach and was chosen leader ( $i\gamma o i \mu \epsilon r o s$ ) at a public assembly in Jeru-salem. He had already justified the epithet, 'man of counsel' ( $dr h \rho \beta o \nu \lambda r j s$ , 1 Mac 2<sup>66</sup>), and had also salem. He had already justified the epithet, 'man of counsel'  $(drh\rho \ \beta ov\lambda\eta s$ , 1 Mac 2<sup>66</sup>), and had also distinguished himself as commander of the Medi-terranean coast from Tyre to Egypt. Tryphon soon marched against Judæa, but found himself intercepted by Simon at Adida. He thereupon offered to release Jonathan for 100 talents of silver and the custody of two of his sons as hostages; and the custody of two of his sons as nostages; but although Simon judged it best to accede to these terms, Tryphon neither set Jonathan at liberty nor relaxed his hostile attitude. All his efforts to reach Jerus., however, were rendered futile by the sleepless vigilance of Simon. Even a projected night expedition with supplies for the family and arguing in the Age way way worked by famished garrison in the Acra was wrecked by a heavy fall of snow. Soured and baffled, he marched into Gilead and gave vent to his spleen by putting Jonathan to death at Bascama (143). The body of Jonathan was afterwards interred at Media where Simon created a mergilizent at Modin, where Simon erected a magnificent family monument, which appears to have been a landmark for sailors on the Levant (1 Mac

 13<sup>29</sup>). See MODIN.
 Now that the war was over, Simon applied himself with increased vigour to the task of strength-ening the defences of Judza. Having made Joppa a Jewish port, he laid siege to the fortress of Gazara, and expelled the heathen inhabitants. Shortly afterwards he appointed his son John commander-in-chief of his forces, with a residence at Gazara. He achieved another noteworthy triumph in the reduction of the Acra, the garrison being at length starved into surrender, and instituted an annual festival in commemoration of the day of his entry into this last outpost of the Syrians — the 23rd Iyyar (May) 142. Meanwhile Tryphon had murdered the puppet-king Antiochus VI. and seized the Syrian crown. Demetrius II. was also embroiled in difficulties with the Parthians, who were invading his north-eastern provinces, and Simon took occasion to demand complete ex-emption from taxes. This Demetrius consented to grant, along with an amnesty for all political offences. Thus was 'the yoke of the heathen' removed, and the wished for goal of Jewish inde-pendence actually reached (1 Mac 13<sup>41</sup>). Simon was the founder of the high-priestly dynasty of the Hasmoneans. In B.C. 141, in recognition of his great services to the nation, he was formally appointed leader high priest and

he was formally appointed leader, high priest, and governor  $(i\theta r a \rho \chi \eta \tau)$ ; and these offices were declared to be hereditary in his family until 'a faithful prophet' should otherwise direct (1 Mac 14<sup>41</sup>). The popular decree embodying these honours was en-graven on a memorial tablet placed in the temple. The first year of Simon's reign was made the beginning of a new era, according to which Jewish legal documents were dated. He also renewed the friendship and treaty with Rome and Sparta, and struck his own coins like any other independent sovereign. The beautiful picture of 1 Mac 14<sup>4-15</sup> shows how well Simon utilized the years of peace that followed, in building up the prosperity of ludge. In prosee he was even growthen then in Judza. In peace he was even greater than in war. He possessed the administrative genius. Under his wise and beneficent sway the country enjoyed a period of moral and material well-being for which there is no post-exilic parallel. He was the patron of trade and agriculture; the friend of

liberty, justice, and religion; a brave soldier, a

worthy priest, and a gifted statesman. After four or five years, during which 'Israel rejoiced with great joy' (1 Mac 14<sup>11</sup>), Simon was once more caught in the meshes of Syrian politics. Although Demetrius II. was a prisoner in Parthia, his younger brother Antiochus VII. (Sidetes) took up arms against Tryphon, and wrote to solicit the friendship of Simon. But after defeating Tryphon he reversed his policy. While he was besieging his rival in Dor, Simon sent him gifts and auxiliaries. These were haughtily declined, and a demand made Gazara, and the Acra. This was equivalent to a declaration of war, and very soon the Syrian general Cendebæus invaded Judæa. Now an old man, Simon left his two sons Judas and John to prosecute the campaign. Near Modin they gained a decisive victory

decisive victory. For two or three years more Simon laboured at his favourite task of developing the internal re-sources of his kingdom. Then came the tragic end. In the castle of Dôk, near Jericho, at a banquet ostensibly held in their honour, he and two of his sons fell victims to the murderous ambition of his son-in-law Ptolemy, the son of Abubus who aimed at the supreme power (135). Abubus, who aimed at the supreme power (135). Ptolemy's designs were frustrated, however, owing to the niscarriage of his plans for the assessmation of Simon's third son, John, governor of Gazara. The latter, warned in time, slew the emissaries of Ptolemy, and forthwith assumed the government and the high-priesthood.

More than thirty years had passed since Matta-thias openly resisted the religious persecution of his nation. In the faithful and skilful hands of his sons the crusade inaugurated by him had been In some the crusate marginated by nin had been singularly successful. One by one they had fallen in the sacred cause which he had committed to them (1 Mac  $6^{46}$  9<sup>18</sup> 9<sup>36, 42</sup> 13<sup>23</sup> 16<sup>16</sup>). But they had not shed their blood in vain. The valour of the Mac-cabees had rehabilitated the Jewish nation. Not only was the old spirit of independence thoroughly aroused, but there was also developed a new con-As the most thrilling epoch in Jewish history, and that which shaped the last phases of Jewish belief prior to the advent of our Lord, the age of the Maccabees has a peculiar interest for the student of

Christianity. iv. THE HASMON EAN DYNASTY. — The relationship of the various scions of the Hasmonæan house is exhibited in the subjoined genealogical table.

The reign of John Hyrcanus (135-105) was bright and prosperous. After the flight of Ptolemy, his brother-in-law, he encountered the hostility of Antiochus VII. (Sidetes), to whom he agreed to pay tribute. But in B.C. 128 Antiochus met his death in fighting against the Parthians, and Hyrcanus availed himself of the opportunity afforded by the dispute which arose about the succession to the throne of Syria to make the Jewish kingdom territorially as extensive as it had ever been. The The reign of John Hyrcanus (135-105) was bright territorially as extensive as it had ever been. The country E. of the Jordan, Samaria, and Edom were in turn brought under his sway, and no further tribute was paid to the Syrian kings. He further added to the defences of the country and during added to the defences of the country, and during his reign the old fortress of Baris (later Antonia) was rebuilt. Hyrcanus also concluded a treaty with the Romans, and was the first Jewish prince whose name was inscribed on the coins. Men liked to flatter themselves that the prophetic gift had been restored in his person (Jos. Ant. XIII. x. 7). Outwardly brilliant, however, as his reign was, it was marked by a strong development of internal discord. It was at this time that the sects of the Pharisees and Sadducees first took definite shape

185

186

as political and religious parties. The Maccabæan party was originally Pharisaic, but Hyrcanus now went over to the Sadducees, who attached more value to political supremacy. Of the five sons left by Hyrcanus, three rose to

Of the five sons left by Hyrcanus, three rose to power. Their names were originally Judas, Mattathias, and Jonathan, but in accordance with their father's new-born Hellenistic proclivities they were now designated Aristobulus, Antigonus, and Alexander Jannæus.

Hyrcanus bequeathed the civil power to his wife, and the high-priesthood to his eldest son Aristobulus. But the latter shut up all his relatives in prison except Antigonus, and openly assumed the title King of the Jews, 'a name previously unknown to Heb. history, but destined to carry with it a sacred and enduring significance' (Mt 27<sup>11</sup>, Mk 15<sup>2</sup> etc.). Antigonus also fell a victim to his jealousy, owing to suspicions awakened in him by 'his evil spirit' Salome Alexandra. In other respects he appears to have deserved well of his country, whose boundaries he enlarged by the subjugation of the Ituræans; but remorse for the murder of his brother is said to have brought on his death, which occurred in B.C. 104, after a reign of only one year.

in B.C. 104, after a reign of only one year. The next king was **Aiexander Jannæus** (104-78), the eldest surviving brother of Aristobulus. Of warlike disposition, he set himself to complete the conquest of Palestine, which his father had begun, and after varying fortunes succeeded in bringing under his sway most of the important towns on the Philistine coast, as well as the regions E. of the Jordan. But Jannæus had other battles to fight. His reign was marked by civil dissension and internal revolt. A supporter of Hellenism, and a dissolute high priest whose hands reeked with blood, he came into acute collision with the Pharisees, and took the most savage revenge on his opponents. Before his death Jannæus handed over the

Before his death Jannæus handed over the government to his wife **Salome Alexandra**, who soon proved her fitness to rule. Shrewdly enough, she at once threw herself into the arms of the Pharisaic party, allowing them practically to regulate the inner life of the nation, but reserving to herself the control of external affairs. Her elder ton Hyrcanus II., as a pliable weakling, was invested with the office of high priest, while her younger son Aristobulus, who had energy and ability enough to

render him dangerous, was kept strictly aloof from public affairs. The latter, who disliked the Pharisees and the docility with which his mother gave effect to their wishes, particularly aş regards an illadvised attempt to take vengeance on those who had counselled the crucifixion of 800 rebels during the reign of his father Jannæus, ultimately seized several fortresses, and contrived to raise an army, with which he bore down upon Jerusalem. At this stage Alexandra, who had on the whole ruled happily and with discretion, died after reigning for nine years (69).

Aristobulus soon got the better of Hyrcanus II., who agreed to retire in his favour and reside in Jerusalem as a private citizen. But the abdication of Hyrcanus was distasteful to some, and especially to one whose name we now meet with for the first time—the Idumæan Antipater, father of Herod the Great. Working upon the fears of Hyrcanus, this man persuaded him to flee for protection against his brother to the Arabian king Aretas, from whom he extracted a promise to re-establish Hyrcanus in his dominions, provided the latter gave up all claim to twelve cities unjustly wrested from the Arabians by Alexander Jannarus. Defeated in battle, and deserted by many of his troops, Aristobulus retreated to the temple mount, where he was besieged by a coalition army of Arabs and Pharisees.

At this juncture (B.C. 65) the shadow of Rome first fell upon the land. Scaurus, the legate of Pompey in Syria, having been appealed to by both parties, went to Jerusalem and decided in favour of Aristobulus. Aretas had accordingly to withdraw. But in the spring of 63 ambassadors from both parties appeared before Pompey himself at Damascus, while the representatives of a neutral party pled for the abolition of the monarchy and the re-establishment of the ancient constitution. Pompey delayed his decision, and Aristobulus, feeling insecure, at once occupied the stronghold of Alexandrium. Pompey advanced to attack him., whereupon Aristobulus surrendered all the fortresses, but fell back upon Jerus. and prepared for resistance. His vacillating policy was further illustrated when Pompey approached the city. Aristobulus sued for peace, and offered to open the gates and make a money payment; but when Gabinius was sent for the money, the gates were

closed against him, and Pompey advanced against Jerusalem. The party of Hyrcanus, to which fear of the Romans brought many accessions, opened the city gates, but the supporters of Aristobulus entrenched themselves in the temple mount. After a three months' siege, however, the walls were scaled, and 12,000 Jews were slain. Apparently from curiosity, and to the lasting horror of the Jews, Pompey entered the Holy of Holies, but subsequently ordered the sanctuary to be purified, The and the usual sacrifices to be continued. ringleaders in the war were executed; Aristobulus and his family he took with him as prisoners; Hyrcanus was designated high priest and ethnarch, but not king. The boundaries of Judæa were also greatly contracted, and Jerus. was garrisoned by the Romans. Not even yet had the Jews learned to avoid calling in the interference of foreigners, but Rome knew how to profit by their internal strifes and factions.

strifes and factions. As the star of the Hasmonæan dynasty set, that of the Herodian rose. Hyrcanus was only a puppet in the hands of Antipater and the Romans. division of Palestine by Gabinius into five districts (συτέδρια) did not, as was hoped, weaken the feeling of national unity. The Hasmonzans made several abortive efforts to regain power. Revolts were led in the year 57 by Alexander, the son of Aristobulus, in 56 by Aristobulus himself and his son Antigonus, and again in 55 by Alexander. Once more, in B.C. 54, after the defeat of the Romans at Carrhæ, the Jews rose in rebellion, but were routed by Cassius. These attempts would have succeeded as against Antipater, but they could not do so as against Antipater and the Romans, who always came to his aid. In B.C. 49 Cæsar set Aristobulus at liberty in order to send him with an army against Antipater; but while he was yet in Rome Aristobulus was poisoned by the adherents of Pompey, who also contrived to have Alexander put to death at Antioch.

While Antipater continued to curry favour with the Romans, the Jews became jealous of his grow-ing power. This feeling was intensified through the appointment of his eldest son Phasael as governor of Jerus., and of his second son **Herod** as governor of Galilee. The latter soon felt himself strong enough to defy the Sanhedrin, and even to menace Jerusalem. In spite of the accusa-tions of the Sadducæan dignitaries, the two brothers secured the friendship of Antony. Antigonus, the son of Aristobulus II., made yet another desperate effort to obtain the kingdom. Although defeated by Herod, he was actually set up as king by the Parthians, and Herod's fortunes sank to the lowest ebb. Phasael made away with himself in prison, and Herod escaped to Rome, where he was re-cognized as king of Judæa (B.C. 40). A year later Herod landed at Ptolemais, and, after a war extending over two years, he at length, with the help of the legions of Sosius, captured Jerus. and mercilessly slaughtered his opponents. Antigonus was carried a prisoner to Antioch and there put to death. Herod now assumed the kingdom, and the Hasmonæan dynasty was at an end. Shortly before Jerus. fell into his hands he had married Mariamne, who, as granddaughter to both Hyrcanus and Aristobulus, represented the two opposing sections of the Hasmonæan house. But within sections of the Hasmongan house. But within the first decade of his reign this brilliant and resourceful but cruelly jealous man murdered all its still surviving members, to make sure that none of them should ever supplant him in the govern-ment. So perished in succession the youthful high priest Aristobulus, the aged Hyrcanus II., Here own wife Morianne and last of all Alex Herod's own wife Mariamne, and last of all Alex-andra, the daughter of Hyrcanus II. For these crimes Herod was to suffer a poetic retribution.

In his closing years the murderer of the Hasmonæans became the murderer of his own sons, having about the year B.C. 7 ordered Alexander and Aristobulus to be done to death at Sebaste, where their mother Mariamne had become his bride. With them the history of the Maccabees comes to a close.

LITERATURE.—The chief sources for the Maccabesan history are 1 and 2 Mac (see next article), and Jos. Ant. XII. v. 1 onwards. Several Psalms, notably 44. 74. 79. and 83 are prob-ably Maccabeson; some scholare, c.p. Reues and Cheyne, ascribe many more to this period, but their conclusions are to be accepted with caution. For passing references in Greek and Roman authors, see Schürer, HJP. i. p. 110 ff. Of modern works, besides shorter articles in the heat Bible Dictionaries, the student may consult Derenbourg, *Histoire* de la Palestine, 1887; Ewald, Hist. of Israel, vol. v. [Eng. tr.] 1874; Stanley, Jewish Church, vol. iii. 1876; Madden, Cons of the Jewa, 1881; Stade, Geschichte des Volkes Israel, 1888; Schürer, HJP (Index); Wellhausen, Israeitische und Jüdische Geschichte, 1894 (31898); Fairweather, From the Exile to the Adent, 1895; H. Weiss, Judas Makkabaeus, 1897; Streane, The Age of the Maccabese, 1898. W. FAIRWEATHER.

**MACCABEES, BOOKS OF** (Marka $\beta$ alw, a',  $\beta'$ , etc.). —Some important MSS of the LXX contain four books so entitled.\* Of these the first two were incorporated in the Vulgate from the Old Latin translation, and accepted as canonical by the Council of Trent (1546). The Churches of the Reformation, on the other hand, adhering more strictly to the Heb. Canon, placed them among the OT Apocrypha, which were originally in-cluded in the Geneva Bible (1560) and in all the English Versions. The remaining books, which of the Maccabees, have found, as they deserve, much less recognition in the Church. The order in which these books exist in the MSS, while not chronological as regards their subject-matter, accurately reflects the date of their composition as well as their comparative worth.

A. I MACCABEES is the main source we possess for the history of the period with which it deals. This period covers the forty years (B.C. 175-135) from the accession of the Syrian king Antiochus IV. (Epiphanes) to the death of Simon.

1. Contents and Style -After a brief introductory allusion to the conquests of Alexander the Great and the partition of his empire among his \* A and Cod. Venetus contain all four books, \* contains (apart from lacunce) the first and the fourth. (See below).

188 MACCABEES, BOOKS (

successors, by way of tracing back supremacy in Judata  $(1^{1-9})$ , the author goes on to give a detailed description of the attempt made by Epiphanes, in concert with a Hellenizing party among the Jews themselves, forcibly to introduce into Palestine foreign customs and pagan rites, and to destroy the Jewish religion root and branch  $(1^{10-64})$ . He then narrates the action taken by Mattathias the priest, who in his native town of Modin openly resisted the persecuting measures of Actionations and placed bineals Antiochus, and placed himself at the head of a band of faithful Israelites who first betook themselves to the mountains, but who, as their numbers increased, began to traverse the land and enforce the observance of Jewish rites (ch. 2). Almost before the movement had been well started, Mattathias died  $(2^{60})$ , and the remainder of the book deals with the splendid struggle for faith and freedom under the leadership of his sons, who and reaction under the leadership of his sons, who ultimately succeeded in securing for their country, not only the religious liberty for which they first took up arms ( $6^{\infty}$ ), but civil independence as well (13<sup>41</sup>). After graphically describing the course of events under the successive leadership of the three brothers Judas ( $3^{1}-9^{23}$ ), Jonathan ( $9^{23}-12^{24}$ ), and Simon (13<sup>1</sup>-16<sup>10</sup>), the book closes with the record of the scape of Simon<sup>2</sup> son Joby Hyrocours of the escape of Simon's son, John Hyrcanus, from the fate which overtook his father and his two brothers, and with a reassuring reference to the chronicles of his high-priesthood  $(16^{19-24})$ . The hero of the book is undoubtedly Judas Mac-

The hero of the book is undoubtedly Judas Maccabeus, and its most detailed section is naturally that which narrates his achievements and fortunes. It is written for the most part in the simple narrative style of the OT historical books, and in the phraseology it is easy to detect many reminiscences of both the prose and the poetry of the older canonical writings  $(1^{26.57} 9^{21.22} 14^9 \text{ etc.})$ . At times the language throbs with passion  $(1^{26-26})$ , becomes eloquently descriptive  $(14^{8-16})$ , or rises into poetry  $(3^{2-9})$ . But the work is in no sense that of a skilful literary artist who groups his facts with a view to scenic effect. The writer is a plain and honest chronicler who sets down the facts in their historical sequence, with scarcely an attempt to theorize upon them or to point out their significance.

2. Unity.—Previous to the 19th cent. no attempt was made to impugn the unity of the book. In view of the striking absence of the Divine Name from first to last, the careful chronology of the work as a whole, and the uniformity of the style throughout, there has been a very general disposition to ascribe the entire composition to a single author. Some modern scholars, however (e.g. Whiston, Destinon, and Weilinstein, regard cise 12-13 as a later addition unknown to Josephus. The singularly brief manner in which that historian deals with the reign of Simon may perhaps lend some colour to this theory, but can scarcely be said to prove it. At the opposite pole from this view, and still more improbable, is that of Ewald, who thinks these concluding chapters are the main portion of the book, to which chs. 1-13 are merely introductory.

3. The Language of the Original Book. — The Greek text of 1 Mac is beyond doubt a translation; the work was written originally in Hebrew. On this point we have the express testimony of Origen and Jerome. The former, at the close of his list of the canonical books (in Euseb. HE vi. 25) says, 'But outside the number of these is the Maccabæan history (rå Maxaβaïaćd), entitled Sarbeth Sabanaiel' (Σαρβηθ Σαβαναιέλ). The work here referred to as known to Origen in its Heb. form is unquestionably the First Book of Maccabees.\*

• The meaning of the Semitic title given by Origen has been much disputed. Most of the conjectures advanced (see Grimm, Jerome († 420) states explicitly: 'The first book of Maccabees I found in Hebrew; the second is Greek, as can be proved from its very style' (*Prol. Gal. ad lib. Reg.*). The *internal* evidence for a Heb. original is also sufficiently conclusive. Although the book has many points of resemblance to the LXX, upon which its Greek seems to be largely modelled, and from which it even directly quotes (cf. 7<sup>17</sup> with Ps 79<sup>3.3</sup>), the constant use of Heb. idioms and OT phrases (1<sup>29</sup> 2<sup>46</sup> etc.), as well as the whole structure of the sentences, precludes the idea of its having been written originally in Greek. There are also in the Greek text many obscurities, due in all probability to mistaken renderings from the Hebrew (2<sup>6</sup> 6<sup>1</sup> 11<sup>6</sup> 14<sup>6</sup>). Moreover, at this period no Palestinian Jew seems to have written in Greek. A more plausible case might be made out in favour of an Aramaic original, although it is practically certain that the author wrote in classical Hebrew, which was still the language of the learned, and above all of sacred literature.

4. The Author.—The name of the author is unknown. It is, however, quite clear from his warm sympathy with the Maccabean movement, as well as from his minute knowledge of Palestine, that he was an orthodox Jew of that country. Nor can we tell who was the translator. In spite of its Hebraistic character, his Greek is not difficult to read, and is marked even by a certain fluency. His translation was probably executed somewhere about the middle of the 1st cent. B.C., and certainly not later than the time of Josephus, who seems to have been acquainted with it.

5. The Date.—As to the date of the original work, it is clear from 16<sup>321</sup> that it was not composed until after the death of John Hyrcanus (B.C. 105). Ewald's opinion, however, that our author wrote *immediately* thereafter, is not borne out by the nature of the reference to the annals of that prince as an already well-known work. On the other hand, in view of the writer's friendly tone towards the Romans (ch. 8), the time of composition cannot have been later than B.C. 64, the year prior to Pompey's entrance into Jerusalem. At some point between these two limits the work must have been produced, but the exact year cannot be determined. The likelihood is, however, that it belongs to the first or second decade of the 1st cent. B.C., for as there is no allusion to anything later than the death of Hyrcanus, it seems best not to separate the composition of the book by too long an interval from that event. 6. Sources.—There can be little doubt that the

6. Sources.—There can be little doubt that the author drew to a certain extent upon existing <u>written sources</u>. Even if an ald man at the beginning of the 1st cent. B.C., his own recollections could extend to only a part of the period with which he deals. There is, of course, to be kept in mind the possibility of his having gathered information from older men, as well as the fact that he had doubtless at command a body of tradition singularly fresh, living, and distinct. But the narrative is so well informed, includes such a mass of detail, and is in general so accurate and precise, that we must suppose him to have had access to certain written notices of the Maccabean struggle, and of the three brothers with whose names it is specially identified. Otherwise, no one living in the second generation after could Kurzgef. Exaget. Handb. p. xvii; Keil, Comm. p. 22; Bissell in Lange-Schaff's Comm. p. 475) are based upon the reading sarbeth Sarbare El (ZapSt B ZapSart EA), adopted by Stephanus, and accepted even by Fritzsche (Schenkel's Bib.-Lex. under 'Makimbker'), although by far the best attested reading, and according to Schurer (HJP n. iii. 9) 'the only reading that can claim to be recognized,' is that given above. It may possibly be transcribed by  $\pi_J \pi y$  (sar baydh shebbänäh ed), i.e. 'the prince of the house which God hath built up.' In any case the title is Semitic, and points to a Heb. original of our book.

have produced such a work. The use of written sources seems to be implied in 9<sup>22</sup>, but the passage throws no light upon their origin or nature.

Some of the official documents which, as in the Book of Ezra, are incorporated with the narrative, the author states to be 'copies' ( $8^{22} 12^{4.19} 14^{20.27}$ ), and these may perhaps for the most part be accepted as genuine,—or at least as fairly accurate Heb. translations,—as may also some of the letters from the Syrian kings. Yet in not a few cases (cf. esp.  $10^{51} 12^{20.7} 14^{40.22} 15^{16.7}$ ) we have probably only an attempt on the part of the writer or his authority to give a free version of the lost originals.<sup>\*</sup> He evidently did not hesitate to deal in a free and easy manner with such documentary materials as lay to his hand. In substance, however, these ostensibly official records are quite apposite to the historical relations of the period.

7. *Historicity*.—In spite of the clever attempt made by the brothers E. F. and G. Wernsdorf about the middle of the 18th cent. to discredit 1 Mac as a historical work, there is but one verdict among modern critics with regard to its general trustworthiness. The writer's habit of dating the chief events according to a fixed era (the Seleucid era of B.C. 312), the general agreement of his chron-ology with that of Greek and Roman authors, and with the data furnished by extant coins of the period, the frankness and self-restraint shown by him in chronicling victory or defeat on the part of the Jews, and in speaking of their adversaries, the absence from his pages of tawdry ornamentation and weak supernaturalism,-all combine to give to his work the stamp of authentic history. Occasional errors occur, as in 16, which represents Alexander the Great as dividing his kingdom among his generals; in 8<sup>4</sup>, where the author overstates the number of elephants em-ployed at the battle of Magnesia (cf. Livy, xxxvii. 39); in  $8^{127}$ , where mistakes are made in several particulars regarding the Romans; in 12<sup>4</sup>, where he speaks of the Spartans as racially akin to the Jews; and in 14<sup>1</sup>, where he is at variance with other writers as to the time when Tryphon murdered Antiochus VI. But these are mostly blemiahes due to his limited knowledge of the world outside of Judzea, and do not seriously affect the value of the book as a contribution to Jewish history. The one criticism which may Jewish history. with justice be offered in this connexion is that the writer sometimes undoubtedly exaggerates in point of numbers ( $5^{54}$   $6^{30}$  37  $11^{47}$ ), but even this fault is to some extent condoned by the prevailing custom of that age.

8. Religious Character.—The religious character of the book corresponds to its trustworthiness as history. It breathes a spirit of genuine piety. The standpoint of the author is that of orthodox devotion to 'the law and the ordinances' (2<sup>21</sup>), and unqualified abhorence of heathen presumption (1<sup>23</sup>), blasphenies (7<sup>36</sup>), and enormities (1<sup>867</sup>). In presence of the direst dissisters he retains his faith in an overruling Providence (1<sup>64</sup>), and does not forget that a righteous cause is more essential than a great army (2<sup>61</sup> 3<sup>18</sup>). But, in spite of the intense theocratic feeling that underlies the book, there is a remarkable reserve shown in the expression of it. The Maccabees are pious (4<sup>667</sup>: 12<sup>15</sup> 16<sup>3</sup>) and devoted men (2<sup>317</sup>. 3<sup>564</sup> etc.), but their triumphs are represented as due to their soldierly skill and diplomatic wisdom, and not to any special intervention of God. In this we detect a deviation from the mode of statement adopted in the older canonical histories. Yet the religious

• Fritzsche accepts as genuine all the documents called • copies,' and regards all the rest as free reproductions by the author. But this seems too artistic.

spirit of the book is such that Luther felt it might with advantgge have been included in the Canon of Scripture, and altogether it stands on a higher plane than the other 'Books of Maccabees.' Devout Israelite as he is, however, the writer avoids the mention of the Divine Name, which (according to the true text) does not once occur in his narrative. Prayer is directed to the remote heaven, not to a present encompassing Jehovah  $(3^{30} 4^{10})$ . Except in the diluted form of a pathetic forward look towards 'a faithful prophet' who should announce the divine will with regard to pressing problems in Church and State  $(4^{46} 14^{41})$ , the Messianic hope is absent from the book. Nor is there any reference to the doctrine of the resurrection.

9. Use in the Christian Church.—Although not extensively, 1 Mac would seem to have been used in the Christian Church from an early date. Tertullian († 220), adv. Judæos, c. 4, says: 'Nam et temporibus Maccabæorum sabbatis pugnando fortiter fecerunt' (cf. 1 Mac 2<sup>415.</sup>); Cyprian (c. A.D. 250) quotes the book in his Testimonia (iii. 4. 15, 53), each time with the formula in Marhabaeis; Clement of Alexandria († 220) speaks of  $rd(\beta_i\beta\lambda i \omega)$  $\tau \tilde{\omega} r$  Maxxa $\beta a \tilde{\omega} \tilde{\omega}$ , and also of  $\eta \tau \tilde{\omega} r$  Maxxa $\beta a \tilde{\omega} \tilde{\omega}$ , and also of  $\eta \tau \tilde{\omega} r$  Maxxa $\beta a \tilde{\omega} \tilde{\omega}$ , and also of  $\eta \tau \tilde{\omega} r$  Maxxa $\beta a \tilde{\omega} \tilde{\omega}$ , and also of  $\eta \tau \tilde{\omega} r$  Maxxa $\beta a \tilde{\omega} \tilde{\omega}$ ; Clement of Alexandria († 220) speaks of  $rd(\beta_i\beta\lambda i \omega)$  $\tau \tilde{\omega} r$  Maxxa $\beta a \tilde{\omega} \tilde{\omega}$ , and also of  $\eta \tau \tilde{\omega} r$  Maxxa $\beta a \tilde{\omega} \tilde{\omega}$ ;  $\ell \pi rout \eta$ , Strom. i. 123, v. 98; Hippolytus († 235) in his Comm. in Daniel, chs. 31-32, draws largely on 1 Mac, quoting almost verbatim 2<sup>362</sup>; Origen († 254) also, in his Com. in Ep. ad Rom. (bk. viii. ch. i.), says: 'Sicut Mattathias, de quo in primo libro Machabæorum scriptum est quia "zelatus est in lege Dei," etc. (1 Mac 2<sup>41</sup>). References to our book as the First Book of Maccabees also occur in the Demonstr. Evang. of Eusebius († 338), and in the writings of Augustine († 430). On the other hand, the Maccabæan books are placed outside the Canon by Origen, and omitted from the lists of OT Scriptures given by Athanasius († 373), Gregory of Nazianzus († 390), and Cyril of Jerusalem († 386), and until the Council of Trent enjoyed only 'ecclesiastical,' not canonical rank. 10. The MSS. — The Greek Text of 1 Mac,

10. The MSS. — The Greek Text of 1 Mac, although not contained in the Codex Vaticanus (B), has a place in both the Codex Sinaiticus (N) and the Codex Alexandrinus (A)—MSS dating respectively from the 4th and 5th centuries. Next to these in age and importance comes the (8th or 9th cent.) Codex Venetus (V.). All the other (16) MSS are later than the 11th century. The best modern editions are those of Fritzsche (*Lib. Apoc. Vet. Test. Græce*, 1871) and Swete (*Old Test. in Greek*, Cambridge, 1894, 2nd ed. 1899).

Cambridge, 1894, 2nd ed. 1899). 11. Versions.—Only two old versions of 1 Macare extant: (1) The Latin, which exists in two recensions, (a) the common text embodied in the Vulgate, and (b) another containing chs. 1-13, printed in Sabatier's Bibliorum Sacrorum Latince Versiones Antique, ii. p. 1017 ff., and more recently discovered in a complete form in a MS now at Madrid. The latter appears to be the older recension. (2) The Syriac. This version, like the translator's mode of giving the names of places, however, seems to point to his acquaintance with them in their Semitic form, and this circumstance, while rendering the version exceptically serviceable, is also a testimony to its antiquity.

able, is also a testimony to its anonymy. B. II MACCABRES covers the history from the close of the reign of the Syrian king Seleucus IV. Philopator (B.C. 176) to the death of Nicanor (B.C. 161), a period of little more than 15 years. This takes us back one year further than 1 Mac does; but, on the other hand, the narrative stops short by a quarter of a century of the point reached in that work. Except that it deals with a relatively smaller section of the history, the Second Book thus virtually runs parallel with the First. For

**190 MACCABEES, BOOKS OF** 

the opening year (or rather more) of the period which it covers, *i.e.* for the events narrated from  $3^1$ —where, properly speaking, the book begins—to  $4^6$ , it remains the chief authority, but for the rest of this period it ranks only as an independent supplement to the First Book.

Supprement to the risk book. 1. Contents and Historicity.—In its present form 2 Mac begins with two letters in which the Palestinian Jews urgently invite their kinsmen in Egypt to take part in the Feast of the Dedication  $(1-2^{18})$ . whether in Egypt or in Jerusalem is not quite clear, although the latter supposition has the greater probability. Then follows the writer's own preface, in which he remarks upon the source, scope, and design of his work  $(2^{19-33})$ . After this comes the main narrative (3-15), which is an abridgment  $(exrout), 2^{26-26}$  of a larger history in five books by one Jason of Cyrene, a Hellenistic Jew. The first part of the abridgment  $(3^{1}-4^{6})$ tells of a futile attempt by Heliodorus, prime minister of Seleucus IV., to rob the temple, and of the traitorous and slanderous policy pursued by a certain Simon against the good high-priest Onias. From 4<sup>7</sup>-7<sup>49</sup> the narrative is practically an expanded version of 1 Mac 1<sup>10-64</sup>, setting forth with great fulness of detail the religious persecution under Antiochus IV. (Epiphanes), and exhibiting at once the lamentable apostasy of one section of the Jews and the immovable faithfulness of others, even to the point of martyrdom. The remainder of the Syrian general Nicanor by Judas.\* The epitomizer ing his own work  $(15^{37-39})$ . The first letter  $(1^{1-9})$ , which is dated from the

year 188 of the Seleucid era (B.C. 124), refers to a letter written by the Palestinian Jews to their brethren in Egypt during 'the tribulation and extremity' induced by the apostasy of Jason the high priest under Demetrius II., and asks them to repeat the sympathy apparently shown to them then by keeping ' the feast of tabernacles of the month Chislev' (i.e. the Feast of the Dedication) now that the temple service was happily restored. The second letter  $(1^{10}-2^{18})$ , which bears no date, purports to be addressed by the Jews of Palestine, the senate ( $\gamma e \rho o \sigma \sigma a$ ), and Judas to the priest Aristo bulus, king Ptolemy's teacher ( $\delta i \delta \delta \sigma \kappa \lambda \delta \sigma$ ), and to the Egyptian Jews. After telling how their oppressor Antiochus IV. (Epiphanes) had perished while attempting to rob the temple of Nanæa (1<sup>11-1</sup>), and intimating their intention of celebrating the Feast of the Dedication and commemorating the recovery of the sacred fire under Nehemiah, they invite their kinsmen in Egypt to take part in the festival (1<sup>19</sup>). There follow legendary stories of the manner in which the holy fire was preserved and found again  $(1^{19-36})$ , and of the hiding by the prophet Jeremiah, in a cave-dwelling, of the tabernacle, the ark, and the altar of incense until God should again smile upon His people  $(2^{1-8})$ . A miracle similar to that associated with Nehemiah had already taken place at the dedication of the temple by Solomon, who 'kept the eight days'  $(2^{9-13})$ . Judas Maccabæus is also represented as having meritoriously followed the example of Nehemiah in making a collection of national records and sacred books  $(2^{13-16})$ . The letter closes with another invitation to keep the feast, and with the hope that God may speedily gather the dispersed Israelites into the holy land  $(2^{16-18})$ .

The two letters prefixed to the book have in reality no connexion either with it or with one

<sup>9</sup> Some prefer to divide the book into five sections, of which the respective endings  $(3^{40}$  7<sup>43</sup> 10<sup>9</sup> 13<sup>35</sup> 15<sup>37</sup>) are supposed to be coincident with the close of the several volumes of Jason.

another, except in so far as they both aim at commending to the Egyptian Jews the Feast of the Dedication. The particle  $(\delta \ell)$  by which they are linked on to the 'epitome' does not necessarily imply any prior narrative. Schürer correctly holds that 'they are evidently originally independent pieces of writing, afterwards combined by a later hand, but not that of the epitomizer, with this Second Book of Maccabees' (*HJP* II. iii. p. 213). The glaring contradictions of 17, which represents the climax of affliction as having been experienced under Denetrius II. Nikator, and 15<sup>37</sup> which states that from the time of Nicanor's death (B.C. 161) the Holy City had been held by the Hebrews, and of 1<sup>11-16</sup> and ch. 9 with respect to the death of Epiphanes, render impossible the view that these letters were indited by the epitomizer. Besides, they are written in a simpler and less rhetorical style than the main narrative, their proper chronological position in which would be after 10<sup>1-9</sup>.<sup>•</sup> Both letters are palpable forgeries. In B.C. 144, when the first was written, 'the extremity' (17) was certainly past, and it seems incredible that the second, which, among other blunders, ascribes to Nehemiah the rebuilding of the temple and the altar (1<sup>16</sup>), should have emanated from the Jewish senate. Such blemishes unmistakably stamp both epistles as apocryphal products of a later time.

sense: State beins as a porcyphal products of a later time. Of Jason or of his history nothing is known beyond what is conveyed in 2 Mac. That he was identical with the ambassador of 1 Mac 8<sup>17</sup> is a pure conjecture. Although a Jew 'of Cyrene' he shows more acquaintance with Syria than with Egypt and Palestine. In all that relates to the former kingdom his knowledge is extensive and minute. The names and rank of Syrian officers  $(4^{-7} 5^{24} 12^6 14^{12})$ , as well as the identity of minor personages  $(4^{39} 8^{32} 10^{33})$ , are familiar to him. On the other hand, his knowledge of Palestine and even of Egypt is geographically defective, and is limited to outstanding events and personages. All this points, perhape, to his having been no longer resident at Cyrene when his work was written.

2. Author.-The personality of the epitomizer is unknown. He was perhaps an Alexandrian Jew, although his work bears no trace of the Jewish-Alexandrian philosophy of religion, and contains nothing alien to the orthodox Palestinian Judaism of the period. His relation to Jason's history is made quite clear by himself  $(2^{19-32})$ ; he expressly informs us that his work is only a condensed version of Jason's. From the 'painful labour' involved, it is natural to suppose that his epitome covers the whole of the ground embraced in the five books of Jason. The latter was probably also the sole literary source from which he drew. It is un-warrantable to infer from the fact that in his general digest of the contents of Jason's work he fails to mention that it included events within the reigns of both Seleucus IV. and Demetrius I., that it was therefore confined to the period during which Antiochus IV. (Epiphanes) and his son Eupator held the throne, and that he must have used other sources for those parts of his narrative which deal with events prior and subsequent to that period. According to Grotius only chs. 3-11, according to Bertholdt only chs. 4-11, are based upon Jason's history. But it was enough that in his summary of contents the epitomizer should name the two kings with whom the narrative is chiefly concerned. Moreover, the way in which he disclaims originality and even responsibility for the historical accuracy of the facts embodied in his work  $(2^{28})$  seems to

\* Fritzsche (in Schenkel's *Bibel-Lexicon*), while agreeing that the epitomizer did not write these letters, thinks that he prefixed them to the book because they were consonant to his purpose. But even this is to rate his intelligence very low.

imply that had he made use of any other documentary material he would certainly have specified it. No doubt he has given a certain colouring of his own to the book as we possess it. The exaggerations and florid rhetoric which characterize it are probably due to him, but 'the manifestations that came from heaven' on behalf of Judaism are mentioned as being treated of in the original work, to which also are undoubtedly to be attributed not a few of the inconsistencies found in the 'epitome' (cf. 9<sup>29</sup> with 13<sup>25</sup> etc.). And it is to be remembered that the latter is probably quite as much of a *selection* from the original as a digest of it. To judge from the sample of ability and literary taste exhibited in the epitomizer's prefatory and closing words, his share in the subject-matter must in any case have been slight.

3. Language. - Both Jason and his epitomizer must have originally written in Greek. As a Jew of Cyrene, Jason would naturally make use of that language. That he did so is also suggested by the remarkably pure Greek of the epitome. The Hebraisms which might have been looked for in a translation from Hebrew or Aramaic are in general conspicuous by their absence. Jerusalem is always written Ιεροσόλυμα according to the Greek, never *Γερουσαλήμ* according to the Heb. form. That the Greek text of the epitome is the original can be proved, as Jerome says, from its very style: 'Secundus (Machabæorum) Græcus est, quod ex ipsa quoque  $\phi p d \sigma \epsilon_i$  probari potest.' In this remark, we have at once external evidence for a Gr. original, and the recognition of internal evidence pointing in the same direction. The style of the present work, although at times bald and rough (as e.g. in  $13^{19-26}$ ) is on the whole fluent and unrestrained, and not seldom highly ornate. There is a certain straining after rare words and expressions, as: φιλοφουείν είs τι, 2<sup>25</sup>; άλλοφυλισμός, 4<sup>13</sup> 6<sup>24</sup>; διεμπίμπλημι, 4<sup>40</sup>; θωρακισμός, 5<sup>3</sup>; όπλολογείν τινά, 8<sup>27, 31</sup>; κατευθικτείν, 1443. Some words are employed in an unusual sense, e.g. είσκυκλείσθαι, 224; φροντίζειν τι, 220; ψυχικώς, 4<sup>37</sup> 14<sup>24</sup>; δευτερολογείν, 13<sup>22</sup>. Several άπαξ λεγόμενα appear also to occur, e.g. δυσπέτημα, 5.°; dπευθανα τίζειν, 6<sup>28</sup>; δοξικός, 8<sup>35</sup>; πολεμοτροφείν, 10<sup>14, 15</sup>; διά-σταλσις, 13<sup>25</sup>. The writer is fond of the alliterative use of words from the same root, c.g.  $\delta \gamma c i r \alpha$  $\delta \gamma \omega r \alpha$ ,  $4^{18}$ ;  $d \pi o \delta c \chi \theta c i s$ , . .  $c i \sigma c \delta c \chi \theta \eta$ ,  $4^{22}$ ;  $\delta c \xi i a \sigma \delta c \chi \theta c i s$ , . .  $\delta c \xi i d r$ ,  $4^{24}$ ;  $c i \eta \mu c \rho i a r \delta v \sigma \eta \mu c \rho i a r$ ,  $5^6$ ;  $d \pi o \xi c r \omega \sigma a s$  $i \pi i \xi c r \eta s$ ,  $5^9$  etc. He is also partial to the use of  $\pi \sigma c c \sigma \theta a$  with the accusative of the substantive eccessary to complete the verbal idea, as in 2<sup>20</sup> etc. Clearly he had a large vocabulary at command, and could write the Greek language with ease and mastery.

4. Sources and Date.—If, as is probable, Jason based his narrative on the oral accounts of contemporaries who recited from memory the stirring events of those fifteen years, he must have written soon after B.C. 160. The mythical strain of chs. 6-7, which relate the martyrdom of Eleazar and the seven brethren, and of other parts of the narrative, does not preclude this view, as such myths require no long time for their formation, especially at some distance from the theatre of events. But the exact date of writing cannot be determined. The same is the case as regards the epitome. The curjous statement of  $15^{37}$  might seem to suggest the period immediately subsequent to Nicanor, but this is clearly out of the question. All that can be said with safety is that the work must have been written before the destruction of Jerus. in A.D. 70, since the existence of the city and the temple worship are presupposed. This is further apparent from the fact that 4 Mac, which is based on 2 Mac, was written prior to that event. That our book was composed later than 1 Mac may be inferred from the changed tone of the references to the Romans. If 2 Mac was known to Philo (see below), this would fix the inferior limit of its composition at about A.D. 40.

limit of its composition at about A.D. 40. 5. Relation to 1 Mac. -2 Mac contains much that is special to itself, but where it evidently covers the same ground as 1 Mac it does so with many divergences of detail. It is not, of course, surprising that between two independent narratives dealing with the same events there should be many points of difference. Our two books are, however, so different in genius, form, and contents, that strict comparison is impossible. In historical credibility and value 2 Mac is admittedly inferior to the First Book, the authority of which must therefore be preferred in the case of irreconcilable discrepancies. Of such it may suffice to enumerate the following :--(1) The campaign of Lysias, asscribed in 1 Mac  $4^{26-30}$  to the year before the death of Antiochus IV. (Epiphanes), is transferred in 2 Mac 11 to the reign of Antiochus V. (Eupator); (2) the Jewish raids on neighbouring tribes, and campaigns in Gilead and Galilee, represented in 1 Mac 5 as carried on in rapid succession between the rededication of the altar and the concession of religious likerty, are separately placed in different historical settings (8<sup>30</sup> 10<sup>15-38</sup> 12<sup>3-45</sup>); (3) the account given in ch. 9 differs in several particulars from that of 1 Mac 6 regarding the death of Antiochus IV. (Epiphanes), who it is falsely declared wrote a letter to the Jews; (4) the statement in  $9^{29}$  that after the death of Antiochus, Philip fled to Egypt, is at variance with that of 1 Mac  $6^{55,53}$ ; (5) in  $14^1$ Demetrius I. is said to have landed in Syria 'with a mighty host and a fleet,' in 1 Mac  $7^1$  'with a few men '; (6) Nicanor's personal liking for Judas, 1424, is an incredible circumstance, and contrary to the whole trend of 1 Mac; (7) according to  $15^{37}$  the Acra was in the possession of the Jews at the time of Nicanor's death, whereas according to 1 Mac 1281 it was carbured by Simon only in 1 Mac 13<sup>51</sup> it was captured by Simon only in B.C. 142. Other blemishes disfigure the work, e.g. B.C. 142. Other blemisnes disnigure the work, e.g. the absurd exaggerations in the numbers of the slain ( $8^{14}$  <sup>30</sup> 10<sup>23</sup>. <sup>31</sup> 11<sup>11</sup>); the highly coloured picture of the martyrdoms in  $6^{18}$ -7<sup>42</sup>, and the representa-tion that Epiphanes witnessed them in person; the erroneous particulars as to the place and manner of death of that monarch (9); and the extraordinary details respecting the suicide of Razis (14<sup>37π</sup>). Yet with all its defects 2 Mac is by no means historically worthless. The earlier razis (14<sup>2011</sup>). Fet with all its defects 2 Mac is by no means historically worthless. The earlier portion of the narrative  $(3^{1}-4^{2})$  is of the greatest value, and there is no reason to doubt its sub-stantial truthfulness. There are indeed many important particulars in which the book agrees with 1 Mac (cf. 4-6<sup>10</sup> with 1 Mac 1<sup>10-64</sup>). It is also in accord with Josephus, who was unacquainted with it, in regard to several events about which 1 Mac is silent (cf. 4.  $6^2$  13<sup>3-8</sup> 14<sup>1</sup> with Jos. Ant. XII. v. 1, v. 5, ix. 7, x. 1). Vain attempts have been made to reconcile discrepancies between 1 and 2 Mac on the theory that the writers followed a different chronology. In all probability both adopted the Seleucid era, which began in Oct. B.C. 312. On the relation of this era to dates B.C., see Schürer, *HJP* I. i. p. 36 ff., I. ii. Appen-

dix v. p. 393. 6. Religious Character. — As to its religious character, 2 Mac presents a strong contrast to the First Book. In 1 Mac the name of God remains unuttered, in 2 Mac it is freely used; in the former frequent reference is made to the OT, here it is but seldom alluded to  $(7^6 8^{19} 15^2)$ ; in the one, great reserve is shown in the expression of theocratic feeling, in the other the reverse is the case. Again, instead of a simple objective narrative in which the facts are allowed to make their own impression, we have a highly coloured rhetorical composition with a running commentary upon the

### 192 MACCABEES, BOOKS OF

events recorded (4164. 5<sup>94. 174.</sup> 6124. 96. 18 etc.). The writer aims at the glorification of Judaism, and selects and modifies his historical material with a view to homiletic ends. In particular, it seems to have been the chief design of the compilation in its present form and in this research the true its present form - and in this respect the two introductory letters are certainly significant-to magnify the temple (2<sup>19</sup> 3<sup>2</sup> 9<sup>16</sup> 13<sup>25</sup>), to exalt the importance of the two national festivals connected with the re-establishment of the legal worship and the death of Nicanor, and to encourage, admonish, and edify the Jews of the Dispersion. The work can scarcely be termed a history in the ordinary sense, its whole material being grouped around the temple and the two great festivals, without regard to strict chronological sequence. E.g. the institu-tion of the Feast of the Dedication is placed after the account of the death of Antiochus Epiphanes (cf. 10<sup>867</sup>, with 1 Mac 4<sup>56</sup>) for the sake of effect, and the circumstances connected with the death of Judas are passed over, apparently in order that the previous engagement in which Nicanor lost his life, and its commemorative festival, might stand out in bolder relief. Owing perhaps to an inclination on the part of the Egyptian Jews to set increasing store by their own temple at Leontopolis, the writer seens to represent the temple at Jerus. as the only legitimate sanctuary. It is the headquarters of the Jewish worship  $(2^{19} 5^{15} 14^{31}$ etc.), and honoured even by heathen kings (3<sup>2</sup> 13<sup>22</sup>). The Almighty had often interposed to protect it, and had severely punished its desecrators  $(3^{24})^{34-8}$  14<sup>33</sup> 15<sup>33</sup>). There are constant references to heavenly manifestations  $(i\pi_i\phi_{a}'re_{iai}, 2^{21})$  on behalf of the defenders of Judaism  $(3^{247}, 10^{-97}, 11^{67}, 12^{22})$ . The history is only seen as it were through a coloured spectrum of portents  $(5^4)$ , dreams  $(15^{11})$ , and visions  $(3^{23})$ . The Lord is conceived as the wonder-worker (reparomotos) who in answer to prayer sends 'a good angel to save Israel' (116 15<sup>215.</sup>).

Israel is 'God's people' (1<sup>20</sup>), His 'portion' ( $\dot{\eta}$ Israel is 'God's people' (1<sup>20</sup>), His 'portion' ( $\dot{\eta}$ µepls abroŵ, 14<sup>16</sup>); their calamities are His loving chastisement for their sins (5<sup>18</sup> 6<sup>12</sup>); and from them He will never withdraw His mercy (6<sup>16</sup>). The heathen, on the other hand, are allowed to fill up their cup of iniquity prior to their destruction (6<sup>14</sup>). Foreign kings and their Jewish supporters are the unconscious instruments of the divine punitive righteousness with respect to Israel, but their insolence does not go unpunished (7<sup>26</sup>), and their punishment exactly corresponds to their guilt (4<sup>28</sup> 5<sup>9</sup> 13<sup>8</sup> 15<sup>321</sup>). The view taken of providential rewards and punishments is thus distinctly mechanical and external. 'Providence appears no longer as God's providence, but man's shaped by his wishes and governed by his caprices.'<sup>4</sup> God will one day gather the dispersed Israelites into Palestine (2<sup>16</sup>); than this there is no nearer approach to the Messianic hope. The doctrine of the resurrection, on the other hand, finds the clearest expression (7<sup>26</sup>), and the offering of prayers

According to Geiger, 1 and 2 Mac are partisan writings, the work, respectively, of a Sadducee who espoused the cause of the Hasmonæan house, and of a Pharisee who bore it a distinct grudge. As regards 2 Mac at all events, his theory seems to have much in its favour. Of the genealogy of the Maccabees, the death of Judas, the family sepulchre, no account is taken in the narrative. The priestly order, as represented by Jason and Menelaus, appears in the darkest light. Among the martyrs spoken of there is no priest, whereas one of 'the principal scribes' ( $6^{16\pi}$ ) was the first to defy imperial crueity. The Pharisaic bias of the work is seen also from its rigid Sabbatarianism ( $5^{26}$  6<sup>11</sup> etc.), its partiality for wonders and visions, "Bissell, p. 565.

.

#### MACCABEES, BOOKS OF

and its teaching concerning the resurrection (7). Even the action of Judas himself is ascribed to his mindfulness of the resurrection  $(12^{49})$ .

7. Use by Jews and Christians. — Among the Jews 2 Mac was never received as canonical. In the Rabbinical writings, however, some use is made of it, and in Philo's treatise, Quod omnis probus liber (Mang. ii. 459), the descriptions of tyrannical persecutions of the pious appear to be based upon it. The earliest Christian reference to it is supposed to be in the Ep. to the Heb. (cf. He 11<sup>305</sup> with 2 Mac 6<sup>18, 29</sup>). The first quotation from the book is found in the writings of Clement of Alexandria (Strom. v. 14. 97). Frequent reference is made to it by Origen (Exhortatio ad martyrium, c. 22-27, de Oratione, c. 11, contra Celsum, viii. 46, etc.). The history of the Maccabrean martyrs was a favourite subject with the early Fathers generally (Cyprian, Test. iii. 17; Jerome, Prol. Galeat.; Augustine, de Doctr. Christ. ii. 8, de Civitate Dei, xviii. 36). That the estimation in which the Books of the Maccabreaver held by Augustine exceeded that accorded to them by Jerome, who recognized them as ecclesiastical but not as canonical, appears from the passage last referred to : 'Maccabreorum libri, quos non Judæ; sed ecclesia pro canonica.'

habet propter quorundam martyrum passiones.' 8. MSS and Versions.—What has been said above on 1 Mac with reference to MSS and versions applies for the most part to 2 Mac also. But (1) 2 Mac is omitted in  $\aleph$ ; (2) besides the Old Lat. version which is adopted in the Vulg., and which is not, as in the case of 1 Mac, supplemented in Sabatier by an older text, there is a Cod. Ambrosianus published by Peyron in 1824. The Syriac version is very inexact.

C. III MACCABEES. - 1. Contents. - This book relates how Ptolemy IV. Philopator, after defeating Antiochus the Great at Raphia (B.C. 217), visited Jerusalem, and 'conceived the purpose of entering the sanctuary' (1<sup>10</sup>). Everything was done to dissuade him from this act of desecration, but in vain. Great excitement consequently arose among the Jews, who were with difficulty pre-vented from taking to arms  $(1^{11-29})$ . At the critical moment the calm and reverend figure of Simon the high priest was seen kneeling in front of the temple, and in answer to his earnest prayers God temple, and in answer to his earnest prayers (voi smote the king with paralysis, and he was borne helpless from the sacred precincts  $(2^{1-24})$ . On coming to himself Ptolemy returned to Egypt, but vowing vengeance. This took the form of subjecting the Jews of Alexandria to certain re-ligious disabilities, depriving them of the equal civic rights which they enjoyed with the Mace-donian founders of the city, and branding them with an ivy-leaf as worshippers of Bacchus. Only those who voluntarily embraced the worship of this deity were to retain their privileges  $(2^{2-3n})$ . Enraged at the steadfastness with which the great majority adhered to their ancestral faith, the king commanded the entire Jewish population of the country to be brought in chains to Alexandria (2<sup>31</sup>-3<sup>1</sup>). In spite of attempts made to represent them as disloyal citizens, the Jews had so won the good opinion of all, that some of their Gentile associates interested themselves on their behalf  $(3^{2\cdot10})$ . Notwithstanding the stringent terms of the Jews as it did joy among the heathen,—and the equally harsh manner in which it was carried out, the majority succeeded in evading arrest (311-4<sup>10</sup>). As a preliminary to the intended massacre, the names of all were ordered to be taken down. But, at the end of forty days' continuous work, the clerks reported that, owing to the vast number of Jews to be dealt with, their writing materials were exhausted  $(4^{14-21})$ . Ptolemy next commanded

## MACCABEES, BOOKS OF

that 500 elephants should be intoxicated with wine and incense and let loose upon the Jews in the racecourse. Although all was in readiness for it, the execution of the order was delayed for another day because the king had slept until it was past the hour fixed for his principal daily meal  $(5^{1-22})$ . Next morning, however, Ptolemy was providen-tially made to forget the orders he had given, and recollected nothing but the loyalty of the Jews to himself and his ancestors (5<sup>29-20</sup>). Yet the same evening he summoned the keeper of the elephants and renewed his order for the destruction of the Jews; and in reply to the higher officials, who expressed amazement at his instability of purpose, he swore that he would send the Jews to Hades, and that he would invade Judæa and destroy the and that he would invade Judge and descroy the temple  $(5^{26-43})$ . When, accordingly, on the third day at dawn an enormous crowd had collected, and the king rushed forth to see his commands executed, the Jews called upon the Lord to show executed, the Jews called upon the Lord to show them mercy (5<sup>44-80</sup>). At the prayer of the vener-able priest Eleazar, 'two angels, glorious and terrible,' appeared from heaven, to the conster-nation of the king and his army. The elephants also turned upon and trampled down the royal forces ( $6^{1-22}$ ). The king now directed his wrath against his counsellors, ordered the Jews to be released from their fetters, and feasted them for seven days at the imperial expense. They re-solved on their part to observe these days in all solved on their part to observe these days in all time coming as a festival to commemorate their deliverance. The king also provided them with a letter to the provincial authorities securing them against injury and reproach  $(6^{22}-7^9)$ . They were further empowered to put to death more than 300 of their kinsmen who had apostatized from the law of God, and, after duly availing them-selves of this concession, they joyfully set out for their homes. At Ptolemais they celebrated their deliverance for another seven days, and erected a house of prayer. On arriving at their several destinations they had all their property restored to them, and were held in higher esteem than ever 2. Historicity.—That the narrative has to some

extent a historical background is clear from the opening sketch of the war between Philopator and Antiochus. The details given agree broadly with the statements of Livy, Justin, and Polybius. At Raphia the scale was turned in fayour of Philo-Raphia the scale was turned in favour of Thilo-pator, through the appeal made to the soldiers by his sister Arsinoe (1<sup>1.4</sup>), whom, however, Livy (xxxvii. 4) names Cleopatra, and Justin (xxx. 1. 7) Eurydice. According to Polybius (v. 87), Philo-pator remained for three months in Cœle-Syria and Phœnicia. His Bacchanalian proclivities (2<sup>204</sup>), and Phœnicia. His Bacchanalian proclivities (2<sup>204</sup>) are also mentioned by Justin (xxx. 1) and Strabo (xvii. 796). Theodotus (1<sup>2</sup>) is a historical personage; Polybins (v. 40, etc.) speaks of him as an Atolian who was Ptolemy's commander-in-chief over Cœle-Syria, but who in B.C. 219 went over to the side of Antiochus. Grimm (Introd. § 3) further regards the observance of the two annual festivals ( $6^{26}$  7<sup>19</sup>), and the existence of the syna-gogue at Ptolemais ( $7^{20}$ ), when the author wrote, as the witness of tradition to some great deliver-ance; but there is force in the remark of Fritzsche ' Makkabäer' in Schenkel's Bib. Lex. ), that among the Jewish writers of that period it had become an almost storeotyped custom to link on a festival to every event of importance.

Certainly, in spite of the historical allusions which it contains, and the manifest intention that it should pass for real history, the work must be regarded as a fiction, and that not of the highest order. It abounds in incredible situations ( $4^{20}$ , cf. with  $5^6$   $6^{1.30}$   $7^{18}$ ) and psychological absurdities ( $5^{276}$ ); it is characterized by false statements ( $5^2$ 

VOL. 111.-13

 $7^{2}$ ) and inconsistencies ( $4^{18}$ ); it shows, too, great zest in the interpretation of providence ( $4^{21}$   $5^{30}$  etc.). In short, it bears every mark of being a mythical tale founded perhaps on some no longer definitely ascertainable historical occurrence. There is nowhere else any mention of Philopator having either visited Jerus. or persecuted the Jews. But in Jos. (c. Ap. ii. 5) there is a story of a somewhat similar character connected with the reign of Ptolemy VII. Physicon. That monarch, it is said, punished the Alexandrian Low for this level. punished the Alexandrian Jews for their loyalty to Cleopatra by putting them in fetters and throwing them to intoxicated elephants. As the animals, however, turned against Physicon's friends and killed many of them, and as the king saw a terrible visage which forbade him to injure the Jews, he abandoned his intention, and the Jews kept a feast in commemoration of the event. This appears to be the older as it is also a simpler version of the same floating tradition, which may have been based upon an actual but unsuccessful attempt on the part of some monarch to enter the temple at Jerus, by force—an attempt which was followed up by an effort to be avenged on the Jews. But in 3 Mac, which was apparently un-known to Josephus, the reference of the story to an earlier king of Egypt, and the addition of other embellishments, already mark a deviation from the older tradition. According to many scholars (Ewald, Reuss, etc.), the legend is founded upon the attempt of the emperor Caligula to erect his statue in the temple at Jerus. (Jos. Ant. XVIII. viii. 2), and his subsequent persecution of the Jews, the transference of the event to the reign of Ptolemy IV. Philopator being due to prudential definitely points to Caligula's time, and our author does not represent Ptolemy as aspiring to the honours of deity. The one significant parallel to honours of deity. the times of Caligula is the circumstance, vouched for by Philo, that the Roman governor Flaccus Avillius deprived the Jews of the rights of citizen-ship. On the other hand, if the work be referred to this period (c. A.D. 40), the confinement of the Jews in the hippodrome of Alexandria ( $4^{1157}$ ) might have been suggested by Herod's command that his leading opponents should be so dealt with at Jericho (Jos. Ant. XVII. vi. 5; BJ I. xxxiii. 6). But the exact date of writing remains uncertain. The Greek additions to Daniel are known to the author, who cannot therefore have written earlier than the 1st cent. B.C., but he very possibly lived as late as the 1st cent. A.D. His design was evidently to cheer and console his co-religionists in a time of persecution at Alexandria.

3. Integrity.—In its present form 3 Mac appears to be incomplete. It begins abruptly (5 of  $\Phi(\lambda) = \pi 4 \pi \omega \rho$ ); in 1<sup>2</sup> there is a reference to 'the plot' ( $\tau \eta \nu$  $\epsilon \pi (\beta o \nu) \hbar p$  of which no previous mention has been made; and in 2<sup>23</sup> allusion is made to the king's 'before-mentioned' companions, although the foregoing part of the work is silent regarding them. But it is unnecessary (with Dähne, Ewald, Fritzsche) to suppose that it is a mere fragment; the loss of an introductory chapter would explain all (Grimm). Fritzsche thinks the title of the book indicates that we have in the extant fragment a sort of prolegomena to a complete history of the Macca-bees. Certainly 'Book of Maccabees' is a misnomer as applied to the existing work, which professes to deal with a situation considerably anterior to the Maccabæan rising.

4. Language.—Our book bears every evidence of having been written in Greek by an Alexandrian Jew. The vocabulary is exceptionally rich. Hebraisms are comparatively rare, and never harsh (e.g. 'thy glorious name,'  $2^{14}$ ; 'the heaven of heavens,'  $2^{15}$  etc.). The style, however, is 'bom-

#### 194 MACCABEES, BOOKS OF

bastic and involved,' and even further removed from the category of ordinary prose narrative than is that of 2 Mac, with which it has many points of affinity, such as, e.g., the use of  $\tau \delta \pi \sigma s$  to designate the temple at Jerus, and of  $e\pi c \phi dreat$  to denote the special miraculous interposition of God, and the love of rhetorical word-painting (1<sup>167</sup> 4<sup>367</sup> 5<sup>487</sup>.) It exceeds that work, however, in obscure expressions ( $1^{6.14}$ ,  $1^{72}$ ,  $2^{91}$ ,  $4^{11}$ ), and in straining after poetic effect ( $1^{18}$ ,  $4^8$ ,  $5^{26}$ ,  $6^{4.8}$ ). The opening words of  $5^{21}$ (δσοι γονείς παρήσαν ή παίδων γύνοι) form an iambic trimeter, and seem to be a quotation from some Greek dramatist. Some words bear an unusual meaning, e.g.  $\delta(d\gamma\epsilon)$  (1<sup>3</sup>),  $d\pi p \delta \pi \tau \omega \tau \sigma s$  (3<sup>14</sup>),  $\kappa a \tau a - \chi \rho \hat{a} \sigma \theta a i$  (4<sup>5</sup>); others do not occur elsewhere, e.g. (2<sup>20</sup>),  $\lambda_{aprmpla}$  (2<sup>20</sup>),  $\lambda_{aprmpla}$  (2<sup>20</sup>),  $\pi_{posuot}\lambda_{kes}\sigma au$ (2<sup>20</sup>),  $\lambda_{aprmpla}$  (4<sup>-0</sup>); and others are very rare, or are used only in late Gr. writings, *e.g. treequos*  $(2^{21})$ , φρικασμis  $(3^{17})$ , άλογιστία  $(5^{13})$ , μεγαλομερώ  $(6^{33})$ . The work appears to be more or less coloured by the influence of the Alexandrian philosophy; by the infinite connexion the names  $(\mu \epsilon_{\gamma i\sigma \tau \sigma_s}, \epsilon^{2}, \sigma^{2})$  applied to the Supreme Being, and the distinction made between God and His glory ( $2^{9\sigma_s}$ ). 5. Use by Jews and Christians.—The book seems

to have been practically neglected by the Jews, while the first *Christian* reference to it occurs in the Canones Apostolorum, c. 85 (Markaßaiwr rpia). It is mentioned (ad Dan. 11<sup>7</sup>) by Theodoret of Antioch († c. A.D. 457); in the catalogue of Nicephorus (Markaßaïkà  $\gamma'$ ), and in the Synopsis Athanasii apparently as IIroleµaïkd.\* The work found no acceptance with the Latin Church, and is not included in the Vulg.; but in the Syrian Church it met with considerable favour, as is shown by the existence of an ancient Syriac version, by the respectful allusions of Theodoret, and by the fact that in all probability the catalogue of Nicephorus had its origin in the Syrian Church.

6. MSS and Versions.-3 Mac is found in most MSS and editions of the LXX. A Latin translation was first made for the Complutensian Poly-glott, and has since been followed by several others. Many German versions also now exist, among which may be mentioned those of the Züricher Bibel, Berlenburger Bibel, Bunsen's Bibel-werk, and Kautzsch's Apocryphen u. Pseud-epigraphen. According to Cotton (The Five Books of Maccabees in English, Oxford, 1832, Introd. p. xx), the first English version (by Walter Lynne) appeared in 1550, and was with some modifications embodied in a folio Bible issued by John Daye in 1551.

D. IV MACCABEES. -1. Contents. - This, as a philosophical treatise, occupies a unique position among apocryphal books. The writer's theme is 'the supremacy of pious reason (=religious prin-ciple) over the passions,' + and the Judaism which he advocates is distinctly coloured by the Stoic philosophy. Although the composition takes the form of a discourse in which the direct mode of address is adopted  $(1^{1.7} 2^{14} 13^{19} 18^{1})$ , we are not therefore warranted in supposing (with Freuden-thal) that we have here an actual specimen of a Jewish sermon. The style is too abstruse for an ordinary congregation, and it never became the habit to base discourses upon philosophical propositions instead of Scripture texts. At the same time, the work is not a mere academical thesis. If it suggests an artificial spirituality rather than the natural outflow of a heart deeply under the

\* The text reads Manzz, Saina BiBlis d' Hrolquains, but

- της του του του παθαταρμαία συργαία δ' Πολιματας, but Oredner is probably right in substituting and for λ'. † 11 εί αυτοδίστατός ίστι του ταθών ό εύσιβός λογισμός; 1<sup>13</sup> εί αιτακράτωρ ίστι του παθών ό λογισμός; 1<sup>81</sup> των παθών διαπότης 'στιν διώτεβός λογισμός.

power of religion (Grimm), the writer undoubtedly handles his subject with vigour, moral earnestness, and a desire to edify his readers (or hearers). These were apparently confined to his co-religion-ists (18'  $\Omega \tau \tilde{\omega} \gamma A \beta \rho \mu \mu a l \omega \sigma \pi \epsilon \rho \mu \Delta \tau \omega \gamma a \pi \delta \gamma \sigma \sigma \alpha$ , when he assures that in order to lead a pious life they have only to follow the dictates of ' pious reason.

After an introduction (11-12), the author lays down his thesis that pious reason is perfect master down his thesis that plous reason is perfect matter of the passions, and expounds this proposition not without dialectic skill. Reason he defines as 'intelligence combined with an upright life, and holding in honour the word of wisdom'  $(1^{16})$ ," and wisdom as 'the knowledge of affairs divine and human, and of their causes'  $(1^{16})$ . Wisdom is attained through 'the instruction of the law'  $(1^{17})$ , and is manifested in four continel without '(1''). and is manifested in four cardinal virtues, viz. φρύνησις, δικαιοσύνη, ανδρεία,  $\dagger$  σωφροσύνη ( $1^{18}$ ). A description and classification of the affections, with special reference to the antagonism offered by them to the four cardinal virtues, is also given, and it is shown by examples taken from Jewish history that pious reason is lord of all the affections except forgetfulness  $(\lambda \eta \theta \eta)$  and ignorance (άγνοια). With this ends the first and more strictly philosophical part of the book  $(1^{13}-3^{16})$ . In the second part  $(3^{19}-18^2)$ , after a historical review of the tyrannical treatment of the Jews under the Syrian king Seleucus and his son (*sic*) Antiochus Epiphanes  $(3^{19}-4^{26})$ , the conquering power of reason is constant production of the second build of the second is further represented as most brilliantly illustrated in the martyrdom of Eleazar (5-7) and of the seven brethren (8-1410) and their mother (1411-16<sup>25</sup>). The writer accompanies his account of the martyrdom of these heroic defenders of the faith with frequent and copious remarks of a religious and edifying nature, and introduces occasionally philosophical reflexions  $(e.g. 52^{227})$  which would have been more in place in the first part of his work. In 17-18<sup>2</sup> the author sets down his final work. In  $1/-18^{-}$  the author sets down his nnai impressions regarding the character and signifi-cance of the martyrdoms described by him. The closing section ( $18^{3-23}$ ) appears to be an appendix by a later hand, but the nature of it indicates that it must have been added at no great interval from the composition of the book itself. Fritzsche and Freudenthal regard the spurious addition as limited to 186-19.

4 Mac possesses no value as history. The writer while possesses no value as instory. The while is merely appropriates certain incidents from 2 Mac 6<sup>13</sup>-7<sup>43</sup> by way of illustrating his fundamental proposition regarding the supremacy of pious reason. His delineation of the tortures to which the 'Maccabæan martyrs' were subjected is even more gruesomely realistic than that of 2 Mac, although the detailed description of the inhumanity of the persecutors serves, of course, to bring out more emphatically the steadfast patience of their victims. He may have had sources of information other than 2 Mac, but there is no evidence that he used as an authority the five books of Jason of Cyrene (2 Mac 2<sup>23</sup>). While the work does not aim at being a history, it has nevertheless an importance of its own as a unique example of the way in which Jewish history was turned to account for didactic and homiletic purposes.

2. Language and Style.-The Greek of 4 Mac, although rather laboured, is not so involved or so rhetorical as that of 3 Mac. Owing to the uniformity of the style, which is clear, correct, and genuinely Greek, the work has more of real individuality about it than either 2 or 3 Mac. Lavish use is made of metaphor and declamation, yet the writer can deftly change his style to

\* So the Alexandrian MSS. \* and V read: 'intelligence accom panied by accurate insight (and) choosing the life of wisdom.<sup>4</sup>  $\uparrow A$  has the later form  $\frac{1}{2}\sqrt{2}\sqrt{2}\pi^2$ .

Digitized by Google

suit his subject. Considerable fondness is shown for words and expressions of a rare, novel, or poetical description. Frequent use is also made of prepositional compounds, e.g.  $\epsilon_{I,G,M}$ , $\alpha_{J,G}$ , $\alpha_{I,G}$ , $\alpha_{I,G}$ , $\alpha_{I,G}$ ,  $\epsilon_{I,G}$ ,  $\alpha_{I,G}$ ,

3. Authorship and Date.—Eusebius (HE III. x. 6) refers to our book under the title repl auronpdropos λογισμοῦ, and ascribes it to Josephus. In this he is followed by Jerome (de Viris Illustr. c. xiii., c. Pelag. ii. 6), Suidas (Lez. s.v. Iwoyros), and others ; and indeed for long it seems to have been regarded as settled that Josephus was the author. In the editions of his works it occupies the last place, and is inscribed Φλαβ. Ίωσήπου els Μακκαβαίους λόγος η περί αυτοκράτορος λογισμοῦ. But it exists also in important Scripture MSS of the LXX, and both A and R call it simply 'the fourth of Maccabees' (Maxxa Balwr d'). Gregory of Nazianzus quotes from it without naming Josephus or any one as the author. Its ascription to the Jewish historian must either have been a pure guess, or the result of confusion between him and some other 'Iwoymos, whom tradition named as its author, for the testiwhom tradition named as its author, for the test-mony of Eusebius is quite overborne by the in-ternal evidence. The language and style are utterly different from those of Josephus; the latter was unacquainted with 2 Mac, while 4 Mac is almost wholly based upon it; the grossly unhistorical statements of  $4^{15,26} 5^1 17^{26}$ , are inexplicable on the hypothesis that the work was penned by Josephus; finally, there is about it a flavour of Jewish-Alexandrian philosophy, and an enthusiasm for the heroic, which we do not naturally associate with that writer.

While the exact date of the book cannot be determined, it seems certain that it must have been written after 2 Mac, from which it borrows, and before the destruction of Jerus., of which it makes no mention. Grimm would infer from the statement of 4<sup>1</sup> that Onias was holding the priesthood for life ( $\partial t \partial \beta (\omega)$ ) that the author wrote after the overthrow of the Hasmonaan dynasty, when the life-tenure had been abolished, and from the horror-stricken concern of the Egyptian Jews on hearing of the sufferings endured by the Maccabean martyrs (14<sup>9</sup>) that the former were themselves at the time exempt from persecution. This would point to a date prior to their experiences under Caligula (A.D. 40). Schürer (HJP II. iii. 246), on the other hand, accepts as the date of composition the first century after Christ. 4. Aim and Standpoint.—The aim of 4 Mac is

4. Aim and Standpoint.—The aim of 4 Mac is by demonstrating the supremacy of pious reason to exhort the Jews steadfastly to adhere to the Mosaic law, and not allow themselves in any particular to depart from it (18<sup>3</sup>), either through fear of sufferings or through the subtle attractions of Hellenistic culture. As an educated Jew acquainted with the exacting demands of philosophic paganism, the writer seeks to show his countrymen how to maintain their Judaism intact. Taunts about the fatuity of their ceremonial law were levelled at the Jews by the persecutor (5<sup>65</sup>.), and doubtless by the philosopher as well; but our author reminds his co-religionists of the essential reasonableness of the law even in regard to ritual commands (5<sup>206</sup>.),

and seeks to show that only through obedience to its precepts can the Stoic ideal of humanity be realized. In the concrete examples of endurance unto death furnished by the Maccabæan martyrs he sees the perfection of piety  $(12^{14} 15^{17})$ , and a conclusive proof that in virtue's cause the Hebrews alone are invincible  $(9^{18})$ .

The writer's own standpoint is formally in-fluenced by Greek philosophy, especially by Stoi-cism, which placed the passions under the sovereignty of reason, so providing him with his central idea, as well as with the postulate of four cardinal virtues. In his division and description cardinal virtues. In his division and description of the affections, however, he does not so much adopt the position of any of the current Greek philosophies as give to his own treatment a philo-sophic cast. And if he writes from the stand-point of Stoiciam, he is none the less true to that of legal Judaism. Wisdom, of which the four cardinal virtues are forms  $(l\delta \epsilon a_l)$ , cannot be attained apart from the Mosaic law  $(1^{16\alpha})$ . It is not reason as such, but pious reason (à của chia  $\lambda \sigma \gamma_{i\sigma\mu} \delta \sigma_{j}$ , i.e. reason regulating itself by the divine law (1<sup>150</sup>), So that he exalts as ruler over the passions. literal, indeed, is his conception of the Mosaic law, that some \* on this account maintain the Palestinian origin of the book. His philosophy certainly resembles Pharisaism in its advocacy of rigorous legalism, and of carrying piety into every relation of life (18<sup>4</sup>). In his doctrine of the resurrection, however, it is not the Pharisaic but the Alex-andrian position that is reflected. The writer believes, not in a bodily resurrection confined to the Jews, but in the immortality of all souls, the pious entering into blessedness (98 1718), and the wicked into torment  $(9^9 12^{12} \text{ etc.})$ , upon the death of the body. It is also noticeable that he regards the sufferings of the martyrs as a vicarious atonement for the sins of the people (6<sup>20</sup> 17<sup>22</sup>), and that a Pelagianistic spirit underlies the book in so far as no account is taken of the influence of divine

is no account is each of the interference of a truth grace upon human reason. 5. MSS and Versions.—The Gr. text has come down (1) in some Scripture MSS, including A and  $\aleph$ ; (2) in MSS of Josephus; and has been printed under both categories. The best recensions are those of Fritzsche in his edition of the Libri Apoc. Vet. Test. Grace, 1871, and Swete in the Camb. Septuagint, 1894, 2nd ed. 1899. There is an old Syriac version, published by Ceriani in his photo-lithographed facsimile of the Milan Peshițta manuscript of the OT (1876-83). An English translation by Cotton (The Five Books of Maccabees in English) was published at Oxford in 1832.

Another Fourth Book of Maccabees is mentioned by Sixtus Senensis (*Bibliotheca Sancta*, i. p. 39) as still extant in manuscript when he wrote (1566). He himself saw it at Lyons, in the library of Santes Pagninus, which soon afterwards perished by fire. It was written in Hebraistic Greek, and began with the words, 'After the murder of Simon, John his son became high priest in his stead.' Sixtus thinks it may have been a Greek translation of the 'chronicles' of the reign of John Hyrcanus referred to in 1 Mac 16<sup>24</sup>; but, in view of the statement he makes as to its contents, it is more likely that the book was 'simply a reproduction of Josephus, the style being changed perhaps for a purpose' (Schürer, HJP II. iii. p. 14). E. V MACCABEES.—This is the title given to an

E. V MACCABEES.—This is the title given to an Arabic 'Book of Maccabees' printed in the Paris and London Polyglotts, the Arabic text being in both cases accompanied by the Latin translation of Gabriel Sionita. Cotton's English version is a literal rendering of the Latin. The book purports to be a history of the Jews from the time of Heliodorus (B.C. 186) to the last years of Herod

\* Langen, Judenthum in Palästina, p. 80.

MACEDONIA

(B.C. 6-4?). It is merely a Hellenistic compilation, not always accurate, from 1 and 2 Mac and the writings of Josephus, and is in no sense an independent history. In ch. 12, the only passage which does not directly depend upon these works, the author shows himself singularly ill-informed with regard to certain well-known facts of Roman history. He evidently wrote after the destruction of the temple in A.D. 70 (cf. 9° 21<sup>20</sup> 22° 53°). In point of language the book is decidedly Hebraistic, even after being twice translated, although this does not prove that it was originally written in Hebrew. The religious standpoint of the compiler merely reflects that of his authorities.

There is also another so-called 'Fifth Book of Maccabees' in the great Ambrosian Peshitta, but it is nothing else than a translation of the sixth book of Josephus' de Bello Judaico.

LITERATURE.—The principal authorities upon points of literary and textual criticism have been named in the body of the article. Among older commentaries may be mentioned those of Drusius on 1 Mac, and of Grotins on 1, 2, and 3 Mac in *Critici Sacri*; and that of Michaelis on 1 Mac (Uebersetzung der 1 Mace.-B.'s mit Anmerk., Götting. u. Leipz. 1778). The most complete modern comm. is that of Grimm on 1, 2, 3, and 4 Mac in the Kurzgef. Exeget. Handb. series, 1853-57. Since that date there have appeared commentaries by Keil on 1 and 2 Mac, 1875; Bissell on 1, 2, and 3 Mac in Lange-Schaffs Commentary, 1880; Rawlinson on 1 and 2 Mac in Lange-Schaffs Commentary, 1880; Rawlinson on 1 and 2 Mac in his Die Apokryphen des Atten Testaments, 1891; Fairweather and Black on 1 Mac in the Cambridge Bible for Schools, 1897; Kautzsch on 1 and 3 Mac, and Kamphausen on 2 Mac in Die Apokr. u. Pseudepigr. des AT, 1898. W. FAIRWEATHER.

MACEDONIA (Maredovia = the land of the Mareblues, who, themselves akin to the Doric branch of the Greeks, formed the core of a mixed nationality, to which Illyrian, Pæonian, and Thracian elements contributed along with numerous Greek colonies) was in antiquity the common name for a region in the centre of the Balkan peninsula, separated for the most part by natural boundaries of mountainranges from Thessaly on the south, Illyria on the west, Mœsia on the north, and Thrace on the east. It contained the river-basins of the Haliacmon (Vistritza), the Axius (Vardar), the Strymon (Struma), and the Nestus (Kara-su); and it presented along its Ægean shore the three prongs of the great Chalcidian peninsula between the Thermaic and Strymonic gulfs (now named from Saloniki and Rendina). This region, with its mountainous interior rearing a hardy population, its well-watered and fertile plains, and its extensive fringe of seaboard encouraging colonization and commerce, obtained a political significance and exercised a paramount influence for two centuries over the fortunes of the ancient world, such as could hardly be expected from its earlier history or from its size and apparent resources. The steps of this development, the growth and unifying of its ascendency of Philip over the Greek republics— the supremacy of Alexander, whose world-empire reached from the Adriatic to the Indus—its partition after his early death among his leading generals, out of which sprang the Seleucid empire in Syria, the rule of the Ptolennies in Egypt, and a series of violent changes in the occupancy of the throne of the Macedonian motherland-and the final struggles, which, culminating in the battles of Cynoscephalæ (B.C. 197) and Pydna (B.C. 168), brought Macedonia under the power of Romehardly fall within the province of this article, except in so far as they helped to shape the Macedonia which confronts us as an Oriental power at the outset of the Maccabæan history, and as a Roman province in NT.

The history of the conflict with Epiphanes and bis successors opens (1 Mac  $1^{1-9}$ ) with a striking description of the achievements of Alexander the

#### MACHAERUS

Great, and of the division of his dominions upon his death. There  $(1^1)$  he is said to come forth from the land of Chittim (Xerrielµ), and at  $6^3$  to have been the first reigning as king over the Greeks ; while at  $8^5$ , in the account of the power of the Romans whereof Judas had heard, there is mention of their having discomfited and overcome Philip (V.), and Perseus who is called king of the Chittin (Kiridwr, see KITTIM). At 2 Mac  $8^{30}$  the term Macedonians seems applied to the Syro-Macedonian warriors in the service of the Seleucid kings. On the application of the epithet to Haman in the LXX Ad. Est  $16^{10}$ , and its use in  $16^{14}$ , see HAMAN. The Macedonia of NT is the Roman province of

that name. For a time after the Roman victory at Pydna (B.C. 168) it was allowed to retain some measure of independence and self-government; but its unity was broken up. It was divided into four districts, in which republican federative leagues were modelled on the system of the Greek confederacies. The first embraced the region between the Strymon and Nestus; the second, that between the Strymon and Axius with the Chalcidian peninsula; the third, that from the Axius to the Thessalian Pencius; and the fourth, the mountain lands towards the north-west. Their capitals were, respectively, Amphipolis, Thessa-lonica, Pella, and Pelagonia. [For details of the arrangement, see Liv. xlv. 29, 32; Mommsen, *Hist.* of Rome, ii. p. 508 f.]. But in B.C. 146 dependence was exchanged for subjection; the country received was exchanged for subjection; the country received a definitive provincial organization; and from that date began the Macedonian era, henceforth used on inscriptions and coins. The new province included portions of Illyria and Thessaly, and Thessalonica became the headquarters of the Roman government, although it and some other towns retained local It was administered by a proprætor autonomy. with the title of proconsul; and there was usually associated with it the province of Achaia or Greece, which was administered by a legate [on Greece, which was administered by a legate [on the relation of Greece as a Roman province to Macedonia, see Mommsen, *Hist. of Rome*, iii. p. 271, note]. On several occasions in NT we find them mentioned together; but Macedonia takes pre-cedence (Ac 19<sup>21</sup>, Ro 15<sup>26</sup>, 2 Co 9<sup>3</sup>, 1 Th 1<sup>7.8</sup>). It was traversed by the great Roman military road, the *Via Egnatia*, and afforded a fruitful soil for the missionary labours of St. Paul, \* who amidst no swall opposition and with various success sowed small opposition and with various success sowed the seeds of the gospel, and founded Churches in some of its chief towns, Philippi, Thessalonica, Bercea (Ac  $16^{4-1719}$ ), and subsequently revisited them on his way to and from Greece (Ac  $19^{41} 20^{1-4}$ ), when several of his Macedonian converts accompanied him to Troas (Ac 20<sup>6</sup>). His warm interest in the Churches which he had planted bore fruit in the Epistles addressed to Thessalonica and Philippi; and their readiness to receive the word, to love the brethren, and to minister to his personal needs, are heartily acknowledged and commended (1 Th 1<sup>3.8</sup> 3<sup>6</sup> 4<sup>9</sup>, 2 Th 1<sup>3.4</sup>, Ph 4<sup>10, 15.16</sup>).

WILLIAM P. DICKSON.

**MACHAERUS** (Maxaipoîs, Grecized from mpp, Tamid iii. 8, sometimes with and line of the form fidently identified (originally by Seetzen, Reisen durch Syrien, ii. 330, iv. 378) with Mkaur (but see Jastrow, s.v.), an extensive collection of ruins on the spur of a hill overlooking the Dead Sea from the east. It was first fortified by Alexander Jannæus (Jos. Wars, VII. vi. 2), but was taken from his grandson by Gabinius and demolished (ib. I. viii. 5; Ant. XIV. v. 4). Herod the Great fortified it (Jos. Wars, VII. vi. 1, 2), and used it as one of his principal residences. On his death it

\* Ramsay (St. Paul the Trav. p. 203) suggests that the 'man of Macedonia' who was seen by Paul in a vision (Ac 169) is to be identified with Luke himself, who meets the apostle at Troas.

## MACHBANNAI

became the property of Antipas, being situated in his tetrarchy. When Artipas divorced his wife, his tetrarchy. When Avtipas divorced his wife, the daughter of Aretas, king of the Nabatæans, she desired to be sent to Machaerus, which is incon-sistently described (Jos. Ant. XVIII. v. 1) as on the borders of the dominions of the two kings, and as subject to Aretas. The inscriptions do not reveal the exact frontier at the time; but there is no evidence in support of the latter statement of Josephus. He is probably in error, especially as the context implies that the queen chose her place of retreat with a view to avail herself of its proximity to her father's dominions for the pur-pose of escape. Shortly afterwards John the Baptist was imprisoned and put to death in the dungeons of Machaerus (*ib.* XVIII. v. 2; Mk 6<sup>21</sup> is not against this, as Keim, Jenus of Nazara, iv. 218, note 1, shows). The fortress, of whose im-portance Pliny speaks (*Hist. Nat.* v. 16, 72), was garrisoned by the Romans until A.D. 66 (Jos. *Wars*, II. xviii. 6), when they withdrew to avoid its investment. But six years later it was re-covered (*ib.* VII. vi. 4), and finally demolished by Lucilius Bassus. of retreat with a view to avail herself of its Lucilius Bassus.

MACHBANNAI (ΥΞΞΞ : Β Μελχαβανταί, Α Μαχα-βαναί). — A Gadite who joined David at Ziklag, 1 Ch 1213

**MACHBENA** (11370), van d. H. 81370; B Maxa $\beta\eta r \sigma$ , A Maxa $\mu\eta r \sigma$ , Luc. Max $\beta a r \sigma$ ).—Named in the genea-logical list of Judah (see GENEALOGY, IV. 34) as the 'son' of Sheva, 1 Ch 2<sup>40</sup>. It is clear that a place and not a person is intended. Machbena is probably the same as **Cabbon** ( $j^{123}$ ) of Jos 15<sup>4</sup>, which may perhaps be identified with *el-Kubeibeh*, situated about 3 miles south of *Beit Jibrin* (see Dillm. on Jos 15<sup>40</sup>). J. A. SELBIE.

MACHI (>>> [derivation and meaning uncertain : if the vocalization implied in Marxi is correct, the word comes from the Hiph. of 123, and means 'striking']; LXX Max $\chi i$ , Ma $\chi i$ , Max $\sigma i$ : F has the more familiar form Ma $\chi c i \rho$ , in which it agrees with the Peshitta (Ode and a cours only).-The name occurs only once, in Nu 1315, where P mentions Machi as the father of Geuel, who acted on behalf of the tribe of Gad as one of the twelve men sent to spy out the land of Canaan. J. TAYLOR.

**MACHIR** (גָּבָיָר).--1. Son of Manasseh (the son of Joseph), Gn 50<sup>53</sup>,--the eldest son, according to J (Jos 17<sup>1b-2</sup>), the only son, according to P (Nn 26<sup>29</sup>). Machir has, however, really a tribal significance : he, or his 'sons,' represent the leading branch of the tribe of Manasseh, -usually that warlike part of the tribe (Jos  $17^{1b}$  for he was a man of war, and had Gilead and Bashan') which, after Moses and had Gilead and Bashan') which, after Moses had assigned inheritances on the E. of Jordan to Reuben and Gad (Nu 32), went and took possession of (the N. half of) Gilead ( $v.^{39}$ ; cf.  $v.^{49}$ , Dt 3<sup>13</sup>), to which other passages add Bashan (N. and N.E. of Gilead) as well (Jos 13<sup>31</sup> 17<sup>10</sup>): in Deborah's song, however (Jg 5<sup>14</sup> 'from Machir came down com-manders' [Moore, 'truncheon - bearers'; Heb. c;p.c]), it seems that Machir must denote that part of Manasseh which was settled on the W. of Jordan (so practically all commentators). On account, partly, of this localization of Machir in account, partly, of this localization of Machir in Deborah's time W. of Jordan, it has been supposed by many modern scholars that the conquest of Gilead was in reality effected, not at the time when Israel first invaded the lands E. of Jordan in

the days of Moses, but subsequently, later even than the time of Deborah, by Manassites invading it from W. Palestine (cf. MANASSER). From the connexion subsisting between Machir and Gilead, he is habitually spoken of as the 'father'\* of Gilead, Jos 17<sup>1</sup> אובי הנלער (where the art. shows dis-tinctly that 'Gilead' is the name of a locality), the trive that 'Gliead' is the name of a locality', 1 Ch  $2^{21} \cdot 3^{21}$  (cf. Nu  $26^{39}$  P, where it is said that Machir 'begat' (ilead); and, conversely, Gilead is called the 'son' of Machir, Nu  $27^1$   $36^1$ , Jos 17<sup>3</sup> (all P), 1 Ch  $7^{17}$  (cf. GILEAD 1, above, vol. ii. p. 174). In Nu  $26^{39}$  (P) mention is made of the family Machir.' See, further, MANASSEH, where the genealogies in which Machir is included are printed in tabular form, and where the inferences which seem to be suggested by the differences between them are more fully stated. 2. See next article.

S. R. DRIVER.

**MACHIR** ( $\gamma$ ,  $\gamma$ ,  $Ma\chi\epsilon(\rho)$ ).— The son of Ammiel, described as living at Lo-debar, on the E. of Jordan. The site of this spot is uncertain, but it probably lay on the N. border of Gilead, and is to be identified with Lidebir (Jos 13<sup>26</sup> RVm). We gather from the biblical narrative that Machir, who was evidently a wealthy and powerful landowner, had remained faithful to the house of Saul during the struggle between David and Ishbaal (or Ishbosheth), and after the latter's death had extended his protection to Meribbaal (or Mephibosheth), the lame son of Jonathan, until assured of the friendly intentions of the reigning monarch (2 S 9<sup>16</sup>). His friendly support doubtless contributed in no small measure to Meribbaal's escape from the subsequent destruc-tion of his father's house at the hands of the Gibeonites  $(21^{1-14})$ , an event which chronologically must have preceded  $9^{14}$ . At a later date Machir, together with Barzillai of Gilead, and Shobi, an Ammonite prince, came to the assistance of David and his army at Mahanaim when they were pursued by the rebellious Absalom, and furnished them with ample supplies of food and drink (1727-20). According to Josephus (Ant. VII. ix. 8), Machir was the principal man of the country of Gilead. J. F. STENNING.

MACHNADEBAI (; βαιροφάρα); Β Μαχαδραβού, Μαχαα δααβού, Ν΄ Άχαδραβού, Luc. και Ναδαβού).—One of the sons of Bani, who had married a foreign wife, Ezr 10<sup>40</sup>. G. Buchanan Gray (*Expos. Times*, Feb. 1899, p. 232 f.), partly upon the strength of the above readings in B and  $\aleph$ , argues that the latter element in the word is the divine name Nebo. He thus obtains the form מברובר, which he would further change (ר and ר being often confused) into מכרובו= 'possession of Nebo.' In the same article, which is well worthy of study, Mr. Gray argues that the same species of compound is found in the name Barnabas, which would thus be = 'son of Nebo.'

J. A. SELBIE.

**MACHPELAH** (קדָבָּבָּלָה, always with the article). —The name of the spot where was the piece of ground and cave bought by Abraham for a buryingplace. The name is not met with outside Genesis; but though the meaning is uncertain, authorities generally concur in one rendering. Generally concur in one rendering. Generally (*Lex.*) gives 'a doubling.' The LXX, Vulgate, Targum of Onkelos, and Pseudo-Jonathan, render it 'double.' The place is mentioned twice (Gn 23° 25°) as 'the cave of Machpelah' ('ar mup), once \* Cf., on the expression, above, vol. ii. p. 535\*, n. 1.

Digitized by Google

MACHPELAH

and in Gn 49<sup>30</sup> render 'in the cave which is in the field of Machpelah' by  $\ell r \tau \hat{\varphi} \sigma \pi \eta \lambda a \ell \varphi \tau \hat{\varphi} \delta t \pi \lambda \hat{\varphi}$ , thus leaving out 'field'; this takes place again in Gn 50<sup>13</sup>. The Syriac in Gn 50<sup>13</sup>, on the other hand, leaves out ' cave,' and renders the passage as the 'double field.' It may be noted that all the passages in Genesis belong to P. Stanley (*Lectures on the Jewish Church*, p. 488) considers the name 'the Machpelah' to have belonged to the whole district or property, though

Stanley (Lectures on the Jewish Church, p. 488) considers the name 'the Machpelah' to have belonged to the whole district or property, though applied sometimes to the cave and sometimes to the field, and that the ancient versions used it almost always as if applied to the cave. The matter is of some interest, because the traditional cave is supposed to be in two parts. Dillmann on Genesis says, 'We learn from him [A, *i.e.* P] that [Machpelah] was the name of a locality in Hebron in which lay Ephron's land with the cave in it. It and Ephron's field lay on the front side, *i.e.* east of Mamre. Mamre was therefore west of it.'

It and Epirion's neural variable from this from this, i.e. east of Mamre. Mamre was therefore west of it.' 'So Abraham acquired possession of the piece of land in Machpelah, which lies before Mamre, with the cave in it, and all the trees on it' (Gn 23<sup>171</sup>). This transaction accentuates the fact that Abraham was a stranger and a sojourner in the land promised to his seed, and that the burying-place he bought in Machpelah was his sole landed possession in the land of Canaan. Abraham at this time was dwelling at the oak of Mamre, to the west of Machpelah. In this cave, that is, in the field of Machpelah, which is before Mamre, in the land of Canaan, they buried Abraham and Sarah, Isaac and Rebekah, Jacob and Leah (Gin 49<sup>30</sup> 50<sup>10</sup>).

There is nothing further in the Bible concerning the burying-place of the patriarchs, except that in the speech of St. Stephen (Ac  $7^{16}$ ), by a singular variation, the tomb at Shechem is substituted for that at Hebron. It is not mentioned in the visit of the spies to Hebron, in Caleb's conquest, or in David's reign there (Nu 13, Jos 15<sup>13</sup>, 2 S 5<sup>5</sup>). The only possible allusion is in the account of Absalom's vow of a pilgrimage to Hebron when absent in Geshur (2 S 15<sup>7</sup>). During the struggles of the Maccabees many battles were fought around Hebron, which had become one of the northern towns of Idumza, and was taken and burnt by Judas Maccabeus; but no mention is made of the burying-place of the patriarch, or of the monuments erected there (1 Mac 5<sup>69</sup>).

ments erected there (1 Mac 5<sup>~</sup>). The priests at the temple, as they looked for break of day, used often to say, 'The face of all the sky is bright even unto Hebron' (Talm. Joma, ch. 3). Not a few believed that Adam was buried there in like manner [as Abraham, Isaac, and Jacob, and their wives]. 'Adam said, After my death they will come, perhaps, and, taking my bones, will worship them; but I will hide my coffin very deep in the earth, in a cave within a cave. It is therefore called the Cave, Macpelah, or the doubled Cave,' Juchasin, fol. 63. 1 (Lightfoot, ii. 47). A tradition concerning the death of Esau is noticed in the Talmud (Sota i. 13). A quarrel occurred at the burial of Jacob, between his sons and Esau, concerning their right to sepulture in the cave. Huskin, son of Dan, cut off Esau's head, and left it in the cave, his body being buried elsewhere. Jelal ed-Din repeats this story, and the grave of Esau is still shown at Sia'ir, north of Hebron (PEFSt, 1882, 208). Josephus (Ant. I. xiv. 1) tells us of the purchase of the field of Ephron at Hebron by Abraham, and that 'both Abraham and his descendants built themselves tombs ( $\mu n \mu c a b$ ) in that place' (Ant. I. xxii. 1). In speaking of the death of Isaac he relates his burial at Hebron, 'where they had a monument ( $\mu n \mu c b b$ ) view of the for their forefathers.' Josephus states (BJ IV. ix. 7) that 'Abraham had

#### MACHPELAH

are to this very time shown in this small city: the fabric of which monuments is of the most excellent marble, and wrought after the most excellent manner.' He makes Hebron, and not Gibeon, the site of the 'high place' where Solomon prayed for wisdom (2 Ch 1<sup>3</sup>; Ant. VIII. ii. 1); and Jerome appears to suggest (Qu. Heb. on 2.S 15<sup>-</sup>) that the ancient sanctuary of J" there was at the ancient sepulchres of the patriarchs. But this altar, built by Abraham at Hebron (Gn 13<sup>10</sup>), had no connexion with the cave of Machpelah.

The connexion of Adam and Esau (Edom) with Hebron is very interesting, and it is difficult to arrive at any conclusion as to the period when this view first arose. Perhaps it was in later times, when Idumæa extended over the Negeb or South country. Originally the land of Esau (or Edom) was Mount Seir ('rough' or 'hairy'= Esau, with a different pointing), which lay to the east of the Arabah and east and south of Moab (Gn 27<sup>11</sup>; Ant. I. xviii. 1). In process of time, however, when the power of the Edomites increased, the territory west extended to the south of Palestine, so that Josephus (Ant. v. i. 22) describes it as taking in the lot of Simeon, and in 1 Mac it includes even the hills north of Hebron, and Hebron itself was an Idumæan city (1 Mac 5<sup>66</sup>).

Isaac was buried at Hebron by his sons Esau and Jacob (Gn 35<sup>-9</sup>), and after this (?; according to 32<sup>4</sup> [J] Esau was already resident in Seir when Jacob returned from Mesopotamia) Esau is said to have left the land of Canaan and 'dwelt in Mount Seir: Esau is Edom' (Gn 36<sup>6</sup>; both P).

Adam and Eve are traditionally (by Moslems) supposed to have been buried at Mecca, and have no *Makâms* in Palestine. On expulsion from Paradise, however, they are supposed to have hidden themselves in, or near, a spring at Hebron, which is now called 'Ain el-Judeidah. Here, also, the red earth from which Adam was said by the Jews to have been formed, is shown by the Moslems. This tradition is mentioned by several writers in the time of the Crusaders, and may be of Christian origin (SWP, S. Pal. 261).

Hebron is also called the City of Arba (Kiriatharba), 'the greatest man among the Anakim' (Joe 14<sup>16</sup>), which by later writers was fancifully interpreted as the 'city of four.' Thus a fourth patriarch was required in addition to Abraham, Isaac, and Jacob, and the substitution of Adam for Edom (Essu) may be suggested as the consequence. The view taken by the Jewigh writers (from the words of Jos 14<sup>10</sup>) (Bereshith rabba, quoted by Beer, Leban Abrahams, 189) is that the 'city of four' refers to' Abraham, Isaac, Jacob, and Adam, who are buried there. See KIRIATH-ARBA. Jerome (Onomast. p. 120, Ep. Paul. 11) also explains that the 'city of four' refers to the four allowe mentioned.

The statements of the various historians concerning the sepulchres of the patriarchs are to be found collected together in Archives de l'Orient Latin, ii. (1884), 411, and in Palestine under the Moslems (1890), 318. The following are the more important. It will be noted that there is no direct allusion to the present Haram enclosure until the 12th cent., and as its construction is considered to be at least as early as the time of Herod the Great, it seems doubtful whether it was ever visited by Christians until the time of the Crusades, the House of Abraham, about two miles north of Hebron, being then probably the Christian traditional site of the tombs of the patriarchs. In the 4th cent. the sepulchres of the patriarchs are spoken of as existing at Hebron, built of marble, and of elegant workmanship, and the Basilica of Constantine close to the great enclosure is called 'A braham's House' (Onomast. art. 'Arboch'). The Bordeaux Pilgrim (A.D. 333) describes the square

Digitized by Google

## MACHPELAH

enclosure within which Abraham, Isaac, and Jacob, with their wives, were buried, as built of stones of great beauty. Antoninus Martyr (c. A.D. 600) adds Joseph to the three patriarchs, and says that a Basilica was built there 'in quadriporticus' with an interior court open to the sky, in which the Jews and Christians entered from different sides, burning incense as they advanced. Arculf (c. A.D. 698) speaks of the double cave and the monuments of the four patriarchs, Abraham, Isaac, Jacob, and Adam, enclosed by a low square wall; the tomb of Adam lies not far from the others, and the three women, Sarah, Rebekah, and Leah, have smaller monuments, and were buried in the earth. The hill of Mamre is a mile from these monuments, with a church and a stump of the oak of Mamre. Mukaddasi (c. A.D. 985) speaks of the strong fortress round the tombs of Abraham, Isaac, and Jacob, and their wives, built of great squared stones, the Work of Jinns (i.e. of people before the Moslems : the Moslems often attribute old buildings of superior construction to Jinns). The Moslem name at the present day for the enclosure is 'The wall of Solomon.' Saewulf (A.D. 1102) and the Abbot Daniel (1106) are the first Christians who speak of the tombs being surrounded by a very strong castle or high wall. The caves are said to have been discovered and opened in A.D. 1119 (Archives de l'Orient Latin, ii. 411). John of Wurzburg (A.D. 1100), Theodoricus (A.D. 1172), Jacques de Vitry (A.D. 1220), Burchardt (A.D. 1230), speak of the fourth tomb being that of Adam, while Saewulf and Daniel make the fourth the tomb of Joseph.

while Network and Danks makes the rest in the terms of Joseph. Benjamin of Tudela (1163) states of Hebron: 'Here is the large place of worship called St. Abraham, which during the time of the Mohammedans was a synagogue. The Gentiles have erected six sepulchres in this place, which they pretend to be those of Abraham and Sarah, of Isaac and Rebekah, and of Jacob and Leah; the pilgrims are told that they are the sepulchres of the fathers, and money is extorted from them. But if any Jew come, who gives an additional fee to the keeper of the cave, an iron door is opened, which dates from the time of our forefathers who rest in peace, and with a burning candle in his hand the visitor descends into the first cave, which is empty, traverses a second in the same state, and at last reaches a third, which contains six sepulchres, those of Abraham, Isaac, and Jacob, and of Sarah, Rebekah, and Leah, one opposite the other.' Ali of Herat, writing in 1173 (*PEFSt*, 1897, p. 59), fifteen years before Hebron was retaken by Saladin, states that he was informed that in the year 1119, in the reign of Baldwin IL, a certain part over the cave of Abraham had given way and was repaired by the Franks from below. Rabbi Samuel bar Simson in 1210 claims to have visited the cave. 'We descended by 24 steps, very narrow, and without means of turning to the right hand or the left. We saw there the place of the Holy House, and we noticed these monuments. This place has been erseted 600 years (*i.e.* about A.D. 600), it is near the cavern' (*PEFSt*, 1892, p. 212). Sir John Maundeville (1322, *Early Travels in Pal.*, p. 61) says: 'In Hebron are all the sepulchres of the patriarchs, Adam, Abraham, Isaac, and Jacob, and their wives, Eve, Sarah, Rebekah, and Leah—they suffer no Christian to enter that place except by special grace of the Sultan—and they call that place where they lie Double Spelunk, Double Cave, or Double Ditch, because the one lies above the other.' (The tomb of Joseph had already been added here by the Moslems).

Nasir-I-Khussan (A.D. 1047, Diary of a Journey through Syria and Palestine), after describing the

tombs of the patriarchs, states, 'It is said that in early times the sanctuary (at Hebron) had no door into it, and hence that no one could come nearer to (the tombs) than the outer porch ('*ivdn*), whence from outside they performed their visitation. When, however, the (Fatemeh Khalif) Mahdi came to the throne of Egypt (A.D. 918) he gave orders that a door should be opened (into the sanctuary). The entrance door of the sanctuary is in the middle of the northern wall, and is four ells high from the ground. [*Note.—*This door is usually now said, at the present day, to be on the eastern side: it is actually north-east]. On either side of it are stone steps, one staircase for going up and one for coming down, and the gateway is closed by a small door.'

Jelal ed-Din (A.D. 1470) says that the Moslems destroyed the Christian church in the Haram enclosure when Saladin took Hebron; this destruction may have been only partial, as the church still exists. This author's writings are not considered as reliable as those of Mijr ed-Din.

Mijr ed-Din (A.D. 1495) speaks of the Mosque of Hebron as the work of the Greeks (*Rám*), by which term he may mean the Christians, *i.e.* the Crusaders (see BRP ii. 78). He gives an account of the 'invention' of the Tomb of Joseph, outside the Haram enclosure, opposite the Tomb of Jacob, in A.D. 908-932, and states that the doorway through the west Haram wall between the two tombs was pierced A.D. 1394 by Yaghmuri, governor of Hebron. Makrisi (followed by Mijr ed-Dîn) relates that a poor idiot boy, having fallen through the hole existing in the floor of the mosque leading down into the cave, some servants descended into the cave and rescued him. They saw a stone staircase of 18 steps which led to the *Minbar*.

David the Reubenite, a Jew (A.D. 1523, *PEFSt*, 1897, p. 47), visited the Haram area at Hebron, and, on being shown the cenotaphs of the patriarchs, said, 'These are not true; the truth is that Abraham, Isaac, and Jacob are in the cave under ground; and I told them to show me the cave. So I went with them, and they showed me the opening of the door of the cave in the mouth of the pit; and they let down the lamp into the pit by a ropé, and from the mouth of the pit I saw the opening of the door about the height of a man, and I was convinced that it was under the cave. Then I said, This is not the opening of the cave in the work is another opening; and they answered me, Yes, in ancient times the opening of the cave was in the middle of the Great Church, in which is a cenotaph of Isaac.' They showed him this opening, which was shut with large stones and lead; and they read to him a book in which it was stated that a certain king (the 2nd from Mohammed), after the Moslems had taken the sanctuary from the Church.

that a certain king (the 2nd from Mohammed), after the Moslems had taken the sanctuary from the Christians, had built up the opening to the cave. *Jichus ha-Aboth* (1537, a tract) describes the Haram area: 'An admirable and magnificent edifice, attributed to king David on whom be peace. Near the door is a little window in the wall; they pretend that it extends to the cavern : it is here that the Jews pray, as they are not allowed to go into the interior' (*PEFSt*, 1882, n. 212).

p. 212). The only Europeans who had visited the Haram enclosure during this century before 1867 were the Spaniard Badia (Ali Bey), travelling as a Moslem (1807); Giovanni Finati, the Italian servant of Mr. Bankes (1816); and the servant of Mr. Munro (1833). Ali Bey is said to have entered the cave through an iron door in the north side of the Haram at the bottom of the steps; but this was only the popular account in Hebron in 1867, and cannot be relied on.

## MACHPELAH

In 1834 Ibrahim Pasha was let down into the cavern from the mosque, but was quickly brought up again, he being suddenly smitten with the impropriety of looking on another man's wife. In 1862 the cenotaphs of the patriarchs were visited by the Prince of Wales, accompanied by Dean Stanley (see a full account in Lectures on the Jewish Church, p. 483 ff.). In 1864 they were visited by Mr. James Fergusson, who gives additional information in Appendix J, 'The Holy Sepulchre.' In 1867 the present writer was shown the iron door which is said to lead into the caves. It is situated on a level with the street at the bottom of the steps leading up to the mosque at Jâwalîyeh, at the north-west entrance to the Haram. It probably leads to the tomb of Joseph outside the Haram. This door; the guardians of the mosque stated, had not been opened for 600 years (Recovery of Jerusalem, p. 41). In 1882 they were visited by Princes Albert Victor and George of Wales, Canon Dalton, Sir Charles Wilson, and Captain Conder, and complete information is given about everything except the cave itself (SWP iii. 305).

The space containing the traditional caves of Machpelah is enclosed by a magnificent quadrangle of masonry 197 ft. in length and 111 ft. in width, measured externally, called the Haram. The length lies N.W. and S.E., the breadth lies N.E. and S.W. The walls are of one class of masonry throughout, as in the original construction. The stone is of grey limestone, very hard, and akin to marble. The whole character of the masonry is similar to that of the lower portion of the Haram wall at 'the Wailing place,' Jerusalem. The courses of stone average 3 ft. 7 in. in height, the longest stone visible being 24 ft. 8 in. in length. There is a slight *batter* in the walls; that is to say, each course stands back about  $\frac{1}{2}$  in. from the course below, as at the Wailing place. Jerusalem.

At the height of about 15 ft. (*i.e.* level with the floor of the mosque or church within) portions of the wall 7 ft. wide are set back about 10 in. by means of a batter, leaving 16 pilasters on the longer faces and 8 on the shorter face. These pilasters are 3 ft. 9 in. wide each; the angle pilasters are each 9 ft. 6 in. wide—the space between the pilasters being 7 ft. This wall, with pilasters, is continued up for about 25 ft., making a height of 40 ft. from the ground on the western side and 25 ft. above the pavement within. The wall and pilasters have a simple projecting cap or coping at the top. These pilasters are similar to two at the N.W. angle of the Haram wall, Jerusalem, which are 4 ft. 6 in. wide, with an interval of 6 ft. and set back of 8 in. The thickness of the Haram wall of Hebron is 8 ft. 6 in., counting from the intervals, or 9 ft. 4 in. from the face of the pilasters. On the top of this old masonry, which is all *in situ*, is an Arabic wall of recent date.

From the west on the north and south of the enclosure (along the shorter faces) steps run up to the level of the floor within, and a passage at this level runs round the eastern and longer face. This passage leads to the mosque Jawaliyeh, situated immediately N.E. of the Haram. There was originally no opening on the eastern face, but a doorway at a distance of 93 ft. 7 in. from the south-east angle has been knocked through the Haram wall. So that the passage on the eastern face now leads on one side to the Javaliyeh mosque, and on the other side to the interior of the Haram, 15 ft. above the roadway to the west.

There is no positive information as to what there is below the level of the passage to the east of the Haram, but the general impression was that the rocky surface rises to the east, the Haram wall on the eastern side being built on the rock or at the level of the passage. Dr. A. Paterson, in a recent

## MACHPELAH

communication to the present writer, entirely confirms this view.

Conder's account, however (*PEFSt*, 1881, p. 267), seems to settle this question. 'We visited the eastern side of the enclosure, and found ourselves on the housetops almost level with the cornice of the old wall. We here found a mosque, called *el-Jâvouliyek*, with a large dome. There is also a third entrance to the enclosure on this side, and the old wall appears to be almost as high here as on the west, although the mountain called *el-Jâvouliyek*, with a large dome. There is also a third entrance to the enclosure on this side, and the old wall appears to be almost as high here as on the west, although the mountain called *el-Jâvourek* rises very suddenly behind the Haram on the east. It would appear, therefore, that the great cave is said to exist, must be a detached knoll; since on all sides there is lower ground, and a retaining wall 40 ft. high' (*PEFSt*, 1881, p. 267). But Robinson (*BRP* ii. 76) says, 'The buildings stand on the slope of the eastern hill; the rocks having been excavated along the upper side, in order to lay the foundations.' Canon Dalton (*PEFSt*, 1882, note<sup>1</sup>, p. 201) suggests that a portion of the interior of the Haram probably represented originally the field of Mamre before the cave,' and was then on a level with the exterior.

originally 'the held of Mainre perore the cave, and was then on a level with the exterior. When the level was artificially, and probably gradually (with débris of Byzantine church, etc.) raised 15 ft., the present approaches round the exterior of the Haram, and at a higher level, were necessitated, and are entirely Moslem. As there is no ancient gateway through the Haram wall above the level of the floor inside, it is apparent that all that is to be seen inside above this level is of a later date than the Haram enclosure.

It has been mentioned that the walls of this enclosure are precisely of the same appearance as the wall of the Jews' Wailing place at the Haram of Jerusalem, and probably of the same date. This unfortunately gives no clue to the date, as views differ as to the age of 'the Wailing place,' between the time of Solomon and king Herod. Wilson and Conder without hesitation consider the wall to be Herodian; de Vogüé and Fergusson appear to have the same view; on the other hand, Grove, Ritter, Stanley, Robinson, and the present writer, consider these walls to be pre-Herodian.

The interior of the Haram enclosure (above the level of 15 ft. above the roadway) is occupied by buildings of Christian and Moslem construction, nothing in it being earlier than the 12th cent. except the *Minbar* or pulpit (completed A.D. 1091), and brought by Saladin from Ascalon.

The southern portion of the enclosure is taken up by a mosque (formerly a church), with length of aisles 70 ft. and breadth across aisles 93 ft. The central aisle is 35 ft. wide, and the two side aisles 30 ft. wide each. The length (70 ft.) is broken up into three bays of unequal space; that to the south is 15 ft. wide, and contains the *Mikrab* and *Minbar*. The central bay is 30 ft. wide, and contains the cenotaphs of Issac and Rebekah. The north bay is 25 ft. wide, and contains the *Mehala* or readingdesk. The church is Gothic, closely resembling the Crusading churches of Palestine, and the four pillars supporting the roof are clustered, 12 shafts being carried up the clustering walls and supporting ribbed gioins; in this respect it resembles the Church of St. John at Samaria, dating between A.D. 1150 and 1180. The capitals resemble those of the Church of Bitch, completed A.D. 1146, and the general style resembles the Church of St. John at Gaza, dating about A.D. 1152. Conder considers that the building of this church may be attributed to the latter half of the 12th cent., probably about the year A.D. 1167, when the town became a bishopric. Fergusson's view was that this church most probably was not erected before 1167 nor later than 1262, more

Digitized by Google

nearly approaching the former than the latter period.

All the other buildings in the interior of the enclosure are of Moslem construction, and are attributed to the 14th cent. The Arab historians Makresi and Mijr ed-Din state that they were erected in A.H. 732 (A.D. 1331) by the Mameluk Sultan Muhammed Ibn Kelawun. Beyond the church to the north is a porch or narthex, which includes two octagonal chapels, containing the cenotaphs of Abraham and Sarah.

The porch appears to be of later date than the chapels, and there is an inscription on it stating that it was restored in A.H. 1172 (A.D. 1755). Beyond the porch is an open courtyard with a sundial, and beyond this courtyard are chambers occupying the northern portion of the enclosure, and containing the cenotaphs of Jacob and Leah.

On the outside of the Haram enclosure, and adjoining it to the north-west, is a Moslem building, containing the cenotaph of Joseph. According to Mijr ed-Din, it was discovered on the traditional site by Khalanji during the reign of the Khalif al-Muktadir (A.D. 908-932), and a dome subsequently built over the spot. He speaks of the walls of the Haram as the walls of Solomon's enclosure. He further states that one of the guardians of Hebron (Jaghmuri), A.D. 1394, pierced a gate in the western wall of Solomon's enclosure, opposite to the tomb of Joseph.

of Joseph. The outer gates, together with the two flights of steps and passages round the exterior of the Haram, are attributed to the 14th cent., and have the character of the best Arab work; this, however, must have been a reconstruction, as they would have been required, and were probably constructed when the Fatemite Khalif Mahdi caused the door to be pierced through the east wall of the Haram enclosure, A.D. 918 (Diary of a Journey through Syria and Palestine, A.D. 1047). It was apparently at this time that the Moslems first used the interior of the Haram area as a mosque or sanctuary.

The cave of Machpelah is the one ancient buryingplace which has been handed down with certainty as a genuine site, and the great interest which gathers round it is enhanced by its being the earliest burying-place of the Hebrew race in the Promised Land, and by the impenetrable mystery in which the sanctuary has been involved. This, as Stanley suggests, is a living witness to the unbroken local veneration with which the three religions of Jews, Christians, and Moslems have honoured the great patriarch. But it is to the cave and not to the monuments or building that the great interest attaches, and about which so little has been known even with the researches in modern times. Even now it is uncertain whether the chamber known to be under the floor of the church in the Haram area is of masonry or cut in the rock, and what its extent may be. The following is a brief summary of what is known at present on the subject.

Within the church, adjoining its northern wall, in a line between the tombs of Abraham and Isaac, is a perforated stone (at point E on plan) which rises above the floor of the church. The perforation is a circular hole, a little more than 12 in. in diameter, leading by a shaft into a chamber below, the bottom of which is about level with the roadway outside to west. The chamber (as seen by the light of a lamp lowered down) seems to be square, about 12 ft. either way, with vertical walls covered with plaster. Towards the south-east a squareheaded doorway can be seen in one of the chamber walls. The plaster on the walls prevents it being ascertained whether they are of rock or masonry, but the mouth appears to be in part at least of

rock, like that of a cave or cistern, while in the south-east corner a piece of rock appears to project across the angle of the chamber. The floor of this chamber is thickly strewed (1882) with sheets of paper (Moslem supplications), and it has been suggested that as they do not seem to be old, and that as the whitewash on the walls of the chamber is white, clean, and apparently of no great age, it may be inferred that the chamber, whence there is an entrance to the cave, is periodically visited and cleaned by the guardians of the mosque, and that entrance can be obtained by removing the perforated stone from the pavement. The sheikh of the mosque describes the cave as being double, in accordance with the tradition.

#### (By kind permission of P.E. Fund).

There are two other points where there are supposed entrances to the cave as shown by the sheikh of the mosque in the royal visit of 1882. At A (on plan), at the south end of the church close to the pulpit, where there are stone slabs cased with iron, and a small cupola supported on four slender pillars : this entrance is said to lead to the western cave, where, or in the inner cave, the actual tombs of the patriarchs are reputed to exist. At B (on plan), near the tomb of Rebekah, is the supposed entrance to the eastern cave. It is closed with flagging, forming the floor of the church. From these two points A and B it is supposed that staircases lead down into the cave, but practically only the entrance at C (as described) is known for a fact. At the point D, outside the Haram wall, close to the steps of the southern entrance gate-way, there is a hole through the lowest course of the masonry, on a level with the street. It ex-tends some distance, and is said to admit of the whole length of a lance being passed through the wall, and probably communicates with the western cave. Through this Jews were allowed to look

Digitized by Google

and to stand and pray, as they were not permitted to enter the Harain enclosure.

All those who have written on the subject appear to concur in supposing that the double cave did not extend beyond the limits of the floor of the church, and that there is no cavity, but made earth, under the floor of the inner court, where are the cenotaphs of Abraham, Sarah, Jacob, and Leah, and that there was originally an entrance on a level with the street to the west, and that the old portal is concealed by the buildings known as Joseph's tomb. Some also think that there was a Byzantine church in the interior before the arrival of the Moslems.

There is another view, however, that may be taken of the matter, viz. :--That originally there was no doorway or entrance to this massive enclosure, and that the first opening through the wall was made by the Moslems in the 10th cent. The Israelites in early days had no reverence for sacred graves or tombs, and the general feeling of the people appears to have been averse to memorials to the dead. There is nothing known of the tombs of Moses, Joshua, Samuel, Elisha, etc., and even the site of the tombs of the kings is lost. Abraham's desire was to 'let me bury my dead out of my sight.' But the cave of Machpelah, being the resting-place of the patriarchs in a well-known position, could not be hidden away: it may seen, then, that the massive wall built round the cave without any entrance or means of ingress was the most effectual method that could be adopted to prevent the place being used as a sanctuary. It is suggested that this continued until the Moslem occupation in the 7th cent., and that as they developed their desire for *Makims* and sacred places, they eventually (in A.D. 918) pierced through the wall and built in the interior, and also opened a door into the cave from the north-west corner, to enable the vestibule of the cave to be cleared of the offerings, etc., put through the opening in the floor of the mosque; and that the first Christian building inside was erected in the 12th cent.

LIFERATURE\_—Ritler, Brillande, Pallinina, 200; Robinson, BILP ii. 75; SWP iii. 333; Stanley, S. and P., and Lectures on the Jewish Church; Archives do l'Orient Latin, ii. 411; Pal. Pilgrin Text Soc. Publications; Palestime under the Monlems, p. 218; PBFSt (1882) 197, (1897) 53. C. WARREN.

**MACRON** (Mdx $\rho\omega\nu$ ), the surname of Ptolemy, who was at one time governor of Cyprus under Ptolemy Philometor (2 Mac 10<sup>124.</sup>), and subsequently governor of Carle-Syria and Phænicia under Antiochus Epiphanes (*ib.* 8<sup>8</sup>). He is to be identified with PTOLEMY the son of Dorymenes (1 Mac 3<sup>33</sup>, 2 Mac 4<sup>45</sup>).

MADAI.—See MEDES.

MADIAN. -- Jth 2<sup>28</sup>, Ac 7<sup>29</sup> (both AV). See MIDIAN.

**MADMANNAH** ( $\pi_{3,2,7,7}$ ).—A town of Judah in the south, noticed with Ziklag, Jos 15<sup>31</sup> (B Maxapeiµ, A Bedegard), 1 Ch 2<sup>49</sup> (where Shaaph the 'father' of Madmannah is a son of Caleb by his concubine Maacah; B Mapµavd, A Madµavd). The site is uncertain. There is a ruin called Umm Deminch north of Beersheba, but this does not appear to be a suitable site. Dillmann thinks it may be the same place which is called in Jos 19<sup>5</sup>, 1 Ch 4<sup>31</sup> Beth-marcaboth ('place of chariots'; cf. 1 K 9<sup>19</sup> 10<sup>25</sup>, Mic 1<sup>13</sup>). In the Onomasticon (279, 139) Mydegard (which, however, is confused with  $\pi_{77,77}$ **Madmenah** of Is 10<sup>31</sup>) is identified with Mapoeis near Gaza, hence it has been proposed by some to find Madmannah in the *el-Minydy* of Robinson (BRP<sup>2</sup> i. 602). This last name is a corruption of the Latin *limen*='shore.' C. R. CONDER.

## MAGADAN

**MADMEN** (1775).—A place in Moab, which, if the MT be correct, has not been identified. The name occurs only in Jer 48 [Gr. 31]<sup>2</sup>, where there is a characteristic word-play  $\Im$  [ $\Im$  [ $\Im$ ,  $\Im$ ]<sup>2</sup>, where there is a characteristic word-play  $\Im$  [ $\Im$  [ $\Im$ ,  $\Im$ ]<sup>2</sup> (also, O Madmen, thou shalt be brought to silence' (LXX *val maiour maiocrai*). It is a very natural suggestion that the initial D of  $1\Im$  [ $\Im$  has arisen by dittography from the final D of the preceding word, and that for *Madmen* we should read *Dimon* (cf. Is 15"), *i.e. Dibon* (cf. 48<sup>18</sup> in Jer). This appears to be favoured by Siegfried-Stade (*s.v.*  $1\Im$ ) and Buhl (*GAP* 268). Dillmann thinks it unlikely that in Is 25<sup>10</sup> the words  $1\Im$   $1\Im$   $1\Im$  (*Keré* ( $\Sigma$   $\Sigma$ ) ' in the water of a dunghill,' there is an allusion to the name *Madmen* (supposing this reading to be accepted). See, further, Cheyne's note on this passage.

**MADMENAH** (הְּקָיָבֶּיָה), Made $\beta\eta\nu d$ ).—A place apparently north of Jerusalem, named only in the ideal description of the Assyrian invasion, Is  $10^{31}$ . The name has not been recovered.

## MADNESS.—See MEDICINE.

**MADON** ( $\eta \eta \eta \eta$ ).—A royal Canaanite city, noticed with Hazor of Galilee, Jos 11<sup>1</sup> (B Mapiwir, A Madwir) 12<sup>19</sup> (B Mapuwit, A Mapuir). Matton has been suspected to be a clerical error for Maron (by a frequent confusion in Heb. between  $\eta$  and  $\eta$ ; cf. the LXX forms above), the reference being to one of the two places in Upper Galilee called *Miriún* and *Mâriún*. There is a ruin called *el-Medineh* ('the city') on the plateau west of the Sea of Galilee, but this is near the shrine of Nebi Sho'eib (Jethro), and probably connected with the legend of the 'city of the grove' taken from the Korân. The site of Madon (which is noticed in the list of Thothmes III.) is therefore doubtful. See SWP vol. i. sheet iii., vol. ii. sheet vi.; van de Velde, Mem. 146.\*

C. R. CONDER. **MAELUS** (Α Μάηλος, Β Μίληλος), 1 Es 9<sup>26</sup> = MIJAMIN, Ezr 10<sup>25</sup>.

**MAGADAN** (Mayaðár : the reading Mayðalá, **Mag-dala**, of TR and AV has no support).—The name occurs but once in the NT. In Mt 15<sup>20</sup> it takes the place occupied by Dalmanutha in Mk 810, where Codex Bezw gives prop. man. Meleyadá, D' Mayaıdá, and a few cursives Mayaod. In each case the indi-cation is general. After the miracle 'he entered cation is general. After the miracle 'he entered into the boat, and came  $\epsilon is \tau \delta \delta \rho a Maya \delta dr'(Mt)$ , ' $\epsilon is \tau a \mu \epsilon \rho \Lambda \Delta \lambda \mu a rough d'(Mk)$ ; from this we may justly infer that the two places were in close proximity, so that 'the borders of Magadan' correspond with 'the parts of Dalmanutha.' Brocardus identifies Magadan and Dalmanutha with a place called by the Arabs Me-Dan, or Syala. He is obviously confused. Me-Dan must be the Leddan, the stream from Tell el. Kādi: be the Leddan, the stream from Tell el-Kādi; while Syala is evidently Phiala, now called Birket Rām, 4 miles east of Banids. Both sites are alike impossible. Megiddo, on the south edge of Ewdraelon, is also out of the question. With the information at present available no certain decision can be reached. The direction taken by the boat is not stated, therefore we cannot say they sailed to the western shore. There is no site with a name at all resembling Magadan round the lake; and the only place in any degree like Dalmanutha is ed-Delhemiych on the eastern bank of the Jordan, a little north of its confluence with the Yarmuk. To this town may have belonged the land stretching to the south shore of the lake. The identi-

• On the LXX reading مَنْهُ Madás in 2 S 2130 (Heb. بات علام Kethibh, الم الم Kethibh, الم الم الم Kethibh, الم كان الم

## MAGBISH

fication is hazardous; but if established would point to the only recorded visit of our Lord to the S. or S.E. of the Sea of Galilee; in which case Magadan would probably have to be sought farther to the east.

Schwarz (quoted by Stanley, SP 383) speaks of the cave of *Teliman* or *Talmanutha* in the cliffs overlooking the sea, W. and S.W. of *el-Mejdel*. This lacks corroboration: during years of inter-course with the natives the present writer never heard the never heard the name. Should it prove correct, it would be a strong point in favour of placing Dalmanutha at the south end of the cliffs where they sink into the valley which opens on the sea in the fertile plain of *el-Fuliyeh* (see DALMANUTHA). Here are a number of springs, walled round in ancient times, presumably to raise the level of the water for irri-gation. It is brackish and slightly tepid. Where it enters the lake great shoals of fish constantly congregate, and may be seen from an elevated rock, closely packed over a wide area. On a rocky rock, closely packed over a wide area. On a rocky eminence south of the valley are extensive ruins which bear the name *Khirbet Kuneitriyeh*. If this identification be accepted, then probably *el-Mejdel* represents Magadan, although the change of name remains to be explained. The village stands at the S.W. corner of the plain of Gennesaret; it is a cluster of wretched mud huts, such stones as are used being taken from older buildings. That it occupies a site of antiquity is proved by the it occupies a site of antiquity is proved by the remains of ancient walls between the village and the sea. The position may have been chosen for a the sea. The position may have been chosen for a tower (Heb. ;;;; the modern Arab name also signifies 'tower' or 'fortress') to guard, as here it could do effectively, the entrance to the plain from the south. A comparatively modern tower, now also ruinous, stands to the north of the village, and hard by a palm-tree rears its solitary form. A large thorn shelters the *vely* by the wayside, and several spreading trees afford shade, in which the village fathers spend most of their days. The village fathers spend most of their days. The inhabitants are of mingled blood, Arab, *fellah*, and gipsy; and they own no high reputation. Part of the plain, farmed by a capitalist in Acre, is cultivated by the peasants for a pittance. Their life is mean and microphile. Behind the village life is mean and miserable. Behind the village to the west, the mighty gorge of Wady Hamam, with the robber caves, and the fortress of Ibn Maan in its precipitous cliffs, breaks away towards Kurún Haffin, the traditional Mount of Beatitudes : the clear stream that flows down the vale, waters the south of the plain and enters the sea hard by the

village. El-Mejdel, with a confidence by no means justified by known facts, is often pointed out as the birthplace of Mary Magdalene. This hamlet, and a handful of squalid hovels at Abu Shushek above the stream of er-Rubadiyek, with a few tents of the humbler Arabs, are all the dwellings of men now found in this once densely populated district.

**MAGBISH** ( $\forall 3, 25$ ; B Maye $\beta \omega s$ , A Maye $\beta i$ s, Luc. Maa $\beta e i s$ ).—The name of an unknown town, presumably in Benjamin, whose 'children' to the number of 156 are said to have returned from the Exile, Ezr 2<sup>20</sup>. The name is omitted in MT of the parallel passage Neh 7<sup>23</sup> and in B of the LXX, but A has Maye $\beta \omega s$  and Luc. May $\beta e i s$ . See Smend, Listen, 15. A name which Ryle (Ezr. and Neh. p. 270) considers to be identical with it occurs in Neh 10<sup>20</sup> in the list of those who sealed the covenant, namely Magpiash ( $\forall g \Rightarrow 25$ , B Bara $\phi i s$ , A Maia $\phi i s$ ). J. A. SELBIE.

## MAGDALA.-See MAGADAN.

#### MAGDALENE .--- See MARY, No. V.

MAGDIEL (קיג איזל). - A 'duke' of Edom, Gn 36<sup>66</sup> = 1 Ch 1<sup>54</sup> (in Gn A has Meroδιήλ, in 1 Ch B has Μεδιήλ, A Μαγεδιήλ).

MAGI

**MAGI** ( $\mu 4 \gamma \gamma \alpha$ ; AV and RV 'wise men').—In Jer 39<sup>5, 13</sup> one of the Chaldman officers sent by Nebuchadrezzar to Jerus. is called Rab-mag (1777; probably a title, like Rab-saris or Rabshakeh, not a proper name: the title Rab-mag, or 'chief of the Magi' (cf. Dn 2<sup>10</sup>), may well be that of Nergal-sharezer, whose name immediately precedes it). The traditional account of the Magi is that they were a Median race (Her. i. 101; Amm. Marc. 23. 6; Agathias, 2. 26; see also Parsi tradition in Sacred Books of the East, iv. p. xlvii), who acted as priests of the Persians (Her. i. 132; Soz. HE ii. 9, etc.), but whose persistence as a race is frequently attested and occasionally causes violent conflicts (e.g. Her. i. 120, iii. 65, 73, 79). This view raises two difficulties—(1) How do the Magi come to occupy an important blace (cf. that

This view raises two difficulties—(1) How do the Magi come to occupy an important place (cf. that in Justin, XII. xiii. 3; Q. Curt. v. i. 22) under the Chaldeeans? It has been suggested that, as Media reached a high level of civilization before its neighbours (cf. Sacred Books of the East, iv. p. 1), one effect of this may be seen in the influential part played by Median priests in various countries. It is no more difficult to imagine the Medes as exercising great influence at the court of Nebuchadrezzar, than to find them in Cappadocia (Strabo, xv. 733), in Cilicia (Movers, *Phön.* i. 240), or Persis (Strabo, xv. 727), the introduction of the Magian priesthood in the last case being expressly ascribed to Cyrus the conqueror of the Medes (Xen. Cyr. VIII. i. 23).

(2) If the Magi are identified with the Median priests of Zoroastrianism, how are we to account for the fact that the officials of a religion whose sacred books contain strong invective against magic (see J. G. Müller in Herzog's  $RE^1$  viii. 676) should yet come to give their name to magicians in general? For, in classical writers, the Magi appear, not only as performing the duties of a national priesthood, but as occupying themselves with the interpretation of dreams (e.g. Her. i. 107, 120, vii. 19: for this other works than the Avesta would have had to be consulted, as is admitted by Spiegel, *Eran. Alterth.* iii. 594), as well as with natural science and medicine (cf. Plin. *HN* xxx. 1), while Zoroaster himself is described as the inventor of astrology (Just. i. 1; Suid. s.v. Zwpo $d\sigma\tau\rho\eta s$ ). It is true that  $\mu d\gamma \sigma s$  occurs often in an dorph). It is true that  $\mu \alpha \gamma \sigma \circ cccurs often in an idealizing sense (e.g. Philo, de Spec. Legg. 792, Quod omnis probus liber, 876; Plato, Alcib. 1.$ 122; Aristotle in Diog. Laert. fr. 8; Cic. Div. 1.41; Dio Chrysost. Orat. 36, etc.), but its use for a magician is to be found already in Soph. Oed. $Tyr. 387. In the Sept. <math>\mu \alpha \gamma \sigma s$  is the equivalent of  $\eta \sigma s$ , a charmer or astrologer (Dn 2<sup>2, 10</sup>, so Theod. Dr. procest), in Ac. it represents a bar a process. Dn pass.); in Aq. it represents the a necro-mancer (the secondary use of this word for the familiar spirit which abides with such a necromancer, produces the strange rendering την ξχουσαν μάγον in 1 S 287); in Symm. it stands for στητ. interpreters of signs (see Hatch and Redpath, Concord. to Sept. s. v. µdγα). The expression µaγırı  $\tau \epsilon \chi r \eta$  in Wis 17' (of Egyp. conjuring) is parallel to Gin 41<sup>6</sup> Symm., Philo Mos. 616, etc. (Herzog, RE<sup>1</sup> viii. 682); and shows the transition in the sense of the word, from the practices of a local priesthood to similar actions wherever performed, as completely effected (cf. non-ethnic sense of 'Chaldæans' in Dn pass.). Ought we therefore to take advantage of Jer 39<sup>3, 13</sup>, and assume that

203

MAGI

204

the Magi were either (a) a Babylonian, or possibly an Assyrian, race, or (b) not a race at all, but that Magi is only a general name for a priestly caste of 'magical' tendencies, who corrupted a purer religion in Media and Persia? (a) As regards the former supposition, Jer 39, though it gives us the earliest allusion to the Magi, says nothing as to their relation to the Chaldmans. It is true that Ctes. Pers. 46 (15), Nicol. Damasc. fr. 66, etc., speak of the Chaldmans in such a way as apparently to drawn in Diog. Lasert. fr. 6, Porphyr. Vit. Pyth. 6, do not succeed in removing the impression that the two were frequently confused; but if once a similarity of occupation between Magi and Chaldmans were admitted, this would account for the identification easily enough (Spiegel, iii. 588). (b) The second view suggested is tempting (cf. modern view of Druids : Rhys, Celtic Britain, 68), but the conattested to make it easy. The absence of the name Magi from the Avesta (Spiegel, iii. 585) does not that they belong to a different religion from the Zoroastrian, since the racial name may have the zoroastrian, since the racial name may have been treated as a title of scorn (Sacred Books of the East, iv. p. li). But the full discussion of the question does not belong to this place, where it is merely necessary to indicate the importance of Jer  $39^{5,13}$  in the controversy. (See Pauly,  $RE^1$  iv. 1374; Zöckler in Herzog,  $RE^3$  ix. 127; Schrader,  $COT^2$  110, 114). It is partly owing to this vacueness in the

It is partly owing to this vagueness in the meaning of the word that so little certainty can be arrived at in regard to the most important allusion to the Magi in the Bible—that in Mt 2. We are told that certain  $\mu \alpha \gamma \alpha$  came from the east to pay their homage to the king of the Jews, whose star they had seen at its rising ( $i\nu$ dvaroh $\hat{y}$ , AV and RV 'in the east, 'which would probably require the plural). They consulted Herod, who procured them the required informa-tion by help of the scribes, and, after seeing the star again, they were successful in their search, offered their gifts of gold, frankincense (cf. Holtz mann, in loc.), and myrrh, and, in consequence of a divine warning conveyed in a dream, returned home by a different route, without revisiting Herod. The king, who had inquired of them secretly at what time the star first appeared, with a view to ascertaining the age of the child, put to death all the male children in Bethlehem 'from two years old and under,' the Holy Child escaping

through the flight of his parents into Egypt. (1) The Magi came from the east  $(\dot{a}\pi \delta \dot{a}ra. \tau \delta \lambda \hat{\omega}r$  should probably be taken with  $\mu d\gamma \sigma i$  in spite of the absence of the article, see Alford, in loc.; but this makes no difference to the general sense), but no conjectures as to the particular part of the east can pretend to any certainty. Probably most is to be said for Arabia (Just. Martyr, Prob-Tertul., Epiphan., to whom it was suggested by Ps  $72^{10-10}$ , Is  $60^{\circ}$ ; the view has also modern defenders, e.g. Grotius, Wieseler, Holtzmann, Edersheim); but others have favoured Persia, Parthia, Babylon, and even Egypt (see the names in Meyer's and Holtzmann's *Comm.*). The ex-pression is quite vague (cf. Mt 8<sup>11</sup> 24<sup>27</sup>, Lk 13<sup>29</sup>, Rev 21<sup>13</sup>), and Plumptre has pointed out that ' the language of OT, and therefore probably that of St. Matthew, included under this name countries that lay considerably to the N. as well as to the E. of Palestine' (see e.g. Nu 23<sup>7</sup>, Is 41<sup>3</sup>); while the nature of the gifts presented is not decisive (Weiss, Life of Christ, Eng tr. i. 268). It may, however, safely be assumed that they are not Jews (as v. d. Hardt, Münter, Paulus, etc.); the words and dvarohav and the exact terms of their question seem inconsistent with this supposition,

while the evidence of Christian tradition is also

weighty. (2) The controversy whether  $\mu d\gamma \alpha$  is here to be understood in a good or bad sense is really unimportant. It is, no doubt, true that the bad sense predominates in classical writers of the time (e.g. Tac. Ann. ii. 27, xii. 22, 59; Plin. HN xxv. 59, xxvi. 9, xxx. 1, 6; cf. Kleuker, Anhang zum Zend-Avesta, ii. 3), that the Magus is frequently denounced in Rabbinical works (Hamburger, RE s.v. 'Zauberei'; Edersheim, Life and Times of Jeaus the Messiah, i. 210), and that the other NT allusions bear an unequivocally bad sense (Ac 8<sup>9</sup> Simon Magus, 13<sup>6.8</sup> Elymas). However, the the evangelist lays no stress, either on the value of the religion of the Magi in general or on its falsity, so that the attempt of many ancient commentators (Just., Chrys., Theophyl.; cf. J. Lightfoot, Hor. Hebr. ii. 36) to press the bad sense here, is as irrelevant to the story in the Gospel as the ironical fears of Strauss for the dogmatic The consequences of a favourable construction. newly-born king of the Jews receives homage from Eastern sages; their views (beyond the reference to the star, which does not imply any opinion on astrology in general) are not touched upon, and therefore neither praised nor blamed—a point in which Mt 2 contrasts with Sen. Ep. 58, where some critics have endeavoured to find a parallel.

(3) The exact cause of the Magi's coming can parently only be guessed at. The passages apparently only be guessed at. The passages in the Avesta on the three sons of Zoroaster and the triumph of Soshyos would appear, even if their bearing on the present story were more clear, to be too late in date to afford any assist-ance (Sacred Books of the East, iv. p. xxxvii). We must suppose that the Magi, to whatever nationality they themselves belonged, derived their inference that a king of the Jews was born, from Jewish sources. The coming of Messiah seems certainly to have been expected among the Jews at this time (Lk 2<sup>25</sup>; Ellicott, Hulsean Lectures<sup>6</sup>, 75); and though the widespread feeling in the East, that a Jewish Messiah would conquer the world, is only attested for a later period (Edersheim, op. cit. i. 203), Jewish authorities, if con-sulted on the appearance of an exceptional astronomical phenomenon, might well have explained it of Messiah. Unfortunately, it is difficult to ascertain either (a) what the precise Jewish view in regard to the star of Messiah was, or (b) what the actual astronomical fact was in which they regarded the expectation as now fulfilled.

(a) As regards the former point, in Nu 24<sup>17</sup> (referred to by Just. *Tryph.* 106; Iren. III. ix. 2; Orig. Cels. 1. 59, etc.), the star would most naturally apply to the prince himself, not to a sidereal phenomenon heralding his appearance (cf. Weiss, op. cit. i. 266; G. Baur, Altt. Weissag. i. 346); the passage in Aggadoth Mashiach (quoted by Eders-heim, op. cit. i. 211), however important in other ways, is quite vague as to the nature of the star; while Abarbanel (1437-1508, a Portuguese Rabbi commenting on Daniel), who attaches special im-portance to the conjunction of Jupiter and Saturn in Pisces, is a very late writer, the value of whose evidence for the earlier period is a difficult matter to decide.

(b) Various attempts have been made to discover unusual astronomical phenomena at this time, which might have aroused the attention of the Magi. Kepler (De vero anno, etc. 1614) calculated that a conjunction of Jupiter and Saturn took place in B.C. 7; Ideler (Handb. d. Chronol. ii. 399), and more recently Pritchard, have repeated the calculations, the latter showing (Memoirs of Royal Ast. Soc. xxv. 119) that three conjunctions took place between May and December B.C. 7. This

Digitized by Google

# MAGI

conjunction (besides agreeing very well with the hint in Abarbanel, whatever that may be worth) would certainly present a rare and splendid spec-tacle, and would undoubtedly cause much interest to those engaged in the study of the stars. No difficulty would be caused by the use of  $d\sigma \tau \eta \rho$  in Mt 2, for (in spite of Suidas, s.v.  $d\sigma \tau \eta \rho$ ) the word may apparently be employed for any sidereal appearance (at least in the popular language of NT, e.g. Lk  $21^{25}$ , Ac  $27^{20}$ , He  $11^{12}$ ; cf. also Schäfer in Brunck's Ap. Rkod. ii. p. 206), while Lotz has remarked that, as neither the evangelist nor any subherity of his scene to have authority of his seem to have seen the star, the word used is indifferent. But Pritchard has shown ('Star of the Wise Men,' in Smith's DB) that this conjunction cannot be considered to have guided the Magi to Bethlehem or stood over Bethlehem at the time required by the story; possibly also some weight may be attached to his remark that a still closer conjunction took place in B.C. 66, which ought to have aroused similar interest. Wieseler (Chronol. Synops. 67) follows a suggestion of Kepler, that a peculiarly coloured evanescent star may have appeared between Jupiter and Saturn, of the same kind as one which Repler in 1604. Wieseler further, adopting a hint supplied by Münter (Stern der Weisen, 1827, in which work interest in Kepler's suggestion was again aroused after a long interval), claims the support of Chinese tables for the appearance of such a star in Feb. B.C. 4, and the moderate weight attached by him to this evidence seems (in spite of the ridicule of Strauss) to be justified. Accordingly he regards the evanescent star, not the conjunction, as the star of the Magi; Edersheim (op. cit. i. 211), by referring to two passages in the Midrashim which represent the star of Messiah as appearing two years before His birth, is able to suggest further that the conjunction in B.C. 7 may have aroused the attention of the Magi, and the evanescent star of B.C. 4 have seemed (as it apparently well might) to guide them and stand over Bethlehem. On the other hand, the narrative implies that the star guiding the Magi to Bethlehem was believed to be the same star as that seen at its rising before; so we should either have to credit the Magi with a mistake (which seems improbable under the circumstances), or to suppose that the evanescent star appeared twice (which is in conflict with the Chinese records, on which the

In connict with the characteristic terms, hypothesis depends). We must therefore be content to believe that astronomical reasons prompted the Magi's visit, but that it is doubtful whether the exact cause has as yet been ascertained. Considering the number of astronomical possibilities, this fact is not in itself surprising. But there is nothing in the language of Mt 2 to imply that the star is of such a kind as could not be shown to be subject to natural laws. The universal belief in ancient times that stars acted as guides (Winer,  $RWB^3$ ii. 524), would serve to convince the Magi that this had happened in their case; their story, which may have corresponded accurately enough to the apparent facts, is simply adopted without comment in the Gospel. The question is not whether a star can lead men and stand over a place, but whether it can appear to do so; the passage is undoubtedly of 'great poetical heauty' (Holtzmann), but it does not follow that it rests on no historical basis (cf. Weiss, op. cit. i. 265). A wooden interpretation of the text is in any case to be deprecated, whether adopted in the supernatural (asWordsworth, *in loc.*) or anti-supernatural interest.

(4) The attempt to use the date of the Magi's visit for establishing that of Christ's birth, comes

to very little. Commentators are unable to agree how soon after the birth the visit is to be placed; the order of Herod would certainly be meant (as Euthymius already pointed out) to be inclusive, and would not show that the child was nearly two years old; the astronomical data are too uncertain to be of any value. [But cf. art. CHRONOLOGY OF NT, vol. i. p. 403; and Ramsay, Was Christ Born at Bethlehem? p. 215]. (5) Much criticism has been directed against the

whole story in Mt 2; but a careful study of the writers who oppose it most strongly, would seem to show the difficulty of explaining it, even from a purely destructive point of view. It has been suggested that the visit of these Eastern sages would, if true, have made a great impression, and that accounts from other quarters would almost necessarily be expected; but the attitude of Herod, which would at once be suspected, would make the utmost secrecy desirable. It is admitted that the murder of the children is in keeping with Herod's character (see Jos. Ant. XVII. vi. 5; BJ I. xxxiii. 4, 6); the number of children killed would be small ('probably 20 at most,' Edersheim, i. 214; Holtzmann exaggerates it); and those who remember the controversies on the 'silence of Thucydides' and 'the silence of Eusebius' will have no difficulty with 'the silence of Josephus' here. The references in Macrobius, Sat. ii. 4.11 (Holtzmann, in loc., regards this as a certain allusion to our story), and Chalcidius, *Tim.* vii. 126, are too late in date to afford any clearly independent evidence, but the absence of confirmation cannot under the circumstances be regarded as unfavourable to Mt2 (for the earliest patristic allusions, see Lightfoot, Apostolic Fathers, ii. 2, 80). Lk follows entirely different sources from Mt in his account of Jesus' childhood, and therefore the omission of any allusion to the Magi in the third Gospel can-be be regarded as surprising. The question how not be regarded as surprising. The question how room is to be found for the Magi's visit, so as to make a consistent story of the two narratives, is a difficult one, but the view of Wieseler (Chron. Synops. 152) may perhaps be considered satisfactory.

The attempt to discredit Mt 2 by producing close parallels is not successful. The scene at Plato's death in Sen.  $E_P$ , 58 is more remarkable for its differences than its resemblances; the story of Moses, as given in Jos. Ant. II. ix. 2, though more like Mt 2 than the parallel section in Ex, does not deserve the importance which some scholars attach to it (cf. Weiss, op. cit. i. 268); the looser illustrations of Strauss carry no conviction. The expectations of the Jews as to their Messiah do not appear to have been of such a kind as would account for the invention of the story in fulfilment of them (Edersheim, *op. cit.* i. 209). It is true that certain parts of OT (esp. Ps  $72^{10}$ , Is  $60^{3-10}$ ) might lead to a modification of the tradition in the direction indicated by those passages, and the subsequent history of the story shows this to have been the case, but those very points are conspicuously absent from Mt's account. Again, the two places in which Mt adduces OT quotations  $(2^{6,19})$  certainly raise difficulties of interpretation (Edersheim, i. 206; Weiss, i. 270), but those very difficulties show that the story has not been invented to fulfil the pro-phecies. The utterance of Balaam (Nu 24<sup>17</sup>) would necessarily be regarded as fulfilled in the star of the Magi, but it is hard to see how it could have given rise to the latter; that there should be signs in heaven at the advent of Messiah (Rev 12<sup>1</sup>) is as natural as that a pretender should subsequently call himself Bar-Cochba ('son of the star'), but that Mt 2 should correspond in any sense to an expected star of Messiah is extremely unnatural. We should rather have to think of the evangelist as deliberately inventing a fulfilment, suggesting MAGI

206

**a** reason why it should not have caused more excitement at the time, and combining it with the gifts of Ps  $68^{29}$  72<sup>10</sup>, and the worship of Is 49<sup>7</sup>. But the connexion with the prophecies is too slight, the combination too inferential, and the style of the whole too simple, to make this supposition satisfactory. To suppose, further, that this very fact is due to the author's ingenuity, is to credit him with almost superhuman cleverness. That Jerus. should be troubled at one moment and should have forgotten the cause at the next, is not inconsistent with the habits of an excitable populace. Nothing need be said of Keim's objection that Herod 'would not have exalted the position of the Sanhedrin' (see Weiss, i. 269), of his somewhat simple suggrestion that Herod would probably have put the Magi to death, or of the difficulty found by Holtzmann in the king's secret interview with them. That so long a journey should be undertaken for such a cause is no doubt *a priori* improbable, but it is not impossible. If the story is legendary, the explanation of the legend has certainly not been found yet, and critics ought carefully to consider whether the difficulties involved in rejecting it as historical. But it is impossible to arrive at any definite conclusion, on critical grounds, with regard to the Magi's visit, unless it is taken in connexion with the other incidents related in the Gospels about the childhood of Jesus (see JESUS CHRIST).

(6) Tradition has much to say in regard to the Magi's visit. The influence of PS 63<sup>20,31</sup> 72<sup>10</sup>, Is 49<sup>7</sup> 60<sup>4,10</sup>, makes itself felt in the belief that they were kings (perhaps already in Tert. Jud. 9, Marc. 3, 13; but see Patritius, de Evangel. ii. 320, where the 6th cent.). Their number was fixed at three (in spite of an Eastern tradition that they were twelve: Drisler, Classical Studies, p. 31; Op. Imp. in Mt 2 ap. Chrysost. vi. 638), probably from the threefold nature of their gifts, though symbolical meanings were also attached (e.g. Orig. Hom. Gen. 14. 3; Leo, Serm. 31. 1; [Aug.] Serm. App. 136. 4; Bede, Collect. v. 542). The gifts themselves were explained in symbolical ways (Suicer, Thes. s.v.  $\lambda \beta aros)$ , though it is perhaps worth notice that Christian art attached but little importance to the actual gold, frankincense, and myrrh, for which other offerings were generally substituted (Kraus, RE s.v. 'Magier'). The star received miraculous additions (Ign. Epk. 19, see Lightfoot, ad loc.; Chrysost. Hom. Mt. 6. 2), as did the whole story (Op. Imp. l.c.; Hyde, Rel. Vet. Pers. ch. 31). The names of the Magi, and the traditional way of representing them, became fixed (Spanheim, Dub. Evang. i. 287; Moroni, Dizion. s.v. 'Magi'; Kraus, l.c.). Their bodies were discovered in the East in the 4th cent. and removed to Constantinople; thence they travelled to Milan on the consecration of Eustorgius, and to Cologne on the conquest of Milan in 1162. Their festival, combined at first with a commemoration of Christ's baptism, His first miracle, and the feeding of the 5000 (Max. Taur. Hom. ad Epiph. 7; [Aug.] Serm. App. 134. 1), appears in the 4th cent. (Amm. Marc. 21. 2, Julian; Greg. Naz. Orat. 43. 52; Valens); and though rejected by the Donatists as an innovation (Aug. Serm. 202. 2), was honoured by the Catholies (Const. Apost. 8. 33; cf. Cod. Theod. xv. t. 5. 5; Cod. Justin. iii. t. 12. 7). Though the 'Epiphany' always retained traces of its origin as a celebration of Christ's baptism (hence its special suita-

## MAGIC, MAGICIAN

LITERATURE.—The most important works are cited in the course of the article, while further references can be found from them. On traditions as to the Magi and Epiphany see also Smith, DB, art. 'Maei': Bingham, Origines, vol. ix. p. 66; Hone, *Roeryday Book*, Jan. 6. P. V. M. BENECKE.

One passage in Herodotus (i. 101) need not detain us. Here the magi are called a 'tribe' of Medes. As Schrader points out (COT ii. p. 113), they were rather a class than a tribe, *i.e.* the Median priestly order. We have a close parallel in the Hebrew Levi.

Levi. Levi. The origin of the name and office of Magian ( $\mu4\gamma os$ , Heb.  $\Rightarrow$  only in foreign name Rab-mag) is uncertain. Both Schrader and Delitzsch claim for it a Babylonian origin, and this certainly seems probable. Yet it must be confessed that at present there is no satisfactory derivation of  $\Rightarrow$  from Assyro-Babylonian fortheoming. Schrader's combination of it with  $\ell mku$  (mgu) 'deep,' wise' (pcy), is very hazardous; while Delitzsch in his Prolegg. cines neuen Heb.-Aram. Wörterb. p. 138, footn. 1, surrenders, on plonetic grounds, his former combination of the word (propounded in Heb. in the Light of Assyr. Research, p. 14) with the Assyr. mahhu, meaning 'prophet,' 'soothsayer' ( $=a\delta pu$ ). Nevertheless, the close parallel between the expression  $\Rightarrow \exists \uparrow$  (in Jer 39) and the Assyrian title Rab-šak( $\ell$ ) (WAI ii.pl.67, line 66),\* points decisively to a Babylonian origin.

But our subject is not limited by the original etymologic import of the name. Magic is a term used by us to connote a certain range of acts standing in very close relation to ancient religion, yet hardly forming a normal or essential part of it. A satisfactory definition of the term is by no means easy. In a recently published work by Dr. Alfred Lehmann, entitled Superstition and Magic, in which the accompanying beliefs and usages are traced from the earliest times down to the present, the writer defines magic as every act which arises from superstition or may be explained on the assumption of superstitious ideas (p. 7, Germ. ed.). But the definition is too broad; and when we come to the definition of superstition as 'every hypothesis which has either no justification in a given religion or stands in contradiction to the scientific conceptions of a given time' (p. 6), we have too shifting a basis on which to construct an adequate definition of magic. We must therefore endeavour to fix on a more stable connotation for this term. Ludwig Blau, Das alt-Jüdische Zauberwesen, defines magic

\* See Schrader, COT ii. pp. S f., 114. The word dat as an Assyrian official term is to be found not only in the annals of Tiglath-pileser m. but also in the Rassam cyl. of Assurbanipal, col. ii. 15, *iau-ut-lat\_is*; see Delitzsch, Assyr. Lessiticks<sup>2</sup>, No. 83 in the Schriftlafel.

as consisting of those acts 'whereby an event or a condition is conceived of as brought to pass in some condition is conceived of as brought to pass in some supernatural way' (p. 3). We are here standing on firmer ground. Yet even here greater clearness is needed, for the term 'supernatural' requires elucidation. Robertson Smith (*Prophets of Isr.*, Lect. vii. ad fin.) has shown that our terms 'natural' and 'supernatural' had no relevancy to ensight Empiric mades of thought. The definition ancient Semitic modes of thought. The definition would be clearer if by 'supernatural' we meant transcending the normal coexistences and sequences of cause and effect.' Yet even then Blau's definition of magic remains too broad, since it might include sacrifices, augury, and soothsaying. But in its strict sense magic stands outside these, and should be entirely separated from the normal thoughts and acts of religion.

Magic may, in its historic sense, be best described as the special and abnormal agency, whether through words or acts, whereby certain superhuman personal powers are constrained either to create evil (or good) or to avert baleful effects. Accordingly magic falls into two parts. We have to do with the art with which the Babylonian systems make us familiar, whereby the superior deities or good demons are influenced to exercise their good offices to avert the evil, i.e. whereby counter-spells or charms are worked. This art may be called 'sacred magic.' On the other hand, we have to do with the *Black art* \* called sorcery (see art. SORCERY), whereby evils are wrought on the unfortunate human victim through the power of the evil eye, etc., by the male sorcerer, or more frequently through the female witch, who is able to summon supernatural powers of darkness to his or her aid. Of this some illustrations will be given below.

In the definition, or rather description, above given we have had chiefly in view the usages and beliefs of the Christian era and the ages that preceded it. In other words, magic is regarded as the outgrowth of demonology, the necessary accom-paniment of a belief in demons. To quote once more from Blau's treatise: 'These spirits the magician endeavours by his occult methods to bring under his power, or to compel them to carry out his will. The conceptions respecting the nature and power of these spirits, whom man can make serviceable to himself, differ with the different races. This does not, however, alter the essential fact. Belief in demons and belief in magic are inseparable the one from the other' (p. 7). As it is not the purpose of this article, contributed to a Bible Dictionary, to travel beyond the confines of the subject in its biblical relations, we shall con-tent ourselves with the above conception of magic based on the animistic interpretation of the universe out of which demonology arose + (see article DEMON, DEVIL, vol. i. p. 590). It must be premised, how-ever, that demonology does not wholly explain magic in all its varied forms and ramifications.

Investigation of the historic sources of the magical beliefs and practices of Israel leads us to ancient Egypt and Babylonia—more especially the latter. In both magic was highly developed, and penetrated deeply into the life of the people. In

penetrated deeply into the life of the people. In \* Bee Lehmann, (b. p. 31. + Tylor (Prim. Culture, i. p. 116), basing his generalization on a broad survey of savage life, modern superstition and folk-lore, finds the psychology of magic in faulty association of tickas. 'By a vast mass of evidence from savage, barbaric, and civilized life, magic arts, which have resulted from thus mis-taking an ideal for a real connexion, may be clearly traced from the lower culture which they are of to the higher culture which they are in. Such are the practices whereby a distant person is to be affected by acting on something closely associated with him, his property, clothes he has worn, and above all cuttings from his hair and nails.' This is, no double, largely true. But the following passage in Tylor's work clearly shows that the theory must be supplemented by the assumption of demonology or a belief in the sorcerer, who is a quasi-demon.

both we fortunately have access to ancient documents in considerable abundance belonging to an age far anterior to the Exile and even the Regal period in Hebrew history.

Erman's instructive work, Life in Ancient Egypt, describes vividly the magical conceptions and prac-tices that prevailed in the Nile Valley. As in Babylonia, magic was one of the most potent influences in the intellectual and moral life of ancient Egypt. 'The belief that there were words and actions by which they could produce an effect on the powers of nature, upon every living being, upon animals, and even upon gods, was indissolubly connected with all the actions of the Egyptians' (p. 352). It infected their funeral ceremonies. (p. 352). It interver that the work of Wooden figures were supposed to do the work of These with prepare the food for the deceased. These with stone geese and wooden models of kitchens had been endowed through incantations with magical power. Even gods availed themselves of magic formulæ to constrain each other, or wore amulets. Isis pre-eminently was mistress of magic. Her name was placed on amulets worn by the deceased as a protection, and it was also used in medicines prepared for the living. The underlying conception in many of the formulæ employed was that in the history of one of the gods some good fortune came to the derty. The magician for the time regarded himself as identified with the god, and would repeat the words which the god had spoken on that occasion, and he might even designate himself as the god. Erman cites the example (p. 353)-

'Thou art not above me—I am Amon, I am Anhor, the beautiful slayer, I am the prince, the Lord of the Sword,' etc.,

by which crocodiles were conjured.

In the description of the great trial for high treason—a harem conspiracy against Rameses III. (contained in the judiciary papyrus of Turin, papy-rus Lee and papyrus Rollin)—we read that 'the royal superintendent of the cows, a man of high rank, procured a magical book from the l'haraoh's own library, and according to its directions made certain wax figures which were smuggled into the palace, where they were supposed to cause lameness and illness' (Erman, p. 143). Magic and medicine were closely bound up with one another in Egypt as in Babylonia. Our chief authority on this subject is the great papyrus Ebers. In order that a special remedy might be effective, certain incantations were pronounced over it. The following formula, we learn from the above papyrus, was recited in the preparation of all medicines: 'That Isis might make free, make free. That Isis might make Horus free from all evil that his brother Set had done to him when he slew his father Osiris. O Isis, great enchantress, free me, release me from all evil red things, from the fever of the god and the fever of the goddess, from death, and death from pain, and the pain which comes over me; as thou hast freed, as thou hast released thy son Horus, whilst I enter into the fire and go forth from the water,' etc. (Ebers, i. 12 ff.). From the same authority we can readily perceive the dense ignorance of Egyptian doctors respecting the in-ternal organism and its parts. They had a vague conception of the heart as the centre of the circulatory system, as well as some knowledge of the bones and large viscera, but respecting the eti-ology of disease knew nothing. Diseases they, like other ancients, ascribed to demons. The body was divided into 36 parts, and over each part a demon presided, and in case of disease he was addressed in order that restoration to health might follow. From the Book of the Dead we learn that in the case of a dead body the different parts of the body fell to the care of respective deities. Thus Nu

guarded the hair, Rå the face, Hathor took the eyes under her protection, Anubis the lips, while Thoth took oversight over all the limbs. Further interesting details on this subject may be obtained from Dr. A. Wiedemann's Religion der alten

*Egypter*, p. 146 f. In Babylonia demonology and magic were even more prevalent than in ancient Egypt. To the inhabitants of the Euphrates and Tigris lands the To the existence of a vast host of demons was an ever-present fact. Now demons, as we have already pointed out (art. DEMON, DEVIL), are simply a development of Animism. In the words of Prof. Morris Jastrow (*Religion of Babylonia and As*syria, p. 49), 'the more important and the more uniform of the natural forces became gods, and the inferior ones were, as a general rule, relegated to the secondary position of mere sprites, like the jinns of Arabic belief.' Mere sprites or demons personify the irregular and destructive forces of nature (cf. Chantepie de la Saussaye, i. p. 214). The incantations, of which so large a number has been supplied to us in the 4th vol. of the Cuneiform Inscr. of Western Asia (WAI, occasionally designated Rawl.; see Sayce, *Hibbert Lect.* pp. 441-447), usually deal with bodily or mental afflictions, of which evil demons were held to be the cause. These were believed to have obtained power over the human subject owing to the wrath of some deity, or because the victim had been subjected to blighting influence through the instrumentality of some sorcerer or witch. Angry gods made use of demons for the infliction of punishment. Moreover, it was believed that domestic misfortunes, such as jealousy, evil reports, and quarrels, were brought about by these supernatural agents. In magic, forms of words constituted the means by which the demons were constrained to or spittle, and yet more often by the evil eye. For in the very earliest times it was a popular superstition that certain beings possessed demonic power, and could exercise it malignantly on human victims of their displeasure. Jastrow thinks that 'this belief may have originated in the abnormal appearance presented by certain individuals in consequence of physical deformities. . . . The uncanny impression made by dwarfs, persons with a strange look in their eyes, and, above all, the insane, would give rise to the view that some people possessed peculiar powers. By the side of such as were distinguished by bodily defects, those who outranked their fellows by virtue of natural gifts, by keenness of intellect or cunning, would also be supposed to have received their power through some demoniac source. There would thus be associated ideas of sorcery and witchcraft. The sorcerers might be either male or female, but, for reasons which are hard to fathom, the preference was given to females.' Thus among the Babylonians, as in mediæval Europe, the witch appears more frequently than the male sorcerer. She possesses the power of demons, and in incantations the two are often conjoined.

The predominance of the sorceress may also be observed in Jewish literature as well as in that of other races, notably in that of Greece and Rome (cf. Horace, Epod. xvii., Sat. i. 8; Theocritus, Idyll ii.). Citations from the Talmud in Blau's Das alt Jüdische Zauberwssen, p. 23f., show how deep-seated was the belief that sorcery was the work of women. Sorceresses, in fact, abounded; and according to Simon ben Jochai (A.D. 150) they had increased in number in his time, while Rabbi Eliezer declares that Simeon ben Shetach had hanged eighty of them in Ascalon in one day. Popular belief among the Jews even assigned rabies among dogs to the agency

## MAGIC, MAGICIAN

of women. This predominance of the sorcercss meets us in ancient Arabia.

The witch held close personal relations with the demons, and could control them, being able to invoke them at her will in order to effect her constituted one of the arts which she employed. But among the most effective was the method which has been termed 'sympathetic magic': 'Under the notion that the symbolical acts of the sorcerers would have their effect upon the one to be be-witched, the male sorcerer or the witch would tie knots in a rope.† Repeating certain formulas with each fresh knot, the witch would in this way symbolically strangle the victim, seal his mouth, rack his limbs, tear his entrails, and the like. Still more popular was the making an image of the desired victim in clay or pitch, honey, fat, or other soft material, and either by burning it to inflict physical tortures upon the person representing it, or by undertaking various symbolical acts with it, such as burying it among the dead . . . to prognosticate in this way a fate corresponding to one of these acts for the unfortunate victim.'

Cuneiform scholars have devoted much attention to this weird branch of Babylonian literature. Since the days, twenty-five years ago, when Lenor-mant expounded this subject in his Chaldwan Magir with much graphic vigour and detail, several scholars, including Sayce and recently L. W. King (Babylonian Magic and Sorcery), Tallqvist, and Zimnern, have made notable contributions.

The demons which are mentioned in the incantation texts amount to hundreds. They are of various classes: those which inhabit the field, those which haunt the resting-places of the dead, and the evil demons which inflict physical suffering. It is with the last we are now specially concerned; and the means by which these evil influences were counteracted occupy a vast number of cuneiform tablets. We possess a great collection of incantations directed against these demons, called by a variety of names, and also against the sorcerers. In many cases the interpretations are provisional.

The utukku of the field and the utukku of the mountain.

The utukku of the sea, and the one that lurks in graves.

The evil shedu, the shining alu. Beside these we have mention of the ekimmu, 'which seizes hold of a man.' These incantations fall into various elaborate series.

fall into various elaborate series. \* Wellh, Reste Arab. Heidenthums<sup>3</sup>, p. 159: 'There were men and women who made this art of magic their profession. The witches, however, were more numerous. They distinguished themselves among the Arabs, as among other races, from the male soreerers by showing themselves more passive than active. Hence the demons do not serve them, but vice versd. In fact they almost seem incarnations of the demons. In the time of Ibm Munkidh the witches rode about naked on a stick between the graves of the cemetery of Shaizar. Similarly they still ride by night on palm sticks through the air, having stripped themselves stark naked, smeared their bodies with cow's milk, and abjured Islam in a formula of renunciation.' The witches riding resemble demons in this respect; comp. p. 152. They were credited also with acts of unchastity, drawing the blood from the other sex, changing them into animals, or robbing them of reason. See Doughty's entertaining references, in Arabia Deserta, vol. ii. p. 108.7, to the Kheybar witches. † Conp. the Hebrew \70 used of binding and conjuring by the tying of knots, Dt 18<sup>11</sup>, Ps 58<sup>6</sup>, and \70 frequently used in

the tying of knots, Dt 18<sup>11</sup>, Ps 58<sup>6</sup>, and <sup>1</sup>η<sup>2</sup> frequently used in the plur., Is. 47<sup>9, 12</sup>. ‡ From the root ekému, 'to take' or 'seize'; see Delitzsch,

1 From the root ekens, 'to take' or 'seize'; see Delitzsch, Assyr. Handu. s.v. D2M. Apparently the word properly means the manes or shade that wanders by night. We have other demons specially mentioned, viz. Lifu and lifitu, the demons of night (see art. Dxxos), the gallu that stacks the hand, the rabigu and lokartu, demons of nightmare, Namtar and akaku, plague demons. We find some of them pictured on the bound-ary stones. These are the demons of the field, who will inflict punishment on the trespasser or any one who will inside pro-prietary rights, and whose power the owner invokes to defend them. Students of Is 13<sup>318</sup>. 34<sup>334</sup> should take note of the fact

Digitized by Google

One series, consisting of sixteen tablets, known by the natural name of evil demon, contained protective incantations against various classes of evil spirits. Another is called the series of 'head sickness,' which covered nine tablets. Two othern, have lately been the subject of careful investigation, --the Surpu series by Zimmern, and the Makid series by Tallqvist. Both expressions signify 'burning,' since in both the subject dealt with is the burning of images of sorcerers and the incantations recited when this symbolical act was performed. These incan-tations were of superior force, intended to countervail and over-power the baleful influence of the spells used by the hostile sorcerer. Symbolical loceening of knots counterworked the symbolic tying of the same. Sometimes we have the symbolical peeling of several skins of an onlon. As night was the time chosen by sorcerers and witches for their work, the three divisions of the inght, evening, midnight, and dawn, corre-goonding to the temple watches, were the times chosen for the countervalling incantations and symbolic acts. The Surpus and Makit series formed incantation rituals.

countervailing incantations and symbolic acts. The Šurpu and Makiu series formed incantation rituals. Certain formulas were found to be effective, and were therefore preserved for use; but since a certain formula only availed for a particular set of circumstances, it was necessary to preserve as many formulas as possible to meet every case with which the professional exorciser might be controller. This exorciser naturally plays a great part as a controller of the destructive spirits. One citation, modified from M. Jastrow's recent work, may suffice. It is taken from the Makit series. First the sufferer describes his troubles (Tallq, ii. ool. iii. 1487.)— (There have used all kinds of charms

'They have used all kinds of charms

- They have used all kinds of char To entwine me as with ropes (?) To catch me as in a bird's snare, To tie me as with cords, To overpower me as in a net, To throttle me as with a noose, To tear me as a fabric.'

After which the exorciser says-

which the exorciser says— 'But I, by the command of Marduk, lord of charms, By Marduk, the master of bewitchment, Both the male and the female sorcerer, As with ropes I will entwine, As in a bird's snare I will catch, As in a nose I will throttle (apattil), As a fabric I will tear.'

The byplay of action that accompanied each phrase of the incantation must be supplied by the reader's imagination. These acts were symbolically performed by the exorcizer on an image of the witch made of bitumen and pitch, of clay or wax. Sometimes the sufferer had been bewitched by concoctions of herbs. In this case other herbs or potions are concocted by the exorcizing priest as a counter charm.

In the lines repeated by the exorcizer above guoted we notice as significant the appeal to Marduk. The invocation of the greater deities was the leading characteristic of these counter-Demons were related to the gods as in-to superiors. Doubtless, in some cases, spells. Demons were feriors to superiors. the dividing line was slight, but that the mastery belonged to the Great Gods is clear. Those invoked were chiefly Samaš, who, as the rising sun, was supposed to scare away the haunting spectres of the night; Sin, the guardian and illuminator of the darkness; Istar and her consort Tammuz. But the most important place in these incantations was held by the magical triad Ea, Marduk, and Gibil (as well as Nusku). Here the two Here the two points to be noticed are, (1) the appeal to the gods of light, Marduk, Samaš, and Sin, as opposed to darkness, and the works of sorcery carried on in darkness (cf. Ps 91<sup>8, 13</sup>). (2) Water and fire, (2) Water and fire, as the two purifying elements, are summoned to the magician's aid through the gods whom he invokes. Observe that it is in fire the images of the witches were burned, while the cleansing and healing properties of water were recognized even in those primitive times. Ea was the Babylonian god of water as well as of wisdom, the city of Eridu being the ancient seat of his cult. He is the lord of all secrets, whose name was awful,

that the demons were always endowed with some animal or human shape. Frequently they are embodied in serpents, scorpions, or other monsters. Comp. WAI iv. pl. 5, and Perrot and Chipiez, Hist. of Art in Chaldon and Assyria, 1. pp. 61, 62, ii. p. 81.

VOL. 111.-14

ineffable, and disguised in ciphers. His wonderworking name was inscribed on the sacred brazen vessels. But he stood on too lofty an eminence to be practically useful. In his place Marduk,\* god of the sun as he rises from the ocean and brings with him the water of purification, is usually invoked by the exorcizing priest. On the other hand, Gibil and Nusku were invoked as re-presenting the sacred element of fire. The follow-ing incentation ing incantation-

'Nusku, great God, counsellor of the Great Gods, Guarding the sacrificial gifts of all the heavenly spirits, Founder of cities, renewer of sanctuaries, . . . I prostrate myself before thee; Burn the sorcerer and the sorceress; May the life of my sorcerer and sorceress be destroyed '--

was recited in a whisper before the wax image of the sorcerer or witch. A noticeable feature of these invocations of the fire-deity is the lofty language in which they are expressed. We conclude with the following (Tallq. Maklu, i. 130 f.)-

The witch who has charmed me, Through the charm with which she has charmed me, charm her;

Those who have made images of me, reproducing my

features, Who have taken away my breath, torn my hairs, Who have rent my clothes, have hindered my feet from

treading the dust, May the fire-god, the strong one, break their charm.'

We have no space to refer to many other interest-ing features of this great subject of Babylonian magic, more especially to the ethical ideas that occasionally appear in the Surpu texts. These must be studied in the attractive pages of Morris Jastrow's work from which quotation has been made. The importance of Babylonia in its relation to Greek and Roman culture must not be forgotten, and in the realm of astrology and magic forgotten, and in the realm of astrology and magic this especially holds true. In the early days of the Roman empire the *mathematici* or 'astro-logers' were also called *Chaldæi* (cf. Gell, i. 9). Far more potent was the influence of Babylonia upon Israel. The influence of Egypt over the ancient Hebrews is by no means so definite.<sup>+</sup> Certainly configurate of the influence of the influence of the influence of the influence of the second s no inference confirmatory of such influence can be drawn from the post-exilian passage, Ex  $7^{10}$  (P). The Piel partic. of  $7^{10}$ , there used to characterize the magicians and their practices, is connected by

Semitic philologists with the Arabic root 'cut off' (used of an eclipse). The Ethps. of the same root, employed in Syriac in the sense of

pray' (cf. ) 'prayer'), is combined in Gesen. Heb. Lex.<sup>12</sup> with 1 K 18<sup>20</sup>, where reference is made to the self-mutilation of the devotees of Baal. But this is a highly precarious speculation, and we are on a safer path if we go to the ancient Semitic Babylonian for light. Kašāpu in Assyrian means 'to bewitch,' and kišpu means sorcery.

• We cannot fail to note the corresponding rôle in comparison with Ea played by Marduk in the cosmogonic legend. See Cosmogony.

† The influence exercised by Egypt was far more definite and † The influence exercised by Egypt was far more definite and powerful from the Srd cent. B. o. onwards, when Alexandria be-came a centre where Greek and Oriental culture met. We see this in the later Jewish literature, from which Blau gives copi-ous citations (*Das aul.-Jüdische Zauberwesen*, p. 38'). Thus in Kiddushia 400 we read that out of the ten measures ("D) is the ten measures ("D) and the ten measures (D) and ten measures (D) and ten measures (D in Kiddushia 400 we read that out of the ten measures ( $|^{2}p\rangle$ ) of sorcery which descended into the world, Egypt claimed for itself as many as mine. In *Merachoth* S55 we find an interest-ing reference to Jannes and Mambree (Johana and Mamrs), the heads of the Egyptian magicians (cf. 2 Ti 36). Blau thinks that the Egyptan potion "INO" UN", to which *Pesach*. (ii. 1 refers, was a magical healing draught. Among the Greeks and Romans Egypt was regarded as the classical land of magic and medicine. Yet this is more true of the later than of the earlier Greek history, and it is obvious that the Jewish Midrash read the con-ceptions of its own time into OT passages. Thus in 1 K 430 the 'wiedom of the sons of the east, 'which Solomon's wisdom ex-ceeded, is interpreted to mean the wisdom of the Egyptians.

Here, as in the case of  $\eta \gamma \kappa$  (Dn 1<sup>20</sup> 2<sup>2. 27</sup> 4<sup>7</sup> 5<sup>15</sup>, cf. Assyr. asipu), we have probably Babylonian loan words. We have already indicated (art. DEMON) that the Heb. 7 (with its Aramaic equivalent) was of like origin. In earlier days than the Exile, especially in the 15th and previous centuries, Canaan was largely under Babylonian influence. From Is 26 we are disposed to conclude that Babylonian magic and other foreign superstitions prevailed in Israel in the days of Ahaz, if the reading 737 validity of this reading most recent commentators, including Dillm. and Duhm, admit, though with the addition of  $\Box c c$  or c c c before  $\Box c c$  to make better structure and rhythm: 'They are full of soothsaying from the East.' Similarly Cheyne in SPOT It is true that Balaccus accuse Dette SBOT. It is true that Balaam came from Pethor (Dt 23<sup>4</sup> [<sup>5</sup> Heb.], cf. Nu 22<sup>5</sup>), the *Pitru* of the Assyrians, on the western bank of the Euphrates, and that he was regarded as a soothsayer (Nu 227). Yet it must be admitted that the insertion of COP Yet it must be admitted that the insertion of exp here is mere hypothesis. How deeply soothsaying and magic had infected Judah a century later is shown by Jer 27<sup>9</sup>. The prevalence of the magical arts in early pre-exilian times is clearly evidenced in the most primitive code of Hebrew legislation, which strictly prohibited such practices, and regarded them as closely connected with heathen worship. It is, moreover, significant that in Ex  $22^{18}$ , the passage referred to, it is a woman professor of these arts, כְּשָׁזֶה or 'sorceress,' who was not to be permitted to live. Similarly in Islam both the witch and the sorcerer were punished with death. The punishment of drowning was inflicted on the witches of Kufa by the Khalif Valid I.; see Wellhausen, Reste Arab, Heidenth<sup>2</sup> p. 160.

In the list of prohibited practices in Dt  $18^{11}$ the  $\eta \forall ; \gamma \gamma$  magician is coupled with those who worked spells  $(\neg ; \gamma \neg ; \gamma)$  by tying knots, whereby the victim was bound by an evil charm. Illustrations of these customs have been already given in the account of Babylonian practice. Closely associated in the Deuteronomic passage with the magician  $(\eta \forall ; \gamma)$  and the sorcerer who binds the knots, are the soothsayer  $(\forall ; \gamma ; \gamma)$  and the necromancer, and those who inquire by familiar spirits. On these subjects, nearly allied to magic and sometimes included in it, the reader is referred to the separate articles, DIVINATION, SOOTHSAYING, and SORCERY. In Ps 58<sup>4,5</sup> and Jer 8<sup>17</sup> we find interesting parallels which show that serpent-charming was practised as a mode of conjuring the demons, which the ancient Hebrews like the Arabs considered to reside in serpents. Illustrations of this popular superstition may be found in Baudissin, *Stud. zur Semit. Relig.* i. p. 279 ff.; W. R. Smith, *RS* p. 120, n. 1, and p. 133. The root  $\forall n$  used in the Piel of the serpent-charmer (Ps 58<sup>6</sup>) is probably a minetic word meaning to hiss or whisper,<sup>\*</sup> and thus to conjure serpents. See W. R. Smith, *Journ. of Phil.* xiv. p. 122 ff. Lagarde, indeed, would be disposed to connect  $\forall n$  and  $\forall n$ , and derive the latter from the former. The Assyrian parallel Pael form lubhais is obscure as to meaning.

Is 47 is a song (arranged in strophes) concerning the fall of Babylon. Its value for the student of history is the clear evidence it affords that by the Jews of the 6th cent. Babylonia was regarded as the land where magic had been practised from time immemorial  $(\pi_1, \pi_2, \pi_2, \pi_2, \pi_2)$ . The prophet utters his warning in the words  $(vv. 9^{-12})$ — 'Yea there shall come over thee both these . . .

Yea there shall come over thee both these . . . childlessness and widowhood in their full measure though thy magic arts (مرموري) be many, though thy

\* The presence of the significant sibilant  $\mathcal{P}$  in all these words  $\eta \mathcal{P}_N$ ,  $\eta \mathcal{P}_J$ ,  $\mathcal{P}_J$ ,  $\mathcal{P}_J$ ,  $\mathcal{P}_J$ , suggests an ultimate mimetic origin connected with the sound of hissing or whispering. Cf.  $\eta \mathcal{P}_{\mathcal{P}}$  in 10<sup>19</sup> 29<sup>4</sup>. spells (קריד) be very potent . . . Abide by thy spells \* and thy many incantations whereby thou weariest thyself.—Perhaps ye are able to obtain advantage, perhaps ye scare away [the foes].'

The references to popular magic in the OT are not infrequent. The Digits of Reuben of which Rachel made use (Gn  $30^{147}$ . J) seen to be a reminiscence of some magic superstitions connected with the worship of the deity  $\pi\pi\pi$ , which the Moabite Stone (line 12) would lead us to regard as a deity of love belonging to the tribe of Gad. There can be little doubt that the earrings buried by Jacob as idolatrous were magical amulets inscribed with words or tokens to avert the evil eye or other disasters (Gn  $35^4$ ). Similarly the 'crescents' or 'little moons,'  $\mu\eta vioxou$  $(Digits), of which Isaiah speaks in <math>3^{18-22}$  (Cheyne and Duhn make the passage post-Isaianic), may be compared with the *hildlât* or crescents adorning a modern Arabian maiden. Similar crescents were worn on the camels' necks (Jg  $8^{21}$ ) of the Midianite kings, and were undoubtedly employed as amulets or charms (see Delitzsch on Is  $3^{18}$ ). Lane, in his *Manners and Customs of the Modern Egyptians*, observes that horses often wear appendages consisting of a few verses of the Koran enclosed in cases of metal. That the lady of fashion in Jerusalem, whose attire is described by Isaiah, wore crescents as a charn, is shown by the subsequent mention of the amulets ( $0 \neq 0$ ). See chs. xi. xii. in

An obscure reference in the Bk. of Job (3<sup>8</sup>), in which the speaker, cursing the night of his birth, exclaims—

#### "May those who curse the day, curse it, Who understand how to stir up Leviathan, ' +-

has been considered to refer to the mythical dragon who was believed to seize upon the sun or moon when eclipsed. The magician's power was supposed capable of compelling the dragon monster Leviathan to seize or give up his victim (cf. Is 27<sup>1</sup>, Job 26<sup>19</sup>).<sup>‡</sup> On Nu 21<sup>st.</sup> see SERPENT, and Dillm. *ad loc.* 

The prophets habitually associate magic with idolatry (Mic 5<sup>115</sup>, cf. 2 K 9<sup>22</sup>, 2 Ch 33<sup>6</sup>). Yet the history of Israel constantly reveals the continuance of popular superstition and practice even after legislation had long pronounced them unlawful. In the later days of Judaism learned Rabbis did not forbid the study of magical arts, though the practice of these arts was not permitted. Of one it is even said that he considered the knowledge of magic to be essential to any member of the Sanhedrin in order that he might be capable of pronouncing an opinion upon it (Blau, *Zauberwesen*, p. 20). The fact that the practice of magic as the inevitable result of their power. The truth is precisely the reverse. They believed in magic as the inevitable result of their belief in demons, but regarded it, just as St. Paul himself did, as bound up with idolatry and the

\* The word  $\neg \Box \Box$ , (pl.) 'magic art' or 'spell' probably refers to the binding of the knots. The same root occurs in Assyrian. The Fael of  $\neg \Box ubburru$  is used of binding under the spell of the sorceress (WAI iv. 49, 5a; 50, 52b; Delitzsch, Handwört. sub occe). In v.<sup>11</sup> we have an interesting word  $\neg \neg \neg \Box$  ('evil which thou knowest not) to avert by incantations,' Piel infin. with suff.

of the root which in Arabic (ساكتر) is constantly employed in

the sense of using magic spells (see Wellhausen, Rest?, p. 159). † Gunkel's reading of D' for D' in the first line, and rendering 'may those who keep the sea under a spell curse it,' etc. (Schöpfung u. Chaos, p. 59), are far fetched though ingenioua. Gunkel holds that THE HE'S and Counterspell, a view which does not appear to us at all warranted.

t There possibly lurks a reference to a demon in the  $\pi_2^{-1}$  y of Pr 30.5 and some magic ritual connected with it, to which all clue has been lost. See Baudissin's art. 'Feldgeister' in  $PKB^3$ vi. p. 6, and Wellh. Resto Arab. Heidenth.<sup>9</sup> p. 149.

realm of darkness, and therefore to be shunned. It comes within the circle of the everyeua rou Σaravâ.\*

As a matter of fact, however, the mass of the people could not be delivered from the influences of their time, and troubled themselves little about the religious scruples of their teachers, and, like the Greeks and Romans, Egyptians and Baby-lonians, were delivered up to the superstitious tendencies and practices of their age. Hence the Mishna, Sota ix. 13, deplores that jealousy and magic were ruining society. Indeed we even hear of distinguished Rabbis practising magic, e.g. Eliezer, son of Hyrcanus, who at the request of Akiba was able, through a charm, to fill an entire field with gourds, and by means of another formula to transfer them to a single place (Sanhedrin 68a in Blau, p. 26). Jesus Christ was regarded by His countrymen as a magician, and was called by them Balam, Sanh. 106b, Sola 47b. According to the Gospel narrative (Mt 12<sup>244</sup>), He was even called a sorcerer who worked His wonders in league with Beelzebub. Tobit, ch. 6, clearly illustrates how thoroughly demonology and magic practices had taken hold of the Jewish people. This tradition even influenced dress (see FRINGES, PHYLACTERIES, and cf. Lk 844); also dwelling-houses (mezúzúth, Dt 68. 9, see Driver, ad loc.).

We have no space to describe with any fulness of detail the great world of Jewish magic and the spells which were employed. These consisted of special formulæ in which certain names were recited (see AMULETS, DEMON, EXORCISM, and Brecher's Das Transcendentale, Magie u. mag. Heilarten im Talas heathenish (Brecher, p. 192 ff.); on the other hand, special formulæ, involving the invocation of angels and the pronunciation of words, whereby certain evils were counteracted or diseases healed, were not only permitted but even recommended. The personal names of the celestial hierarchy which are most potent are given on p. 21 ff. of Brecher's treatise. We cite the translation of one formula among the large number given by this writer and Blau. It is a remedy against an ulcerous swelling. The original may be found in Brecher, p. 198 ff.: 'Baz Bazia, Mas Masia, Kas Kassia, Sharlai and Amarlai [cf. p. 38, and *Shabb.* 67*a*], the angels which came from the land of Sodom to heal painful sores. May the colour not become redder not extend further. may the not become redder, not extend further; may the seed be absorbed in the belly. And as a mule

seed be absorbed in the belly. And as a mule does not propagate itself, so may the evil not propagate itself in the body of N., son of N.' Against possession by devils: 'Cursed, broken in pieces and conjured be the demon named Bar Tit. Bar Tamâ, Bar Tinâ,'etc. Most potent of all names in these spells was that of God, expressed in every conceivable form, opertimes as the tetrargementon

sometimes as any, sometimes as the tetragrammaton itself. This subject, as well as the great variety of modes in which the sacred Hebrew name appears in Egyptian magic papyri, will be found fully set forth in Blau's instructive work, pp. 117-144. The survey of this strange world of abject super-stition and triviality enables us to realize in some

measure the nature of those methods whereby the Pharisees professed to exorcize demons in the days of our Lord (Mt  $12^{27}$ ), and of those arts which Elymas + the sorcerer employed (Ac  $13^8$ ) and Simon Magus (Ac 8). In Ephesus the Apostle Paul was confronted with this realm of magical superstition in its most aggravated form, for Ephesus was the

<sup>2</sup> επρμαχία belonged to the *lpra* τῆι σαρχίς (Gal 5<sup>20</sup>) Cf. the language of Rev 9<sup>21</sup> 18<sup>23</sup> (ref. to Babylon) 21<sup>8</sup> 22<sup>15</sup> with 2 Th 28-10

† Probably the Arabic 'alim 'knowing.' Moses in Koran, Sur, vii. 106, is called sthirwn 'alimum 'wise magician.'

greatest centre of Græco - Oriental life in Asia Minor. From this city came the famous Έφέσια γράμματα, frequently employed in conjurations.\* Probably these and a vast number of other magic formulæ of incantation, resembling those found in recently discovered Egyptian papyri, were recorded in the magic treatises, worth 50,000 drachmas, which were publicly burned in Ephesus through the influence of St. Paul's preaching (Ac 19<sup>19</sup>). Deissmann in his *Bibelstudien*, p. 26 ff., has published a long inscription of singular interest engraved on a leaden tablet (of which he gives a facsimile) discovered in 1890 in the necropolis of the ancient Hadrumetum, in which a spirit is conjured by Domitiana, daughter of Candida, to cause Urbanus to be united to her in marriage speedily. The most remarkable characteristic of this long document of 47 lines is that we have not a single heathen deity invoked, but only Jehoval under the forms Jao, Aoth, and Abaoth, and many others.+ The origin of the first form Iaw as an abbreviation of man hardly be doubted in this case and in those of the Abraxas ; gems and amulets. Aoth and Abaoth are obviously abbreviations taken from the name אָרָאוֹת (see Blau, p. 102 ff.).

Another remarkable feature in this and in other documents is the powerful influence exercised by Judaism and afterwards by Christianity on the Hellenistic and Roman heathen world. In an instructive chapter on this subject in Schürer's  $GJV^3$ iii. p. 297 ff., useful citations may be found (n. 86) from Origen, c. Cels. iv. 33, to prove that in the closing years of the 2nd and the beginning of the 3rd cent. A.D., nearly every one  $(\sigma \chi c \delta \delta r \kappa a i \pi d r \pi a s)$  who used spells and incantations invoked the name of the God of Abraham, Isaac, and Jacob, in order to avert the power of demons. From Hippolytus, Philosophumen. iv. 28, we learn that the magicians made use of Hebrew words as well as Greek, stress being evidently laid on the original form of the name or word, no translation having any efficacy. Further illustrations of this literature will be found in Schürer (see esp. the citation from Kenyon's Greek papyri in the British Museum, and from the Carthage tablets on p. 298, footn. 88). Jewish literature of the Christian era abounded in magical works. In the Book of Jubilees, ch. 10, mention is made of a pseudepigraphic treatise by Noah on healing, and Gaster's recently published magical book, *The Sword of Moses*, is another striking illustration. The name of Solomon is constantly associated with magic prescriptions and formulæ (comp. Kohut, Jüdische Angelol. p. 81 ff., and Joseph. Ant. VIII. ii. 5), and this tradition survived to the Middle Ages. We find an echo of it in Goethe's drama, in the words addressed to Faust's poodle-

# 'On this mongrel brood of Hell The charm of Solomon worketh well.'

Will magic ever die ? Lehmann's instructive treatise exhibits its present wide prevalence. Even with the marvellous advance of modern culture, its power does not disappear as rapidly as might be expected. In pre-Christian times the growth of civilization only produced more

\* See Schürer, GJV<sup>3</sup> ili. 297, n. 63, where citations are given from Plutarch, Sympos. vil. 6. 4; and Hesychius, the translation of which is here appended. 'The magi bid those possessed with demons recitle to themselves and name the Ephesian formulae.' Hesych. says respecting these: 'They were once [six] in number, but subsequently others were deceptively added. It is said that these are the names of the first i arm, marárm, siž, virpáž, daumamint, sizer.' Explanations of these names follow, based evidently on etymological guesswork. 'The names of the patriarchs occur under the forms Aβpear, Isawe, Ispane.

The names, so the period series of anulets inscribed with the word Agarse for Agaras, series of anulets inscribed with the others. On this subject the student should consult Drexler's elaborate article in PRE3, vol. i. s. 'Abrasa.'

MAGISTRATE

highly developed forms of magic. Religion and religious philosophy were accompanied by hosts of yonres. Modern spiritualism points to a factor in human life which nothing will eradicate unless man is to become ultimately an acquiescent machine. As long as he continues to live, he will attempt to defy the limitations that surround him. It is this very sense of limitations that stimulates these abnormal endeavours to transcend them in modes that lie beyond the ascertained lines of cause and effect.

'Flectere si nequeo superos, Acheronta movebo.'

INTERATURE.—The literature of this subject is very copious, and a full list will be found in the pages of Schürer, pp. 300-304. In addition to the catalogue there given, Morris Jastrow's chapter on Babylonian Magic and Blau's treatise should be con-sulted. To these we have made frequent reference. See also Lehmann, Aberglaube u. Zauberei; Wünsch, Schlanische Ver-funchungeingeingein, and Ramsay, Expos. July 1899, p. 22. For further information, see articles SORCHER and EXORCISE. OWEN C. WHITCHOUSE.

MAGISTRATE.-This word is used several times in AV, where it represents different words in the original. At Jg 187, where it is said of Laish, י there was no nagistrate in the land that might put them to shame in anything' (אַרָר בָּאָרָן), the meaning of the expression has been much discussed and is confessedly obscure; but it probably denotes, not any particular office, but the more general idea of 'some one possessing power of restraint,' or as in RV 'possessing authority.'\* At Ezr 7<sup>25</sup>, where Ezra is directed to appoint 'magisform of what is in Hebrew the usual expression for form of what is in represented usual expression for 'judges'  $(sh \bar{o} p h \bar{c} t i m)$ , which reappears in the Cartha-ginian suffetes). At Lk 12<sup>11</sup> 'magistrates' repre-sents the general word  $(d\rho \chi a t)$  for 'ruling powers,' and is better rendered as in RV 'rulers'; while at Lk 12<sup>66</sup> the 'magistrate'  $(d\rho \chi \omega r)$  to whom it pertains to receive a complaint appears to denote local bath parts of computed histor participant the a local authority of somewhat higher position than At Tit 3' the phrase 'to obey magistrates' repre-sents the compound verb  $\pi\epsilon \ell a \rho r \rho$ , which may probably be better rendered as in RV by the simple 'to be obedient.' But the principal use of the 'to be obedient.' But the principal use of the word 'magistrates' is in Ac 16, where it denotes the chief authorities of the Roman colony of Philippi. When Paul and Silas were dragged into the market-place before the 'rulers' (apxorras, i.e. the local city-judges), the charge against them re-solved itself into one of political disturbance, conflicting with the allegiance due to Roman authority, and the accused were brought unto 'the magistrates' whose duty it was to deal with it (the *orparryol*, 16<sup>20</sup>. <sup>22, 25, 25, 25</sup>). These were the *duumviri* or *protores*,†

as they were called in towns which were colonies. They had officers in attendance on them to execute their orders, called 'serjeants' (EV) or 'lictores' when they were made aware that the prisoners whom they had ordered to be scourged were entitled to the privileges of Roman citizens, they were glad in turn to become suppliants that the released captives might leave the city. WILLIAM P. DICKSON.

**MAGNIFICAL.**—The old adj. 'magnifical' is retained by AV in 1 Ch 22<sup>s</sup> from the Geneva version, and it is still kept in RV—'the house that is to be builded for the LORD must be exceeding magnifical '-though the word has long since been displaced by 'magnificent.' The adv. occurs in Rhem. NT, Lk 16<sup>19</sup> 'There was a certaine riche man, and he was clothed with purple and silke : and he fared every day magnifically.' J. HASTINGS.

\* The MT appears to be hopelessly corrupt, and the Versions give no help (see Moore, *ad loc.*). † On the application of the term *protores* to the magistrates at Philippi, see Ramsay, St. Paul the Traveller, p. 217 f.

#### MAHALALEL

**MAGOG** (nup, Maγώγ).—Enumerated among the sons of Japheth between Gomer (the Cimmerians) and Madai (the Medes) in Gn 10<sup>3</sup>. Ezekiel (38<sup>2</sup>) calls Gog 'the prince of Rosh, Meshech, and Tubal,' of 'the land of Magog.' In Rev 20<sup>3</sup>, Gog Tubal, of 'the land of Magog.' In Rev 20, Gog and Magog are alike made representatives of the northern nations. If Gog is Gyges of Lydia, Magog would be Lydia, and we should have to explain Magog as signifying 'the country of Gog' (but see Dillm. on Gn 10<sup>2</sup>, where this explana-tion, which is that of Ed. Meyer [Gesch. § 464], is under the state of the second the second emphatically rejected). It is noteworthy that moys meant 'land' in the Lydian language, and that the Assyr. inscriptions give the name of a district in Armenia as indifferently Ma-Zamua and Zamua. In any case, as Meshech and Tubal were nations of E. Asia Minor, Magog would seem to have been in the same part of the world, and its association with Gomer in Gn 10<sup>9</sup> would be explained by the Cimmerian settlements in Asia Minor. Capwriters. Josephus (Ant. I. vi. 1) identifies Magog with the Scythians; but the term Scythian was used vaguely to denote almost any northern population about which little was known.

The prophecy of Ezk 382-396 was the source of the constantly recurring notion in Apocalyptic literature that Israel's enemies would be finally destroyed at the advent of the Messiah (see Liter-ature below, and cf. Rev 20<sup>2</sup>). In the Assumption of Moses, where there is no mention of the Messiah, this final destruction is the work of God Himself, as it is also in *Enoch*, where the Messiah appears after the judgment. Gog and Magog not only meet us in Rev, but recur constantly in the 'antichrist-Apocalypses' (see Bousset, *Antichrist*, Index, s. 'Gog u. Magog').

**MAGUS.**—See MAGI, MAGIC, and SIMON MAGUS.

#### MAHALALEEL.-See MAHALALEL.

MAHALALEL (אָקלאָלאָל) יידי ' praise of God,' cf. the name אַזָלאָל *Jehallelel*, ' he shall praise God'; Matthew J. -- 1. Son of Kenan and great-grandson of Seth, Gn 5<sup>12, 13, 15, 16, 17</sup> (P)=1 Ch 1<sup>2</sup>. The name corresponds to Mehujael (אָרָאָל) in J's list, Gn 4<sup>13</sup>. See MEHUJAEL. In the genealogy of Jesus, Lk 

3<sup>57</sup>, RV has **Mahalaleel**, AV (following the Greek, Ma $\lambda\epsilon_{\lambda}\epsilon_{\eta\lambda}$ ) Maleleel. 2. The son of Perez, who dwelt at Jerusalem after the Captivity, Neh 11<sup>4</sup> (B Ma $\lambda\epsilon_{\lambda}\eta\mu$ ).

**MAHALATH**  $(n_{2}^{2}q_{2})$ .--1. (Mac $\lambda i\theta$ ) A daughter of Ishmael, and wife of Esau, Gn 28<sup>36</sup> (P). In Gn 26<sup>34</sup> (also P) a 'Hittite' wife of Esau is mentioned whose name was **Basemath**, and in 36<sup>3</sup> (prob. R) this Basemath is called daughter of Ishmael (Sam. has here and throughout ch. 36 nbm, which, however, may be a harmonistic correction). The whole subject of Esau's marriages is wrapt in obscurity (see *Comms.* of Dilm. and Holzinger, and art. ESAU in vol. i. of this Dictionary, p. 734<sup>s</sup>, note). 2. (Moh( $\lambda id\theta$ ) Wife of Rehoboam, 2 Ch 11<sup>10</sup>. She was the daughter of Jerimoth, one of David's sons, and hence a cousin of Rehoboam.

#### MAHALATH LEANNOTH.-See PSALMS.

**MAHANAIM** (0:200 'two camps' or 'hosts' (?); the LXX renders by  $\Pi a_{pe\mu}\beta_{0}\lambda al$  Gn  $32^{a}$ , 1 K  $2^{a}$ ,  $\frac{1}{7}\pi a_{pe\mu}\beta_{0}\lambda f_{1} \ge 2 2^{29}$ ; in Jos, B has Badr (Madr), Maará, Kaµéu, A Maráµ; in 2 S, B A Maráeµ, Maráeµ, Maaráeµ (17<sup>24</sup> A Maráeır); 1 K 4<sup>14</sup> B Maaraucior, A Maaráµ; 1 Ch 6<sup>20</sup> B Maaráu, A Maaráµ, —An important city on the E. of Jordan, of which the exact site is unknown. The above explanation of the name is due to J, whose narrative (Gn  $32^{a-12}$ , esp. vv.<sup>7-10</sup> 'two companies,' and v.<sup>12a</sup> 'and he lodged *there* that night') indicates that it originally contained an explanation of the mauner in which the place obtained its name: probably this was omitted as inconsistent with v.<sup>2</sup>. In E, on the other hand, nothing is known of the dual meaning of the word, the forms *Mahanaim*, *Mahaneh* ( $0:200, 300^{\circ}$ ) being used indifferently (32<sup>2</sup> 'This is God's host' (mahaneh, v.<sup>21</sup> and he himself lodged that night in *Mahaneh* (not as RV 'in the company ')).<sup>\*</sup> According to Gn  $32^{12}$ . (vv.<sup>1.2</sup> 12bc. E, vv.<sup>3-13a</sup> J) Jacob was here confronted by a vision of angels after he had parted from Laban on the montain range of Gilead. No further mention is made of Mahanaim until after the conquest of Palestine by Joshua, when it is described as lying on the border between Gad and Manasseh (Jos 13<sup>34.30</sup>). According to Jos 21<sup>34</sup> it was one of the cities of Gad assigned to the priestly family of

It was, however, more especially during the early period of the monarchy that Mahanaim came into prominence. Owing possibly to the timely assistance which Saul had rendered to the inhabitants of Jabesh-gilead at the commencement of his reign (1 S 11<sup>16-</sup>), the country E. of Jordan long remained faithful to the house of its deliverer. Hence it was that, after the death of Saul, Abner established Ishbeal (Ishbesheth) as king of Israel at Mahanaim, in opposition to David, who reigned over Judah in Hebron (28 2<sup>ac</sup>). From Mahanaim Abner started on the expedition to Gibeon, which, result-

• It seems probable that Mahanaim is yet another instance of a place-name with an apparently dual termination which has arisen from a later expansion of the original termination in  $-\bar{a}m$ and  $-\bar{c}m$  (or  $-\bar{a}m$  and  $-\bar{c}m$ ). The most striking instance of this change is  $D[\psi^{+}]$  (Jerusalem), which represents the Kerf perpetuum for an original  $D[\psi^{+}]$  (Aram.  $D[\psi^{+}]$ ). Similarly in Aramaic we find [" $\nabla_{\tau}\psi$  = [ $\nabla_{\tau}\psi$ ] for the Heb. ]" $\nabla_{\tau}\psi$  (Samaria), while the Mesha inscription affords several examples of the termination in  $] - (-\bar{a}n)$ , which in Hebrew is represented by  $\Omega^{-} = (-\bar{a}\bar{a}m)$ . Other cases in Hebrew are Dothain ([ $D^{+}$  0 K 6<sup>13</sup>); Kartan ([ $B^{+}$  7 Jos 21<sup>33</sup>) and Kiriathaim ( $C_{1} \nabla_{\tau} \otimes 1$  Ch 6<sup>76</sup> 6<sup>(1)</sup>), and Enam ( $\Omega_{1} \otimes 2$  Jos 21<sup>33</sup>) and Kiriathaim ( $C_{1} \otimes 2$  K 6<sup>13</sup>); Kartan ([ $B^{+}$  7 Jos 21<sup>33</sup>) and Kiriathaim ( $C_{1} \otimes 2$  K 6<sup>13</sup>). For further discussion see especially Strack, Generic, p. 130; Weilhausen, JDTA xxi. 443, Comp. p. 45n.; Philippi, ZDMG xxxii. 651; Barth, Nominalbidung, p. 319; Gen. Kautzach, Heb. Grum. p. 256. Against this view, König, Labryetsude, il. p. 437.

ing in the defeat of the Israelite forces at the hand of Joab and his Benjamite followers, proved to be the turning-point in the struggle between the rival kings. In their flight it is stated that Abner and his men passed through the Arabah along the right side of the Jordan, and thence made their way across Jordan and up the gorge (RV 'Bithron') to Mahanaim. Despite this reverse the war between the house of Saul and David still continued until the murder of Ishbaal, which followed soon after the defection and death of Abner, left David in sole command. Presumably, the tribes on the E. of Jordan joined in the universal recognition of David as king and acknowledged his rule. That they proved faithful to the new monarch is shown by the fact that David, when driven from Jerusalem by the rebellion of Absalom, at once directed his flight to the capital of his former rival and was there royally received by the chief men of the country, among whom was a son of his former ally, Nahash the Ammonite (2 S  $17^{24-27}$ ). The encounter between the forces of David and those of Absalom took place in the Forest of Ephraim (which see), apparently the wooded district of Gilead which lay opposite to Ephraim on the E. of Jordan.\* Information of the defeat of Absalom's army was conveyed to the king, who had remained in Mahanaim, by Ahimaaz the son of Zadok, who, running by the way of the plain  $(\tau_2 \tau_2)$  = the circle of Jordan, Smith, *HGHL* p. 505), outstripped the previous messenger who had been sent by Joab (2 S 18<sup>23</sup>). Apart from a possible reference in Ca 6<sup>13</sup> (RVm 'of two companies,' LXX  $\tau \hat{\omega} \pi \pi a \rho e \mu$ . βολών), Mahanaim occurs only once more, as the dwelling place of one of Solomon's twelve commissariat officers (1 K 414).

From the above sketch of the history of Mahanaim it will be seen that the biblical narrative affords but little assistance in identifying its exact where near the Jordan to the N. of the Jabbok and of the great gorge (or Bithron,  $2S2^{29}$ ). Accord-ing to Jos 13 it was situated on the border of Gad and Manasseh, a position which agrees with the history of the monarchy. Conder (*Heth and Moab*, p. 179 ff.) places it near *el-Bukeia*, to the E. of es-Salt; but this is too far south. More probable is the view of Merrill (East of the Jordan, p. 433 ff.), who identifies Mahanaim with Khurbet Suleikhat, At the entrance of the Wady Sulikhat, 3 miles N. of the Wady Ajlun. He points out that the present ruins stand some 300 feet above the plain, and command an extensive view across the valley to the W., and down the valley almost to the juncture of *Wady Zerka* (Jabbok) with the Jordan, This situation agrees admirably with the datails supplied in 2 S 18, according to which the watch-man of Mahanaim discerned the Cushite and Ahimaaz from a considerable distance (v. 346.) It also throws light on the statement of v. 2 ('Then Ahimaaz ran by the way of the plain'), the point being that Ahimaaz chose the longer but more level route along the plain, and so outstripped the Cushite, who made his way across the intervening hilly country. Earlier travellers (Sectzen, Reisen, i. 385; Robinson, Phys. Geogr. p. 78f.) place Mahanaim at the modern Mahne, which according to the old Jewish traveller Parchi (Benj. of Tudela, ii. 408) lay about half a day's journey due E. of Bethshean. The latter statement is certainly erroneous, but in any case Mahne is too far from the Jordan, shad its position in the midst of the mountains of Gilead does not suit the narrative of 2 S. Buhl, however (GAP p. 257), seems to

\* It is noteworthy that Luc. gives  $M_{SMU}(x)$ , i.e. Mahanaim instead of Ephraim, but this may be only a correction; see Smith, HGHL p. 335<sup>3</sup>; Buhl, GAP p. 121; Budde, *Ri. u. Sam.* p. 34 ff.

MAHANEH-DAN

place Mahne (or Minne) considerably farther S., slightly to the N. of the Wady 'Ajlun; the latter he would then identify with the gorge (or Bithron) of 2 S 229 (ib. p. 121). J. F. STENNING.

MAHANEH-DAN (קחורדן, παρεμβολη Δάν). -- The name occurs twice : in Jg 18<sup>12</sup> of a place ' behind,' • The i.e. W. of Kiriath-jearin, in Jg 13<sup>28</sup> of a place between Zorah and Eshtaol, where Samson began Whether one identifies Kiriath-jearim his work. (which see) with Khirbet 'Erma or with Abū Ghosh, it is scarcely possible to take both these references for be to the same place. Nor has the name been found. It is true that Williams (Holy City, i. 12, note) had a site pointed out to him, north of Wady Ismail, as bearing the name Beit Mahanem. Both name and situation are tempting, but the statement lacks confirmation. Guérin (*Judée*, i. p. 62 ff.) places the Mahaneh-dan of 18<sup>13</sup> near 'Abou-Goch,' but he ignores the other. Moore on Jg 13<sup>25</sup> accepts the position assigned to Mahaneh-dan in 18<sup>13</sup>, and thinks there is no support for the supposition that there were two camps of Dan. It seems probable, however, that the name, since it was never attached to a town, was floating rather loosely in this quarter of Palestine. The author of 1325 then understood it to refer to the original war-camp which the Danites occupied at the time of the conquest, before their permanent settlement; the author of the clause in 18<sup>13</sup> took it to be the name of the first camp which the 600 Danites occupied outside their own territory when they marched northward to attack Laish. (Cf. ZDPV x. p. 137 with Guthe's note). A. C. WELCH.

**MAHARAI** (קרך); B Noepé, Neepé, Menpá; A Maepaci, Moopá, Moopai).—A native of Netophah in Judah, the modern *Beit Nettif* (Buhl, *GAP* p. 194), in the Wady es-Sunt, or Vale of Elah, the third of the five valleys which, cutting right through the Shephēlah, connected the Philistine plain with the hill-country of Judæa. Maharai was one of David's thirty heroes (2 S 23<sup>28</sup>, 1 Ch 11<sup>30</sup>), and according to 1 Ch 2713 was of the family of Zerah, and captain of the temple guard for the tenth monthly course. J. F. STENNING.

**MAHATH** (nmp).—1. The eponym of a Kohathite family, 1 Ch  $6^{25}$  [Heb.<sup>20</sup>] (B Má $\theta$ , A Ma $d\theta$ ), 2 Ch  $29^{12}$  (B Mad $\theta$ , A Ma $d\theta$ ), perhaps to be identified with **Ahimoth** (nmp) in gray my brother is death') of 1 Ch  $6^{25}$  [Heb.<sup>10</sup>], B 'A $\lambda \epsilon_{i\mu}\omega\theta$ . See Gray, Heb. Prop. Names, 281, note 1. 2. A Levite in the time of Hezekiah, 2 Ch  $31^{13}$  (B Ma $d\theta$ , A Na $d\theta$ ).

MAHAYITE, THE (תְּקָוֹים).—The designation in 1 Ch 11<sup>46</sup> of Eliel, one of David's heroes. The MT is unintelligible and certainly corrupt. Bertheau proposes to emend to Trigt 'the Maha-naimite'; Kittel, following the Vulg. Mahumites, reads mar. LXX B has Meel, A Maweir.

MAHAZIOTH (קטויאת and יסטויאס 'visions'; B Μελζώθ, A Maaζιώθ).—The Hemanite chief of the **23**rd course of singers, 1 Ch 25<sup>4-30</sup>. On the extra-ordinary conglomeration of names in v.<sup>4</sup> and the supposition that they are really a fragment of a hymn, see W. R. Smith,  $OTJC^2$  143, note 1, and art. GENEALOGY, vol. ii. p. 124<sup>b</sup>.

προνομμε ποιήσαι σκύλων,  $v.^3$  ταχέως σκύλευσον δέξως προνόμευσον ; Is 8<sup>1.3</sup>).—A symbolical name given to one of Isaiah's sons to signify the speedy destruction of the power of the allied kings Rezin and Pekah by the king of Assyria. The prophecy was fulfilled in the invasion of the North in the followfulfilled in the invasion of the North in the follow-ing year (734) by Tiglath-pileser, who entirely crushed Rezin, and took many cities of Israel and 'the family of the Mahlites.' According to 1 Ch

devastated the country (2 K 15<sup>39</sup> 16<sup>9</sup>), though the actual capture of Samaria did not take place till 13 years later (721). F. H. Woods. 13 years later (721).

**MAHLAH** ( $\pi/2^{3}$ ; as a proper name it is thus vocalized in order to distinguish it from the common noun  $\pi/2^{3}$  (sickness); but some of the LXX forms show that this distinction was not observed in the living language, and doubtless the meaning is identical; LXX Malá, Maalá, Maalá, Maolá).--1. In Nu 23<sup>33</sup> 27<sup>1</sup> 36<sup>11</sup>, Jos 17<sup>3</sup>, the name of one of the fund acuratum of the Manageria Zolamba one of the five daughters of the Manassite Zelophehad. Probably she was the eldest, for the MT always puts her at the head; and although B of the LXX reverses the order in Nu 36<sup>11</sup>, A and F retain the ordinary arrangement. P, to whom all the passages in question belong, states that Zelophehad left no sons, and consequently the daughters came before Moses and claimed their father's inheritance, lest his name should become extinct. By the divine direction their claim was allowed, the only condition being that they were obliged to marry within the limits of their tribe. Accord-ingly Mahlah and her sisters married their cousins. The narrative illustrates the well-known Israelite law that property was inherited in the male line, and could descend to females only if they married within tribal limits. This has been variously accounted for, by some on the ground that women were incapable of performing one of the duties which property involved, that of offering sacrifice which property involved, that of onering sacrince to dead ancestors (Schwally, Leben nach dem Tode, Stade, Geschichtz, i. 388-391), by others in accord-ance with the Arab maxim that 'none can be heirs who do not take part in battle, drive booty, and protect property (W. R. Smith, Kin-ship and Marriage). In the Midrash Rabba on Numbers the conduct of Mahlah and her sisters serves as a text for the doctrine that 'the women of that generation huilded up what the men broke of that generation builded up what the men broke down,' the two other instances being that the women took no part in making the golden calf, and that they did not share the pusillanimity of the men effort the alumning women to f the spin bad the men after the alarming report of the spies had been received.

2. In 1 Ch 7<sup>18</sup> the RV has Mahlah, the AV Mahalah. The former is correct, the Heb. being Manadah. The former is correct, the Heb. being http://www.correct.com/ Zelophehad's daughter, here employs Mohola or Moola. Most likely the Mahlah of this passage is a female name. The Chronicler is dealing with the genealogy of Manasseh's descendants, tracing them, unlike Nu, along the *female* line, and stating that Hammolecheth, granddaughter of Manasseh, bare 'Ishlod and Abiezer and Mahlah.' Ishhod and Abiezer are names of men : for this and other reasons it is impossible to identify the Mahlah of Nu with the same name in Chronicles.

J. TAYLOR. J. TAYLOR. MAHLI ('<sup>j</sup>α<sup>2</sup>, 'a sick or weak one,' from <sup>j</sup>α<sup>3</sup>, LXX Mooλεί, Mooλί, Moλί, Moλέ, Mooλλεί; Vulg. Moholi, Mooli).—1. In Ex 6<sup>19</sup> (AV Mahali), Nu 3<sup>30</sup>, 1 Ch 24<sup>35, 33</sup>, it is the name of a son of Merari, Levi's youngest son. 2. In 1 Ch 23<sup>32</sup> 24<sup>39</sup> a son of Mushi, Mahli's brother, bears the same name. Ezr 8<sup>16</sup> informs us that whilst Ezra was waiting beside the river Abava, he secured for the service beside the river Ahava, he secured for the service of the house of God, amongst others, 'a man of discretion, of the sons of Mahli, the son of Levi ... and Sherebiah,' etc. 1 Es 8<sup>47</sup> drops the 'and,' thus identifying this son of Mahli with Sherebiah. It is more likely, either that the name has dropped out, or that it was something like Ish-sechel (rendered in our versions 'a man of discretion or

## MAHLON

23<sup>22</sup> these Mahlites were descended from the daughters of Eleazar, the elder son of the Mahli mentioned in Ex  $6^{19}$ . Eleazar left no male off-spring. Their cousins, the sons of Kish, therefore took them in marriage, and prevented the extinction of their father's name. It is a little curious that in the enumeration of the families derived from Levi, Nu 26<sup>36</sup>, the LXX omits 'the family of the Mahlites.' J. TAYLOR.

MAHLON.-See Chilion.

**MAHOL** ( $\forall n \tau \rangle$ , A Maooh, B Mah, Luc. Maahd, "Hudoor, Jos. Ant. VIII. ii. 5).—Named in 1 K 4<sup>31</sup> [Heb. 5<sup>10</sup>] as the father of certain sages with whom Solomon is compared. The expression 'sons of Mahol' has been referred to the four sages, Ethan, Heman, Chalcol, and Darda, as well as to the last three or the last two only. The Midrash to the Bk. of Proverls gives it an independent application (Wünsche, *Bibl. Rabb.* p. 2). It is improbable that all the typical wise men whose names occur to the writer should be regarded as the sons of one man. The Lucianic Sept. (and B') reads, 'D. son of Mahol.' But this may not be original. In 1 Ch 2<sup>6</sup> Ethan, Heman, Chalcol, and Darda are sons of Zerah. Unless 'son' be taken in the general sense of descendant (see DARDA), this conflicts with the statement in Kings, whether that be limited to Darda or not. It may be supposed that the Chronicler inferred the ancestry of Zerah ( $\pi \tau_1$ ) from the expression Ethan the Ezrahite ( $\pi \tau_1 \kappa_1$ ), *i.e.* directly or indirectly from this passage. This is, perhaps, evidence that the phrase 'sons of Mahol' was not in his text of the verse. The appellative significance of Mahol suggests an explanation of its appearance. The word is late rather than early, and means 'dance.' St. Jerome's rendering *chorus* (Lag. *Onom. Sac.*<sup>3</sup> p. 73) should be interpreted in this way, and not in its musical acceptation. The intinnate connexion of the temple ritual with the names Ethan and Heman permits a conjecture that the expression 'sons of dance' was originally a note applying to Ethan and Heman. Dancing was part of the worship of J', and  $\forall mp$  is twice used in the Bk. of 'Palms in a ritual sense (149° 150'). Such a note when inserted in the text might readily be given its present position. W. B. STEVENSON.

**MAHSEIAH** (7,772). — A priest, grandfather of Baruch and Seraiah, Jer 32<sup>12</sup> 51<sup>59</sup> (AV Maaseiah). He is called in Bar 1<sup>1</sup> Maaseas (Maasalas).

MAIANNAS (Matárras, AV Maianeas), 1 Es 948 = MAASEIAH, Neb 87.

and 'maiden' in Gn  $30^{18}$ , Ps  $123^2$ , Ec  $2^7$ : RV has 'handmaid' for 'maid' in all the passages except Is  $24^2$ , but retains 'maiden' except in Gn  $30^{18}$  ('handmaid').

Notice also the obsol. expression 'maid child' for  $\neg \neg \neg \neg \neg \neg$  in Lv 12<sup>6</sup>, retained in RV. It comes from Tindale, who has the similar rendering in Ex 1<sup>16</sup> 'When ye mydwive the women of the Ebrues and se in the byrth tyme that it is a boye, kyll it. But if it he a mayde lat it lyve'

se in the byrth tyme that it is a boye, kyll it. But if it be a mayde, let it lyve.' In Apocr. and NT we find the following words translated maid: 1. *kopárcor*, a girl, To  $6^{12, 13}$ , Sus<sup>15, 19</sup>, Mt  $9^{24, 25}$  (both 'damsel' in RV). 2.  $\pi \alpha \delta \delta \sigma \pi \eta$ , a young woman, a maidservant, To  $3^7$  $8^{12, 13}$  (RV all 'maidservant'), Jth 10<sup>10</sup> (RV 'handmaid'), Sir 412<sup>2</sup>, Sus<sup>35</sup>, Mk 14<sup>46, 69</sup>, Lk 22<sup>36</sup>;  $\pi \alpha \delta \delta \delta \sigma \pi$ is also rendered 'maiden' in Lk  $12^{45}$  (RV 'maidservant'). 3.  $\pi \alpha \delta r$ , a young person, usually male, also used for a servant or attendant, is tr<sup>4</sup> 'maid' in Lk 8<sup>54</sup> (RV 'maiden'), and 'maiden' in 8<sup>51</sup>. 4.  $\pi \alpha \rho \theta \sigma \sigma$ , a virgin, is tr<sup>4</sup> 'maid' in Jth 9<sup>2</sup> (RV 'virgin'). 5.  $\delta \beta \rho \alpha$ , a maidservant, is tr<sup>4</sup> 'maid' in Jth 10<sup>2,5</sup> 13<sup>30</sup> 16<sup>25</sup>, Ad. Est 15<sup>7</sup>. 6.  $\delta o \delta h \eta$ , a female slave, is rendered 'maid' in Jth 12<sup>19</sup> (RV 'servant').

We thus see that AV, according to its principle, varies the words indefinitely and almost indifferently. RV lays down the principle that as far as possible the same word in Heb. or Gr. should be rendered by the same word in Eng., but the only case in which a serious effort is made to carry it out is in the rendering of shiph/dh. Except in three passages, that word is rendered 'handmaid' One of the exceptions is Is  $24^2$ , where the assonance between 'mistress' and 'maid' is allowed to stand; the other two are particularly unfortunate, since there is little reason for departing from the rule of uniformity in Ps 123<sup>2</sup> and less in Ec 2<sup>7</sup>, and especially since the word 'maiden,' which is retained is no longer used for a servant. Even Shakespeare, who uses 'maiden' freely in the sense of 'virgin,' never has it in the sense of 'servant.' J. HASTINGS.

MAIL.-See ARMOUR.

MAINSAIL.-See Ships and Boats.

**MAKAZ** ( $\gamma_{\rm FF}$ ,  $Ma\gamma\chi ds$  Luc.;  $Ma\chi\mu ds$  A and  $Ma\chi e\mu ds$ B are probably erroneous forms due to confusion with the more familiar name *Michmash*, which the Sept. transliterates by  $Mg\chi\mu ds$  or  $Ma\kappa\mu ds$ ).— One of five places (MT four) which compose, or identify, the second of the 12 Solomonic prefectures (1 K 4<sup>9</sup>). The probable identifications of (Shaalbim) Bethshemesh and Elon (= Aijalon) show that it was situated on the western slopes of Judah, but the exact site remains uncertain. Two of the towns in the same group are elsewhere assigned to the territory of Dan. The spellings  $Ma\kappa ds$  (Euseb, in Lag. *Onom.*<sup>2</sup>) and Macces or Maces (Vulg., Jerome) may be compared with Jerome's derivation (*de fine*) from rg a boundary (Lag. *Onom. Sac.*<sup>2</sup> p. 73). W. B. STEVENSON.

**MAKE.**—The verb to 'make' is used in AV both transitively and intransitively, and is so retained in RV, though the intrans. use is now obsolete. In both forms it has some constructions and meanings that need attention.

1. With the meaning of to cause it is followed by the infin., sometimes with and sometimes without to: \* 2 Ch 7<sup>20</sup> 'This house, which I have sanctified for my name, will I cast out of my sight, and will make it to be a proverb and a byword among all nations' (RV 'I will make it a proverb'); 8<sup>9</sup> 'them did Solomon make to pay tribute'; Jer 34<sup>17</sup> 'I will make you to be removed into all the king-\*See more fully Craik, Eng. of Shak. p. 63 fl.

#### MAKE

doms of the earth'; and Dn 74 'it was lifted up from the earth, and made stand upon the feet as a man' (RV 'made to stand'). Cf. Shaks. Comedy of Errors, II. i. 26, 'This servitude makes you to keep unwed'; Hamlet, III. iii. 186, 'Make you to ravel all this matter out'; and (without to) Tempest, I. ii. 172-

> ' Here Have I, thy schoolmaster, made thee more profit Than other princesses can that have more time For vainer hours and tutors not so careful.'

2. 'Make' was once common in the simple sense of 'do.' There is a single example in AV, Jg 18<sup>3</sup> 'What makest thou in this place?' (yr, [1382] 'What doest thou in this place?' Wyc. [1382] 'What here dost thow?' [1383] 'What doist thou here?' Cov. 'What makest thou here?'). Spenser, FQ VII. vi. 25— Cf.

Whence art thou, and what doost thou here now make What idle errand hast thou earths mansion to forsake ?

3. In Jn 853 ' Whom makest thou thyself ?' (moteis) 5. If  $\exists n \exists n \exists^{n \exists^{n \exists^{n \exists^{n \exists^{n \exists^{n def}}}}}$  Whom makest thou thyself ?' ( $\pi \alpha_i \epsilon_i^2 s_i$ ), and  $19^7$  'he ought to die, because he made himself the Son of God' ( $\epsilon \pi \alpha_i \sigma_i \sigma_i \sigma_i s_i$ ), the meaning is 'claim to be,' almost 'pretend to be.' This meaning of 'pretend' or 'feign' is seen in Jos 8<sup>16</sup> 'Joshua and all Israel made as if they were beaten'; 9<sup>4</sup> 'They did work willy, and went and made as if they had been ambased or 't each other is the set of the made or the set of been ambassadors'; and Lk 24<sup>20</sup> 'He made as though he would have gone further.' But even without 'as if' the verb is once used in this sense, 2 S 13<sup>3</sup> 'as if the verb is once used in this sense,  $z \otimes 10^{-1}$ 'Lay thee down on thy bed, and make thyself sick' ( $\lambda \eta \eta \eta$ ; LXX  $\mu a \lambda a \kappa l \sigma \eta \eta \eta$ ; Vulg. languorem simula; Wyc. 'feyn sijknes'; Cov. 'make the sicke'; RV 'feign thyself sick'; cf. v.<sup>6</sup> 'So Amnon lay down, and made himself sick,' RV 'and feigned himself sick'). With Lk 24<sup>28</sup> cf. Ps 28<sup>1</sup> Cov. 'thinke no scorne of me, lest (yf thou make the as though thou herdest not) I become like them, that go downe in to ye pytte'; and with 2 S 13<sup>5</sup> cf. Shaks. *Two Gent.* I. ii. 102-

'She makes it strange ; but she would be best pleased To be so anger'd with another letter.'

To be so anger'd with another letter." 4. There are some phrases: (1) Make ado, Mk 5<sup>30</sup> 'Why make ye this ado, and weep?' Cf. Nu 16<sup>7</sup> Tind. 'Ye make ynough to doo ye childern of Levi.' See ADO. (2) Make away = destroy, Dn 11<sup>44</sup> 'he shall go forth with great fury to destroy, and utterly to make away many' (DT TTTT, TTTT, and terat et interficial plurimos; Wyc. [1382] 'for to breke to gydre, and slea ful manye,' [1388] 'to al to-breke, and to sle ful many men'; Gen. 'to destroy and roote out many'; Dou. 'to destroy and kil very manie'); 1 Mac 16<sup>22</sup> 'he laid hands on them that were come to destroy hin, and slew them; for he knew that they sought to make him them; for he knew that they sought to make him away' (aυτόν ἀπολέσαι; RV 'to destroy him'). Cf. Dt 32<sup>28</sup> Tind. 'I have determened to scater them therowout the worlde, and to make awaye the remembraunce of them from amonge men'; Mt remembraunce of them from amonge men ; Mt 27<sup>20</sup> Rhem. 'But the cheefe Priestes and auncients persuaded the people, that they should aske Barabbas, and make Iesus away'; Spenser, On Ireland, 'Clarence . . . soon after, by sinister means, was clean made away'; and Shaks. As You Like It, v. i. 58, 'I kill thee, make thee away, translate thy life into death.' (3) Make for=help, Esk 17<sup>17</sup> 'Neither shall Pharaoh with his mighty Ezk 1717 'Neither shall Pharaoh with his mighty army and great company make for him in the war' ( $\pi \tau \tau \tau \sigma$ ) when  $\pi \tau \tau \tau \sigma$  ard  $\pi \sigma$  in the war' ( $\pi \tau \tau \tau \sigma$ ) when  $\pi \tau \tau \tau$ ; LXX  $\pi \sigma \tau \sigma \sigma \tau$  ard  $\pi \tau \sigma$  $\pi \sigma \lambda \epsilon \mu \sigma \tau$ ; Vulg. faciet contra eum prælium; Wyc. 'make batayle agens hym'; Cov. 'maynteyne him in the warre,' after whom the correct translation is found, except Dou. 'make battel agaynst him'); Ro 14<sup>19</sup> 'Let us therefore follow after the things which make for peace' ( $\tau \dot{a} \tau \eta s \, \epsilon l \rho \eta \nu \eta s$ ; Vulg. que pacis sunt; Wyc. 'tho thing is that ben of pees': we owe the idiomatic tr. 'which make for

#### MAKE

peace' to Tindale). Tind. in a note to Lv 13 says, 'This chapter maketh not for confession in the eare, but is an example of excommunicacion off open sinners.' The phrase is not obsolete, it occurs in M. Arnold's famous definition (*Lit. and* Dogma, i.) 'The not ourselves which is in us and all around us became to them adorable eminently and altogether as a power which makes for right-eousness,' but no doubt this is a recollection of Ro 14<sup>19</sup>. In older Eng. the phrase was often make to, as Udal's *Erasmus'* NT, ii. fol. 283, ' those thinges that are availeable to the life of heaven, thinges that are available to the ine of nearth, and make to the glory of Christ'; and Davenant (Fuller's *Life*, 314), 'I shewed no letter or instruc-tions, neither have any but these generall instruc-tions, which King James gave us at our going to Dort, which make little or nothing to this business.' (4) Make up = put together, complete, Ezr 5<sup>3</sup> 'Who hath commanded you to build this house, and to make up this wall?' (RV 'to finish this wall'); Ezk 13<sup>5</sup> 'Ye have not gone into the gaps, neither made up the hedge'; Mal 3<sup>17</sup> 'And they shall be made up the hedge'; Mal  $3^{17}$  'And they shall be mine, saith the LORD of hosts, in that day when I make up my jewels' ( $i_1 \neq i_2 \neq i_3 \neq i_1 \neq i_2 \neq i_2 \neq i_3 \neq i_1 \neq i_2 \neq i_2 \neq i_3 \neq i_1 \neq i_2 \neq i_2 \neq i_3 \neq i_$ which is the tr. of the Geneva Version \*);  $2 \text{ Co } 9^{3}$ 'and make up beforehand your bounty' ( $\pi\rho\sigma\kappaa$ - $ra\rho\tau(\sigma\omega\sigma\iota)$ ). Cf. Shaks. Rich. III. I. i. 21-

'Sent before my time Into this breathing world, scarce haif made up, And that so lamely and unfashionable That dogs bark at me as I halt by them';

Timon, v. i. 101-

'Remain assured That he's a made-up [=perfect] villain';

and in a slightly different sense, Knox, Hist. 177, 'oppress the inhabitants thereof, and make up strangers with their lands and goods.'

5. Among the archaic uses of 'make' we find it followed by a subst., the two together expressing no more than a verb formed from the subst. would express, as 'make request'=request, 'make provision' = provide. In almost every instance the Heb. or Gr. is a verb and no more. Thus (1) make account, Ps 144<sup>3</sup> (Lord, what is man, that thou takest knowledge of him ! or the son of man, that thou makest account of him !' ('קקקרה'); LXX öτι λογίζη αὐτών). So Shaks. Rich. III. III. ii. 71-

'The princes both make high account of you';

Milton, PR ii. 193-

"Among the sons of men, How many have with a smile inade small account Of Beauty and her lures, easily soorn'd All her assaults, on worthier things intent !"

(2) Make confession, as Dn 94 'And I prayed unto the Lord my God, and made my confession' ( $\pi_1$ ) ne, RV 'made confession'). (3) Make count, Ex 124 'Every man according to his eating shall make your count for the lamb' ( $\infty_2$ ). (4) Make an end, Jg 3<sup>16</sup> 'And when he had made an end to offer (RV 'an end of offering') the present, he sent away the people that bare the present'  $(\pi \gamma p)$ ; Is 33' 'When thou shalt make an end to deal treacherously'  $(\pi \gamma p)$ ; 38'<sup>3</sup> 'From day even to night wilt thou make an end of me'  $(\gamma p)$ ; Jer 4<sup>27</sup> 'Yet will I

\* The marg. note in Gen. Version is, 'When I shal restore my Church according to my promes, they shalbe as mine owne propre goods.' See, further, art. Jawan in vol. ii. p. 665%.

### MAKEBATE

not make a full end' (העני לא אין). (5) Make inquisition, Dt 19<sup>10</sup> 'And the judges shall make diligent inquisition' (גרוש היפנ). (6) Make mention, Ps 874 'I will make mention of Rahab and Babylon to them that know me' (τημ). (7) Make matter, Gal 2<sup>d</sup> 'whatsoever they were it maketh no matter to me' (ούδέν μοι διαφέρει). Cf. Holland's Livy, p. 247, 'What makes matter, say they, if a bird sing auke or crow cross?' Tindale, Expositions, p. 81, 'Thou wilt say, What matter maketh it if I speak words which I understand not, or if I pray (8) Make merchandise, Dt 21<sup>14</sup> 24<sup>7</sup> 'If a man be found stealing any of his brethren of the children of Israel, and maketh merchandise of him, or selleth him, then that thief shall die' (\sr quar, ; RV 'deal with him as a slave,' RVm 'as a chattel'); 2 P 29 'And through covetousness shall they with feigned Words make merchandise of you' ( $i\mu\pi\sigma\rho\epsilon i\sigma\sigma rrat$ ). Cf. Shaks. Merch. of Venice, III. i. 134, 'Were he out of Venice, I can make what merchandise I will.' (9) Make provision, 1 K 4<sup>7</sup> 'Each man his month in a year made provision' (1577;); Ro 13<sup>14</sup> 'Make not provision for the flesh' ( $\pi \rho i \sigma a \pi \mu \eta$  $\pi o \epsilon i \sigma \theta \epsilon$ ). (10) Make riddance, Lv 23<sup>22</sup> thou shalt not make clean riddance of the corners of thy field not make clean riddance of the corners of thy held when thou reapest'  $(\pi_2^{*}\pi_3^{*}\pi_3^{*})$ ; RV 'thou shalt not wholly reap'); Zeph 1<sup>16</sup> 'he shall make even a speedy riddance of all them that dwell in the land'  $(\pi_2^{*};$  RV 'he shall make an end, yea a terrible end'). (11) Make a sport, 1 Es 1<sup>51</sup> 'they made a sport of his prophets'  $(\pi_3^{*}\pi_4^{*}\pi_4^{*})$  are specified at'). Cf. Milton, PL vi. 632—

'Eternal Might To match with their inventions they presumed So easy, and of his thunder made a scorn';

and Samson Agonistes, 1331-

<sup>6</sup> Do they not seek occasion of new quarrels On my refusal, to distress me more, Or make a game of my calamities ?

J. HASTINGS.

**MAKEBATE.**—There was an old Eng. word bate (from Old Fr. batre, to beat) which signified strife, discord. Thus Shadwell, Am. Bigot, i. 1, 'I'll breed no bate nor division between young people.' Sometimes it is a shortened form of 'debate' (from Sometimes it is a snortened form of 'debate' (from Old Fr. debatre), but more often it is a distinct word. 'Makebate' is a compound of this word, and means a maker of strife. It occurs in the plural in AVm of 2 Ti 3<sup>3</sup>, Tit 2<sup>6</sup>, as an alternative tr. of  $\delta\iota d\beta \alpha \lambda \alpha$ , text 'false accusers'; RV 'slan-derers,' which is as old as Wyc. (1388) at Tit 2<sup>2</sup>. The tr. 'false accusers' is from Tindale. Hall Works ii 74) sorts of the Pharicase (When these (Works, ii. 74) says of the Pharisees, 'When these censurers thought the Disciples had offended, they speake not to them but to their Master, Why doe thy Disciples that which is not lawfull? Now, when they thought Christ offended, they speak not to him, but to the Disciples. Thus, like true make-bates, they goe about to make a breach in the family of Christ, by setting off the one from the other. J. HASTINGS.

**MAKED** (Maxé $\beta$ , Maxé $\delta$ ).—A 'strong and great' city in Gilead (1 Mac  $5^{26}$ .  $^{26}$ ). The site is unknown.

MAKHELOTH (n<sup>5</sup>, Marylús, Luc. Marylús, Maceloth, Nu 33<sup>26</sup>.<sup>25</sup>).—One of the twelve stations in the journeyings of the children of Israel, following Hageroth, which are mentioned only in Nu 33. Nothing is known about it. The word occurs Ps 68<sup>27</sup> [Eng. <sup>26</sup>], where it is translated 'congrega-tions.' The occurrence of *Kehelathak* (a name of similar meaning) in v.<sup>27</sup> should be noted.

A. T. CHAPMAN

Shephēlah or lowland of Judah, mentioned (Jos 1541) with Gederoth, Beth-dagon, and Naamah in the list of cities allotted to Judah. The last three are perhaps to be identified with the modern villages of Katrah, Daján, Ná'aneh, and Makkedah with *el-Mughár*—all lying in the vicinity of Ludd (Lydda, Diospolis) and Yeônah (Jabneel). It is mentioned ten times (Jos 10<sup>106</sup>. 12<sup>16</sup> 15<sup>41</sup>) in connexion with ten times (Jos 10<sup>10</sup>, 12<sup>10</sup>, 12<sup>10</sup>, 15<sup>10</sup>) in connexion with Joshua's great victory in the day when the Lord fought for Israel. Makkedah is first men-tioned (Jos 10<sup>10</sup>) with Azekah as one of the two points to which the allied forces were followed by the victorious host of Israel, and they were not necessarily near each other: in the list of cities allotted to Judah they are both stated to be in the Shephēlah, but Azekah is in one group of fourteen cities, while Makkedah is in another group of six-teen cities. Azekah is mentioned with Adullam, Socoh, and Jarmuth, which have all been found

together about 14 miles S.E. of Makkedah. When the battle had reached these points, it is related (Jos 10<sup>15</sup>) that Joshua returned and all Israel with him unto the camp to Gilgal, and then the narrative of the battle is resumed and other victories of Joshua recorded, and then again it is stated (v.<sup>43</sup>) that Joshua returned to Gilgal in the same words. The LXX omits (vv.<sup>15.43</sup>) all mention of the return of Joshua to Gilgal, and some com-mentators propose that at least v.<sup>15</sup> should be omitted, or even that it should be treated as part of the quotation from the Bk. of Jashar and not as part of the narrative, so that the action of Joshua after leaving Gilgal until the taking of Joshua arter leaving Gigal until the taking of Makkedah is continuous, and occurred on the great day when the sun stood still in the midst of heaven. It appears clear, however, that the passage is composite, the narrative of JE being interrupted by comments and generalizations of D<sup>2</sup> (see Driver,  $LOT^{6}$  108). Joshua was in his camp at Gilgal (Jos 10<sup>6</sup>) in the plains on the east border of Jericho when he received a pressure measure from the men of

received a pressing message from the men of Gibeon, urging him to come up and save them from the kings of the Amorites. Now Gibeon was in the hill-country (present *el-Jeb*), 3400 ft. above Gilgal and 10 miles distant as the crow flies, but by the rugged devious mountain passes a still uphill march of 16 to 18 miles. Joshua went up from Gilgal all night, he and all the people of war with him, and all the mighty men of valour, and coming upon the Amorite and upon upon the coming upon the Amorites suddenly and unex-pectedly, probably at early dawn while they still slept, he slew them with a great slaughter at Gibeon, and chased them by the way of the pass of the Upper and Lower Beth-horon as far as Azekah and Makkedah, over a rough country, a distance of at least 25 miles from Gibeon as the crow flies.

It may have been somewhere in the upper portion of the pass of Beth-horon that Joshua said in the sight of all Israel, 'Sun, stand thou still upon Gibeon, and thou moon in the valley of Aijalon.' The expression 'upon (a) Gibeon' rather indicates an early hour when the sun would be rising over the ridge and hills where Gibeon was situated, but Stanley (S. and P. 210) considers that the emphatic expression that the sun stayed in the midst of heaven seems intended to indicate noonday. On the other hand, the geographical conditions, Gibeon being to S.E. and Aijalon to S.W. of the Upper beth-horon, would indicate some hour midway between sunrise and noon, according to the time of year; while the view also is held by many that the account of the miraculous standing still of the sun, being derived from the poetical Bk. of Jashar, is not to be considered as part of the historical narrative of the Bk. of Joshua (Speaker's Com. Add. notes on Jos  $10^{12-15}$ , and Dillmann, in loc.).

### MAKTESH

It is evident from our present knowledge of the surrounding country, that if the attack of Joshua took place at early dawn, and the flight of the Amorites immediately followed, consequent on their being taken by surprise, the force of Joshua may have been at Beth-horon two hours after sunrise and at Makkedah from eight to ten hours after sunrise, so that the circumstances related as having taken place on the great day may have occurred within the limits of an ordinary day at any time of the year. On arrival at Makkedah, Joshua was told that

the five kings of the Amorites were hid in the cave קיגריק, so correctly RV) at Makkedah. This cave is mentioned eight times in the Bk. of Joshua always with the article as 'the cave'; it was evidently a well-known cave close to the city Makkedah, and probably near to a grove of trees (cf. Jos 10<sup>26</sup>).

Joshua did not stop the battle tide, but, ordering great stones to be rolled to the mouth of the cave and setting a guard there, caused the pursuit to be continued until the children of Israel had made an end of slaying the enemy with great slaughter and returned to the camp at Makkedah. Then the cave was opened, and the kings of the Amorites, after the ceremonial degradation, were smitten by Joshua, and were hanged on five trees until sun-down. At sunset (cf. Dt  $21^{221}$ ) the five kings were taken down off the trees and cast into the cave wherein they had been hid, and great stones were

laid at the cave's month. In the *PEF* survey of Western Palestine the present village of *el-Mugh*dr ('the caves') was adopted by the surveyors, who found that at this site alone, of all the possible sites for Makkedah in the Philistine plain, do caves still exist. following points are in favour of this site. The It is on the northern border-line of Judah immediately south-west of Ekron, opposite to Katrah (Kederoth) and near to Dajún (Beth-dagon) and Naaneh(Na'amah). It is an ancient site, as evidenced by the rock-quarrying and the rock-cut tombs with loculi. There are caves of various sizes, in front of which the houses are built, and small caves exist in the cliffs north of the village. It is on the northern side of the valley of Sorek (Wady Surår), in the lowlands about 4 miles from the sandy dunes bordering on the seashore. It is situated on a sort of promontory stretching into the valley of Sorek, divided into three plateaus; on the lower of these to the south is the modern village of el-Mughar, built in front of the caves which are cut out of the sandstone. The city of Makkedah was probably to the north of these caves. The sur-rounding country is very fertile.

LITERATURE.—Robinson, BRP2 ii. 251; Stanley, Sinai and Palestine, 210; SWP ii. 412; Dillmann, Jos. ad loc. (leaves the site doubtful). C. WARREN.

**MAKTESH** (שְׁהָשָהָ ' the mortar ' [Pr 2722]; ή κατα-**EXAMPLE 1** ( $\mathbb{P}_{2,\overline{q}}$ ) the mortar  $[P^*2, A]$ ;  $\hat{\eta}$  kara-kecouµér $\eta$ ; Aq. eis ròr  $\delta\lambda\mu\sigma$ ; Theod.  $\dot{\epsilon}r$   $\tau\hat{\varphi}$   $\beta d\theta e_i$ ; Vulg. Pila).—The name of a locality mentioned in Zeph 1<sup>11</sup> 'Howl, ye inhabitants of the *Maktesh*; for all the people of Canaan (or, the merchant people; cf. Ezk 17<sup>4</sup>, Pr 31<sup>24</sup>) are undone, all they that were laden with silver are cut off.' The con-text shows that it was in Lowence. text shows that it was in Jerusalem; it is also text shows that it was in Jerusalem; it is also evident that it was a locality in which traders dwelt—perhaps, in particular, that, as Ewald con-jectured, it was the 'Phœnician quarter' of the city. From the meaning of the word,—it is used in Jg  $15^{19}$  of the 'hollow place' out of which the spring of Ha-Körē issued forth,—it may be inferred that it denoted some basin-like hollow or de-pression. The Targ. understands by it the Kidron valley, which, it is true, forms a deen decreasion on valley, which, it is true, forms a deep depression on the E. and S.E. of the city : but it is more probable that some locality within the city itself is intended ;

## MALACHI

and it is a plausible suggestion that it was the (between the E, and W, hills of Jerusalen). The The Maktesh may have been mentioned in particular by Zeph. on account of the omen of the name (Jer. 'quod scilicet, quomodo frumenta feriente desuper vecte, contunduntur'). S. R. DRIVER.

1. NAME OF THE BOOK. —If the title contained in the opening verse be accepted as original, *Malachi* may be taken as the personal name of the prophet. In that case it is generally under-stood as a contraction of *nyyty Malachiyah*, and as meaning 'the messenger of J".' This translation, however, presents difficulty,\* and the word as a personal name does not occur elsewhere. Or the word may be recarded as the official title of the word may be regarded as the official title of the prophet, and be rendered 'my, i.e. J"'s messenger.' The LXX so understood it in 1<sup>1</sup>,<sup>+</sup> but, by using Malaxias as the head title, preserved both inter-pretations. The Targum of Jonathan ben-Uzziel added at 1<sup>1</sup> 'whose name is called Ezra the scribe'; and Jerome t gave this last addition as a current belief among the Jews of his time. If, however, Ezra was the author of the book, it is difficult to understand why his history contains no hint of its existence. And the fact that tradition also attaches the book to the names of Nehemiah and Zerubbabel strengthens the supposition, that, in a period which had forgotten the author's name, the close correspondence between the aims which the prophet desired and which the legislator accomplished led to their identification.

Many modern commentators (e.g. Wellhausen, Nowack, Kuenen) regard  $1^1$  as a late addition. Emphasizing the similarity of this title to those which precede Zec 9<sup>1</sup> 12<sup>1</sup>, and noting the prominence of the word 'prive' 'my messenger' in 3<sup>1</sup>, they have concluded that the compiler of the separate volume of the twelve minor prophets found this book without an author's name, and, borrowing a name from the body of the work, prefixed the entire title as it stands at present. The opinion is plausible, and enjoys this advantage, that, as it is not based on facts but on several large suppositions, it is incap-able of disproof. Nothing is known of the personal history of the author, for the tradition of pseudo-Epiphanius (de vitis Proph.), which calls him a man of Sopha in the tribe of Zebulun, is so late as to be valueless.

ii. DATE.—The general period in which the book was written is easy to determine. The Exile is so far in the past that it is not even mentioned. The temple, to the rebuilding of which Haggai needed temple, to the rebuilding of which Haggai needed to exhort the people, is already restored: the sacrificial ritual is being carried on within it (1<sup>10</sup> 3<sup>1.10</sup>). The offenders whom Malachi rebukes are the laity who do not support the established ritual (3<sup>7π</sup>), and the priests who bring it into contempt through their carelessness (1<sup>6π</sup>). On the other hand, Judah is still under the civil government of a Persian satrap (3<sup>7π</sup>) thy governor,' 1<sup>8</sup>, cf. Hag 1<sup>1</sup>, Neh 5<sup>14</sup> 12<sup>26</sup>), and the title 'great king,' which Malachi applies (1<sup>14</sup>) to J", may be borrowed from the official style of that court. A comparison of the abuses which the book attacks, comparison of the abuses which the book attacks, and the reforms which it advocates with those

\* For the contraction it is possible and customary to appeal to the fact that the name of the mother of Hezekiah is given as '38 the fact that the name of the mother of Hezekiah is given as 'lg Abi in 2 K 182, and as  $n \geq k$  bijah in 2 Ch 29<sup>1</sup>. But, since Abijah must be translated 'J' is father,' this by analogy would require that Malachi should be rendered, not 'the messenger of J', but 'J' is messenger.' † Its reading is is  $\chi tip i i \gamma \gamma i as vision, the word of J'' by the$ hand of His messenger.': 'Quem Esdram scribam, legisque doctorem, Hebrai esti-mant' (Profatio in duodecim prophetas).

MALACHI

which are mentioned in the histories of Ezra and Nehemiah, clearly proves a very similar condition of affairs in the community. Legislators and prophet have alike to protest against such abuses as neglect of the sacred dues, irregular sacrifices, and internarriage with foreign women.\* So similar is the whole situation that Malachi must have been nearly contemporaneous with those reformers.

Opinion, however, is still divided as to whether Malachi prepared the way by word for the later legislative acts of Ezra and Nehemiah, or whether he supplemented and enforced the work which these began. In the former case, the book must these began. In the former case, the book must have been written before B.C. 458, the date of Ezra's arrival in Jerusalem; in the latter, either shortly before or after B.C. 432, when Nehemiah's second visit to that city took place. The question cannot be decided with certainty. But the manner in which intermarriage with foreigners is con-demned as a sin, not against the strict letter of the law, but against J<sup>27</sup>'s relation as Father to His people (2<sup>10a</sup>.), agrees best with a time before Ezra had legislated on the subject (cf.  $OTJU^2$  p. 427, n. 2). Malachi also connects those foreign marriages with the prevalence of divorce, as though the one caused the other. Such a con-nexion seems more likely at a time when foreign nexion seems more likely at a time when foreign nexton seems more likely at a time when foreign intermarriage, being novel, was causing many to put away their native wives, than at the period when Ezra found it a settled practice among his people. The terms also in which the governor is alluded to (1<sup>8</sup> ye treat J" as ye would not treat the Persian satrap) lose half their force if the position was occupied not by a foreigner but by Nehemiah.

A more uncertain means of dating the book is found in its information about the details of ritual. Thus the priests are regarded as the sons of Levi  $(2^{4-5} 3^3)$ , not of Aaron. This would seem to imply that the book was written from the standpoint of D, and before the Priestly Code had degraded the D, and before the Priestly code had degraded the Levites into a subordinate position towards the sons of Aaron. On the other hand, the command to offer tithes in the temple ( $3^{10}$ ), presumably for the support of the officiating Levites, agrees more closely with the rule of P (Nu 18<sup>21.6.</sup>) than with that of D (Dt 14<sup>22.6.</sup>), which commands the giver to here them at theme with the Levites and the prop share them at home with the Levites and the poor. This may mark the transition from the earlier to This may mark the transition from the earlier to the later practice—a transition which was made easier by the fact that, when the community was the city, all the Levites were attached to the temple. The priest is still the exponent of the law  $(2^7)$ ; after the promulgation of P he was only its servant.<sup>+</sup> Were we less ignorant of the history of Edom at this period, the opening section  $(1^{2-6})$ , with its reference to the condition of that people, would furnish the best means of determining the exact date. exact date.

iii. CONDITIONS PRESUPPOSED BY THE BOOK .-The condition of the people was enough to cause grave anxiety. They had suffered from drought and locusts (3<sup>102</sup>). The revolts of Egypt against Persia, which were quickened by news of Persia's waning strength in Asia Minor, must have entailed waning strength in Asia Minor, must have entailed heavy military requisitions on Palestine for the support of the armies which were sent against the rebels. Men were losing heart. They had sacrificed something when, at the bidding of their religious leaders, they returned from Babylon. They had expected that the holy land would repay those sacrifices, and instead it was demand-ing larger. The glowing visions of Deutero-Isaiah, some of which were dangerously matarial in them. some of which were dangerously material in them-

• Cf. Mal 37.13 with Neh 10.33.30 134.14, and Mal 210.15 with Ear 98 105.1544, Neh 1030 1323.91. • For an adequate statement of the relations between Malachi, D and P, cf. W. B. Smith,  $OT_{\rm s}/C^2$  425 ff.

MALACHI

selves, and were further materialized in the popular mind, did not correspond with the stern realities of Jerusalem. Haggai had believed  $(2^{207.})$  the cause of their misery to be their negligence in the restoration of the temple, and had promised J's return on the completion of the work. But the temple was rebuilt, and everything remained the temple was rebuilt, and everything remained as before, which, to men who had hoped for so much, must have appeared worse than before. Men were beginning to ask for proofs of that divine love of which they heard so often, but of which they thought that they saw so little  $(1^{2-6})$ . They were debating, though not yet openly, whether it were not better, after all, to become like the heathen among whom they lived  $(3^{13-16})$ . And, where such ideas were even being debated among the better minds of the nation,<sup>\*</sup> the less enligible must have already begun to show their religious must have already begun to show their discouragement, and to cast off those distinctive forms which separated Judah from the other nations. The priests, as a rule, were slovenly in their performance of the ritual. That it was a weary form  $(1^{13})$  they expressed by their crelessness of its requirements more eloquently than by words. The laity, miserable, heartless, and copy-ing their religious leaders, were inclined to stint their sacrifices (1<sup>14</sup>), and to withhold their dues (3<sup>17</sup>). And the increasing practice of intermarriage with foreign women (2<sup>10-18</sup>), itself both sign and cause of a slackening devotion to the God of Israel, was sapping their family life and helping to merge the people into the surrounding paganism. It is this condition which Malachi faces; and he is prophet enough to see the root from which all the rest springs. Their religious life is weak, their spiritual vision dim. And this weakened religious life is affecting their moral and social condition, as well as their religious practice. It is causing them favour. For that would bring with it a different judgment of life. To be written in God's book of remembrance, to belong to God, would make many ills in life tolerable  $(3^{167})$ . To return to J" would make impossible their frequent divorce, which at present is rendering God deaf to their prayers (213). If the prophet seems to write as though the whole content of repentance consisted in the due paycontent of repentance consisted in the due pay-ment of Levitical tithes  $(3^7)$ , and so makes the return to J" shallow, one must join with that his idea of the priesthood in itself and in its work. The glory of the priests of olden time was in his eyes their moral dignity. His representation of that past may be very far from what the historical books and the earlier prophets show it to have near Matching only makes Malachi's ideal (99) books and the earlier prophets show it to have been. But this only makes Malachi's ideal (2°) the more striking. And he expects that, when J" has purified the recreant class, the first result will be that they will offer offerings in righteousness (3°). The priests represent to him a moral and spiritual force in the community. That men starve them by withholding their tithes, is a proof that they are not interested in the ideals which the priests represent. That the clervy in which the priests represent. That the clergy in any community are underpaid, does often mean that men are not interested in religion. And a prophet may point to the outward fact as a sign of the inward cause. What redeems Malachi from even the suspicion of formalism in this respect is his high appreciation of the services offered to J'' beyond the limits of Palestine (1<sup>11</sup>). On any inter-

pretation + that verse implies that temple and • One must understand the doubts of 313-16 as being those which they that feared the LORD' were uttering among them.

elves. † Two interpretations are possible. According to one, the verse means that even those sacrifices which the heathen offer to their own deities under the names of Vishnu, Osiris, Jove

priesthood, sacrifice and tithes, are not an essential to a spiritual worship. But the prophet has to deal with the facts before him. He is a man to whom the essence of all religion consists in its spiritual and ethical elements. But he not only finds a sacramental system in existence among his people; he also recognizes its power as a factor in the religious life of any people. Such a system both represents and educates their spiritual life. And Malachi is one among the many who have tried to correlate those two truths, instead of denying one in the interests of the other. iv. CHARACTERISTICS OF THE BOOK; ITS ATTI-

iv. CHARACTERISTICS OF THE BOOK; ITS ATTI-TUDE TO RITUAL, ETC.—Undoubtedly, what characterizes this book as contrasted with the earlier prophetic literature is the high value which it sets upon a correct observance of ritual.

But it has never been sufficiently recognized that Malachi's attitude to the priestly ritual differs from that of the earlier prophets, just because the work of these had not failed to produce some result. It may still be considered a question open for further discussion, how far the rites with which Hosea found himself face to face in Israel were the outcome of a faith which, though once purer, had degenerated through contact with a heathen surrounding, and how far they were the natural expression of the faith of a people which was still at a low stars of religious development. In either expression of the faith of a people which was still at a low stage of religious development. In either case that system, because it embodied and so perpetuated a debasing idea of J", was abhorrent to the prophet, who himself held a purer faith. And he called on his people before all else 'to take with them words.' He urged them to realize that higher conception of J" which he himself had won. The first effect of such a thought of their God would be to make impossible some of the God would be to make impossible some of the grosser elements in their ritual. Men who thought of God as Hosea did, would give up kissing calves whether the prophet recognized it or not, a people who had gained this clearer thought of J" would embody it in a ceremonial which would be competent to express it. Israel went into exile and so lost the position in which this might have been so lost the position in which this might have been done. But Judah did in some measure accept the prophetic teaching about J" and their relation to Him. And in the law and the ritual they sought to embody and perpetuate those ideas. Ezekiel, himself a prophet, formulated a legislation. It may be impossible to determine which forms in the ritual are common to heathenism and to Judaism. What is certain is that all the forms were remoulded and coloured by the spirit of Judah's religion. Now to a law and a ceremonial, which were framed to express, however inadewhich were framed to express, however inade-quately, such ideas, a later prophet like Malachi was compelled, by his very vision of the truths which forms express, to assume an attitude different from the attitude which the earlier prophets assumed to the ritual of their time. Any neglect on the part of the people to fulfil the demands of finding the law inadequate to express their re-ligious faith, must appear to the prophet a failure to appropriate through obsedience to the prophet a failure to appropriate through obsedience to the ritual that understanding of J"s will which the ritual conveyed to the worshippers. As Malachi is diligent to show, the disobedience of his time was the outcome of a lowered morality, not of a clearer spiritual vision. And he maintained the worth of the temple service in the interact of the arisitual the temple-service in the interests of the spiritual religion of which that service was the expression.

The prophet, however, is no creator. Satisfied

etc., are really offered to the one and only God. According to another, it refers to the already widely scattered Jews of the dispersion, who, in the many lands of their exitie, are offering to J" sacrifices, which are pure though beyond the holy land.

## MALACHI

with the ideas in which he had been educated, and their stereotyped expression in the ritual, he their scereotyped expression in the ritual, he models his very style on that of earlier prophets. He is the preserver of the past rather than a creator for the future. By his whole mental atti-tude he represented what was necessary for the period in which his activity falls. He belongs to an age which had to retain rather than to create, an age the period in the to impress on men, through institutions and ritual ideas which had been conceived in the sore travail of preceding controversies. Ideals in this world of men need to be expressed in institutions as well of as in words, if they are to influence not only a select few but a whole generation, and, above all, if they are to be transmitted to the following generations. And, since men are influenced by unconscious habits as well as by conscious convictions, great religious truths must create forms which touch the whole life of a community. Probably, at that period of the national history, when Judah had been roduced to a community of humble men, and when so many of its purely secular hopes had disappeared, the utmost it could accomplish was disappeared, the utmost it could accomplish was to maintain the ground already won, to cling to the ideas already learned, and to continue institu-tions which were fitted to be the home of souls in the after generations, the birthplace for larger ideals in more fruitful years. To undervalue the law is easy; to appraise it is a much harder task. Yet the law kept a kingless people together through several centuries. The truths it embodied made\_ludges almost unique in resisting the disc. through several centuries. The truths it embodied made Judges almost unique in resisting the dis-integrating influence of the Hellenic spirit. The ideals which it represented produced men who were capable of accepting the higher ideals of Jesus Christ, and of becoming the founders of His Church. At the period when his countrymen ran grave risk of losing their hold on this ritual and all it contained for them and their descendants, Malachi lent his whole influence to maintain its power. To him, however, it continued to be valu-able because of the expression it gave to spiritual realities and the support it afforded the moral life. And if the Judaism of the silent centuries grew often formal in its reverence for the law as law and for the ritual as ritual, this was due as much to their forgetfulness as to their memory of the message they had received from the prophet. The exhortation which falls near the end of the book, 'to remember the law of Moses,' became dangerous so soon as the minds of men grew unspiritual; but what truth is not dangerous?

This attitude to the law explains in part the high value which Malachi sets on the priesthood. It is no longer the prophets but the priests who are the messengers of J''(2'). It is they who must first be purified by J''s visitation, in order that they may then direct the people ( $3^{st}$ .). Their office and work are set in an ideal and beautiful light. But the prophetic period is so far behind this teacher, and its fresh creative life so dead, that, when he thinks of the possibility of a new revelation of J'', the medium of that revelation is no longer a man whose lips God should touch with pure fire. It is that one of the prophets of the past who did not die, and whom J' should restore to His people's necessity ( $4^{st}$ .). But this expectation has a deceper root than the higher estimate of ritual and so of priesthood can explain. It is allied to the hope which the prophet cherished for the future, in which he diverged most widely from the early prophets. When Judah became a dependent satrapy, and its royal house fell into insignificance, the Messianic figure of the Davidic king naturally and inevitably disappeared. But the 'suffering servant' has also passed out of sight ; the priestly figure has equally gone. Judah has lost confidence in her destiny and her mission.

## MALACHI

It is not out of the people itself that any deliverer or new spring of life is expected, even by its prophets. Malachi believes that a deliverer shall come, that Judah still has a mission, that J" has not forsaken His people. But he expects that the distinguished from J" Himself, shall appear in the temple to renew all things. The Messiah is not thought of as having his roots in the soil, he has lost all essential relation to the people whom he comes to deliver, he is less a gift than an emanation from J".

This altered hope witnesses to an altered con-ception of God and of His relation to men. That hard deism, into which Hebrew theology was always liable to degenerate, is showing itself afresh, and now in the minds of the prophets. Persian thought, with its dualiam and its idea of the imparity of matter, fostered the tendency. The popular conception of the connexion between guilt and physical calamity ministered to it in a community which was always in distress. J" was conceived as so far separated from men that any revelation from Him was increasingly thought of as ab extra, and not through the inner life of man. He must send his angels or Elijah, if the people's life is to be guided by Him. Such a conception was certain to have further results. So long as prophecy lived with its witness to the God, who is not only beyond all men's thought but who is present with and in their highest thought, so long as prophecy founded the appeal of religion on the moral and spiritual instincts of men, by which they were related to their God, there was little danger from sacerdotalism. The ritual existed, but satisfaction of those instincts. But when the people, impotent, conscious of guilt, came to think of J" as so far removed from them that are from Him must be an importation from without, and must be guaranteed, when old and long present by tradition, when new by miracle, they were sure to fall into a material idea of divine grace. It is only the beginning and the first causes of

such a state of things which are to be found in Malachi. The conflicting ideas seem to struggle in his mind. He can write of J" as receiving an acceptable worship beyond the limits of the holy land, and so can forecast the worship 'in spirit and in truth.' But already the people are no longer thought of as the children of J'': only a select class among them dare so to think of themselves (1ec). And, though that class ought to be moral and spiritual guides to the people, it is not this qualification but their being descendants of Levi which gives them that position. Now the more that idea gained on men's minds, the more also would the ritual be thought of as able of itself to maintain divine favour. The grace of J" which men need, and the covenant which is life and peace, must be mediated to them through a system which was wholly outside of them, and which based its validity less on its appeal to their spiritual nature, and more on its being an arbi-trary regulation from which they did not dare to deviate. Again, it was only when this conception of the relation between God and man formed the medium through which men approached it, that the command to remember the law of Moses  $(4^{4'})$ grew dangerous. The living word of prophecy, with its underlying conviction of God's presence in and with the soul of man, was delivered from literalism. One great prophet could and did criticize the doctrine of another, and in the interests of the spirit could dare to touch the letter of the word. Micah could urge how the temper of the people of Jerusalem made them grossly abuse Isaiah's promise of the security of Mount Zion. MALACHI

A prophet could base his appeal on the witness of the spirit in those to whom he spoke. But, when the soul of man was thought of as wholly alienated from God, with no essential relation to Him, and only brought into relation with divine truth by an outward mediation, there grew up a hard theory of inspiration. The revelation from God was deposit of faith and a rule of practice which could not change. The law of Moses became the mediator between God and man; and the prophet was transformed into the scribe. An especial interest must always attach to the Book of Malachi; because both conceptions of God and His dealing with man are there, and the prophet seems hardly conscious of their antagonism. But the less spiritual one was the easier to hold, and was favoured by many circumstances. Despite several protests from Judaism itself, of which the Book of Jonah is the most beautiful example, it triumphed over the higher. And Malachi stands at the be-ginning of that long and swift decline, which finally separated J" and His people by so wide a gulf that official Judaism ended by rejecting the God.

The literary style of the book is peculiar to itself among the prophetic literature. Malachi does not attempt the rhetorical development of a great principle, in the way which is so characteristic of Deutero-Isaiah. In part this is caused by the difference in subject and in aim. The writer is applying principles to the details of life. But the style is strictly dialectic. The writer states his thesis, a principle or an accusation. Over against that he sets an objection, which he may have heard urged against it, or which from his knowledge of the people he believes to be present in their minds. After this he proves and elaborates the truth of what he began by asserting. If these addresses were ever delivered in public, the audiences must have been very dissimilar to those which faced the herdsman of Tekos. On the ground that the style seems that of a man who developed his ideas in writing, several editors of the book have concluded that the author from the first circulated his message to his people by writing. A more accurate description would be to name it the style of the schools, and to see in it the beginning of the method of exposition, which afterwards became universal in the schools and synagogues of Judaism.

v. ANALYSIS OF THE CONTENTS .- The book is divided into four chapters in the English version, which in this respect follows the printed editions of the LXX, Peshitta, and Vulgate; the Hebrew text unites the third and fourth chapters into one. According to its subject-matter it falls into the following seven sections :-

(1) 1<sup>2-5</sup>. Men are asking for the proof of the reality of J"s love toward their nation. Malachi finds the proof in history, and especially in the differing histories of Edom and Judah. Because Jehovah hated Edom, that nation has suffered and will suffer more in the immediate future, so that Judah through seeing their fate will learn to acknowledge the sovereign love of their God.<sup>4</sup> by Judah and the source of the sour

seeing their rate will learn to acknowledge the sovereign love of their God.<sup>4</sup> (2) 16-29. J" had a right to expect a return for His love (16). Instead, those who were nearest Him among the people, the priests, offer a scant and weary worship, the perfunctoriness of which proves their indifference to His claim (1<sup>74</sup>, 1<sup>32</sup>). The result is that the laity are offering their worst at the altar instead of their best (1<sup>14</sup>). The whole ritual has grown value-less; but, though it should cease, a worship acceptable to J" will not come to an end (1<sup>167</sup>). For their neglect punishment will fall on the priesthood ; it has already begun to fail t (2<sup>1-3</sup>). Their indifference to ritual was at once sign and cause of a moral corruption. The priests were appointed to be examples of righteous life, and so guides to the people. But they have already become contemptible (2<sup>4-9</sup>). (3) 2<sup>10-18</sup>. The guilt of those who marry foreign women.

\* Contrast Am 3<sup>4</sup>. † The terms of that punishment are not quite clear in 3<sup>6</sup>.

## MALACHY

222 MALACH Y
Such a marriage is a profaning of J"'s holiness. It has brought about an increase of divorce, with the misery and moral laxity which that produces. Because of this, their prayers are unheard, though they entreat the favour of Jehovah with tears.
(4) 217-39. Men are doubting whether there is any righteous governor of the world (217). Malachi prophesies the appearance of J"'s measenger to prepare His way, and of the messenger of the Loan, for which the people long, will be a coming to judgment in Judah (32). He must begin His sitting work among the temple priesthood (337.), and from them pass to judge the moral errors of the nation (35).
(5) 98-19.\* The people are now more directly addressed. They are suffering from famine, drought, and locusts. These are the judgments of J" on them for having withheld His dues. If they bring their tithes, He will certainly pour out on them the abundance they have lacked.
(6) 93-144. The prophet returns to the root of all other laxity, to the complaint that it is useless to serve J", because He does not care for His servants. Prosperity is not following devotion. Even the best of the people are beginning to whisper among themselves doubts like these (312-18). They need not these who fear Him are inscribed for eternal remembrance (318-19). The day of sitting is signin promised, though here it is uncertain whether the sitting is within the nation between the righteous remnant and the apoetaiting, or whether by the ungodly are meant those who are beyond Judaism (41-1). The prophet adds a Deuteronomic exhortation to remember the Mosaic law (44).
The Book of Malachi is directly or indirectly quoted in the NT in the following passages : Mk

The Book of Malachi is directly or indirectly quoted in the NT in the following passages : Mk 1<sup>2</sup> 9<sup>114</sup>, Lk 1<sup>17</sup>, Ro 9<sup>13</sup>.

LITERATURE. - Driver, LOT<sup>6</sup> 355 ff.; the *Einleitungen* of Cornill, Strack, König; Wildeboer, Lit. d. AT, 333, 361; the commentaries of Pocock, 1077; Köhler, 1865; Wellh. (Kl. Proph.) 1893; Nowack (in Handkom.), 1897; G. A. Smith (Book of Twelve Prophets in 'Expositor's Bible), 1898; cf. also Stade, GVI ii. 128 ff.; W. Boehme in ZATW vii. 210 ff.; J. Bachmann, Alttest. Untersuch. 1894, pp. 109 ff.

A. C. WELCH. MALACHY. — The form adopted by both AV and RV in 2 Es 140 for the name of the prophet MALACHI.

**MALCAM** ( $\neg$ ,  $\neg$ ,  $\neg$ ). -1. The eponym of a Benjamite family, 1 Ch 8<sup>9</sup> (B Meλχds, A Meλχd $\mu$ ). 2. 'Mal-oam' occurs as a proper name in RVm of 2 S 12<sup>20</sup>, where David 'took the crown of  $\neg$ , (AV and RV 'their king') from off his head.' LXX B has Meλχόλ τοῦ βασιλέως aἰτῶν, A om. Meλχόλ. Wellh. and Driver consider that the true reading is prob.  $\varphi dicom$ , the suffix  $\varphi - \dot{\varphi} dicom$ , the suffix  $\varphi - \dot{\varphi} dicom$ , the suffix  $\varphi - \dot{\varphi} dicom$ .

proper antecedent in the context (but see Kirk-patrick in Camb. Bible, ad loc.). In Zeph 1<sup>5</sup> ('that swear by the LORD and that swear by  $c_{7}^{-}\gamma_{7}$ ') AV and RV both give 'Malc(h)am' as a proper name, RVm has 'their king.' Here, again, in all probability, we ought to point  $c_{7}^{-}\gamma_{7}$ (so Wellh. and Nowack, following Luc.  $Me\lambda_{\chi\phi\mu}$ ). Davidson, upon the whole, prefers the spelling  $c_{7}^{-}\gamma_{7}$  'their king,' but adds that 'it is possible that Malcham is merely another pronunciation of Milcom. meaning Molech.'

that Malcham is merely another pronunciation of Milcom, meaning Molech.' In Am 1<sup>16</sup> both AV and RV (without any mar-ginal alternative) read 'their king ( $2\overline{2}/\overline{2}$ ) shall go into captivity' (LXX of  $\beta a \sigma \iota \lambda c \hat{c} \hat{s} a \dot{\sigma} \tau \hat{\eta} \hat{s}$ ), but Aq., Symm., Theod., Pesh., and Vulg. all imply a reading  $2\overline{2}/\overline{2}$ , which both Driver and Nowack are inclined to adopt. This verse from Amos is borrowed by Jeremiah, practically unaltered, in AV has 'their king,' AVm 'Melcom,' RV 'Mal-cam,' RVm 'their king.' Here, as well as in v.<sup>1</sup>, where texts and margins of AV and RV are the same as in v.<sup>5</sup>, we ought probably to point db/p. In both verses of Jer the reading of B is  $M\epsilon\lambda\chi\delta\lambda$ , in v.<sup>3</sup> A has  $M\epsilon\lambda\chi\delta\mu$ . See, further, art. MOLECH. J. A. SELBIE.

\* The uncertainty of meaning in 3<sup>6</sup> makes it a little doubtful to which section that verse should be assigned. † It is a recent suggestion of Nowack that these last verses are a later addition to the original prophecy.

## MALCHUS

MALCHIAH (τζάξιτα) and τζάξιτα) 'J" is king,' see Gray, Heb. Prop. Names, 118 ff.; Meλχίας).—1. A priest, the father of Pashhur, Jer 21<sup>1</sup> 38<sup>1</sup>, same as Malchijah of 1 Ch 9<sup>13</sup>, Neh 11<sup>12</sup>, 2. A member of the rowal family to whom balawed the sit sites the royal family, to whom belonged the pit-prison into which Jeremiah was let down, Jer 386.

**MALCHIEL** (<sup>λ</sup>ς<sup>3</sup>ζ<sup>2</sup>ς<sup>3</sup> · El is king'(?)). — The eponym of an Asherite family, Gn 46<sup>17</sup>, Nu 26<sup>46</sup> (Mελ-χιήλ), 1 Ch 7<sup>31</sup> (B Μελλειή, Α Μελχιήλ). The gen-tilic name **Malchielites** (<sup>λ</sup>χ<sup>2</sup>ζ<sup>2</sup>η) occurs in Nu 26<sup>45</sup>. G. Buchanan Gray (*Heb. Proper Names*, p. 206) thinks that turn induced be the number of the second

thinks that אָלְכָּאָל, judged by the probable history of the similar name כְּלְכָיָה, was perhaps not created or adopted by the Hebrews earlier than the 7th cent., but notes that it was in very early use (c. B.C. 1500) in Canaan, being found repeatedly in the Tel el-Amarna letters. (See 'Milkili' in Petrie, Syria and Egypt from the Tell El Amarna Letters, p. 143, and cf. Jastrow, JBL xi. 120, and Hommel, AHT 231, 233 f. 260 n.).

J. A. SELBIE.

**MALCHIJAH** is the form preferred by RV as transliteration of  $\pi(z)$ , although in two instances it has Malchiak (wh, see). -1. A descendant of Gershom, 1 Ch 6<sup>40</sup> [Heb.<sup>25</sup>]. 2. A priest, the father of Pashhur, 1 Ch 9<sup>12</sup>, Neh 11<sup>12</sup>, same as **Malchiah** of Jer 21<sup>1</sup> 38<sup>1</sup>. 3. Head of the 5th course of priests, 1 Ch 24<sup>9</sup>, perhaps the same as the pre-ceding. 4. 5. Two of the sons of Parosh who had married foreign wives, Ezr 10<sup>25 bis</sup>, called in 1 Es 9<sup>35</sup> Melchias and Asibias respectively. 6. One of the sons of Harim who had married a foreign of the sons of Harim who had married a foreign wife, Ezr 10<sup>31</sup>. In Neh 3<sup>11</sup> he is mentioned as taking part in the repairing of the wall. He is called in 1 Es 9<sup>52</sup> Melchias. 7. Malchijah the son of Rechab repaired the dung-gate, Neh 3<sup>14</sup>. 8. One of the guild of the goldsmiths who helped to repair the wall, Neh 3<sup>31</sup>. 9. One of those who to repair one wall, ref  $3^{-1}$ . So the of those who stood at Ezra's left hand at the reading of the law, Neh 8<sup>4</sup>. 10. One of those who sealed the covenant, Neh 10<sup>3</sup>, probably the same as No. 2. 11. A priest who took part in the ceremony of dedicating the wall, Neh 12<sup>42</sup>. J. A. SELBIE.

**MALCHIRAM** (<sup>γ</sup>)<sup>τ</sup>ο 'Melech is exalted '[?], see Gray, Heb. Proper Names, 147; B Μελχειράμ, A. Μελχιράμ).—Son of Jeconiah, 1 Ch 3<sup>18</sup>.

MALCHI-SHUA (greva) 'the king is wealth' or possibly 'Melech is wealth,' Gray, Heb. Prop. Names, p. 146 f.; in 1 S, B Melxerod, A Melxurove, Meλχισούε, AV Melchi-shua; in 1 Ch, B Meλχισούε, Meλχισούε, AV Melchi-shua; in 1 Ch, B Meλχισούε, Meλχεισούε, A Meλχισούε; 1 Ch 10<sup>3</sup> K Meλχισόčει). —The third son of Saul (1 S 14<sup>40</sup>), who was slain by the Philistines at Mt. Gilboa (1 S 31<sup>2</sup>, 1 Ch 10<sup>3</sup>). In the genealogical lists given by the Chronicler Melchi chura's come comparing the chronicler Malchi-shua's name occurs in each case immediately after that of Jonathan, but though 1 S  $14^{49-51}$ is clearly the work of a later hand (RD) the balance of evidence seems in favour of its tradition.

J. F. STENNING.

MALCHUS .-- The name of the man whose right cf. Mt 26<sup>51</sup>, Mk 14<sup>47</sup>, Lk 22<sup>50</sup>). He was the personal servant ( $\tau \delta \nu \delta o \tilde{\nu} \delta \sigma$ ) of the high priest (*i.e.* prob-ably of Caiaphas, cf. Jn 18<sup>18, 34</sup>), and had accom-panied the soldiers and Jewish officials ( $\nu$ .<sup>23</sup>) under the lead of Judas. He had a kinsman in the same service (Jn 18<sup>26</sup>). The fact that St. John the same service  $(Jn 18^{\omega})$ . The fact that St. John alone names Malchus, as well as Peter, accords with the evangelist's apparent claim  $(18^{36.10})$  to have been known to the high priest, and is one of many minute historical details which appear in his Gospel. Some have thought that prudential motives kept the earlier evangelists from giving the names of the parties, but this explanation is unnecessary and improbable. The servant was

Digitized by Google

## MALEFACTOR

evidently eager to carry out his master's wish to secure Jesus, and was therefore struck at by Peter. The stroke missed, and only cut off Malchus' ear ( $\dot{\omega}\tau_{iov}$  (Mt),  $\dot{\omega}\tau_{divov}$  (Mk, Jn), and ofs (Lk) are synonymous; cf. Lk 22<sup>60</sup> with <sup>61</sup>; and consult Lobeck, ad Phryn. p. 211). It could not have been entirely severed, since Jesus 'touched it and healed him.' Jesus' words (Lk 22<sup>61</sup>), 'Suffer ye thus far' ( $\dot{\epsilon}re\ \bar{e}$  wer rovino), have been supposed by some to have been addressed to the arresting party as a request not to bind Him until He had repaired the injury. But that they were addressed to Peter appears from the proceeding word 'answered,' and from the fuller account in Mt and Jn (see Meyer, ad loc.). It has been noted that St. Luke the physician alone records the healing.\* The name Malchus (MdA<sub>X</sub>or, a greeised form from the root  $\tau_{i}^{2}$ ) was common in different forms among the Hebrews and neighbouring peoples. Cf. who, 1 Ch 6<sup>64</sup>, Neh 10<sup>4-77</sup> 12<sup>2</sup>, Ezr 10<sup>26, 32</sup>; LXX MaA $\dot{\omega}_{X}$  or MaA $\dot{\omega}_{X}$ . There were Nabatæan kings(Euting, Nab. Inscr. 63, 81 ff., 91) of this name, which is written by Josephus MdA<sub>X</sub>ors or MdA<sub>X</sub>or (= $\tau_{i}^{1}$ , Dalman, p. 104). It was the name also of the philosopher Porphyry, a Syrian by birth (cf. Del. Zeit. f. Luth. Th. 1876).

**MALEFACTOR.**—The Gr. word  $\kappa \alpha \kappa \sigma \sigma \omega \delta \sigma$  occurs in Jn 18<sup>30</sup> (TR, but edd.  $\kappa \alpha \kappa \delta \sigma \sigma \omega \omega \sigma$ ), where it is rendered in AV 'malefactor'; also in 1 P 2<sup>12,14</sup> 4<sup>15</sup>, where it is 'evil doer.' RV gives 'evil-doer' in all the passages. Again,  $\kappa \alpha \kappa \sigma \delta \sigma \gamma \sigma$  is in AV rendered 'malefactor' in Lk 23<sup>32, 33, 39</sup>, but in 2 Ti 2<sup>9</sup> 'evil doer'; RV 'malefactor' everywhere. There is no difference in meaning between  $\kappa \alpha \kappa \sigma \sigma \sigma \delta \sigma$  and  $\kappa \alpha \kappa \omega \delta \sigma \gamma \sigma \sigma$ , and there is none between 'malefactor' and 'evil-doer,' but this is a good example of the care of the NT Revisers to express the same Gr. Word always by the same Eng. word. Fuller, Holy State, 203, says, 'Thus Cranmer (who subscribed to Popery) grew valiant afterwards, and thrust his right hand which subscribed first into fire, so that that hand dyed (as it were) a malefactor and all the rest of his body dyed a martyr.'

J. HASTINGS. **MALICE, MALICIOUSNESS.** — Both 'malice' and 'malicousness' have become restricted in meaning since 1611 to a special form of wickedness. In AV of NT the only word they translate is sasla, i.e. wickedness of any kind, 'the vicious character generally,' as Lightfoot says, or as Wilson (Christian Dictionary, 1616) describes it, 'the whole pravity and naughtines of sin.' Other words are translated 'malice' in the Apocr. as  $\mu\bar{\eta}nt$ (Sir 27<sup>30</sup>, RV 'wrath'),  $k_2 \delta \rho a$  (1 Mac 13<sup>6</sup>, RV 'hatred'), but the same general meaning attaches to the word there also. RV generally retains 'malice' and 'maliciousness,' but prefers 'wickedness' to 'malice' in 1 P 2<sup>1</sup>, and to 'maliciousness' in 1 P 2<sup>16</sup>; and wherever in the Apocr. the Gr. is scata (Wis 12<sup>10, 20</sup> 16<sup>14</sup>, 2 Mac 4<sup>40</sup>) RV has 'wickedness.' The Douay Bible translates Is 40<sup>2</sup> 'Speake to the hart of Ierusalem, and cal to her; because her malice is accomplished, her iniquitie is forgiven'; and cf. Hooker, Eccl. Pol. v., App. 1, 'It hath been ever on all sides confest that the malice of man's own heart doth harden him and nothing else.' Tindale's tr. of Ja 1<sup>21</sup> is 'Wherfore laye a parte all fylthynes, all superfluite of maliciousnes'; and Hall, Works, ii. 17, says, 'Doe thou that in us, which was done to thee for us; cut off the superfluite of our maliciousnesse, that we may be holy, in, and by thee, which for us wert content to be legally impure.'

The adj. malicious occurs in 3 Jn<sup>10</sup> 'I will remember his deeds which he doeth, prating against us with malicious words' (λόγοις ποιηροῖς, RV ' with

• On the difficulty of admitting the historicity of Luke's parative, see Expos. Times, x. 139, 188.

wicked words'); and a few times in Apocr. (Ad. Est 13<sup>4.7</sup>, Wis 1<sup>4</sup>, 2 Mac 5<sup>23</sup>). Cf. Hos 6<sup>5</sup> Cov. 'Galaad is a cite of wicked doers, of malicious people and bloudshedders.' For the adv. 'maliciously,' which is found in Sus <sup>56,62</sup>, 2 Mac 14<sup>11</sup>, cf. Cotton, *Calvin's Isaiah* on Is 40<sup>1</sup>, 'Now the Prophet enters upon a new argument, for he lets the people alone, which made no use neither of admonitions nor threatenings whatsoever, in regard they were become maliciously desperate.'

J. HASTINGS.

**MALLOTHI** (mbo).—A son of Heman, 1 Ch 25<sup>4</sup> . There is reason to believe that this and five of the names associated with it are really a fragment of a hymn or prayer (see GENEALOGY, III. 23 n.; and cf. Kittel in *SBOT*, and W. R. Smith, *OTJC*<sup>4</sup> 143 n.). In v.<sup>4</sup> LXX B has *Marõei*, A *Mealwoli*; in v.<sup>36</sup> B *Medadei*, A *Mellydi*.

**MALLOWS** (Trive mallitah,  $\delta \lambda \mu \mu a$ ,  $\lambda A d \lambda \mu \mu a$ , herbæ et arborum cortices). —Two names of plants in Arab. are derived from the same root as mallitah: (1) Mclükhigh, the 'Jews' mallow,' Corchorus olitorius, L. This is an annual herb of the order *Tiliacex*, with oblong-ovate, serrate leaves, the lower teeth of the leaves tipped with long bristles. It bears pods 3 to 4 in. long. The mature stem furnishes the fibre so well known in commerce as 'jute.' The immature stem and leaves are tender and succulent, and have a mucilaginous juice, which is nutritious like that of the mallow. They are extensively used in the East as a pot-herb. This plant grows only in well-watered ground. As the context of the only passage in which mallitah occurs (Job 30<sup>4</sup>) refers to desert places and plants, and to the food of the very poorest of the people, this is not likely to be the plant intended. (2) Mallith. This word is identical with mallitah in form. In some places the allied form múllith is used. Both are popular names for the Sea Orache or Sea Purslane, Atriplex Halinus, L. RV tr. it 'saltwort.' It is a perennial shrub, of the order *Chenopodiacex*, with silvery-white, ovate, obtuse leaves, and densely spiked flowers in a thyrsoidpyramidal panicle. The plant grows in salt marshes along the seacoast and in the interior. The leaves are sour; and Dioscorides says that they were cooked as vegetables. They would certainly be the food of none but the poorest, and well suit the context. G. E. POST.

**MALLUCH** ( $\pi^{1}$ /2).—1. A Merarite, ancestor of Ethan, 1 Ch 6<sup>44</sup> [Heb.<sup>29</sup>], LXX Maλώχ. 2. One of the sons of Bani who had married a foreign wife, Ezr 10<sup>29</sup> (B 'Aλούμ, A Maλούχ), called in 1 Es 9<sup>50</sup> Mamuchus. 3. One of the sons of Harim who had married a foreign wife, Ezr 10<sup>53</sup> (LXX Maλούχ). 4. 8. Two of those who sealed the covenant, Neh 10<sup>4-27</sup> (LXX Maλούχ). No. 4 is probably identical with Malluch of Neh 12<sup>9</sup>, called in 12<sup>14</sup> Malluchi.

**MALLUCHI** ( $\eta^{i}\eta^{i}\chi^{j}$ ) Kethibh;  $\eta^{i}\eta^{i}\chi^{j}$ , Keré, followed by AV Melicu; LXX Maloux; Vulg. Milicho).— The eponym of a priestly family who returned with Zerubbabel, Neh 12<sup>14</sup>, probably the same as **Malluch** of Neh 10<sup>4</sup> 12<sup>2</sup>.

**MALLUS** ( $Ma\lambda\lambda\delta s$ , 2 Mac 4<sup>30</sup>) rebelled (along with Tarsus) against Antiochus Epiphanes about B.C. 171. According to Heberdey, the latest explorer, the city was situated on the river Pyramos, about 150 stadia from its mouth : at the mouth was situated Magarsa (called Antiocheia in the 3rd and 2nd cents. B.C.). The Pyramos had two mouths in ancient time, of which the principal joined the sea a little to the west of the modern village called Kara-Tash, in which many inscriptions both of Antiocheia and of Mallus have been found; but this branch is now almost com-

MALOBATHRON

pletely dried up. Kara-Tash is situated on a low range of hills along the coast between the Pyramos arms: the eastern arm is rapidly filling up the bay of Ayash (into which it flows): in ancient times this branch was quite secondary. According to Heberdey, the site of Mallus was between the fork of the two branches, as coins show the goddess of the city sitting between two river-gods; but the marshy nature of the soil prevents exploration at that point.

The serious difficulties in this theory are-(1) Strabo, our best authority, says that Mallus was situated on a height (p. 675), not in a low marsh; (2) the Stadiasmus implies that Mallus was not 150 stadia up the river, but close to the sea 150 stadia east of Antioch-Magarsa; (3) the presence of so many inscriptions of Mallus at Kara-Tash. Perhaps the correct view is that Mallus was beside Kara-Tash, east of the Pyramos, while Magarsa was west of the river, and the distance stated in the Stadiasmus is over-estimated like many others. Thus, when Mallus was beside Kara-Tash (probably on its eastern side), while Magarsa lay to the west, in-scriptions from both cities should be brought to the modern village : the old bed of the Pyramos, being

dry in modern times, would not prevent transport. Mallus (originally Marlos) was an ancient and wealthy city, with a rich coinage. Magarsa was a comparatively unimportant place, which struck no coins; and probably it was subject to Mallus, serving

coins; and probably it was subject to Maints, serving as its harbour from being closer to the river. W. M. RAMSAY. **MALOBATHRON** (RVm for EV text Bether, γατως; Theod. θυμιαμάτως; Aquila and Symm. Baθήρ, Baιθήρ).—The leaf of the Cassia lignea tree, Cinnamomum Cassia, Blume (Laurus malabathrum, L.), known in the old Materia Medica as tamalapatra or 'Indian leaf,' a lofty tree cultivated in China and Java. Its leaves are 10 in. or more long, and 6 to 8 broad. It was formerly used as a stomachic, sudorific, and a remedy for headache, and as an insubtrict, and a remery for nearbache, and as an in-gredient of mithredule and theriaca. A macerate in oil, and a vinous tincture, were used by the ancients as a perfume. Notwithstanding the authority of Wellhausen (Prol.<sup>2</sup> 415), it is certain that the prior distribution of the form that this spice did not grow wild on any of the mountains of Pal., and therefore no mountains in this land would have been likely to have derived their name from it. Even had it been cultivated in the botanical gardens of Solomon, it is improb-able that any mountain, much less 'mountains,' would have taken their name from this circumstance. It seems better, therefore (although the rendering malobathron is adopted by Reuss, Baethgen, Budde, Siegfried, and nearly all modern commentators), to retain the proper name Bether (wh. see), as in text of both VSS. G. E. Post.

MALTANNEUS (B Μαλτανναΐος, Α 'Αλτ., AV Altaneus), 1 Es 9<sup>33</sup>.—A son of Asom or Hashum, one of those who agreed to put away their 'strange wives. Called MATTENAI ('upp, B Masania, A Masθaral) in Ezr 10<sup>33</sup>.

MAMDAI (B Maudal, A Mard-, AV Mabdai), 1 Es 9<sup>34</sup>.—The same as BENAIAH, Ezr 10<sup>36</sup>.

**MAMMON** (µaµµwrâs [µaµµwrâs only in cursives]; Vulg. mammona; Syr. mamuna; AV and RV 'mammon').—A common Aram. word for riches or both passages. The spelling wire suggests a derivation from it to be firm, steadfast, Hiph. 'trust,' hence 'that which is trusted in'; but in

## MAMRE

NT it has simply its Aramaic sense. According to Augustine (Un the Sermon on the Mt. ii. 14, 47), 'Lucrum Punice mammon dicitur.' 100 occurs in Sir 31<sup>8</sup>, 75<sup>47</sup>, 'o 'm. of falsehood' often in Targg., e.g. 1 S 8<sup>3</sup>, 2 S 14<sup>14</sup>, Hos 5<sup>11</sup>, Am 5<sup>13</sup>, Is 33<sup>16</sup>; also 10<sup>47</sup>, 'o 'm. of wickedness' in Hab 2<sup>9</sup>. The phrase 'mammon of unrighteousness' occurs in the Book <sup>\*</sup>mammon of unrighteousness occurs in the Book of Enoch (lxiii. 10), probably a post Christian reference to the NT passages. Mammon is per-sonified in Lk 9<sup>13</sup>, but there is no reason to suppose that there was a Syrian deity Mammon in NT times. Such an idea owes its currency to Milton. Ges. (*Thes.*) derives from Heb. matmon, 'treasure,' and po 'to hide'; but no example of the assimila-tion of *Teth* (3) is cited. Lagarde thinks po is by elision for prop, which would be the Aram. form of the Arabic madmun, 'contents,' e.g. of a book.

LITERATORE.—Plummer (International Crit. Comm.) on 12 16<sup>9-13</sup>; Thayer Grimm, s.v.; Brockelmann, Syriac Lex., s.v.; Lagarde, Uebersicht, p. 185, Mitteil, i. 229; Arnold Meyer, Jesu Muttersprache, p. 51 n.; Jastrow, Dict. of the Tog., s.v. W. H. BKNNETT.

# W. H. BENNETT.

**MAMNITANEMUS** (A Maµrırdrauµos, B Maµr., AV Mamnitanaimus), 1 Es 9<sup>34</sup>. — Corresponds to the two names Mattaniah, Mattenai in Ezr 10<sup>57</sup>, of which it is a corruption.

MAMRE (τρημαρία). —Mentioned (a) in the expression 'terebinths of Mamre' ('μ' μ') Gn 13<sup>18</sup> (+ processor tercontains of mainter (5.7%) of  $13^{46}$ (both J), and  $14^{13}$  (+ "rest" the Amorite'), from an independent source; (b) in P, in the expression 'which is before Mamre,' in descriptions of the cave of Machpelah, or of the field in which it was. Gn 23<sup>17,19</sup> (+)  $\pi_{12}$  (+)  $\pi_{13}$  (+) Abram's allies, in his expedition for the recovery of Lot. In (b) M is an old name either of Hebron or of a part of Hebron; in Gn 14<sup>18, 29</sup> it is the name of a local sheikh or chief, the owner of the 'terebinths' called after him; in Gn  $13^{16}$   $18^1$  it is not clear whether it is the name of a person or of a place. The 'terebinths of M.' are the spot at which Abraham pitched his tent in Hebron.

The site of Mamre is uncertain. 'Before ' (על מני) in topographical descriptions generally, though not, it is true, universally, means to the east of. The traditional site of Abraham's sepulchre is in the mosque at the S.E. of the modern city: so that Mamre would, in the first instance, be looked for to the W. of this, and at no great distance from it (for it is described as being 'in' Hebron). Sozomen (*HE* ii. 4) says that the oak by which Abraham dwelt still existed in the time of Constantine, 15dwelt still existed in the time of Constantine, 15 stadia N. of Hebron; and Jerome (Onom. 114. 17) says that it continued to be shown till the time of his youth. The site where this oak stood would agree with that of Râmat el-Khalúl (or, more briefly, er-Râmeh), 12 mile N. of the mosque (see the plan of the environs in PEF Mem. iii., after p. 352); and a spot 2 mile N. of this, with a fine spring-well, is still called by the Jews Bart el-Khalu, or 'Abraham's House' (Rob. BRP i. 216; Thomson, L. and B., S. Pal. 304-6, with view · PEF Thomson, L. and B., S. Pal. 304-6, with view; PEF Mem. iii. 316, 322 f., also with view). For some mem. 111. 510, 5221., also with view). For some time past, however, perhaps from the 12th cent., a large and beautiful oak (*Sindián*), 1½ mile W.N.W. of the mosque, has been shown as the oak of Abraham (Rob. ii. 72, 81; Thomson, *I.e.* 282 f., with illustration; *PEF Mem.* iii. 306; Bäd. *Pal.*<sup>2</sup>173f.). Neither of these spots seems sufficiently near to helpron to be a probable site for Marrier near to Hebron to be a probable site for Mamre. Dillm. thinks of the height, with accompanying spring, of *Nimre*, 1 mile N.N.W. of the mosque; but this also is more distant than would be expected. Josephus (BJ IV. ix. 7) says that a very

## MAMUCHUS

ancient terebinth was shown in his day only 6 stadia from the city; but he does not indicate in which direction it lay.

Sozomen adds some remarkable particulars respecting the tree, which show that it was venerated as a sanctuary. He says that an anual fair and feast was held at it in the summer, which was largely attended by Jews, heathen, and Christians (cf., more briefly, the *Onom.* 114. 19f., 249. 29f.). There was also a well beside it; and the heathen visitors not only offered sacrifices beside the tree (§ 3), but illuminated the well with lamps, and cast into it libations of wine, cakes, coins, myrrh, and incense (§ 5; cf. RS 177, 193). These observances were suppressed by Constantine, as superstitious; and a church was built there (§§ 6-8; Euseb. Vita Const. iii. 51-53; cf. SP 143). S. R. DRIVER.

MANUCHUS (Μάμουχοτ), 1 Es 9<sup>30</sup>.—The same as MALLUCH, Ezr 10<sup>30</sup>. The original LXX form was probably Μάλλουχοτ; ΛΛ would readily be corrupted into M.

MAN.—One of the peculiarities of the Hebrew language is the disinclination to form adjectives, or rather the love of placing substantives in such relation as in Western languages would be exrelation as in Western languages would be expressed by a subst. and an adjective. Thus 1 K  $20^{21}$  AV and RV 'mereiful kings,' Heb.  $75^{-2}$ ; kings of mercy.' See Davidson, *Heb. Syntax*, p. 32 ff.; Geseniue-Kautzech, *Heb. Grammur* (Eng. ed. by Collins and Cowley, 1898, p. 437 ff.). This form of expressing attributive ideas is especially common with the words  $3^{-2}$ ; 'man,'  $3^{-2}$ ; 'master,' 'owner,' 73 'son,' and their feminines. With the first of these words with which we

'owner, '7' 'son,' and their feminines. With the first of these words, with which we have to do at present, the Eng. VSS deal variously. (1) Sometimes they ignore the Heb. idiom entirely : 1 S 31<sup>13</sup> and 2 S 24<sup>9</sup> Heb. 'man of might,' AV and RV 'valiant man,' RV 'worthy man'; 1 S 17<sup>4</sup> Heb. 'man of the space between' (C'DT''), AV and RV 'champion' (see CHAMPION); 1 K 20<sup>43</sup> Heb. ('T'') 'man of my ban,' AV 'man whom I appointed to utter destruction,' RV 'man whom I had devoted to destruction'; Pr 15<sup>16</sup> Heb. 'man of wrath,' AV and RV 'wrathful man.' (2) Some-times the Heb. idiom is recognized in the margin : times the Heb. idiom is recognized in the margin: 2 S 16<sup>7. 8</sup> AV 'bloody man,' AVm and RV 'man of blood' (cf. Ps 5<sup>6</sup> 'The Lord will abhor the bloody and deceitful man,' AVm 'the man of bloods and and deceitful man,' AVm ' the man of bloods and deceit,' RV ' the blood thirsty and deceitful man'); 1 K 2<sup>36</sup> ' thou art worthy of death,' AVm and RVm '4hou art a man of death'; Is 40<sup>13</sup> ' his counseller,' RV ' his counsellor,' AVm ' man of his counsel'; 2 S 18<sup>39</sup> ' Thou shalt not bear tidings,' AVm ' be a man of tidings,' RV ' be the bearer of tidings'; Ps 140<sup>11</sup> ' An evil speaker,' AVm and RVm ' a man of tongue'; Ex 4<sup>16</sup> ' I am not eloquent,' AVm and RVm ' a man of words'; Job 11<sup>2</sup> ' a man full of talk,' AVm and RVm ' a man of lips'; Job 22<sup>5</sup> ' the mighty man,' AVm and RVm ' the man of **a**rm'; Pr 3<sup>31</sup> ' oppressor,' AVm and RV ' man of that maketh many friends,' RVm ' a man of that maketh many friends, RVm 'a man of friends.' (3) Sometimes the Heb. idiom is pre-servel in the Eng. text: Gn 6<sup>4</sup> 'men of renown'; of Belial' (for which see BELIAL).

Perhaps the most frequent expression of this kind is man of war, which occurs 42 times in AV text, and always signifies a soldier or warrior. In Ex 15<sup>3</sup> J" is called 'a man of war'; see Montefiore, Hi/bert Lect. p. 39 f., and art. LORD oF Hosts.

The expression man of God (איש אלהים), to designate one acting under Divine authority and influ-ence, is used in Jg 13<sup>6, 6</sup> of an angel; in Dt 33<sup>1</sup>, Jos 14<sup>6</sup> al. of Moses; in 2 Ch 8<sup>14</sup> al. of David; in VOL. 111.-15

1 S 227 95-10, 1 K 131ff. al. of prophets, as a title for whom it appears to have come into use in the N. kingdom in the time of Elijah. See, further, OLD PROPHET. J. HASTINGS.

MAN. --i. WORDS. --1. 578. For derivation and original meaning see ADAM (LXX usually Δυθρωπος, Vulg. homo). The most frequent use of this word as a common noun is for mankind generally (Gn  $(s^2)$ , or for any member of the human race (Gn 5<sup>2</sup>), but occasionally it stands for a man in distinction from a woman (Gn 2<sup>22</sup>). It is used especially when the sinfulness, frailty, or mortality of the race is re-ferred to (Job 5<sup>7</sup>). 2. #\*\* (LXX mostly arth, Vulg. for man in his vigour or valour; for a masculine member of the race, thus standing for 'husband' (Gn 3<sup>s</sup>), and even applied to the male of lower animals (Gn 7<sup>s</sup>). While אָרָם often refers to the race as a whole, אָרָם points to the individual. By a common Heb. idiom it is employed for 'any one' (=Gr. ris, Fr. on, Ex 21<sup>14</sup>), and so gives rise to a similar idiom in NT Gr. (1 Co 4<sup>1</sup>). 3. 5<sup>13</sup>y, simply man, with perhaps some reference to his mortality (mostly poetical, 18 times in Job, 13 times in Ps). **4.**  $\forall \lambda$ : (from  $\neg \lambda$ ; 'to be strong') 'a mighty man,' 'a warrior.' The cognate  $\neg \lambda$ ; is used for a man as opposed to the weaker one, woman (Dt 22<sup>6</sup>). **5.**  $[n_7]$  common in Eth., only found in pl. ( $\circ n_7$ ) defect.  $(n_7)$ , except in compound pr. n. Methusael, Methus lab. The word stands for men as distin-mished both from women and from obildren (Dt 2<sup>51</sup>) guished both from women and from children (Dt 234).

In NT are portor and dryp are used with the distinctions of meaning found in classic Greek.  $\delta r$ - $\theta \rho \omega \pi \sigma \sigma$  stands for a human being, whether male or female, and is sometimes used with the association of weakness or imperfection (1 Co 34). The twofold nature of man is expressed by  $\delta \, \ell \xi \omega \, \delta r \theta \rho \omega \pi \sigma \sigma$  and  $\delta \, \delta \sigma \omega \, \delta r \theta \rho \omega \pi \sigma \sigma \, (2 \, \mathrm{Co} \, 4^{16})$ . Ar  $\theta \rho \omega \pi \sigma \sigma \, is employed in$ the Heb. idiom as the equivalent of  $\tau_{i3}$ , for 'any-body' (e.g. Mt 17<sup>14</sup>, Mk 12<sup>1</sup>, Lk 13<sup>19</sup>). In AV, however,  $\tau_{i3}$  is sometimes rendered 'man' (Mt 8<sup>20</sup>). 'Arps stands for a man as distinguished from a woman. It is also used in pl. as a title of honour, equivalent to our word 'gentlemen' (Ac  $2^{14}$ ). In AV dpony and dpony, 'male,' are translated 'man' (Ro 12', Rev 12').

ii. ORIGIN.-According to both accounts of his It. Order (P) and Gn  $2^{\alpha}$  (J) man was made by God and through an act of Divine will. P states that God 'created' man; J indicates that he was formed out of previously existing matter ('the dust of the ground'), but that he received his life immediately from God—J" breathing into him the breath of life. The doctrine of the pre-existence of souls cannot be discovered in OT, although 1 S  $2^6$ , Job 1<sup>21</sup>, and Ps 139<sup>16</sup> have been thought by some to imply it. The first of these passages refers only to natural birth and death. Whatever the second may mean, it would appear from Job  $10^{\text{ser.}}$  that the author of the poem held the genesis of the personality to be contemporary with that of the body in the womb. The expression in Ps 139<sup>15</sup> 'when I was curiously wrought in the lowest parts of the earth' comes nearer to the idea of pre-existence; but the context points to the embryonic development of the body, and therefore it is reasonable to suppose that the phrase is an It is reasonable to suppose that the phrase is an imaginative allusion to that process (see Schultz, *OT Theol.* (Eng. tr.) vol. ii. p. 250 ff.). The doctrine of pre-existence appears in Alex. Judaism and is met with in Apocr. (Wis 8<sup>196.</sup>). It is distinctly set forth by Philo (de Somm. i. 22). It is not taught in NT, although it was held by contemporary rabbis (see Lightfoot, ii. p. 569), and the disciples may refer to it with regard to the man born blind (Jn 9<sup>2</sup>).

iii. NATURE.-In the Bible man is treated as a creature sharing the nature of the world around

MAN

## 226 MAN OF SIN AND ANTICHRIST

him. A common Heb. name for mankind is 'flesh,' a term which expresses at once the materiality and the frailty of the race. The latter quality is much insisted on; compared with God, man is but 'dust and ashes' (Gn 2<sup>7</sup> 3<sup>19</sup> 18<sup>27</sup>). Nevertheless, in both accounts of his creation (P and J), while man is associated with the universe around him he is described with separate statements that indicate a unique nature. According to P, man was made 'in the image of God' (Gn 1<sup>36, 27</sup>). This phrase, taken in connexion with P's doctrine of the spiritual existence of God, must refer to mental and moral feasibility and the physical form is to intellect faculties, not to physical form, *i.e.* to intellect, affections, will, moral personality (Delitzsch). In Ps 8<sup>6</sup> man is described as 'made to lack but little of God,' a passage in which, while the high endowments of the race are gratefully acknow-ledged in daring language, it is to be observed that the word for God is any (softened in LXX to  $d\gamma\gamma\epsilon\hbar\omega\nu$ ), not  $m\pi$ , and that this is mentioned in the third person though the psalm is addressed to J'' (Schultz, *OT Theol.* vol. ii. p. 254). It has been suggested on the ground of Gn 1<sup>st</sup> that P teaches that mankind was originally androgynous, and on the ground of Gn 221 that J contains the same idea; but this is more ingenious than reasonable.

iv. UNITY OF THE RACE.—This is implied in the accounts of the Creation, the Deluge, and the tower of Babel, and in the genealogies of Genesis. It has been asserted that  $Gn 6^{1,2}$  points to two distinct species of mankind (Keil); but elsewhere in OT the expression 'the sons of God' (און אווין) invariably stands for *angels* (Job 1<sup>6</sup> [see Dav.] 2' 38'; cf. אלים Ps 29<sup>1</sup> 89<sup>6</sup>; אלים 'a son of gods' Dn 3<sup>25</sup>). So LXX of Gn 6<sup>1,2</sup> and Philo on this passage; also Josephus (Ant. I. iii. 1). Moreover, there is nothing to indicate that the phrase 'the daughters of men' could refer to the women of one race to the exclu-sion of others (Delitzsch, *in loc.*). The development of monotheistic ideas tended to deepen the sense of the unity of mankind, and so to correct any influences in the opposite direction that might arise from the exclusiveness of Jews with regard to Gentiles and that of Greeks in their view of primitive races or even of foreigners generally  $\beta a \rho a \rho a \rho a$ . This unity is distinctly affirmed in St. Paul's speech on the Areopagus with an emphasis rations speech on the Areopagus with an emphasis which indicates that it might not be fully acknow-ledged by his audience (Ac  $17^{30}$ ). It is taken for granted in the NT statements of the redemption of the world by Jesus Christ (e.g. Jn  $3^{16}$ ). While it is at the foundation of St. Paul's universalism, it is never contradicted by his Judaizing opponents. v. DESTINY.-It is the teaching of OT as well as

NT that God has a great future in store, first for His elect, and then through them for the race. This is to be preceded by a 'day of the Lord,' in NT the *Parousia*, which ushers in the glory through terrible judgments. The grounds of hope for the future are all found in the mercy and the faithfulness of God, whose own glory is realized in the ultimate well-being of His creatures. While the end of the physical universe is contemplated, that of the race of man is not predicted—whatever may be the, fate of individuals. On the contrary, OT points to a boundless future of peace, and NT to the final establishment of the kingdom of God. See ESCHATOLOGY. On the whole subject see, further, under ADAM and COSMOGONY; and for the Psychology of Man see Psychology. W. F. ADENEY.

MAN OF SIN AND ANTICHRIST (& dropwros τής ανόμίας, ό vios τής απωλείας, ό αντίχριστος, ό αντι-κείμενος, ό ανόμος).—There are three principal sources in the NT whence we derive our knowledge of the beliefs of the 1st cent. concerning the Anti-christ and Man of Sin, viz. 2 Th, 1 and 2 Jn, and the Apocalypse.

## MAN OF SIN AND ANTICHRIST

i. The Pauline account (2 Th 2) is this, that the final coming of Christ is to be preceded by (1) the falling-away ( $\dot{\eta}$  amoranoia). (2) After this, the revealing of the Man of Sin, who opposeth and exalteth himself above all that is called God or that is worshipped, so that he as God sitteth in the temple of God, giving himself out that he is God. He has power to do miracles which are lying miracles. The Lord will come and destroy him with the breath of His mouth. There is somewith the breath of His mouth. There is some-thing, described first as a thing (neuter,  $\tau \delta \kappa a \tau - \epsilon \chi \omega r$ ), then as a person (masc.,  $\delta \kappa a \tau \epsilon \chi \omega r$ ), which prevents the appearance of the Man of Sin for the time being. St. Paul reminds the Thessalonians that he used to tell them these particulars when he was with them ( $\epsilon \tau \iota \ \omega r \ \pi \rho \delta s \ \nu \mu \delta s \ \tau a \delta \tau r \sigma r$ 

ύμîr, v.•). ii. In the Epistles of St. John we have little but the name of Antichrist (which occurs nowhere else in NT). In 1 Jn 2<sup>18</sup> occur these most important words: 'Little children, it is the last hour : and as ye have heard that Antichrist shall come, even now there are many antichrists ; whereby we know that it is the last time.' From this we gather, as from 2 Th, that the belief in Antichrist was one familiar to the Christians of the time. The name familiar to be offered as the time time. The matter occurs again in  $2^{22} 4^3$  ('this is that matter of Anti-christ'— $7\delta$  row drr( $\chi_0$ ,—'whereof ye have heard that it should come'),  $2 Jn^7$ . St. John, then, alludes to a popular belief, and spiritualizes it, applying it to tendencies already at work.

iii. In the Apocalypse a far more complex state of things is found. It is necessary briefly to sketch the characteristics of the various evil powers (Beasts) which appear in it. (a) First in 117 we have, suddenly introduced

without any previous description, 'the Beast that cometh up out of the abyss.' Of him it is only said that he slays the Two Witnesses, and we gather that his seat is at Jerusalem. In connexion with him we find mention of a period of 42 months or 1260 days (=31 years), of which more will be said.

(b) Next in ch. 12 appears the Great Red Dragou in heaven, who is expressly identified with Satan. He persecutes the woman clothed with the sun, and is cast out of heaven.

(c) In ch. 13 a Beast with seven heads and ten horns, crowned, comes up out of the sea. One of his heads is wounded to death and is revived. And the Dragon (cf. 12) gives to him his power. (d) In  $13^{11}$  another Beast comes up out of the

earth, which has two horns like a lamb (evidently, therefore, is a rival and counterpart of the Lamb), and speaks like a dragon (being in reality Satanic and not divine). This being is afterwards (19<sup>30</sup> etc.) called the False Prophet. His function is to etc.) cannot the raise Prophet. Ans function is to support the former Beast by lying miracles, and induce mankind to worship him. The former Beast is accordingly worshipped as God, and sets a mark upon his adherents; and his name is indi-cated by the mystic number 666 (or 616). The principal Beast and the False Prophet appear again mark 10 and 20 mbors they more a find accord in chs. 19 and 20, where they make a final assault on the saints, and are vanquished by Christ.

(e) Lastly, in ch. 17 another Beast, scarlet, with seven heads and ten horns, appears, upon which the woman (Babylon) is seated. This Beast is ex-plained to the seer : it is said that it 'was, and is not, and shall ascend out of the abyss and go into perdition.' Its heads are seven hills, and seemingly also seven kings (five past, one present, one to come), and its horns are ten kings (all future).

Of this exceedingly complicated series of images it would be absurd to attempt to give all the solutions which have been suggested. W. Bousset in his recent commentary on the Apoc. gives a view which commends itself as nearest to the truth of any. It is shortly this :- The Beast of ch. 11 is

the Antichrist of current belief, taken over by the author of the Apocalypse together with the other traditional image of the Witnesses. The Beast of ch. 12 is perhaps an ancient mythical personification of some natural force (see below) identified by the Apocalypse with Satan. The Beast of ch. 13 is Rome, and its slain head which is revived is Nero redivivus. Certain of its characteristics are derived from the popular conception of Antichrist. Its number 666 is taken to mean Nero Casar. It derives its power from Satan. The False Prophet of ch. 13 is in many respects the Antichrist of popular belief, posing as a counterpart of the Lamb, and able to work wonders. But here it is in a subordinate position to Rome: the apocalyptist borrows the figure from the beliefs of his time: by it he probably intends the heathen priesthood, especially in its relation to the worship of the Cæsars. The Beast of ch. 17 is, as we have seen, a complex image. It is partly representative of an individual who was, and is not, etc.—Nero

redivinus; partly of a polity—that of Rome. iv. With these notices from the Epistles and Apocalypse we nust couple a few of less certain import from the Gospels. (a) In Mt 24<sup>24</sup>, Mk 13<sup>6–24</sup>, Lk 21<sup>8</sup> our Lord predicts the coming of false Christs and false prophets. In Mt and Mk there is also mention of the 'abomination of desolation' in the Holy Place, coupled with an injunction that when this appears they that are in Judæa are to flee to the mountains. This is the sequel to a 'great tribulation,' of which the duration will be shortened by God for the sake of the elect. And upon this follow portents in heaven, and the coming of the Son of Man. This 'abomination of desolation' is very plausibly interpreted by many modern critics of the session of Antichrist in the temple as God. And some critics suppose that this portion of our Lord's eschatological discourse has been influenced or interpolated in accordance with current beliefs. See, further, art. ABOMINATION OF DESOLATION. (b) Lastly, in Jn 5<sup>44</sup> our Lord says, 'I am come in my Father's name, and ye receive me not: if another shall come in his own name, him ye will receive.' Many commentators, c.g. Chrys., Cyr., Theod. Mops., explain this 'other' to be Antichrist. Such are the passages of the NT which throw

Such are the passages of the NT which throw light upon the subject of Antichrist: and we gather from them unmistakably that teaching concerning Antichrist was orally current at a very early time. Did it originate with Christianity, or is it a pre-Christian Jewish idea? In Jewish apocalyptic literature we find undoubted evidence of this belief. In the Book of

In Jewish apocalyptic literature we find undoubted evidence of this belief. In the Book of Daniel are certain passages which bear on the question. (a) In ch. 7 appear four beasts, the last of which has a 'little horn' which makes war against the saints. This horn, it is explained to the seer, is a king who will war against God and the saints for a period expressed as times, a time and half a time (3½ years): upon his fall follows the judgment. ( $\beta$ ) In ch. 8 out of one of the four horns of the he-goat (Greece) comes a little horn which waxes great and easts down some of the stars of heaven, and magnifies himself even to the prince of the host, and takes away the daily sacritice. In connexion with him is mentioned, but obscurely, the abomination that maketh desolate. This lasts for 2300 half-days, or 1150 days. In the interpretation this horn is said to represent a king of fierce countenance understanding dark sentences, who stands up against the Prince of princes, and is 'broken without hand.' ( $\gamma$ ) In ch. 9 the daily sacrifice is taken away, and the 'abomination' takes its place for half a week ( $3\frac{1}{2}$  years). ( $\delta$ ) In cha 11. 12 is a long prophecy of a king of the north who will oppress Judæa, take away the daily

sacrifice, and set up the abomination that maketh desolate. He comes to a sudden end, and then follows the great tribulation, and then a resurrection of the dend.

It is agreed that these predictions, while partly applicable to a historical person, Antiochus Epiphanes, do not apply to him in full. Those who regard the book as written during his persecution, take the view that the seer anticipated the end of all things to happen immediately upon the fall of Antiochus, and that he wrote shortly before that event. It is at least clear that parts of this picture, as of so many others in the Bk. of Daniel, were used by the author of the NT Apocalypse: notably the casting down of the stars from heaven (Rev 12), and the length assigned to the reign of the wicked king (see the 42 months and the 1260 days of Rev 11<sup>2-3</sup>).

In the third Book of the Sibylline Oracles (c. B.C. 170) is a prediction that Beliar will come in the last days,  $\epsilon\kappa \Sigma\epsilon\beta\alpha\sigma\eta\nu\omega\nu$ , which according to Bousset means 'of the race of Augustus'; while others, comparing the Ascension of Isaiah, interpret it as 'from Samaria.' Note that the final adversary is here no other than Satan, apparently in the form of man. To this Sib. Orac. ii., originally a Jewish composition but extensively Christianized, adds that Elias (alone) will come as a witness, and that Beliar will do many signs.

In 4 Ezra  $(5^{4, 6})$  are traces, though obscured and corrupted, of the belief. We read, among a list of the signs of the end: 'thou shalt see the kingdom that is after the third (i.e. the power of Rome) shaken,'\* and also 'he shall reign whom they look not for who dwell on the earth.'

In Apoc. Bar (ch. 40) is a prediction of the destruction of the last leader of the enemies of Israel by the Messiah on Mount Sion.

In Asc. Isa. (ch. 4) are clear predictions of the advent of Antichrist, who is identified with Nero redivinus, and of his reign for the traditional period of 3½ years. But this cannot safely be regarded as pre-Christian.

From this evidence, and from an examination of a number of patristic documents, Bousset (*Der Antickrist*, 1895) has concluded, and as it seems to us rightly, that there was among the Jews a fully developed legend of Antichrist—perhaps oral, but more probably written—which was accepted and amplified by Christians; and that this legend diverges from and contradicts in important points the conceptions we find in the Apocalypee. As formulated by Christians of the 1st cent. its main features are—

That Antichrist would not appear before the fall of Rome; that he would then appear among the Jews, proclaim himself as God, and claim to be worshipped in the temple at Jerusalem; that Elias would appear and denounce him, and be slain by him; that he would be born of the tribe of Dan: this idea being due to an interpretation of Gn 49<sup>17</sup>, Dt 33<sup>23</sup>, Jer 3<sup>16</sup>—a tradition known to the apocalyptist, who omits Dan from the list of the tribes; that his reign would last for 34 years; that the believing Jews (or all the Church) would flee into the wilderness, whither Antichrist would pursue them; that he would then be destroyed by the Lord with the breath of His mouth (a conception derived from Is 11<sup>4</sup>).

It will be seen that there is here a considerable disagreement with the Apocalypse. In that book the principal beast is Rome, and there are two witnesses, not one. The first point is very important: the Apocalypse is anti-Roman. The current belief expressed by St. Paul regarded

\* 'Post tertiam turbatam' is taken as the equivalent of an original Greek τλι μιτλ τλι τρίτην (πο. βασιλιών) θορυβου μίτην. The old reading was ' post tertiam tubam.'

the Roman power as a bulwark against Antichrist.

In later times the mass of conflicting traditions about Antichrist led to the idea of a twofold Antichrist—one for the Jews and one for the world at large. This is seen with the greatest clearness in the writings of the 3rd cent. poet Commodian, especially in his Carmen Apologeticum, where Nero redivivus appears as the antichrist of the Gentiles ('nobis Nero factus antichristus, ille Judæis'). Of the ultimate source of this belief it is not possible to speak with certainty.

Gunkel, in a recent work (Schöpfung und Chnos), has struck out a line of interpretation which has already been fruitful, and promises to be more so in the future. He regards the conceptions of the Apocalyptic beasts as survivals of ancient mytho-logical beliefs to which the Apocalyptic writer gave new life and meaning. The primeval dragon of the deep (*Tiamat* in Babylonian mythology), which opposed the Creator in the beginning, and was overcome and bound by him, would, it was thought, in the last days rear up its head again and break out in a final rebellion, to be vanquished this time for ever. And it is at least a plausible to the mind of the present writer a more than plausible—theory that beliefs of this kind belonging to the common Semitic stock, and refreshed in the recollection of the Jews during the Exile, should in their later literature once again appear in the guise of 'ancient wisdom,' with a new and loftier spiritual meaning read into them.

Antichrist—the Antichrist believed in by the aws—passes through several stages. He is per-Jews-passes through several stages. haps originally a natural force personified, representing Chaos as opposed to order, Darkness as against light. He is then identified with Satan, the great adversary of God in the moral world. The Antichrist of the Sibylline Oracles is, as we have seen, Beliar. And, lastly, he is thought of as a man in whom Satan's power is concen-trated, as the power of God is concentrated in the Messiah.

In the New Testament St. Paul adopts, and St. John in the Epistles alludes to, a conception of Antichrist which had been coloured largely by the identification (in the Book of Daniel) of Antichrist with a historical person (Antiochus Epiphanes). In the Apocalypse the traditional Antichrist appears for a moment (in ch. 11); and thereafter his characteristics are divided between the Beast of ch. 13, who is Rome, headed by Nero redivivus, claiming divine worship, and the False Propher who parodies the Lamb and performs the lying wonders.

The wish to identify the Antichrist of tradition with definite contemporary personalities (as Antiochus and Nero) is very largely responsible for the confusion which surrounds the whole subject.

A word as to later Jewish beliefs. The destruction of Jerusalem by Rome operated largely upon Jewish minds. Whereas to them Rome had been the bulwark against Antichrist, it now took the place of Antichrist in Jewish thought ; and accordingly in such late compositions as the Book of Zerubbabel (as well as in the earlier Targums) the name of Antichrist is Armillus (=Ronulus= Rome). But, in spite of the adverse view of the Apocalypse of John, the Christian Church continued to regard Rome as the protector of the world against Antichrist, and to pray for its preservation accordingly.

The clearest of the utterances of our Lord and of St. John point rather to a plurality of antichrists who are to appear in different ages of the Church's growth—rather to movements and tendencies of a kind hostile to Christianity, than to any one welldefined personality.

## MANAEN

LITERATURE.—The most important sources of knowledge on the subject of Antichrist are given in full in Bousset's excellent monograph, Der Antichrist which has been copiously used in the body of this article. Besides those already named, the following may be mentioned here: Hippolytus, de Antichristo —sermons attributed to Ephraem Syrus (Latin and Greek); Victorinus Petablonensis on the Apocalypse; Lactantius (a very important authority); the pseudo-Methodius, de principio et jure azouli; the tract of Adso (printed among Anselm's works), de Antichristo. Of Apocryphal documents, the following con-tain interesting details: the Coptic Apocalypse of Blias (Chris-tian, in its present form), recently edited by Steindorff in 'Texte und Unters' (Neue Folge); the Syrine Book of Clement or Testament of the Lord, coupled with a Latin fragment found by the present writer at Treves; the late Greek Apocalypses of Esdras and of John (these four will be found collected in Apocrypha Ancedota, i.); the various forms of the Apocalypse of St. Nerses, published by F. C. Conybeare (Academy, 1896), and an interesting Latin document attributed to St. John in Roger Hoveden's Chronicle (Rolfs Series), should be added to Bousset's stock of documents. A principal feature in the later Apocalyptic literature is the description of Artichets present and the store in the apocalyptic to the store of the destine the store of the offer the store of the store o

A principal feature in the later Apocalyptic literature is the description of Antichrist's personal appearance, which is described as very unpleasing. It is curious to note that several traits of this are borrowed in the Greek Acts of St. Christopher (Analecta Bollandiana), and attached to that saint before his conversion. conversion. M. R. JAMES.

MANAEN (Marathe, Gr. form of once Menahem, LXX Marathe, 'consoler,' 2 K 15<sup>17</sup>), one of the 'prophets and teachers' in the Church of Antioch at the time of St. Paul's departure on his First Missionary Journey (Ac 13<sup>3</sup>),<sup>\*</sup> and σύντροφος of Herod the tetrarch, i.e. Herod Antipas, son of Herod the Great (Lk 3<sup>1, 19</sup> 9<sup>7</sup> etc.). σύντροφος may mean either collactaneus, 'foster-brother,' 'nursed mean either collactaneus, 'loster-brother,' 'nursed along with' Herod (Walch, Ols., de Wette, Alf., Words.; cf. Xen. Mem. ii. 3. 4), or merely con-tubernalis, 'brought up in the same household,' or 'on intimate terms with' him (Eras. Luth. Calv. Grot. Baumg. Ew.; cf. 1 Mac 1<sup>29</sup>). Walch, recalling that the brothers Antipas and Archelaus were brought up together (Jos. Ant. XVII. i. 3), argues for the closer (without excluding the more general) relationship, on account of the tetrarch + alone being here mentioned.

It is highly probable that this Manaen was related to an older Manaen referred to by Josephus (Ant. XV. x. 5) as a notable Essene who, about B.C. 50, met Herod, afterwards the Great, then a schoolboy, and saluted him as future king of the Jews (Antipater, the father of Herod, was then chief minister of the Hasmonzan prince Hyrcanus). When the anticipation was afterwards realized (B.C. 37), Herod sent for this older Manaen, treated him as a friend (detwordueros), and thenceforth honoured the whole Essene sect. A Talmudic authority ‡ identifies the same Manaen with a leading Rabbi who entered the household service of the king. When Antipas was born, some years later, Herod may very naturally have selected, as the child's foster-brother and youthful companion, a grandson § or grandnephew of the senior Manaen, who would thus be honoured in the person of the boy.  $\parallel$  As  $\sigma i \sigma \rho \phi \sigma \sigma$  (in either sense) the younger Manaen would receive a place at the royal table, be educated along with Antipas, and probably accompany him and Archelaus when the two princes were sent to complete their education at Rome (Jos. Ant. XVII. i. 3). When Antipas be-came tetrarch (he was called 'king' only by

<sup>e</sup> The arrangement of the conjunctive particles suggests that the first three mentioned were prophets, the last two (Manaen and Saul) teachers. See Meyer, in *loc.*; cf. Xen. Mem. ii. 3, 19, f Antipas is the only Herod whom St. Luke elsewhere (Lk Sl. 19) calls 'Herod the tetrarch,' although Philip (Lk Sl) and, up till A.D. 52, Agrippa (Ac 25<sup>13</sup>) might also have been so called. Agrippa, however, was only about seventeen at the time Manaen is designated as a teacher; Antipas would be over sixty. sixty.

sixty. ; Quoted by J. Lightfoot in Hor. Heb. et Talm. p. 25. § While stricter Essenes eschewed marriage, a section of them allowed it. See art. EASENES, vol. i. p. 768. ¶ Cf. Chimham's reception into the royal household as a token of honour to his father Barzillai (2 8 19<sup>37</sup>).

## MANAHATH

courtesy) on his father's death, Manaen would naturally have some position in the 'royal' household; and, assuming that St. Luke and Manaen afterwards became acquainted at Antioch, with which both were connected,<sup>\*</sup> it would most prob-ably be from Manaen that St. Luke derived his knowledge of many facts concerning Antipas, his household, and other members of the Herodian family (Lk 3<sup>1. 19. 20</sup> 8<sup>3</sup> 9<sup>7-9</sup> 13<sup>51. 37</sup> 23<sup>3-12</sup>, Ac 12).

The time, occasion, and instrumentality of Manaen's becoming a follower of Christ are un-known. He may have been drawn to the Master simultaneously with Joanna, the wife of Chuza, Herod's steward (Lk 8<sup>3</sup>), or with the Herodian nobleman ( $\beta_{a\sigmai}\lambda_{k} \delta_{s}$ , *i.e.* courtier) whose son was healed by Jesus (Jn 4<sup>44, 53</sup>). The ministry of the Baptist,  $\dagger$  which notably influenced Herod himself (Mk  $\mathfrak{G}^{\infty}$ ), may have been blessed to one whose Essene origin might predispose him towards our Lord's ascetic forerunner. His discipleship need not have involved departure from Herod's court; but the separation must have taken place, if not earlier, in A.D. 39, when the tetrarch, instigated earlier, in A.D. 39, when the tetrarch, instigated by his ambitious wife, left Palestine for Rome, in order to obtain royal dignity, but was condemned by Caligula to perpetual exile (Jos. Ant. XVIII. vii. 2). About the time of Antipas' removal, or soon after, the Gentile Church of Antioch was founded by Jewish Christians who had left Judgea fitter Statesheric mentuders (A.E. 1120). Example after Stephen's martyrdom (Ac  $11^{20}$ ). From his subsequent position as a prominent Christian teacher at Antioch, we may assume as highly probable that Manaen was one of these founders. At all events, he had a leading share (1) in building up a mother Church in the third city of the empire, (2) in propagating successfully the pure Christian faith and life in a city whose moral corruption was proverbial, (3) in establishing the great truth, then but dimly discerned even by apostles, that the Gentiles were fellow heirs, on equal terms with the Jews, of the divine promise of salvation.

LITERATURE.--Walch, 'de Menahemo,' in Diss. Ac. Ap.; J. Lightfoot, Hor. Heb.; Plumptre, 'Manaen' in Biblical Studies; Cassell's Bible Educator, il. 29, 82. H. COWAN.

**MANAHATH** (mp;, Maxara $\theta(\epsilon)l$ , Manaoth).—1. Mentioned only in 1 Ch 8<sup>6</sup> as the place to which certain Benjamite clans were carried captive. Targ. adds 'in the land of the House of Esau,' and Syr. and Arab. VSS borrow a word from the next verse and translate 'to the plain of Naaman.' The town is probably identical with that implied in **Manahethites** (wh. see), with the *Maroxi* of the Greek text of Jos 15<sup>50</sup>, where the LXX preserves a list of towns which had been lost from our Heb. text; and if the text in Jg is correct, with the **Menuhah** (wh. see) of Jg 20<sup>43</sup> RVm. The site of the city is unknown. Conder (*PEF Mem.* iii. 21, 136) suggests *Malka*, 3 miles S.W. of Jeru-salem. The text of 1 Ch 8<sup>6</sup> is probably corrupt. 2.(*Mar(r)axd(θ)*, *Maxardµ*, *Maraxdµ*, *Manahat(h*)). Syr. and Arab. VSS borrow a word from the next

salem. The text of 1 Ch 8° is probably corrupt. 2.  $(Mar(r)a\chi d(\theta), Ma\chi ard\mu, Mara\chi d\mu, Manahat(h))$ . -Gn 36<sup>23</sup> (P), 1 Ch 1° 'son of Shobal, son of Seir, the Horite,' *i.e.* eponymous ancestor of a clan of Edom, or of the earlier population conquered and absorbed by Edom. See, further, art. MANA-HETHITES. W. H. BENNETT.

### MANAHATHITES.-See MANAHETHITES.

MANAHETHITES stands in AV for n'mm; (A'Aμ-μανίθ, B Μωναιώ, RV Menuhoth) in 1 Ch 2<sup>93</sup> '(These were the sons of Caleb . . . Shobal) And Shobal the father of Kiriath-jearim had sons, Haroeh, half

• Eus. (*HB* iii. 4) affirms St. Luke's Antiochene parentage, and the numerous references to Antioch in Ac suggest the familiarity of the writer with this city. • From Manaen St. Luke may have obtained the information about the Baptist not given by the other evangelists (Lk 187-59 37-14).

of the Menuhoth'; and also for  $x_{P,Q}$  (A Mard $\theta$ , B Maha $\theta ei$ , RV Manahathites) in 1 Ch 2<sup>34</sup> (These were the sons of Caleb . . . Salma) The sons of Salma; Beth-lehem . . and half of the Mana-hathites, the Zorites.' The Vulgate translates 'rest' (*dimidium* requietionum (or -is)) in both verses. We should read (with Kittel, *SBOT*) مربع 'Manahathites' in both verses. The genealogy is to be interpreted as meaning that the city Manahath, occupied by portions of two sections of the Edomite clan Caleb, came to be reckoned to Judah. See art. MANAHATH. W. H. BENNETT.

MANASSEAS (Marasothas), 1 Es 931 = MANASSEH, Ezr 10<sup>40</sup>.

MANASSEH (नहम्द्र).—1. A king of Judah. He was the son of Hezekiah and father of Amon. His mother's name was Hephzi-bah (2 K 21<sup>1</sup>). He probably came to the throne B.C. 686. He is said to have been twelve years old on his accession. The length of his reign is given as fifty-five years; but this should, it seems, be reduced to forty-five, in which case he died B.C. 641. Of the actual history of this long reign we know very little, the attention of the author of the Book of Kings being fixed on the condition of religion. The reign was probably peaceful and prosperous, at any rate we have no indication to the contrary at any rate we have no indication to the contrary in our oldest source. But in the matter of religion it was quite otherwise. During the reign of Hezekiah those who attached themselves to the higher teaching of the prophets had formed a powerful party which had great influence over the king, who seems to have done something towards a religious reformation (2 K 184). But there was always a strong party which resented reform, and on Hezekiah's death it improved its opportunity by capturing his successor. All the superstitious by capturing his successor. All the super-cults and practices of the time of Ahaz came back, and were established with the royal sanction (2 K  $\Omega^{13}$ ). But they did not come back alone. The most important feature of M.'s reign is its religious syncretism, the blending of foreign worships with the popular religion of Israel. Especially signifi-cant is the worship of the host of heaven (v.<sup>5</sup>), which shows the influence of Assyria and Babylon. The Baal and Asherah cults were probably revivals of old Can. worship. Mention is also made of dealings with familiar spirits and wizards (v.<sup>6</sup>). It is not unlikely that we should connect with this the shedding of innocent blood (v.<sup>16</sup>), with which the king is also charged. This points to a systematic religious persecution. The time was, accordingly, one of religious reaction—not of re-action only, however, but of syncretism, of gloomy superstition and cruel fanaticism. Out of its sprang, according to the teaching of the prophets (2 K  $23^{36.27}$   $24^{3-4}$ ), the destruction of Jerus. and the Exile, which even the piety of Josiah and the Douteman and the factor of the prophets of the second statement of the prophets of the second statement. Deuteronomic Reformation were unable to avert.

In Chronicles it is said that, in consequence of his sin, M. was taken by the Assyrians in fetters to Babylon (2 Ch 33<sup>11</sup>). There he humbled himself before God, and was restored to his kingdom, whereupon he cleansed Jerus. and the temple of vidence against the story; for if M. had been really taken into captivity, repented, and on his return sought to undo the evil he had wrought, the writer in Kings would not have left the impression of unbroken idolatry and sin. (Contrast the case of Ahab, 1 K 21<sup>27-29</sup>). That the Assyrians the case of Ahab,  $1 \text{ K } 21^{2\ell-2\ell}$ ). That the race  $r_{100}$  is not in should have taken a prisoner to Babylon is not in itself very suspicious. But the mention of it probably gives a clue to the origin of the story. The Bab. exile was traced by the prophets to the sin of

MANASSEH

M., and the Chronicler would feel it a fit thing M., and the Chronicler would feel it a fit thing that the author of this calamity should himself experience a captivity in Babylon. There was this further reason for the story. The long and peace-ful reign of so wicked a king called for explana-tion. And this was accounted for by the story of his penitence and reformation. It is a char-acteristic example of the Chronicler's method of rewriting history. See, further, Driver in Hogarth's *Author. and Archaeol.* pp. 114-116, where the archeeological data bearing on the question are fully discussed, and the conclusion is reached that while the inscriptions do not decide the question, while the inscriptions do not decide the question, they fail to neutralize the suspicions attaching to the Chronicler's narrative.

2. Manassch in Jg 18<sup>30</sup> is a correction for Moses, since it seemed derogatory to the reputation of the latter that his grandson should have been the first priest at the sanctuary of Dan. The correction was made by inserting the letter 1 above the line, thus changing the word into Manasseh (cf. Moore, *adloc.*). **3. 4.** Two contemporaries of Ezra who had married foreign wives (Ezr 10<sup>30.33</sup>). **5.** See next article.

#### A. S. PEAKE.

MANASSEH (اتتجاب), — according to the etymology given in Gn 41<sup>61</sup>, 'making to forget,' from المجار 'to forget'; LXX usually Maragori), the elder son of the patriarch Joseph by his Egyptian wife, Asenath, and also the name of the tribe reputed to be descended from him. Of Manasseh as the son of Joseph, nothing more is stated than what is recorded in Gn 48, where Jacob (1) blesses his two grandsons, giving Ephraim, against their father's desire, the first place (vv.<sup>1-2, 6-3</sup> JE), and (2) adopts them, placing each on the same level with his own sons (vv.<sup>5-7</sup> P). Both these transactions have mani-festly a *tribal* significance; they are traditional explanations of the relations existing subsequently between the two tribes Manasseh and Ephraim themselves, and between these two and the other tribes. In Gn 50<sup>23</sup> it is also stated that the children of MACHIR, the son of Manasseh, were 'born upon Joseph's knees,' *i.e.* he survived their birth, and was able to recognize them as his descendants (cf. 30<sup>3</sup>; Odyss. xix. 401; Stade, ZAW, 1886, 146 f.). Manasseh as a tribe is, however, more important

than Manasseh as an individual. i. History of the tribe. All that the oldest tradition of the Exodus (JE) says about the tribe is, that after Moses had allotted inheritances on the E. of Jordan to Reuben and Gad (Nu 32), particular families of Manasseh took possession of districts in the same neighbourhood, - the children of Machir, the (eldest) son of Manasseh, occupying Gilead generally, Jair, 'son' (*i.e.* descendant) of Manasseh, occupying the district in it called after-Manasseh, occupying the district in it called after-wards HAVVOTH-JAIR (which see), and Nobah occupying Kenath, with its 'daughters,' or de-pendent villages, vv.<sup>30, 41, 42</sup>.\* The oldest parts of the Hex. thus recognize only two trans-Jordanic tribes as receiving their territories from Moses: tdifferent Manassite clans conquer territories N. of these for themselves. Whether these state-ments, exactly as they stand, are historical, is doubtful: it is remarkable that in Jg 10<sup>3-5</sup> the 'tent.villages of Jair's are represented as deriving 'tent-villages of Jair' are represented as deriving their name from Jair, a Gileadite, who was one of the Judges : hence it is very probable that the con-quest of Jair is ante-dated in Nu 32; and in fact,

\* V.40 must be a later addition : not only is it out of place \* V.40 must be a later addition: not only is it out of place after v.30, but 'their tent-villages' (CMTTD) in v.41, which can refer only to the 'Amorites' of v.30, shows that once v.41 must have immediately followed v.30. The intention of the addition is evidently to legitimize the conquest of Machir, by repre-senting it as sanctioned by Moses.  $\dagger$  V.33, in which, for the first time in the chapter, the 'half-tribe of Manasseh' is mentioned, seems plainly to be a later addition, made for the purpose of harmonizing the passage with the representation of Dt and P.

## MANASSEH

if v.<sup>40</sup> (see note \* above) be disregarded, we have in vv.<sup>40</sup>. <sup>41</sup> (Dillm.) 'a good historical account of the gradual advance of Manassites into the territory E. of Jordan, though not under, but after Moses.' By the Deut. writers, a large part of the territory E. of Jordan, viz. 'the rest of Gilead (i.e. the half of Gilead N. of the Jabbok \*), and all Boshan even all the period of A Doub' (Dt 211t) is Bashan, even all the region of ARGOB' (Dt 313 +), is Desingu, even all the region of ARGOB' (Dt 3<sup>13</sup> †), is said to have been given specifically by Moses to 'the half-tribe of Manasseh' (cf. Dt 29<sup>6</sup>, Jos 12<sup>6</sup> 13<sup>8</sup>. [LXX, Dillm.] <sup>20</sup> 18<sup>7</sup> 22<sup>7</sup> : ‡ for Bashan, also, as belonging to Manasseh, Dt 4<sup>40</sup>, Jos 20<sup>8</sup> 21<sup>6</sup>. <sup>21</sup>). The same half of the tribe is in Jos 1<sup>13</sup> 4<sup>13</sup> (D<sup>2</sup>) also represented as crossing cover to represent to action with represented as crossing over Jordan, together with Reuben and Gad, to assist the other tribes in the conquest of Canaan: § Jos 22<sup>1-6</sup> describes the blessing with which Joshua sent them away to their homes, when they had discharged this task. According to Jos 22<sup>9-34</sup> (probably from a special source, allied to P), the half-tribe took part with Ranhan and Gad in building the alter to be too Reuben and Gad in building the altar by Jordan, which so nearly led to a rupture between the E. and W. parts of Israel.

All these statements relate to the part of the tribe settled E. of the Jordan. There was, however, another part settled W. of the Jordan ; and J's description of the territory belonging to this, and of the manner in which it enlarged the lot and of the manner in which it enlarged the lot originally assigned to it, is preserved (imperfectly) in Jos 17<sup>1b. 2.5.98, 20b-18</sup> (taken in connexion with  $16^{1-3.9\cdot10}$ ). In J's account of the conquest, the two divisions of the tribe, Ephraim and Manasseh, are treated as one ( $16^{1}$  17<sup>17</sup> 18<sup>3</sup>, Jg 1<sup>2z. 21. 30</sup>, where note the expression 'House of Joseph'); they receive accordingly a single 'lot' ( $16^{1}$ ; cf. 17<sup>14</sup>), the borders of which are defined in  $16^{1-3}$ : the N. border—which would be the N. border of Man-asseh—is now missing. Jos 17<sup>1b-3</sup> describes how the Manassite clans were distributed : Machir had the Manassite clans were distributed : Machir had Gilead and Bashan; the other clans (Abiezer, Helek, Asriel, Shechem, Hepher, and Shenida) were settled (it is implied) in W. Palestine.  $Vv.^{8}$ . of W. Manasseh : all, however, that these fragments state is that Tappnab, on its S. border, belonged to Ephraim, and that on the N. the towns of Beth shean, Ibleam, Dor, En dor, ¶ Taanach, and Megiddo, though actually in the territories of Lorenberg and Actor is belonged in fast Takanach, and Megiddo, though actually in the territories of Issachar and Asher, belonged in fact to Manasseh, but that the Canaanites maintained their ground in them (vv.<sup>11-13</sup>, with verbal dif-ferences,  $= Jg 1^{27-28}$ ). The historical significance of this statement is that on the N. Manasseh was confined to the mountains and 'cut off from the fertile plain of Esdraelon and the tribes which struggled for a foothold beyond it in Galilee by a chain of fortified cities guarding the passes,'-Beth-shean being in the Jordan Valley on the east, Ibleam, Taanach, and Megiddo in the centre, where the central highlands slope down into the plain, and Dor on the seacoast, about 15 miles S. of Carmel. Therefollows(vv.<sup>14-18</sup>) the curious narrative describing how the children of Joseph (i.e. Ephraim and Manasseh together), finding the hill-country insufficient for them, and being unable to make their way into the plain on the N. on account of the Canaanites, with their 'chariots of iron,' com-

\* Cf. Jos 122 18 1331 : the other, southern 'half,' belonged to Gad (Ut 3<sup>13</sup>).  $\dagger$  Vv.14. <sup>15</sup> are repetitions (in substance) of Nu 32<sup>41.40</sup>, and are. indeed, most probably a later insertion in the original text of Dt (see Dillm.). : So also in P, Jos 13<sup>59</sup> 14<sup>3</sup>.  $\ddagger$  In Nu 32 the command to do this is laid upon Reuben and Gad; but nothing is said about its being laid upon the half-tribe of Manasseh. I On vv.5.6 see Dillmann.  $\P$  The clause relating to En-dor is, however, omitted in LXX and in Jg 1<sup>27</sup>; and its originality is questioned by Dillm., Budde, *Ri. u. S.* p. 13; Moore, *Judges*, p. 46.

# MANASSEH

plain to Joshua; and are advised by him in reply, if they are the great people that they claim to be, to go up into the mountains and cut down the forest there—i.e., apparently, augment their avail-able territory by clearing the large thickly wooded areas which it still contained (Stade, Gesch. i. 163; Dillm.)-and (v.<sup>186</sup>) apply themselves more vigor-ously to expel the Canaanites. Fragmentary, Fragmentary, and in parts obscure, as these notices of JE are, they nevertheless show clearly how imperfectly, for long after the Israelites first entered into Canaan, the W. half of Manasseh—in this re-spect, indeed, not differing from many of the other tribes (Jg 1)—obtained possession of its territory.

The passage is undoubtedly obscure ; and Budde (ZAW, 1887, p. 123 ff. = Rt. u. S. 1890, pp. 33 ff., 87), questioning this explanation of the 'forest,' and developing further the opinion already ex-pressed by previous scholars (e.g. Ewald, Hist. ii. 281, 200 f., 307, 321, 322; 'Wellh., Hist. 445; Stade, Gesch. i. 149), that the E. half of Manasseh was really, at least in part (Ewald), a colony thrown out by the W. branch of the tribe, after its settlement in Canan, conjectured that Jos 1714-19 referred originally to this undertaking, and that v.<sup>13</sup> read originally 'but the hill-country of Giasa shall be thine,' urging in support of this view that the children of Joseph could not have complained that they had only 'one lot,' if besides their W. territory they had already received from Moses a territory E. of Jordan; and afterwards (ZAW, 1888, p. 148, Rt. u. S. pp. 881, 60, 87) adopted the suggestion of Valeton that Nu 329-41.43 one followed Jos 1714-13, and described how the permission then given by Joshua was acted upon. The conjecture is an attractive one, but too bold, esp. in the transposition assumed for Nu 3294.44, to be accepted with any confidence: had this, moreover, been the original sense of the passage, some allusion to crossing the Jordan ('get thee over' rather than 'get thee up' in v.<sup>13</sup>, for instance) might have been expected (cf. also HGHL p. 577 n.) Nevertheless, whether Budde's view of these pa-sages be accepted or not, Jg 514 (see the last paragraph of this art.) undoubtedly lends probability to the opinion that the Manassites on the E. of Jordan were really immigrants from the West.

Of the later history of the tribe little specific is known. It played no prominent or distinctive part in the history of the nation. From the wild and exposed character of the district which the E. half of the tribe occupied, it may be inferred that its members were a brave and hardy race, able to maintain their own in the face of opposition (cf. Jos  $17^1$ , Machir a 'man of war,' and 1 Ch  $5^{18-22}$ , the narrative of a successful enterprise in which the E. Manassites took common part with Reuben and Gad against the Hagrites and other neighbouring tribes). Gideon in W. Manasseh (Jg  $6^{15}$ , cf. v.<sup>30</sup>), and (probably) Jephthah in E. Manasseh (Jg 11<sup>1</sup>, cf. v.<sup>30</sup>), were brave and distinguished members of the tribe. The strong Israelitish feel-ing which characterized 'Gilead' (including E. Manasseh), and the keen sense of common interests runnassen), and the keen sense of common interests which bound it closely together with its brethren W. of Jordan, are well brought out by G. A. Smith (*HGHL* 578 ff.). 'The story of Jephthah throbs with the sense of common interest between (filead and Ephraim.' Jabesh-gilead, romantically con-nected with the history of Saul (1 S 11. 31), was in all probability in E. Manasseh (about 20 m. S. of the Sea of Galilee). The tribe is specified by of the Sea of Galilee). The tribe is specified by name in the Blessing of Moses, though characterized as less numerous than Ephraim (Dt 33", the 'ten thousands of Ephraim,' and the 'thousands of Manassch'). Different districts of Manasseh (both E. and W.) are mentioned in 1 K 4<sup>11-13</sup> as supplying provision for Solomon's court during three months of the year. One city of refuge, Golan, was in E. Manasseh (Dt  $4^{s3}$  *al.*). The tribe suffered severely during the Syrian wars (Am 1<sup>3</sup>, 2 K 10<sup>s3</sup>; cf. 8<sup>12</sup> 13<sup>7</sup>). It is implied in 2 K 15<sup>29</sup>, and stated expressly in 1 Ch 5<sup>26</sup>, that the E. Manassites were included among the trans-Jordanic Israelites transported by Tiglathpileser to different places in the Assyrian empire. The statements in P respecting the numbers of the MANASSEH

tribe at the time of the Exodus (32,200 at the first census Nu 1<sup>36</sup>, and 52,700 at the second census Nu 2<sup>30</sup>) and (Nu 2<sup>30</sup>) its position in the camp (W. of the tabernacle, between Ephraim and Benjamin), and on the march (behind the tabernacle), have no historical volume the numbers of the Marceite and on the harden (behind the tabernatic), have no historical value; the numbers of the Manassite warriors who, according to 1 Ch 12<sup>31, 39</sup>, attended at the time of David's coronation at Hebron, are equally unhistorical. For other scattered notices of the tribe, see Is 9<sup>21</sup>, Ps 60<sup>7</sup> = 108<sup>8</sup>, 1 Ch 9<sup>3</sup> (in the post-exilic community) 26<sup>32</sup> 27<sup>30, 21</sup>, 2 Ch 15<sup>9</sup> 30<sup>1, 16, 11, 18</sup> 31<sup>1</sup>.

ii. The borders of the territory occupied by either the W. or the E. half of Manasseh cannot be fixed with precision. Of the W. half, the N. boundary seems to have been approximately the imperfectly defined line, where the hills slope down into the plain of Esdraelon, touching Asher and Issachar (Jos 17<sup>10b</sup>); on the W. the border was the sea; on the S. it began (on the W.) with the Wddy Kanah, perhaps (but see KANAH) a wady running up from the W. in the direction of Shechem, at about 32° the W. in the direction of Shechem, at about  $32^{\circ}$ 8'-10' N., then, crossing this wady to the S., it passed along by 'Tappuah (unknown) and Mich-methath 'in front of (i.e. E. of) Shechem 'to Asher, according to the Onom. (222. 93), a village 15 miles N.E. of Shechem, on the road to Beth-shean, thence (to judge from  $16^{6.7}$ ) it turned back sharply to the S. and passed down by Taanach-shiloh (7 miles S.E. of Shechem) and Naarah (in the Jordan Valley, 5 miles N. of Jericho), as far as Jericho itself; the E. border was the Jordan. The E. half of the tribe possessed, starting from the border city Ident; the L. border was the Jordan. The L. half of the tribe possessed, starting from the border city Mahanaim (ib. vv.<sup>30, 30</sup>, site uncertain; but near the Jordan, and probably not far N. of the Jabbok Gn 32<sup>2</sup>, cf. vv.<sup>10, 22</sup>), 'half-Gilead' (Jos 13<sup>31</sup>), i.e. the half N. of the Jabbok (see above) and all BASHAN -the whole comprising the well-wooded and (especially in its N. part) remarkably fertile tract of country stretching out northwards nearly to Hermon (the kingdom of Og, Jos 12<sup>1b. 5</sup>; cf. 1 Ch

 5<sup>23</sup>).
 iii. The clans and subdivisions of Manassch. —
 In the enumeration of these there is much diversity; the different schemes will be apprehended most clearly if presented in tabular form. 1. In J, then, we have the following genealogy  $(Jos 17^{1b-2})$ —

\* Jg 124 is, however, an uncertain passage to rely upon in support of this opinion; see Moore, ad loc.

\* Pointed Day, not (like the name of the place) Day.

232

MANASSEH

Zelophehad is also mentioned as the 'second' son of some one, whose name does not appear, and it is said that he had daughters: the sons of Shemida' are also enumerated, viz. Ahian, Shechem, Likhi, and Anïam; but the text is evidently either corrupt or defective; and what place Zelophehad and Shemida' held in the genealogy is not clear, though Berth. and Kuenen think that Zelophehad is meant to be the second son of Manasseh.

4. There is, lastly (1 Ch 221-23)-

It is impossible to harmonize these conflicting schemes: it is manifest that they are different attempts to correlate and account for the principal clans of Manasseh, or for the names of districts colonized by it.† Gilead is 'son' of Machir, simply because the country was occupied by Machirite clans. Abi'ezer is mentioned in Jg 6<sup>11, 24, 28</sup> 8<sup>3, 28</sup> as the family, or clan, to which Giledon belonged: the other names, Helek, Asriel, etc., do not occur except in the passages cited. The only point on which the schemes all agree is in representing Machir as 'son' of Manasseh, and as 'father' of Gilead. In other respects the conspicuous difference is that, according to J, Machir is the eldest son of Manasseh, and the other clans, Abi'ezer etc., are coordinated with him as his brethren; whereas in P Machir is Manasseh's only son, and the six clans, Abi'ezer, etc., are represented as being his descendants, and in fact descended from him through his son 'Gilead.' Thus, as regards Machir, three stages seem to be discernible in the manner in which he was viewed. (1) In Jg 5<sup>14</sup> he represents the West half of Manasseh. (2) In J (Jos 17<sup>10-2</sup>, Nu 32<sup>39</sup>) he is the ancestor of the principal part of the East half of Manasseh, his brother clans being located, it is implied, on the W. of Jordan. (3) In P (Nu 26<sup>207</sup>, he is the ancestor, through his son 'Gilead,' of all the Manassites, Eastern and Western alike.

Accordingly, Jos 13<sup>31b</sup> ('even for,'etc.), restricting what is said in v. of *all* the Machirites to half of them, is (Kuen., Dillm.) a correction of v.<sup>31a</sup>, made for the purpose of harmonizing it with the representation of P (according to which, as Machir was Manasseh's only son, the E. half of the tribe could form only a part of his descendants).

To low line working with the descent of the line of the law (bertain, and the law of Hebrew inheritance, are, no doubt, historical personages; but among their ancestors there appears, in P, the name of a country (cf. Jg 11<sup>1b</sup>).

# MANASSES (PRAYER OF)

It is hardly possible to interpret with confidence the historical significance of these variations; but it is possible that the variation between Jg 5<sup>14</sup> and 1 may point to the fact that between the age of Deborah and that of J Gilead had been conquered by inmigrants from the tribe of Manasseh settled on the W. of Jordan; \* and that the representation of P may imply that (vol. ii. p. 129°), 'holding Gilead to have been first conquered, as represented in the Hex., he regarded the W. Manassites as offshoots of the E. Manassites.' In 3 the statement that Manasseh's concubine was an Aramitess may be an indication that there was an admixture of Aramean blood in the tribe, especially in its Eastern half; Ma'acah, Machir's 'wife' (1 Ch 7<sup>16</sup>), also suggests some connexion with the Aram. tribe of Ma'acah, in the same neighbourhood (Dt 3<sup>14</sup>, Jos 13<sup>13</sup>, 2 S 10<sup>6</sup> al.). In 4 the connexion with a clan of Judah, assumed for Jair, is remarkable.

LITERATURE.—See, in addition to the authorities quoted (esp. Dillm. on Nu 3239-43, and Jos 16-17), Kuenen's essay on the tribe of Manasseh, in TAT, 1877, p. 478 ff.; and cf. art. GENS-ALOGY in vol. ii. p. 129 f. S. R. DRIVER.

**MANASSES** (Marasoff B, -fr A).—1. 1 Es  $9^{32}$  = MANASSEH, No. 4. 2. Judith's husband, Jth 8<sup>3</sup>. 3. An unknown person mentioned in the dying words of Tobit as one who 'gave alms and escaped the snare of death' set for him by Aman (To 14<sup>10</sup>, AV and RV, following LXX B Marasoffs). The text of  $\aleph$ ,  $\ell\tau$   $\tau\tilde{\mu}$  maifrad  $\mu\epsilon$  (sic)  $\ell \lambda \epsilon \eta \mu \sigma \sigma \eta s$ ). The text of  $\aleph$ ,  $\ell\tau$   $\tau\tilde{\mu}$  maifrad  $\mu\epsilon$  (sic)  $\ell \lambda \epsilon \eta \mu \sigma \sigma \eta s$ ). The text of  $\aleph$ ,  $\ell\tau$   $\tau\tilde{\mu}$  maifrad  $\mu\epsilon$  (sic)  $\ell \lambda \epsilon \eta \mu \sigma \sigma \eta s$ ). The text of  $\aleph$ ,  $\ell\tau$   $\tau\tilde{\mu}$  maifrad  $\mu\epsilon$  (sic)  $\ell \lambda \epsilon \eta \mu \sigma \sigma \eta s$ ). The text of  $\aleph$ ,  $\ell\tau$   $\tau\tilde{\mu}$  maifrad  $\mu\epsilon$  (sic)  $\ell \lambda \epsilon \eta \mu \sigma \sigma \eta s$ ), where the subject understood is Achiacharus, maintains the parallelism with the preceding clause, from which it repeats also the name $Nada<math>\beta$  instead of 'Aµd\tau of A, or 'Addµ of B (cf. 11<sup>16</sup>, where B reads Na\sigma $\beta \delta s$ ,  $\aleph$  Na $\beta \delta \delta$ , as the name of the ungrateful nephew of Achiacharus). Cosquin in *Rev. Biblique*, Jan. 1899, p. 52 f., argues strenuously in favour of the reading of  $\aleph$  in To 14<sup>10</sup>, holding that Marasoffs is due simply to a scribal error. See, further, NASBAS, TOBIT. **4.**=MAN-ASSEH king of Judah in title of apocr. book. See following article. J. A. SELBIE.

**MANASSES** (**PRAYER OF**).—In place of the remote threats against Manasseh in 2 K  $21^{11-15}$  we have in 2 Ch  $33^{11-13}$  an account of his just punishment for his sins by captivity, his repentance and restoration; and in vv.<sup>15, 19</sup> the statement that other details of his life and his *prayer* were recorded in the Acts of the Kings of Israel, and in the History of Hozai (or the Seers). Does the Greek Prayer of Manasses of our Apocrypha go back to this Prayer in the lost sources (or source) of Ch as its Hebrew original; or is it a free Greek composition suggested by Ch? Budde, after Ewald, argues for the former view (ZAW, 1892, p. 39 f.), and Ball (in Speaker's Com.) thinks it probable. Fritzsche (*Exeg. Handb. zu d. Apok.* i. 157) favoured the latter view, on the ground that the Greek is not a translation (so Schürer).

The Prayer stands among the Canticles appende 1 to the Psalter in some MSS of LXX. Swete (iii. 802 ff., cf. ii. pp. ix, xi) prints A with variants of T (*Psalterium Turicense*). It is never found in LXX of 2 Ch, and is often missing in Greek Psalters which include the Canticles. It is found in the *Apost. Const.* ii. 22. Nestle (*Septuaginta Studien*, iii. 1890) argues that the text of our MSS A and T comes from the *Apost. Const.* or from its original, the *Didascalia*, and that the Prayer is not, as hitherto supposed, cited in these works from a MS of LXX. It appears in the *Const.* in connexion with the entire story of Manasseh as ' written in 4 K

\* So Ewald, Wellh., Stade, and Budde, as cited above; Moore, Judges, pp. 1501., 2741.; Kittel, Gesch. ii. 69 [Eng. tr. ii. 761.]: see also art. HAVVOTH-JAIR.

<sup>•</sup> Asriel in v.14 seems to be a corrupt anticipation of the following words, πτ, τρα (Berth., Kittel, Oettli, al.).

# MANASSES (PRAYER OF)

and 2 Ch.'\* We read that Manasseh was bound with iron in prison, that bread made of bran and water mixed with vinegar were given him in scant measure, and that in such straits he humbled himself before God and prayed. After the Prayer the narrative proceeds : 'And the Lord heard his voice and had compassion upon him. And there came a flame of fire about him, and all the irons came a name or nre about him, and all the irons which were about him were melted: and the Lord healed Manasseh from his affliction,' etc. Julius Africanus knew that 'while M. was saying a hymn his bonds burst asunder, iron though they were, and he escaped' (John Damasc. Parall. ii. 15). He may therefore have read the Prayer in this setting.<sup>+</sup> If it was written in this connexion, its anthor showed more liturgical sense than his its author showed more liturgical sense than historical imagination; for the allusions to Manasseh's situation are hardly more explicit than might be found, for example, in Ps 107<sup>10-16</sup>.

Jewish traditions show no knowledge of our Prayer, though they add details to the story of Ch. Manasseh was put into an iron mule, be-neath which a fire was kindled. He prayed to the idels which a bed conved and at last to the Cud idols which he had served, and at last to the God of his fathers. 'Lord of the universe, wilt thou allow the man who has served idolatry and put an idol in the court of the temple to repent?<sup>4</sup> God answered, 'If I do not receive his repentance that will shut the door to all penitents' (Jerus. Sanhed. x. 2. See also Midr. rab. Dt 2 and Midr. rab. Ru 214; cf. Midr. rab. Lv 30). The story of Manasseh's conversion was rather a problem than a comfort to the Rabbis, and the Mishna (Sanhed. x. 2) decides that he was restored only to his king-dom, not to his part in the world to come (but cf. Gemara). So in Apoc. Bar 64, where the tradition is already known that 'he was cast into the brazen horse, and the horse was heated'; though 'his prayer was heard,' yet the fire from which God then delivered him was only a sign of the fire with which the same God would afterwards torment him.

boes our Prayer itself contain any evidence which indicates a Hebrew or a Greek original, an early or a late date ?

The petitioner calls on the Lord almighty, heavenly (cf. 3 Mac  $6^{25}$ ), 'the God of our fathers, Abraham, Isaac, and Jacob, and of their righteous seed,' who created heaven and earth and bound and sealed the ocean (cf. Job 38<sup>8-11</sup> etc.), whose glory all things fear, and whose anger is toward sinners  $(vv.^{1-5})$ ; who is yet a God of compassion and repents of evils  $(=J1 2^{135}, Jon 4^{25})$ . [In his goodness he has appointed to sinners repentance into advation (Surte (477)) or ited by the sinners (but the unto salvation (Swete (AT) omits)]. But 'the God of the righteous has not appointed repent-God of the righteous has not appointed repent-ance to the righteous, to Abraham, Isaac, and Jacob, who have not sinned,' but 'to me the sinner' (vv.<sup>6-9</sup>). He confesses his sins, for which he is bowed down by many an iron band (cf. Ps  $107^{10}$ ), especially his setting up abominations and multi-plying offences. With humble confession he prays for forgiveness and salvation from death, since 'cad is 'the Cod of the penitent' and can show all God is ' the God of the penitent,' and can show all His goodness only toward the unworthy (vv.<sup>9-15</sup>).

This is a fine penitential prayer, deserving its ancient place in the Christian Psalter, casting a favourable light on the age and community that produced it. That it is Jewish there can be no donbt[but see Swete in *Expository Times*, xi. (1899) p. 38 f.]. But the Greek nowhere requires a Hebrew original, though it cannot be said to exclude its possibility. The belief that through repentance

<sup>a</sup> The passage is made up about as follows: 2 K 20<sup>21</sup>-21<sup>16</sup>, 2 Ch 83<sup>11</sup>, addition, 33<sup>12</sup> <sup>126</sup>, Pr. Man, add., 33<sup>125</sup>, add., 33<sup>15</sup>.<sup>16</sup>. <sup>326</sup>-<sup>32</sup>. There follows a Midrashic form of the story of Amon's reign. † Cf. later references in Fabricius, Biblioth. grosc., ed. Harles,

a sinner can gain forgiveness is contained as clearly in the story of Manasseh in Chron. as in the Prayer, and does not point to a time 'not long before the Christian era' (Westcott in Smith's DB). It has, indeed, deep roots in the OT. There the hope for forgiveness and grace sometimes rests on the forgiving nature of God as Ex 34<sup>6.7</sup> proclaims it,\* sometimes more directly on the merit of the fathers, or God's promises to them.<sup>+</sup> The efficacy for sinners of the merit of the righteous was early disputed (Gn 18<sup>-36</sup>, Jer 15<sup>1</sup>, Ezk 14<sup>14. 20</sup>), but the tendency of rabbinical Judaism was to put chief stress upon it (cf. Mt 3"; Weber, Die Lehren d. Talmud, § 63; Ass. Mos. 39 42-5 11<sup>17</sup>), while Hellenistic Judaism was less national and more ethical in character.

This suggests a test by which our Prayer may be judged. It is a mistake to find in it an appeal to the merit of the patriarchs. They are simply the righteous, toward whom and toward their righteous seed, God is only just. The sinner cannot appeal to them, but only to that quality of the Divine nature, compassion, which has no application to the righteous. It is only as a repentant sinner, not as a Jew, that the petitioner appeals to God. The only distinction recognized is that between the righteous and sinners, but God is believed to be 'the God of the penitent' as well as 'the God of the righteous.' It was Well as "the God of the righteous." It was Hellenistic Judaism that regarded the patriarchs chiefly as examples of righteousness (4 Mac  $2^{2.17-19}$  $3^{6\pi}$ .  $16^{29-23}$ ; Philo, de Abra. etc.; see also contrast between Sir 44-49 and Wis 10-19). The Book of Wisdom bases forgiveness only on the nature of God ( $11^{22}-12^{2.10.11}$ .  $15^{-19}$ ); and a book in which rab-binical and Hellenistic elements are writed or binical and Hellenistic elements are united expresses just the thought of our Prayer, 'because of us sinners thou art called merciful,' etc. (2 Es  $8^{\pm 0-36}$ ). These considerations favour the view that our book is not a translation of the old Hebrew prayer in the source of Chron., but a Hellenistic composition. The date cannot be determined, but the eschatology of the expressions, 'Do not con-demn me in the lowest parts of the earth'; 'I will praise thee always in the days of my life,' seems early rather than late.

The Prayer was not revised by Jerome, and is not in the Vulgate canon. According to Nestle, it may be said to owe its rank as a semi-biblical book to Luther, since before him it appears in no list of canonical or apocryphal books. It is not found in many editions of the LXX. Details in regard to texts and editions are given by Nestle. Cf. APOC-RYPHA.

LITERATURE.—Text.—Fritzsche, Lib. Apocr. VT, and Swete, OT in Greek. Bee also Nestle, Scptuaginta Studien, iii. 1809. Commentaries.—Fritzsche (1851), C. J. Ball (Speaker's Com. 1888). Bee also V. Ryssel's translation of the Prayer (with critical and exception notes) in Kautzch's Apocrypten u. Pseudepigraphen d. AT, 1809. F. C. PORTER.

MANDRAKE (μανδραγορών, μανδραγορών, μανδραγοραί, mandragoræ).—The Heb. word (in Gn 30<sup>145</sup>., Ca 7<sup>13</sup>) means 'love plants.' The ancient VSS agree in translating the word 'mandrake.' Numbers of other plants have been suggested, as bramble-berries, Zizyphus Lotus, L., the sidr of the Arabs, the banana, the lily, the citron, and the fig. But none of these renderings is supported by satis-factory evidence. The mandrake, Mandragora officinarum, L., is a plant of the order Solanacca, called by the Arabs luffah, or beid el-jinn (i.e.

genie's eggs'). The parsley-shaped root is often \* e.g. Hos 615-64, Jer 187-10, Ezk 18, S310-30, 18 6564 7, 17 212-14, Jon 26-10, Ps 32, 51, 86 (8, 15) 103(6) 130, 1455, Sir 211 1734-39 1811-14 292.

207-9, Ps 105, Neh 9, Lk 164 55, 72L. The two appeals are united in Mic 718-30, Dn 98-19.

234

## MANEH

branched. The natives mould this root into a rude resemblance to the human figure, by pinching a constriction a little below the top, so as to make a kind of head and neck, and twisting off the upper branches except two, which they leave as arms, and the lower, except two, which they leave as legs. This root gives off at the surface of the ground a rosette of ovate-oblong to ovate, wrinkled, crisp sinate dentate to entire leaves 6 to 16 in crisp, sinuate-dentate to entire leaves, 6 to 16 in. long, somewhat resembling those of the tobaccoplant. There spring from the neck a number of one-flowered nodding peduncles, bearing whitish-green flowers, nearly 2 in. broad, which produce globular, succulent, orange to red berries, resem-bling small tomatoes, which ripen in late spring. The ancient sused the madrake as a love philtre (Gn  $30^{14-16}$ ). They believed that he who in-cautiously touched a root of it would certainly die. Josephus (*BJ* VII. vi. 3) gives the following directions for pulling it up. 'A furrow must be dug around the root until its lower part is exposed, then a dog is tied to it, after which the person tying the dog must get away. The dog then endeavours to follow him, and so easily pulls up the root, but dies suddenly instead of his master. After this the root can be handled without fear.' The ancients also believed that this root gave a demoniacal shriek as it was pulled up. The 'smell' of the mandrakes (Ca  $7^{13}$ ) is the heavy The narcotic odour of the Solanaceous plants. The allusion to it in this connexion doubtless refers to its specific virtues. G. E. Post.

#### MANEH.—See WEIGHTS AND MEASURES.

**MANES** (Mdrys, AV Eanes, due to a misprint 'Hdrys for Mdrys in the Aldine ed.), 1 Es  $9^{21}$ .—One of those who agreed to put away their 'strange' wives. RVm identifies the name with Harim in Ezr  $10^{21}$ ; more probably, perhaps, it takes the place of the two names Maaseiah, Elijah.

**MANGER.**—The NT tr. of  $\phi 4\tau r\eta$  in three places out of the four where the word occurs (Lk  $2^{7.12}$ .<sup>16</sup>), and in RVm of the fourth (Lk 13<sup>15</sup>, where 'stall 'is in the text). The chief OT Eng. equivalent is 'crib,' Heb. 'cbds (fattening - place), LXX always  $\phi d\tau r\eta$ (Job 39<sup>9</sup>, Pr 14<sup>4</sup>, Is 1<sup>3</sup>); while  $\phi 4\tau r\eta$  is also the LXX rendering (once in each case) of 'urwach ('collecting-place' or 'collected herd'), AV and RV 'stall,' 2 Ch 32<sup>25</sup>; of repheth (not occurring except at Hab 3<sup>17</sup>, but probably=Arabic raffat, 'herd' or 'stall'), AV and RV 'stall'; and, possibly, of bclil ('food'), AV and RV 'fodder,' Job 6<sup>5</sup>, if the Heb. be not represented rather by the otherwise superfluous  $\beta \rho \omega \mu a \tau$ . It seems clear (from such a parallelism as in 2 Ch 32<sup>26</sup> 'stalls for all manner of beasts and *folds* (lit. treasure-houses) for flocks,' and likewise from such companionship as in Pr 14<sup>4</sup> 'where no oxen are, the crib is clean'), that, like the Latin prasepe and our crib,  $\phi 4\tau r\eta$ in the LXX signified not only, as in classical Greek, a manger, but also, metonymically, the stall containing the manger; an extension due immediately, perhaps, to some of its Heb. originals.

This ambiguity in the meaning of  $\phi d\tau \nu \eta$  would be of small moment but that it affects the story of the Nativity. Did the mother of our Lord lay her babe in a manger or in a stall? And is the very early tradition that the birth took place in a cave inconsistent with the NT narrative? These questions cannot be decisively answered either (as has been shown) from the word itself, or from the context, or from our knowledge of the customs of the time. There is an ambiguity about  $\kappa a\tau d\lambda \nu \mu a$ , 'the inn' (AV and RV), as well as about  $\phi d\tau \nu \eta$ . This was not an inn in the modern sense of the term, nor apparently even such an approximation to it

## MANGER

as the more regularly organized mardoxcior of Lk 10<sup>24</sup>, with its *xarboxevs*, host or managing attendant, who provided necessaries and was paid for them. All that we can be sure of as to  $\kappa a \tau a \lambda v \mu a$  is that it was a resting-place where animals were relieved of their packs (*karaliw*, 'I let down'), and where travellers ungirded their garments. But Lk 22<sup>11</sup>, Mk 14<sup>14</sup> (cf. Swete), bring the word before us in another sense—that of a *guest-room* ('My *kardlupa*,' said Jesus, according to Mk), one of the rooms commonly and hospitably lent, perhaps, for the occa-sion, to parties of strangers visiting Jerusalem for the passover. For this the 'master of the house seems to have substituted, in the case of Jesus and His disciples, the more private and fully furnished for a scalar of the mode private and fully full influence data and a scalar of the sc the κατάλυμα,' our ignorance of the exact meaning of *kará*λυμa deprives us of its guidance to the exact meaning of the alternative  $\phi d\tau \nu \eta$ ; while the absence (according to the abstract's  $\psi triangle the the$ absence (according to the best documents) of the $article with <math>\phi d\tau r\eta$  leaves us at liberty to believe that the  $\phi d\tau r\eta$  was not connected with the  $\kappa a\tau d$ - $\lambda \nu \mu a$ . At first sight the antithesis seems to require that the  $\phi d\tau r\eta$  should be a kind of room corresponding to the superior  $\kappa a \tau a \lambda \nu \mu a$ , though of course the sentence may be elliptical and the manger may be picked out as the special feature

Induct of the second result of the second response of the second responding room not itself mentioned. But, if the sard $\lambda \mu \mu a$  was anything like the modern khan, it was a rest-house like those existing in the East, outside towns, as unfurnished places of gratuitous lodgment during the night for strangers, and containing (as to the ruder sort) two contiguous portions not very distinctly divided —the one for the travellers, and the other for their animals; and (as to the better sort) a central (usually roofless) court, with cells for travellers opening out upon it, and, beyond these, just within the outside wall, stalled places for the beats of burden. If this be so, then Joseph and Mary, finding the travellers' portion full, probably abode in one of these stalled places, and the babe was laid either in the stall or in the manger belonging to the stall. Or, as Tristram suggests (Land of Israel, p. 73), they took refuge in some poor cottage close by, similar to one wherein he himself had seen a community of shelter for man and beast, the dwelling portion (to which, for one reason or another, Joseph and Mary were not invited) being an upper platform ascended by a few steps; and the lower portion being half granary half stable, and containing a long earthen trough which served for a manger. Tristram's suggestion has this additional element of probability, that, if the rest-house was full, the stalled places

that, if the rest-house was full, the stalled places attached to it were likely to be full also. The tradition that Jesus was born in a cave near Bethlehem is at least as early as the first decade of the 2nd cent., and is found in Justin (Trypho, 78), in the Arabic Gospel of the Infancy (c. 2, p. 181, Tisch.), in Origen (c. Cels. i. 51), who says that the cave and the manger were shown in his day,—in Epiphanius (Hær. li. 9) and in Eusebius (Vita Constant. iii. 43, Dem. Er. vii. 2). The cave as the place of birth is mentioned also in the Protevangel of James (c. 18), but in c. 22 the swaddling and the 'crib for oxen' are referred to the time of the massacre of the Innocents, and the crib (the Bahe's hiding-place) is not connected in any way with the cave, while neither here nor in the Gospel of the Infancy is the cave connected with an 'inn.' Eus. and Epiphan. (see Nestle, Vita Prophetarum, p. 8) both affirm that the cave story appears in Luke, while Anastasius of Sinai (Vix dux, c. 1, p. 6) assigns it to 'unwritten' tradition. Resch (Texte, x. 3) sees in the una-

nimity of the cave tradition a sign that it belongs to the original source of the Infancy history, and from the varieties of phraseology in the Greek narratives he conjectures that this source was narratives he conjectures that this source was Hebrew. It has been suspected (with what proba-bility it is impossible to say) that the cave story grew out of the prophecy, Is  $33^{16}$  ('He shall dwell in a lofty cave,' LXX), just as the prophecy in regard to Shiloh, Gn 49<sup>11</sup>, led to the later addition in Lk 19<sup>50</sup> ('a colt tied to a vine'). See Justin, Apol. i. 32. Thomson, Land and the Book (vol. on Central Palestine and Phaenicia, p. 35) says that many inns or khans have caverns below them, where cattle are sheltered and where huilt along where cattle are sheltered, and where, built along the walls, are stone mangers which, 'cleaned out and whitewashed as they often are in summer when not required for the animals, would make suitable cribs in which to lay little babies.' He does not, however, say that he ever saw any little babies in them except his own. Over such a grotto, near Bethlehem, called the Grotto of the Nativity, now stands the Church of St. Mary ; and the grotto contains a manger; but (adds Thomson) ' the real manger was transported to Rome.

MANI (Marl), 1 Es 930 = BANI, Ezr 1029, as he is called in 1 Es 512 (Barel).

MANIFEST .- The verb to 'manifest' is used actively, passively, and reflexively. The active use is seen in Ec  $3^{18}$  (the only occurrence of the word in OT), 'I said in mine heart concerning the estate of the sons of men, that God might manifest them, and that they might see that they them-selves are beasts' (גרָרָם), RV 'that God may prove them'); and Jn 17<sup>6</sup> 'I have manifested thy name them'); and  $\ln 1/c^{-1}$  have manifested thy name unto the men which thou gavest me out of the world' ( $e\phi a * e\rho \omega \sigma a$ ; RV 'I manifested'). In Jn 2<sup>11</sup> AV has 'manifest forth' ('manifested'). In Jn 2<sup>11</sup> AV has 'manifest forth' ('manifested'). It is glory') for the same verb, RV 'manifested.' It is a favourite verb with St. John, occurring 9 times in the Gospel and 9 times in the First Epistle, which era provide helf it occurrences in NT. 'The which are nearly half its occurrences in NT. The AV usually renders it 'manifest' or 'make mani-fest,' but also 'appear' (Mk 16<sup>12, 14</sup>, 2 Co 5<sup>10</sup> 7<sup>12</sup>, Col 3<sup>4</sup>, He 9<sup>26</sup>, 1 P 5<sup>4</sup>, 1 Jn 2<sup>20</sup> 3<sup>3</sup>, Rev 3<sup>18</sup>), 'shew' (Jn 7<sup>4</sup> 21<sup>1</sup>), and 'manifestly declare' (2 Co 3<sup>3</sup>). RV everywhere has either 'manifest' or 'make manifest.' The reflexive use of the verb 'to manifest' is found in Jn 14<sup>21.22</sup>; the passive is more common. The past ptcp. is twice 'manifest' in-stead of 'manifested,' viz. 1 Ti 3<sup>16</sup> 'God was manifest in the flesh' ( $\theta\epsilon \delta s \ \epsilon \phi a r \epsilon \rho \delta \eta \ \epsilon r \ \sigma a \rho \kappa i$ ; RV, reading  $\delta s$  for  $\theta\epsilon \delta s$ , 'He who was manifested in the flesh'); and 1 P 1<sup>20</sup> 'who verily was foreordained before the foundation of the world, but was manibefore the foundation of the world, but was mani-fest in these last times for you'  $(\phi^{\alpha\nu\rho\rho\omega\theta\ell\nu\tauos}, RV)$ 'was manifested'). The meaning is not exactly the same as now, if indeed we use the verb 'to manifest' at all. It is to uncover, lay bare, reveal. Cf. Cromwell (in Prolegomena to Tindale's *Pent*. by Monbert, p. xlii), 'The Kinge highnes therfor hathe commaunded me to advurtyse you that is plesure ys, that ye should desiste and leve any ferther to persuade or attempte the sayde Tyndalle to cum into this realme: alledging. that therfor hathe commanded me to advurtyse you that is plesure ys, that ye should desiste and leve any ferther to persuade or attempte the sayd Tyndalle to cum into this realme; alledging, that he perceyving the malycyous, perverse, uncharyt-able, and indurate mynde of the sayd Tyndall, ys in man [er] with owt hope of reconsylyacyon in hym, and is veray joyous to have his realme

destytute of such a person, then that he should retourne into the same, there to manyfest his errours and sedycyous opynyons.' An earlier meaning—'detect,' 'disclose'—is seen in Rhem. NT, Mt 8 heading 'beyond the sea he manifesteth the devil's malice agaynst man in an heard of swine.'

The adj. 'manifest' signifies 'open to sight, uncovered (not 'evident to reason,' as now). Thus Wis  $12^{17}$  'thou makest their boldness manifest' ( $\tau \delta$  $\theta_{
hodoros} \epsilon_{\xi \in \Lambda^2 \gamma \chi \epsilon_{15}}$ ; RV 'puttest their boldness to confusion'); He 4<sup>13</sup> 'Neither is there any creature that Instant provides the state of of God are manifest, and the children of the devil (carepá éori ra réara). Cf. Shaks. I Henry VI. I. iii. 33, 'Stand back, thou manifest conspirator.'

The adv. manifestly means openly, visibly, 2 Es 14<sup>3</sup> 'In the bush I did manifestly reveal myself unto Moses' (revelues revelues sum); 2 Mac  $3^{28}$  'manifestly they acknowledged the power of God' ( $\phi a \nu \epsilon \rho \omega s$ ). Cf. Dt  $2^{78}$  Tind. 'And thou shalt write uppon the stones all the wordes of this lawe, manyfestly and well'; and Rhem. NT, Lk 8 heading 'He preacheth to the lewes in parables because of their reproduction; but to the Disciples manifestly, because he wil not for the Iewes incredulity have his cumming frustrate.

Manifestation occurs but rarely, Wis 19 'the sound of his words shall come unto the Lord for the manifestation of his wicked deeds' ( $\epsilon$ 's  $\epsilon \lambda \epsilon \gamma \chi \sigma \sigma$ ; AVm 'for the reproving,' RV 'to bring to conviction'); Ro 8<sup>19</sup> 'For the earnest expectation of the creature waiteth for the manifestation of the sons of God' ( $\pi \rho \star a \pi o \kappa \Delta \lambda \psi \nu$ , RV 'the re-vealing'); 1 Co 12<sup>7</sup> 'the manifestation of the Spirit Vealing ); i Co 12<sup>o</sup> the maintestation of the spirit is given to every man to profit withal' ( $\dot{\eta} \phi a x \epsilon \rho \omega \sigma x$ ), and 2 Co 4<sup>2</sup> (by manifestation of the truth' ( $\tau_7^{\circ}$  $\phi a x \epsilon \rho \omega \sigma \epsilon$ , RV (by the manifestation'). So Lk 1<sup>60</sup> Rhem., 'And the childe grew, and was strength-ened in spirit, and was in the deserts until the day of his manifestation to Israel.' J. HASTINGS.

**MANIFOLD** is properly 'of many kinds,' 'vari-ous,' as Howell, *Letters*, iv. 47, 'The Calamities and Confusions which the late Wars did bring bus, as howen, here,  $\lambda_{i}$ ,  $\lambda_{i}$ ,  $\lambda_{i}$ ,  $\lambda_{i}$  here chambers and Confusions which the late Wars did bring upon us were many and manifold.' And so it is used sometimes in AV: Wis  $7^{22}$  (in her is an understanding spirit, holy, one only, manifold' ( $\pi \circ \lambda_{\mu e \rho e s}$ , Vulg. multiplex); 1 P 1<sup>6</sup> 'Ye are in heaviness through manifold temptations' ( $\epsilon^{\mu} \pi \alpha_{i}$  $\kappa(\lambda \alpha s \pi e \iota_{\rho a \rho \mu o s})$ ;  $*^{410}$  'as good stewards of the manifold grace of God' ( $\pi \alpha \kappa (\lambda \eta s \chi d \rho i r \sigma s)$ ; Eph 3<sup>10</sup> 'the manifold wisdom of God' ( $\eta \pi \sigma \lambda w \sigma (\kappa (\lambda \circ s \sigma \phi \ell a, the only occurrence of this word in NT.$ See Abbott, in loc.). But elsewhere the word $mercies' (<math>\sigma \Im \Im$ , LXX  $\pi \circ \lambda \lambda o ()$ ; Am 5<sup>12</sup> 'manifold transgressions' ( $\sigma \Im \Im$ , LXX  $\pi \circ \lambda \lambda o ()$ ; Ps 104<sup>24</sup> 'How manifold are thy works' ( $\Im \Im \Im \Im$ ; LXX  $\omega s \ell \mu e \gamma a$  $\lambda \delta \nu \theta \eta$ ; Vulg. quam magnificata); Sir 51<sup>3</sup> 'from the manifold afflictions which I had' ( $\epsilon \kappa \pi \lambda \epsilon i \delta \nu \omega \mu$ θλίψεων).

In Lk 18<sup>30</sup> 'manifold' is an adv., 'There is no man that hath left house . . . who shall not receive manifold more' (πολλαπλασίονα, Vulg. multo plura; Wyc. 'many mo thingis'; Tind. 'moche moore,' and all VSS till the Bishops 'manifold more'). The adv. 'manifoldly' is used in Rhem. NT,

Mt 27 heading 'The chiefe of the lewes accuse him to Pilate (his betrayer, and the Iudge, and the Iudge's Wife, testifying in the meane time manifodly (sic) his innocencie).' J. HASTINGS.

MANIUS, AV MANLIUS (Mários A and V, Syr.; Márkos al., Manilius Vulg.).—According to 2 Mac 11<sup>31-33</sup> Quintus Memmius and Titus Manius were two Roman legates (πρεσβῦraı) in the East, who sent a letter to the Jews after the first campaign of Lysias (B.C. 163), confirming the concessions made by the Syrian chancellor. But there are many reasons against accepting as genuine either this letter or the three others contained in the same chapter. From 1 Mac 4<sup>26-35</sup> it appears that the first expedition of Lysias took place in B.C. 165, before the re-dedication of the temple and the death of Antiochus Epiphanes. No mention is there made of negotiations between the Jews and Lysias, who is simply stated to have returned to Antioch to collect new forces. The supposed con-cessions seem to rest upon a confusion of this expedition with a second, which took place about three years later. The names given to the Roman commissioners raise further difficulties. Polybus records the names of several Roman legati in Asia about this period, but neither Q. Memmius nor T. Manius is to be found among them. Possibly one of the persons intended was Manius Sergius, who, with C. Sulpicius, was sent to Syria shortly before the death of Antiochus Epiphanes (Polyb. XXXI. ix. 6, cf. xii. 9, xxiii. 9). It is, moreover, a suspicious circumstance that the date of the supposed Roman letter should be exactly the same as that of the letter of Eupator (15th of Xanthicus, v.<sup>23</sup>), and that the year should be given according to the Seleucid era. Finally, we learn from 1 Mac 8 that Judas Maccabæus first entered into communication with the Romans after the landing of Demetrius (B.C. 162) and the death of Nicanor. It is, no doubt, possible that some foundation of fact underlies the correspondence contained in 2 Mac 11, but in their present form and present connexion none of the letters can be regarded as historical. (Cf. Rawlinson and Zöckler, ad loc.). H. A. WHITE.

MANKIND.-In Lv 1829 2013 'mankind' means men as opposed to women, the male sex. Shaks. Timon of Athens, IV. iii. 491-Cf.

'I love thee, Because thou art a woman, and disclaim'st Flinty mankind.'

MANLY, MANLINESS .- ' Manly ' occurs once as an adj. (2 Mac  $7^{21}$  ' with a manly stomach,' *Aprev.*  $\theta \nu \mu \hat{\varphi}$ , RV ' with manly passion '), and once as an adv. (2 Mac 10<sup>13</sup> Twenty young men... assaulted the wall manly,' *dρjewodŵs*, RV 'with masculine force'). 'Manliness' is used in 1 Mac 4<sup>26</sup>, 2 Mac 87 1418 of the valour of soldiers in battle.

MANNA (ip mân; LXX µárra; Vulg. man, manhu, manna).—A substance which fell along with the dew, or was rained around the Hebrews' camp during their 40 years' wilderness life. It was in flakes or small round grains, like hoarfrost, white, in appear-ance like coriander seed or bdellium, and in taste was like thin flour-cakes with honey, or like fresh oil (Ex 16<sup>14, 15, 31</sup>, Nu 11<sup>7, 8</sup>). It was gathered every morning except on Sabbath, and a double portion on Friday morning. If kept overnight it became day. The supply continued until they came to a land inhabited, to the border of Canaan, Ex 16<sup>30</sup> (P); or until they reached Gilgal, in the plain of Jericho, and ate the old corn of the land, Jos  $5^{13}$  (JE). During this time it was the chief part of their diet, but not their only food (Lv  $8^{2, 20, 31}$  9<sup>4</sup> 10<sup>12</sup>

245, Nu 7<sup>13, 1957</sup>, Dt 26, Jos 1<sup>11</sup>). It is said to owe its name to the question  $r_{1} = man h\bar{u}$ , 'what ' is it ?' name to the question  $\operatorname{sm} \neg \neg \neg$   $\operatorname{man} h\bar{u}$ , 'what \* is it ?' v.<sup>10</sup> (E), asked by the people when it fell. For Egyptian affinities of the word, see Brugsch, *HWB* vi. 606; Ebers, Gosen, 236. As a perpetual memorial of this provision, Aaron was told to place a *zinzeneth* (pot or basket) full of it before the Teetimony (Ex 16<sup>-33</sup>), which was in the ark (25<sup>16</sup>). This vessel was of gold, He 9<sup>4</sup>, but was not itself in the ark as there stated (see 1 K 8<sup>9</sup>). The manna is mentioned also in Neh 9<sup>30</sup>, and in Ps 78<sup>24</sup>, where it is called the 'corn of heaven' and the 'bread of the mighty.

Our Lord speaks of the manna as typical of Himself, the true bread from heaven, conferring Inimisely, the true breat from heaven, contering immortality on those who spiritually become par-takers of His grace,  $Jn \in \mathbb{S}^{1, \frac{N-N}{2}}$ . St. Paul calls it 'spiritual meat,' and seems to regard it and the stream from the smitten rock as a type of the Eucharist (1 Co 10<sup>St</sup>.). The 'hidden manna' is one of the rewards of 'him that overcometh,' Rev 2<sup>17</sup>.

A sweet, semifluid substance called mann or mann es-sama ('heavenly manna') exudes in drops from the tārfa tree (Tamarix mannifera, Ehr.), the www of the Hebrews, when it is punctured by the *box* of the Hebrews, when it is punctured by an insect, Gossyparia monnipara (Hardwicke, Asiat. Research, xiv. 182, also Ehrenberg, but doubted by Ritter). This is collected in the desert by Arabs, and sold to pilgrims. A second kind, the terengabina of Ibn Sina, is yielded by a thorny leguminous shrub, Alhagi Camelorum, Fisch., and other allied species in Arabia and neighbouring countries. A third sort, the Sirachosta of the Arabias is yielded by Cotoneaster numularia in countries. A third sort, the Sirachosta of the Arabians, is yielded by Cotoneaster nummularia in Herat (Haussknecht). Niebuhr describes a kind found on oaks, called 'afs or ballót, at Mardin in Digarbekr. This oak honey is mentioned by Hesiod, Op. et Di. v. 230 f., and Ovid, Met. i. 112. For stories of manna found on the ground in open

Delegence, not dropping from plants, see Athenaeus, Delgence, xi. 102, and Wellsted, Arabia, ii. 409. The manna of commerce (not now in the Phar-macoposia) is a sickly-smelling, sweet, laxative exudation from the flowering ash Frazinus Ornue, L., and F. rotundifolia, and mostly comes from Calabria. None of these could be the manna of Exodus, which was a miraculous substance. These Exodus, which was a miraculous substance. These only flow in small quantities, and all the tamarisks in the desert could not have yielded the daily pro-vision of more than 300 tons. They only flow at special seasons—May to August (Burckhardt), or August and September (Breydenbach, *Reissbuch*, i 193). They are physiologically insufficient as food, can keep indefinitely, and could not be cooked as the manna was. The Sabbatic intermission and Sand exception that it was not a

inal cessation likewise show that it was not a natural substance; besides, while it could be ground in mills, besten in mortars, see thed in pots, or baked by artificial heat into cakes, yet, if not gathered, it volatilized in the heat of the sun

LITERATURE.—The old authors are quoted and summarized in Fabri, Historia Mannae, in Fabri and Reiske's Opuse. Med. Arab. 1776, p. 83, and Reinke, Beiträge zur Krklärung d. Alt. Test. v. 305. See also Rosenmüller, Alterthumstunde, iv. 316, and Curman's account given by Oedmann, Vermieskie Samm-lungen aus der Naturkunde, vi. 7; cf. also Wellsted, Burck-hardt, Ehrenberg (who figures the tarfd), and Fornkål. A. MACALISTER.

A. MACALISTER.

MANNER.-The word 'manner,' to be traced back to Lat. manus, the hand, may be said to be originally the way of handling or managing

\* Properly 'who'?, as is pointed out by Dillm. Ryssel, Ex-Lv, p. 189, and Hommel, AHT 276\*. The argument of the latter,

that mān (Arab. ) Aŭ proves that the early Hebrews spoke a pure Arabian dialect, is dealt with in Expos. Times, ix. p. 478, by Ed. König, who doubts whether mān hữ was originally meant to be a question. It might be an imitation of an Egyp. word mannu (so Ebers, Durch Gosen zum Sinai<sup>2</sup>, 2361.).

Digitized by Google

## MANNER

Its uses in AV are sometimes obsolete, a thing.

more often archaic and misleading. 1. Method of action, way, as Mt 6<sup>9</sup> 'After this manner therefore pray ye' ( $00\tau\omega s$ ); Lk 6<sup>29</sup> 'In the like manner did their fathers unto the prophets' (sard raûra, edd. sard rà aurá); He l<sup>1</sup> 'in divers manners' (πολυτρόπως).

2. Habitual method of action, custom, as Ru 47 'This was the manner in former time in Israel concerning redeeming' (RV 'custom'); Am 8<sup>14</sup> 'They that swear by the sin of Samaria, and say, They and O Den livether and The manner of was the height of Greek fashions, and increase of heathenish manners'  $(\pi) \delta \sigma^{3} \sigma \sigma \sigma^{3} \delta \lambda \delta \phi \nu \lambda \sigma \sigma \sigma^{3} \sigma \sigma^{3}$ . Whose would not conform themselves to the manners of the Gentiles should be put to death' ( $\mu era\beta a ireir$ era' ra' Ellyrina'; RV 'go over to the Greek rites').

3. Sometimes it is custom in its origin, the regulation, or ordinance that afterwards becomes fixed as habit. Thus approved is often tr. 'manner, **in cell as habit.** Thus 5570 is often tr. 'manner,' when RV prefers 'ordinance' in Lv 5<sup>10</sup> 7<sup>23</sup> 9<sup>16</sup>, Nu 9<sup>14</sup> 15<sup>16, 34</sup> 29<sup>6, 16, 13, 47, 30, 33, 77</sup>, 1 Ch 24<sup>19</sup>, 2 Ch 4<sup>20</sup>, Neh 8<sup>18</sup>; 'order' in 2 Ch 30<sup>16</sup>; 'gudgement' in Ezk 23<sup>46, 544</sup>; and leaves the rest unchanged (Gn 40<sup>13</sup>, Ex 21<sup>9</sup>, Lv 24<sup>22</sup>, Jos 6<sup>15</sup>, Jg 18<sup>7</sup>, 1 S 8<sup>9, 11</sup> 10<sup>26</sup>, 1 K 18<sup>26</sup>, 2 K 1<sup>7</sup> 11<sup>14</sup> 17<sup>36, 54, 37</sup>, <sup>35, 40</sup>, Jer 30<sup>18</sup>). See also 2 S 7<sup>19</sup> 'And is this the manner of man, O Lord (Cod<sup>2</sup>)' (CTUT TO AVM) the law of man. ימתו this the law of man?') ; Est 2<sup>13</sup> 'accord-ing to the manner of the women' (גרית הַנָּשׁים), RV 'according to the law for the women'); Ac 22<sup>6</sup> 'according to the law for the women ); At 2z'Taught according to the perfect manner of the law of the fathers' (xarà  $dx\rho(\beta e_{iar} \tau o \hat{\sigma} \pi a \tau \rho \phi o v$  $\tau \phi \mu o v$ , RV 'according to the strict manner of the law,' lit. 'the strictness of the law'; it is the only occurrence of  $dx\rho(\beta e_{ia}$  in NT). Cf. Tindale's tr. of Nu  $15^{24}$  'All the multitude shell offer a caffe for a burntofferynge to be a swete swoure unto the Lorde, and the meatofferynge and the drynkofferynge there to, accordynge to the maner'; and of 19<sup>10</sup> 'And this shalbe unto the childern of Israel and unto the straunger that dwelleth amonge them, a maner for ever.<sup>9</sup> 4. Personal behaviour, conduct, as Sir 31<sup>17</sup> (Leave

off first for manner's sake'  $(\chi d\rho \iota \tau \pi a \delta \epsilon l a s)$ ; 2 Mac 5<sup>23</sup> 'He left governors . . . at Jerusalem, Philip . . . for manners more barbarous, than he that set him there' (row de roknow, RV 'in character'); Ac 13<sup>16</sup> 'And about the time of forty years suffered he their manners in the wilderness ' (AVm 'Gr.

he their manners in the wilderness' (AVm 'Gr. \* This passage is obscure. The Heb. word is the usual one for a way or path, and so Driver takes it here, quoting from G. A. Smith and Doughty as to the Arabic custom of swearing by the way to a place. This is apparently the tr. of Vulg. *Visit Deus tuus Dars et visit via Bersabee*, and of Wyc. 'the waye of Bersabe lyveth,' and of Douay. Coverdale and the Bishops follow the LXX (sai:  $\xi = \delta \delta s c m, Beyes B s c m, thus Cov.$ 'as truly as thy God lyveth at Bersaba.' The AV tr. is fromthe Gen. version, which has the marg. 'That is, the communemaner of worshiping and the service or religion there used.'Thus the meaning of AV is 'manner of worship.' 'oult,' andthat meaning W. R. Smith favours, though doubthilly (*ILS*2182),'In Am 814 there is mention of an oath by the way (ritual?) ofBeersabea.' See BERSHERS. The Heb. word derek is fre-quently tr4 'manner' in AV, in the sense of custom, once inAmos (410 'I have sent among you the pestilence after themanner of Expt).

Query is "manner in A', in the sense of custom, once in Amos (4)" I have sent among you the pestilence after the manner of Egypt). I Kirkpatrick (Expos. iii. [1886] 358 f.) explains the AV text, 'Thou dost condescend to speak familiarly with me, as man speaks to man.' It is the rendering of Ges. and others. But there is no other passage in which tord has the meaning of 'manner.' The Gen. and Bish. have 'Doeth this apper-teme to man?' Driver says that as the text stands the best explanation is that of Hengst. and Keil, 'to evince such regard for me is in accordance with the law prescribed by God to regulate men's dealings with one another; displayed by God it argues unwonted condescension and affection.' But he con-siders the text probably corrupt (*Intern. Com. on Sam.* p. 302). H. P. 9 p. 302).

erpoπoφόρησεν, perhaps for erpoφoφόρησεν [bore or fed them] as a nurse beareth or feedeth her child, Dt 1<sup>21</sup>; RVm 'many ancient authoritics read bare he them as a nursing-father in the wilderness, see Dt 1<sup>31</sup>)\*; 264 'My manner of life from my youth . . . know all the Jews' ( $\beta l \omega \sigma \iota s$ ); 2 Ti 3<sup>10</sup> 'But thou hast fully known my doctrine, manner of life' (dywyn, RV 'conduct'). In this sense RV uses 'manner of life' as the tr. of dragrowh in most of its occurrences for AV 'conversation' or the like. Cf. Jg 13<sup>13</sup> Cov. 'What shal be the maner and worke of the childe?'

5. There are two passages in which the meaning is more clearly *ethical conduct*, *morals*, 2 Es 9 is more clearly ethical conduct, morats, 2 Es 9<sup>10</sup> 'Now the manners of them which are created in this world that is made are corrupted' (corrupti sunt mores corum); 1 Co 15<sup>30</sup> 'Evil communica-tions corrupt good manners' ( $f\theta\eta \ \chi\rho\eta\sigma\theta'$  [ $\chi\rho\eta\sigma\taud$ ]). Cf. Knox, *Hist.* 318, 'And wonder not, Madame, that I call Rome an Harlot; for that Church is altogether polluted with all kinde of Spiritual Fornication, as well in Doctrine, as in manners'; and Calderwood, *Hist.* 107, 'Their [the Elders'] office is as well severally, as conjunctly, to watch diligently over the flock committed to their charge. diligently over the flock committed to their charge, both publickly and privately, that no corruption of Religion or manners enter therein.'

6. A thing which is done in a certain way is of a certain kind, and the commonest meaning of 'manner' in AV is sort or kind, as Gn 25<sup>22</sup> 'Two manner of people shall be separated from thy bowels'; Ex 22° 'For all manner of trespass . . . or for any manner of lost thing . . . he shall pay double unto his neighbour'; Jg 8<sup>18</sup> 'What manner of men were they whom ye slew at Tabor?' Dn 6<sup>22</sup> 'no manner of hurt was found upon him'; Sir  $37^{16}$  'four manner of things appear: good and evil, life and death'; 2 Co 7' 'ye were made sorry after a godly manner' (RV 'after a godly sort'); 1 P 1<sup>11</sup> 'Searching what, or what manner of time the Spirit of Christ which was in them did signify'; 2 P 3<sup>11</sup> 'what manner of persons ought ye to be'; 1 Jn 3<sup>1</sup> 'what manner of love the Father hath bestowed upon us.' So Berners' *Froissart*, xviii., 'The king gave licence to all manner of people, every man to draw homeward to their own countries Tindale, *Pent.* (Prologe to Lv) 'The popettes and xx maner of tryfles which mothers permitte unto their yonge children be not all in vayne'; Elyot, Governour, ii. 383, 'Experience whereof commeth wysedome is in two maner of wise.' In all these examples 'manner' is sing., being used as the words 'kind' and 'sort' are used still. . Cf. Shaka. Lear, II. ii. 96, 'These kind of knaves.' For there is a doubt in the mind whether the word is a subst. or an adj. Hence the connecting word 'of' was frequently omitted, as in Tindale's tr. of Gn 2<sup>19</sup>, 'And after that the Lorde God had make of the erth all maner beastes of the felde and all maner foules of the ayre, he brought them unto Adam to see what he wold call them'; and of Lk 4<sup>20</sup> And feare came on them all, and they spake amonge them selves sayinge: what manner a thinge is this'; and on 1 Jn 4<sup>18</sup> he says, 'John speaketh not generally of all manner fear, but of that only

• The TR increasion is best attested (#BC<sup>2</sup>DHLP, as against AC'E for increasion of the original passage Dt 1<sup>31</sup> there is also uncertainty of reading. The decision between the two readings, though they yield such different meanings, must be mainly due to the view taken of the context. Page and Rendall take opposite sides—the former thinking that the apostle is dwelling, not on the percently of larael, but on the care and affection of God for them, so that irres, is clearly required here as well as in Dt 1<sup>31</sup>; the latter holding that irrely with the context and the circumstances, 'for it exactly describes God's longsuffering with a perverse and rebellious generation.' Perhaps the strongest argument against irred is that it is doubthil if receivers mean simply 'carry.' It is rather 'give suck.' Rendall further urges that in Dt 1<sup>31</sup> we should expect rises, not wice. The TR ire repipeers is best attested (MBC2DHLP,

## MANOAH

which the conscience of sin putteth a man in.' So Spenser, FQ II. xii. 70—

#### "Right hard it was for wight which did it heare To read what manner musicke that mote bee."

In AV 1611 this construction occurs in Lv  $7^{22}$  'Ye shall eat no maner fat of oxe';  $14^{54}$  'This is the law for all manner plague of leprosie and skall'; and Rev  $18^{12}$  'all maner vessels of Yuorie, and all maner vessels of most precious wood'; but modern editions have retained it only in the last passage.

editions have retained it only in the last passage. The phrase 'in a manner' is found in  $1 \ 8 \ 21^{5}$  'the bread is in a manner common.' The passage is a particularly difficult one. W. R. Smith ( $KS^{2}$  dis) translates : 'Nay, but women are forbidden to us as has always been my rule when I go on an expedition, so that the grear (clothes, arms, etc.) of the young men is holy even when it is a common (not a sacred) journey; how much more so when [Pr 217] to day they will be consecrated, gear and all.' Driver (Kotes on Samuel, p. 138 t.), on the whole, favours the rendering of AV, which makes the 'reasels' to be the wallets or utensils in which they carried food, and represents David as saying that these vessels being ceremonially clean could not defile the sacred bread put into them. But he does not regard the interpretation as certain, or the text as free from suspicion. H. P. Smith (*Intern. Com. on Sam.*) is more suspicious of the text. He agrees with others that to David war was sacred, peace secular ('common'), but he sees no occasion David had for saying that now he was on a pacceable expedition. Rather, and therefore, even if the bread were common, it would be consecrated by the vessels into which it was to be put. For the Eng. phrase, which means 'in some respect,' to a certain extent,' cf. Shaks. K. John, v. vil. 39-- 'Nay, it is in a manner done already'; and Beaumont and Fletcher, *Lause of Candy*, i. 1--

#### <sup>4</sup> 'Tis not a time to pity passionate griefs, When a whole kingdom in a manner lies Upon its death-bed bleeding.'

More obscure is the phrase 'with the manner' found in Nu 5<sup>13</sup> 'If a han's wife go aside, and commit a trespass against him ..., and there be no witness against her, neither she be taken with the manner' (RV 'in the act'). The RV gives the modern equivalent of the phrase, which is a legal one. In Old Eng, the word is in this phrase spelt maximum (from Fr. manier, to take with the stolen goods about him. The phrase in AV comes from Tindale, who also uses it in *Expositions* (Prol. to 1 Jn), p. 142, 'Ye have corrupt the open scripture before our eyes, and are taken with the manner.' So Shaks. I Henry IV. n. iv. 347-'O villaih, thou stolest a cup of sack eighteen years ago, and were taken with the manner, and ever since thou hast blushed extempore'; and Love's Labour's Lost, 1. 205, 'The manner of it is, I was taken with the manner.' So Sometimes the phrase is 'in the manner,' as Hall, Wortz, il. 190, 'But, O foolish sinners, all your packing and secrecy cannot so contrive it, but that ye shall be taken in the manner.' J. HASTINGS.

**MANOAH** (gip, Marŵe, Marŵy; [Jos.], Manue).— A native of Zorah, of the Danites, whose wife had no children (Jg 13<sup>2</sup>). When it had been revealed to her by the angel of the LORD that she should have a son, who was to be brought up as a Nazirite, and to be a saviour for Israel from the Philistines, she told her husband of the vision, and of the instructions of the messenger (vv.<sup>3-6</sup>). Upon Manoah's entreaty, God sent the angel again to his wife as she sat in the field. She at once ran and fetched her husband, who received the same instructions about the child as his wife had done. Manoah invites the angel to stay and eat. He declines, but tells them to offer a burnt-offering to the LORD. Manoah did not know that he was an angel of the LORD, and asks him his name, but he will not reveal it, 'seeing it is ineffable' (vv.<sup>9-16</sup>). The offering is offered on the rock, and a wondrous sign is at once given.\* The angel ascends in the flame of the sacrifice. Thereupon Manoah and his wife fall on their faces to the ground, and Manoah realizes that he has seen an angel of the LORD. Manoah is greatly alarmed, but his wife comforts him (vv.<sup>19-33</sup>).

# Josephus (Ant. v. viii. 1-3) decorates the narra-

• In v.<sup>19</sup> the MT הודים אים לקבו, from which it is impossible to obtain the EV tra, 'and (the angel) did wondrously,' is manifestly corrupt. While B reads אם אונעשארים איניים, A has די שמשברים אוניידי געייי (כו. Vulg. Domino mirabilia facienti). Perhaps we ought to restore the text accordingly, איץ לבה היי חוד לי to J" who worketh wonderfully '(so Moore).

## MANSION

tive, but adds nothing to our knowledge. When the promised son has grown up, he asks his father as well as his mother to obtain for him as his wife a woman of Tinnah, but they are much displeased; still Samson persists in the request to his father, who was the proper person to make the proposal for the marriage (see Gn 34<sup>4</sup>). Overruled by him, they went down to Timnah, and some time later Manoah accompanied his son to the wedding-feast.

Manoah seems to have died before his son, and 'the burying-place of Manoah' is mentioned as the place of burial of Samson (Jg 16<sup>31</sup>). It has been questioned whether Manoah really after all took part in the marriage of Samson, and some have looked upon this as an interpolation (see Moore's Judges, pp. 329, 330). The 'Menuhoth' and 'Manahathites' of 1 Ch 2<sup>62-54</sup> are connected with Manoah, the latter being called also Zorites.

H. A. REDPATH.

**MANSION** (Lat. maneo to stay, mansio a staying, place of abode, Old Fr. mansion a dwelling-place, abode; 'manse' and 'manor' are of the same origin, the one directly from Lat., the other through the Fr. manoir).—A mansion is primarily any kind of dwelling-place, as in Milton, *Il Pens.* 92—

'To unfold What worlds or what vast regions hold The immortal mind, that hath forsook Her mansion in this fleshly nook.'

Especially a place to abide in permanently, as T. Adams on 2 P 1<sup>4</sup> 'Worldly things are but a tabernacle, a movable; heaven is a mansion.' Cf. Shaks. *Timon*, V. i. 218—

'Timon hath made his everlasting mansion Upon the beached verge of the salt flood.'

Later it came to signify a house of some grandeur,

which is its modern meaning. In AV 'mansion' occurs only Jn 14<sup>2</sup> 'In my Father's house are many mansions' ( $\mu orai$ , RVm 'abiding places'). The tr. is Tindale's (perhaps suggested by Vulg. mansiones; but neither Wyc. nor Rhem. uses the word); Cov. chose 'dwellinges' (which was Wyclif's word), the Gen. and the Bishops' Bible 'dwelling places,' but the rest followed Tindale. It is curious, however, that in 14<sup>20</sup>, the only other place in NT where  $\mu orn$  is found, no version gives 'mansion'; some tr. by a verb 'dwell,' others use 'dwelling,' Rhem., AV, and RV 'abode.'

What is the  $\mu\sigma\eta$ ? It is clear that in both passages its meaning is the same, and the simplest meaning is the best—an abode or dwelling. In Jn 14<sup>24</sup> Jesus says, 'If a man love me, he will keep my word: and my Father will love him, and we will come unto him, and make our abode with him.' Where the man may be is of no account. Wherever he is and loves, there the Father and the Son have their abode  $\pi a\rho' a \delta r \bar{\varphi}$  beside him—in his conscious presence. Cf. Lk 1<sup>20</sup> 'Fear not, Mary; for thou hast found favour with God' ( $\pi a\rho d$  $\tau \bar{\varphi} \ \theta \epsilon \bar{\varphi}$ ). That after Tindale's tr. the word should be applied to heaven was natural, since that is the meaning that has been almost slways given to 'my Father's house.' But there is nothing in the word or in the context to suggest rooms in heaven; still less Westcott's idea of 'stations' or temporary resting-places on a road. For the application of the word 'mansion' to heaven see *Rhem. NT*, note on Lk 16<sup>9</sup> 'yea and that they be in such favour with God, that they may and doe receive their frendes which were once their benefactors, into their mansions in heaven, no less then the farmers whom the il steward pleasured, might receive their freend into their earthly houses'; and Adams, *Works*, i. 68, 'It is small comfort to the harbourless wretch to pass through a goodly city, and see many glorious buildings, when he

## MANSLAYER

cannot say, Hæc mea domus, I have a place here. The beauty of that excellent city Jerusalem, . . . affords a soul no confort, unless he can say, mea civitas, I have a mansion in it.' But the word was still free enough to let Milton use it of hell, as in PL i. 268—

\* But wherefore let we then our faithful friends, The associates and co-partners of our loss, Lie thus astonished on the oblivious pool, And call them not to share with us their part In this unhappy mansion, or once more With rallied arms to try what may be yet Regained in Heaven, or what more lost in Hell?' J. HASTINGS.

**MANSLAYER.** — In Nu 35<sup>5,12</sup> AV uses 'manslayer' for the person who unwittingly causes another's death. Elsewhere for the same Heb. and in this sense (nyi) or nyi, ptcp. of nyi to murder) AV gives 'slayer' or 'murderer,' RV always 'manslayer.' The word 'manslayer' is used also in 1 Ti 1° as tr. of *dropopiros* in its only occurrence. The mod. word is 'horhicide,' but there was no difference in meaning between 'manslayer' when it was in use and 'murderer.' Thus Jn 8<sup>44</sup> Wyc. 'ye ben of the fadir, the devel, and ye wolen do the desyris of youre fadir. He was a mansleere fro the bigynnyng'; and Udal, *Erasmus' Paraphrasc*, ii. fol. 278, 'Whosoever hateth hys brother is a man slear. And ye knowe that no man slear hath eternal life abiding in hym.' Other forms were *mankiller*, as the Rhem. tr. of Jn 8<sup>44</sup> 'he was a mankiller from the beginning,' and of Ac 3<sup>14</sup> 'But you denied the holy and the just one, and asked a mankiller to be given unto you'; and *manqueller*: thus, the marg. note in Matthews' Bible to Dt 19<sup>4</sup> is, 'Here are shewed ii maner of manquelling, one done wyllyngly and of set purpose, the other unwyllinglye; for even he that kylleth with the hande maye before God be no manquellare : and agayne he that is angrye and envyeth although he kyll not wyth the hande, cannot but be a manslear before God : because he wylleth hys neyghboure evyll.' See GOEL, REFUGE (CITIES OF).

**Manslaughter** is perhaps more general, but not, as now, carefully distinguished from murder: 2 Es 1<sup>26</sup> 'ye have defiled your hands with blood, and your feet are swift to commit manslaughter' (homicidia); Wis 14<sup>25</sup> ( $\phi$ iror, RV 'murder'). Cf. Milton, *PL* xi. 693—

<sup>•</sup>To overcome in battle, and subdue Nations, and bring home spoils with infinite Man-slaughter, shall be held the highest pitch Of human glory.

#### J. HASTINGS.

The aggravated nature of the offence of one larachite selling another into foreign slavery is insisted upon by Philo ( $de \ Leg.$  Spec. ii. 338, ed. Mang.). The facilities afforded for the slave trade

(the Edomites, the Philistines, the Phœnicians, the Greeks, etc., were ready purchasers, cf. Ezk 27<sup>13</sup>, Am 1<sup>6</sup>, J1 3<sup>4-6</sup>), and its lucrative character, necessitated the prohibition of kidnapping a fellow-Israelite on pain of death (inflicted, according to Sanhed. xi. 1, by strangulation). A similar law was in force amongst the Athenians (Xen. Mem. I. ii. 62: ear ris parepose given a droparodific person, rourge dararor eira. rip  $f\eta\mu lar$ ).

In the list of those for 'whom the law is made' (1 Ti 1<sup>10f.</sup>) are specified men-stealers (*dνδραποδισταί*). J. A. SELBIE.

**MANTELET** (152), AV 'defence'; LXX rds **mpo-** $\phi \nu \lambda ards; Vulg. umbraculum). — The only occurrence$ of this word is in Nah 2<sup>9</sup> [Heb. <sup>6</sup>], in the (ideal)description of the siege and fall of Nineveh.The Heb. term comes from the root 755 'tocover or protect' (hence AVm 'covering'). Inall probability Nahum refers to some engine ofwar, such as a siege tower or a vinea or testudounder cover of which the battering-ram (which see)was worked. The context appears to require thatthe 325 belong to the assailants, not to the defenders. See Wellh., Nowack, and especially A.B. Davidson, ad loc.

The Eng. word is formed by adding the dimin. suffix et to the word 'mantel,' which in that spelling is now used for the shelf over a fireplace, but it is really the same word as 'mantle,' a cloak. The origin is unknown, but the meaning is always 'covering.' J. A. SELBIE.

**MANTLE.**—1.  $\pi_{3}\pi_{3}$  "addereth, from a root  $[\pi\pi\pi]$  'to be wide,' wideness being apparently the characteristic feature of this article of attire, which is arrely mentioned, and generally, if not always, as a robe of office or state. On its possible form (which there are not sufficient data in Scripture to determine) see art. DRESS in vol. i. p. 625°. The name is used 5 times (1 K 10<sup>18, 19</sup>, 2 K 26<sup>13, 14</sup>) of Elijah's 'mantle' (AV, RV), which was probably of hair,† and appears to have been copied by succeeding prophets ‡ (cf. Zec 13<sup>4</sup> [ $\pi_{3}\pi_{3}\pi_{3}\pi_{3}\pi_{3}$ " (a hairy mantle'; AV 'a rough garment'], and what we are told in Mt 3<sup>4</sup>, Mk 1<sup>6</sup> of John the Baptist). A Babylonish mantle (lit. 'mantle of Shinar' '5<sup>4</sup> 73<sup>40</sup>) was one of the articles appropriated by Achan from the spoil of Jericho, Jos 7<sup>41, 24</sup>. See BABYLONISH GARMENT. The king of Nineveh laid aside his  $\pi_{7}\pi_{3}$  and put on sackcloth when the news of Jonah's proclamation reached him, Jon 3<sup>6</sup>.

2. nipp20 once only, Is 3<sup>22</sup> (where both AV and RV have 'mantles'). The article of dress referred to is probably (Dillm. compares Arab. '*itaf*, *mitaf*) an upper wide tunic (*kthlonth*) with sleeves (so Sierfried.Stade.- '*die ubere Tunika*').

an upper wide tunic (kethGmeth) with sleeves (so Siegfried-Stade – '*die obere Tunika*'). **3.** 5yg 1 S 15<sup>27</sup> 28<sup>14</sup>, Ezr 9<sup>3.5</sup>, Job 1<sup>30</sup> 2<sup>13</sup>, Ps 109<sup>20</sup>. In all these passages A V has 'mantle'; in the first two RV has 'robe,' which is read in the whole of them by Amer. RV, and is generally given elsewhere by AV as tr<sup>a</sup> of 5yg (e.g. Ex 28<sup>4.31.34</sup> and oft., Lv 8<sup>7</sup>, 1 S 18<sup>4</sup>, Ezk 28<sup>16</sup>). This article of dress is fully described in vol. i. p. 625<sup>5</sup>.

\* אַרָּרָא אָרָר Mic 2<sup>6</sup> may be a textual error for אָרָר אָאָרָא, the n having been lost before the following n (so Ozf. Heb. Lez. and Siegfried-Stade). Wellh. and Nowack pronounce the text hopelessly corrupt.

orrupt. † The LXX has in Kings μηλωτό, 'sheepskin'; in Zec 134 δίρμε, 'leathern cost'; in Gn 2528, Mic 28 δορά, 'hide'; in Jos 721 ψιλ, πωκ.λη; in Jon 86 σταλέ.

In Zee 113 it is uncertain whether אָדָרָק should be taken in the sense of 'glory,' 'magnificence' (cf. its use in Exk 178, unless here it is an adjective fem. from אָדָרָק and the use of אָדָק in Zec 11<sup>13</sup>), or of 'mantle,' the shepherds being false prophets. Nowack emends מֹדָק to בֿוָק לָרָ 'their pasture.'

אריק, or or 'mantle,' the shepherds being false prophets. Nowaok emends אריק, to Cr, יסי 'their pasture.' \$ The same Heb. expression is used in Gn 25<sup>25</sup>, where Essu's appearance is compared to that of a hairy mantle (AV and BV 'garment').

## MANUSCRIPTS

4. τρης (B έπιβόλαιον, A and Luc. δέρμε) occurs once only, Jg 4<sup>18</sup>, of the article with which Jael covered Sisera. AV has 'mantle,' RV 'rug,' AV m 'rug or blanket.' Either 'rug' or 'tent-curtain' is probably the meaning. See notes of Moore and Budde, ad loc.

In addition to the above, RV introduces 'mantle' in (a) Ru  $3^{13}$  (AV 'vail'; AVm 'sheet or apron') as tr<sup>a</sup> of notice, which in the pl. mappo is rendered by AV 'wimples' and RV 'shawls' in Is  $3^{22}$ , the by Av wimples' and RV 'shawls' in Is 3<sup>22</sup>, the only other occurrence of the Heb. word. The root [ncc] means 'to extend or spread.' Dillm. (on Is 3<sup>22</sup>) and Bertholet (on Ru 3<sup>15</sup>) give 'shawl'; Oxf. Heb. Lex. 'cloak'; Siegfried-Stade 'plaid'; LXX has in Ru  $\pi\epsilon\rho(j\omega\mu\alpha)$ . See also art. DRESS in vol. i. p. 627<sup>10</sup>.

(b) The 'voil' of AV (so also RVm) is changed (0) The 'voil' of AV (so also RVm) is changed by RV into 'mantle' in Ca 57, although it trans-lates the same Heb. word "voil' in Is 32", its only other occurrence. LXX has in Ca 57 *depurper*, which denotes a light kind of veil. Budde and Siegfried (in their *Comm.* on Ca) both think that an 'Upberwourf' rather than a veil suits the con-text. The bride in escaping leaves her  $\gamma\gamma\gamma$  in the hands of her captors (cf. Mk 14<sup>51. 62</sup>). But see art. DRESS in vol. i. p. 627<sup>b</sup>. (c) In Dn 3<sup>21</sup> RV tr. פרקלקהיו 'their mantles' (AV

'hats'). See HAT.

'hata'). See HAT. (d) In He 1<sup>12</sup>, which is a quotation from Ps 102<sup>c6</sup> [Heb. and Gr. <sup>27</sup>], RV substitutes 'mantle' for AV 'vesture' as  $tr^{n}$  of  $\pi e \rho \mu \beta \delta \lambda a \omega \sigma$ , which in the LXX answers to  $\tau^{n} \phi \gamma$  of MT. The Heb. word is ren-dered by both AV and RV 'vesture.' The only other NT occurrence of  $\pi e \rho \mu \beta \delta \lambda a \omega \sigma$  is 1 Co 11<sup>15</sup>, where it is used of the (contained) or (is a contained). where it is used of the 'covering' or 'veil' which nature supplies to a woman in her hair.

Once more, Amer. RV tr. קעיל in Is 59<sup>17</sup> by 'mantle' (AV and RV 'cloke').

MANUSCRIPTS.—See TEXT.

J. A. SELBIE.

**MAOCH** (קעד; in 1 S, B 'Αμμάχ (= του by transposition for του,), A Μωάβ; in 1 K, B 'Αμησά, A Maaχά). —The father of Achish king of Gath, under whom David took service when his life was threatened by Saul (1 S 27<sup>2</sup>). He is probably to be identified with Maacah (wh. see), the father of Achish king of Math who is mentioned at the beginning of Solo-mon's reign (1 K 2<sup>39</sup>). In favour of this view is the fact that the Peshitta reads (= Maacah) in both passages, while the Targum of Jonathan in each case preserves the shorter form בכעד (=Maoch). J. F. STENNING.

MAON, MAONITES (דְּעָלֹן). — Mentioned among the oppressors of Israel before the time of Jephthe oppressors of israel before the time to be the that in Jg 10<sup>12</sup>, a late passage, probably due to the post-exilic editor. For *Maon* LXX reads *Midian* (Pesh. *Ammon*, Vulg. *Chanaan*, Targ. = MT). Though accepted by many critics, the cortical production of the product o rection is suspiciously obvious; and it does not materially relieve the anachronisms that remain in the verse. The editor included Maon in his list of representative oppressors as being an enemy familiar to later times. Hommel (AHT 251, 272)suggests that the LXX reading is an explanatory gloss on *Ma'on*. In 1 K 11<sup>18</sup> Thenius reads *Ma'on* for *Midian*; so Stade, *GVI* i. 302, but without sufficient reason, and with no support from the Versions.

The Maonites (Maon) are usually regarded as the The Mathematics (Math) are usually legarded as the **Meunim**, 1 Ch 4<sup>41</sup> (Me<sup>i</sup>nim Kerê), 2 Ch  $20^1$  (for Ammonites read Me<sup>i</sup>unim, LXX) 26<sup>7</sup>. Their headquarters have been sought in Ma<sup>i</sup>ôn (Arab. Ma<sup>i</sup>an), 4 hours S.E. of Petra, on the ancient caravan road from Damascus to Mecca; but all that can be gathered from the references above is that they inhabited the Edomite country, and were

## MAR

regarded by the Chronicler as Edomites. 2 Ch 20<sup>3,4,39</sup> refers to them as 'inhabitants of Mt. Seir': this would favour a connexion with Ma'an. On the other hand, 1 Ch 4<sup>40, 41</sup> rather points to a situa-On the other hand, 1 Ch 4<sup>200</sup> a father points to a stua-tion on the western side of Edom, where the country corresponds to the description in v.<sup>40</sup>. Buhl, *Gesch. der Edomiter*, 42, n. 1, suggests a con-nexion between the Meunim and Måyên, a place of wells, on the S.W. corner of the Edomite plateau. The Meunim are met with again among the Nethinim who returned from exile with Zerub-babel, Ezr 2<sup>60</sup> (LXX 1 Es 5<sup>31</sup> viol Marei, A Maari) = Neh 7<sup>43</sup> (LXX 2 Es 17<sup>51</sup> viol Μεσεινώμ, Α Μεεινώμ); it has been suggested that these were captives taken from the Meunim after their defeat by Jehoshaphat (2 Ch 201. 22) or Uzziah (2 Ch 267), and relegated to menial service in the temple.

relegated to menial service in the temple. In Ch the LXX renders *Mcunim* by  $M(\epsilon)$  waîn (1 Ch 4<sup>41</sup> Luc. *Kwaîn*), cf. also Job 2<sup>11</sup> Σωφάρ ở *Μευνάων βασιλεύε*. The Alexandrian translators probably intended to identify \* the Meunim with the Arab tribe whom Pliny mentions as mer-chants in spices and incense (*Hist. Nat.* xii. 30), with their principal home in S. Arabia (Hadra-mant). They are mentioned also by Fratemant). They are mentioned also by Eratos-thenes (in Strabo, p. 768,† ed. Cassub.), in whose time they were the most northern of the four nations of Arabia, with their home by the Red Sea. This rendering of the LXX has suggested the the search the Mounting belonged to the the theory that the Meunim belonged to the ancient kingdom of the Minæans, or more correctly Mainites, whose chief city was Main in S. Arabia. So Halévy, Glaser (Gesch. u. Geogr. Arabians, ii. 450), Hommel (Aufsätze u. Abhandl. 3, 5, and AHT 251, 272). See art. ARABIA in vol. i. p. 133. But the great antiquity of the kingdom of Main (B.C. 1000) seems not to agree with the fact that in the OT the Meunim are found only in late writings. It may be that the Meunim were survivors of the kingdom of the Mainites, dwindled to a single tribe; but on the whole it seems safer to regard the Meunim simply as an Edomite tribe, and their con-nexion with the Mainites as not yet sufficiently established. See Sprenger, ZDMG xliv. 505; Buhl, Gesch. d. Edomiter, 40 ff.; Kittel, 'Chronicles' in SBOT 59.

The name *Maon* was given to several places in S. Palestine. Besides Maon near Petra, there was Maon near Hebron, Jos 15<sup>43</sup>, 1 S 23<sup>347</sup>. 25<sup>3</sup> (Smith, HGHL 316), and [Beth]-baal-Meon on S.E. of Jordan, Nu 32<sup>36</sup> (perhaps pro for pro Nu 32<sup>9</sup>), Jos 13<sup>17</sup>, Jer 48<sup>23</sup>, Ezk 25<sup>9</sup>, 1 Ch 5<sup>8</sup>, Moabite Stone, ll. 9, 30. See Gray, Heb. Prop. Names, 126 f. Hommel (AHT 273 f.) makes the suggestion that these places were named after the ancient Arabic kingdom of Ma'in, and marked the extent of its northern frontier. G. A. COOKE.

MAR.-To 'mar' (from Anglo-Sax. merran, root MAR, seen in Gr.  $\mu a \rho a l \nu \omega$ , to waste) is to damage or disfigure. It is the opposite of to 'make,' in opposition to which it is used still and is frequent in Shakespeare. Thus Timon, IV. ii. 41-

'For bounty, that makes gods, does still mar men.'

It is used in AV of land spoiled by mice (1 S 6<sup>5</sup>), ‡ and by stones (2 K  $3^{19}$ ), of a path or road destroyed (Job  $30^{13}$ , RVm 'break up'), and of vine shoots spoilt by trampling down or plucking off (Nah  $2^2$ ). The potter's clay-vessel was marred in the turning (Jer  $18^4$ ), and old wine-skins are marred by pouring

\* Miraisi can hardly be a transliteration. Gentilic names in -aise are formed from place-names in -a, e.g. Za Jaïse, Tejsaïse. Thus Mirais presupposes Mirá, which can hardly be a trans-literation of Ma'on. + zarouzi di rà minora ritrana 10m rh irzárn Miráis ar zópar, Mirais min tri rö rös rir Enolphe misu, rédit d' airir q detrir d' diresse; C. D. 76. ; Cf. Tindale's tr. of Ex 8<sup>24</sup> 'The londe was marred with flyes.'

Digitized by Google

new wine into them (Mk 2<sup>22</sup>, dπολοῦνται, RV 'perish'). Jeremiah's girdle was marred by being put into a damp hole  $(13^7)$ , an illustration of the way in which J" will disfigure the pride of Judah and Jerusalem  $(13^9)$ . The visage of the servant of the Lord ' was so marred more than any man.' Cf. visage,' and better, Shaks. Jul. Cusar, III. ii. 201

- Kind souls, what, weep you when you but behold Our Casar's vesture wounded? Look you here, Here is himself, marr'd, as you see, with traitors.'

The Israelites were forbidden to mar the corners of their beard (Lv 1927: it is Tindale's tr. 'Ye shall not rounde the lockes of youre heedes, nether shalt thou marre the tuftes of thy beerde'). The next of kin was afraid that if he married Ruth he should mar (the same Heb. as of the marring of the land by mice, and the taking down of Judah's pride) his inheritance (Ru 4<sup>6</sup>). The full force of the word as used in AV will be seen from Ex 32<sup>6</sup> Tind. 'the be the set of the set of the large set of the large set of the large of the large set of t ford, *Letters*, No. xxx. 'Madam, many eyes are upon you, and many would be glad your Ladyship should spill a Christian, and mar a good professor. Lord Jesus, mar their godless desires, and keep the conscience whole without a crack."

J. HASTINGS.

MARA (קרא כרא) [so corrected by Kere]; B חנגאל, A Πικρία).—The name which Naomi claimed for herself: 'Call me not Naomi ('pleasant'), call me Mara (i.e. bitter): for the Almighty hath dealt very bitterly with me' (Ru 120). The Latin is able to retain the play upon the words by the use of Mara (id est anaram). H. A. REDPATH. Mara (id est ainaram).

MARAH (כָּרָה). - The first station of the Israelites after crossing the sea, mentioned only Ex 1523 and Nu 33<sup>8,9</sup>, from which passages it appears that it was distant three days' journey from the place of crossing. The difficulty of locating the latter has been pointed out under EXODUS, vol. i. p. 803. If we assume that the passage was in the neighbour-hood of Suez, then Wādy Hawarah, about 15 to 16 hours' camel-ride from 'the Wells of Moses' (nearly opposite Suez on the E. side of the Gulf of Suez) on the route to the convent of St. Katharine (the traditional Sinai), is a suitable identification. Wādy Amara, about 11 hour N. of this, or Wādy Ghurundel, about 2 hours to the S., have also been suggested, though the last is generally con-sidered to be Elim. If, on leaving Egypt, the Israelites went by the present haj route towards Akabah, then Marah must be somewhere on the plateau of the Tih (see EXODUS, ii.). If a more northerly position (near the Bitter Lakes) be assumed for the passage, then the position of Marah would not be far from the 'Wells of Moses,' and 'Ais Naba or Gharkadeh, about 1 hour to the N. of these wells, has been proposed. Brugsch's theory would place Marah in the neighbourhood of the Bitter Lakes. In the present state of our knowledge no identification can be made with any degree of probability. Descriptions of some of these sites are to be found in Robinson and Palmer.

The LXX gives for Marah in Ex 15<sup>23</sup> Mappá twice, but renders the word on its third occurrence by ILasia, endeavouring to indicate the meaning of the Hebrew word (cf. Thiersch, de Pent, Vers. Alex. 31 ft.). In Nu 33% it adopts the form ILasia. The manner in which the Yulg. employs amarus is worth quoting: 'eo quod essent amara, unde et congruum loco nomen imposuit, vocans illum Mara, id est amariudinem.' A. T. CHAPMAN.

שבאגאון פרעלה; Β Μαραγελδά, Α Μαριλά, Luc.  $Ma\rho a\lambda d$ ).—A place on the west border of Zebulun, vol. 111.-16

Jos 19<sup>11</sup>. The Pesh. has *Rāmath-ta'le'*, 'height of the fox.' The site is quite uncertain. For con-jectures see Dillm. *ad loc*. C. R. CONDER.

**MARANATHA.** — An expression used by the Apostle Paul in 1 Co  $16^{22}$  'If any man loveth not the Lord, let him be anathema maranatha.' It has somewhat perplexed the interpreters from early times quite down to the present. They have been puzzled to determine its connexion, its com-position, and its significance. The early Greek expositors who attempt to explain it (as Chrysost. Hom. 44 on 1 Co, Migne, 61, x. col. 377; Theodoret in Migne, 82, iii. 373; John of Damascus, Migne, 95, ii. 705; Theo. hylact, Migne, 124, ii. 793, etc., down to Euthym. Zig. *ad loc.* vol. i. 369, Athens, 1887), together with the early lexicographers (as Hesychius, ed. Schmidt, iii. 71; Suidas, ed. Gaisford, 2397, etc.), generally agree in translating it 'The (or 'our') Lord came' or 'has come.' This rendering is corroborated by marginal annotations in one or two of the later MSS (see Tisch. Nov. Test. Gr., ed. octava crit. maior, ad loc.); and with it agree, though amid some vacillation, the leading Lat. expositors also (as Jerome, *ad loc.*, Migne, 30, xi. 772; August., Migne, 33, vol. ii. 1161; Pseudo-Ambros. *ad loc.*, Migne, 17, iv. 276). But the association of the expression with 'ana-

thema' seems to have led gradually to a minatory interpretation of it, so that the phrase thus formed came to be regarded as a kind of reduplicated commination, or a curse reinforced by a prayer. Traces of its official use in this sense may be found as far back at least as the 7th cent. (see F. Kober, *Der Kirchenbann*, Tübingen, 1857, p. 40 f.; du Cange, *Gloss. med. et infim. Lat.*, ed. L. Favre, 1885, vol. v. *s.v.*; compare Tertull. *de Pudicitia*, § 14, where, however, the reading is doubtful); indeed, a still earlier instance of this use is afforded by one of the two or three occurrences of the term which are all that have yet been met with in extra-biblical Greek. A sepulchral inscription, believed to be of the 4th or 5th cent., from the island of Salamis (referred to by Schmiedel in the Hand-Commentar on Cor. l.c., 2nd ed. ii. 208 sq., and given in the *CIG* vol. iv. p. 475, inscr. 9303, Berlin, 1877), which marks the 'eternal home' of the 'reader' Agathon and his wife, for each of whom a separate compartment has been prepared, closes as follows: 'But if any private man or any other person dare to deposit a body here besides our two, let him give account to God, and be anathema maranathan' (sic). 'The Pauline order is de liated from here in the Greek, so that maranatha is separated by one word from anathema; but the maledictory import is plain. This imprecatory use of the expression was thought to be substantiated by its assumed correspondence to the third or his best degree of Jewish excom-munication, the Shammatha. The word Sham-matha (variously interpreted, see Buxtorf, Lex. Chald, etc. 2466) was held by some to mean 'The Lord cometh' (or, the name, being taken as a substitute for the tetragram), and thus to furnish an analogy which had been followed by the Apostolic Church. For this view the authority of such eminent Jewish scholars as Rabbi Solomon Ha-Levi, known among Christians as Paulus Burgensis (15th cent.), and Elias Levita in his *Tishbi* (16th cent.), has been unwarrantably claimed (cf. e.g. Leigh, Critica Sacra, s.v. Maparadá). For Elias makes no mention of maranatha, and follows Rab in the Talmud (Moed Katan, 17a; see Buxtorf, u.s.) in taking 'shimmatha' as equivalent to sham metha, 'there's death'; while Paulus Burgensis (in Lyra, vi. 61a, Basel, 1508) finds in 'anathema maranatha' a combination of the three alleged forms or grades of Jewish ecclesiastical censure, maranatha being a (post-apostolic) corruption from

MARANATHA

a mutilated 'macharam' (maran) and 'shammatha' (atha). Echoes, however, of the Talmudic interpretation of shammatha meet us, apparently, in Luther's 'accursed to death' ('maharam motha'), and the 'Let him be had in execration, yea, excommunicate to death' of the Genevan version of 1557; while W. Mace, in his NT Greek and English, 1729, gives simply 'Let him be accurst' as the rendering of the entire phrase. This imprecatory sense of the Pauline term, which was thus linked to supposed Jewish precedent, though without warrant either in philology or in fact (see John Lightfoot, Works, etc., ed. 1684, ii. '96 f., or Horæ in Acta apost. etc., Amst. 1679, p. 107 f.; Schürer, HJP II. i. 60 ff., received, nevertheless, the endorsement of such names as Beza, Bibliander, Bullinger, Capito, Calvin (cf. Suicer, Thesaurus, etc. i. 604; Pfeiffer, Dubia Vexata, etc. 4th ed. 1699, p. 944 sq. for references), and others too numerous to catalogue here. Illustration of its prevalence and persistency is afforded by its adoption in our English Bibles (with the single exception of the Rhemish) from Tindale's to the Authorized Version. Indeed, although a comma seems to have been inserted between 'anathema' and 'maranatha' as early as the Cambridge folio of 1629, it was removed again in Blayney's standard ed. of 1769, and is wanting in not a few modern editions (see Scrivener, Cambridge Paragraph Bible, Introd. p. Ixxxii, reprinted under the title The Authorized Edition of the English Bible, Cambr. 1884, p. 191). Other isolated instances occur of dissent from the prevalent theory that the words should be combined into a malediction. For example, in Robert Stephens' edd. of the Gr. text and 1633; an English Bible, also, bearing the imprint of Henry Hills, London, 1660, although it puts no stop after anathema, adds at maranatha the marginal note, 'That is, The Lord is come.' Nevertheless, the compound imprecatory interpretation has lived on quite to modern tinnes, and has even found its way into popular literature.

This opinion, however, may be said to be at length extinct in scholarly circles. It is not only confessed to be without intrinsic or historic foundation, but it conflicts with the intimations afforded by the independent use of the word in early Christian documents. The earliest is that in *The Teaching of the Apostles*, a document belonging to the early part of the 2nd cent. or possibly even to the early part of the 2nd cent. or possibly even to the 1st. The thanksgiving in connexion with the Eucharist, as there given ch. 10<sup>6</sup>, closes as follows: 'May grace come and may this world pass away. Hosanna to the God of David. If any man is holy, let him come; if any man is not, let him repent. Maranatha. Amen.' Plainly, then, the term has an inherent meaning wholly detached from an anathema; and the preceding words here, though permitting this meaning to be admonitory, are remote from any suggestion of imprecation. But in the *Apostolic Constitutions* (vii. 23, p. 209, 28, ed. Lagarde), where the same thanksgiving is substantially reproduced and expanded, any thought of malediction is conspicuously out of place: . . 'Gather us all together into thy kingdom which thou hast prepared. Maranatha. Hosanna to the Son of David; blessed is he that cometh,' etc.

But the acknowledgment that the term must be taken and interpreted by itself has rather increased than diminished the perplexity respecting its composition and meaning. Passing over attempts to analyze it which have found little favour, we may say that scholars now almost unanimously agree that the first part of the expression is the Aramaic word for 'Lord'; though as to whether the n is

# MARANATHA

a formative appendage (cf. rabban), or belongs to the prononinal suffix 'our,' they are not so harmonious. That it should be connected with the first half of the word and not the last is supported not only by the earliest MSS that divide the term, but by the use of marin by Philo (in Flaccum, § 6, ed. Mang. ii. 522, 47) as the current Syrian appellation for 'Lord,' as well as by extant Aram. inscriptions (see Nöldeke in ZDMG for 1870, p. 101). The chief problem, accordingly, lies in the last part of the term. If the second half of the compound is held to be atka, the Fathers were right in taking it as a past tense ( $\eta\lambda\thetaer$ ,  $\eta\kappa\epsilon_i$ , etc.: 'the' or 'our Lord kas come'), and understanding the advent in the flesh as referred to. But the explanations they give of the apostle's reference to this past event are far-fetched and unsatisfying; such as, 'whoever does not love him waits in vain for another,' or 'he has come; hence the folly of opposing him'—the words being assumed to be addressed to Jews: if spoken to Christians, they were thought to be designed to shame them for withholding love from one who has so humbled himself on their behalf, etc.

The obvious inappositeness, however, of an allusion to the past early began to tempt expositors to force the verb into a future reference, viz. to the final coming in judgment. This result has ordinarily been reached, at least in later times, by taking the past tense as 'prophetic,' i.c. as an emphatic declaration of the certainty of the future event by representing it as having already occurred: 'has come,' *i.e.* 'most certainly will come.' The incipient stage of this opinion appears in the 'in adventu domini' of certain Latin texts, and the 'donec adveniat' (or 'redeat') of Augus-tine and some later Fathers. But a prophetic or antijintery part torge here is more then oversite anticipatory past tense here is more than questionable grammatically; and its inappropriateness is indirectly conceded by modern expositors, who, as with one consent, substitute for it a present or a future in their translations: 'Our Lord cometh,' 'is at hand,' 'will come,' etc. Under these circumstances, certain Aramaic scholars have proposed to restrict the verbal part of the expression to the final syllable 'tha,' and understand the whole as an ejaculation : 'Our Lord, come !' Comwhole as an epacitation: Whole as an epacetation: Whole as an epacetation: Whole as the pacetation of the Jewish liturgies. See C. Taylor, The Teaching of the Twelve Apostles, p. 77 ff. One of the first to make this suggestion seems to have been Gustav Bickell of Innsbruck in the Ztschr. f. Kath. Theol. for 1884, vol. viii. p. 403, n<sup>3</sup>. During the same year, however, this opinion was shown by Halevy in the Rev. des études Juives, vol. ix. p. 9, to have the support of sundry inscriptions from Arabia, and was also advocated by Nöldeke in the GGAp. 1023 (in a review of Kautzsch's Granmatik, u.s.w.), where Wellhausen is cited as making the u.s.w.), where Wellhausen is cited as making the same suggestion (yet cf. GGN, 1895, p. 3, n. 2). Siegfried, also, in reviewing Kautzsch's work in Hilgenfeld's ZWTh., compares the frequent phrases 'in wn 'come and see,' yew wn 'come and hear,' and proposes to take  $\mu a \rho a r a \theta d$  as equiv. to  $\mu a \rho a r \theta d$ , signifying 'O (or 'our') Lord, come !' This supplicatory sense has been accepted by G. Wohlenberg (*Die Lehre der Zwolf Apostel*, u.s.w. 1888 n. 82 so.) Arnold Meyer (*Jecu Mutter*. 1888, p. 82 sq.), Arnold Meyer (*Jesu Muttersprache*, 1896, p. 50), who compares (p. 156 f.) sprache, 1890, p. 50), who compares (p. 1501.) Marna or Marnas (850 'our lord'), the name of the chief deity of Gaza (cf. the new edition of the deacon Marcus' life of Bp. Porphyrius of Gaza, Leip. 1895; also Stark, Gaza, u.s.w. 1852, pp. 576-583); and is sustained by G. Dalman in his Gram-matik des Jüd.-Paläst. Aramäisch, 1894, pp. 120, 907 of 169 \* 1 will doubtloss propria 297, cf. 162.\* It will doubtless prevail.

\* Dalman (Worts Jesu, i. 209) calls #177 the earlier and fuller form. See Zahn, Einl. in dus NT, i. § 18, Anm. 11.

i. THE FORM AND DUTIES OF MARRIAGE AS DEVELOPED UNDER THE INFLUENCE OF REVELA-TION.—The history of marriage, in the extent which here concerns us, is the history of a Semitic institution which by natural development had reached a comparatively excellent form, and which, under the successive influences of Judaism and Christianity, was gradually improved and perfected. The fresher problem relates to the evolution of Hebrew marriage anterior to its contact with OT revelation; and the difficulty is to do justice, neither more nor less, to the theories which have been propounded as to the early history of marriage, and which at certain points claim biblical support.

t

٩

計算

,ť

1. OT VESTIGES OF PRIMITIVE MARRIAGE.-The scriptural account of the origin and history of marriage cannot satisfy the thorough evolutionist. According to the biblical representation, its per-fect type was exhibited in the union of the first pair, upon this followed a declension to im-perfect forms and sexual licence, and finally Christianity summoned mankind to realize the ideal by reverting to the divinely instituted original. But on evolutionary principles the ideal is to be found, not at the beginning but at the end —if anywhere; and the problem is to show from what base beginnings, under what impulses, and by what stages, marriage as we understand it came to be, and to be entrenched behind the laws. The theory which has served as the basis of the discussion (M'Lennan, Prim. Mar.) distinguishes four stages in the development -(1) a state in which the unions of the sexes were 'loose, transisystem of polyandry, of which the lowest form is a kind of communal marriage, the highest the union of a woman with a band of brothers; (3) the reversal of polyandry in the system of polygyny ; and (4) as the result of prolonged experience, and also of changed conditions, an exclusive monogamy. For a time this scheme was generally accepted as an assured result of anthropological science, but during the last decade it has been subjected to searching criticism, esp. by Starcke and Westermarck, and has been discredited in various important points. In particular, there is growing incredulity as to the alleged original promiscuity. Though the poverty of primitive languages in words expressive of relationships lends it some support, the counterargument is stronger: human nature was suffi-ciently armed with jealousy, if not otherwise, to fight for and secure a better order from the first. As regards polyandry, it is not open to doubt that this form of union has played a part in human history of an importance which was till lately not even suspected. Still met with in widely remote parts of the globe, the custom of polyandrous marriage was yet more extensively prevalent in antiquity. The recollection of it is preserved in traditions and usages of the progressive nations of the old world, as well as in their notices of the manners of barbarians. It was doubtless at least one of the roots of the remarkable system of the Matriarchate, of which there are so many traces in ancient law, and which is still maintained by 'some score of peoples representative of all the great regions of the barbaric world.' But, im-portant as this discovery is, there is a growing conviction that M'Lenna exagereted. Even if conviction that M'Lennan exaggerated. Even if it be admitted (and it is not admitted by all competent authorities) that the matriarchal system was exclusively the outgrowth of polyandrous marriage, the proof would still be far from com-plete that polyandry had been a universal and necessary phase in the evolution of the institution of marriage.

By the Matriarchate, maternal system or 'mother-right' is
